BOOSEY & CO., music publishers and musical instrument manufacturers. This house was established in 1816 by Thomas Boosey. He commenced business as an importer of foreign music, and was one of the very few persons then engaged in that trade. Subsequently he became the English publisher for Hummel, Romberg, De Beriot, Rossini, Vaccaj, Mercadante, and other well-known composers. The house was afterwards identified with the Italian operas of Bellini, Donizetti, and Verdi, until 1854, when a decision of the House of Lords deprived it of all its foreign copyrights. This judgment caused the firm to lose 'La Sonnambula,' 'La Traviata,' 'Il Trovatore,' and 'Rigoletto,' four of the most valuable properties that have existed in the music trade.

This serious loss of copyrights caused the firm to change its character, and it has since devoted its attention to the publication of popular English music, and to the production of cheap and standard musical works. G.

In addition to their original business of music-

publishing, Boosey & Co. carry on an important business in the manufacture of wind instruments. This originated about the middle of last century, and has been gradually developed and extended. The first extension was in 1856, when the firm entered into arrangements with the late R. S. Pratten, the flautist, to work out his ideas in flutes, and to manufacture the instruments. In 1868 they purchased the business of Mr. Henry Distin, the acquisition of whose factory and plant enabled them to largely develop their brass instrument manufacture. In 1874, when the firm removed from Holles Street, Cavendish Square, to their present premises in 295 Regent Street, the name of Distin & Co., which had been used in connection with the section of the business formerly Henry Distin's, was given up, and the whole has been carried on since that date under the name of Boosey & Co. only. In 1876 the present manufactory at Stanhope Place, Marble Arch, was installed, and in 1879 the manufacture of clarinets and other reed instruments was added to the brass and flute departments. In addition to the Pratten model flutes, Boosey & Co. have another speciality in the patent compensating pistons for brass instruments (see VALVE), and have worked continuously at the improvement of the models of all wind instruments. D. J. B.

BORD, ANTOINE, piano-maker in Paris, was born at Toulouse in 1814. He learned his craft in Marseilles, then at Lyons, and when nineteen years old settled in Paris. He died in March 1888. His claims to special notice as a piano-maker are founded upon his invention, in 1843, of the pressure, or Capo Tasto, bar; his introduction in 1857 of the 'Bibi'—the French name of the ungrammatical English 'Pianette,'—a very small upright piano, and of a spiral hopper spring first employed in those instruments. A. J. H.

BORDES, CHARLES, born at Vouvray-sur-Loire, May 12, 1863, a pupil of César Franck, has devoted himself to the revival of the best church music in France ever since his appointment in 1887 as maître de chapelle at Nogent-sur-Marne; in 1890 he went to Paris to act in the same capacity at St. Gervais, and he was not long in making the choir of the church pre-eminent in the music of the finest schools. He gave Schumann's mass, op. 147, as well as Palestrina's 'Stabat Mater,' and in 1892 arranged a series of musical services, the 'Semaines saintes de Saint-Gervais,' which attracted so much attention that he founded an 'Association des Chanteurs de Saint-Gervais,' a society for the exclusive study of old church music of the 15th, 16th, and 17th centuries. A large number of concerts have been given by this society, notably a series during the Paris Exhibition of 1900; its success and popularity have not decreased since its rupture with the church from which it took its name, owing to the prohibition of the employment of female voices. For the society's use Bordes has published an *Anthologie des Maîtres religieux primitifs*; this, and a remarkable work, *Archives de la Tradition Basque*, undertaken under the authority of the Minister of Education in 1889 and 1890, made his name widely known. Bordes has also written orchestral pieces, given at the Société Nationale in Paris, chamber music, choral compositions, and a three-act musical drama, 'Les Trois Vagues,' not yet performed. He was the founder of the new 'Schola Cantorum,' in 1894, 'for the restoration of church music in France,' and its professor at the school established by this institution in 1896. G. F.

BORDOGNI, GIULIO MARCO, born in 1788 at Gazzaniga near Bergamo, pupil of Simone Mayr, appeared with great success as tenor at Milan from 1813 to 1815, and was engaged at the Théâtre Italiene, Paris, from 1819 to 1833. His chief claim to remembrance is based on his great renown as a teacher of singing; he was engaged from 1820 to 1823 at the Paris Conservatoire, and after an interval again appointed, retaining his place for many years. He wrote a large number of 'vocalises' of great practical use. He died in Paris, July 31, 1856 (Riemann's *Lexikon*).

BORDONI, FAUSTINA. [See HASSE.]

BORGHI, ADELAIDE, formerly a celebrated mezzo-soprano singer, well known as Borghi-Mamo, was born in 1829 at Bologna. She showed as a child great aptitude for singing, and received instruction or advice from Pasta, and was also later advised by Rossini to adopt a musical career. She made a successful début in 1846 at Urbino in 'Il Giuramento' of Mercadante, and was engaged there. She sang next at Malta, where in 1849 she married Signor Mamo, a native of that place; she sang also at Naples, Florence, Leghorn, etc.

Madame Borghi-Mamo appeared in Italian opera in 1854-56, at Vienna in the spring, and in the winter at Paris, and was highly successful. In Paris, on Dec. 23, 1854, she played Azucena, on the production there of 'Il Trovatore,' Leodato on revival of Pacini's 'Gli Arabi nelle Gallie,' Jan. 24, 1855, Edoardo ('Matilde di Shahran'), Arsace, Rosina, La Cenerentola, etc. From 1856 to 1859 she sang with the same success at the Grand Opera, among other parts Azucena on production of 'Trovatore' in French, Jan. 12, 1857, Melusine (Halévy's 'Magicienne'), March 17, 1858, Olympia (Félicien David's 'Herculanum'), March 4, 1859, in the production of those operas; and as Fidès, Leonora, and Catarina on the respective revivals of 'Le Prophète,' 'La Favourite,' and 'La Reine de Chypre' (Lajarte, *Bibliothèque de l'Opéra*). She went back to the 'Italiens' and played the title part in the production of Braga's 'Margherita la Mendicante,' Dec. 20, 1859, Desdemona, etc.

On April 12, 1860, Madame Borghi-Mamo first appeared in England at Her Majesty's as Leonora ('La Favorita'); she sang during the season as Des-

demona, Rosina, Azucena, Maffio Orsini, Zerlina ('Don Giovanni'), and Urbano ('Les Huguenots'), and was generally well received both by press and public. 'She is not only one of the most accomplished singers, but also one of the finest actresses of the lyric stage' (*Musical World*, May 5, 1860). She also sang with great success at the Philharmonic, New Philharmonic, at the Norwich Festival, and in opera in the provinces. She never reappeared in England, but returned to Italy and sang at Milan, afterwards at Paris, Lisbon, etc. She is now living in retirement at Florence.

A daughter ERMINIA, a soprano, has sung with success in Italian opera in Italy, Paris, Madrid, and Lisbon, and in 1875 played Margaret and Helen of Troy in the reproduction of Boito's 'Mefistofele' at Bologna. A. C.

BORGHI, LUIGI, a violinist and composer; pupil of Pugnani; appeared in London as a violinist in 1774, as a viola-player in 1777, and settled here in about 1780; he was leader of the second violins at the Handel Commemoration in 1784. He published 'Litanies de la Vierge à 4 voix' in Paris; violin solos; duos for violins, violin and alto, violin and cello; violin-concertos; symphonies for orchestra, and a set of Italian canzonets. P. D.

BORJON, CHARLES EMMANUEL (incorrectly Bourgeon), DE SCELLERY, advocate in the Parlement of Paris, author of many law-books, and an eminent amateur, born about 1633, died in Paris May 4, 1691. He was a remarkable performer on the musette, and author of a *Traité de la Musette* (Lyons, 1672), which contains a method of instruction, plates, and airs collected by him in various parts of France. Borjon was evidently a man of culture. He excelled in cutting out figures in parchment, some of which were noticed and valued by Louis XIV. M. C. C.

BORODIN, ALEXANDER PORPHYRIEVICH, born at St. Petersburg, Nov. 12, 1834, was the illegitimate son of a Prince of Imeretia. He was brought up by his mother, who gave him every educational advantage. In boyhood he showed great love of music, and still more marked aptitude for science. He chose the medical profession, and served two years in a military hospital. From 1859 to 1862 he studied abroad at the Government's expense, and soon after his return, at the early age of twenty-eight, was appointed assistant professor of chemistry at the Academy of Medicine, St. Petersburg. In 1862 Borodin met Balakirev, whose enthusiasm rekindled his own former love of music and gave it a more serious intention. He now became one of Balakirev's most fervent disciples, and devoted all his leisure to the study of harmony and composition. Henceforward, he engaged in that strenuous endeavour to serve two masters, which probably accounted for his comparatively early death. He made his mark in the world of science no less clearly than in that of art, leaving not only numerous important treatises on chemistry, but taking an active part in founding the School of Medicine for Women, where he lectured from 1872 until the day of his death. In 1877 Borodin, with two of his pupils, made a kind of scientific and musical pilgrimage across Germany, with Weimar for its final goal. Liszt was at that time the reigning monarch there, and it is his court and school which Borodin describes in the series of delightful letters to his wife, afterwards published by his friend and biographer Vladimir Stassov. These letters present an incomparable portrait of the great virtuoso, and reveal his intimate views upon the music of the New Russian School. Between 1885 and 1886, Borodin and Cui, at the suggestion of Countess Mercy Argenteau, paid two visits to Belgium. In Brussels, Liège, and Antwerp, Borodin's two symphonies and his symphonic sketch 'In the Steppes of Central Asia' were most cordially received. Borodin married in 1863 Mlle. Catharine Protopopova, an accomplished amateur, who initiated him into the styles of Chopin and Schumann. In winter, Madame Borodin's health compelled her to seek the drier climate of Moscow, and it was during one of these enforced separations that Borodin died suddenly in St. Petersburg, on Feb. 28, 1887. On the previous day he wrote to his wife: 'To-morrow we have a musical party here. It will be very grand—"il y aura de la bougie," as Mürger says in *La Vie de Bohême* . . . I must not unveil the mysteries!' The party took place. Borodin, who was strikingly handsome, after the oriental type inherited from his father, wore the Russian national dress. While conversing gaily with his guests, he was seen to stagger, and succumbed instantaneously to a ruptured aneurism. He was sincerely regretted by his friends and students, for his modesty, benevolence, and single-heartedness left an ineffaceable impression on all who came in contact with him.

Borodin joined Balakirev's circle with a purely amateur equipment. He played the piano and violoncello tolerably well; adored Mendelssohn's chamber-music; knew little of Beethoven; nothing of Schumann; and—having spent his life in the capital—was not versed in the folk-music as were Rimsky-Korsakov and Moussorgsky. Intercourse with Balakirev revolutionised his views and aims. Like Glinka, he realised his powers and his nationality simultaneously. 'Borodin,' says Stassov, 'is a national poet in the highest sense of the word.' His First Symphony, in E flat major, begun in 1862, is conventional as regards form, and shows a wonderful command of technical resources for the work of a mere amateur. The national element is already discernible, especially in the trio of the Scherzo and the Adagio. But it was not until he undertook, at Stassov's suggestion, to compose an opera on the subject of 'The Epic of the Army of Igor,' that he began to feel his way to complete independence. This rhapsody, or prose-poem, is the

most interesting of all the mediæval Russian chronicles. Its historical significance may, perhaps, be compared with that of the Arthurian legends. It was an inspiring theme for a composer of patriotic proclivities; moreover, it offered an oriental element, which, contrasted with the Russian style, gave scope for great variety of musical colouring. 'Prince Igor' is rather a melodic than a declamatory opera. Borodin had more gift for cantilena than for recitative, and clung to the old operatic divisions; therefore 'Prince Igor' approaches more closely in form and style to Glinka's 'Rousslan and Lioudmilla' than to Dargomijsky's 'Stone Guest'; while in its racy humour and robust realism it claims some affinity with Moussorgsky's national music-dramas. 'Prince Igor' contains scenes—such as the orgy in the camp of the Polovtsi—which seem barbaric to western taste, but its wealth of contrasting character, skilful combination of tragedy and comedy and its impassioned love-music, entitle it to rank as one of the finest of national operas. The spirit of pessimism which overshadows Russian poetry and fiction has also found its way into opera: the cheerful major colouring and healthy popular optimism of 'Prince Igor' form an agreeable exception to the rule. 'Borodin,' says Cheshikhin, in his *Russian Opera*, 'is an admirable foil to Tchaikovsky.' This opera, left unfinished at Borodin's death, was completed by Rimsky-Korsakov and Glazounov, and published by Belaiev in 1889. The Second Symphony, in B minor, and the symphonic sketch 'In the Steppes,' both owe their origin to patriotic sentiment. Borodin was not strongly attracted to the innovating principles of the New School, but the Second Symphony has something like a definite programme. Speaking of this work, M. Stassov says: 'It owes its strength chiefly to the national character of its subject. The old heroic Russian sentiment predominates as in 'Prince Igor.' 'In the Steppes,' composed for a representation of *tableaux vivants* in honour of the twenty-fifth anniversary of the reign of Alexander II., is the most generally popular of all the composer's works. It has been frequently heard in London. Borodin left a few beautiful songs—about twelve in all—to some of which he wrote his own words. In these we find the same distinction of style and poetical feeling which characterise his orchestral and operatic music. From the technical side, his songs are remarkable for certain peculiarities of harmony, such as the frequent use of the augmented second and sequences of whole tones. They are like the folk-songs in their characteristic changes of rhythm.

The following is a complete list of Borodin's works:—

1. First Symphony in E flat major. (1862-67.)
2. Four Songs. (Jurgenson, Moscow.)
3. Four Songs. (Bessel and Co., St. Petersburg.)
4. First String Quartet, in A major, on a theme from the finale of Beethoven's quartet, p. 130. (Finished 1878.)
5. Second Symphony in B minor. (1871-77.)
6. The Paraphrases, twenty-four variations and fourteen pieces for piano, 'on a favourite theme' (*i.e.* the childish tune known in Germany as the 'Coteletten Polka,' and in England as the 'Chopsticks Waltz'). The Polka, Marche Funèbre, and Requiem are by Borodin, the other members of the new Russian school, and Liszt, being among the contributors.
7. In the Steppes of Central Asia. Symphonic Sketch. (1880.)
8. Petite Suite for pianoforte, dedicated to Countess Mercy Argenteau. (1885.)
9. Scherzo in A flat major, for orchestra.
10. Septains: verses for voice and pianoforte, dedicated to Countess Mercy Argenteau. (1886.)
11. Quartet on the name B-la-f, by Borodin, Rimsky-Korsakov, Liadov, and Glazounov.
12. Serenata Espagnola, for the pianoforte (four hands).

POSTHUMOUS WORKS.

13. Second Quartet, in D minor.
14. Prince Igor: opera in four acts with a prologue.
15. Arab Melody, for voice and piano.
16. Song to words by Poushkin. (Composed in 1881 on the death of Moussorgsky.)
17. Sérénade de quatre galants à une Dame. Humorous quartet for male voices.
18. Song, words translated from Count A. Tolstoi: 'La Vanité marche en se gonflant.'
19. 'Chez Ceux-là et Chez Nous.' Song with orchestral accompaniment. Words translated from Nekrassov.
20. Two movements of a Third Symphony in A minor, orchestrated by A. Glazounov.
21. Finale of 'Mlada,' an unfinished opera-ballet, orchestrated by Rimsky-Korsakov.

R. N.

BOROSINI, Francesco. This admirable tenor singer was born at Bologna, according to Fétis, about 1695; and in 1723 was one of the principal singers at the Grand Opera at Prague. Very little more of his history is known; but we have evidence that he came, with his wife, to London in 1724, and sang in operas; as in 'Artaserse' by Ariosti, and Handel's 'Tamerlane.' In 1725 he appeared in 'Rodelinda' and 'Giulio Cesare' by Handel, in Ariosti's 'Dario,' and the pasticcio 'Elpidia' given by the former master, with recitatives of his own. The names of Borosini and his wife are not found again in England after 1725. His wife, Leonora, née D'Ambreville, was originally French, and was a very remarkable contralto singer. In 1714, according to Fétis, she sang at the Palatine Court, and was engaged in 1723 for the Grand Opera at Prague, with her husband. When they were married is not known, but that they came to England together in 1724 is certain, for her name is found in the casts of the same operas in which he also performed. In 'Dario' and 'Elpidia' she is called Signora Sorosini, but this is a mere misprint. It is only curious that it should occur in two different works. J. M.

BORTNIANSKY, Dimitri Stepanovich, was born at Gloukoff, a village of the Ukraine, in 1752, and early showed remarkable ability. He studied in Moscow and in Petersburg under Galuppi, at that time capellmeister there. Galuppi soon left Russia, but the Empress Catherine supplied Bortniansky with funds to follow him to Venice (1768). He afterwards studied in Bologna, Rome, and Naples. The motets he composed at this period are not remarkable except for richness of harmony. Pälschlich counts him among the opera-composers then in Italy. His 'Creonte' was given in Venice in 1776, and his 'Quinto Fabio' at Modena in 1778. In 1779 he returned to Russia, and became director of the Empress's church-choir (later—1796—called the 'Imperial Kapelle'), which he thoroughly reformed, and

for which he composed 35 sacred concertos in 4 parts, 10 concertos for double choir, and a mass for 3 voices. It was this choir which was placed at the disposal of Boieldieu when, as chapel-master at Petersburg, he was commissioned to compose the music for Racine's 'Athalie.' Bortniansky has the merit of reducing Russian church music to a system. His works were edited by Tchaikovsky and published at St. Petersburg in 10 volumes. He died Sept. 28 (Oct. 9), 1825. F. G.

BORWICK, LEONARD, born at Walthamstow, Essex, Feb. 26, 1868, the son of an eminent amateur violoncellist, Alfred Borwick, an ardent lover of the best music, and a great friend of Piatti and many other musicians. His son's first pianoforte lessons were taken at the age of five from an organist at Tottenham named King, and when he was eleven he had lessons from Henry Bird at a school at Blackheath. In 1883 he went to Frankfort and was a pupil of Frl. Marie Schumann for a year, after which he was promoted to learn from Mme. Clara Schumann. His début took place at one of the 'Museum' concerts at Frankfort in Nov. 1889 in Beethoven's E flat concerto; in the following May he made his first appearance in London at a Philharmonic Concert of May 8 in Schumann's concerto; and a year after he played Brahms's D minor concerto under Richter at one of the Vienna Philharmonic Society's concerts. Thus he was early identified with three of the greatest pianoforte concertos in existence, works of which his interpretation is especially admirable. Since that time his career has been uniformly successful, and he has always upheld the dignity of his art; he is perhaps the typical representative of Mme. Schumann's school, although in later years he has acquired some characteristics that are not generally associated with her. No one but the composer himself can play Saint-Saëns's music better than Borwick, and in the best things of Liszt he is remarkably successful. Still his deepest affections are given to the classical masterpieces, and of them there are few interpreters so completely satisfactory. For many years his chief appearances in London were in the recitals he gave jointly with Mr. Plunket Greene; he has very often played in Germany, in Paris, and in Norway and Sweden, and some of his most memorable performances have been in association with Joachim and his quartet. M.

BOSCHI, GIUSEPPE, said to have been a native of Viterbo, was the most celebrated basso of the 18th century. Of his early life, his teacher, or of his first appearance, absolutely nothing is known. To Fétis his very name is unknown. Chrysander (*Händel*, i. 244) believes him to be the singer of the extraordinary part of Polifeme in Handel's early cantata at Naples in 1709, a portion of which was transferred to 'Rinaldo.' It is at any rate certain that on Feb. 24, 1711, he sang for the first time in London the part of Argante in that opera (Handel's first in London) at the Haymarket Theatre. It is strange enough that Argante was afterwards sung in 1717 by Berenstadt, a German alto, and in 1731 by Francesca Bertolli, a contralto. After this there is a blank in Boschi's history until Handel's return to London. In 1720 we find him again supporting with his magnificent voice the 'Radamisto' of Handel, and Bononcini's 'Astartus.' It is very probable, but not certain, that he was the original Polyphemus of 'Acis and Galatea,' performed privately at Cannons, the seat of the Duke of Chandos; there was then no other basso here capable of singing that part, and Boschi was already singing for Handel. In 1721 he was in the cast of 'Muzio Scevola,' the third act of which was Handel's, as also in those of 'Arsace' by Orlandini and Amadei, 'L' Odio e l' Amore' (anonymous), and Bononcini's 'Crispo.' On Dec. 9, 1721, he took part in the first representation of Handel's 'Floridante,' and on Jan. 12, 1723, in that of 'Ottone,' and of 'Flavio' on May 14; besides which he sang in the 'Coriolano' of Ariosti, and 'Farnace' of Bononcini, and in 1724 in Handel's 'Giulio Cesare' and 'Tamerlane,' Ariosti's 'Artaserse' and 'Vespasiano,' and Bononcini's 'Calfurnia.' From this date he sang for Handel in all the operas during 1725, 1726, 1727, and 1728. In 1728 he sang in 'Siroe,' 'Tolomeo,' and a revival of 'Radamisto.' Then came the break-up of the company, and Boschi's name appears no more. After he died, or retired to his native country, he was succeeded in 1729 by J. G. Riemschneider. It was unfortunate for Boschi, with his fine voice and execution, that he appeared in Handel's early time, when the operas were written chiefly for women and evirati; when tenors were rarely employed, and the basso only recognised as a disagreeable necessity. Towards the end of this period Handel began to write more freely for basses, and some fine airs fell to the share of Boschi, such, for example, as 'Finche lo strale' in 'Floridante,' 'Nò, non temere' and 'Del minacciar' in 'Ottone,' 'Tu di pietà' in 'Siroe,' and 'Respira almen' in 'Tolomeo.' His voice was very powerful, and he could hold his own against Handel's accompaniments, which appeared very noisy to critics of those days. In a satire called 'Harlequin Horace, or the Art of Modern Poetry,' 1735, this line occurs,—

And Boschi-like be always in a rage,

to which the following note is appended: 'A useful performer for several years in the *Italian* operas, for if any of the audience chanced unhappily to be lulled to sleep by these soothing entertainments, he never failed of rousing them up again, and by the extraordinary fury both of his voice and action, made it manifest that, though only a tailor by profession, he was *nine*

times more a *man* than any of his fellow-warblers.' His wife, FRANCESCA VANINI, a contralto, had been a great singer, but came to London when much past her prime and her voice failing. She sang in 1711 as Goffredo in Handel's 'Rinaldo'; but in 1712 this part was given to Margarita de l'Épine, and Boschi's wife appeared no more. J. M.

BOSIO, ANGIOLINA, born at Turin August 22, 1830, belonged to a family of artists, both musical and dramatic. She was educated at Milan, and learned singing under Cataneo. She made her first appearance at the age of sixteen, July 1846, in 'I Due Foscari' at Milan. After a short time she went to Verona, and thence to Copenhagen, confirming at each place the promise of excellence which she had already given. At Copenhagen no effort was spared to retain her for a prolonged engagement, but the climate was intolerable to her. She next appeared at Madrid, where she was enthusiastically applauded, and her re-engagement demanded unanimously. In 1848 she appeared in Paris in 'I Due Foscari,' but this time without effect. She went immediately to the Havana, and thence to New York, Philadelphia, and Boston. At all these places she was much admired. In 1851 she returned to Europe, and married a Greek gentleman named Xindavelonis. She was engaged for the next season by Mr. Gye at Covent Garden, and made her début in 'L'Elisir d'Amore,' July 15, 1852. Of her person all could judge; but her voice seemed wiry, strange, perpetually out of tune, and her execution wild and ambitious. Never was a first appearance more scant in musical promise of one who was destined during her short career to become so deservedly great a favourite. But Madame Bosio was curiously made up of contradictions. Her features were irregular and ill-formed; yet on the stage she was so pleasing as to be known by the sobriquet of 'Beaux yeux.' 'Next to Madame Sontag, she was the most ladylike person whom I,' says Mr. Chorley, 'have seen on the stage of the Italian Opera. She had a certain condescending gracefulness, which made up for coldness. This demeanour, and her happy taste in dress, had no small influence on the rapid growth of her popularity, which grew to exceed that of Madame Persiani, whom she replaced, and whom by many she was thought to surpass, though in no respect her equal as a singer.' At the end of this season she made her first hit in 'I Puritani,' taking the place of Grisi, who had declined to sing. This was the turning-point of Bosio's fortune. During the winter she was the prima donna at Paris, and reappeared in the next spring in London in 'Matilda di Shabran,' 'Jessonda,' and 'Rigoletto.' The latter was produced May 14. 'Her gay handsome face, her winning *mezzosoprano* voice, not without a *Cremona* tone in it, redeeming the voice from lusciousness, and her neat, lively execution, were all displayed in this part, short as it is.' From this date Bosio met with nothing but most brilliant success. In 1854 she reappeared in 'Il Barbiere,' and the critics had no words too glowing to express their admiration. In 'I Puritani' she was, with the exception of course of Grisi, the best Elvira that had been seen. The winter season found her again in Paris, and the spring of 1855 in London at the Royal Italian Opera,—in 'Ernani' and 'Le Comte Ory.' She sang at the Norwich Festival, receiving £300 for four days. That same year she accepted an engagement at St. Petersburg, the terms being 100,000 francs for four months, with a guaranteed benefit of 15,000 francs and a permission to sing at private concerts. Her success was extraordinary. Thence she went to Moscow. In 1856 she returned to Covent Garden. Her most remarkable performance was in 'La Traviata,' in which she presented a very different reading of the character from that of Mlle. Piccolomini at the other house. In 1857 she reappeared in 'La Traviata, and in 'Fra Diavolo' with Gardoni and Ronconi. In 1858, after again singing at St. Petersburg with the greatest success, she returned to London in May and reappeared at the new theatre, Covent Garden. Returning again to St. Petersburg she was nominated première cantatrice, an honour never bestowed before. On April 12, 1859, she suddenly died. Her delicate constitution could not endure the rigorous climate of Russia. Never was the loss of an admired singer and charming artist more acutely felt by the whole musical public. She was buried with public ceremonial, April 15, in the cathedral vaults at St. Petersburg. J. M.

BOSSI, MARCO ENRICO, born at Salò near Brescia, April 25, 1861, the son of the organist of Morbegno. He was at the Liceo Musicale, Bologna, in 1871-73, and from the latter year to 1881 at the Conservatorio of Milan under Ponchielli for composition and Fumagalli for organ. On leaving the school he became organist and maestro di cappella at Como Cathedral, and from 1891, when he gave up that post, until 1895, was professor of the organ and theory at the Conservatorio of Naples. On Jan. 1, 1896, he was appointed director of the Liceo Benedetto Marcello, Venice. He was also professor of composition in the same school, and conductor of the 'Benedetto Marcello' concerts in Venice. In 1902 he became director of the Liceo Musicale, Bologna. As an organist he maintained the highest and best traditions of the Italian school of the past, and his *Metodo di Studio per l'Organo moderno*, written in conjunction with G. Tebaldini (Milan, 1893), is a standard work. His compositions are marked by great boldness of harmonic treatment, much originality of design and a certain severity of style. It was no doubt this last quality (well illustrated in a suite, inscribed 'Res severa magnum gaudium,' op. 54), which induced him to give up operatic composi-

tion, in which he made three attempts in early life ('Paquita,' 1 act, Milan, 1881; 'Il Veggente,' 1 act, Milan, 1890; and 'L' Angelo della Notte,' 4 acts, Como). A great number of motets, cantatas, masses, and other sacred works were composed and performed at Como; a symphonic poem, 'Il Cieco,' for tenor solo, choir, and orchestra, was written in 1897, an 'Inno di Gloria,' for choir and organ, has been performed twice by the Riedel'sche Verein, Leipzig, a society which brought out his 'Cantico dei Cantici,' on March 14, 1900 (see the *Rivista Musicale*, vol. vii. p. 780). In instrumental music, an orchestral overture is numbered op. 1; and an impromptu for orchestra, op. 55. An organ concerto is op. 100, and a great number of organ pieces of different kinds are in his list; in chamber music, a very fine violin sonata in E minor, two trios for piano and strings, in D minor and D major respectively, are to be mentioned, and many pianoforte pieces and songs testify to the fertility of his genius. His most ambitious work, so far, is a cantata or oratorio, 'Il Paradiso Perduto' (op. 125), on a poem after Milton by L. A. Villanis, performed at Augsburg, Dec. 6, 1903. M.

BOSTON MUSICAL SOCIETIES. The following societies, which give, or have given, concerts regularly for the edification of the public in Boston (U.S.A.), are described in the order of their age.

THE HANDEL AND HAYDN SOCIETY is the largest, and, with one[1] exception, the oldest living musical organisation in the United States. It dates from March 30, 1815, when sixteen gentlemen met in answer to an invitation dated six days before, signed by Gottlieb Graupner, Thomas Smith Webb, and Asa Peabody, to consider 'the expediency of forming a society for cultivating and improving a correct taste in the performance of sacred music, and also to introduce into more general practice the works of Handel, Haydn, and other eminent composers.' At a second meeting a fortnight later, a set of rules was adopted, and Matthew S. Parker was elected Secretary. The first board of government was completed at the third meeting, April 20, 1815, by the election of Thomas Smith Webb as president, Amasa Winchester vice-president, and Nathaniel Tucker treasurer, and nine others as trustees.

The state of music in Boston was at this time very low. The 'Massachusetts Musical Society,' formed in 1807, was extinct. The Philharmonic Society—for orchestral music only—was still in existence; but of professional musicians there were probably not a score in the town. The society's first musical utterances were from the 'Lock Hospital' and other collections of hymn tunes then in general use in New England. By degrees, and as its numbers grew, music of a higher order was rehearsed. Early in September, 1815, the project of a 'public exhibition' assumed importance. And on the night of the following Christmas, at the Stone Chapel, in the presence of a thousand auditors, the society gave to the public the first taste of its quality. The chorus numbered about a hundred, of which perhaps ten were ladies; an orchestra of less than a dozen and an organ furnished the accompaniments; the programme was long and varied, and included selections from the 'Creation' and the 'Messiah,' and other works by Handel. An enthusiastic journalist declared that there was 'nothing to compare with it,' and that the society was 'now the wonder of the nation.' The concert was repeated on Jan. 18, following.

The State legislature having granted, Feb. 9, 1816, a special charter, wherein the purpose of the society 'to extend the knowledge and improve the style of church musick' was recognised, a new code of rules was framed, and other means adopted to strengthen the efficiency of the organisation. The records of the first decade furnish abundant evidence of the poverty of the musical resources of Boston. With the hope of securing better organists than were available at home, liberal offers were made to musicians in New York and Philadelphia. On one occasion there was an undisguised fear that a certain concert must be postponed 'in consequence of the want of an organist.' In the early concerts the solos were sung by members of the choir. The first engagement of a professional vocalist was that of Mr. Thomas Phillips, in April, 1818, to whom was paid the extraordinary sum of 400 dollars for two concerts. The following list presents the names of eminent artists who have appeared at the society's concerts: English—Mmes. Anna Bishop, Patey, Parepa-Rosa, Catherine Hayes, and Edith Wynne; Messrs. Braham, Cummings, Hatton, Incledon, Edward Lloyd, Patey, Henry Phillips, and Santley; Continental—Mmes. Alboni, Caradori-Allan, Grisi, Lilli Lehmann, Nilsson, Rudersdorff, Sontag, and Tietjens (whose last appearance in America was at a concert by the society); Messrs. Formes, Stigelli, Mario, etc.; American—Mmes. Clara Louise Kellogg, Nordica, Antoinette Sterling, etc.; Messrs. Charles R. Adams, Thomas Ball (the eminent sculptor), Myron W. Whitney—and many others.

It was not until the 17th concert, Dec. 25, 1818, that a complete oratorio was performed. This was 'The Messiah.' Liberal selections from the work had however been given at the previous concerts. The following list of works, with the year of first performance, contains the most important choral compositions produced in the course of the 88 seasons which have passed (1815-1903). Of the compositions named few had been heard in Boston, or even in America, before their performance by the society.

[1] *The Stoughton Musical Society*, formed Nov. 7, 1786. Stoughton is an inland town about twenty miles from Boston.

Handel's Messiah (1818), Dettingen Te Deum (1819), Samson (1845), Judas (1847), Solomon (1855), Israel (1858), St. Cecilia (1863), Jephthah (1867), Joshua (1878); Haydn's Creation (1819), Mass in B♭ (1829), Seasons (1875); Bach's Passion (1874), Christmas Oratorio, Parts 1 and 2 (1877); Mozart's Mass in C (1829), Requiem (1857); Beethoven's Mount of Olives (1833), Ninth Symphony (1853); Spohr's Last Judgment (1842); Mendelssohn's St. Paul (1843), Elijah (1848), Lobgesang (1858), Psalm xlii. (1866), do. xcv. (1868), Hear my Prayer (1874), Christus (1874); Rossini's Stabat (1843), Moses in Egypt (1845); Bennett's Woman of Samaria (1871); Costa's Eli (1857), Naaman (1889); Verdi's Requiem (1878); Berlioz's Flight into Egypt (1879); Sullivan's Prodigal Son (1878); Handel's Utrecht Jubilate (1880); Mendelssohn's Psalm xliii. (1860); Saint-Saëns' Deluge (1880); Graun's Death of Jesus (1882); Gounod's Redemption (1883); Rubinstein's Tower of Babel (1883); Paine's Nativity (1883); Cherubini's D minor Mass (1883); Bruch's Arminius (1883); Bach's Ein' feste Burg (1883); Gounod's Mors et Vita (1886); Bach's B minor Mass (1887); Berlioz's Te Deum (1886); J. C. D. Parker's St. John (1890); Dvořák's Stabat Mater (1891); Mrs. Beach's Mass in E flat (1892); Chadwick's Phœnix expirans (1893); H. W. Parker's Hora Novissima (1894); J. C. D. Parker's Life of Man (1895); Schumann's Paradise and Peri (1899); Gounod's Gallia (1902); Th. Dubois's Paradise Lost (1903).

Excluded from this enumeration are those occasions when selections only were sung; as well as numerous concerts at which the society formed only a part of the choir, or which were not given under its own direction; the most important of these have been ceremonies of public rejoicing or mourning, dedicatory exercises, musical festivals at New York, and the Peace Jubilees at Boston in 1869 and 1872. The number of concerts given during a season has varied in accordance with the public demand: it has been as low as one and as high as twenty-three. The support of the society is nearly all derived from the profits of its concerts. New members pay an initiation fee of five dollars, and it has sometimes been necessary to levy a special assessment to pay off outstanding debts. There is a permanent trust fund, the nucleus of which was formed from the earnings of the festival of 1865, and which, by subsequent earnings, interest, bequests, and donations, amounted in 1878 to 12,000 dollars; the income is available at the discretion of the board of government.

Festivals, modelled on those of Birmingham, have been held. The first occurred in 1857. The fiftieth anniversary was celebrated in May 1865, by a week's performances. Triennial festivals were regularly held, beginning in 1868. On each of these occasions, excepting that of 1877, a guarantee fund has been subscribed by the friends of the society.

The fifth triennial festival was given in May 1880, and the sixth in May 1883. The bicentenary of Handel's birth was celebrated on Feb. 22, 1885, by a concert of selections from several of Handel's oratorios. Since that time only one festival has been given. That was in 1890 to celebrate the seventy-fifth anniversary of the founding of the society. At this festival were sung 'Elijah,' the first two parts of Bach's 'Christmas Oratorio,' J. C. D. Parker's 'St. John' (composed for the occasion), 'The Redemption,' and 'Israel in Egypt.'

In pursuance of its avowed purpose to improve the style of church-music, the society, in its earlier days, published several volumes of anthems and hymn-tunes, established lectures on musical topics, and formed singing classes. The publications quickly became standard, and large profits were realised from their sale. Oratorios were also published under its supervision. By these means, and by the generally high standard of its concerts, the society has largely contributed to the elevation of musical taste in Boston, and has prompted the formation of similar associations all over the Union.

The number of members, active and retired (the latter a voluntary condition, after twenty years' service), at present is about 300. The active choral force is 600 strong. The female choristers have never been members, technically, the system of annually inviting the aid of their voices having obtained *ab initio*. Mr. Chas. E. Horn was the first regularly chosen musical director (1847), the president having until then performed the duties of a conductor, in accordance with a provision in the by-laws. In 1850, Mr. Charles C. Perkins, being president, assumed the baton. Since then, a conductor has been appointed by the board of government as follows: J. E. Goodson, 1851; G. J. Webb, 1852; Carl Bergmann, 1852; Carl Zerrahn, 1854. Mr. Zerrahn continued in the post of conductor till 1895. He was then succeeded by Mr. B. J. Lang, who was elected for the seasons of 1895-96 and 1896-97. Mr. Zerrahn returned for the season 1897-98, but gave way to Mr. Reinhold L. Herman in the season 1898-99. Next season Mr. Emil Mollenhauer was made conductor, and has held the position ever since. The following have been appointed organists:—Samuel Stockwell; S. P. Taylor; S. A. Cooper; J. B. Taylor; Miss Sarah Hewitt; Charles Zeuner; A. U. Hayter; G. F. Hayter; F. F. Mueller; J. C. D. Parker; B. J. Lang; H. G. Tucker. In 1887 Mr. George H. Chickering succeeded Charles C. Perkins, who died after serving the society as president for twelve years. Mr. Chickering was followed by Mr. A. Parker Browne a year later; George F. Daniels is president at the present time, and William F. Bradbury secretary.

Rehearsals are regularly held on Sunday nights during the season (October to April inclusive), and the majority of the concerts also occur on Sundays.

HARVARD MUSICAL ASSOCIATION, THE, sprang in 1837 from a half-social, half-musical club formed in 1808 among the undergraduates in Harvard University, and known as the 'Pierian Sodality.' Besides strengthening the ties of friendship, it was the hope of the founders to raise the standard of musical taste in the college; to prepare the way for a musical professorship there; and to collect a library which should contain both music and musical literature in all its branches. These hopes have all been fulfilled. Furthermore, by means of its public concerts, the taste of music-lovers in Boston has been elevated, and a marked influence exercised on the composition of concert-programmes throughout a large part of the Union. Seventeen series of concerts, of from six to ten each, were

BOSTON SYMPHONY HALL

given from 1865 to 1882, all, with a few exceptions, under the direction of Mr. Carl Zerrahn. The programmes have included the standard orchestral compositions of the great masters, varied by instrumental and vocal solos and choral performances. The library of the Association, selected with great care, and with special attention to the collection of complete sets, in the best editions, of the works of the greatest composers, now numbers about 2500 volumes. Since 1882 the Association has withdrawn from the concert-field, it being found that the Boston Symphony Orchestra furnished all the high-class orchestral music that the public demanded. Mr. Carl Zerrahn remained as conductor until the end.

APOLLO CLUB. Formed in July 1871; incorporated in March 1873. It is composed of male voices, and is supported by assessments levied on associate members, among whom the tickets for the concerts are divided, none being sold to the public. Mr. B. J. Lang was conductor from the beginning till 1902, when Mr. Emil Mollenhauer succeeded him.

THE CECILIA. Formed in 1874, under the patronage of the Harvard Musical Association, for the purpose of presenting choral works for mixed voices at the symphony concerts. In 1876 it became an independent organisation and has been supported on the associate system. Mr. B. J. Lang has been conductor since the formation of the club. F. H. J.

BOSTON SYMPHONY ORCHESTRA. See SYMPHONY CONCERTS.

THE KNEISEL QUARTET. An organisation formed in 1885 by Franz Kneisel (see KNEISEL) for the cultivation of chamber music. The original members were Franz Kneisel, first violin, E. Fiedler, second violin, Louis Svecenski, viola, and Fritz Giese, violoncello. Otto Roth succeeded Mr. Fiedler in 1887, Anton Hekking Mr. Giese in 1889, Alwin Schroeder Mr. Hekking in 1891, Karl Ondriček Mr. Roth in 1899, and J. Theodorowicz Mr. Ondriček in 1902. The Kneisel quartet must be ranked with the finest organisations of its kind in existence, and has spread appreciation for chamber music of the highest type throughout the United States from ocean to ocean.

CHORAL ART SOCIETY. Founded in 1901 for the production of those works which are best fitted for performance by a small but highly efficient chorus of trained singers amid the most appropriate surroundings. The conductor is Mr. Wallace Goodrich, and the choir numbers forty-five professional singers who are paid for their services. The repertory has been selected mainly from *a cappella* works of the 16th, 17th, and 18th centuries, from the works of J. S. Bach, and from those of modern writers that demand for their adequate performance such resources as the society affords. Its first concert was given Feb. 28, 1902. Performances devoted to sacred music are given in churches, those devoted to secular music in Chickering Hall. It is supported by associate and subscription memberships. Among the works produced have been motets and other ecclesiastical pieces by Palestrina, Vittoria, Lotti, Corsi, Lasso, Sweelinck, Eccard, J. S. Bach, Michael Haydn, Brahms, Widor, Charles Martin Loeffler, and H. W. Parker, and madrigals and part songs by Palestrina, Orlando Gibbons, and modern composers.

BOSTON SINGING CLUB. Founded in Sept. 1901 by members of the H. G. Tucker chorus of the previous year, and conducted by H. G. Tucker. It is a mixed chorus for the performance of music of all schools, including modern choral works, oratorios, and *a cappella* music of the 16th and 17th centuries, but without attempt to reproduce conditions of older times. It is supported by associate memberships, and the sale of single tickets, and gives three concerts annually, each preceded by public rehearsals for music students. R. A.

BOTE UND BOCK, a firm of music publishers in Berlin, founded by Eduard Bote and Gustav Bock, Jan. 27, 1838. The former retired at the beginning of 1847, leaving Gustav Bock alone in the business until his death, April 27, 1863. His widow became the proprietor, and his brother, Emil Bock, undertook to direct the affairs of the firm. On his death, March 31, 1871, Gustav's son, Hugo, became the possessor of the business.

Among the music issued by the house, the works of Neithardt, Hoffmann, Rebeling, von Hertzberg, etc., and in particular the collection of *Musica Sacra*, edited for the use of the Domchor, deserve mention. The latter is a compilation of the most prominent compositions *a cappella*, by Italian, Netherlandish, and especially German masters of past time. The firm has done much to disseminate a knowledge of the masterpieces of Handel, Gluck, Bach, Haydn, Mozart, and Beethoven, by the publication of cheap editions; attention has also been given to modern operatic music.

Gustav Bock established the *Neue Berline Musikzeitung*, and succeeded in obtaining the help of all the more eminent writers on music, and in maintaining practical relations with them. In 1861 his brother, Emil Bock, became editor. It now appears weekly, and contains, besides a leading article on the science, theory, or history of music, numerous notices from all important towns; but in recent times its importance has become somewhat lessened. A. D.

BOTTESINI, GIOVANNI, a very celebrated virtuoso on the double bass, also an excellent conductor and composer, was born on Dec. 24, 1822, at Crema in Lombardy. He was the son of a good musician and clarinet-player of his native town, and as a boy sang in the chapel choir. He early displayed such a remarkable talent for music that at the age of eleven applica-

tion was made for him to be admitted into the Conservatorio at Milan. It so happened that there was only one vacant place, and that for a contrabassist. Bottesini accordingly commenced the study of the double bass, was admitted at the Conservatorio, and, it is said, before long played almost as well as he did afterwards, when his marvellous command over this unwieldy instrument excited the admiration of the whole musical world of Europe. His masters were Rossi for the double bass, Basili and Vaccaj for harmony and composition. On leaving the Conservatorio he travelled with his fellow-pupil Signor Arditi (then a violin-player), and afterwards went to America. Eventually he accepted a lucrative engagement at the Havana as principal double bass in the orchestra, which he retained for many years. Here his first opera, 'Christophe Colombe,' was given in 1847.

His first appearance in England was on June 26, 1849, at the Musical Union, where he played the violoncello part of one of Onslow's quintets, which, it will be remembered, contain prominent solo passages for that instrument. By his performance of this and of a solo he astonished all present, and at once won for himself the reputation which he ever after enjoyed, of being the most accomplished virtuoso on the double bass in the annals of musical history. Those alone who have heard him play can realise the beauty of the performance. It was not only marvellous as a *tour de force*, but the consummate skill of this great artist enabled him to produce a result delightful even for the most fastidious musician to listen to. Extraordinary agility and strength of hand, dexterous use of the harmonics, purity of tone and intonation, perfect taste in phrasing —in fact all the requisites of a great solo player —were exhibited by Bottesini on this cumbrous instrument. It can only be regretted that such exceptional powers should not have been devoted to an instrument more worthy of them. It may be mentioned that Bottesini played upon a three-stringed bass, which he preferred as being more sonorous, and with a bow made and held somewhat like that of the violoncello (see Bow, p. 377). The instrument, which was the work of Carlo Giuseppe Testore of Milan, was of somewhat smaller size than the ordinary orchestral double bass, being of the type called *basso da camera*. Bottesini was also distinguished as composer and conductor. In this latter capacity he presided over the orchestra of the Italian Opera in Paris from 1855 to 1857. From 1861 to 1863 he was director of the Teatro Bellini at Palermo, and in 1863 went for a time to Barcelona in a similar capacity, becoming afterwards director of the Italian Opera at Cairo. He conducted a season of opera at the Lyceum Theatre in London in 1871. He composed many pieces for his instrument, among which his fantasia on 'Sonnambula,' the Carnival of Venice, and duets which he played with Sivori and Piatti, will long be remembered—also the operas of 'L' Assedio di Firenze' produced in Paris in 1856, 'Il Diavolo della Notte' (1858), 'Marion Delorme' (1862), 'Vinciguerra' (1870), 'Ali Baba,' written for and performed in London with considerable success in 1871, 'Ero e Leandro' (produced successfully at Turin in 1879), 'La Regina di Nepal' (Turin, 1880), and one or two quartets. For some time he paid, with more or less regularity, an annual visit to England. At the Norwich Festival of 1887 an oratorio by him, to words by Mr. Joseph Bennett, entitled 'The Garden of Olivet,' was performed for the first time. It only remains to be added that Bottesini was as amiable as a man as he was excellent as an artist, and that he enjoyed the universal goodwill of the musical profession. He died July 7, 1889, at Parma. T. P. H.

BOTTOMLEY, Joseph, born at Halifax, Yorkshire, in 1786, at a very early age evinced a strong predilection for music, and so quickly profited by the instruction he received as to be able at seven years of age to perform a violin concerto in public. At twelve years of age he was removed to Manchester, where he studied under Grimshaw, organist of St. John's Church, and Watts, leader of the concerts. By the advice of the latter he took lessons on the violin from Yaniewicz, then in Manchester. At fifteen he was articled to Lawton, organist of St. Peter's, Leeds. On the expiration of his term he went to London, and studied pianoforte-playing under Woelfl. In 1807 he was appointed organist of the parish church of Bradford, Yorkshire, but resided and taught chiefly in Halifax. In 1820 he was chosen organist of the parish church, Sheffield. He was alive in 1850. Bottomley published several of his compositions for the pianoforte, and, in 1816, a small dictionary of music. W. H. H.

BOUCHE FERMÉE, À—*i.e.* 'with shut mouth'—vocalisation without words, with the teeth closed and the lips nearly so; a trick occasionally adopted by composers. Examples may be found amongst the German part-songs, and also in Gounod's works. There have been singing-masters who recommended the practice to their pupils, under an idea that it strengthened the breathing power without distressing the vocal organs. Beethoven alludes to the practice in a droll letter (Sept. 23, 1824) to Hauschka, conferring on him the 'Intendanz,' of all 'Sing- und Brumm-Vereine.' W. H. C.

BOUCHER, Alexandre Jean, a well-known violinist, was born at Paris, April 11, 1778. It is related that he played at the court when only six, and at the Concert Spirituel when eight years of age. In 1787 he went to Madrid, where he was appointed solo-violinist to the king, and associated as a quartet-player with Boccherini. In 1806 he returned to Paris, and in 1820 began to travel over Europe, exciting everywhere, if not the unconditional approbation of artists and

critics, at any rate the admiration and curiosity of the general public by his extraordinary performances. In 1844 he returned to France, settled at Orleans, and died at Paris, Dec. 29, 1861.

Possessed undoubtedly of an exceptional talent for execution, Boucher was not a little of a musical charlatan. Spohr made his personal acquaintance at Brussels in 1819, and speaks of him as follows: 'His face bore a remarkable likeness to Napoleon Bonaparte's, and he had evidently carefully studied the banished emperor's way of bearing himself, lifting his hat, taking snuff,' etc. (*Selbstbiog.* ii. 73). As soon as he came to a town where he intended giving a concert, he practised these tricks on the public walks and in the theatre, in order to attract the curiosity of the public; he even managed to spread a rumour that he was persecuted by existing governments on account of his likeness to Napoleon, because his appearance was likely to revive the sympathies of the masses for that great man. He certainly advertised a concert at Lille in these terms: 'Une malheureuse ressemblance me force de m'expatrier; je donnerai donc, avant de quitter ma belle patrie, un concert d'adieu,' etc. He also styled himself 'L'Alexandre des Violons.'

In his proficiency in the execution of double stops, the staccato, and other technical difficulties, he appears to have been only surpassed by Paganini, and we are assured by competent contemporary critics that he now and then played a slow movement with ravishing, if somewhat extravagant, expression. But whatever powers of execution his performances may have shown, if, as Spohr states, he altogether spoiled a quartet of Haydn by tasteless additions, we must conclude that he was but an indifferent musician. After what we know of his general character as an artist, it is not surprising to learn that he not unfrequently wound up a furious passage by intentionally upsetting the bridge of his violin as a climax, and that he used to perform quite as much by the action of the face and legs as of the bow.

Boucher's wife was a clever player on the harp, but seems to have adopted her husband's doubtful means of winning the applause of the public. She used to play duets for piano and harp, with one hand on each instrument. P. D.

BOUFFONS, LES. See MATASSINS.

BOUHY, JACQUES, distinguished baritone singer and teacher, was born at Pepinster in Belgium in 1848, and was at first pupil at the Conservatoire of Liège, and subsequently at that of Paris. He appeared at the Paris Opéra in 1871, and won great success as Mephistopheles in 'Faust,' afterwards in Reyer's 'Érostrate,' when that work was revived for two performances. In 1872 he went to the Opéra Comique, and created the part of Don César de Bazan in Massenet's opera of that name, on Nov. 30; he was the first Escamillo in 'Carmen,' and soon afterwards joined the company of the Théâtre lyrique de la Gaieté, where he sang in important works, such as Massé's 'Paul et Virginie.' On April 22, 1882, he appeared at Covent Garden as Mephistopheles, and made a decided success. In 1885 he was appointed director of the Conservatorium at New York; he remained there till 1889, when he returned to Paris, and sang, for the first time in Paris, the part of the high priest in Saint-Saëns' 'Samson et Dalila' at the Théâtre Eden, a part of which he had sung the first act at a Colonne concert, March 26, 1875. After a new engagement at the Grand Opéra, and a second sojourn in America, Bouhy finally settled in Paris, where he has ever since devoted himself to teaching; he has won a unique position as a voice-trainer, and among his best pupils are to be numbered many of the most successful English and American singers. He has written many songs that have gained popularity. G. F.

BOULANGER, MME. MARIE JULIE (*née* Halligner), born 1786, died 1850; a dramatic singer. She studied in the Conservatoire under Plantade and Garat, and made her début with immense success at the Opéra Comique in 1811. Her voice was fine, her execution brilliant, and her acting full of character and intelligence. Her most successful rôles were those of soubrettes and maid-servants. She remained on the stage till 1845, but her voice had failed some time previously. M. C. C.

BOURDON. A pedal or manual stop of wood, of the stopped diapason family, and of 16 ft. *tone*. The insertion of the stopper causes the pipe to speak the octave below; consequently they are only of half the true speaking length as compared with open pipes of the same pitch; it is therefore usual, in speaking of the pitch of all kinds of stopped pipes, to make use of the term *tone*, as referring to pipes of only half true speaking length.

The tone of the bourdon is soft, full, and penetrating in character, thickening up and blending well with almost every other quality of tone. Frequently the tone is 'fifthy,' or strictly speaking 'twelfthy,' and it is said that, if large pipes of this description are planted in semitonal or chromatic order, they spoil the tone of each other. It is likewise a peculiarity that in some parts of a building the tone appears to be round and full, whilst in another part it is lost.

As a manual stop of 16 ft. *tone* it is met with under the names of bourdon, lieblich bourdon, and double diapason, and as a pedal stop of 16 ft. *tone* it is sometimes called sub-bass.

By extension of the 16 ft. compass upwards and downwards the pedal stop is now frequently made to be available as a bass flute or octave of 8 ft. *tone*, and as a sub-bourdon, contra-bass, or sub-bass of 32 ft. *tone*. In connection with this latter capacity the tone of these pipes appears to deteriorate rapidly below the G of 24 ft. *tone;* therefore, for this and pressing

economical reasons (both of cost and space), the lower notes of the 32 ft. *tone* or pitch are now generally obtained acoustically, *i.e.* by coupling notes a fifth apart. The speech of bourdons is apparently much improved by the addition of octave flue-work, or other combination. Occasionally they are made in metal or zinc, but some difficulty is experienced by reason of the tompions or stoppers dropping down and upsetting the speech, tone, and pitch; this, however, could be remedied by mitring the tops of the pipes to a right angle, which would not apparently affect the tone, and would allow the stoppers to rest upon their edges.

Occasionally the bourdon is made to speak in two powers, but the variation of the pressure of wind required to accomplish this necessitates some compensating device to keep the pitch constant at both powers. It is scarcely necessary to add that the pipes of the manual bourdon are of smaller scale than those of the pedal stop. T. E.

BOURGAULT-DUCOUDRAY, Louis Albert, French composer, born at Nantes Feb. 2, 1840, is a member of a family in easy circumstances, and is nephew of Billault, the famous minister of the Second Empire. Having gone through a complete course of classical studies, and entered the legal profession in 1859, he was received into Ambroise Thomas's class at the Conservatoire, and in 1862 he carried off the first prize for composition [with a cantata, 'Louise de Mézières.' A comic opera, 'L'Atelier de Prague,' had been represented at Nantes in 1858]. Though devoted to his art, Bourgault-Ducoudray has not produced much. His chief works are a Stabat Mater, performed at St. Eustache, April 5, 1868, and at the Concerts Populaires, Good Friday, April 3, 1874, a work written in an archaic style, having in it something of the manner and the vague tonality of plain chant without being restricted to its rules; an orchestral suite in four movements, entitled 'Fantaisie en Ut mineur' (Concerts Populaires, Dec. 27, 1874), a well-orchestrated composition, but too long, and built on subjects of no interest; and finally, a little 'satiric' drama, 'La Conjuration des Fleurs,' of which he also wrote the words, and which was produced under his own direction at the Salle Herz, Jan. 27, 1883. [Mention must also be made of his 'Michel Colomb' (Paris, 1887), and 'Thamara,' a three-act opera (Grand Opéra, Dec. 28, 1891), which failed to obtain the success which the oriental charm of its poetic style deserved; a 'Carnaval d'Athènes'; a 'Rhapsodie Cambodgienne' in two movements; and 'L'Enterrement d'Ophélie' for orchestra, a work full of originality and life; a 'Symphonie religieuse' in five movements for mixed chorus without accompaniment, and other choral works.] Bourgault-Ducoudray has turned his attention towards the works of the older masters of the 'primitive' school, and towards the popular songs of all countries. In 1869 he founded in Paris an amateur choral society, and gave in a most excellent manner such works as Handel's 'Alexander's Feast' and 'Acis and Galatea,' cantatas by Bach, Clément Jannequin's 'Bataille de Marignan,' selections from Rameau, choruses by Palestrina, Orlando Lasso, etc. A nervous disorder obliged him to give up the direction of this society, which soon came to an end. Ordered to a warmer climate on account of his health, he went to Greece on a kind of musical mission, and brought back some interesting notes on the music of that country, which he published in a pamphlet entitled *Souvenirs d'une mission musicale en Grèce et en Orient* (1876). He published an important collection of songs, 'Trente Mélodies populaires de la Grèce et de l'Orient,' collected and harmonised with Greek, Italian, and French words. [To the number of his writings must be added *Conférence sur la modalité dans la musique grecque*, *Études sur la musique ecclésiastique grecque*, etc., etc.] Since 1878 he has lectured on the history of music at the Conservatoire. He undertook a musical journey into Brittany, and published on his return 'Trente Mélodies populaires de la Basse Bretagne,' collected and harmonised with a French translation in verse by F. Coppée (1885). Though little known to the public, and having produced little original work, Bourgault-Ducoudray occupies an honourable position in the musical world, and is an enthusiastic musician, with ardent convictions and a constant and earnest devotion to art. A. J.

BOURGEOIS, Louis, the son of Guillaume Bourgeois, was born in Paris at the beginning of the 16th century. In 1541 he was invited to Geneva, about the time of Calvin's return from Strasburg. On the removal of Guillaume Franc to Lausanne in 1545 [see Franc] his place was given to Bourgeois, jointly with a Genevan named Guillaume Fabri, the former receiving 60, the latter 40 florins, of the salary of 100 florins which had been paid to Franc. Of the personal history of Bourgeois we know nothing beyond what may be gathered from some notices of him in the registers of the Council of Geneva. These are curious as illustrative of the place and the time. In 1547 the Council admitted him gratuitously to the rights of citizenship 'in consideration of his being a respectable man and willing to teach children.' Shortly afterwards, to enable him the better to pursue his studies, they exempted him from duties connected with the town guard and the works of the fortifications, and presented him with a small china stove for his apartment. Before long his salary was for some reason reduced to 50 florins. On his petitioning that it should be restored to its former amount, or even slightly increased in consequence of his poverty, the parsimonious Council gave him two measures of corn 'for that once, and in consideration of an expected

addition to his family.' To a second petition, even though supported by Calvin, they turned a deaf ear. On Dec. 3, 1551, Bourgeois was thrown into prison for having 'without leave' altered the tunes of some of the psalms, but through the intervention of Calvin obtained his release on the following day. The alterations, however, were sanctioned and adopted. Another innovation proposed by Bourgeois fared better with the Council. His recommendation to suspend a printed table in the churches to show what psalm was to be sung was approved of, and rewarded by a donation of sixty sols.

In 1557 Bourgeois returned to Paris, and was still living in 1561. His chief claim to notice at the present day arises from his connection with the Genevan Psalter. The authorship of the melodies in this remarkable collection has been long a subject of controversy. It has been attributed, wholly or in part, to several musicians of the time, to Bourgeois, Franc, Goudimel, Claudin Le Jeune, and others. The claims set up for Goudimel and Le Jeune are easily disposed of. Neither of these composers ever visited Geneva or had any direct relations with Calvin. In 1557, when the greater part of the Genevan Psalter had been already published, Goudimel was still a member of the Church of Rome. The Genevan Psalter was completed in 1562, and it was not until that year that Goudimel published his 'Seize Pseaumes mis en musique à quatre parties, en forme de motets.' This was followed by the entire psalter, first in 1564 harmonised in double counterpoint, then in 1565 in simple counterpoint (generally note against note), and lastly in 1565-66, when Goudimel produced another arrangement of the psalms for three, four, or more voices in the form of motets.

Le Jeune was but twelve years of age in 1542, when the first edition of the Genevan Psalter was published, and not above twenty-one in 1551, when the whole of Marot's and the first portion of Beza's translations had already appeared. In 1564 he published 'Dix Pseaumes de Dauid nouuellement composés à quatre parties, en forme de motets . . .' reprinted in 1580. The psalms are Marot's, but the music is entirely original. Le Jeune died in 1600, and his harmonised arrangements in four and five parts of the Genevan melodies were not printed until the following year, nor that in three parts (Book I.) until 1602.[1] But long before the psalms of Goudimel and Le Jeune appeared, Bourgeois had himself harmonised the tunes up to that time included in the Genevan Psalter. In 1547 he published 'Pseaulmes cinquante de Dauid . . . traduictz . . . par Clement Marot, et mis en musique par Loys Bovrgeoys, à quatre parties, à voix de contrepoinct egal consonnante au verbe. Lyon, 1547.' In the same year he also published 'Le premier liure des Pseaulmes de Dauid, contenant xxiv. pseaulmes.[2] Composé par Loys Bovrgeois. En diuersité de Musique: à scauoir familiere ou vaudeuille; aultres plus musicales . . . Lyon.' In the latter the words of the psalms are those of Marot, but the melodies are original and wholly different from those of the former work. All these harmonised psalters were intended only for private use. Down to the 19th century nothing beyond the melody of the psalms was tolerated in the worship of the Reformed Churches, and it was not improbably the aversion of Calvin to the use of harmony that compelled Bourgeois to print his psalters at Lyons instead of Geneva.[3]

Before we consider more particularly the authorship of the melodies in the Genevan Psalter, a brief account of the origin and development of that important collection must be given.

When Calvin, expelled from Geneva, went to Strasburg in 1538 he resolved, after the example of the Lutherans in Germany, to compile a psalter for the use of his own church. This, of which the only known copy was discovered in the royal library at Munich, contains eighteen psalms, the Song of Simeon, the Decalogue, and the Creed, to each of which a melody is prefixed. Of the psalms the words of twelve are by Marot (1, 2, 3, 15, 19, 32, 51,[4] 103, 114, 130, 137, and 143); of five (25, 36, 46, 91, and 138), with the Song of Simeon and the Decalogue, by Calvin himself, and of one (113) in prose. These psalms of Marot exhibit variations from the text first published by the author three years later, and must therefore have been obtained by Calvin in MS. from some private source. Calvin and Marot certainly met in 1536 at the court of Ferrara, but there is no evidence that any intimacy was then formed, or that any communication passed between them, until Marot fled to Geneva in 1542. The first translation made by Marot was Psalm 6, written and published in 1533 in 'Le Miroir de tres chretienne Princesse Marguerite.' By 1539 he had completed his first instalment of thirty psalms, but up to that time they circulated in manuscript only. They are all found in a psalter published at Antwerp in 1541, and their text is there the same as that published by Calvin. Douen thinks that the varied readings are due to Pierre Alexandre, editor of the Antwerp Psalter, but it seems equally if not more probable that they represent, largely or wholly, the original text of Marot's manuscripts, revised by him when he published the 'Trente Pseaulmes,' about the beginning of 1542. The tunes to Calvin's own translations are German, four by M. Greiter and one by W. Dachstein. Calvin returned to Geneva in Sept. 1541, and shortly afterwards, in Feb. 1542, a psalter (professedly printed at Rome by the

[1] Book I. was reprinted in 1607, and was followed by the Second and Third Books in 1608. The latter books apparently had not been published in 1601.

[2] In four parts.

[3] Specimens of the psalms as harmonised by Bourgeois, Goudimel, Le Jeune, and others, are given by Douen in his work cited below.

[4] Numbered L, after the numeration of the Vulgate.

command of the Pope[1]) was published at Strasburg, containing, besides the psalms and other pieces of the collection of 1539, together with four psalms by other writers, the eighteen remaining psalms of those which Marot had translated up to that time (4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 22, 24, 37, 38, 104, 113, and 115) and his Paternoster. To the Paternoster and to eight of the psalms (4, 6, 9, 22, 24, 38, 104, and 113) new melodies were added. On these two collections the first edition of the Genevan Psalter was based, and was published at Geneva in 1542. It contains the thirty psalms of Marot, with his Pater and Credo (a different one from that in the Strasburg edition of 1539, which is in prose), the five psalms of Calvin, and his Song of Simeon and Decalogue. Of the tunes, seventeen (1, 2, 3, 15, 25, 36, 46, 91, 103, 104, 114, 130, 137, 138, 143, the Song of Simeon and the Paternoster) are taken from the preceding Psalters, but all except three (36, 103, and 137) are more or less modified; twenty-two tunes are new, thirteen of them (4, 6, 8, 9, 13, 19, 22, 24, 32, 38, 51, 113, and the Decalogue) are substituted for the former melodies, eight (5, 7, 10, 11, 12, 14, 37, and 115) are set to the psalms left with music in the pseudo-Roman Psalter, and one is adapted to Marot's Credo. In Nov. 1542 Marot arrived at Geneva, and there translated nineteen other psalms (18, 23, 25, 33, 36, 43, 45, 46, 50, 72, 79, 86, 91, 101, 107, 110, 118, 128, and 138) and the Song of Simeon, which, with the thirty previously published, make up what are commonly spoken of as the 'Cinquante Pseaumes.' These, with Marot's Decalogue, Ave, and Graces before and after meat, all with music, were added to the psalter in a new edition published at the end of 1543.

In this edition the text of Marot's earlier psalms was corrected by the author, and Calvin's Song of Simeon and five psalms were replaced by Marot's new versions of the same.

In 1544 Marot died at Turin, and the Psalter remained unfinished until the work was resumed by the publication in 1551 of thirty-four additional translations by Beza, which were united in the following year to the forty-nine by Marot already in use. In 1554 six more psalms appeared, soon followed by another, and the Psalter was completed in 1562.

The following lists show the order in which the psalms were published in successive editions of the Genevan Psalter:—

1542. 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 19, 22, 24, 32, 37, 38, 51, 103, 104, 113, 114, 115, 130, 137, 143, the Pater, and Credo, by Marot. 25, 36, 46, 91, 138, Song of Simeon, and Decalogue, by Calvin.

1543. The seven versions by Calvin were omitted, and the following by Marot added—18, 23, 25, 33, 36, 43, 45, 46, 50, 72, 79, 86, 91, 101, 107, 110, 118, 128, 138, Song of Simeon, Decalogue, Ave, and Graces.

[1] Hence known as the pseudo-Roman Psalter.

1551. 16, 17, 20, 21, 26, 27, 28, 29, 30, 31, 34, 35, 39, 40, 41, 42, 44, 47, 73, 90, 119, 120, 121, 122, 123, 124, 125, 126, 127, 129, 131, 132, 133, 134,[2] all by Beza.

To these psalms the tunes were almost certainly adapted at the same time, but no copy of the Psalter containing them is known of a date anterior to 1554.

1554. The six appendix psalms of this year (52, 57, 63, 64, 65, and 111), and the additional one of 1555 (67), appeared without tunes.

In 1562 the Psalter was completed by the addition of the remaining sixty psalms, proper tunes were assigned to thirty-eight of these, as also to psalms 52 and 57, while the others, as well as the remaining appendix psalms of 1554-55 (63, 64, 65, 67, and 111) were sung to the melodies of other psalms.

The psalms thus added in 1562, with tunes, were—48, 49, 54, 55, 56, 58, 59, 60, 61, 74, 75, 80, 81, 83, 84, 85, 87, 88, 89, 92, 93, 94, 96, 97, 99, 102, 105, 106, 112, 135, 136, 141, 145, 146, 147, 148, 149, 150. Without tunes—53, 62, 66, 68, 69, 70, 71, 76, 77, 78, 82, 95, 98, 100, 108, 109, 116, 117, 139, 140, 142, 144. Including, therefore, the Song of Simeon and the Decalogue, the Genevan Psalter contains in all 125 tunes, of which eighty-five were selected or adapted between 1542 and 1554, the rest in 1562.

The story which ascribes to Franc the editorship of the Genevan Psalter will be noticed later (see Franc and Psalter), but recent investigations in the archives of Geneva have clearly shown that the task of selecting and arranging the tunes was entrusted to Bourgeois, and an entry in the registers of the Council, dated July 28, 1552, which will be found quoted at length in the notice of Franc, distinctly states that Bourgeois had set to music the psalms of Beza, published the year before, and had arranged those already published in the earlier editions of the Psalter.

A minute collation which M. Douen has made of these earlier editions enables us to see what Bourgeois did. In 1542 he adopted, with modifications, seventeen tunes from the Strasburg Psalters and added twenty-two new ones. In or before 1549 seventeen tunes were more or less altered and eight replaced by others. In 1551 four were altered and twelve new melodies substituted, some for earlier ones of Bourgeois himself. In several instances, therefore, the tune is of later date than the psalm.

These last changes were final, and mark the time since which the tunes adopted before 1562 have remained unaltered. The old Strasburg tunes of 1539 which still survived were those to Psalms 1, 2, 15, 36, 91, 103, 104, 114, 130, 137 and 143, two of which (36 and 137) retained almost their primitive form, and one, 103, remained unaltered. M. Douen considers these

[2] The tune to this psalm is that known in England as the 'Old Hundredth.'

Strasburg melodies to possess more of a German than a French character, and according to Riggenbach 36 and 91 are by Matthäus Greiter, a member of the choir of Strasburg Cathedral.

How far the other tunes adapted by Bourgeois are original it is impossible to determine. A few can be traced to a German origin, some are constructed out of fragments of earlier melody, while others are adapted from secular songs popular at the time. It is not improbable that every tune in the Genevan Psalter belongs to one or other of the above categories.[1]

Bourgeois left Geneva in 1557, and undoubtedly had no connection with the Genevan Psalter after that time. The forty tunes of 1562 were added by another and a less skilful hand. In June 1561 an entry in the 'Comptes des recettes et depenses pour les pauvres' records the payment of 10 florins to 'Maître Pierre' for having set the psalms to music. This person is conjectured by Becker to be Pierre Dubuisson, a singer who in 1565 was admitted gratuitously to the rights of citizenship at Geneva, but nothing certain is known on the subject.

It only remains to add that in 1550 Bourgeois published 'Le droict chemin de musique, composé par Loys Bourgeois auec la manière de chanter les pseaumes par vsage ou par ruse, comme on cognoistra, au xxxiv,[2] de nouveau mis en chant, et aussi, le cantique de Siméon. Genève 1550.' This treatise, in twelve chapters, is the first in which a proposal is made to abandon the method of the Guidonian hand and to teach music by the employment of the solfeggio. An analysis of it will be found in Fétis, *Biogr. des Musiciens*, ii. 42. The last-known work of Bourgeois shows him still employed in working on the Genevan melodies. It is entitled 'Quatre-vingt-trois Psalmes de Dauid en musique . . . à quatre, cinq, et six parties, tant à voix pareilles qu'autrement, etc. Paris 1561.'

For full details respecting Bourgeois and the history of the Genevan Psalter see the exhaustive work of Douen, entitled *Clément Marot et le Psautier Huguenot*, 2 vols. Paris, 1878-79. The following works may also be consulted:—Bovet, *Histoire du Psautier des églises réformées*, Neuchâtel et Paris, 1872; G. Becker, *La Musique en Suisse*, Genève et Paris, 1874; Riggenbach, *Der Kirchengesang in Basel;* and six articles in the *Musical Times* (June to Nov. 1881) by the present writer. [Also an article in the *Rivista Musicale Italiana*, vi. 496.] G. A. C.

BOURGEOIS, Louis Thomas, dramatic composer, born at Fontaine l'Évêque, Oct. 24, 1676. He was counter-tenor at the Grand Opéra in Paris in 1708, but in 1711 devoted himself entirely to composing. In 1713 he produced 'Les Amours déguisés,' and in 1715 'Les plaisirs de la paix.' He was chapel-master at Toul in 1716, and afterwards at Strasbourg. He died in Paris in great poverty, Jan. 1750. He composed sixteen operas (for list see Fétis) and many cantatas. F. G.

BOURGES, Clementine de, eminent composer of the 16th century. Her husband was killed fighting against the Huguenots in 1560 and she died of grief Sept. 30 in the following year. Her compositions deserve to be ranked with those of the great composers of her time. A four-part chorus, 'Da bei rami,' by her is included in Paix's 'Orgel-tabulatur-Buch.' F. G.

BOURGES, Jean Maurice, distinguished musical critic, born at Bordeaux, Dec. 2, 1812; came early to Paris, and studied composition under Barbereau. In 1839 he became joint-editor of the *Revue et Gazette Musicale*, the high reputation of which paper is in great measure owing to him. In 1846 'Sultana,' an opera of his, was successfully produced at the Opéra Comique. He made an excellent translation of the words of Mendelssohn's 'Elijah.' He died in March 1881, after an illness of many years. F. G.

BOURRÉE. A dance of French origin, which is said to have come from the province of Auvergne. According to other authorities, however, it is a Spanish dance, from Biscay, where it is said to be still practised. The bourrée is often to be found in the older suites, especially in those of Bach, and is of a rapid tempo, in common (allabreve) time. In its general character it presents some features of analogy with the Gavotte, from which, however, it may readily be distinguished; first, because it is in allabreve time, that is, with only two beats in the bar, whereas the gavotte has four; and secondly, that the latter begins on the third crotchet in the bar, while the bourrée always commences on the fourth. Like most of the older dance-movements, it consists of two parts, each of which is repeated. In Bach's suites, a second bourrée frequently follows the first, in the same way as in a symphony or sonata, a trio follows a minuet, after which the first bourrée is repeated. There is a good modern example in Sullivan's music to the 'Merchant of Venice.' E. P.

BOUSQUET, Georges, composer and critic, born at Perpignan, March 12, 1818, died at St. Cloud, June 15, 1854; entered the Conservatoire as violin pupil; won the Grand Prix in 1838; and his compositions while he held the prize, particularly two masses (Rome, 1839-1840), excited hopes of a brilliant career. But his first operas, 'L'hôtesse de Lyon' and 'Le Mousquetaire,' both produced in 1844, were failures. 'Tabarin' (1852), met with better success. For three seasons Bousquet conducted the orchestra at the Théâtre Italien. He contributed articles to the *Revue et Gazette Musicale*. M. C. C.

BOVY, Charles Samuel. See Lysberg.

[1] A composer of that day employed his talents on harmony rather than on melody, and used for his subjects any material that suited his purpose. A difference in style between sacred and secular music hardly existed, and 'composing' was often literally 'compounding.'

[2] A misprint for xxiv.

BOW. The strings of the various instruments of the violin tribe are made to vibrate by friction with the hair of the bow. Like the violin, the bow went through many progressive phases, till, at the end of the 18th century, it acquired its present shape, which seems to leave no room for improvement. The bow with which the REBEC (the oldest stringed instrument played with the bow with which we are acquainted) was played, had the form of the weapon from which it derived its name. The stick was much bent, and a cord or string was tied from one end to the other (Fig. 1).

elasticity. The stick of the modern violin bow (Fig. 8) is made of Brazilian lance-wood (*Duguetia quitarensis*) or of Snake-wood (*Brosimum aubletii*); it is cut straight, following the grain of the wood, and afterwards slightly bent by exposure to heat. Although many trials have been made no wood has been found to possess the necessary qualities in the same degree as those mentioned.

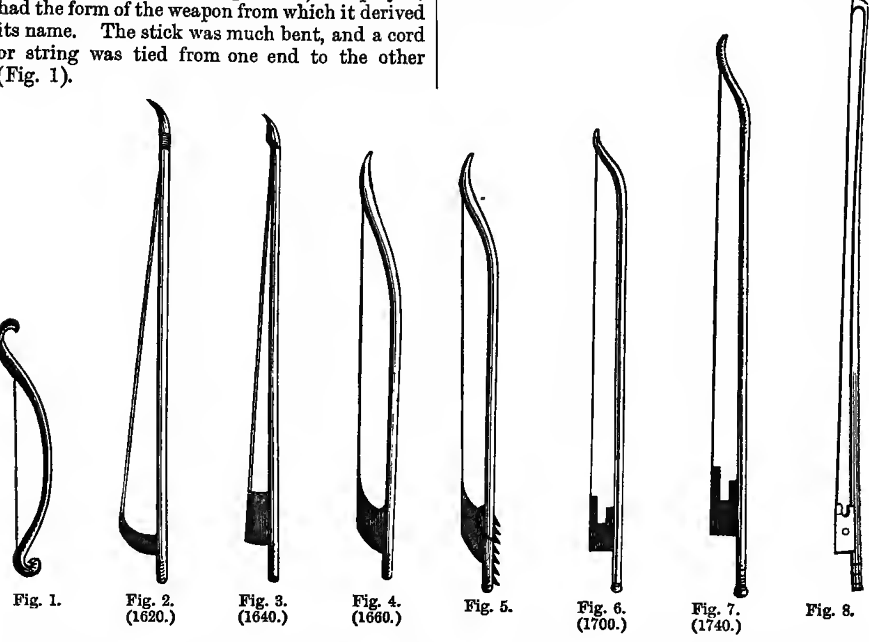

Fig. 1. Fig. 2. (1620.) Fig. 3. (1640.) Fig. 4. (1660.) Fig. 5. Fig. 6. (1700.) Fig. 7. (1740.) Fig. 8.

In pictures of the 13th century we notice something like a nut and head, and hair was possibly used in place of the cord. The bow now gradually loses more and more the actual bow-shape (Figs. 2, 3, 4); the head is distinct from the stick, and the nut is no longer a portion of the stick, but is attached to it by a wire. On the top of the stick a narrow piece of indented iron is fixed, on which the wire is hooked, and thus the hair made tighter or looser at pleasure (Fig. 5). The next step consisted in the substitution of a screw for the wire and indented iron, by which the tension of the hair could be perfectly regulated. This was Corelli's bow (Fig. 6). It was made of light wood, the stick perfectly straight, hardly if at all elastic, and very short. Tertini's bow (Fig. 7) was considerably longer, the wood thinner, and more elastic.

Towards the end of the 18th century François TOURTE brought the art of bow-making to perfection, and created a model on which no improvement has been yet made. In fact his bow combines all the qualities required to enable the player to follow out every conceivable *nuance* of tone and movement—lightness, firmness, and

The nut (*c*, Fig. 9) is made of ebony, ivory, or tortoise-shell. For violin, tenor, and violoncello bows white horse-hair is used; for double-bass bows, black. The hair (*b*) is inserted

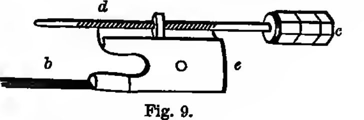

Fig. 9.

in the head (*e*) and the nut of the bow, and can be made tighter or looser by turning the screw (*d*).

P. D.

The violoncello bow is a trifle shorter than those used for the violin and tenor, which are of the same length or nearly so, the tenor bow being rather heavier, and the nut and top of the bow slightly deeper. The top and nut of the violoncello bow are deeper still. The old double-bass bow was of a rude pattern, made of beech or other common wood, and having the primitive arched form. The tone was elicited less by pressure, as in the case of the smaller instruments, than by a sort of 'ripping' or sweeping touch, partaking of the nature of the

pizzicato, the bow being held under-hand, *i.e.* with the wrist depressed and the hair inclined towards the nut. [The under-hand way of holding the bow is a survival of the method common to all instruments of the viol family.] Concurrently with the change from the old three-stringed double bass, tuned by fifths, to the modern orchestral one tuned by fourths, the Paris double-bass players resolved about 1830 on the adoption of a double-bass bow of the ordinary length, but made on the principle of the violoncello bow, and having a similar nut. This bow, which was employed by Dragonetti, is used over-hand, the hair being inclined towards the bridge, in the same way as a violoncello bow. It produces its effect by pressure rather than by 'ripping,' and is now very commonly used by orchestral players on the Continent. It has lately found some acceptance in England, but it has not yet come into use for the purpose of chamber music.

The bow is strung with horse-hair, which is specially adapted to this purpose by its numerous dentiform protuberances; these, aided by resin, act upon the string like the teeth of a saw. After much playing they wear away; the hair then becomes useless, and must be renewed. A bow used for four hours daily would require rehairing at least once a month. The task should only be entrusted to a competent workman, as no other is able to get a sufficient number of hairs into the bow (there ought to be about 120), or to wedge them evenly in the top and nut. Bow-making is now a manufacture rather than an art, as the bows of Tourte are everywhere more or less accurately copied. The best are of French manufacture, and serviceable ones may be bought at from £1 to £4, according to workmanship. The only bows now made are either cylindrical or octagonal in section; the old fluted bow may be seen in museums, but has entirely gone out of fashion. [A useful pamphlet by Henry Balfour, M.A., on *The Natural History of the Musical Bow*, was published at the Clarendon Press, Oxford, in 1899; it deals exclusively with the primitive types of bow.]

E. J. P.

BOWING. This term is used in a twofold sense, corresponding to the German terms 'Bogenführung' and 'Strichart' respectively. In the first it designates in a general way the action of the bow on stringed instruments, and in that sense we speak of a style and method of bowing, or of the bowing of a player. In the second it means the particular manner in which a phrase or passage is to be executed, and the signs by which such a manner is usually marked; and in that sense we speak of the bowing of a phrase or passage.

1. Bowing (*Bogenführung*). While the left hand of the violin-player fixes the tone, and thereby does that which for the piano-player is already done by the mechanism of the instrument,—and while his correctness of intonation (supposing his ear to be accurate) depends on the proficiency of his left hand, as with the piano-player it depends on the tuner's proficiency,—it is the action of the violinist's right hand, his *bowing*, which, like the pianist's touch, makes the sound spring into life; it is through the medium of the bow that the player realises his ideas and feelings. It is therefore evident that 'bowing' is one of the most important and difficult parts of the art of violin-playing, and that the excellence of a player, and even of a whole school of violin-playing, to a great extent depends on its method of bowing. The progress of the art of bowing closely followed the gradual perfection of the bow itself. As long as the stick of the bow was stiff and unpliable and the hair could not be made tighter or looser at pleasure, we can hardly speak of an art of bowing; for that art can only be practised with an elastic bow, which yields to the slightest pressure of the fingers. As long as the violin-player had merely to double the singers' part, no other *nuances* but piano and forte were required from him. These the stiff bow could produce, but nothing more. When at the beginning of the 18th century the violin began to emancipate itself from the position of a mere accompanist, and entered on its glorious career of a solo-instrument, under such masters as Corelli and Vivaldi, it was only by the use of an elastic bow that it could acquire the faculty of producing various *nuances* and shades of tone. Tartini was the first to make the stick at all elastic, and must therefore be considered the next great advancer of the art of bowing. His work, *L' Arte dell' Arco*, probably gives us a correct idea of the bowing of his time. A full broad tone, a variety of combinations of tied and detached notes, arpeggios with firm bow (no 'springing bow' as yet),—are the main features of his bowing. The full development, however, of all the powers of the violin was only possible with the modern bow, as first made by Tourte of Paris. The thin, bent, elastic stick of his bow enables the player to follow out the slightest gradations of tone from the fullest forte to the softest piano, to mark all kinds of strong and gentle accents, to execute staccato, legato, saltato, and arpeggio passages. It cannot be said that the classical Paris school of violin-playing availed itself of all these advantages of Tourte's invention; their bowing does not show very great progress beyond Tartini and his school, and even Spohr does not advance materially upon them. But with Paganini a new era opened in the art. He uses freely almost every imaginable movement of the bow—he adds to the firm slow staccato the quick staccato of many notes—he develops the movement of the wrist to the highest perfection, enabling him to execute all kinds of bowing with the utmost celerity.

2. Bowing (*Strichart*). To the correct and truthful rendering of a musical phrase or passage on a stringed instrument, it is essential that an appropriate bowing should be chosen, or, if already given by the composer, be strictly adhered to. This appears self-evident, if we consider how one and the same passage, bowed in two different ways, may produce two entirely different effects. A succession of notes, intended by the composer to be played as a legato passage, and therefore with as little changing of bow as possible, would, if played with detached strokes of the bow, entirely lose its character. And again, to give a well-known example, what would become of the light and sparkling passages of one of Mendelssohn's Scherzi, if the staccato notes were played legato? Its character would be destroyed so as to become almost unrecognisable. True, the old masters left it more or less to the discretion of the performer to choose an appropriate bowing for the different parts of their compositions, and trusted to their artistic feeling and tact in this respect. Nay, if we go back to Handel and Bach, we often find what can only be called a mere sketch of a passage. Bach in his celebrated Violin Solos repeatedly gives long successions of chords in three and four parts, merely adding the word 'arpeggio,' and leaving it to the player to execute them with a variety of bowings of his own choice and invention. However, the modern masters—partly since Mozart and Haydn, and absolutely since Beethoven—have given up this imperfect way of notation, just as they gave up writing figured basses instead of explicit accompaniments, and at the present time a composer very rarely omits to indicate the bowing with which he intends each passage to be executed. With the tendency of all modern composers since Beethoven and Schubert to bring the characteristic and descriptive power of music more and more into the foreground, it was but natural that the advanced technique of modern violin-playing should have developed a great number of new varieties of bowing, in order to do justice to all the subtle *nuances* which were to be rendered.

In orchestral performances and in the playing of chamber-music it is chiefly uniformity of bowing which is to be aimed at, and which alone ensures a well-balanced unanimous effect. The undeniable excellency of the orchestral performances at the concerts of the Paris Conservatoire, at the Gewandhaus-concerts in Leipzig, at the Crystal Palace Saturday Concerts, in the Queen's Hall orchestra and similar institutions elsewhere, is owing at least as much to the enforcement of uniform bowing on the part of the conductors and leaders of the bands as to the careful observance of the pianos, fortes, and other dynamic signs.

A number of signs are used in musical notation to indicate various ways of bowing: (1) a slur ⁀ indicates that all the notes under the slur are to be played in one stroke of the bow; legato. (2) a slur with dots, ⁀···, means either staccato or saltato in one stroke; while the absence of a slur indicates that every note is to be done by a separate stroke. (3) Dots or dashes over the notes (· · · or ꞌ ꞌ ꞌ) mean sharp short strokes, either with firm bow (martelé) or with springing bows (spiccato or saltato). (4) ⊓ means a down-stroke, from the nut of the bow towards the head; ∧ an upstroke. P. D.

In the older bows (Figs. 2 and 3, art. Bow) the most manageable part of the hair was what is still distinguished in the practice of bowing as the 'middle third'; and as the tone of the instruments to which these bows were applied was not easily elicited, the early practice, both on the viols and the violin, was to begin the bar by an up-stroke commencing about a third of the distance from the top, being the place where the player had most command over the string, the mechanical principle employed being that of the saw, to which, so far as regards the distribution of force, these triangular bows are nearly analogous. The down-bow on the unaccented part of the measure enabled the player to recover his commanding position for another forcible up-stroke. This, it will be seen, is the principle of the modern 'martellato' bowing. Quavers in triplets, as in the *giga*, were invariably played with two slurred notes to the strong up-stroke, and one, the last, to the weak down-stroke. On the same principle long-sustained notes, often divided into demisemiquavers as 'grace' notes, were taken with the up-stroke, the down-stroke being chiefly used on notes of secondary value, to enable the player to recover the strong position. On the same principle arpeggios were commenced with the up-bow. The practice of using up- or down-strokes, at the option of the composer or player, for the accented notes of the bar, began with the improved bows of the early 18th century; the first use of marks indicating 'up-bow' or 'down-bow' noticed by the writer is in Veracini's *Sonate Accademiche*, 1744. Veracini uses the sign ⋓ for 'up-bow,' and ⋒ for 'down-bow.'

These principles still underlie the modern system of bowing, although the perfected bow of to-day can be commanded by the player with almost equal ease in all its parts. Tartini in his *Art of Bowing* carries the theory of the bow to its logical finish, and therefore much farther than it has ever been practically applied. The most copious modern account of the theory and practice of bowing is given in Baillot's *L'Art du Violon*, pp. 92-145. The bowings to be used in playing the compositions of the older masters of the violin should be sought in the old editions printed direct from the manuscripts of the composers. Editions of some of these works published by modern editors, such as Hellmesberger, in which the bowings are recklessly and tastelessly altered, should be avoided. E. J. P.

BOWMAN, Henry, published at Oxford in 1678 a thin folio volume bearing the title of 'Songs for one, two, and three voyces to the Thorow-Bass. With some Short Simphonies. Collected out of some of the Select Poems of the incomparable Mr. Cowley, and others, and composed by Henry Bowman, Philo-Musicus.' A second edition appeared at Oxford in 1679. A MS. Miserere is in the Christ Church library. W. H. H.

BOYCE, William, Mus.Doc., was born at Joiners' Hall, Upper Thames Street (of which company his father, a cabinet-maker, was afterwards beadle), Feb. 7, 1710. He became a chorister of St. Paul's Cathedral under Charles King, and, on quitting the choir, an articled pupil of Maurice Greene, then organist of the cathedral. On the expiration of his articles in 1734 he obtained the situation of organist of Oxford Chapel, Vere Street, Cavendish Square, and pursued his studies under Dr. Pepusch. While yet a young man Boyce's hearing became much impaired, a calamity the greatest that can befall a musician, but one which, in his case, did not lessen the ardour with which he pursued his studies. In 1734 he set Lord Lansdowne's masque of 'Peleus and Thetis,' and in 1736 composed the music for John Lockman's oratorio 'David's Lamentation over Saul and Jonathan,' which was first given by the Apollo Society, and subsequently, in 1740, at Covent Garden Theatre. About 1740 he set two odes for St. Cecilia's Day, one written by Lockman, the other by the Rev. Mr. Vidal, undermaster of Westminster School. In 1736 he had given up his appointment at Oxford Chapel upon obtaining the post of organist at St. Michael's, Cornhill, which had become vacant by the removal of Joseph Kelway to St. Martin's-in-the-Fields. On June 21 in the same year he was sworn into the place of Composer to the Chapel Royal in the room of John Weldon, then lately deceased. He most ably discharged the duties of this office by the composition of many fine anthems and services, several of which are still, and will long continue to be, in use 'in quires and places where they sing.' In 1737 he was appointed conductor of the meetings of the Three Choirs of Gloucester, Worcester, and Hereford, which office he held for several years. In 1743 he produced the serenata of 'Solomon,' written by Edward Moore, which was eminently successful, and one song in which ('Softly rise, O southern breeze,' for tenor voice with bassoon obbligato) retained its popularity for upwards of a century, and is still occasionally heard. In 1749, on the erection of an organ in the church of Allhallows the Great and Less, Thames Street, Boyce was chosen organist. In the same year he was selected to compose the music for the ode written by William Mason for the installation of Henry Pelham, Duke of Newcastle, as Chancellor of the University of Cambridge. The ode, with Boyce's music, was performed in the Senate House, July 1, 1749, and on the following day, being Commencement Sunday, an anthem with orchestral accompaniments, by Boyce, was performed in Great St. Mary's Church, as an exercise for the degree of Doctor of Music, which the University then conferred on him. Both these compositions were soon afterwards published together. In the same year Boyce appeared as a composer for the theatre by reviving the masque of 'Peleus and Thetis' (introduced into the author's alteration of 'The Merchant of Venice,' entitled 'The Jew of Venice'), added songs to another revived masque called 'Lethe,' and set Moses Mendez's musical entertainment, 'The Chaplet'; the last of which met with great success. In 1750 he added songs to Dryden's 'Secular Masque,' and in 1751 he set another piece by Mendez, called 'The Shepherd's Lottery.' On the death of Dr. Greene, in 1755, Dr. Boyce was nominated his successor as master of the king's band of music, and conductor of the annual festivals of the Sons of the Clergy at St. Paul's Cathedral. [He was not sworn in till June 1757.] In the former capacity he was required to compose music for the new year and birthday odes of the poet-laureate, and wrote about forty-three compositions, now among the Music School MSS. Oxford; in the latter he voluntarily composed two fine anthems with orchestral accompaniments, besides additional accompaniments and choruses for Purcell's Te Deum and Jubilate, written for St. Cecilia's Day, 1694. In 1758, on the death of John Travers, Boyce was appointed one of the organists of the Chapel Royal. He resigned his places at St. Michael's, Cornhill, in 1768, and was dismissed from that at Allhallows, Thames Street, in 1769; as his deafness still increased, he gave up teaching, and removed to Kensington, where he employed himself principally in the collection and editing of the materials for the work by which he is best known—'Cathedral Music, being a collection in score of the most valuable and useful compositions for that service by the several English masters of the last two hundred years.' This work was projected by Dr. Greene, who had commenced collections for it, but, finding his health failing, bequeathed all his materials to Dr. Boyce, with a request that he would complete the work. The 'Cathedral Music' was published in three volumes, the first of which appeared in 1760 and the last in 1778. This valuable publication, which redounds so much to the credit of its editor for diligence, judgment, and scholarship, procured him little else than fame, its sale yielding but little beyond the expenses of production. On Feb. 7, 1779, the gout, from which Boyce had long suffered, terminated the blameless life of this most amiable man and excellent musician. He was buried on Feb. 16 with uncommon marks of respect, in the vault under the centre of the dome of

St. Paul's Cathedral. In the year following his death his widow published a volume containing 'Fifteen Anthems and a Te Deum and Jubilate' of her husband's composition; and in 1790 another volume containing twelve anthems and a service was published, under the editorship of Dr. Philip Hayes. These anthems and services (with others, to the extent in all of forty-six anthems and five services) were afterwards published in four volumes under the editorship of Vincent Novello. In 1788 John Ashley, who had purchased the plates of the 'Cathedral Music,' issued a reprint of it, with a memoir (by Sir John Hawkins) and a portrait (finely engraved by Sherwin) of Boyce prefixed. In 1849 a new edition, with additional services and anthems and new lives of the composers was issued under the care of Joseph Warren. Besides the compositions above mentioned, Boyce produced the following:—Dryden's 'Secular Masque,' 1745; twelve sonatas for two violins and bass, 1747; a concerto; eight symphonies; 'Ode to Charity,' composed for the Leicester Infirmary, containing the duet for tenor and bass, 'Here shall soft Charity repair,' which long remained an indispensable part of the programme of every concert given in aid of a charity; Rev. Walter Harte's paraphrase of part of Pindar's first Pythian ode, 1749; Masque in 'The Tempest'; dirge in 'Cymbeline'; dirge in 'Romeo and Juliet'; trio in 'The Winter's Tale'; two odes in Home's tragedy, 'Agis,' 1758; 'Harlequin's Invasion,' 1759, in which occurs the fine song, 'Heart of Oak.' Another important work was 'Noah,' an oratorio, but this seems to be no longer in existence. Many songs appeared in *The British Orpheus*, *The Vocal Musical Mask*, etc. A collection of his songs, duets, etc., entitled *Lyra Britannica*, appeared in several books. Boyce's only son, born March 25, 1764, long filled a respectable position in the best orchestras as a double-bass player. [See *Dict. of Nat. Biog.*, and the *Musical Times* for 1901, p. 441 ff., in which a complete list of the MS. compositions at Oxford and in the British Museum is given. Boyce's portrait by Hudson is in the Music School, Oxford.]

The following are the contents of the Cathedral Music:—

(Abbreviations:—M. and E.—Morning and Evening; F.A.—Full Anthem; V.A.—Verse Anthem.)

VOL. I.

TALLIS. Preces, M. and E. Serv.
MORLEY. Burial Serv. G minor.
FARRANT. M. and E. Serv. G minor.
BEVIN. M. and E. Serv. D minor.
GIBBONS. Do. F.
CHILD. Do. E minor.
ROGERS. Do. D.
BLOW. Do. A.
ALDRICH. Do. G.
BLOW. Do. G.
Do. Kyrie and Creed (triple measure). G.
14 Chants.

VOL. II.

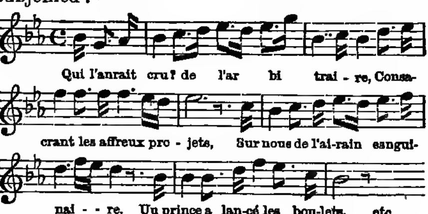
HENRY VIII. Full Anth., O Lord the maker. 4 voices.
TALLIS. F. A. I call and cry. 5 v.
TYE. F. A. I will exalt Thee. 4 v.
TYE. (2nd pt.) Sing unto the Lord. 4 v.
FARRANT. F. A. Call to remembrance. 4 v.
Do. F. A. Hide not Thou. 4 v.
BYRD. F. A. O Lord, turn. 5 v.
Do. F. A. (2nd pt.) Bow Thine ear, O Lord. 5 v.
Do. F. A. Sing joyfully. 6 v.
GIBBONS. F. A. Hosanna. 6 v.
Do. F. A. Lift up your heads. 8 v.
Do. F. A. Almighty and everlasting. 4. v.
Do. F. A. O clap your hands. 8 v.
Do. (2nd pt.) God is gone up. 8 v.
BATTEN. F. A. Hear my prayer. 5 v.
Do. F. A. O praise the Lord. 4 v.
Do. F. A. Deliver us, O Lord. 4 v.
CHILD. F. A. Praise the Lord. 4 v.
CHILD. F. A. O Lord, grant the King. 4 v.
Do. F. A. Sing we merrily. 7 v.
ROGERS. F. A. Behold now. 4 v
Do. F. A. Teach me, O Lord. 4 v.
BLOW. V. A. God is our hope. 8 v.
Do. V. A. O God, wherefore art Thou absent. 5 v.
Do. V. A. Save me, O God. 4 v.
Do. F. A. The Lord hear thee. 4 v.
Do. F. A. My God, my God. 4 v.
ALDRICH. V. A. Out of the deep. 4 v.
Do. F. A. O give thanks. 6 v.
CREYGHTON. F. A. I will arise. 4 v.
PURCELL. V. A. O God, Thou art. 4 v.
Do. V. A. O God, Thou hast. 8 v.
Do. V. A. O Lord God of Hosts. 8 v.
GOLDWIN. V. A. I have set God. 4 v.
CLARKE. F. A. Praise the Lord, O Jerusalem. 4 v.
CROFT. V. A. God is gone up. 4 v.
Do. V. A. Put me not to rebuke. 4 v.
WELDON. V. A. In Thee, O Lord. 4 v.
Do. V. A. Hear my crying. 6 v.
LAWES (WM.) V. A. The Lord is my light. 4 v.
LOCK. V. A. Lord let me know mine end. 5 v.
HUMPHREY. V. A. Have mercy upon me. 3 v.
Do. V. A. O Lord my God. 3 v.
BLOW. V. A. I was in the Spirit. 4 v.
WISE V. A. Prepare ye the way of the Lord. 4 v.
Do. V. A. Awake, put on thy strength. 3 v.
PURCELL. V. A. Thy way, O God. 4 v.
PURCELL. V. A. Be merciful. 3 v.
CLARKE. V. A. How long wilt Thou. 1 v.
CROFT. V. A. O praise the Lord. 3 v.
Do. V. A. Give the King. 5 v.
5 Chants.

VOL. III.

BYRD. M. and E Serv. D min.
CHILD. Do. D.
BLOW. Do. E min.
PURCELL. M. and E. Serv. (double), B flat.
BULL. V. A. O Lord my God. 5 v.
HUMPHREY. V. A. Thou art my King. 4 v.
Do. V. A. Like as the hart. 4 v.
Do. V. A. Hear, O Heavens. 3 v.
Do. V. A. Rejoice in the Lord. 4 v.
Do. V. A. Haste Thee, O God. 4 v.
WISE. V. A. The ways of Zion. 2 v.
Do. V. A. Thy beauty, O Israel. 4 v.
Do. V. A. Awake up, my glory. 3 v.
Do. V. A. Blessed is he. 3 v.
BLOW. V. A. O Lord, I have sinned 4 v.
Do. V. A. O sing unto God. 3 v.
Do. V. A. O Lord Thou hast searched me out. 2 v.
Do. V. A. I beheld and lo! 4 v.
TURNER. V. A. Lord, Thou hast been our refuge. 3 v.
PURCELL. V. A. Behold, I bring you. 3 v.
Do. V. A. They that go down. 2 v.
Do. V. A. Thy word is a lantern. 3 v.
Do. V. A. O give thanks. 4 v.
CLARKE. V. A. I will love Thee. 2 v.
GIBBONS. Sanctus. 4 v. in F.
CHILD. Sanctus. 4 v. in E minor.
ROGERS. Sanctus. 4 v. in D.
CREYGHTON. Sanctus. 4 v. in E flat.

W. H. H.

BRABANÇONNE, LA, the national air of the Belgians, dating from the revolution of 1830, when Belgium became an independent country. Both words and music were composed during the struggle; the former by a certain Jenneval, who was killed in one of the actions near Antwerp, the latter by CAMPENHOUT. The air is certainly unlike other 'national airs,' but it has taken a very firm hold in the country. The melody, and the words of the first stanza are subjoined:—



BRACE (Ger. *Klammer*; Fr. *Accolade*; Ital. *Accolada*). A vertical line, usually with a double curve, used to couple together two or more staves, thus indicating that the music written therein is to be performed simultaneously, either by various instruments, or voices, or in pianoforte, harp, or organ-music, by the two hands of the performer.

In orchestral scores the whole of the staves forming the score are braced together by a vertical straight line, and curved braces are added to show the position in the score of certain instruments or groups of instruments, and so to facilitate the reading. These curved braces are usually

employed to couple together the parts for the first and second violins, the two staves for the harp, pianoforte (if any), the violoncello and double bass, and the three trombones respectively, etc. In organ music with pedal obbligato three staves are required, the lowest being for the pedals; these three are braced by means of a straight line, with a curved brace in addition, to indicate the two staves which belong to the manuals. F. T.

BRADE, WILLIAM, an English musician who flourished 1594-1622, and who held various continental court appointments. Nothing is known of his birth, but he calls himself an Englishman in various dedications. The order of his appointments, mainly deduced from these dedications, is as follows: he was at the court of Christian IV. of Denmark from 1594 to 1596, from 1599 to 1606, and 1620 to 1622; it seems probable that before the first date, and it is certain that in the intervals, he was in the service of the Margraves of Brandenburg. From 1606 to 1609 his movements are not known, but from the latter year to 1614 he was director of the 'Rathsmusik' at Hamburg, being appointed in 1614 violinist to the Duke Johann Adolph of Schleswig-Gottorp. He was capellmeister at Halle in 1618,[1] and in 1619 he went to Berlin as capellmeister to the elector of Brandenburg, and was again at Gottorp, as capellmeister, from 1622. The date and place of his death are unknown. His works are:—*Musikalische Concerten*, Hamburg, 1609; *Newe ausserlesene Paduanen, Galliarden, Cantzonen, Allmand vnd Coranten*, etc., Hamburg, 1609; *Newe ausserlesene Paduanen vnd Galliarden*, mit 6 Stim . . . etc., Hamburg, 1614; *Newe ausserlesene liebliche Branden, Intraden, Mascharaden, Balletten* . . . mit 5 Stim . . . Lübeck, 1617; *Melodiensis Paduanis* . . . a 5 Part . . . Antwerp, 1619; *Newe lustige Volten, Couranten, Balletten*, etc., mit 5 Stim . . . Berlin, 1621. A MS. 'Fancy' is in the Royal College of Music. His son, Christian, was in the Elector's band from 1619. (Eitner's *Quellen-Lexikon; Dict. of Nat. Biog.*).

BRAHAM, JOHN, born in London of Jewish parents about 1774, was left an orphan at an early age, and in such humble circumstances that he is said to have sold pencils about the streets for a living. He was still very young when he became the pupil of Leoni, a Jewish singer of celebrity; and his first appearance in public was at Covent Garden Theatre, April 21, 1787, for the benefit of his master. In the bill it is announced—'At the end of Act i., "The soldier tired of war's alarms," by Master Braham, being his first appearance on any stage.' After the first act of the farce, he sang the favourite song of 'Ma chère amie.' At the opening of the Royalty Theatre in Wellclose Square, on June 20 in the same year, 'The soldier tired of war's alarms' 'was sung with great success by a little boy, Master *Abram*, the pupil of Leoni'; and another paper said, 'Yesterday evening we were surprised by a Master *Abraham*, a young pupil of Mr. Leoni. He promises fair to attain perfection; possessing every requisite necessary to form a capital singer.' [He sang at this theatre for about two years, being particularly successful as Cupid in Carter's 'Birthday,' and Hymen in Reeves's 'Hero and Leander.' He sang at Covent Garden in 'Poor Vulcan,' June 2, 1788.] When he lost his boyish voice the future prospects of young Braham appeared doubtful; Leoni had fallen into difficulties, and about that time left England; but he found a generous patron in Abraham Goldsmid, and became a professor of the piano. On his voice regaining its power he went to Bath, and in 1794 made his appearance at some concerts there under the direction of Rauzzini, who, appreciating his talent, gave him musical instruction for three years. In 1796 he was engaged by Storace for Drury Lane, and his début (in an opera called 'Mahmoud,' left unfinished by Storace, and finished by his sister Nancy Storace) was so successful that in the year following he was engaged for the Italian opera-house, where he appeared in Grétry's 'Azor et Zémire,' Sept. 26, 1796. He also sang in the Oratorios, and at the Three Choir Festival at Gloucester. Hoping, however, to achieve a more permanent reputation than could be obtained by any other course, he resolved to visit Italy, and there complete his musical education. [He and Nancy Storace, who shared his fortunes for some time, gave concerts in Paris, and reached Italy in 1798, Braham making his first appearance at the Pergola, Florence, in operas by Basili and Moneta. After an episode of rivalry and reconciliation with Mrs. Billington at Milan, where he stayed two years, Braham sang at Genoa, Leghorn, and Venice. Cimarosa wrote a part for him in an opera, 'Artemisia,' which he did not live to complete. Braham's last continental engagement was at Trieste.]

Taking leave of Italy in consequence of numerous solicitations from his own country, he reappeared at Covent Garden in 1801. From this point may be dated that triumphant career during which he created a constant furore. The opera in which he made his first appearance on Dec. 9, was a work by Mazzinghi and Reeve, entitled 'The Chains of the Heart.' The music, however, was so feeble in the serious, and so commonplace and vulgar in the comic parts, that it lived only a few nights, and was succeeded by 'The Cabinet,' on Feb. 9, 1802. In this opera Braham was the composer of all the music of his own part, a custom to which he continued for several years to adhere, and seldom has music been more universally popular. Among the operas with which he was thus connected we may name 'The Siege of Belgrade' and 'Family Quarrels,' 1802; 'The English Fleet in 1342,' 1803 (with the famous duet,

[1] Opel, *Zeitschr. für allgem. Geschichte*, 1885, p. 68.

'All's Well' in it); 'Thirty Thousand,' 1804; 'Out of Place,' 1805; 'False Alarms,' 1807; 'Kais, or Love in a Desert,' 1808; 'The Devil's Bridge,' 1812; 'Narensky,' 1814, and 'Zuma' (with Bishop), 1818. He wrote also for the Lyceum portions of other operas, 'The American' (containing the famous 'Death of Nelson,') 1811; 'Isidore de Merida,' 1827; and 'The Taming of a Shrew,' 1828. To follow Braham in all his engagements would exceed the limits of this notice; it is sufficient to say that in the theatre, concert-room, or church, he had scarcely a rival. *Non c' è in Italia tenore come Braham* was the frequent exclamation of foreigners. His compass extended to about nineteen notes; and his falsetto, from D to A, was so entirely within his control that it was hardly possible to distinguish where his natural voice began and ended. After his voice had lost its natural power he was successively engaged at several theatres, on the mere strength of a reputation which seemed immortal; and his proficiency in singing Handel was universally acknowledged when his career as a popular vocalist had reached its termination. He sang the part of Max in the English version of 'Der Freischütz' in 1824, and when Weber composed his 'Oberon' for the English stage (1826), Braham was the original Sir Huon.

In 1831 however the tide of fortune changed. In that year he purchased, jointly with Yates, the Colosseum in the Regent's Park for the large sum of £40,000. Five years afterwards he opened the St. James' Theatre, which he had erected at a cost of £26,000. The large fortune which his genius and energy had gained him was lost by these unfortunate speculations. [He sang the part of William Tell at Drury Lane, Dec. 2, 1838, and of Don Giovanni in the following year, his voice having suffered and become lower. An American tour undertaken with his son Charles in 1840 was unsuccessful; his last appearance was at one of the Wednesday Concerts in March 1852.] He died Feb. 17, 1856.

In private life Braham was much respected. He moved in good society; and among his acquaintance his fame as a man of information, a humorist, and a raconteur was scarcely inferior to his reputation as a vocalist. As a composer he completely attained the object he aimed at in his numerous songs, duets, etc., many of which attained the highest popularity. As a national song his 'Death of Nelson' has pleased and continues to please a vast majority of the inhabitants of the British Isles; it has therefore accomplished its purpose. (*Dramatic Biography; Gentleman's Magazine;* etc. Additions from *Dict. of Nat. Biog.*) E. F. R.

BRAHMS, JOHANNES, the last of the great line of German masters, lived a quiet uneventful life unlike that of many of his predecessors. He affords an instance of the occurrence of musical genius in the second generation, for his father Johann Jacob Brahms (1806-72), had on two occasions run away from home to devote himself to music; his grandfather, Johann (1769-1839), was an innkeeper at Heide in Holstein, where various descendants, through an eldest son, Peter Hoeft Heinrich (born 1793) are to be found. As several varieties of the name occur in the church registers, such as Brams, Bramst, and Brahmst, it will be seen that an assumption that Brahms was of Jewish origin is extremely unlikely. The runaway, Johann Jacob, was at length permitted by his father to adopt the musical profession, and in due course he became contrabassist in the theatre orchestra at Hamburg, where he married in 1830 a lady no less than seventeen years older than himself, Johanna Henrika Christiane, whose maiden name was Nissen. She was born in 1789, and died in 1865, leaving three children. The eldest was a daughter, Elise (1831-92), Johannes was the second child, and the third, Fritz (1835-95), was for many years a successful music-teacher in Hamburg. A year after the death of his wife the double-bass player married again a widow who was as much his junior as his first wife had been his senior. At Hamburg, in a fine old six-storied house now called No. 60 Speckstrasse, Johannes Brahms was born on May 7, 1833. Luckily there lived at Hamburg a pupil of the famous Marxsen of Altona, named O. Cossel, with whom the boy studied music until his tenth year, when his teacher asked Marxsen to undertake his musical education. For a time Marxsen's lessons went on simultaneously with Cossel's, and the boy's diligence and earnestness were soon abundantly evident, as well as his possession of a great creative gift. At this time his chief study was the pianoforte, and it was only by stealth that he composed, although the theoretical side of his studies was duly superintended by Marxsen. In after life, the composer paid a graceful tribute to his teacher, by dedicating to him the second pianoforte concerto in B flat, op. 83. On Sept. 21, 1848, he gave a concert, and played two movements from a concerto by Rosenhain, a fugue of Bach, and other pieces. He appeared at a concert given by Theodor Wachtel on March 1, 1849, and in the following April gave a concert on his own account, at which he played the 'Waldstein' sonata of Beethoven and a 'Phantasie über einen beliebten Walzer' of his own. The next two or three years must have been spent in diligent study, and in the composition of some of the early pianoforte works, the first set of songs, and a sonata for piano and violin. The good fortune which had guided him to Marxsen followed him throughout his life, and never was more conspicuous than when he consented to accompany the gipsy violinist, Eduard Remenyi, on a tour through North Germany in 1853. While they were at Hanover, Remenyi took his young friend to visit Joachim, who had lately been appointed Concertmeister there

JOHANNES BRAHMS

Joachim saw that a great future lay before the youth, and felt that the association with one who was little more than a virtuoso would not long satisfy the artistic cravings of such a nature; he suggested that if at any time Brahms should wish for more congenial work he should come to see him; soon afterwards things fell out as had been expected, and Brahms paid Joachim a visit of some weeks' duration at Göttingen, at the end of which Joachim gave him two letters of introduction.[1] One was to Liszt, and it had the strange result that on the strength of the scherzo, op. 4, Liszt adopted Brahms as an adherent of the most advanced school of modern music. The second introduction was to Schumann, in Düsseldorf, and was an event of the utmost importance in the life of Brahms and in the history of music. Schumann was so strongly impressed with the works that were then completed (apparently those now known as op. 1-6, together with a violin sonata, a trio, and a string quartet), that he not only wrote in the most enthusiastic terms to Dr. Härtel, recommending the new compositions to his notice with a view to publication, but inserted in the *Neue Zeitschr. für Musik* a memorable article entitled 'Neue Bahnen.' It is impossible to overestimate this emphatic recognition of the younger by the older composer, or to gauge its importance in Brahms's career. As a natural result of the article there was a paper war over Brahms àpropos of a performance of his sonata in C and the scherzo, which he played at Leipzig, Dec. 17, 1853. The publication of the music already referred to, which was soon followed by the appearance of op. 8, the B major trio, and opp. 9 and 10, piano pieces, was a more satisfactory consequence of the incident. From this time until the master's death every new composition of his was the snbject of immediate discussion, of course not always friendly; and the history of Brahms's life is henceforth little but a chronicle of his works. Probably there was never a career less eventful than his, and the 'dunkle Stille' of which Schumann spoke in his article shrouded him, more or less closely, all his life.

Happier circumstances it would be difficult to imagine for a creative artist; just at the time when it was most desirable for him to have opportunities of obtaining experience in connection with orchestral and choral music, he was offered two official appointments, one from the Cologne Conservatorium, which he refused, and one from the Prince of Lippe-Detmold, which he accepted. He held for four years (1854-58) the post of director of the court concerts and of the choral society, and, as the court was a very quiet one, and its ceremonies unexacting, he had plenty of time to devote to composition and to the development of his artistic nature. On his resignation of this post he returned to Hamburg for a time. His public appearances at this period were very few; he played at Cologne in 1856 and appeared twice at the Leipzig Gewandhaus in Dec. 1857, but on neither occasion did he bring forward anything of his own. On Jan. 27, 1859, at the Gewandhaus, he introduced his piano concerto in D minor (op. 15), a work which immediately aroused a storm of opposition by the independence of its structure, and the absence of the usual traditional characteristics of concertos, such as bravura passages, etc. The performance itself was an indubitable failure, and it was not till 1878, when he played it again, that the Leipzig public received it with anything like enthusiasm; yet, in the interval, it had been played by Clara Schumann and others, and had enjoyed favour all over Germany. It is perhaps not altogether surprising that this work should have been longer than most of Brahms's music in finding general acceptance; it is uncompromising in its earnestness, and occasionally there occur passages which must have seemed uncouth when it was first heard. In spite of Brahms's close study of the piano his playing was scarcely of a kind to produce a great effect upon the general public independently of the composition; Schumann described it as turning the piano into a full orchestra, and the testimony of those who heard him most frequently shows that it was technically far more energetic than accurate, and that the grandeur of the conception impressed the hearers far more than any exhibitions of merely manual skill.

The next important works were the two serenades for orchestra, opp. 11 and 16, the latter of which employs no violins; both were written soon after the concerto, and as it is most unlikely that their easily apprehended style was adopted in deference to the opinions of the critics who were unfavourable to the concerto, we are probably justified in supposing that the change was a perfectly natural and normal one. In 1860, the year of their publication, Brahms went to stay at Winterthür, in order to be near Theodor Kirchner, and this was his headquarters until he finally took up his residence in Vienna in 1862. To the Austrian capital he was undoubtedly attracted by his increasing interest in Hungarian music, an interest probably awakened by Remenyi, and manifested not only in some early pianoforte variations, but in the adoption of distinctly Hungarian characteristics in the finale of his G minor quartet for piano and strings, one of the many fine compositions produced during the residence in Switzerland. Throughout the composer's career there is no more striking peculiarity than his fondness for using the same form in two (or sometimes more) works composed about the same time. The two serenades have been already referred to; two

[1] The accounts of this episode differ considerably; compare Ehrlich's *Künstlerleben*, and an article by Schubring in the *Allgem. Mus. Zeitung*, with Moser's *Joseph Joachim*, and Reimann's biography of Brahms. The above account is from Dr. Joachim himself.

quartets for piano and strings follow one another immediately in the list, as opp. 25 and 26 ; two string quartets make up op. 51, and there are numerous other instances in his later life, such as the two pairs of symphonies, the 'Academic' and 'Tragic' overtures, etc.

Hanslick has reprinted the programmes of the concerts at which Brahms made his first appearances in Vienna (see *Aus dem Concertsaal*, p. 287 ff., and *Aus meinem Leben*, p. 14). His greatest successes were, as pianist, his interpretation of Schumann's fantasia op. 17, and as composer, his variations on a theme of Handel and the B flat sextet. The only orchestral work of his given was the D major serenade, op. 11. He was soon afterwards appointed conductor of the Singakademie, and threw himself with characteristic devotion into the congenial work of giving fine performances of the choral works of Bach, Beethoven, Schumann, and others. Considering the opportunities of the position, we might have expected many choral compositions to date from this time, but there are only a very few, beside the two five-part motets, op. 29, and some arrangements of old German 'volkslieder'; it may be assumed, however, that the experience of choral conducting must have been of great value to him, although he gave up the post in the year after his appointment, and after that held no official appointment for the rest of his life, excepting only that of conductor to the Gesellschaft der Musikfreunde from 1872 to 1875. As regards the outward conditions of his life, there is little or nothing more to be said, for, beyond some occasional musical tours, such as a memorable series of concerts in German Switzerland, with Joachim, the record is one of peaceful, honoured work, in his apartment at Karlsgasse, No. 4 (third floor), varied by holiday journeys often to Italy, and in later years to such resorts as Thun, Ischl, Baden-Baden, or Carlsbad. At the German watering-places he spent much time with Mme. Schumann, whom he regarded with almost filial affection, while his compositions found in her an admirer gifted with rarest insight, and a most sympathetic interpreter. A chill caught at Mme. Schumann's funeral is supposed to have aggravated the disease (cancer of the liver) of which Brahms died at Vienna on April 3, 1897. He was buried in the same cemetery as Beethoven and Schubert, and not far from them. A 'Brahms Museum' was opened at Gmunden in 1901. A bust of the composer, by Fräulein Ilse Conrat, was unveiled at the Central Cemetery on May [illegible], 1903, when the master's beautiful part-song 'Nachtwache,' from op. 104, was sung. An account of Brahms's last moments was published, in connection with the ceremony, by Frau Celestina Truxa, the composer's faithful landlady, in the *Neue Freie Presse* of May 7, 1903.

Two of Brahms's compositions, and two only, were prompted by the events of outer life, the 'Deutsches Requiem' and the 'Triumphlied.' The former was suggested primarily by the death of his mother in 1865 ; at its first performance at a concert of the Gesellschaft der Musikfreunde in Vienna in 1867 it consisted of the first three numbers only, the consolatory 'Selig sind,' the impressive march, 'Denn alles Fleisch,' and the dramatic number which rises from the anxious mood of the opening baritone solo to the majesty of the pedal-fugue, 'Der Gerechten Seelen,' which strikes the hearer as forming a natural climax and close. For the second performance of the work, in Bremen Cathedral, April 10, 1868, three more movements were added, the work being virtually in its present shape, with the exception of the number with soprano solo, 'Ihr habt nun Traurigkeit.' The splendid 'Triumphlied' was composed to celebrate the German victories, and was written in 1871 and performed at Vienna in 1872. These two works, with the expressive 'Schicksalslied' set to Hölderlin's words, and the 'Rhapsodie' for alto solo and male chorus (to a fragment from Goethe's *Harzreise*) mark the culmination of Brahms's art as a choral writer. In one and all, he touches a point of sublimity that had not been reached since Beethoven. Written within a comparatively short period, they throw a strong light on the master's religious convictions. The dogmatism of the churches did not appeal to him, and he was a stranger to the devotional mysticism that was so characteristic of Bach ; his mind dwelt willingly upon the mysterious problems of human destiny (he returned to the same subject in his last composition, the four 'ernste Gesänge'), and his knowledge of scripture suggested the choice of words which were not likely to occur to the ordinary purveyor of oratorio-books, and which gain a new meaning and beauty from his music. He was no pessimist, even if his hopes for the future life seem at times to be a little indefinite; in the 'Schicksalslied,' which is considered by many authorities to be his crowning achievement in choral music, he cannot rest contented to leave the mind of his hearers occupied with the brevity and uncertainty of human life, as contrasted with the serenity of the heavenly state, described in the opening words ; he must bring back our thoughts to the tranquil mood again, by means of a long orchestral version of the lovely music of the beginning. To this period of the great choral works belongs also 'Rinaldo,' a cantata to Goethe's words for tenor solo and male chorus, a work of far less striking quality than the others, and the only specimen we have of what Brahms's operatic style might have been like, had he chosen to attempt composition for the stage. The composer's famous epigram in answer to a query of Hanslick's, to the effect that it would be as hard for him (Brahms) to

marry as to write an opera; but that after the first experience, he would probably perpetrate a second, is of course not to be taken seriously, but Brahms may well have considered that opera lay outside the direct course of his own purely musical nature; he saw Germany divided into two classes by the music of Wagner, and while he no doubt felt that he could not bring his own creative powers into line with the new methods, he was fully conscious of the complete sterility which had fallen upon the stage-music of the ultra-conservative party. (On the whole question of Brahms's attitude to opera, see the *Recollections of Johannes Brahms*, by Dietrich and Widmann.)

In some of the shorter choral works Brahms adopts the simple manner of a part-song; in the early 'Marienlieder,' the songs for male chorus, op. 41, the set for mixed chorus, op. 93, and many of the rest, the structure is simply that of a harmonised melody; but in such things as the two motets, op. 29, the greater choral compositions already mentioned, or the 'Fest- und Gedenksprüche,' op. 109, he shows himself as the legitimate follower of Sebastian Bach, in his manner of attaining great effects by polyphonic means; of course the modern resources of harmony are freely used in all cases, whether part-songs or motets. In 'Nänie,' op. 82, and the 'Gesang der Parzen,' op. 89, he returns to the form of the short choral ballad, of which the 'Schicksalslied' set the pattern; and the subjects are markedly akin to those of the works already mentioned.

In the exquisite six-part 'Vineta,' from op. 42, the two solemn and suggestive compositions called 'Nachtwache,' from op. 104, and other songs for chorus, Brahms gets strange new effects, now by the use of wonderful changes of harmony, such as are only possible with unaccompanied voices, and now by means of a certain quiet sonority which is peculiar to him in this comparatively unknown branch of his work.

Brahms's compositions for orchestra alone bear but a small proportion to his other works in mere extent; he seems to have been conscious of the serious responsibility undertaken in approaching orchestral composition, for after the two serenades, he waited for a good many years before the composition of the beautiful variations on a theme of Haydn,[1] op. 56*a*. These were conceived in a twofold form, first for orchestra, and second as a duet for two pianofortes, neither being properly described as an arrangement of the other. Apart from this, there are a good many instances of his arranging compositions of his own for other combinations than that for which he originally intended them. As there can at no time have been any difficulty in finding publishers ready to issue his works in their proper form, we are entitled to assume that these arrangements, and the issue of such things as the 'horn' trio and the 'clarinet' trio and quintet with alternative string parts as substitutes for the wind instrument, were undertaken with complete satisfaction to the composer; and we may see here a sign of how very much more important the matter of his ideas was to him than the manner of their presentation; what he had to say was always far more important than how it was to be said. In other words, he was, as has often been said, a draughtsman rather than a colourist in his treatment of the orchestra. Symmetry of form, originality of design, the logical development of his themes, these appealed to him far more strongly than the desire to elicit from the orchestra new combinations of tones. To the orchestral virtuoso who is nothing more, his symphonies can never be as eloquent as they are to the musician who is capable of appreciating the process by which a theme which at first seems, perhaps, to possess no special eloquence, is made to speak things of unutterable beauty. The art which can extract from Haydn's charming little theme a means of playing on the deepest feelings of the hearer's nature, has no need of glaring contrasts of orchestral colour, or of subtle instrumental effects, to convey its message. Yet it would be misleading to allow it to be supposed that Brahms was deaf to the charm of orchestral colour-effects; the exquisite and individual 'colouring' of the early choruses for female voices accompanied by two horns and harp (op. 17), the famous horn-passage in the first symphony, the close of the first movement of the second, a well-known passage in the 'Tragic' overture, the humorous use of the various instruments in the 'Academic' overture, are quite enough to point the fatuity of such an assumption. No one, whether of the classical or modern masters, understood more perfectly than he the value of tone-quality as a means of arresting attention; and that he is not continually forcing his hearers to realise his skill in contrasts or transitions of tone, is simply because he wishes to fix their attention upon the actual material of the music, upon the themes and their transformations. By the time the first symphony was given at Carlsruhe (Nov. 6, 1876), Brahms had established his position in the eyes of the more conservative party among German musicians, and never can a first symphony have been awaited with such eager expectations. From Brahms's chamber music it was abundantly clear that while he was no despiser of the classical forms, yet he was no slave to them, and that from no one might legitimate innovations in regard to form and structure be more confidently expected. The theme of the finale of the symphony aroused an opposition and suggested a line of defence that afford a counterpart to the war over the piano concerto. It is beyond all question that it reminds

[1] The theme comes from a divertimento for wind instruments, still in MS. The statement of the theme in the orchestral version of Brahms's work seems to be an exact quotation from Haydn. The theme is called 'Chorale St. Antonii,' from what cause is not clear.

the hearer of the great theme in the finale of the Ninth Symphony of Beethoven; this fact was pounced upon by one party, as a proof of Brahms's lack of originality, while his defenders made matters worse by calling the new work the 'tenth symphony,' and declaring that Brahms began at the point where Beethoven left off. In the present day such an observation seems not so very wide of the mark, but in 1876 it was both daring and impolitic. When in the following March the symphony was given for the first time in England by the Cambridge University Musical Society, another section of the work made the most profound impression, for the mysterious horn-call which is so marked a feature of the introduction to the last movement, seemed to contain an allusion to the familiar chimes which are known as the 'Cambridge Quarters.' Of course the resemblance was entirely fortuitous, but it was none the less striking on that account. Emotionally and artistically, this point, with the subsequent transition to the frank joy of the C major theme, is one for a parallel to which we have to look back to Beethoven. The coda of the first movement of the second symphony, in D, op. 73, is another of the passages that are rightly described as magical in their effect. In this symphony occurs one of the rare instances in which a theme is presented in two contrasting aspects, and the change from the suave 'allegretto grazioso' to the 'presto ma non assai,' a change not only of speed but of rhythm, is one of the most beguiling things in the whole of music. The symphonic form was laid aside after these two symphonies, and the next work for orchestra was a pair of overtures, the 'Academic Festival-Overture,' and the 'Tragic' overture, the first a work full of amusing quotations from the beautiful traditional students' songs of Germany, and the second weighty with some motive of deep tragedy into the secret of which the audience is happily not taken. The entrance of the trombones and tuba cannot fail to have a powerful effect upon the emotions, even though we may not be able to guess what exact form of tragedy suggested the idea. The other overture was first played at Breslau when the degree of Doctor of Philosophy was conferred upon Brahms.

Like so many of the other works, the symphonies were produced in pairs; the third and fourth have only two years between them, dating respectively from 1884 and 1886. Op. 90, in F, has a touch of wonderful beauty at the end, in a tranquil coda to the finale, which has been well compared to a calm sunset after a stormy day; at the very end, the descending passage of the opening theme of the first movement reappears in a kind of delicate allusion above a swaying figure in the violins. The 'poco allegretto' which takes the place of scherzo is a fine specimen of a mood that occurs frequently in Brahms, a gently elegiac mood conveying the idea of something evanescent, elusive, the smile of a tearful fairy, or the sunshine of an April day. The tender melancholy of the Romantics seems to find its ultimate expression in this and other movements in Brahms's work, and the slow movement of the fourth symphony has the same feeling, though not to such a marked extent. In the fourth symphony the master made his boldest experiment in the matter of form, by reviving for the finale the passacaglia structure of old time, and applying it to modern ideas. Whether a form requiring such keen attention on the part of the hearer is the ideal form for the end of a long symphony may be doubted; it is very far from easy to thread the mazes of the *basso ostinato* through all the varieties of working-out to which it is subjected, and even students who are fairly familiar with the movement find themselves in danger of losing the theme, and thus becoming for a time unable to grasp the purport of the movement. When this is admitted, however, it has to be added that only two other symphonies, Mozart's 'Jupiter' symphony, and the Ninth of Beethoven, have last movements of such monumental grandeur. This movement is Brahms's last word for the orchestra alone, and a wonderful culmination of his work in this line.

There are four concertos, and in all of them we feel that Brahms inherited Schumann's horror of display for display's sake. The second pianoforte concerto in B flat, op. 83, has many of the uncompromising characteristics of the first, with a greatly increased amount of obvious beauty in the themes themselves and in their development; the violin concerto in D, op. 77, yields so far to convention that the cadenza is not written out, but left to the player's choice; the masterly cadenza by Joachim has been generally associated with the work in England and Germany, and it is to be desired that it should be printed as an integral part of the composition in future. Although the violin is not the only centre of interest in the composition, this concerto affords rare opportunities to a player who can cope with its difficulties. In the last concerto, for violin and violoncello op. 102, Brahms reverts to something like the older type of concerto, in which several instruments forming what was called the *concertino* were opposed to the full orchestra. The two solo instruments are used for the most part in this way, and the frequent use of double-stopping on both produces an effect as if a string quartet were alternating with the orchestra. The lovely slow movement is a worthy counterpart to that of the violin concerto, and affords a happy contrast to the extremely intricate character of the other movements.

Brahms's writing for the orchestra has often been unfavourably criticised; like Schumann, he is sometimes asserted to have sacrificed too little to effect, and, as has been said above, it is quite

certain that he thought far more of what he had to say than of how he said it. But in the region of concerted chamber music, even those who may not wholly admire his orchestral compositions are bound to admit that he is without a rival in the manipulation of the instruments, and that he knows how to give to each and every one of them passages that seem to be suggested by the instrument itself. In the very first, the trio, op. 8, in B major, the opening themes in all four movements seem to have been so characteristic of the violoncello that the piece might well be the work of a player of that instrument. In the A major quartet for piano and strings, op. 26, the leading feature of the beautiful slow movement, the sweeping arpeggios, could not have produced exactly the effect they do on any instrument but the piano, and over and over again a kindred effect is produced by the same means. Compare the finale of the violin sonata, op. 100, the intermezzo in E flat from op. 117, that in E flat minor, op. 118, No. 6, and numbers of other instances, in all of which there is a sense of some threatening doom, something portentous, conveyed by the arpeggio figure, a figure which surely was never before turned to such account since it was invented. How fully the horn is understood and its characteristics considered in the trio, op. 40, is obvious to every one who hears it first as originally written, and then with the horn part transferred to viola or violoncello. Finally, in the last instances of Brahms's creative power in chamber music, with what wonderful eloquence is the clarinet employed in the four works in which it appears, opp. 114, 115, and 120. It is well known that the suggestion for the special use of the instrument in these works was due to the exquisite clarinet-playing of Herr Mühlfeld, the eminent clarinettist of the Meiningen orchestra, who is to his instrument what Joachim is to the violin. The string quartets, op. 51, belong to those compositions of Brahms which are comparatively slow in their appeal to the generality of musical people ; but their vogue, and that of the beautiful work in B flat, op. 67, has steadily increased, and all three are now considered among the most valuable contributions to quartet literature. The third contains one of the experiments in designing his finales, of which mention has before been made. For the last of the variations on a beautiful theme apparently quite unconnected with the subject of the opening movement, that subject is worked in, thus unifying the whole work.

The trio, op. 8, is an interesting example of a self-criticism characteristic of the very greatest minds, and very rare amongst musicians. In the last years of the composer's life, he revised this, his first chamber composition, and a comparison of the two versions (the second was published in 1891) is in the highest degree instructive to students of his methods. One subject was evidently discarded for too close a resemblance to Schubert's song, 'Am Meer'; a new development of the finale is substituted for the old ; and in the other movements many details are to be noticed, all of which are improvements in the direction of breadth and simplicity. Several of the best known of Brahms's compositions, of the earlier period, were not finally settled as to their outward form for some little time after their creation. The fact that the variations on a theme of Haydn were conceived in two different aspects, as a duet for two pianos, and as set for full orchestra, the guise in which they are more often heard, has been already mentioned ; the splendid quintet in F minor seems to have undergone a double alteration, for it was first laid out as a quintet for strings alone (two violoncellos), and its present shape, for piano and strings, was an afterthought ; it was also arranged as a duet for two pianos, the arrangement being promoted to the dignity of a separate opus-number in the list. The first of the sonatas for piano and violin, in G, op. 78, the work which heralded the mature productions of his later life, and showed Brahms in his most genial mood, received a suggestion from a song, or rather from two songs, 'Regenlied' and 'Nachklang,' a pair of lyrics meant to be sung together. The theme, —that of the finale of the sonata—is one of the very rare instances in which Brahms took suggestions from external phenomena ; the musical picture of dropping rain would not be clear to any one who did not know that it came from a song of which rain is the theme. It is difficult to call to mind any other instance beyond the far more vivid picture of waves breaking on a stormy beach, in the accompaniment to the song, 'Verzagen.' In the second of the violin sonatas, op. 100, there is another interesting experiment in form, where the slow movement and scherzo are fused into one, or rather are made to alternate in one and the same movement. Finely as it succeeds in this instance, it evidently did not commend itself as an innovation of very general practical value, or it would surely have been used again. The third of the sonatas, op. 108, is distinguished by a wonderful treatment of a long pedal point in the first movement, and by a fairy-like intermezzo full of the tender melancholy already referred to. In the beautiful string quintet in G, op. 111, the prominence given to the first viola part will not escape attention ; it may be almost considered as the leader of the party throughout the work, not merely in one movement, as is the case in Mozart's quintet in C for the same combination. The quintet for clarinet and strings, op. 115, is full of instances of the happy use of dialogue between the wind-instrument and the first violin, and the rhapsodical slow movement is perhaps the most effective thing ever written for the clarinet.

The first of the master's published works were for piano alone, and in his later days he wrote an abundance of solos for that instrument; the fact that between op. 39, the waltzes for four hands, and op. 76, the group of eight pieces, there is a long interval in the list, is not altogether easy to account for, but it seems possible to guess at the reason. In the beginnings of composition, the piano is the medium most generally and easily accessible; its practical utility makes young composers apt to ignore its essential characteristics; and, for all the skill with which Brahms treated it in combination with other instruments, we may doubt if the individual charm that belongs to it was fully realised by him until a comparatively late date. He was greatly interested in its technique throughout his life; but his chief anxiety, if we may judge from his works, was to get from it the utmost fulness of effect, to make it, as far as possible, represent an orchestra, rather than to allow its gentler characteristics full play. The several sets of variations, for two hands and four, are almost all polyphonal in design; upon the groundwork of a theme from one of Paganini's caprices he constructs a series of wonderful studies which have scarcely been surpassed in technical difficulty, and in which, as a rule, the main features are the interweaving of many parts, sometimes actually, sometimes in a kind of suggested polyphony, and the development of new and beautiful melodic ideas from the germ borrowed from Paganini. In all this earlier piano music it was felt that there were few effects that would not have been as well, or better, realised upon other instruments than the piano; on this account it was often said that this class of Brahms's work had one fault, that it was 'not piano music.' His love of Bach, and his marvellous power of interpreting that master, may have led him to attach the highest importance to the attainment of complete independence of finger, not the mere independence and flexibility for which the older writers for the pianoforte had striven, but the practical grasp, in which the brain rather than the hand is concerned, of two or three conflicting rhythms at once. The series of 51 'Uebungen' which were published not long before the master's death show how very prominent a place the higher development of this kind of independence held in his esteem throughout his life; and it is as often required in his later works as in his earlier. But in the later piano pieces, although many of the capriccios are polyphonic, we meet, for the first time, with things such as no instrument except the piano could attempt to convey. The capriccio in B minor and the intermezzo in A flat, from op. 76, are as purely piano music as anything of Chopin's. The second of these depends for its special charm upon the transient quality of the pianoforte tone, and technically upon a very judicious use of the pedal. Both the rhapsodies, op. 79, are grateful to the pianist as well as intensely interesting to the musician, and it is in the violin sonata, which came between these two publications for piano solo, that we find, almost for the first time in the concerted works, that feeling for special pianoforte effect which was afterwards so fully revealed in the splendid series of solos opp. 116-119, which are called, for the most part, 'capricci' if fast, and 'intermezzi' if slow, with what seems like indifference to ordinary nomenclature. In these a new world is revealed to the pianist; the intermezzo in E major (op. 116, no. 4) is not only intensely expressive, but it exhausts the possibilities of special piano effect in its own direction, and there is in it one point which shows the master's insight into the characteristics of the two hands. A very short introductory phrase is expanded, as the piece goes on, into short interludes, which are of course to have less emotional prominence than the exquisite principal melody; in order to ensure this Brahms makes the right hand, during these passages, cross over to play the bass notes, leaving the upper part to the left hand, in which there is usually less tendency to play with strong expression. The three intermezzi, op. 117, seem like chosen illustrations of three specially characteristic moods of the composer; the first, suggested by a German version of the Scottish 'Lady Anne Bothwell's Lament,' has his favourite device of a melody in an inner part, shrouded as it were by harmonies above as well as below, and its middle part contains instances of his use of an arpeggio with the suggestion of something ominous; the second piece, in B flat minor, has something of the tender, fairy-like melancholy of the slow movement of the third symphony; and the third intermezzo is clearly suggested by the form of an old ballad, a branch of musical art in which Brahms took an ardent interest throughout his life. The G minor 'Ballade' in op. 118 is another example of the same quality, and the same book contains a wonderful instance, before alluded to, of condensed tragedy in the piece in E flat minor, No. 6, where the arpeggio figure is again used with unmistakable emotional purpose. The last three of the pieces, Brahms's last published works for the piano alone, illustrate three very different characteristics: the intermezzo in E minor, with its surprising change of thematic aspect, tells of Brahms's well-known love of the waltz-form as treated by Strauss; the exquisitely dainty little piece in C is as characteristic of the master's tenderness as the final 'Rhapsodie' is of his vigour.

If the pianoforte pieces were formerly asserted to lack some of the essential features of genuine piano music, still more often were Brahms's songs pronounced to be 'unvocal,' and it is within the memory of many that the average English singer would not attempt to sing anything by him. As the accusation that the songs are

unvocal has been practically disproved by the fact that there is hardly a singer in the present day who does not include some songs of Brahms in his or her repertory, it cannot be necessary to point out its absurd falsity further. The song-writing of Brahms is based, more closely than that of any other composer, on the folk-songs of Germany; his ardent love of these beautiful melodies was one of the most permanent characteristics of his nature, and it is significant that while one of his first publications was a set of 'Volkskinderlieder' arranged for the children of Robert and Clara Schumann (published without the arranger's name), one of his last productions in vocal music was a set of seven books of Volkslieder, published without opus-number in 1894. Apart from these arrangements, the songs number very nearly 200, and the proportion borne by lyrics either based on actual folk-songs, or in a style imitated from national music, is very large. Many of the sets of songs that were published at frequent intervals during Brahms's life contain one or more specimens labelled 'Volkslied,' sometimes implying that the words are taken from a traditional song, and sometimes that the style of writing is closely assimilated to that of the folk-song. Such things as 'Sonntag' or 'Wiegenlied' are so strongly akin to the popular songs of Germany that they might easily be mistaken for genuine specimens, and the beautiful 'Geistliches Wiegenlied' is based upon a traditional tune, expanded and developed with consummate art.

In some few instances Brahms set to music narrative poems dealing with exciting events, but as compared with Schubert's or Löwe's productions in this class, his are very few and unimportant. 'Entführung' has the peculiarity, rare in his narrative songs, of being set to the same music for each stanza, not 'durchcomponirt'; another, 'Verrath,' is almost the only instance of a ballad dealing with active dramatic action, and it is a superbly successful one. For the most part, the musical portrayal of a landscape appealed far more strongly to Brahms,—of landscape, that is to say, as influencing, or apparently influenced by, the mood of the individual. The early 'Mondnacht,' a song published by itself and without opus-number, 'Die Mainacht,' 'An die Nachtigall,' 'O komme, holde Sommernacht,' and 'Feldeinsamkeit,' are all typical specimens of this mental attitude towards nature, which tempts one to call Brahms the Wordsworth of music, were there not a warmer passion, a higher ecstasy, and a deeper insight, than Wordsworth ever could attain. In such songs as 'Gestillte Sehnsucht,' 'Verzagen,' and 'Auf dem Kirchhofe,' the human emotion is more prominent.

As with all the greatest lyrical writers, love-songs form by far the largest and most important section of Brahms's vocal works, and here his finest qualities come constantly into view. The set of fifteen romances from Tieck's *Magelone* exhaust every mood of the lover's emotion, and no one has ever given more sincere, sustained, or truly passionate expression to the rapture of crowned love than is to be found in these songs. It may be held that, for a song-cycle, some of them are too much alike in general structure, and they certainly are in many cases longer than the average of the songs which make up the great series of Schubert's or Schumann's masterpieces in this form. But, whatever difficulty there may be about the conditions under which they should be presented to the public, the fact remains that they are a monument of emotional eloquence such as has not been equalled in music. Before their date, only one song, 'Wie bist du, meine Königin,' reaches the same level of ardour; but after them, there come a large number of lyrics worthy of praise no less unqualified. 'Botschaft,' 'Von waldbekränzter Höhe,' the serenade from op. 58, 'Minnelied,' 'Wir wandelten,' and 'Ständchen,' are perfect love-songs, exquisite in melodic invention, intense in expression, deeply emotional, and admirably written for the voice. In 'Steig' auf, geliebter Schatten' there is the concentrated desire for a loved one departed; and 'Willst du, dass ich geh'' touches on a more physical aspect of emotion than Brahms generally prefers. A similar situation, viewed from a more humorous standpoint, is in 'Vergebliches Ständchen,' and a kindred mood of feminine nature is illustrated in the same way in 'Des Liebsten Schwur' and 'Mädchenfluch.' Not Schumann himself had the secret of giving expression to the most intimate emotions of woman's love with so certain a hand as Brahms, in whose first-issued book of songs there occurs the wonderful 'Liebestreu,' with its climax of passionate utterance to music that is repeated, almost identically, but with ever-increasing force and speed, for each verse. 'Der Schmied' paints the pride of a girl in her lover's strength, and 'Von ewiger Liebe' stands alone as a picture of a constancy that endures unimpaired even into the pathetic situation given so beautifully in 'Immer leiser wird mein Schlummer.'

In a loftier mood than that to which love-songs are appropriate, are the series of four 'Serious Songs' which make up Brahms's last-published composition. Again, as in the early choral works, the vanity and transitoriness of human life are taken as the starting-point for what may be called a series of meditations, in which the composer is led, as it were, by the authors of Ecclesiastes and Ecclesiasticus, to the conclusion that death is better than life, and to a wonderfully touching apostrophe to death; a climax is provided to the whole at the end in words taken from the First Epistle to the Corinthians, the famous definition of love. This is the most beautiful of the four songs, and the spiritual

and emotional value of the set cannot be overestimated.

Of the concerted vocal works, such as the many series of quartets and the duets, there is not much need to speak at length. The type set in the first 'Liebeslieder-Walzer,' op. 52, had been foreshadowed in a quartet, 'Wechsellied zum Tanz,' from op. 31, and the idea of letting solo voices accompany waltzes played by two performers on the piano yielded such good results that a second set, 'Neue Liebeslieder,' op. 65, was not very long in following the first. These two sets of vocal quartets were among the first things that made for Brahms's real popularity with the English public, and since the date of the second set it has never declined. The 'Zigeunerlieder,' op. 103, and some of the six quartets, op. 112, are in similar mood, and in one and all, the use of the four voices must constantly remind musicians of the 'Liebeslieder.' One of the most beautiful of all the quartets not in waltz-rhythm, is the epilogue to the second set of 'Neue Liebeslieder,' a true lyric for four voices, with a gentler style of accompaniment than is provided for the rest.

It remains to speak of the single composition published after the master's death, a set of eleven 'Choral Vorspiele' for organ. They were composed at Ischl in May and June 1896, so that they represent the master's style in its fullest maturity. Some of them, such as 'Mein Jesu,' 'Schmücke dich, o liebe Seele,' and 'Herzlich thut mich verlangen' (No. 9), carry us back to Bach by their exquisite mastery of contrapuntal effect; some, like 'Herzliebster Jesu,' and 'O Gott, du frommer Gott,' have the poignant emotional intensity that is the supreme quality in Bach's work; 'Herzlich thut mich erfreuen,' with its occasional displacement of accent, may remind us of Brahms's own early days, 'O wie selig' is as characteristic of the composer as any of his songs, and 'Herzlich thut mich verlangen' (No. 10), with its strange disposition of parts, creating effects quite new to the organ, shows how untiring was the master's originality. The exquisite 'Es ist ein' Ros' entsprungen' has some of the artless charm of the folksongs which were so near Brahms's heart; and his love for making more than one experiment in the same form is again illustrated in several instances of double settings of the same chorale. The last of the collection, 'O Welt, ich muss dich lassen,' has an effect of a double echo, not a literal repetition, but a gradual fading away, as it were, of the last notes of each line; if it is safe to regard it as Brahms's last actual composition, it must be admitted that none of the great composers has given the world a final utterance of more exquisite and touching beauty. The last few bars have a cadence of such fresh and expressive beauty as even Brahms himself never surpassed, and once again we are reminded of Bach, whose last composition was a chorale-prelude on 'Vor deinen Thron tret' ich hiemit.'

It may not be altogether vain to attempt to sum up a few of Brahms's more notable characteristics, those qualities which make his music what it is, and which distinguish him most conspicuously from all others. That he was fond of conflicting rhythms, and themes akin in style to folk-songs or national dance-tunes, is obvious to the most superficial hearer; in the first peculiarity he had been to some extent anticipated by Schumann and others, and in the second by Schubert. One of his most individual qualities is seen in his manner of handling his themes, for while adhering to the classical structure far more strictly than any of the great composers since Beethoven, he gave it new life by the ingenuity with which he presents his material in new aspects, and in particular by the kind of modulations he prefers. Instead of moving by gradual and definite steps to a remote key, he often leaves out one, or even more, of the sequence of steps by which the distant key would naturally be reached; and certain key-relationships, well known of course before his time, are used with evident affection, such as the transition to the mediant or sub-mediant of the key. In general his treatment of his subject is so instructive to the student and so delightful to the intelligent hearer, that Brahms must be considered supreme among the great masters in this respect.

Another peculiarity of his work is his fondness for themes built, not on the successive notes of the diatonic scale, but on the notes of the tonic chord. It is well known that Beethoven's most individual melodies are 'diatonic,' and while instances of this kind are to be found in great numbers in Brahms, so many of his most characteristic ideas are presented in the other form that we are justified in assuming his preference for it. It would be easy to multiply instances, but such phrases as those which begin the second symphony, the slow movements of the violin concerto and the double concerto, the 'Wiegenlied,' the 'Sapphische Ode,' will occur to every student of Brahms's works; while it would be a matter of some difficulty to adduce examples of diatonic melodies to equal the others in number or importance. The great exception is the theme of the finale of the first symphony, but that, as has often been said, is so closely akin to the finale of the Choral Symphony (one of Beethoven's most typical diatonic tunes) that it hardly counts; the first and third of the intermezzi, op. 117, are two exceptions, and here it may be noticed that in both there is a deliberate assumption of the style of an old ballad.

It is even yet early to attempt to define Brahms's position among the great masters; but as years go on, it is more and more generally realised that he is not only among them, but that he must be assigned a place

with the very greatest of them all. In him the illustrious line of German composers of the first rank seems to have come to an end; and, whatever may be the future history of that nation's music, the last of her great masters is in no way unworthy of association with her most illustrious names.

The following is a list of Brahms's works:—

Op. 1. Sonata for PF. in C.
2. Do. do. F♯ minor.
3. Six Songs.
4. Scherzo for PF. in E♭ minor.
5. Sonata for PF. in F minor.
6. Six Songs.
7. Six Songs.
8. Trio in B, PF., Violin and Violoncello.
9. Variations for PF. on a theme of Schumann, F♯ minor.
10. Four Ballads for PF.
11. Serenade for Full Orchestra in D.
12. Ave Maria for female voices, Orch. and Organ.
13. Funeral hymn for Chorus and Wind.
14. Eight Songs and Romances.
15. Concerto in D for PF. and Orch.
16. Serenade for small orchestra in A.
17. Four songs for female Chorus, 2 Horns and Harp.
18. Sextet in B♭ for Strings.
19. Five songs.
20. Three duets for S. and A. with PF.
21. Variations for PF.:
(1) On an original theme;
(2) On a Hungarian melody.
22. Seven 'Marienlieder' for mixed choir.
23. Variations for PF., 4 hands, on a theme of Schumann, E♭.
24. Variations and Fugue for PF. on a theme of Handel.
25. Quartet in G minor for PF. and Strings.
26. Quartet in A for ditto.
27. Psalm xiii. for women's voices, with Organ or PF.
28. Four Duets for Alto and Baritone with PF.
29. Two Motets for five voices, a cappella.
30. Sacred Song by Paul Flemming. Mixed Choir and Organ.
31. Three Quartets for S.A.T.B.
32. Nine Songs.
33. Fifteen Romances from Tieck's 'Magelone,' for voice and PF.
34. Quintet for PF. and Strings in F minor.
34*. Sonata for two PFs. from the foregoing.
35. Twenty-eight Variations (Studien) for PF. solo on a theme of Paganini.
36. Sextet in G for Strings.
37. Three Sacred Choruses for female voices.
38. Sonata in E minor for PF. and Violoncello.
39. Sixteen Waltzes for PF.; four hands.
40. Trio in E flat for PF., Violin, and Horn (or Viola, or Violoncello).
41. Five Part Songs for four men's voices.
42. Three Songs for Chorus, a cappella, six voices.
43. Four Songs.
44. Twelve Songs and Romances for female chorus, a cappella.
45. German Requiem, Soli, Chorus, and Orch.
46. Four Songs.
47. Five Songs.

Op. 48. Seven Songs.
49. Five Songs.
50. Rinaldo; Cantata by Goethe, for Tenor Solo, Male Chorus, and Orch.
51. Two Quartets for Strings, C minor and A minor.
52. Liebeslieder-Walzer for PF., four hands, and four solo-voices.
53. Rhapsodie; fragments from Goethe's 'Harzreise' for Alto Solo, Male Chorus, and Orch.
54. Schicksalslied (Song of Destiny) for Chorus and Orch.
55. Triumphlied (Rev., chap. xix.) for 8-part Chorus and Orch.
56a. Variations on a theme of Haydn's for Orchestra.
56b. Ditto. ditto. for 2 Pianos.
57. Eight Songs.
58. Eight Songs.
59. Eight Songs.
60. Quartet (No. 3) in C minor for PF. and Strings.
61. Four Duets for Sopr. and Alto.
62. Seven Songs for mixed Choir.
63. Nine Songs.
64. Three Quartets for four solo voices and PF.
65. Neue Liebeslieder.
66. Five Duets. S. and A.
67. String Quartet, B♭.
68. Symphony, No. 1, C minor.
69. Nine Songs.
70. Four Songs.
71. Five Songs.
72. Five Songs.
73. Symphony, No. 2, in D.
74. Two Motets.
75. Two Ballads for two voices.
76. Eight Piano pieces (Capricci and Intermezzi).
77. Concerto in D for Violin.
78. Sonata in G for PF. and Violin.
79. Two Rhapsodies for PF.
80. Academic Festival Overture.
81. Tragic Overture.
82. 'Naenie,' for Chorus and Orchestra.
83. PF. Concerto in B♭.
84. Five Songs for one or two voices.
85. Six Songs.
86. Six Songs for low voice.
87. Trio in C for PF. and Strings.
88. Quintet in F for Strings.
89. Gesang der Parzen, for 6-Part Chorus and Orch.
90. Symphony in F, No. 3.
91. Two Songs for Alto with violin obbligato.
92. Four Vocal Quartets with PF.
93a. Songs and Romances for 4-part Chorus.
93b. Tafellied (Eichendorff).
94. Five Songs for low voice.
95. Seven Songs.
96. Four Songs.
97. Six Songs.
98. Symphony in E minor, No. 4.
99. Sonata in F for Violoncello and PF.
100. Sonata in A for Violin and PF.
101. Trio in C minor for PF. and Strings.
102. Concerto in C for Violin and Violoncello.
103. Zigeunerlieder, for vocal quartet and PF.
104. Five Songs for chorus.
105. Five Songs for low voice.

Op. 106. Five Songs.
107. Five Songs.
108. Sonata in D minor for PF. and Violin.
109. Fest- und Gedenksprüche for 8-part chorus, a cappella.
110. Three Motets, for 4- and 8-part chorus.
111. Quintet in G for Strings.
112. Six Vocal Quartets with PF.
113. Thirteen Canons for female chorus.
114. Trio in A minor for PF., Clarinet (or Viola), and Violoncello.

Op. 115. Quintet in D for Clarinet (or Viola) and Strings.
116. Seven Fantasias (Intermezzi and Capricci) for PF.
117. Three Intermezzi, PF.
118. Six Clavierstücke (Intermezzi, Ballade, and Romance) for PF.
119. Four Clavierstücke (Intermezzi and Rhapsodie) for PF.
120. Two Sonatas for PF. and Clarinet, F minor and E flat.
121. Four Serious Songs (Vier Ernste Gesänge) for bass.

POSTHUMOUS WORK.

122. Eleven Choral-Vorspiele for Organ.

WORKS WITHOUT OPUS-NUMBER.

Fourteen Volkskinderlieder.
Mondnacht, Song.
Ungarische Tänze for PF., four hands. Four books.
Studien for PF. (No. 1, Chopin's F minor étude, arranged in sixths; No. 2, Weber's Moto perpetuo in C, with the prominent part in the left hand; Nos. 3 and 4, two arrangements of a presto by Bach; No. 5, Bach's chaconne, for left hand alone).
Deutsche Volkslieder, seven books. Fifty-one Uebungen for PF.
Revised version of the trio, op. 8.
Gluck's Gavotte in A, arranged for PF.
Joachim's overture 'Henry IV.' arranged for two PFs.

Brahms found time amidst his more important pursuits to edit the fine edition of Couperin's harpsichord pieces in four volumes, subsequently issued in two volumes. It is rumoured also that he it was who filled up the figured basses of two sonatas for PF. and Violin by C. F. E. Bach, published by Rieter-Biedermann.

The first volume of Max Kalbeck's *Johannes Brahms* (1833-1862) was published by the Wiener Verlag in 1904, after these pages were in type.

The other most trustworthy authorities for Brahms's life are as follows:—

i. *A Biography of Dr. Johannes Brahms*, a Biographical Sketch, by Dr. Hermann Deiters (translated by Rosa Newmarch and published by T. Fisher Unwin in 1888). A second edition of the original, continued up to the composer's death, appeared in 1898.
ii. *Johannes Brahms*, by Heinrich Reimann, one of a series of 'Berühmte Musiker,' published by *Harmonie*, Berlin.
iii. *Recollections of Johannes Brahms*, by Albert Dietrich and J. V. Widmann. Translated by Dora E. Hecht (Seeley and Co. 1899).
iv. *Letters of Dr. Billroth.*
v. '*Zum Gedächtnis des Meisters J. B.*' Oration at the dedication of the Brahms Monument at Meiningen, delivered on Oct. 7, 1899, by Dr. Joseph Joachim.
vi. 'A Few Personal Recollections of Johannes Brahms,' by Florence May (Joseph Williams's *Musical Gazette*, 1902, Nos. 8, 9, and 10).
vii. A special number of *Die Musik*, for May 1903, was devoted to Brahms; it contains contributions by Prof. G. Jenner, Dr. R. Hohenemser, Prof. Anton Door, A. Egidi, and Ludwig Kerpath, as well as five portraits, and eight other illustrations.
viii. For special studies on Brahms, see the following: *Studies in Modern Music*, by W. H. Hadow, second series, 1895. *Studies in Music* (reprinted from the *Musician*), 1901, a long and interesting study by Dr. Philipp Spitta; James Huneker, 'The Music of the Future,' in *Mezzotints in Modern Music* (W. Reeves); Daniel Gregory Mason, *From Grieg to Brahms* (New York, The Outlook Company 1902). M.

BRAMBILLA, MARIETTA, the eldest of five sisters, all distinguished singers, was born near Milan about 1807, and made her début in London as Arsace in 'Semiramide' in 1827. She was a pupil of the Conservatorio at Milan, and had never appeared on any stage; but, though her acting was indifferent, her lovely contralto voice, her excellent style, youth, and great beauty, ensured her success. 'She has the finest eyes, the sweetest voice, and the best disposition in the world,' said a certain cardinal; 'if she is discovered to possess any other merits, the safety of the Catholic Church will require her excommunication.' She sang in London for several years, as well as in Italy; at Vienna during four consecutive seasons, 1837-41; and at Paris, where she chose again Arsace for her début, and achieved a great success. Brambilla was distinguished as a teacher, and published (Ricordi) exercises and vocalizzi, besides other pieces. She died Nov. 6, 1875. J. M.

BRANDES, EMMA, born Jan. 20, 1854, near Schwerin, was taught music by Aloys Schmitt,

court-capellmeister at Schwerin, and by Goltermann, and in 1866 made her first public appearance there, in Mendelssohn's G minor Concerto. In 1871-72 she visited England, and showed herself a pianist of considerable performance and of still greater promise, viz. March 20, 1871, at the Monday Popular Concert, when she first appeared in pieces by Scarlatti, Schumann ('Arabeske'), and Weber ('Moto perpetuo'), and with Joachim in Beethoven's Sonata in C minor, op. 30, no. 2; at the Saturday Popular with Mme. Schumann in Bach's G minor Concerto for two pianos; at the Philharmonic, April 24 (Mendelssohn's G minor Concerto); at the Crystal Palace, April 13, 1872 (Schumann's Concerto); at the New Philharmonic, May 8 and June 5 (Chopin's E minor Concerto), etc. She played with great success in Germany and Austria until her marriage with Herr Engelmann, Professor of Physiology at Utrecht, when she retired from public life. A. C.

BRANDL, Johann, born Nov. 14, 1760, at Rohr, near Ratisbon, died at Carlsruhe, May 26, 1837. He studied violin and piano as a child in the monastery at Rohr, and at ten was sent by Canon Gelasius to the seminary at Munich. He learnt singing from Valesi; and at the Jesuit school at Neuburg received a thorough musical education from a certain Feldmaier. He began his career in the convent of Trutpert, Freiburg-im-Breisgau, as teacher of the violin and piano. In 1784 he was appointed chapel-master to Prince Hohenlohe Bartenstein; in 1789 'musik-director' to the Bishop of Bruchsal; and in 1806 the same to the archduke of Baden at Carlsruhe, where he stayed till his death. He composed an opera, 'Hermann'; a monodrama, 'Hero'; and many symphonies, serenades, quartets, etc. His melodies are beautiful, and were highly esteemed, as may be seen by some articles in the Leipzig *A.M.Z.* for 1828. F. G.

BRANDT, Marianne, whose real name is Marie Bischof, born Sept. 12, 1842, at Vienna, was taught singing there by Frau Marschner, and (1869-70) by Mme. Viardôt. In 1867 she was engaged at Gratz, where she made her début on Jan. 4 as Rachel ('La Juive'). She next sang at Hamburg, and on April 21, 1868, first appeared at Berlin as Azucena. On the 28th she played Fidès, with such success that she obtained an immediate engagement, which extended over several years, with the exception of a year's interval in 1873. In 1872, on leave of absence, she was engaged for the season at the Royal Italian Opera; she sang once as Fidelio, May 2, in which she made her début, and several times as Donna Elvira, with very indifferent success.[1] In 1882 she sang in German opera at Drury Lane as Brangäne on the production in England of 'Tristan und Isolde,' and as Fidelio, when her artistic efforts were heartily appreciated. On July 28 of the same year she played Kundry on the second performance of 'Parsifal' at Bayreuth, on which occasion, according to the Paris *Figaro*, she generously gave her services. From 1886 she was for several seasons a member of the German Opera Company at New York. She has also sung in the principal cities of Germany and Austria; about 1890 she settled in Vienna as a teacher of singing. At Berlin she proved herself a most useful artist: her voice being very extensive in compass, she was enabled to play both soprano and mezzosoprano parts, as Fidelio, Eglantine ('Euryanthe'), Orpheus, Spirit of Hate ('Armida'), Ortrud, Margarethe ('Genoveva'), Elvira, Selica, Amneris ('Aida'), etc., in addition to those above named. A. C.

[1] The reason of her engagement was to play Ortrud on the intended production of 'Lohengrin,' which opera, according to prospectus, was to be positively produced. For reasons unknown the production did not take place until 1875, when Mlle. Anna d'Angéri (Angermayer) took the part.

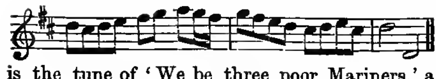
BRANLE (Fr.). (1) A step in the Basse Danse, in which the body was swayed from side to side (*branlé*).

(2) A round dance in duple measure, which was very popular in France in the 16th century. The music of many Branles, and other old dances, is given in Arbeau's *Orchésographie* (Langres, 1588), a copy of which is in the British Museum. We quote two:—

J. F. R. S.

(3) A French dance popular in England during the 16th century. Its figure is now doubtful, but it has been stated to have been a 'ring' or a 'round' dance in which the dancers join hands as round a maypole. It is identical with the Bransle or 'Brangill,' and probably also with the 'Brawl,' supposed to be so named from its similitude to an altercation. Shakespeare plays upon the word in a dance sense in 'Love's Labour Lost,' Act iii. Scene 1. A description of the measure is given in Morley's *Plaine and Easie Introd.*, 1597, p. 181.

That the 'Brangill' was a round dance may be inferred from the fact that 'The Brangill of Poictu,' as here transcribed from the Skene MS.,



is the tune of 'We be three poor Mariners,' a song in which the sentence occurs,

Shall we go dance the round, the round.

It is also curious that a traditional remembrance of these words is sung to a round dance by street children to-day. F. K.

BRASART or BRASSART, JOHANNES, Presbyter de Leodio, *i.e.* priest of Liège, a composer of repute in the first half of the 15th century, was a singer in the Papal choir in 1431. Many sacred compositions by him, in three and four parts, are preserved in the Trent manuscripts, in Cod. Mus. 37 of the Liceo Musicale at Bologna, and in the Canonici MS. at Oxford. Franchinus cites Brasart, together with Dunstable, Dufay, and Binchois, as an authority for the use of a certain discord. He is probably to be identified with Johannes de Ludo, whose four-part composition 'Fortis cum quevis actio' in the Oxford MS. is ascribed to Brasart in the Trent Codex 87, *Ludo* being a mistake or variant for *Leodio*. J. F. R. S.

BRASS BAND (Fr. *Fanfare*). The smaller variety of the military band, chiefly employed in cavalry regiments, on account of the greater ease with which brass instruments can be played on horseback. It ordinarily consists of an E flat piccolo-cornet, two or more cornets in B flat, two tenor saxhorns in E flat, one or more baritones and euphoniums, with one or more bombardons. Besides these, trumpets, and side-, bass-, or kettle-drums are usually present. It is materially improved by the substitution of flutes and E flat clarinets for the piccolo-cornet, and by the addition of trombones. It has not the variety of quality and richness of tone possessed by the full reed band, but is competent to produce very smooth and agreeable harmony. On account of the greater facility with which brass instruments of the saxhorn species are learned, as compared with clarinets and other reeds, a brass band is much more easy to establish and maintain in efficiency than a full military band. See WIND-BAND, WIND INSTRUMENTS. W. H. S.

BRASSIN, LOUIS, a Belgian pianist and composer, born June 24, 1840, at Aix-la-Chapelle. His father was a baritone singer of some renown, whose real name was de Brassine, and an uncle of his was Drouet, the famous flautist. To the fact that in 1847 his father was engaged at the opera in Leipzig, young Brassin owed the most important part of his education, for he entered the Conservatorium of that town, and became a pupil of Moscheles, having some years previously appeared in public at Hamburg. He remained in the Conservatorium for five years, carrying off numerous prizes. At the close of this time he undertook several concert tours with his two brothers, and in 1866 was appointed first pianoforte teacher in the Stern Conservatorium at Berlin. After a year's tenure of this post, he resumed a more or less wandering life, and ultimately settled in Brussels (1869-78) as professor in the Conservatoire. In 1878 he accepted a similar post at St. Petersburg, where he died May 17, 1884. A transcription of the 'Feuerzauber' from 'Die Walküre' is in the repertory of every piano virtuoso, and his works include, beside many excellent pianoforte pieces, two German operettas, 'Der Thronfolger' (Brussels, 1865) and 'Der Missionär.' Of his two younger brothers, one, Leopold (born at Strasburg, May 28, 1843, died at Constantinople in May 1890), who made his first appearance as a pianist at the age of five under Louis Brassin's auspices, was pianist to the Duke of Saxe Coburg, and Professor at Berne; the other, Gerhard (born at Aix, June 10, 1844), is a violinist of repute, who was teacher at Berne (from 1863), concert-meister at Gotenburg in Sweden, teacher at the Stern Conservatorium from 1874 to 1875, when he was appointed to the direction of a musical society at Breslau; since 1880 he has lived successively in St. Petersburg and Constantinople. M.

BRATSCHE (Viola da *Braccia*). The German name for VIOLA or Tenor Violin.

BRAVO, *i.e.* 'well done.' An Italian term of applause which has gone from Italy to other countries, though never taking very firm root in England. It was the custom in Italy to applaud, not only at the end of a piece or passage, but during the performance, and the *bravos* were addressed to composer, singer, or instrument—'Bravo Mozart!' 'Bravo Lablache!' 'Bravo il fagotto!' The word was there naturally inflected, and the applause to a female singer would be 'Brava Grisi!' Beethoven when satisfied with the orchestra used to give a 'thundering "Bravi tutti."' G.

BRAVURA (Ital., 'courage,' 'bravery'). A style of both music and execution involving the display of unusual brilliancy and technical power; music written to task ability and test the courage of the artist. Thus 'Rejoice' from the 'Messiah' is an *aria di bravura* according to the old convention of the Handelian period; 'Let the bright Seraphim' ('Samson'), 'Gli angui d' inferno' ('Flauto magico'), and 'Non più mesta' ('Cenerentola') are of the same class, since they require a compass and a power of execution out of the common (see ARIA). G.

BRAWL, the English equivalent for the French Branle (*q.v.*).

BREITKOPF & HÄRTEL. The foundation of this renowned firm of music publishers in Leipzig was laid in 1719, when BERNHARDT CHRISTOPH BREITKOPF, member of a mining family of the Hartz, born at Clausthal, March 2, 1695, set up a printing-press at Leipzig. His first publication was a Hebrew Bible, and was quickly followed by a number of theological and historical works, in which Breitkopf's friendly

relations to the poet Gottsched were of much use to him. In 1732 a printing office was built with the sign of 'zum goldnen Bär,' which in 1765 was increased by the addition of the 'silberne Bär.'

In 1745 Breitkopf gave up the printing business to his only son, and in 1765 the firm became B. C. Breitkopf & Son. On March 26, 1777, the old man died, aged eighty-three. He had raised himself from a common printer to be the head of the first printing establishment in Germany, and he also had the happiness, which Gottsched had predicted, of seeing himself eclipsed by his son. The son, JOHANN GOTTLOB IMMANUEL, born Nov. 23, 1719, devoted himself with ardour, while a lad, to the acquirement of learning, leaving professional knowledge till later. His acquirements in literature were developed by intercourse with such scholars as Lessing and Winkelmann. He laboured to improve the practice of printing, and with that view wrote several papers. By the introduction of separate movable music type he produced, as early as 1750, a revolution in the music trade. In 1756 the first fruits of his innovations appeared in the shape of a splendid edition of an opera in full score, and in three vols., entitled *Il trionfo della fedeltà, dramma per musica di E. T. P. A.* (the initials of Ermelinda Talia Pastorella Arcada, a name assumed for the occasion by Antonia Amalia Walburga, Princess of Saxony). After this Breitkopf published a long series of important compositions by C. P. E. Bach, Graun, Hiller, Leopold Mozart, etc. He had hardly begun to realise the results of his invention in the music trade when his energy found a new channel. During the Seven Years' War (1756-1763) he had organised on a large scale a warehouse of German, English, French, and Italian music, both MS. and printed, and had started a special trade in music, through the publication of systematic descriptive catalogues referring to his stock, and embracing the whole field of musical literature. Between 1760 and 1780 he issued catalogues of printed music, both theoretical and practical, in six parts; of MS. music, in four parts; and a third (especially important for the history of music)—a thematic catalogue of MS. music only, in five parts, with sixteen supplements (1762-87). His activity was absolutely unceasing. In 1770 he founded a manufactory of playing cards (which he sold in 1782), a coloured paper manufactory, a bookselling business in Dresden and another in Bautzen. [He wrote treatises *Über die Geschichte . . . der Buchdruckerkunst* (1779), *Versuch den Ursprung der Spielkarten . . . zu erforschen* (1784), *Über Schriftgiesserei*, and *Über Bibliographie* (1793).] He died Jan. 29, 1794, honoured as the reformer of the music trade, and secure of a place in the history of the art of printing. His portrait is extremely interesting. The well-formed head, the speaking eye, the intelligent features, show intellectual power and strong will. Immanuel had two sons, who learned the printer's craft from their father. BERNHARD THEODOR (born 1749) was musician enough to compose some pretty music to Goethe's 'Jugendlieder' in 1769. He went in 1777 to Russia, and founded a printing office and bookselling business in St. Petersburg—was teacher in an institution for the education of girls, and died at a great age as Russian 'Staats-Rath.' His second son, CHRISTOPH GOTTLOB (born Sept. 22, 1750), remained with his father. He was an amiable dilettante, to whom the burden of his vast business was intolerable; after carrying it on therefore for a year he gave it up to his friend G. C. Härtel, at the same time making him his heir. He died much lamented April 7, 1800, the last scion of a gifted race. Since then the business, though entirely in Härtel's hands, has been conducted under the well-known title of Breitkopf & Härtel.

GOTTFRIED CHRISTOPH HÄRTEL, son of Dr. Christoph Härtel, Burgomaster of Schneeberg, was born there Jan. 27, 1763. Having given up his former occupation, he applied himself with vigour to improve the business by undertaking the publication of musical works of the highest order. Thus he brought out the works of Mozart in 17 vols. (1798-1816); of Haydn in 12 vols. (1800-1806); of Clementi in 13 vols. (1800-18); and of Dussek in 12 (1814-18)—an undertaking which was the forerunner of many popular and critical collected editions. Härtel also started the *Allgemeine musikalische Zeitung*, which long maintained its position as the best musical periodical, and advocated the interests of music from 1798 to 1848; he further published a literary paper, the *Leipziger Literatur-Zeitung* (1812-34), enlarged his stock of music and books, and made various practical improvements in printing. Amongst other things he introduced the system of engraving music on pewter plates, to which in 1805 he added a lithographic establishment, with the personal co-operation of Sennefelder, the inventor. Procuring workmen from Vienna, he next started the first factory of pianos in central Germany. Being a man of great cultivation and refinement, such constant absorption in business was not to his taste, but he accepted the task which fate had laid upon him, and executed it faithfully till his death on July 25, 1827.

Up to 1835 the business was carried on by his nephew FLORENZ HÄRTEL. But at that date HERMANN HÄRTEL, the eldest son of Gottfried (born April 27, 1803; died August 4, 1875), entered the house as head, in partnership with his younger brother RAYMUND (born June 9, 1810; died Nov. 9, 1888), who had joined in 1832. Hermann's fine character had been improved by an excellent education; he read law, and took his doctor's degree in 1828, and his love of art had been cultivated by a two years'

residence in Italy. Both in public and private life he was a man of noble disposition and true culture. The brothers lived to see a remarkable spread of taste, and to publish many works of eminent modern composers. Their catalogue up to 1874 included over 14,000 works, extending over the whole range of music. In 1866 they began the issue of a series of cheap editions of classical works which are now widely known. They assisted in the formation of the BACH-GESELLSCHAFT, which, like the companion Handel Society, owes much to their energy, taste, and accuracy. In 1862 they projected a complete critical edition in score and parts of the works of Beethoven, which was completed by a supplementary volume in 1887. Similar editions of Mendelssohn, Mozart, Chopin, Schumann, Schubert, have been completed, as well as complete critical editions of older masters, such as Palestrina and Heinrich Schütz and Grétry. Editions of Orlando di Lasso, Sweelinck, Vittoria, Gluck, and Berlioz are in progress.

The list of their publications contains treatises by Kiesewetter and others on the history of music, important works by Tucher and Winterfeld on the church music of Germany; biographies, such as Bach by Spitta, Handel by Chrysander, Mozart by Jahn; thematic catalogues of Beethoven by Nottebohm, and Mozart by Köchel; works on the theory of music by Chladni, Hauptmann, Lobe, Köhler, Marx, Sechter, etc., as well as a long list of publications on literature, law, theology, medicine, natural philosophy, philology, archæology, etc. etc. The practical part of the business has increased so much that the Goldene Bär was in 1867 exchanged for a much larger building. By 1871 the printing had developed to such an extent that it became necessary to use the space formerly occupied by the pianoforte manufactory. Since the death of Hermann, and the retirement of Raymund in 1880, the business has been in the hands of two grandsons of Gottfried's—Wilhelm Volkmann (born June 12, 1837) and Dr. Georg Oscar Immanuel von Hase (born Sept. 15, 1846). The last issue of the firm's catalogue is a large volume of 1200 pp. (1902).

(The above is taken by kind permission from papers in the archives of the firm.) C. F. P.

BREMA, MARIE, the professional name of Minny Fehrman, who was born in Liverpool, Feb. 28, 1856, her father being of German origin, and her mother a native of Richmond, Virginia. Her natural proclivities were always strong for music and the drama, but it was not until after her marriage with Mr. Arthur Braun of Liverpool, in 1874, that she determined to embrace the musical career. She began studying seriously with Henschel in 1890, and made her début at the Popular Concert of Feb. 21, 1891, in Schubert's 'Ganymed,' under the name Bremer, in allusion to her father's native place, Bremen. After some further instruction from Mme. Bessie Cox and Mr. Blume, she continued to sing only in concerts, but a performance of 'Adrienne Lecouvreur' which she consented to give at Oxford in 1891 proved to the public that she had dramatic gifts which ought not to be wasted, and on Oct. 19 she made her first appearance on the London stage, at the Shaftesbury Theatre, in the part of Lola, on the production of 'Cavalleria' for the first time in England. On Nov. 27 she appeared in the more important part of Orfeo, and for some little time afterwards her work was chiefly in concerts; she sang at the Philharmonic, April 20, 1893, and enacted the part of the Evil Spirit in Parry's 'King Saul' at the Birmingham Festival of 1894. In that year, having been introduced to Mme. Wagner by Hermann Levi, she was engaged for the part of Ortrud at Bayreuth, which she sang at each performance of 'Lohengrin,' appearing also on a few occasions as Kundry in 'Parsifal.' The former part, with Brangäne, and Brünnhilde in 'Die Walküre,' was sung by her during a tour in America in the latter part of 1894, with the Damrosch company, and since that year she has been chiefly identified with these Wagnerian parts, appearing again at Bayreuth in 1896 and 1897, as Fricka and Kundry. Meanwhile she had appeared with very great success at Brussels as Orphée, Dalila, and Amneris; and her impersonation of Orpheus was received with enthusiasm in Paris in 1898. On May 29, 1897, she sang the part of Marcelline, on the revival of Bruneau's 'L'Attaque du Moulin,' with such power and conviction as placed her on a level with the original exponent of the part, Mme. Delna. Since 1900, in the course of which she sang the part of Brangäne in Lamoureux's concert-performance of 'Tristan,' she has been a great favourite with the Parisian public, and in 1902 she took the part of Brünnhilde in 'Die Götterdämmerung' in the German performances at the Château d'Eau theatre under Richter. On May 30, 1901, she created the part of Beatrice in Stanford's 'Much Ado about Nothing,' and besides these important operatic engagements she has appeared at all the most important English festivals. In this sphere of work her most important achievement has been the exceedingly dramatic performance of the Angel in Elgar's 'Dream of Gerontius,' at the Birmingham Festival of 1900. Her voice, which was at first a mezzo-soprano, has increased in the power and compass of her high notes, so that in later years she has been well able to sing such parts as Brünnhilde all through the triology, although the naturally rich quality of the organ is better suited to the lower parts in which she made her earlier successes. M.

BREMNER, ROBERT. An Edinburgh and London music publisher, author of an excellent little treatise, *The Rudiments of Music*, which ran through three editions (1756, 1762,

and 1763) and had some degree of vogue in its day. Bremner commenced business in Edinburgh shortly before July 11, 1754, on which date he advertises in an Edinburgh newspaper. He was then 'at the Golden Harp opposite the head of Blackfriars Wynd,' but before 1761 had removed to a shop higher up the High Street 'at the back of the Cross Well': he had already (in 1755) changed his sign to the 'Harp and Hautboy.' Having published many now very interesting collections of Scots music, he removed in 1762 to London, still keeping on his Edinburgh shop under a manager. His address in London was opposite Somerset House in the Strand, and he retained his Edinburgh sign, the Harp and Hautboy. His London business rapidly developed, and he published all varieties of the best music of the period, as well as republications and additions to his Scots collections. His music is particularly neatly engraved and printed, and always on good strong paper. It may be perhaps worth while mentioning that he was the purchaser, in 1763, of the famous Fitzwilliam Virginal Book, which he bought at the sale of Dr. Pepusch's library for ten guineas and presented to Lord Fitzwilliam. Bremner died on May 12, 1789, at Kensington Gore, and the whole of his stock, plates and copyrights, was bought by John Preston, who issued a lengthy catalogue of his purchase in 1790. F. K.

BRENDEL, Dr. Karl Franz, musical critic, born Nov. 26, 1811, at Stollberg in the Harz; educated at the Gymnasium of Freiberg in Saxony, where his father was Berg-Rath, and at the universities of Leipzig and Berlin. Music always formed his special pursuit, in which he was mainly assisted by Anacker and Wieck. He began his public career with lectures on the history of music, delivered in Freiberg and in Dresden. In 1844 he settled in Leipzig as proprietor of Schumann's *Neue Zeitschrift*, which he edited from Jan. 1, 1845, at the same time teaching musical history and æsthetics in Mendelssohn's newly-established Conservatorium. He wrote at this time *Grundzüge der Geschichte der Musik* (1848); and delivered the public lectures on which he founded his most comprehensive work, *Geschichte der Musik in Italien, Frankreich, und Deutschland* (1852; 7th edition 1888), an attempt to treat the various historical developments of the art from one practical point of view. More important, however, were his articles in the *Neue Zeitschrift*, written as a strenuous advocate of modern ideas in music. His first efforts were devoted to the recognition of Schumann; but in time the paper became the organ of Wagner and Liszt. Brendel certainly had a rare power of appreciating the ideas of the real leaders of the movement, and of illustrating and developing them effectively, and thus materially assisted the march of musical progress. His treatment is dry, logical, and didactic; but what it wants in directness and poetical force is made up for by the perseverance with which he urges his arguments.

In 1856 he began to issue another periodical, entitled *Anregungen für Kunst, Leben, und Wissenschaft*, which until 1860 supported the propaganda of the *Zeitung* in favour of Liszt and Wagner. But the most open exposition of the views of the party is to be found in his *Musik der Gegenwart und die Gesammtkunst der Zukunft* (1854), which must be regarded as a completion of his History, and is not free from considerable party spirit. With the year 1859 Brendel began to labour for the reconciliation of the contending parties, on the basis of the general progress of modern times. The field for this effort was the 'Allgemeine deutsche Musik-Verein,' or 'German Musical Union,' which arose out of a festival of musicians held on the occasion of the twenty-fifth anniversary of the *Neue Zeitschrift*, and was founded in 1861. Brendel was not only one of the chief founders of the 'Verein,' but as its president he worked for it with restless energy to the time of his death, and his *Zeitung* was its official organ. Brendel died Nov. 25, 1868. The *Zeitung* continued to follow the same path as before, but lost its old eminence. Besides the works already mentioned Brendel issued various smaller publications, all more or less distinguished by a tendency for the New German School—*Liszt als Symphoniker* (1858), *Organisation der Musik durch den Staat* (1866), and *Geist und Technik in Klavierunterricht* (1867). A. M.

BRENET (properly *Bobillier*), Michel, French writer on music; born at Lunéville, April 12, 1858; resident in Paris since 1871. He published a *Histoire de la Symphonie . . . jusqu'à Beethoven* (1882); *Grétry, sa vie et ses œuvres* (1884, crowned by the Belgian Academy); *Deux pages de la vie de Berlioz* (1889); *Jean de Ockeghem* (1893), a work of remarkable value and original research; *Sébastien de Brossard* (1896); etc. etc. He has written numerous articles, historical and critical, in the *Ménestrel*, the *Archives historiques artistiques et littéraires* (1889-91), the *Gazette Musicale de la Suisse romande* (1894-97); and has contributed to the *Guide Musical*, the *Grande Encyclopédie*, and the *Correspondant*. G. F.

BRENT, Charlotte, soprano singer, was the daughter of a fencing master and alto singer, who was the original Hamor in Handel's 'Jephtha' in 1752, and who, on the production at Ranelagh in 1759 of Bonnell Thornton's burlesque 'Ode on St. Cecilia's Day,' with Burney's music, admirably accompanied Beard in the Salt-box song 'on that instrument.' Miss Brent was a pupil of Arne's, and first appeared as a singer in February 1758 at a concert given by Cecilia Davies, and next on March 3, 1758, at Drury Lane in Arne's opera 'Eliza,' performed oratorio-wise for his benefit. She was engaged by Beard for Covent Garden, where she appeared

Oct. 10, 1759, as Polly in 'The Beggar's Opera,' and where she continued until the close of her theatrical career. In 1762 she reached the summit of her reputation by singing the part of Mandane in Arne's 'Artaxerxes' (produced Feb. 2), which had been written expressly for her. In 1764 and 1765 she sang with Tenducci in Handelian selections at Ranelagh. In 1765 she sang at the Hereford Festival, in 1766 at that of Gloucester, and in 1767 at Worcester. In November 1766 she became the second wife of Thomas Pinto, the violinist. [See PINTO.] She continued to sing at Covent Garden until about 1770, when she took to touring with her husband. She sang in Dublin in 1773, as Urganda in Michael Arne's 'Cymon,' and in 'Artaxerxes,' but made no impression. On April 22, 1784, she appeared for one night in 'Comus' at Covent Garden for the benefit of Hull, the stage-manager. Charles Dibdin described her as 'possessing an exquisite voice,' and being 'a most valuable singer. Her power was resistless, her neatness was truly interesting, and her variety was incessant'; and a later writer said, 'her bravura singing had considerable merit, her execution being neat, distinct, rapid, and at that time unrivalled.' She survived her powers, and lived, forgotten by the public, till April 10, 1802, when she died, in very straitened circumstances, at No. 6 Vauxhall Walk. She was buried April 15, in the churchyard of St. Margaret, Westminster [*Dict. of Nat. Biog.*]. W. H. H.

BRETON (BRETON Y HERNANDEZ), TOMAS, born at Salamanca in 1846, is one of the most eminent of modern Spanish composers; his fame is mainly based upon a series of operettas (zarzuelas), of which he produced ten between 1875 and 1896. Among the best of them are 'Les amantes de Ternel' (Madrid, 1889), and 'La Dolores' (Madrid, 1895). An oratorio, 'Apocalypsia,' was given in Madrid in 1882. Breton's chamber music is masterly in design, and bold in harmonic treatment; his trio in E is remarkably original and successful. M.

BREUNING, a family mainly interesting for its connection with Beethoven. The fourth son of Christoph von Breuning, who in 1761 was Chancellor of the Commandery of the Teutonic Order at Mergentheim, was named Emmanuel Joseph, was born in 1741, became at twenty a 'Conseilleractuel' at the Court in Bonn, and, Jan. 3, 1750, married Helène, daughter of Hofrath Stephan von Kerich. The good influence of this excellent woman upon the young Beethoven renders a word upon her character pertinent. She was brought into close relations with the literary and scientific circles of the little capital, and was a woman of singular good sense, culture, and refinement; mild, kindly, affectionate in her domestic relations; as wife and mother irreproachable.

On Jan. 15, 1777, a fire in the Electoral Palace caused the death of thirteen persons, including Emmanuel Joseph Breuning, in the 36th year of his age. His widow, who had just entered her 28th year, was left with three children:—Christoph, born May 13, 1771; Eleonore Brigitta, born April 23, 1772; Stephan, born August 17, 1774; to whom a fourth was added a few months later:—Lorenz (Lenz), born in the summer of 1777.

She remained in the house where her husband died, which is still standing, across the square from the Minster Church. Immediately after the death of Emmanuel, his brother, Canon Lorenz, came from Neuss to reside with her, as guardian.

Into this family, in his 18th year, Beethoven came first as music-teacher of Eleonore and Lenz, and soon almost as a member of it. [See ante, p. 218*b*.] The good influence upon his intellectual development and moral character of this intercourse with the Breunings cannot be overrated, and a short notice of the members of that household more closely connected with him will not be out of place.

ELEONORE BRIGITTA married Franz Gerhard Wegeler, Beethoven's biographer, at Beuel, March 28, 1802, and died at Coblenz, June 13, 1841, in her 70th year. [See ante, p. 221*a*.]

STEPHAN (Lorenz Joseph Judas Thaddeus), the well-known friend of Beethoven in later years, also studied jurisprudence at Bonn and Göttingen. Shortly before the fall of the Electorate, Max Franz, Elector of Cologne and Grand Master of the Teutonic Order, gave him a position in the Order at Mergentheim. A grand chapter held in Vienna in the summer of 1801 brought Stephan v. B. thither in the spring of that year, where he renewed his intimacy with Beethoven, begun in their boyhood, when both were pupils of Franz Ries for the violin. As the Teutonic Order no longer afforded the opportunity of a career, Stephan obtained a place in the Austrian War Office, and in 1818 advanced to the dignity of Hofrath. He died June 4, 1827. [See ante, pp. 228*a*, 240*a*,*b*, 247*a*, 250*b*, 258*b*.] He was twice married, first to the daughter of Ritter von Vering, head of the Austrian military medical administration. She was a pupil of Schenk the composer, a fine pianist, and author of divers little compositions. Beethoven—who had often played duets with her—dedicated the interesting pianoforte arrangement of the Violin Concerto to her. She was born Nov. 26, 1791, and died, says the epitaph composed by her husband, 'On the 21 March, 1809, in the eleventh month of happy wedded life, at the moment of the entrance of spring.' The second wife was Marie Constanze Ruschowitz, born Dec. 1, 1784, died Oct. 5, 1856, leaving one son and two daughters.

LORENZ (Lenz) studied medicine at Bonn and Vienna—whither he came in 1794 and

renewed his musical studies with Beethoven. At parting the then young composer wrote in his album to this effect:—

> Truth exists for the wise,
> Beauty for the feeling heart!
> They belong to each other.

DEAR GOOD BREUNING!

Never shall I forget the time which in Bonn as well as here I have spent with thee. Retain thy friendship for me, so as thou wilt find me ever the same. Vienna 1797 on the 1st October.

Thy true friend
L. V. BEETHOVEN.

Their separation was final; on the 10th of the next April young Breuning died.

MORITZ GERHARD, son of Stephan and Constanze (Ruschowitz), was born at Vienna, August 28, 1813. He was 'k.k. Medicinalrath,' and for many years was one of the most eminent physicians of the Austrian capital. He is known in musical literature by his extremely interesting and valuable little book, *Das Schwarzspanierhaus*, a collection of reminiscences of Beethoven and the Breunings. [See ante, p. 267*b*.] He was for many years an active and influential member of the governing body of the great GESELLSCHAFT DER MUSIKFREUNDE.

Letters from Beethoven to various Breunings—the widow, Christoph, Eleonore, Stephan, Lenz, and Gerhard—are given in Nohl's *Briefe Beethovens* and in *Neue Briefe Beethovens*.

Beethoven dedicated the following works to members of this family:—

To Fräulein Eleonore the variations on 'Se vuol ballare' for PF. and violin (July 1793), and the Easy Sonata for PF. solo in C major (1796). Nottebohm's Catalogue, p. 148.

To Stephan the Violin Concerto, op. 61 (March 1809); and to Frau v. B. the adaptation of the same for piano. An allegro for violin and orchestra was dedicated to Dr. G. von Breuning. See catalogue of Beethoven's works, No. 148. (See Thayer's *Beethoven*, i. 162, etc.) A. W. T.

BREVE (Fr. *Carrée;* Ital. *Breve*). A note of the value of two semibreves, rarely met with in modern music, in which there is no place for it, as the longest bar commonly used (viz. a bar of 12-8 time) has but the value of a semibreve and a half. Although now nearly obsolete from its great length, the breve was originally (as indicated by its name, derived from *brevis*, short) the shorter of the two notes of which the earliest measured music, invented about A.D. 1200, was composed. These two notes, which corresponded to the long and short syllables of the text to which they were sung, were termed *longa* and *brevis*, and were written, [in forms borrowed from the *virga* and *punctum* of plainsong, ⌐| and ▭]. The proportion which they bore to each other was not always constant, the *longa* containing sometimes three breves, in which case it was called perfect, and sometimes only two, when it was said to be imperfect. So likewise, after the introduction of a still shorter note called *semibrevis*, the *brevis* could be either perfect or imperfect, and consist of three or two semibreves. [A composition in which the breve contained three semibreves was said to be in perfect 'time' (*tempus*), and a composition in which it contained two semibreves only in imperfect 'time.' The word 'time,' in fact, in the old measured music, has no reference whatever to rhythm, or, as we should now say, to the number of beats in a bar, but denotes only the value of a breve. Thus a 'fuga trium temporum' means a canon in which the second voice enters after three breves' rest.] These variations of proportion, which, together with many others, remained in use until about the middle of the 17th century, and which could not but have added immensely to the difficulty of the study of music, were dependent on the order in which the longer and shorter notes followed each other, and also upon the appearance of certain time-signatures which were placed at the beginning of the composition [a circle indicating *tempus perfectum*, in which the breve contains three semibreves, and a semicircle open to the right (the undoubted ancestor of our modern symbol for common or duple time) indicating *tempus imperfectum*, in which the breve contains two semibreves.] For a full account of these the reader is referred to Bellermann's treatise *Die Mensuralnoten und Taktzeichen des 15. und 16. Jahrhunderts*, Berlin, 1858. [See also MODE, PROLATION, PROPORTION, TIME.] In modern music the duration of the sound of any note varies with the *tempo* of the composition in which it occurs, but formerly attempts were frequently made to define the duration of a breve. Franco of Cologne described it as 'illud quod est minimum in plenitudine vocis,' and Marchettus of Padua rather more fully as 'id minimum tempus in quo potest formari plenitudo vocis.' In an old Psalm Book of 1688 a breve is said to be 'about the duration of eight pulses at the wrist of a person in good health and temper.'

The breve, together with other notes belonging to the same epoch, was originally written black, the more modern white notes (Fr. *blanches*) written in outline being introduced about the end of the 14th century. [After this period black notes (Fr. *noires*) were exclusively used to express *proportio sesquialtera*, or the substitution of triple for duple rhythm, the effect of which is generally, but not necessarily, that each black note loses one-third of its value.]

In modern music the breve, in the rare cases in which it is used, is always written white, and either of an oblong form, thus |=|, or oval with two small vertical strokes at each end, thus ||○||.

The expression *alla breve*, placed at the commencement of a composition, has been variously interpreted. Some have understood it to mean a rhythm of one breve to a bar, while others, translating the words 'alla breve' literally into

'in short fashion,' understand by it a rhythm of either two or four beats in a bar, but at a double rate of movement, semibreves being taken at about the speed of ordinary minims, and so on. In favour of this latter view is the fact that the signature of alla breve time is always the semicircle crossed by a vertical stroke, ₵, which is the 'diminutio simplex in tempus imperfectum' of the ancient measured music, where it served precisely the same purpose, *i.e.* by reducing each note to half its proper value it doubled the rate of movement. Both views agree in the most important particular, namely, that compositions marked 'alla breve,' or, even when not so marked, if provided with the distinctive time-signature, must be performed twice as fast as if simply marked with the sign of common time, C or 4-4. And with regard to the opinion which holds that compositions alla breve ought to be written in bars of the value of a breve, it may be urged that in spite of the undoubted fact that most of such compositions have but one semibreve in the bar, it is possible that this method of writing may have been intended to represent merely the division or the original alla breve bar into two halves, for convenience of reading, a division which has actually been made in certain cases, as for example in Handel's chorus 'And with his stripes' (Messiah), which was originally written in bars of the value of two semibreves, and marked 'alla breve,' although now printed in bars of half that length. Moreover, it is certain that the expression alla breve has never been applied to movements in triple time, although if it had had reference merely to the rate of movement this would have been perfectly possible. F. T. [additions in square brackets by J. F. R. S.]

BRÉVILLE, PIERRE ONFROY DE, was born at Bar-le-Duc in 1861, and was at first intended for the diplomatic career, but was allowed to enter upon a course of musical instruction at the Paris Conservatoire in the class of Th. Dubois. After determining to devote himself to art alone, he became a pupil of César Franck, whose whole-hearted admirer and faithful disciple he remained till the end of the great teacher's life. He took part, with d'Indy, Coquard, Rousseau, and Chausson, in the work of completing the opera 'Ghiselle,' left unfinished at the master's death. If he cannot yet be numbered among the most illustrious of Franck's pupils, de Bréville has shown such constant sincerity and artistic earnestness, that his compositions are highly esteemed by all who appreciate the modern French style. These compositions include many motets and other church music; works for voice and orchestra, for organ, etc., and orchestral overtures to Maeterlinck's 'Princesse Maleine,' and 'Les Sept Princesses,' etc. Most of them have been given for the first time, by the 'Société Nationale' of Paris. G. F.

BREWER, ALFRED HERBERT. Born June 21, 1865, at Gloucester, he held a choristership in the cathedral there from Jan. 1877 to Dec. 1880, and studied under Mr. (now Dr.) C. H. Lloyd, organist of the cathedral. After holding organ appointments in succession at two Gloucester churches—St. Catherine's and St. Mary de Crypt, 1881-82—he succeeded Mr. (now Sir) Walter Parratt as organist of St. Giles' Church, Oxford, in Sept. 1882. In Dec. 1883 he obtained the post of organ scholar at Exeter College, Oxford, which he held concurrently with the organistship at St. Giles'. In the meantime (April 1883) he had gained the first open organ scholarship at the Royal College of Music, where he studied under Sir Walter Parratt and other professors.

Mr. Brewer was elected organist of Bristol Cathedral in Sept. 1885, and a year later he became organist of St. Michael's Church, Coventry. In Sept. 1892 he was appointed organist and music-master to Tunbridge School; this post he held till Dec. 1896, when he succeeded Dr. C. H. Lloyd as organist and choir-master of Gloucester Cathedral, of which he had previously been a chorister.

Mr. Brewer has done excellent work in his native city, where his influence for artistic progress has had very beneficial results. He is conductor of the Gloucester Choral Society, the Gloucester Orchestral Society, the Gloucester Orpheus, and the Gloucester Diocesan Choral Union. In his official capacity he conducted, with much ability, the Gloucester Musical Festivals of 1898 and 1901. Mr. Brewer obtained the Fellowship of the College of Organists, and graduated Mus.B. (Dublin) in 1897.

His compositions, which display thoughtful musicianship, include: 'Evening Service,' for chorus and orchestra (Gloucester Festival, 1895); 'O sing unto the Lord' (Gloucester Festival, 1898); 'Love's Philosophy,' for male voices (Hereford Festival, 1900); 'Emmaus' (Gloucester Festival, 1901); 'Dedication Ode' (Worcester Festival, 1902); in addition to various compositions for the church, part-songs, organ music, and violin pieces, etc. F. G. E.

BREWER, THOMAS, born 1611, was educated at Christ's Hospital, being admitted at the age of three years; he remained there until 1626, when he was apprenticed to Thos. Warner. He had learnt the viol from the music-master at Christ's Hospital. He flourished in the time of Charles I., the Protectorate, and part of the reign of Charles II. He was the composer of several excellent fantasias for the viol; and many rounds and catches of his are printed in Hilton's 'Catch that Catch can.' He was the composer of the pretty three-part song 'Turn Amaryllis,' inserted by Playford in his *Musical Companion.* In the Harleian MS., No. 6395, entitled 'Merry Passages and Jests,' compiled by Sir Nicholas Lestrange, is the following anecdote respecting him:—'Thom: Brewer, my

Mus: seruant, through his Pronenesse to good-Fellowshippe, hauing attaind to a very Rich and Rubicund Nose; being reproued by a Friend for his too frequent vse of strong Drinkes and Sacke; as very Pernicious to that Distemper and Inflammation in his Nose—"Nay, faith," says he, "if it will not endure sacke, it's no Nose for me."' Three instrumental pieces by him are in the Music School Collection at Oxford, and two in Elizabeth Rogers's Virginal Book (Add. MS. 10,337). [*Dict. of Nat. Biog.*] The date of his death is not known. E. F. R.

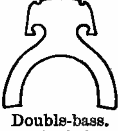
BRIARD, ÉTIENNE, engraver of music, born at Bar-le-Duc towards the end of the 15th century, settled at Avignon in 1530. He replaced the square characters hitherto in use by round ones, and devised a simple means of expressing the duration of a note, instead of the complicated system of ligatures. Peignot, in his *Diction. de la Bibliologie*, supp. p. 140, claims priority in these inventions for Granjon, also a printer; but Briard's characters are certainly better formed and easier to read. A facsimile of them may be seen in Schmidt's *Ottaviano Petrucci*. The works of the composer Eleazar Genet, called Carpentras, after his birthplace, were printed at Avignon in 1532 in Briard's characters. F. G.

BRIDE OF SONG, THE, operetta in one act; words by Henry Farnie; music by Jules Benedict. Produced at Covent Garden, Dec. 3, 1864. G.

BRIDES OF VENICE, a grand opera in two acts; music by Jules Benedict. Produced at Drury Lane, April 22, 1844. G.

BRIDGE. The wooden support on the belly of stringed instruments across which the strings are extended. The bridge was first used on the Greek monochord, on which it was moved as might be required for changing the pitch; and the bridge remains in most instruments a movable fitting, though those of the guitar and lute are fixed. In instruments having no sound-post such as the lute, guitar, and mandolin, the bridge is probably not essential to the production of tone except so far as it determines the pitch, and the situation, with regard to the belly, of the vibrating part of the string. In bowed instruments the bridge is an essential part of the tone-producing apparatus, its complement being furnished by the sound-post placed within the instrument. In the Crwth the bridge and sound-post are represented by a fitting consisting of a single piece, having one long leg and one short one; the former passes through the belly and rests on the back, the other touches the belly and causes it to vibrate. The peculiar bridge of the Marine Trumpet is described under TROMBA MARINA. The following observations apply to the violin, violoncello, and double-bass.

Uniform in design as the bridge appears outwardly, its two halves, each terminating in a foot resting on the belly, perform two entirely different functions. The treble or fixed foot rests firmly upon the belly, a fraction of an inch above the sound-post, a cylinder of resonant wood inserted between the back and belly of the instrument. The bass, or freely vibrating foot, agitates the elastic belly of the instrument, and through it the internal air. The point of maximum vibration of the belly of a violin is near the bass foot of the bridge under the G string; that of minimum vibration is exactly over the top of the sound-post, behind the treble foot. It is easy to trace the development of the violin bridge, the most advanced type, the oldest form, which is also the simplest, having been preserved in the common double-bass bridge. The wings were extended, the heart



Double-bass. $\frac{1}{12}$ actual size.

Violoncello. $\frac{1}{4}$ actual size.

Violin. $\frac{1}{2}$ actual size.

or central hole was cut out, and these features were fixed by experiment so as to favour as much as possible the transmission to the belly, through the feet, of such vibrations as are efficient in producing musical tone, and to exclude useless vibrations—those, for example, which would tend to give a rocking motion to the bridge being counteracted by the greater elasticity given to the upper part of the bridge as compared with the lower. The violin bridge was reduced to nearly its present form in the time, and probably by the ingenuity, of the brothers Antonio and Geronimo Amati.

The height of the bridge differs in the various instruments, being proportionate to the depth of the ribs and the length of the sound-post. Thus the bridge of the violin and tenor is mounted on feet not surmounted by legs, the body of the bridge being very slightly elevated above the belly of the instrument. The viol model, in all its sizes, like the violoncello, requires a bridge having not only feet but legs of variable length, the body of the bridge being thus elevated on a well-defined arch. Bridges are usually made of maple, and in order to bring out the tone in different instruments the thickness and the amount of cutting out require careful examination and expert judgment. It is a mistake to cut the heart or central hole too large, and the feet or legs of the bridge too thin; but repairers often do this to save themselves trouble, as by a liberal use of the knife in these respects almost any instrument can be made to yield a more or less liquid tone. Some instruments require broader and others narrower bridges. The feet must exactly fit the belly of the instrument, the centre of the bass foot should be over the centre of the bass-bar, and the centre of the

treble foot over those fibres of the belly which pass over the top of the sound-post (the sound-post itself standing a little in the rear). The width of the bridge, as a rule, should not exceed the width between the sound-holes, and it should stand on a line exactly bisecting the superficial area of the belly, and precisely at right angles to the axis of the violin. Violin-makers make two nicks in the middle of each sound-hole which are supposed to indicate such a line, but these are not always to be relied on. E. J. P.

BRIDGE, SIR JOHN FREDERICK, was born at Oldbury, near Birmingham, Dec. 5, 1844. Six years later his father, John Bridge (who died at Chester, Sept. 1, 1893) obtained a lay clerkship at Rochester Cathedral, and to Rochester the family removed. At the tender age of six Master Bridge entered the Cathedral choir as a 'practising boy' (*i.e.* a probationer) under the then organist J. L. Hopkins. He remained in the choir till soon after he was fourteen, and was then articled to John Hopkins, who had succeeded his cousin in the organistship of the Cathedral. His first organist appointment was at Shorne Church, a village between Rochester and Gravesend. A year later (in 1862) he became organist of Strood Parish Church; in 1865 he removed to Holy Trinity Church, Windsor, and became a pupil of John Goss. During his Windsor period he qualified for the Fellowship of the Royal College of Organists (1867), and took the degree of Mus.B. at Oxford (1868).

In 1869 Bridge was appointed organist of Manchester Cathedral, a post he held with distinction for six years. At Manchester he held the Professorship of Harmony at Owens College from 1872 to 1875, and took his doctor's degree (at Oxford) in 1874; for his exercise he composed the oratorio 'Mount Moriah.'

Upon the retirement of James Turle from the active duties appertaining to the organistship of Westminster Abbey, Bridge was appointed Permanent Deputy-organist in the autumn of 1875; on the death of Turle (June 28, 1882) he succeeded to the full title. In virtue of his ancient office of organist of Westminster Abbey he has taken part in many important services held within those historical walls. Chief among these were Queen Victoria's Jubilee Service (June 21, 1887), and the Coronation of King Edward VII. (August 9, 1902); for each of these events he arranged all the music that was performed, and composed an anthem.

In May 1890 he was elected Gresham Professor of Music; in 1896 he succeeded the late Sir Joseph Barnby as conductor of the Royal Choral Society; and in 1903 he was appointed First King Edward Professor of Music in the University of London. As an examiner for degrees in music his services have been in great request—*e.g.* the Universities of Oxford, Cambridge, London, Durham, and Victoria; the Royal College of Organists, etc. He conducted the Highbury Philharmonic Society from 1878 to 1886, and the Western Madrigal Society, and he is the present conductor of the Madrigal Society. He is a prominent member of the Musicians' Company.

On the occasion of Queen Victoria's Jubilee (1887) he received the Jubilee medal; at the Diamond Jubilee of her late Majesty (1897) he received at her hands the honour of knighthood, and the clasp to the Jubilee medal; and in acknowledgment of his services at the Coronation of 1902, King Edward VII. made him a member of the Victorian Order.

His compositions, which are strongly impregnated with that vivacity so characteristic of his mercurial temperament, include the following: 'Mount Moriah,' oratorio, composed for the degree of Doctor of Music, 1874; 'Boadicea,' cantata, Highbury Philharmonic Society, May 31, 1880; 'Hymn to the Creator,' motet for soprano solo and chorus, Highbury Philharmonic Society, May 7, 1883; 'Rock of Ages,' Mr. Gladstone's Latin translation of Toplady's hymn, Birmingham Festival, August 27, 1885; concert overture for orchestra, 'Morte d'Arthur,' Mr. Stockley's concert, Birmingham, May 6, 1886; 'Callirrhoë,' cantata, libretto by W. Barclay Squire, Birmingham Festival, August 30, 1888; 'Repentance of Nineveh,' dramatic oratorio, libretto by Joseph Bennett, Worcester Festival, Sept. 11, 1890; 'The Lord's Prayer,' Gloucester Festival, Sept. 7, 1892; 'The Cradle of Christ' (Stabat Mater Speciosa), Hereford Festival, Sept. 12, 1894; 'The Flag of England,' a setting of Rudyard Kipling's poem, Royal Choral Society, May 6, 1897; 'The Ballad of the Camperdown,' Rudyard Kipling's words, Royal Choral Society, Dec. 7, 1899; and 'The Forging of the Anchor,' dramatic scene for baritone solo and chorus, Gloucester Festival, Sept. 11, 1901.

In addition to the foregoing must be added two choral ballads, 'The Festival' (men's voices) and the 'Inchcape Rock'; a minuet and trio for orchestra; many anthems, church services, hymn-tunes, etc.; organ music (Sonata in D, etc.); part-songs, humorous and otherwise. Sir Frederick Bridge has edited the Westminster Abbey Chant Book, the Westminster Abbey Hymn Book; and he is author of Primers on Counterpoint, Double Counterpoint, Organ Accompaniment, and Musical Gestures; as well as of *Samuel Pepys, Lover of Musique* (1903), and *A Course of Harmony* (1899), in collaboration with Dr. F. J. Sawyer. F. G. E.

BRIDGE, JOSEPH COX, brother of the foregoing, and youngest son of John Bridge, was born at Rochester, August 16, 1853. He became a chorister in Rochester Cathedral, and subsequently assistant organist to his master, John Hopkins. He was afterwards a pupil of and assistant to his brother John Frederick at Manchester Cathedral. In 1871 he obtained the

post of organist of Exeter College, Oxford; he graduated there B.A. 1875; Mus.B. 1876; M.A. 1878; Mus.D. 1885. He obtained the Fellowship of the Royal Colleges of Organists in 1879, and he is an Hon. Member of the Royal Academy of Music.

In 1877, on the resignation of Frederick Gunton, Dr. Bridge was appointed organist of Chester Cathedral, the duties of which office he has discharged with marked success and efficiency. In 1879 he resuscitated the Chester Musical Festivals, which had been dormant for fifty years. These music-meetings were held triennially (in June or July) from 1879 to 1900. Dr. Bridge has not only conducted these festivals with undoubted skill, but as hon. secretary he has shown organising zeal and the possession of business capacity in a high degree. He has written an interesting historical pamphlet on the festivals. For many years he has given free organ recitals in the Cathedral on Sunday evenings which have been much appreciated, and his influence on the music of the city has been for its good. He founded the Chester Musical Society, and has conducted and financed it successfully for the last twenty years. From 1886 to 1889 he conducted the Bradford Festival Choral Society, and he officiated in a similar capacity for Hallé at Bristol and other places.

Dr. J. C. Bridge's compositions include: 'Evening Service in C,' with orchestral accompaniment, Chester Festival, July 23, 1879; 'Daniel,' an oratorio, composed for his doctor's degree (1884), and performed at the Chester Festival, July 23, 1885; 'Rudel,' a cantata, Chester Festival, July 22, 1891; 'Symphony in F,' Chester Festival, July 26, 1894; 'Resurgam,' cantata, Chester Festival, July 23, 1897; 'Requiem Mass,' Chester Festival, July 26, 1900. In addition to the above there must be mentioned an operetta, 'The Bells of the Area,' anthems, organ and pianoforte music, songs, etc. Dr. Bridge read a paper on *Ludlow and the Masque of Comus* before the Chester Archæological Society, Jan. 21, 1902. F. G. E.

BRIDGE, or BRIDGES, RICHARD, enjoyed some celebrity as an organ-builder, but little is known of his biography. He is supposed to have been trained in the factory of the younger Harris, and to have been living in Hand Court, Holborn, in 1748. He died before 1776. His first organ seems to have been that of St. Bartholomew the Great, in 1729, and his best instrument was that for Christ Church, Spitalfields, London, 1730. [See also ORGAN, and BYFIELD, JORDAN & BRIDGE.] V. DE P.

BRIDGETOWER, GEORGE AUGUSTUS[1] POLGREEN, a mulatto, son of an African father, who was known in London by the sobriquet of 'the Abyssinian Prince,' and a European mother, appears to have been born at Biala in Poland, 1779 or 1780, and to have made his first appearance on Feb. 19, 1790, at Drury Lane, where he played a violin solo between the parts of the 'Messiah.' This probably attracted the notice of the Prince of Wales, since on the 2nd June following he and CLEMENT, a lad of about the same age, gave a concert under the patronage of H.R.H. In the same year he also played at the 'Professional Concerts.' Bridgetower became a pupil of Barthélemon, Giornovichi, and Attwood, and was attached to the Prince's establishment at Brighton as a first violin-player. His name is found among the performers at the Haydn-Salomon Concerts of 1791, and at concerts of Barthélemon's in 1792 and 1794, where he played a concerto of Viotti's. At the Handel Commemoration of 1791, Bridgetower and Hummel sat on each side of Joah Bates at the organ, clad in scarlet coats, and pulled out the stops for him. In 1802 he obtained permission to visit his mother at Dresden, where she was living with another son, a violoncello-player. In Dresden he gave concerts on July 24, 1802, and March 18, 1803; and from thence went to Vienna, where his reputation preceded him, and where he played the sonata Op. 47—known as the 'Kreutzer Sonata'—with Beethoven, on the 17th or 24th May. After this he returned to England, and in June 1811 took the degree of Mus.B. at Cambridge, his exercise, an anthem, being performed at Great St. Mary's on June 30. He is believed to have died in England between 1840 and 1850, leaving a daughter living in Italy.

Bridgetower has left a memorandum of the performance of the Sonata which, if it can be believed, is interesting. He introduced an alteration of one passage which so pleased Beethoven that he jumped up from his seat, threw his arms round Bridgetower, and cried, '*Noch einmal, mein lieber Bursch*'—'Once more, my dear fellow.' Czerny has left on record that Bridgetower's gestures in playing were so extravagant and absurd that no one could help laughing. The memorandum just mentioned is given by Thayer (*Beethoven*, ii. 229); and further details will be found at pp. 227-231 and 385-391. See also Pohl's *Haydn in London*, pp. 18, 28, 38, etc.—Beethoven writes 'Brischdower.' G.

BRIEGEL, WOLFGANG KARL, church composer, born May 21, 1626, at Nuremberg, and at first a choir-boy there: he was organist at Stettin, and afterwards (see the title-page of his then published works) music-director to Prince Friedenstein in Gotha, and in 1660 capellmeister to the Duke of Saxe-Gotha. In 1670 he was called to Darmstadt as capellmeister to the Landgrave of Darmstadt, where he remained till his death, Nov. 19, 1712.

[1] [The name Augustus rests upon a document printed by Thayer, who also gives various forms of signature, as 'George Bridgetower' and 'George Polgreen Bridgetower.' Some MS. compositions in the British Museum are signed 'G. H. P. Bridgetower,' and these initials are confirmed in the account in the *Gentleman's Magazine*. It is not absolutely certain, but very probable, that the Cambridge Mus.B. was the same person as the mulatto violinist.]

Among the effects of Emanuel Bach was a portrait of Briegel, engraved by Nessenthaler; it represents a man of about sixty-five, of healthy and jovial aspect, and with no trace of the labour involved in so many serious compositions. Schneider (*das Musik. Lied,* iii. 155) says, that 'perceiving the fashion of solo songs like those of Ad. Krieger and the two Ahles to be on the wane, he returned to the composition of songs for several voices; he wrote, in fact, incessantly in all sorts of styles with much fluency but no originality, and with no adequate return for his labours.' His principal compositions consisted of sacred songs for several voices, mostly to his own words. One of his works alone, for 3 and 4 instruments (Erfurt, 1652), contains 10 Paduanen, 10 Gagliarden, 10 Ballette, and 10 Couranten. His one secular work, 'Musikalisches Tafel-Confect' (Frankfort, 1672), consists, according to its quaint title, of 'pleasant Conversations and Concertos.' His Hymn-book for Darmstadt appeared in 1677. His published works, thirty-one in number [see *Quellen-Lexikon* for list], end with 'Letzter Schwanen-Gesang,' consisting of twenty Trauergesänge for four or five voices (Giessen, 1709).
C. F. P.

BRIGHENTI, or BRIGHETTI, MME. MARIA (*née* Giorgi), a celebrated singer, born at Bologna, 1792; first appeared at Bologna in 1814. She created the part of Rosina at the first performance of the 'Barbiere di Siviglia' (Rome, 1816); and for her Rossini wrote 'La Cenerentola.' She sang in the principal towns of Italy, and retired in 1836. Mme. Brighenti embodied her recollections of Rossini, whom she had known from childhood, in an interesting book, *Cenni . . . sopra il Maestro Rossini* (Bologna, 1823).
M. C. C.

BRILLANTE (Ital. 'brilliant'), a word of which the use as a musical term is not very easy to describe in words, though the presence or absence of the quality of brilliance is the easiest thing to detect, whether in music or in its execution. It would probably be best defined as consisting of rapid passages played or sung with considerable force, and above all, resonance. Normally it would seem to imply some degree of loudness, and to be more easily attained in staccato passages than in legato. But there is a quiet brilliance in smooth, soft passages that is difficult, though not impossible, to attain, whether on voices or instruments. Of this Chopin must have been a master, and of those who came after him, Mme. Schumann was the greatest example. Liszt excelled all pianists of his own or later times in the more usual type of brilliance, and Paderewski may be quoted among players of the present day as most closely resembling him in this particular. In vocal music the word is confined to the execution of florid passages, which are called brilliant when each note of the scale or run, although not detached from the rest, is as clear as if it were played on an instrument. One secret of brilliance, in vocal or instrumental music, is to exert the greatest care in the gradation of tone; an absolutely equal succession of notes cannot fail to suggest the accuracy of a machine, while a finely calculated rise and fall of dynamic force will give brilliance more surely than anything else. The word as applied to compositions, independently of their performance, as in many works of Chopin (the 'Rondo brillant' of Schubert does not seem to have been called so by him) has no other significance than as conveying to the performer a hint as to the method of execution.
M.

BRIND, RICHARD, was brought up as a chorister in St. Paul's Cathedral. On the death in 1707 of Jeremiah Clarke, organist of the cathedral, Brind was appointed his successor, and held the place until his death in March 1717-18. He composed for occasions of thanksgiving two anthems now wholly forgotten. Dr. Maurice Greene was Brind's articled pupil.
W. H. H.

BRINDISI (Ital. *far brindisi;* Span. *brindar,* 'to drink one's health'), a drinking or toasting song. Well-known and popular examples are 'Il segreto' in 'Lucrezia Borgia,' 'Libiamo' in the 'Traviata,' and, in more modern operas, there are famous instances in 'Otello' and 'Cavalleria Rusticana.'
W. H. C.

BRINSMEAD. Mr. John Brinsmead, the founder of the firm of pianoforte-makers, John Brinsmead & Sons, of London, was born Oct. 13, 1814, at Wear Giffard, in North Devon. He began business at 35 Windmill Street, Tottenham Court Road, in 1836, removing to the neighbouring Charlotte Street in 1841. The next removal was to the present warehouse of the firm, 18 and 20 Wigmore Street, in 1863, when the present style of the firm was adopted. In recognition of meritorious exhibits in the Paris Exhibition of 1878, Mr. John Brinsmead was decorated by the French Government with the cross of the Legion of Honour. Mr. EDGAR BRINSMEAD, his younger son, has claims to special reference for his *History of the Pianoforte,* with prefatory historical introduction, published by Cassell, Petter, & Galpin in 1868, and, partly rewritten, republished by Novello, Ewer, & Co. in 1879. The firm became a private limited company in January 1900, Messrs. John and Edgar Brinsmead being on the board of directors, of which Mr. Henry F. Billinghurst is chairman.
A. J. H.

BRISTOL MADRIGAL SOCIETY. The establishment of this society in 1837 was one of the fruits of a lecture on Madrigals given at Bristol by Professor Edward Taylor. The society was limited to thirty members, who were to meet on alternate Wednesdays at the Montague Tavern, to sing such madrigals as had been previously agreed upon by the committee; J. D. Corfe, organist of the Cathedral, was the

director, and among the first members was R. L. de Pearsall, the eminent madrigal writer. At the first annual dinner in 1838 Sir John Rogers and Thomas Oliphant, president and secretary of the London Madrigal Society, were present. In the same year it was resolved to give a 'Ladies' Night,' and in 1839 the number of these open performances was increased, owing to the demand for tickets, while ultimately the 'Ladies' Night' took the place of the annual dinner. In Feb. 1841 the Ladies' Nights were suspended, but at the end of 1842 they were recommenced at the Victoria Rooms, with an audience of 1200, and have since been continued annually. The number of members has been increased to forty-two, and the meetings are still held at the Montague. The choir consists exclusively of male voices, the boys being selected from the cathedral choirs of Bristol, Oxford, Exeter, and other places. Corfe continued to direct the society till 1864, when he resigned, and was succeeded by Mr. D. Rootham, the present conductor. The open nights have always attracted a large number of eminent musicians, and among the frequent visitors in past years may be named Dr. C. Corfe, of Oxford; Sir G. J. Elvey and Dr. Stephen Elvey; the Rev. Sir Frederick Gore Ouseley, Bart.; Sir John Stainer, who brought with them the most effective members of their respective choirs. During the period of Corfe's direction these gentlemen joined the choir of Bristol Cathedral at service on the day of the concert, a practice since discontinued. The music sung during the first twelve years of the society's existence was almost exclusively confined to madrigals, the exceptions being anthems by Tye and Creighton, and the works of Pearsall, but some of Mendelssohn's four-part songs were introduced at a concert in Jan. 1851, and have been frequently included since, with other choral works of the same class. The following was the programme at the society's first meeting on March 1, 1837:—'I will arise' (Creighton); 'Cynthia, thy song and chanting' (G. Croce); 'Flora gave me' (Wilbye); 'To shorten Winter's sadness' (Weelkes); 'In pride of May' (Morley); 'O that the learned poets' (O. Gibbons); 'All creatures now' (Bennet); 'Hosanna' (Gibbons); 'April is in my Mistress' face' (Morley); 'So saith my fair' (L. Marenzio); 'Down in a flow'ry vale' (Festa); 'Soon as I careless stray'd' (Festa); 'The Waits' (Saville). On subsequent programmes we find the names of the great madrigal writers of England and Italy. A sacred work occasionally finds a place in the programmes, and the last number is always 'The Waits.' C. M.

BRISTOL MUSICAL FESTIVAL. Inaugurated in 1873, this important music-meeting was held triennally till 1888. Ten festivals (up to that of 1902) have been held in the Colston Hall. The following is a list of the principal works that have been performed, in addition to the 'Messiah' at every festival, and 'Elijah' at all except that of 1893.

1873. Oct. 21-24. The 'Creation,' Macfarren's 'John the Baptist' (composed for the occasion), Rossini's 'Stabat Mater,' and Mendelssohn's 'Hymn of Praise.' Conductor, Mr. Charles Hallé.

1876. Oct. 17-20. Verdi's 'Requiem,' 'Israel in Egypt,' Spohr's 'Fall of Babylon,' 'The Mount of Olives,' 'The Hymn of Praise.' Conductor, Hallé.

1879. Oct. 14-17. 'Samson,' 'Walpurgis Night,' Brahms's 'Rinaldo,' Mozart's 'Requiem,' Rossini's 'Stabat Mater,' 'Choral Symphony.' Conductor, Hallé.

1882. Oct. 17-20. Beethoven's 'Mass in D,' Gounod's 'Redemption,' 'Spring' (from Haydn's 'Seasons'), Rossini's 'Moses in Egypt.' and Mackenzie's 'Jason' (composed for the occasion). Conductor, Hallé.

1885. Oct. 20-23. 'Belshazzar,' Brahms's 'Triumphlied,' C. H. Lloyd's 'Hero and Leander,' Berlioz's 'Faust.' Conductor, Hallé.

1888. Oct. 16-19. Gluck's 'Iphigenia in Tauris' (Act 1), Cherubini's 'Fourth Mass,' Mackenzie's 'Rose of Sharon,' Berlioz's 'Romeo and Juliet' Symphony, Sullivan's 'Golden Legend,' 'First Walpurgis Night.' Conductor, Sir Charles Hallé.

(Two years separated the sixth and seventh Festivals.)

1890. Oct. 22-25. 'Redemption,' Parry's 'Judith,' 'The Golden Legend.' Conductor, Hallé.

1893. Oct. 25-28. 'Samson,' Berlioz's 'Faust,' 'Hymn of Praise,' Rossini's 'Stabat Mater,' S. S. Wesley's 'Wilderness' (with orchestra), Schumann's 'Paradise and the Peri.' Conductor, Hallé, who died Oct. 25, 1895.

1896. Oct. 14-17. Parry's 'Blest pair of Sirens' and 'Job,' Gounod's 'Requiem Mass,' the 'Creation,' Brahms's 'German Requiem,' 'The Golden Legend,' and a new cantata, 'Hymn before Sunrise,' by P. Napier Miles. Conductor, Mr. George Riseley.

The burning of the Colston Hall—on Sept. 1, 1898—caused a break of six years between the ninth and tenth festivals. The latter was held in the re-erected building in

1902. Oct. 8-11. 'Antigone,' Elgar's 'Coronation Ode,' Horatio Parker's 'The Legend of St. Christopher,' Coleridge-Taylor's 'Hiawatha' trilogy, Berlioz's 'Requiem.' Conductor, Mr. George Riseley.

Concerts of miscellaneous music have been given on each occasion. The chorus-masters have been the late Alfred Stone (1873 and 1876), Mr. D. W. Rootham (1879-1896), and Mr. George Riseley (1902). Mr. Walter J. Kidner, who has been associated with the festival since its initiation in 1873, became secretary in 1878. F. G. E.

BRITISH CONCERTS. When the Vocal Concerts were discontinued at the close of the year 1822 the British Concerts were established to supply their place, and, according to the prospectus, 'to meet the wishes of a numerous class of persons who are anxious to see native talent encouraged.' The programmes were to consist 'entirely of works of British composers, or of foreigners who have been naturalised and resident in these realms for at least ten years.' The managers of the concerts were the following members of the Concentores Society:—Messrs. Attwood, Bishop, Elliot, Goss, Hawes, Horsley, Jolly, Linley and Walmisley, and Sir G. Smart. Three concerts were given in 1823, under the immediate patronage of the King, including instrumental chamber music, vocal solos and glees. Among the new works given were string quartets by J. Calkin and G. Griffin, a quartet for piano and strings by Griffin, Horsley's 'Address to Hope' for double choir, and his glee 'The Crier,' Linley's glee 'Now the blue-fly's gone to bed,' Elliott's 'A choir of bright beauties,' Hawes's 'Love, like a bird,' Attwood's 'In this fair vale.' The instrumental performers were Mori, W. Griesbach, H. Smart, and Linley, and the chief vocalists Mrs. Salmon, Miss Stephens, and Messrs. Vaughan, Sale, and Bellamy. The concerts took place in the ball-room of the Argyll Rooms, Regent Street, and a list of 200 subscribers was published, but the support accorded to the scheme was insufficient for the continuance

of the concerts, and the season of 1823 was the first and last. C. M.

BRITISH ORCHESTRAL SOCIETY. This society existed from 1872 to 1875 for the purpose of giving an annual series of concerts by British artists, the soloists, vocal and instrumental, together with the band of seventy-five performers, being drawn from the ranks of native musicians. The scheme of each concert included a symphony, a concerto, two overtures, and vocal music. George Mount was the conductor, and while the performers were exclusively English, the music was drawn from composers of all nations, but several new works by native writers were given for the first time, including Macfarren's overture to 'St. John the Baptist' (1873); J. F. Barnett's overture to Shakespeare's 'Winter's Tale' (1873), written for the society; J. Hamilton Clarke's 'Saltarello' (1874); Alfred Holmes's overture to 'Inez de Castro' (1874); Gadsby's overture 'The Witches' Frolic' (1874); Wingham's Symphony in B flat (1875). C. M.

BRITO, ESTÉBAN DE, lived about 1625, musical director at the cathedrals of Badajos and Malaga, and composer of motets, etc., which existed in the King of Portugal's library, now burnt.

BRITTON, THOMAS, called the 'Musical Small-Coal Man,' was born either at Higham Ferrers or Wellingborough, Northamptonshire, about the year 1651. He was apprenticed in London to a coal-dealer, and afterwards commenced business in Aylesbury Street, Clerkenwell, as a dealer in 'small-coal' (charcoal?), which he carried through the streets on his back. He obtained an extensive knowledge of chemistry, of old books, chiefly on the occult sciences, and of both the theoretical and practical part of music. In 1678 he established weekly concerts, and formed a sort of club for the practice of music. These concerts were held in a long narrow room over his shop [at the north-east corner of Jerusalem Passage], the entrance to which is described as being by a stair outside the house. Notwithstanding the modesty of the attempt these gatherings are said to have been attractive and very genteel. The performers were Handel (who presided at the harpsichord), Pepusch, John Banister, Henry Needler, John Hughes (the poet), Philip Hart, Henry Symonds, Abel Whichello, Obadiah Shuttleworth, Woolaston (the painter), and many other professors and amateurs. The concerts were at first free to all comers; subsequently the visitors paid ten shillings a year each. Britton provided his guests with coffee at a penny a dish. The small-coal man was acknowledged by the Earls of Oxford, Pembroke, Sunderland, and Winchilsea (the great book-collectors of the day), who appreciated his conversation and book-learning. He had a hand in the formation of the celebrated Harleian Library; and the Somers tracts were entirely his collecting. His reception by these noblemen led many persons to imagine that Britton was not the character he seemed to be, and that his musical assemblies were only a cover for seditious purposes. Indeed he was severally suspected of being a magician, an atheist, a presbyterian, and a Jesuit. These conjectures were all ill-grounded. Britton was a plain, simple, honest man, perfectly inoffensive, and with tastes above his condition in life. His death was brought about by a ventriloquist, who so frightened him that he never recovered. He died Sept. 27, 1714, and was buried in St. James's Churchyard, Clerkenwell, his funeral being attended by the members of his musical club. [His portrait by Woolaston is in the National Portrait Gallery.] E. F. R.

BROADWOOD (John Broadwood & Sons, the oldest firm of keyboard instrument makers in existence). This house was founded by the harpsichord maker, Burkat Shudi, properly Burkhard Tschudi, of Swiss origin. He would appear to have begun business in the parish of St. James's, London, about the year 1728; to have removed to Meard Street, Soho, where he found Royal patronage; and to have finally settled in 1742 in Great Pulteney Street, St. James's (*Daily Advertiser*, Oct. 5, 1742), in the house now numbered 33, the seat of the business till 1904. John Broadwood, born 1732 at Cockburnspath in Scotland, by trade a joiner or cabinet-maker, as Shudi had also been, was employed by the latter as a harpsichord maker in 1761 (*Gazetteer* and *Daily Advertiser*, Jan. 14, 1767). In 1769 he married Barbara, Shudi's daughter, and in the following year became Shudi's partner, an arrangement that lasted until the death of the senior in 1773. John Broadwood then became associated, for a period of nine years, with Burkat Shudi, his brother-in-law. From 1782 he remained sole proprietor of Shudi & Broadwood, until, in 1795, by the admission of his son, James Shudi Broadwood, to partnership, the firm became John Broadwood & Son; ultimately, by taking in another son, Thomas, in 1807, John Broadwood & Sons.

The introduction of piano-making in the business dates from 1773, when John Broadwood began to make square pianos on the model of Zumpe. But in 1780 he produced a square piano of his own, which he patented in 1783, discarding the old clavichord disposition of the wrest-plank and tuning-pins. The earliest known date for a Broadwood grand piano is 1781. The patent of 1783 includes the damper and piano pedals, making use of the harpsichord pedals for the grand piano, which had served for the machine stop and swell. In 1788 he divided the long bridge, which until then had been continuous as in the harpsichord, in order to carry the bass strings upon a bridge of their own. These inventions became universally adopted. In 1812 John Broadwood died. As constructive piano-makers among his descendants, have been the above-mentioned son James

(1772-1851), and his son Henry Fowler (1811-1893). The great-grandson Henry John Tschudi Broadwood, the patentee of the 'Barless' grand piano, is a director of John Broadwood & Sons, Limited, a private company established Oct. 1901, with Mr. W. H. Leslie as chairman. In 1904 the old premises in Pulteney Street were given up for larger premises at the corner of Conduit Street and George Street, Hanover Square (formerly Limmer's Hotel). (SHUDI.) A. J. H.

BROD, HENRI, a very famous oboe player, born at Paris, August 4, 1801. He was taught the oboe at the Conservatoire by Vogt, and became very distinguished: 'His tone,' says Fétis, 'was weaker than that of his master, but it was softer and sweeter; his phrasing was graceful and elegant, and his execution clear and brilliant.' He shared the desk of first oboe with Vogt both at the opera and the concerts of the Conservatoire, and was extremely successful both in Paris and the provinces. He made considerable improvements in the instrument itself and in the Cor Anglais, though these have been superseded by the new system of Boehm. Brod's 'Method' is well known, but his pieces, of which Fétis gives a list of twelve, are obsolete. His death, on April 6, 1839, gave occasion to one of Cherubini's cruellest *mots*:—'Brod est mort, maître.' 'Qui?' 'Brod.' 'Ah! petit son' (poor tone). G.

BRODE, MAX, violinist, born Feb. 25, 1850, at Berlin, is an artist widely known and esteemed in Germany, who has done much for music in Königsberg, where he conducts the symphony concerts. W. W. C.

BRODERIP, a family of organists. WILLIAM, born 1683, became a vicar-choral of Wells Cathedral on April 1, 1701, and in 1713 succeeded JOHN GEORGE as cathedral organist. He died Jan. 31, 1726, leaving a widow and nine children. An anthem of his, 'God is our hope and strength,' written in 1713 to commemorate the Peace of Utrecht, is in the Tudway collection. JOHN BRODERIP, probably a son of his, became a vicar-choral (on probation) of the same cathedral, Dec. 2, 1740, and on April 1, 1741, was appointed organist. [He was succeeded by R. Parry in 1774, and died in 1785.] Between 1766 and his death he published a volume of 'Psalms, Hymns, and Spiritual Songs,' dedicated to Lord Francis Seymour, the then Dean of Wells. In later life he became organist of Shepton Mallet in Somersetshire. ROBERT BRODERIP, who lived at Bristol, was probably another son of William. He wrote a considerable number of works, such as an ode on the King's recovery, a concerto for harpsichord and strings, voluntaries, duets, glees, etc. Some psalms by him are included in a similar volume to that above mentioned, published by John Broderip. He died May 14, 1808. W. B. S.

BRODERIP & WILKINSON. A bygone firm of London music publishers. The first-named partner was, there is reason to believe, Robert Broderip the musician (*q.v.*), the son of John Broderip of Wells, and partner in the great firm Longman & Broderip. When this latter came to grief about 1798, Broderip & Wilkinson took over the Haymarket premises (No. 13) and carried on a moderate business. Broderip having died in 1808, the business soon collapsed, and in 1811 Thomas Preston of the Strand purchased its entire stock and plates. F. K.

BRODSKY, ADOLPH, violinist, was born at Taganrog, Russia, March 21, 1851. As a child he gave evidence of exceptional musical gifts, receiving home instruction up to the age of nine; he was then sent, at the cost of a wealthy citizen of Odessa, to receive tuition from J. Hellmesberger in Vienna, and in 1862-63 was a pupil of the Conservatorium. On leaving the school he became a member of Hellmesberger's quartet, and played in the opera orchestra from 1868 to 1870. While on a long concert tour, he visited Moscow in 1873, where he studied for a time still further under Ferdinand Laub, at whose death in 1875 he accepted an appointment in the local Conservatorium. In 1879 he was appointed conductor of the symphony concerts at Kiev, remaining there for two years. After a very successful concert tour, during which he visited Vienna, Paris, London, etc., he succeeded Schradieck as professor in the Leipzig Conservatorium, and was a frequent performer at the Gewandhaus concerts. At this period he formed, in conjunction with Hans Becker, Hans Sitt, and Julius Klengel, a string quartet which became favourably known throughout Germany. An offer from the United States tempted him to cross the Atlantic in 1890, and he became leader of Damrosch's Symphony Society in New York, but returned to Europe in 1894, accepting in 1895 the post of leader of Sir Charles Hallé's orchestra in Manchester. After the death of Hallé he held the temporary post of conductor of the orchestra; and as principal of the Royal College of Music and organiser of chamber-music concerts his influence in Manchester has been very great. In 1902 he received the honorary degree of Mus.D. from the Victoria University. Among contemporary violinists more polished executants are to be found, but few possess to the same extent his qualities of sound musicianship. W. W. C.

BRONSART, HANS VON, the professional name of H. BRONSART VON SCHELLENDORFF, pianist and composer, born at Berlin, Feb. 11, 1830, educated at Danzig and at Berlin University, 1849-52. Studied harmony and composition under Dehn, and the piano, first under Kullak, and (1854-57) under Liszt at Weimar. After several years devoted to concert tours, Bronsart (1860-62) conducted the Euterpe concerts at Leipzig; in 1865 succeeded Bülow as Director of the Gesellschaft der Musikfreunde at Berlin, and in 1867 was made Intendant of the court theatre at Hanover; [in 1887 he was appointed

General-Intendant at Weimar. In 1895 he retired with the rank of a Privy Councillor.] His chief works are a Pianoforte Trio in G minor, and a Pianoforte Concerto in F♯ minor—both much and successfully played by von Bülow, Sgambati, and others; Polonaise in C minor (Liszt's 'Das Klavier'); 'Frühlings-Fantasie' for orchestra, often performed; 'Christnacht,' a Cantata for double choir and orchestra; 'Der Corsair' (MS.), an opera, text from Byron; also an interesting pamphlet, 'Musikalische Pflichten.' In 1862 he married Ingeborg Starck, like himself a pupil of Liszt's. [See STARCK.] In England Bronsart is only known by his Pianoforte Concerto, which was played at the Crystal Palace, Sept. 30, 1876, by Fritz Hartvigson. E. D.

BROS, JUAN, born at Tortosa 1776, died at Oviedo 1852, successively director at the cathedrals of Malaga, Leon, and Oviedo, and composer of much church music, still performed in the churches throughout Spain. Three Misereres written at Leon are cited as his best works. Specimens of his music are given by ESLAVA in the 'Lira Sacro-Hispano.' M. C. C.

BROSCHI, CARLO; DETTO FARINELLI. (See FARINELLI.)

BROSSARD, SEBASTIEN DE, author of the first musical dictionary, published under the title of *Dictionnaire de musique contenant une explication des termes grecs et latins, italiens et français les plus usités dans la musique*, etc. (Paris, Ballard, 1703, folio). There were six later editions, the second at Paris in 8vo (1705), the third, undated, by Roger of Amsterdam, and the last also at Amsterdam. The work contained a catalogue of 900 authors on music. He had prefixed a short Dictionary of Musical Terms to his *Prodromus Musicalis*, published as early as 1695. Brossard was born in 1660, and was a priest at Strasburg, and chapel-master to the cathedral from 1689 to 1698. In 1700 he was appointed grand chaplain and musical director of the cathedral at Meaux, where he died August 10, 1730. Janowka, a Bohemian, brought out a musical dictionary two years before Brossard's, but it was in Latin, like all such works at that time. Brossard's book being in French brought musical subjects within the range of the general reading public, and thus rendered an important service to art. It is not without faults, but contains an enormous amount of information to have been amassed by one man. It was translated into English by Grassineau in 1740. Brossard also wrote *Lettre à M. Demotz sur sa nouvelle méthode d'écrire le plain-chant et la musique* (Ballard, 1729). As a composer of church music he made his mark. He gave his valuable library to Louis XIV. in consideration of an annuity of 1200 francs. His MSS. and notes for a universal history of music are preserved in the national library in Paris. F. G.

BROWN, JAMES DUFF, born at Edinburgh, Nov. 6, 1862, was an assistant librarian in the Mitchell Library, Glasgow, from 1878 to 1888, when he became librarian to the Clerkenwell Public Library. His claim to notice rests on his *Biographical Dictionary of Musicians* (Paisley, 1886), a book of considerable value as far as facts are concerned; his *Guide to the Formation of a Music Library* (1893) is of greater value, and his best work is *British Musical Biography* (with Stephen S. Stratton, 1897). M.

BROWNSMITH, JOHN LEMAN, was born in Westminster in 1809, and received his musical education as a chorister of Westminster Abbey under George Ebenezer Williams and Thomas Greatorex. On quitting the choir he pursued the study of the organ, and in a short time became not only an excellent player but acquired so perfect a knowledge of the structure of the instrument as to be able to build a small chamber-organ for himself. In 1829, on the death of Benjamin Jacob, Brownsmith was appointed his successor as organist of St. John's Church, Waterloo Road. In March 1838 he was appointed a lay vicar of Westminster Abbey. In October 1848 he succeeded William Miller as organist to the Sacred Harmonic Society, in which capacity he officiated at the Handel Festivals at the Crystal Palace in 1857, 1859, 1862, and 1865. In 1853 he resigned his appointment at St. John's on being chosen organist of the then newly-erected church of St. Gabriel, Pimlico. He died Sept. 14, 1866. W. H. H.

BRUCH, MAX, one of the most eminent living German composers, was born at Cologne on Jan. 6, 1838. His father was in Government employ, his mother came of a well-known and gifted musical family of the Lower Rhine. Herself a distinguished singer, she carefully watched the early development of her son's musical talents. He received his theoretical instruction from Professor K. Breidenstein at Bonn, and soon began to give extraordinary promise. In 1852 Bruch gained the scholarship of the Mozart foundation at Frankfort-on-Maine for four years, during which time he continued his studies under Hiller, Reinecke, and Breuning at Cologne, at the same time making himself gradually known by his compositions. His further development was promoted by long visits to Leipzig, Munich, and other musical towns; from 1858 to 1861 he was a teacher in his native town, where his first work, an operetta, 'Scherz, List und Rache,' to Goethe's words, was performed in 1858. His stay at Munich was of special importance through the personal acquaintance of the poet Geibel, whose 'Loreley,' written for Mendelssohn, Bruch had composed while at Cologne. He at length obtained the poet's consent for the performance of the opera, and proceeded to Mannheim, where it was first given in 1863, and where he occupied himself with studying the requirements of the stage. He then produced many of those works which have associated his name with the best of the present time, among others, the 'Frithjof-

Scenen,' for male voices and orchestra, op. 23. In 1865 he accepted the post of musical director of the Concert-Institution at Coblenz, and in 1867 became capellmeister to the Prince of Schwarzburg-Sondershausen. This post he resigned in 1870, after which he lived independently, first at Berlin and afterwards (1873-78) at Bonn, devoting himself exclusively to composition. In 1878 he became director of the Stern Singing Society in Berlin, succeeding Stockhausen. In 1880 he was offered the direction of the Liverpool Philharmonic Society, and for three years England became his home. In 1881 he married the singer Emma Tuczek. In 1883 he undertook the direction of the Orchesterverein at Breslau, remaining there until 1890; in 1892 he succeeded Herzogenberg as director in the branch of composition in the Hochschule of Berlin. He has received honorary degrees from the universities of Cambridge (1893) and Breslau (1896), and is a corresponding member of the French Académie des Beaux-Arts. Bruch's real field is concert music for chorus and orchestra; he is above all a master of melody, and of the effective treatment of masses of sound. These two sides of his artistic activity, so to speak, play into each other's hands, and have brought him deserved success. Bruch's melody is not drawn from hidden depths of innermost feeling, but rather from the upper surface of his nature; yet it is true, unconstrained, natural, and excellent in structure, broad, impressive, and vocal. He thoroughly understands how to clothe his thoughts in the most favourable and effective forms. In the elaborate and complicated machinery of the modern orchestra and chorus he is thoroughly at home. While on the one hand we admit that the effect of his more important works is perhaps greatly dependent on the brilliant clothing of the musical ideas, we must on the other hand insist that this skilful use of external means is always accompanied by a keen artistic feeling for external harmony, with a delicate estimation of the proportionate effect of the separate parts in comparison to the whole. This artistic sense of proportion saves him from losing himself in that mere outward show which we sometimes find among the modern realistic school. A. M.

The list of Bruch's works is as follows:—

Op.
1. 'Scherz, List und Rache,' comic opera, in one act.
2. Capriccio, pf. 4 hands.
3. 'Jubilate, Amen,' sop., choir, and orch.
4. Three Duets, S. and A.
5. Trio, pf. and str. in C minor.
6. Seven part-songs, female choir.
7. Six Songs.
8. 'Die Birken und die Erlen,' sop., choir, and orch.
9. Str. Quartet, C minor.
10. Str. Quartet, E.
11. Fantasia for 2 pfs.
12. Six pf. pieces.
13. Hymn for sop.
14. Two pf. pieces.
15. Four Songs.
16. 'Die Loreley,' grand opera, 3 acts.
17. Ten Songs.
18. Four Songs.
19. Two sets of male choruses.
20. 'Die Flucht der heiligen Familie,' choir and orch.
21. 'Gesang der heiligen drei Könige,' trio, male voices, and orch.
22 *deest.*
23. 'Frithjof-Scenen,' soli, male choir, and orch.
24. 'Schön Ellen,' soli, choir, and orch.
25. 'Salamis,' soli, male choir and orch.
26. Violin Concerto, G minor.
27. 'Frithjof auf seines Vaters Grabhügel,' baritone solo, female choir, and orch.
28. Symphony, E flat.
29. 'Rorate Coeli,' choir, orch., and organ, *ad lib.*
30. 'Die Priesterin der Isis in Rom,' alto solo and orch.
31. 'Flucht nach Aegypten,' and 'Morgenstunde,' sop., female choir, and orch.
32. 'Normannenzug,' baritone, male choir, and orch.
33. Four Songs.
34. 'Römische Leichenfeier,' choir and orch.
35. Portions of the Mass, for 2 sopr., double choir, orch., and organ.
36. Symphony, F minor.
37. 'Das Lied vom Deutschen Kaiser,' chorus.
38. Five Songs for choir, *a cappella.*
39. 'Dithyrambe,' tenor, 6-part choir, and orch.
40. 'Hermione,' opera in 4 acts (perf. Berlin, 1872, with moderate success).
41. 'Odysseus,' soli, choir, and orch. (given twice by the Bach choir in London, once under the composer's direction, and often elsewhere; Bruch's most successful work).
42. Romance, violin and orch.
43. 'Arminius,' oratorio.
44. Violin Concerto, D minor.
45. 'Das Lied von der Glocke,' soli, choir, and orch.
46. Scottish Fantasia, violin and orch.
47. 'Kol Nidrei,' violoncello and orch.
48. Four Male Choruses
49. Seven Songs.
50. 'Achilleus,' soli, choir, and orch.
51. Symphony in E.
52. 'Das Feuerkreuz,' soli, choir, and orch. (The best-known number is a soprano solo, 'Ave Maria,' frequently sung.)
53. Two Male Choruses.
54. Songs.
55. Canzone, violoncello and orch.
56. Adagio, violoncello and orch. (on Celtic themes).
57. Adagio appassionato, violin and orch.
58. Violin Concerto, D minor.
59. Five Songs.
60. Nine Choruses.
61. 'Ave Maria,' violoncello and orch.
62. 'Gruss an die heilige Nacht,' alto, choir, and orch.
63. Swedish Dances, violin and pf.
64. Scottish Fantasia, violin, harp, and orch.
65. 'In Memoriam,' adagio, for violin and orch.
66. 'Leonidas,' male choir.
67. 'Moses,' oratorio.
68. 'Neue Männerchöre' with orch.
69. Five-part chorus with organ.
70. Four pieces for violoncello.
71. Seven songs for mixed choir.
72. Chorus for male voices.
73. 'Gustav Adolf,' secular oratorio
74. 'Herzog Moritz' for male choir.
75. Serenade for violin and orch.
76. 'Der letzte Abschied des Volkes,' male choir, orch., and organ.
77.
78. 'Damajanti,' sopr. solo, choir, and orch.
79. Songs and Dances, on Russian and Swedish folk-tunes, for violin and pf.

Besides these there are two collections of arrangements, one a book of 'Hebräische Gesänge,' and the other a set of Scottish songs.

BRUCK, Arnold de, born at Bruges about 1480; in 1530 Capellmeister to the King of Rome (afterwards Emperor Ferdinand I.) at Vienna, an office he retained till 1545; wrote for 4 or 5 voices; pieces by him are given in a collection printed by Gardano in 1549, and in M. Agricola's 'Newe deutsche geistliche Gesenge.' In Ancina's collection of 1599 he is called 'Arnoldo Fiamengo.' In the Breslau Library is a motet by Fevin to which Arnold added two parts.

BRUCKNER, Anton, organist and composer, born Sept. 4, 1824, at Ansfelden (Upper Austria), and received his earliest musical instruction from his father, a village schoolmaster, at whose death he was received as a chorister into the institute (Stift) of St. Florian, where he afterwards became organist. In 1855 he obtained by competition the post of organist of Linz Cathedral. From here he made frequent journeys to Vienna to

prosecute his studies under Sechter, and from 1861 to 1863 he was a pupil of Otto Kitzler. At Sechter's death in 1867 he was chosen to succeed him as organist of the Hofkapelle, and at the same time became a professor in the Conservatorium. To these functions he added a lectureship at the University, to which he was appointed in 1875. In 1869 he took part in an organ competition at Nancy with such success that he was invited to play in Paris and elsewhere; in 1871 he gave six recitals at the Albert Hall. Three grand masses, in D minor (1867), E minor (1869), and F minor (1872), a Te Deum (1885), Psalm CL. (1892), and a number of motets, besides several compositions for male chorus, are among his vocal compositions, but his fame rests chiefly upon his eight complete symphonies. The first, in C minor, was written at Linz in 1866 and performed in 1868; the second, in the same key, was given in Vienna, 1873; the third, D minor, Vienna, 1877; the fourth, E flat ('romantic'), Vienna, 1881; the fifth, B flat, Graz, performed 1894; the sixth, A (two movements played under Jahn in 1883, and the whole under Mahler, 1899); the seventh, E, Leipzig, 1884, Munich, 1885, and London, 1887 (under Richter), the work which first made the composer's name widely known; the eighth, C minor, Vienna, 1892. Three movements of a ninth were written in 1891-94, and performed in Vienna, 1903. A string quintet in F (1881), and an early pianoforte piece, complete the list of the composer's works, as given in the *Verzeichnis*, published by Doblinger of Vienna. His style is marked by great earnestness and considerable originality, though it may be reproached with a certain lack of contrast, and an inordinate leaning towards the manner of Wagner, upon whose death the slow movement of the seventh symphony already referred to was written as a kind of elegy. Bruckner died at Vienna, Oct. 11, 1896. M.

BRÜCKLER, Hugo, born at Dresden, Feb. 18, 1845, received his first musical instruction from his schoolmaster, C. Sahr. When about ten years old he entered the Evangelical Choristers' Institution at Dresden, where he received instruction in singing and the pianoforte from the court organist, Dr. Johann Schneider. Upon leaving the institution he devoted himself entirely to music, and after taking violin lessons from Herr Haase of Dessau, who was then living in Dresden, in his sixteenth year entered the Dresden Conservatorium, where he diligently pursued his violin studies under Herr Franz Schubert. Brückler's growing inclination for singing and pianoforte caused him, about eighteen months later, to give up the violin, in order to devote himself entirely to the study of pianoforte-playing, singing, and composition. After receiving instruction from Carl Krebs (pianoforte), Julius Rietz (composition), and others, as well as making experiments in different branches of music, and diligently studying full scores and literature, Brückler left the Conservatorium and began to compose industriously, at the same time giving private music lessons. In the latter years of his life he still studied singing with great success under the well-known master Herr Thiele, but continually increasing ill-health compelled him to abandon this passionately loved study. Rapid consumption brought the amiable and modest artist severe suffering, and ended his life at the age of twenty-six, Oct. 4, 1871. The only compositions of Brückler's which have been published are songs; they are as follows:—op. 1, five songs from Scheffel's 'Trompeter von Säkkingen' (Leipzig, Kahnt); op. 2, nine songs from the same poem; seven songs from his posthumous works, selected and edited by Adolf Jensen (Dresden, Hoffarth); and the ballad 'Der Vogt von Tenneberg,' edited by Reinhold Becker. W. B. S.

BRÜLL, Ignaz, pianist and composer, born Nov. 7, 1846, at Prossnitz in Moravia, received instruction from Epstein, Rufinatscha, and Dessoff. The first of these played a concerto by his young pupil in 1861, which brought the composer into notice. In the following year Brüll wrote an orchestral serenade which was performed at Stuttgart in 1864. He appeared as a pianist in Vienna (where his parents had lived since 1849) and undertook several concert tours, performing, among other things, his own compositions with the greatest success. From 1872 to 1878 he was engaged in teaching at one of the smaller institutions at Vienna, and has been concerned in its direction since 1881. In 1878 he came to London, and played at no fewer than twenty concerts. By this time his opera 'Das goldene Kreuz' (produced Dec. 22, 1875, at Berlin) had obtained such success in different parts of Germany that Carl Rosa was warranted in producing it in London during the composer's stay. It failed to produce any remarkable effect. His other operas are 'Die Bettler von Samarkand' (1864), 'Der Landfriede' (1877), 'Bianca' (1879), 'Königin Mariette' (1883), 'Das steinerne Herz' (1888), 'Gringoire' (1892), 'Schach dem König' (1893), 'Gloria' (1896), 'Der Husar' (1898), and a ballet 'Champagnermärchen,' besides which he has written a symphony op. 31, an overture 'Macbeth' op. 46, two pianoforte concertos, a violin concerto op. 41, a sonata for two pianos, a trio, and other works for piano and strings, besides pianoforte pieces and songs. M.

BRUHNS, Nikolaus, born about 1665 at Schwabstädt in Schleswig, was a pupil of his father, Paul Bruhns, and of his brother Peter (1641-98) who was a 'Rathsmusikus' at Lübeck, for the violin and the viol da gamba; he was afterwards a pupil of Buxtehude for the organ, and through his influence got a post at Copenhagen; later on he was town organist at Husum, where he died 1697. He was the greatest organist of his time, next to Buxtehude; three

organ pieces are printed in Commer's 'Musica Sacra,' and the Royal Library at Berlin contains a book of thirteen cantatas and motets for choir and orchestra (*Quellen-Lexikon*). M.

BRUMEL, ANTOINE, a contemporary of Josquin, enjoyed a high reputation as a scientific musician. Of his life little is known beyond the fact that he survived Okeghem, and that in 1505 he was invited to become maestro di cappella to Alfonso, Duke of Ferrara. The correspondence which passed on this occasion and the terms of the proposed engagement are preserved in the State Archives at Modena, and have been printed by M. Vander Straeten, *La Musique aux Pays-Bas*, vol. vi. It is not known whether the offer was accepted.

Brumel's compositions are almost exclusively sacred. He wrote at least fifteen masses, five of which, including the inevitable Missa 'L'omme armé,' were printed by Petrucci as early as 1503. Others were published at Rome in 1519, and at Nuremberg in 1538 and 1539. Petrucci also printed several motets by him. Glareanus, who gave some extracts from Brumel's masses in the *Dodechachordon* (1547), thought that he excelled rather by industry and mastery of his art than by any natural aptitude for music. A curious example of his skill is given in Faber's *Institutiones Musicæ* (1553), namely a composition in eight parts, each of which is in a different ecclesiastical mode. Franchinus and Hermann Finck both speak of Brumel in terms of high praise. J. F. R. S.

BRUNEAU, ALFRED, one of the most distinguished of living French composers, was born in Paris, March 2, 1857, and as his father and mother were devoted to music, playing the violin and piano respectively, it was natural that their son should be a musician; he learned the violoncello in order to be associated with them in chamber music. At fifteen years of age he carried off the first prize at the Conservatoire, as a pupil of Franchomme, the eminent master of the violoncello. Bruneau was subsequently in the composition class of Massenet, and at the same time was a member of Pasdeloup's orchestra, when the works of Wagner were first making their way in Paris. A cantata, 'Geneviève de Paris,' with which the young composer competed for the prix de Rome, was rewarded only with the second prize, as the judges considered its tendencies too advanced for their entire approval. From the date of this work down to the present day, Bruneau has adhered with extraordinary steadfastness to the commands of his artistic convictions; he has obeyed them absolutely, and has never swerved from the path for the sake of popularity or profit. As a result of this his work is marked by a rare degree of unity of style.

In 1884 Pasdeloup performed his 'Ouverture héroique' and 'Léda,' a choral symphony, which was followed in time by two others, 'La Belle au Bois dormant' (1886) and 'Penthésilée.' These works, with two collections of songs, 'Lieds de France' and 'Chansons à danser,' and a Requiem Mass, first performed in London, in 1896, and afterwards in Paris, complete the number of Bruneau's compositions apart from the stage.

His first essay in dramatic music was a three-act opera, 'Kérim,' set to a libretto by Paul Milliet and Henri Lavedan, and given during a temporary season of 'opéra populaire' at the Théâtre du Château d'Eau in May 1887. The pretty, fantastic story is perhaps a little too slight in texture for an opera, and the Emir's search for the genuine tears which are to win the hand of his beloved is accomplished in rather too short a time; the oriental colouring is admirably given, and the love-music is remarkably sincere and unaffected, although here and there the influence of Massenet is to be perceived. The individuality and boldness of its harmonic design attracted the attention of musicians at the time of its production, and Bruneau, whose taste in literature is well illustrated by his choice of admirable poems of Catulle Mendès for the collections of songs already mentioned, desired to write an opera upon the subject of Zola's *Faute de l'Abbé Mouret*. A libretto written on this novel had, however, been acquired by Massenet, but Bruneau became the happy possessor of a book written by Louis Gallet on Zola's *Rêve*, and his four-act opera was produced at the Opéra Comique on June 18, 1891, with such success that it was given by the same singers at Covent Garden on Oct. 29 of the same year. At the time of its production, the structure of its melodies, its extraordinary harmonies, and the whole style of the piece, spread consternation among the more conservative of the French critics and the great majority of their English colleagues. It seemed incredible that any singers should be found able to commit to memory the various parts, and the entries of the voices seemed as often as not to be made on notes completely out of relation with the orchestral accompaniment. In spite of the undeniable ugliness of much of the music, taken simply as music, it was felt by the more open-minded hearers that a new dramatic style had been created, and that whether beautiful or the reverse, as mere music, the play was presented with a delicacy and charm of atmosphere that subtly conveyed its poetic beauty and fragrance. The characterisation of the ecclesiastic, M. de Hautcœur, of the girl Angélique, and of the other parts, is altogether admirable, and of this, as of all Bruneau's maturer works, it may be said that each has a definite atmosphere of its own which gives the dominant note to the opera as a whole.

For Bruneau's next opera, the same librettist prepared a book from Zola's *Soirées de Médan*,

'L'Attaque du Moulin,' again in four acts, produced at the Opéra Comique Nov. 23, 1893, when the action of the story was transferred from the date of the Franco-German war to 1792 for political reasons. When it was given at Covent Garden, the original period was represented, and the piece gained greatly in interest and in what is called 'actuality.' It was presented here on July 4, 1894, with Mme. Delna in the part of the old housekeeper, Marcelline, a character invented for the opera, and one on which most of the charm of the work depends. In the light of his later works, the style of this piece is seen to be no such violent contrast with that of 'Le Rêve' as was at first imagined; the vocal parts are far more grateful to the singers, and there is less that is startling in the harmonic treatment; it is simply maturer than the former opera, and must rank with the masterpieces of the modern stage, so vivid is its presentment of the circumstances of war, as they affect a peaceful household. It may be guessed that critics on both sides of the Channel had got used to Bruneau's ways of expressing himself, and that the change of front which they thought they discerned in him was in reality only a change in their own attitude towards a new style. The success of the opera was very remarkable, alike in Paris, the French provinces, and London; and it may be said to have found immediate and universal acceptance.

In this work, Bruneau used for the last time the services of a librettist; henceforward, he set the *ipsissima verba* of his favourite author, and in writing for music, Zola seemed to discover new and delightful qualities. He threw himself with such enthusiasm into the task of providing subjects for Bruneau, that the composer has declared that he is supplied with librettos by Zola which will last his lifetime. In the natural course of events, the production of his next work, 'Messidor,' at the Grand Opéra, would have set the crown of national and official recognition upon Bruneau's career; but at the time of its production there, Feb. 19, 1897, the 'affaire Dreyfus' was engaging the attention and heating the passions of the French people to such an extent than any work with which Zola's name was in any way connected was repudiated by the great majority of the people; Bruneau had actively supported Zola in his championship of Dreyfus, and his sins were visited upon him in the practical banishment of his opera from the Parisian stage, notwithstanding the brilliant success of its first performances. Its most important revival, up to the present time, was at the Hoftheater of Munich, Jan. 15, 1903. It has been objected that the supernatural element and the whole episode of the Legend of the Gold is not entirely harmonious in style with the rest of the piece, which deals with humble men and women of the present day, and the want that is caused by the selfishness of a plutocrat who diverts the water of the river in order to get gold from it. Musically, however, the conjunction is perfectly intelligible, and the two warring motives of the gold, with its malefic influence, and the water, with the abundance it brings, are splendidly worked out; the ballet music is most brilliant and entirely original, and the sowing song, 'Semence auguste,' with which the tenor concludes the second act, is built on a tune of such vigour and beauty that it must appeal to every hearer at once.

In 'Le Rêve' the influence of the church is felt throughout, in 'L'Attaque du Moulin' the presence of war dominates everything, and in 'Messidor' the opposition of the gold and the water typifies in a fantastic form the war between capital and labour; so in 'L'Ouragan,' too, there is one dominating influence, for the hurricane brings about the whole of the drama, from its opening to the final catastrophe. This work, like the others in four acts, was produced at the Opéra Comique April 29, 1901, and was at once recognised as one of the finest of modern French operas. The rival sisters are admirably characterised, and the third female part, that of a girl foreign to the island where the action takes place, is finely contrasted with them. The experiment of using prose as the medium of an operatic text is amply justified in these two works, and we are entitled to hope for many more operas of equal force from the composer, who in 1903 accepted the post of conductor at the Opéra Comique, where a five-act comédie-lyrique, 'L'Enfant Roi,' has been accepted for performance.

It remains to speak of the non-operatic works of the composer. The 'Requiem,' the most important of these, was given by the Bach Choir on Feb. 25, 1896, and it was acknowledged as a work of great power, though not entirely free from *bizarrerie*. The way in which the plain-song of the 'Dies irae' is used is most impressive; it is delayed until just before the words 'Tuba mirum,' when it appears, flung, as it were, from side to side of the auditorium by trumpets that take the alternate notes; soon afterwards it is played in semiquavers instead of semibreves, with surprising effect, and finally is heard sung quietly by choristers in the organ-loft; the whole is a work of decided pathos and real sincerity of expression, even though it is hardly likely that it will ever be as popular as the Requiem of Verdi, to which in style it bears no slight affinity. The 'Lieds de France,' to words by Catulle Mendès, are mostly modelled on the quaint traditional songs of the French peasantry, such as are gathered into the collections of Wekerlin and Bourgault-Ducoudray. 'Noces dans l'Or' might well be a genuine folk-song, 'L'heureux Vagabond' is characteristic in no ordinary degree, and 'Le Sabot de Frêne' has

a brilliant and original accompaniment to a tune of rare charm. The six 'Chansons à danser' are of a still higher order of lyrics, the suggestion being taken from the form of the old French dances. Here the character of the movements is admirably kept up (the bourrée, it is true, is in triple time); in each there is plenty of variety, and in one, 'Le Sarabande,' with the figure of Mazarin in the background, the allusion to the grim saraband that his victims are dancing, 'à deux pieds des pavés,' makes a most dramatic ending.

Bruneau was decorated with the Légion d'Honneur in 1895, and at one time was a regular contributor to the *Gil-Blas* and *Figaro*. Three volumes of criticisms, entitled respectively *Musiques d'hier et de demain, La Musique Française*, and *Musiques de Russie, et Musiciens de France*, show great critical insight, fine literary taste, and a trenchant style. M.

BRUNETTE is defined by Diderot and d'Alembert, in their encyclopædia, to be a kind of *chanson*, with an easy and simple air, and written in a style which is gallant, but without affectation, and often tender and playful. The term is generally believed to have come from the young girls, 'petites brunes' or 'brunettes,' to whom these songs were so frequently addressed. Ballard, however, maintains that the term was derived from the great popularity of a particular song in which the word was used. A well-known specimen is 'Dans notre village,' called in some collections 'Nous étions trois filles à marier,' and attributed to Lefèvre.

BRUNETTI, GAETANO, a violin-player and composer, was born at Pisa about 1753. He was a pupil first of his father, Antonio Brunetti (born about 1726), maestro of the cathedral at Pisa from 1752, an able musician, and afterwards of the celebrated Nardini at Florence, whose style of playing and composing he adopted with considerable success. The greater part of his life he spent at Madrid, attached to the court of the Prince of Asturias, afterwards Charles IV. Here he came into close connection with Boccherini, then at the height of his fame as a performer and composer, and appears gradually to have superseded that artist in the favour of the court and the public. With the symphonies, serenades, and other instrumental works which he wrote for the King and the Duke of Alba he was eminently successful. They appear to be very much in the style of Boccherini; but on the whole inferior to the works of that master. Brunetti died at Madrid about 1808. His numerous compositions—published at Paris—consist of symphonies, serenades, sextets, quintets, and violin-duets. [Six symphonies, six quintets, and six sextets are mentioned in the *Quellen-Lexikon*.] Over 200 works of his remain in MS. P. D.

BRUNI, ANTOINE-BARTHÉLÉMY, a violinist and composer, born at Coni in Piedmont, Feb. 2, 1759. He was a pupil of Pugnani, and lived from 1781 at Paris, first as orchestral player at the Italian Opera, and afterwards as conductor of the Opéra Comique. He wrote operas, some of which achieved considerable success, although all are now forgotten. [See list in the *Quellen-Lexikon*.]

For the violin he wrote four sets of sonatas, several concertos, nine books of quartets, five books of trios, and twenty-eight sets of violin duets, the latter well known to professors as useful pieces for teaching purposes; also a *Méthode de Violon*, and a *Méthode pour l'Alto-viola*. He died in 1823. P. D.

BRUSSELS CONSERVATOIRE. The CONSERVATOIRE DE MUSIQUE ET DE DÉCLAMATION, established Feb. 13, 1832, by an Order in Council, is an offshoot of the École royale de Musique founded in 1823. By another Order in Council, April 15, 1833, the directorship of the new institution was conferred on F. J. Fétis, who continued in office till his death (March 25, 1871), and was succeeded by M. Gevaërt. Under his direction the institution steadily increased in importance. Its annual income, which amounted at first to only 8000 francs, has been augmented by endowments from the government, city, and province to 108,040 francs (£4320) in 1870, and it has now three times outgrown its accommodation. In 1835 it removed to an hotel in the Rue de Bodenbroeck, in 1847 to the ancient Hôtel de Croy in the Petit Sablon, and on Feb. 12, 1876, to the present Conservatoire, in the continuation of the Rue de la Régence, which was inaugurated by the King and Queen. The last enlargement is a proof of the popularity and influence of the present director. [In 1896 M. Gevaërt celebrated the 25th anniversary of his appointment as director. Under his régime the library, augmented by the purchase of the collection of Fétis, has become of primary importance (M. Wotquenne, the librarian, has recently published the catalogue). The museum of musical instruments annexed to the institution is now the richest in Europe in the departments of ancient instruments and of instruments of the lute and violin families originating outside Europe. The 'Concerts du Conservatoire' have obtained great renown under the direction of M. Gevaërt, who has brought forward numerous masterpieces old and new: specimens of Lulli, Rameau, Gluck, of Bach and Handel, the nine symphonies of Beethoven, and works by Wagner, Liszt, Brahms, and César Franck. In 1882 the 50th anniversary of the institution was celebrated.—M. K.] Among the most eminent professors since the foundation we will mention by name—MM. Gevaërt (composition), J. Dupont (harmony), Kufferath (counterpoint), Mailly (organ), Auguste Dupont and Brassin (pianoforte), Colyns and Wieniawski (violin), Warnots (singing), Joseph Servais (violoncello), Dumon (flute),

Poucelet (clarinet), Merck (horn), Duhem (trumpet), and Van Hoesen (bugle). Further details may be obtained from the *Annuaire du Conservatoire royal de Musique de Bruxelles,* of which the first number was published in 1877. G. C.

BRYCESON, BROTHERS. The house of Bryceson — now Messrs. Bryceson Brothers & Morten — was founded in 1796 by Henry Bryceson. Amongst their instruments may be mentioned those at the Great Concert Hall, Brighton ; the Pro-Cathedral, Kensington ; St. Michael's, Cornhill ; St. Peter and St. Paul, Cork ; and that for Mr. Holmes, Primrose Hill Road, afterwards in the Albert Palace, Battersea.

BRYNE, ALBERTUS, organist, born about 1621, received his musical education from John Tomkins, organist of St. Paul's. It was probably on the death of his master in 1638 that Bryne obtained the same post, which he held until the Commonwealth. At the Restoration he was reappointed, a petition for the post of organist at Whitehall Chapel having been presented to the King on his behalf. After the great fire he became organist of Westminster, a post which he probably retained until the appointment of Blow in 1669. He is said to have died in that year, but there is evidence to prove that he was organist and fourth fellow of Dulwich College from 1671 to 1677. A 'Mr. Bryan' who was appointed organist of Allhallows', Barking, in 1676, with a salary of £18 per annum, may very possibly have been the same person. In *The Virgin's Pattern* (Life of Susanna Perwick), 1661, among the famous musicians of the time, mention is made of 'Albertus Bryne, that famous velvet-fingered organist.' A Morning and Evening Service by him are in many collections, and he wrote besides many sets of words for anthems, as well as dances, 'grounds,' etc. His name is variously spelt Bryan, Brian, and as above. (*Dict. of Nat. Biog.*, etc.) W. B. S.

BUCCINA. One of the instruments of the bugle type used in the Roman army. It was curved to nearly a circle, and the bell rested on the shoulder of the player. A specimen found at Pompeii, and now preserved at the National Museum at Naples, is pitched in G, and its proper tones therefore correspond with those of the modern French horn when crooked in G. [See CORNU, LITUUS, TUBA.] D. J. B.

BUCK, DUDLEY, born at Hartford, Connecticut, U.S., March 10, 1839, the son of a merchant, who intended him for a mercantile life. But the son, showing at an early age a taste for music, having in fact acquired by self-instruction a knowledge of the rudiments of the art with sufficient practical skill to be able to play the accompaniments for the masses of Haydn and Mozart, the father, realising the extent of Dudley's gifts, spared nothing to cultivate and ripen them. Dudley's first lessons on the piano were given him by Mr. W. J. Babcock of Hartford, at the age of sixteen. Being employed as a substitute for the regular organist at St. John's Church, Hartford, he gave such satisfaction that he retained the position until his departure for Europe in 1858. Before leaving home he entered Trinity College, Hartford, where he remained three years. Five years were passed in Europe, eighteen months of which were spent at Leipzig, where he studied theory and composition under Hauptmann and Richter, orchestration and musical form under Rietz, and the piano under Plaidy and Moscheles. Among his fellow-pupils at the Conservatorium were Arthur Sullivan, J. F. Barnett, Walter Bache, and Carl Rosa. In order to increase his knowledge of Bach he then went to Schneider of Dresden. Rietz being called thither at the same time to direct the Royal Opera, Buck was enabled to continue his studies under him. A year was also spent at Paris. Returning to Hartford in 1862, he was appointed organist at the North Congregational Church. His plans for seeking employment in a larger field were frustrated by the death of his mother in 1862. His father dying in 1867, Buck went to Chicago in 1869, where he held the position of organist at St. James's Church for three years, his reputation as a performer and composer steadily growing during this period. The great fire at Chicago, Oct. 9, 1871, destroyed his house, with a large library, including several important compositions in manuscript. Buck then removed to Boston, where he was appointed organist at St. Paul's Church and for the Music Hall, and subsequently at the Shawmut (Congregational) Church. F. H. J.

In 1875 Theodore Thomas invited him to remove to New York as assistant conductor of his orchestral concerts at Central Park Garden. He accepted the invitation and took up his residence in the adjoining city of Brooklyn, now a part of the municipality of New York. In the same year, 1877, he became conductor of the Apollo Club and organist and choirmaster of Holy Trinity Church. He is still active in the former position (in March 1903), but retired from Church work in Feb. 1903. Though the list of Mr. Buck's published compositions is large, some of his most important works have not yet been brought forward in print. Among them are a grand opera, 'Serapis' (for which he also wrote the book) ; a comic opera, 'Deseret,' treating a Mormon theme, performed in New York and other cities in 1880 ; a symphony in E flat, two string quartets, a concertino for four horns and orchestra (op. 71), and a symphonic overture on Scott's *Marmion*. His largest published works are two oratorios : 'The Golden Legend,' which won the prize offered by the Musical Festival Association of Cincinnati in 1880, and was performed at the biennial festival in May of that year ; and 'The Light of Asia,' the words taken from Sir Edwin Arnold's poem,

published by Novello, Ewer, and Co. in 1885, performed at Novello's oratorio concerts, St. James's Hall, March 19, 1889. Works of dignified form but smaller dimensions are 'The Legend of Don Munio,' 'The 46th Psalm,' 'Hymn to Music,' 'The Voyage of Columbus,' and 'The Centennial Meditation of Columbia,' all for mixed voices and orchestra. He was invited to write the last by the United States Commission for the International Exposition held in Philadelphia in 1876. It was performed, under the direction of Theodore Thomas, by a chorus of 1000 voices and an orchestra of 200 in May 1876. Mr. Buck has written voluminously for choirs of men's voices, impelled thereto by long and intimate association with such organisations. In the list of these compositions are 'The Nun of Nidaros,' 'King Olaf's Christmas,' 'Chorus of Spirits and Hours' (from Shelley's *Prometheus Unbound*), and 'Paul Revere's Ride.' His latest published works are a series of short sacred cantatas with organ accompaniment which admirably attest the practical nature of his gifts. They are designed for church festival use, and are called 'The Coming of the King' (for Christmastide), 'The Story of the Cross' (Good Friday), 'Christ the Victor' (Easter Sunday and Ascension). In treating his material Mr. Buck seems to have had the ancient *Cantus Passionis* in mind, and has not hesitated to use dramatic characters and forms. He has also imitated the authors of the Protestant 'Passions' by enlisting the co-operation of the congregation in the singing of appropriate hymns. From the modern lyric drama he has borrowed the device of a typical or characteristic theme which enters into all the works and binds them together. To this class of compositions belong also a short cantata 'The Triumph of David,' and a 'Midnight Service for New Year's Eve.' A large number of songs, anthems, services, and organ pieces must be passed over in this review, but mention is due to a pedagogic work, *Illustrations in Choir Accompaniment*. It will have been observed that Mr. Buck has composed in all forms. His long association with the Church has strongly tinctured his musical thought. He is not pedantic or ecclesiastical in the sense of being severe, stiff, and angular, however. On the contrary he has liberal notions on the subject of church music, and aims to hit a popular but refined taste appreciative at once of the need of dignity and the value of emotion. His knowledge of the voice is admirable. The fact that he does not severely distinguish the styles frequently brings it to pass that his dramatic music (in his cantatas, for instance) shows the traces of ecclesiasticism, while his church music contains many instances of dramatic expression. H. E. K.

BUCK, ZECHARIAH, Mus.D., born at Norwich, Sept. 10, 1798, became in 1807 a chorister of Norwich Cathedral under Dr. Beckwith, and continued such under his son and successor, John Charles Beckwith. On the breaking of his voice he became an articled pupil of the latter, and, on the expiration of his articles, his partner as a teacher. [From 1818 to 1821 he was assistant organist of St. Peter Mancroft, and succeeded J. C. Beckwith as organist of the cathedral and master of the choristers in 1819.] The degree of Mus.D. was conferred upon him in 1853 by Dr. Sumner, Archbishop of Canterbury. He composed some church music, not remarkable for either quantity or quality; but although an indifferent player, and still more indifferent composer, he possessed an extraordinary faculty for training choir boys, and was also an able teacher of the organ. [For some amusing anecdotes of his methods see West's *Cathedral Organists*, p. 64.] Many of his pupils obtained posts as organists. He resigned his appointments in 1877, and died at Newport, Essex, August 5, 1879. [A memoir by Frederick G. Kitton was published in 1899.] W. H. H.

BÜLOW, HANS GUIDO VON, born Jan. 8, 1830, at Dresden. The foremost pianist of that most advanced school of pianoforte-playing, founded by Chopin and developed by Liszt. A first-rate conductor, and a musician whose technical attainments and complete knowledge of the art from its germs to its very latest development were rivalled by few contemporaries and surpassed by none. As a pianist his repertoire embraced the master works of all styles and schools, from the early Italians to the present day; it would in fact be difficult to mention a work of any importance by any composer for the pianoforte which he did not play in public, and by heart. His prodigious musical memory enabled him also as a conductor to perform feats which had never before been attempted, and will in all likelihood not be imitated. The distinctive peculiarity of both his playing and conducting may be set down as a passionate intellectuality. All details were thought out and mastered down to the minutest particle; all effects were analysed and calculated with the utmost subtlety, and yet the whole left an impression of warm spontaneity. This is the highest praise which can be awarded to an executant. It does not, perhaps, apply to all of Bülow's appearances in public, but it applies strictly to his performances at their best; and it is but bare justice to measure the achievements of a great artist as one measures a mountain chain, by the peaks rather than by the valleys. The analytical and reconstructive powers just emphasised render his editions of classical pianoforte works, such as those of Beethoven's sonatas, variations, and bagatelles, from op. 53 onwards, of Cramer's studies, of selections from Sebastian and Emanuel Bach, from Handel, Scarlatti, etc. —in which he has indicated the most refined phrasing and fingering, as well as the most minute nuances of tempo and expression, and

has corrected presumable misprints and inaccuracies—unique and invaluable to the student.

In addition to these his admirable pianoforte arrangement of the most intricate score in existence, Wagner's 'Tristan und Isolde,' together with that of the overture to 'Die Meistersinger' and 'Eine Faust-Ouvertüre,' as well as the arrangements of Weber's two concertos and the concertstück for pianoforte solo, should be mentioned.

In early youth Von Bülow seems to have shown neither talent for music nor delight in it. Both gifts first made their appearance after a long illness, but then in a supreme degree. After his ninth year he was placed under Friedrich Wieck, the father of Clara Schumann, who laid the solid foundations for his future technical achievements. From about 1841 to 1845 he studied with Hesse, Hauptmann, Plaidy, and M. K. Eberwein. [His parents were at Stuttgart from 1846 to 1848, and here Hans made the acquaintance of Raff, Molique, and others.] In 1848 he entered the university of Leipzig to commence the study of jurisprudence, his parents having always looked upon music as a mere pastime. At Leipzig he continued his studies in counterpoint under Hauptmann. [He met Liszt for the first time in June 1849 at Weimar.] In Oct. 1849 we find him a member of the university of Berlin, absorbed in the political movements of the time, and contributor to a democratic journal *Die Abendpost.* In this paper he first began to announce and defend the musical doctrines of the new German school led by Liszt and Wagner. A performance of 'Lohengrin' at Weimar in 1850 under Liszt moved him so intensely that he threw over his career as a lawyer, went to Zürich and entrusted himself to the guidance of Wagner. [After some more or less tentative experiments in theatrical conducting at Zürich and St. Gall (1850-51)], he went, in June 1851, to Weimar to study pianoforte-playing under Liszt, and in 1853 made his first concert tour, playing at Vienna, Pesth, Dresden, Carlsruhe, Bremen, Hamburg, and Berlin. From 1855 to 1864 he occupied the post of principal master of pianoforte-playing at the conservatorium of Professors Stern and A. B. Marx, at Berlin. Here we find him organising trio soirées, orchestral concerts, and pianoforte recitals, with programmes of the most varied character, though with a decided leaning towards the works of the new German school, writing articles for various political and musical papers, making journeys through Germany and the Netherlands, and Russia, and reaping laurels everywhere as player and conductor. In 1857 he married Liszt's daughter Cosima (afterwards the wife of Wagner). In 1864 he was called to Munich as principal conductor at the royal opera, and he became in 1867 director of the Conservatorium. It was there that he succeeded in organising model performances of Wagner's 'Tristan und Isolde' and 'Die Meistersinger von Nürnberg.' In 1869 he left Munich, [taking up his residence in Florence for some years; concert tours in different parts of the world filled up the chief part of his time; he appeared for the first time in England at the Philharmonic Concert of April 28, 1873; in America in 1875-76 he gave 139 concerts. On Jan. 1, 1878, he was appointed capellmeister of the Hoftheater at Hanover, and in October 1880 became Hofmusikintendant to the Duke of Meiningen. During the five years of his tenure of this post he did wonders with the orchestra, forming it into an unrivalled body of players. After his resignation of this appointment, in Oct. 1885, he directed various sets of concerts in Berlin, St. Petersburg, etc., and employed his exceptional talents as a teacher in the Raff Conservatorium at Frankfort, and in Klindworth's establishment in Berlin. He also conducted a Musical Festival at Glasgow in 1878. He took up his residence in Hamburg in 1888, in which year he appeared for the last time in London. Ill-health compelled him to undertake a journey to Egypt, and he died at Cairo, Feb. 12, 1894.] Among his most important compositions the following have been published:—op. 20, 'Nirwana, Symphonisches Stimmungsbild'; op. 10, Music to Shakespeare's 'Julius Cæsar'; op. 16, Ballade for Orchestra, 'Des Sänger's Fluch'; op. 23, 'Vier Charakterstücke für Orchester, (1) Allegro risoluto, (2) Notturno, (3) Intermezzo guerriero, (4) Funerale.' Among his pianoforte pieces especial attention should be called to his op. 21, 'Il Carnovale di Milano.'

[In 1895 appeared a most interesting volume of his early correspondence, edited by his widow, formerly Marie Schlanzer, whom he married in 1882. It was translated by Miss Constance Bache, and the English version was published in 1896.] E. D.

BÜRDE-NEY, Jenny, whose maiden name was Ney (said by Pougin to be a relative of Marshal Ney), was born Dec. 21, 1826, at Gratz. She was taught singing by her mother, herself a singer, and first appeared in opera at Olmütz (1847), afterwards at Prague, Lemberg, and Vienna (1850-53), and finally at Dresden. In the last-named city, where she first appeared Dec. 1853, as Valentine, she attained a great reputation as the successor of Schroeder-Devrient, and was engaged there until her retirement from the stage in 1867, having in the meanwhile married, Jan. 31, 1855, Paul Bürde, an actor at the same theatre. In 1855-56 she was engaged at the Royal Italian Opera, Covent Garden, and Lyceum. She first appeared April 19, 1855, as Leonora ('Fidelio'), on the occasion of the state visit of Her Majesty and the Emperor and Empress of the French, on whose account no attention was paid to the singer. She repeated

this part twice, but was very coolly received. Professor Morley remarked her performance with favour in his *Journal of a London Playgoer.* On May 10, 1855, she was better received as Leonora on the production in England of 'Trovatore,' the only other part she played during her engagement. She also sang with some success at the Philharmonic. 'It would be hard . . . to name a soprano voice more rich, more sweet, more even than hers. It was a voice better taught, too, than the generality of German voices —a voice delivered without force and inequality, —with due regard to beauty of tone and grace in ornament. But the new language and accent hampered Madame Ney; and her powers as an actress here seemed to be only limited' (Chorley). She died May 17, 1886. A. C.

BUGLE (Eng. and Fr.; Germ. *Flügelhorn,* Ital. *Tromba*). A treble instrument of brass or copper, differing from the trumpet in having a shorter and more conical tube, with a less expanded bell. It is played with a cupped mouthpiece. In its original form the bugle is the signal horn for the infantry, as the trumpet is for the cavalry; formerly it was usually tuned in C, with an extra B♭ crook. The regulation bugle of the British Army is now in B♭ only, and, as it is treated as a transposing instrument, the calls are still written in the key of C. Only five sounds are required for the various calls and signals. These are the intermediate open notes of the tube, from C below the treble stave to G above it. Eight sounds, however, can in all be obtained, by the addition of the B♭ and C above high G, and the octave of the lowest C, which though feeble and of poor tone is the real fundamental note. With these additions the entire compass is as follows:—

Two methods have been adopted for bridging over the gaps between the open notes of this instrument, viz. keys and valves. W. H. S.

In 1810 Joseph Halliday, the bandmaster of the Cavan Militia, patented an invention by which keys controlling side holes were added to the bugle, so that the chromatic degrees between the second and third harmonics, *c′* to *g′*, were obtained. The key-bugle, called also the 'Kent bugle' from the Duke of Kent, and 'Regent's bugle,' became extremely popular, and from about 1820 to 1835 was, next to the clarinet, the principal solo instrument in military bands. At about the latter date it began to be superseded by the cornet-à-pistons as a solo instrument, but the valve-bugle or modern flügelhorn might well take a more prominent part in our bands than it does. As in the valve instrument every note speaks from the bell, it possesses more uniform quality than the key-bugle, yet the latter had perhaps some advantage of clearness in shakes and rapid passages.

To the ordinary bugle as made in C a valve attachment is sometimes added, converting it into a valve instrument pitched either in B♭ or in E♭, a fifth lower. This contrivance was patented by Henry Distin, and is useful for bugle bands. D. J. B.

BUHL, JOSEPH DAVID, born near Amboise 1781, trumpeter, son of a musician in the service of the Duc de Choiseul. He was successively a member of the band of the 'Garde Parisienne,' organised 1792, and of the Consuls' 'Grenadiers de la Garde.' He was also professor at the cavalry school of trumpeters at Versailles, from its foundation in 1805 to its abolition in 1811. In 1814 he was appointed by Louis XVIII. conductor of the band of the Gardes du Corps, and received the Legion of Honour. In 1816 he became first trumpeter at the Opéra, and at the Théâtre Italien; but owing to an accident at the coronation of Charles X. was compelled to relinquish both appointments in 1825. In 1823 Buhl introduced into France the slide-trumpet (à coulisse), invented by Haltenhoff of Hanau. He published a *Method for Trumpet* (Paris, Janet), and was editor of the *Ordonnance des Trompettes.* M. C. C.

BULL, JOHN, Mus.Doc., [was, according to Anthony Wood, 'of the same family, as it seems, with those of his name in Somersetshire.' There was a family of Bulls settled at Peglinch or Peylinch in the parish of Wellow, in the 16th century, but it is uncertain whether the composer belonged to this branch. According to the date on his portrait at Oxford he was born about 1562.] He was educated in Queen Elizabeth's Chapel under William Blitheman. On Dec. 24, 1852, he was appointed organist of Hereford Cathedral and afterwards master of the children. In January 1585 he was admitted a member of the Chapel Royal, and in 1591, on the death of his master, succeeded him as organist. [The office of organist as a separate appointment did not then exist, but that Bull acted as organist within a year of Blitheman's death is proved by entries in the Chapel Royal Cheque Book on May 29, 1592, recording the appointment as gentleman-extraordinary of William Phelps of Tewksbury 'for his care [and] kindnes to Mr. Bull, Organiste in her . . . Majesties Chappell,' 'Mr. Doctor Bull . . . beinge robbed in those parts.'] On July 9, 1586, he was admitted Mus.Bac. at Oxford, 'having practised in that faculty fourteen years,' and on July 7, 1592, was incorporated Mus.Doc. in the same University, having previously taken the degree at Cambridge. [On April 20, 1591, he petitioned Queen Elizabeth for a lease in reversion of the yearly value of £30, 'to relieve his great poverty which altogether hinders his studies.' This document is preserved at Hatfield, and an endorsement on it shows that he obtained a lease of the yearly value of 20 marks. In 1596, upon the

recommendation of the Queen,] Bull was the first appointed Music Professor in Gresham College, and, although unable to compose and read his lectures in Latin, according to the founder's original intention, such was his favour with the Queen and the public, that the executors of Sir Thomas Gresham, by the ordinances bearing date 1597, dispensed with his knowledge of the Latin language and ordered 'The solemn music lecture twice every week, in manner following, viz. the theoretique part for one half-hour, or thereabouts, and the practique, by concert of voice or instruments, for the rest of the hour, whereof the first lecture should be in the Latin tongue and the second in English; but because at this time Mr. Dr. Bull, who is recommended to the place by the Queen's Most Excellent Majesty, being not able to speak Latin, his lectures are permitted to be altogether in English, so long as he shall continue in the place of music lecturer there.' [His inaugural address was delivered on Oct. 6, 1597, and was printed by T. Easte; no complete copy of it is known to exist, but the title-page has been preserved in the Bagford Collection (Brit. Mus. Harl. MS. 5936, fol. 118b). It reads as follows: 'The oration of Maister | Iohn Bull, Doctor of Mu- | sicke, and one of the Gentle- | men of hir Maiesties Royall | Chappell. | *As hee pronounced the same, bee-* | fore diuers Worshipfull persons, | *Th'Aldermen & commoners of the Citie* | Of London, with a great Multitude of | *other people, the 6. day of October.* | 1597. | In the New erected Colledge of Sir *Thomas Gresham* Knight, deceased: Made in the Commenda- | *tion of the saide worthy Founder, and the* | excellent Science of Musicke. | *Imprinted at London by* | Thomas Easte.']. In 1601 Bull went abroad for the recovery of his health, and during his absence was permitted to substitute as his deputy, Thomas, son of William Byrd. He travelled into France and Germany, and Anthony Wood tells a story of a feat performed by him at St. Omer, where, to a composition originally in forty parts, he added forty more in a few hours. After the death of Elizabeth, Bull retained his post in the Chapel Royal, and his fame as an organist was widely spread. On Dec. 15, 1606, Bull was admitted into the freedom of the Merchant Taylors' Company by service, having been bound apprentice to Thomas, Earl of Sussex, who was free of the Company. [His name occurs in a list (dated Dec. 31, 1606) of persons to whom James I. ordered 'gold chains, plates, or medals' to be given.] On July 16, 1607, when the King and Prince Henry dined at Merchant Taylors' Hall, the royal guests were entertained with music, both vocal and instrumental. And while His Majesty was at table, according to Stowe, 'John Bull, Doctor of Musique, one of the organists of His Majesties Chappell-royall, and free of the Merchant-taylors, being in a citizen's gowne, cappe, and hood, played most excellent melodie upon a small payre of Organes, placed there for that purpose onley.' (*Chronicles*, edit. 1631, p. 891.) [On the day after this feast Bull and Nathaniel Giles (the Master of the children) were admitted into the livery of the Company. On Dec. 20 in the same year Bull resigned the Gresham Professorship (which was only tenable by unmarried men) and two days later he] obtained from the Bishop of London a marriage licence for himself and 'Elizabeth Walter of the Strand, maiden, aged about 24, daughter of —— Walter, citizen of London, deceased, she attending upon the Rt. Hon. the Lady Marchioness of Winchester.' They were to marry at 'Christ Church, London.' In 1611 he was in the service of Prince Henry, and his name stands first on the roll of the Prince's musicians, with a salary of £40 per annum. [For the marriage of Princess Elizabeth and the Prince Palatine (Feb. 14, 1612-13) he wrote an anthem to the words of the Benediction, beginning 'God the Father, God the Son.'] The old Cheque Book of the Chapel Royal records under date of 1613 that 'John Bull, Doctor of Musicke, went beyond the seas without license, and was admitted into the Archduke's service, and entered into paie there about Michaelmas.' It seems that he had been preparing for this step some months previously, for in the British Museum (Add. MS. No. 6194) is preserved a letter from Dr. Bull to Sir M. Hicks, wishing his son's name to be inserted instead of his own in some patent dated April 26, 1612. [According to Ward, Bull left England owing to his 'being possess'd with crotchets as many musicians are,' but in a letter (dated May 30, 1614, Add. MS. 6194) from Trumbull, the British minister at Brussels, to James I., the writer says that he had informed the Archduke 'that it was notorious to all the world, the said Bull did not leave your Majesties service for any wrong done unto him, or for matter of religion, under which fained pretext he now sought to wrong the reputation of your Majesties justice, but did in that dishonest manner steal out of England through the guilt of a corrupt conscience, to escape the punishment, which notoriously he had deserved, and was designed to have been inflicted on him by the hand of justice, for his incontinence, fornication, adultery, and other grievous crimes.' On leaving England Bull went to Brussels, where he became one of the organists in the Archduke's chapel, under Géry de Ghersem. In 1617 he was appointed organist of Antwerp Cathedral in succession to Rumold Waelrent. The Chapter Act-Books record payments to him in Feb. 1619-20, and again in the same month of 1622-23 of sums of 12 *Livres d'Artois* (florins). In 1620 he was living in a house adjoining the south door of the Cathedral. He died at Antwerp on March 12 or 13, 1628, and on the 15th was buried on the south side of Notre Dame.]

A portrait of Bull is preserved in the Music School Collection at Oxford. It is painted on panel, and represents him in the habit of a bachelor of music. On the left side of the head are the words, 'An. Ætatis svæ 27, 1589,' and on the right side an hour-glass, upon which is placed a human skull, with a bone across the mouth. Round the four sides of the frame is written the following homely distich:—

> The bull by force
> In field doth raigne:
> But Bull by skill
> Good will doth gayne.

[Another portrait of him, a half-length taken in later life, is in the possession of Dr. Cummings. A list of MSS. containing compositions by Bull will be found in Ward's *Lives of the Gresham Professors* (1740). Some of these can be traced at the present day, but two important volumes seem to have disappeared. They are (1) No. 16 in Pepusch's Catalogue. A large quarto written by Gulielmus a Messaus, organist of St. Walpurga, Antwerp, between April 6 and Oct. 20, 1628, containing (*inter alia*) thirty-eight organ and virginal pieces by Bull; (2) The first volume of Pepusch's No. 18. The second volume is now in the British Museum (Add. MS. 23,623). The missing volume contains twenty-four pieces by Bull. It was formerly in the possession of Richard Clark, and contains the composition upon which was based the claim made on behalf of Bull to the authorship of 'God save the King' (see God save the King; also the *Musical Times* for 1878). Amongst the other works mentioned by Ward, Pepusch's No. 13 ('Deus omnipotens') is to be found in a MS. written by John Baldwin, now in the Royal Library at Buckingham Palace; it is an arrangement of the 'Star' anthem. As far as can be ascertained, the following is a list of Bull's vocal compositions now extant:—

1. 'Almighty God.' The 'Star' Anthem, for voices and viols. (Printed by Boyce as 'O Lord my God.')
2 and 3. 'Attend unto my Tears.' (Two settings, for 4 voices and lute and for 5 voices respectively. In Leighton's 'Teares or Lementacions of a sorrowful Soule,' 1614.)
4. 'Fraile man despise the treasures of this life.' (Brit. Mus. Add. MSS. 29,372-5. Pepusch's No. 5 in Ward's List.)
5. 'How joyful and how good.' (Ch. Ch. MSS. Oxford.)
6. 'Deliver me, O God.' (Barnard's 'Church Musick,' 1641.)
7. 'Den lustelijcken Mey.' ('Laudes Vespertinæ B. Mariæ Virginis.' Phalèse, Antwerp, 1629.)
8. 'In the departure of the Lord.' (Leighton's 'Teares,' 1614.)
9. 'In Thee, O Lord.' (Barnard's 'Church Musick,' 1641.)

Of Bull's instrumental pieces (mostly for organ or virginals, but including a few compositions for viols) nearly 150 are in existence. They are to be found in 'Parthenia' (a collection of pieces for virginals by Bull, Byrd, and Gibbons, printed early in the 17th century); in the 'Fitzwilliam Virginal Book' (published by Breitkopf & Härtel, Leipzig, 1899, 2 vols.); in the following MSS. in the British Museum: Additional MSS. 10,444, 11,586, 23,623, 29,401, 30,485, 31,403, 31,723, and 36,661. Also in the Imperial Library, Vienna (No. 17,771); at Berlin (Royal Library, MS. 191); the Public Library, New York; in the Library of the Royal College of Music; at Christ Church, Oxford, and the Royal Library at Buckingham Palace. In the last-named collection there is a volume of unsolved Canons by Bull. A copy of Holborne's 'Cittharne School,' which formerly belonged to him, is in the University Library, Cambridge.

Bull's merits as a composer have been dealt with by Dr. Willibald Nagel (*Geschichte der Musik in England*, ii. (1897), p. 155, etc.) and Dr. Seiffert (*Geschichte der Klaviermusik* (1899), p. 54, etc.). His music is very unequal, and generally is more ingenious than beautiful. The most striking examples of his innovations, both rhythmic and harmonic, are to be found in an 'Ut, re, mi' (Fitz. Virg. Book, vol. i. p. 183). But as an executant he occupied a place in the first rank. He has been aptly termed 'the Liszt of his age,' and he belongs to the group of composers who did much to develop harpsichord music. In this respect his connection with Sweelinck is of interest, and the fact that the great Amsterdam organist included a Canon of Bull's in his work on composition, and that Bull wrote a fantasia on a fugue of Sweelinck's within a few months of the death of the latter, seems to show that the two men were on terms of personal friendship.]

The above is founded on Dr. Rimbault's article in the original edition: corrections and additions (in square brackets) by W. B. S.

BULL, Ole Borneman, a remarkable violin virtuoso, was born Feb. 5, 1810, at Bergen in Norway, where his father practised as a physician. Some members of the family, especially an uncle, were very musical, and at the frequent meetings held for quartet-playing, the boy became early familiar with the masterpieces of Haydn, Mozart, and Beethoven. Without having regular instruction he soon tried his hand at fiddling, and made such progress as to enable him not only to take part in these domestic practices, but also to play first violin in the public orchestra. His first teacher was Paulsen, a Dane, and later on he received some instruction from a pupil of Baillot's, a Swede named Lundholm, who had settled at Bergen. In the main, however, he was a self-taught player. His individuality was so strongly marked as to leave but little room for the direct influence of a teacher. He was himself a true son of the North, of athletic build and independent character; and the ruling passion of his life was the love he bore to his native land. The glorious scenery of the mountains and fjords of his home, the weird poetry of the Sagas of the North, took hold of his sensitive mind from early childhood and filled his imagination. They were reflected in his style of playing, and gave to it that originality and poetic charm by which he never failed to captivate his audience. His father did not approve of a musical career, and, after having gone through the grammar school at Bergen, Ole

Bull was sent to the university of Christiania to study theology. Very soon, however, we find him the conductor of a musical and dramatic society in that town. At this time political feeling ran high in Norway, and he appears to have taken some part in the agitation. At all events he suddenly left the country in 1829 and went to Cassel to satisfy an ardent desire of seeing and hearing Spohr, for whose violin compositions he had a sincere admiration. Spohr appears to have behaved somewhat coldly to the rather eccentric and, to him, utterly unknown young enthusiast, and the latter left Cassel much disappointed. He made a short stay at Göttingen, where his boisterous manner involved him in a duel, and then returned to Norway, where he played with much success at public concerts in Bergen and Trondjhem. But it was not till he went to Paris in 1831 that his powers as an executant were fully developed. He failed to gain admittance to the Conservatoire, but it was then that he first heard Paganini, and this constituted, as he himself used to declare, the turning-point of his life. Paganini's playing made an immense impression on him, and he threw himself with the utmost vigour into the pursuit of technical studies in order to emulate the feats performed by the great Italian virtuoso. Meanwhile his limited means were exhausted, and being too proud to ask for further assistance from his father, and failing to get an appointment in one of the orchestras, he fell into serious difficulties. According to one report he attempted in a fit of despair to commit suicide by throwing himself into the Seine; according to another he was attacked by a severe illness brought on by low living and mental anxiety. Fortunately at this time he came under the motherly care of a benevolent Parisian lady, who nursed him, and whose daughter he afterwards married. After his recovery he made his first appearance in Paris (April 18, 1832), assisted by Chopin and Ernst, and then started for Italy, where he created a perfect furore. From this time to the end of his life he continued travelling all over Europe and North America, taking now and then a summer's rest in his native country. He played first in London, May 21, 1836; at the Philharmonic, June 6, and during the next sixteen months he gave 274 concerts in England, Scotland, and Ireland. In 1843 he went to America for the first, and in 1879 for the fifth and last time. His success and popularity in the States were unbounded, and he began to amass a considerable fortune. He frequently revisited his native land, and made himself a beautiful home near Bergen. [On his return to Norway in 1845, he formed a scheme for the establishment of a Norse theatre at Bergen, and brought it to actual fulfilment in 1850.] To the end of his life he retained a passionate love for the North and his country-men; and, touched by the abject poverty of many of them, he conceived the idea of founding a Norwegian colony in the States. With a view to the execution of this scheme he acquired a large tract of land (125,000 acres), but, though he was not without natural shrewdness in business matters, he unfortunately fell into the hands of swindlers, who sold to him what was really the property of a third party. Bull was in consequence involved in a troublesome and expensive lawsuit, by which he lost a great part of his capital. But, nothing daunted, he resumed travelling and playing to replace what was lost. [He tried to found an academy of music in Christiania, but it had no lasting result. In 1870 he married an American lady,] and on Feb. 5, 1880, he celebrated his seventieth birthday in America; on August 17 of the same year he died at his country seat at Lysö, near Bergen. His death was deplored as a national loss.

Ole Bull was a man of remarkable character and an artist of undoubted genius. Tall, of athletic build, with large blue eyes and rich flaxen hair, he was the very type of the Norseman, and there was a certain something in his personal appearance and conversation which acted with almost magnetic power on those who approached him. At the same time it cannot be denied that we find in him unmistakable traits of charlatanism, such as when he seriously relates (see his Biography, by Sara Bull) that his 'Polacca guerriera' was 'first conceived while gazing alone at midnight on Mount Vesuvius flaming through the darkness,' or when he played the fiddle on the top of the great Pyramid!

Spohr, who was by no means prepossessed in his favour, writes of him in his autobiography:—'His playing in chords and the certainty of his left hand are admirable, but, like Paganini, he sacrifices too many of the noble qualities of the violin to his tricks. His tone, on account of the thinness of the strings he uses, is bad; and owing to the use of an almost flat bridge he can, on the 2nd and 3rd strings, play in the lower positions only, and then only *piano*. Hence his performances, whenever he does not execute his tricks, are monotonous. We experienced this in his playing of some of Mozart's quartets. At the same time he plays with much feeling, if not with cultivated taste.'

This criticism, as far as it goes, no doubt is fair and correct; but it entirely ignores those peculiarities of Ole Bull's talent which constitute his claim to an eminent position among modern violinists, and explain his success. In the first place his technical proficiency was such as very few violinists have ever attained to. His playing in double-stoppings was perfect; his staccato, upwards and downwards, of the utmost brilliancy; and although he can hardly be considered a serious musician in the highest sense of the term, yet he played with warm and poetical, if somewhat sentimental, feeling. He has often

been described as the 'flaxen-haired Paganini,' and, as we have seen, he was to a certain extent influenced by the great Italian. But his imitation hardly went beyond the reproduction of certain technicalities, such as an extensive use of harmonics, pizzicatos with the left hand, and similar effects. In every other respect the style of the two men was as different as the colour of their hair. While Paganini's manner reflected his passionate Southern nature to such an extent that his hearers felt as under the spell of a demon, Ole Bull transferred his audience to the dreamy moonlit regions of the North. It is this power of conveying a highly poetical charm —a power which is absolutely beyond any mere trickster or ordinary performer—that redeems him from the reproach of charlatanism. His rendering of Scandinavian airs never failed to charm and move, and his *tours de force*, if they raised the smile of the musician, invariably carried away his audience. He appears to have been conscious of his inability to do justice to serious music—at least he never, with the exception of one or two movements of Paganini, played anything but his own compositions. His private rendering of quartets is said to have proved the wisdom of this self-imposed restraint.

He used on his violin an almost flat bridge, an arrangement which enabled him to produce beautiful effects by the playing of chords and passages in four parts, but which had the obvious disadvantages already mentioned. His bow was of unusual length and weight, such as no man of smaller stature and strength could effectively or comfortably wield.

Three only of his numerous compositions appear to have been published: a set of 'Variazioni di bravura,' 'La Preghiera d'una madre,' and a 'Notturno.' The rest consisted of two concertos and other solo pieces, of which a 'Polacca guerriera' appears to have been his *cheval de bataille.* The titles of others, such as 'The Niagara,' 'Solitude of the Prairies,' 'To the memory of Washington,' betray their American origin.

The dates and main facts contained in this article are taken from the biography of Ole Bull by his second wife, Sara C. Bull (1886). P. D.

BUNGERT, August, born at Mülheim a/d Ruhr, March 14, 1846, was at first a pupil of Ferdinand Kufferath, and studied at the Cologne Conservatorium, 1860-62. In 1869 he was music-director at Kreuznach, but in 1873-81 applied himself anew to the study of counterpoint under Kiel. A quartet for piano and strings gained a prize offered by the Florentine Quartet in 1878. The composition of piano pieces, songs, and several orchestral works ('Tasso,' 'Hohes Lied der Liebe,' and 'Auf der Wartburg') occupied him until in 1884 a comic opera, 'Die Studenten von Salamanka' was produced at Leipzig. He has more recently undertaken to write and compose a tetralogy of operas, 'Die Homerische Welt,' the fourth of which, 'Odysseus' Heimkehr,' was produced at Dresden in 1896. It stirred a considerable amount of dispute as to its musical, poetic, and dramatic merits; but the next section to be made public, 'Kirke' (Dresden, Jan. 29, 1898) seems to have been conspicuously less successful than the other, which was given a good many times and attracted much attention. Another section, dealing with the death of Ulysses, is announced for the winter of 1903-4. Bungert's methods are very definitely based upon those of Wagner, and he understands a good deal of the art of stage effect. M.

BUNN, Alfred, manager and dramatic author, born probably April 8, 1796 or 1797, was for a quarter of a century director, and during the greater part of that time lessee, of Drury Lane Theatre. Elliston gave him his first appointment as stage-manager of Drury Lane in 1823, when he was quite a young man; in 1826 he was manager of the Birmingham Theatre, and in 1833 held the same post at Drury Lane and Covent Garden. He first obtained a certain celebrity as a manager by endeavouring in about 1835 to establish an English Opera. 'The Maid of Artois,' and a few years later 'The Bohemian Girl,' 'The Daughter of St. Mark,' and other operas by Balfe, were produced at Drury Lane under Bunn's management; and for the first of these works Mme. Malibran was engaged at the then unprecedented rate of £125 a night. Bunn also brought out Benedict's 'Brides of Venice' and Vincent Wallace's 'Maritana.' For most of these operas Bunn himself furnished the libretto, which however was in every case of French origin. He was the author or adapter of a good many dramas and farces, including 'The Minister and the Mercer,' a translation of Scribe's 'Bertrand et Raton,' which, on its first production, obtained remarkable success. He was notorious, not only for his remarkably poor poetry, but for various literary and theatrical squabbles. He received damages in 1836 for an assault committed by Macready, and his 'Word with Punch,' a bitter satire, obtained something like fame; it is a bibliographical rarity. On Dec. 17, 1840, he was declared a bankrupt. In the latter year he published a volume of memoirs, under the title of *The Stage.* In later life he became a Roman Catholic, and died of apoplexy at Boulogne, Dec. 20, 1860. (*Dict. of Nat. Biog.*) [See Drury Lane.] H. S. E.

BUNNING, Herbert, composer and conductor, is the son of a shipowner; was born in London, May 2, 1863, and was educated at Harrow. Matriculated at Brasenose College, Oxford, and entered the army through the Royal Military College, Sandhurst, as a university candidate, obtaining a commission in the 4th Queen's Own Hussars in 1884. After two years' service he resigned his commission in

order to devote himself entirely to his favourite pursuit, music.

From his earliest childhood his love of music made itself manifest. His musical studies began in London with Herr Bruno Schurig, continued at Hanover under Herr Engel (Director of the Conservatorium), and at Harrow under Mr. John Farmer. He subsequently studied in France, and in Italy (Milan) under Cavaliere Cesare Dominicetti, and at his death, under Cavaliere Vincenzo Ferroni, both holding the chair of Alta Composizione at the Milan Conservatorio.

He was appointed musical director of the Lyric Theatre in 1892. During 1892-93, Charles Lecocq's 'Incognita,' I. Albeniz's 'Magic Opal,' and Goring Thomas's 'Golden Web' were produced under his direction. He subsequently conducted at the Prince of Wales's Theatre during the years 1894-96.

His compositions include, 'Lodovico il Moro,' a scena for baritone and orchestra sung by Eugene Oudin at a Saturday concert at the Crystal Palace, 1892; a prelude for orchestra written for the third act of 'Incognita,' and produced at the Lyric Theatre in the same year; a 'Village Suite,' for orchestra, produced at a Crystal Palace Saturday concert (published by Oertel & Co.); two overtures for orchestra; 'Mistral' and 'Spring and Youth,' both produced in 1897, the first at Manns's benefit concert at the Crystal Palace, and the second at a concert of the Philharmonic Society; the 'Shepherd's Call,' an intermezzo for horn and strings, played for the first time at the Lyric Theatre in 1893; besides numerous vocal and instrumental publications.

The chief event of his musical life was the production of his opera 'Princess Osra' at Covent Garden Theatre on July 14, 1902 (published by Enoch & Co.). As an operatic composer he may be described as original, with modes of musical thought acquired by residence and study abroad. When in the lyrical vein he writes with rare distinction and delicacy, and with a tinge of Gallic sentiment. His aims in the more dramatic pages are those of modern musical Italy. Much is to be hoped and expected from Mr. Bunning in the future. W. W. C.

BUNTING, Edward, son of an English engineer and an Irish lady, born at Armagh in February 1773. He was educated as an organ and pianoforte player [studying the former instrument under William Ware, of St. Anne's Church, Belfast, and acting occasionally as his deputy, up to 1820, when he went to live in Dublin. His official position in Belfast was organist to the Second Congregation, Rosemary Street, from 1806 to 1817.—W. H. G. F.]. He distinguished himself for his love of Irish music, of which he published three collections. The first, 'A General Collection of the Ancient Irish Music,' etc., containing Irish airs 'never before published,' came out in 1796, published by Preston in London, and pirated by Lee in Dublin. A second edition, containing 75 additional airs (words by Campbell and others), and a dissertation on the Egyptian, British, and Irish Harps, appeared in 1809. A third collection, containing upwards of 150 airs, of which more than 120 were then for the first time given to the public, was published in 1840. This last collection is remarkable for a dissertation of 100 pages upon the history and practice of music in Ireland. According to this dissertation, 'the occasion which first confirmed him in his partiality for the airs of his native country was the great meeting of the Harpers at Belfast in 1792. Before this time there had been several similar meetings at Granard, in the county of Longford, which had excited a surprising degree of interest in Irish music throughout that part of the country. The meeting at Belfast was however better attended than any that had yet taken place, and its effects were more permanent, for it kindled an enthusiasm throughout the north which burns bright in some warm and honest hearts to this day. All the best of the old class of Harpers—a race of men then nearly extinct, and now gone for ever—Dennis Hempson, Arthur O'Neill, Charles Fanning, and seven others, the least able of whom has not left his like behind, were present.' Aided by O'Neill and the other harpers, Bunting immediately began to form his first collection. He travelled into Derry, Tyrone, and Connaught, where, especially in the last, he obtained a great number of excellent airs. His first and second collections contain the best Irish airs, although in his third there are several very good ones, and some very curious. Among these last are the '*caoinans* or dirges, and airs to which Ossianic and other old poems are sung,' and which the editor gives as 'very ancient'—many hundred years old. He afterwards endeavours to analyse the structure of Irish airs, and to point out their characteristics.

Bunting died in Dublin, Dec. 21, 1843, and was interred at Mount Jerome. His death was absolutely unnoticed. 'He was of no party, and therefore honoured of none, and yet this unhonoured man was the preserver of his country's music.' (*Dub. Univ. Mag.*, Jan. 1847; *Private Sources.*) [*Dict. of Nat. Biog.*] E. F. R.

BUONAMICI, Giuseppe, born at Florence Feb. 12, 1846, was taught the piano at first by his uncle, Giuseppe Ceccherini, and entered the Munich Conservatorium at the late age of twenty-two years, where he became pupil of Von Bülow for piano, and Rheinberger for composition; after a little more than two years' study he was appointed professor in the institution. In 1873 he returned to Florence as director of the choral society 'Cherubini,' and professor of the piano at the 'Istituto Musicale.' He founded a famous trio-party in Florence, and the cause of serious music-study in Italy has found in him a most ardent champion. He wrote some

chamber compositions during his residence in Munich, but his most important work is his admirable editions of pianoforte literature, and more particularly a set of studies on special difficulties in Beethoven (published by Venturini, Florence, and dedicated to the students at the English Royal Academy of Music), and an edition, much more recently published, of Beethoven's sonatas. These, as well as *The Art of Scale Study*, are published by Augener & Co. Another valuable work of his is an edition of 50 studies by Bertini, intended as preparatory to Bülow's edition of the Cramer studies. On rare occasions he has appeared as a pianist in London; the first time was at a concert of the London Musical Society on May 24, 1887, and the second at the Philharmonic concert of June 5, 1890. On the former occasion he played the 'Choral Fantasia' of Beethoven, and on the latter the same master's concerto in E flat. In 1892 and 1893 he gave single recitals in London, and his playing created a wholly favourable impression on those capable of judging. It is restrained and consummately artistic; his touch is exquisite, and his interpretations of Beethoven are of singular beauty. M.

BUONONCINI. See BONONCINI.

BURANELLO. See GALUPPI.

BURDEN or BURTHEN. Old songs and ballads frequently had a chorus or motto to each verse, which in the language of the time was called a Burden or Bob. One of the most ancient and most popular was 'Hey troly loly lo,' quoted in *Piers Plowman*, 1362, and other early songs. It occurs after every line of a song of the time of Edward IV. (Sloane MS. No. 1584); and in Isaac Walton's *Compleat Angler* is the burden of 'O the sweet contentment the countryman doth find.' In the ballad of 'Sir Eglamore,' which was very popular in the 17th century, the burden is 'Fa la, lanky down dilly.'

It is probable that the burdens were accompanied by motion or dancing. See *Much Ado about Nothing*, III. iv. 38. [BALLAD.] Burden also means the drone or bass of a bagpipe. [FAUX-BOURDON.] W. H. C.

BURGMÜLLER, NORBERT, composer; born at Düsseldorf, Feb. 8, 1810; son of the then music-director there, who died in 1824, well known and honoured as one of the founders and conductors of the Lower Rhine festivals. Norbert very early showed extraordinary musical talent. After leaving his father he studied at Cassel under Spohr and Hauptmann. But a sickly constitution prevented his full development, and he died at Aix-la-Chapelle May 7, 1836. He left much music behind him, of which two symphonies, an overture, and some other pieces were published by Kistner, all, notwithstanding their natural immaturity, manifesting great ability, lively imagination full of ideas, freshness of invention, and a strong feeling for classical form. There is every reason to believe that, if his life had been spared, concentration and strength would have come with years, and that Burgmüller would have reached a high place in his art. Schumann valued him greatly: he begins a memorial notice of him by saying that since the early death of Schubert nothing more deplorable had happened than that of Burgmüller (*Ges. Schriften*, iii. 145). His elder brother, Joh. Friedrich Burgmüller, born 1806 at Regensburg, died Feb. 13, 1874, at Beaulieu, Seine-et-Oise, wrote many pianoforte pieces, mainly intended for juvenile performers. A. M.

BURLA, or BURLESCA, a musical joke or playful composition; J. S. Bach's Partita 3, in A minor, contains a Burlesca as the fifth piece. Schumann has a Burla in op. 124, No. 12. [One of Richard Strauss's most agreeable works is a 'Burleske' for pianoforte and orchestra.] W. H. C.

BURLETTA, a droll or facetious musical drama or farce, which derives its name from the Italian verb *burlare*, 'to jest,' or 'to ridicule.' The burletta found its way from Italy through France to England. The most celebrated example produced in England was the BEGGAR'S OPERA in 1727, written by Gay, and adapted to the popular melodies of the day. In 1737 appeared 'The Dragon of Wantley,' by Henry Carey and Lampe, which succeeded so well that it was followed in 1738 by a second part or sequel, entitled 'Margery.' W. H. C.

BURMESTER, WILLY, violinist, born March 16, 1869, at Hamburg, was in the first instance a pupil of Joachim, but after four years of study in Berlin seceded in 1885 from the Joachim school and developed his technique upon 'virtuoso' lines. His programmes include all the styles, but his interpretation of the classic concertos and sonatas is somewhat cold, and he is best known as a Paganini player. He enjoys an enviable reputation on the continent, but has not yet conquered either the American or the English public. On his first visit to London (1895) his marvellous technical feats were admired, especially his left-hand pizzicato and rapid runs in thirds and tenths, but his intonation was pronounced uncertain; and on his second visit (1903) he played to very scanty audiences. But those present at the more recent performances were made aware that he has ripened into a very consummate master of the violin. He has been a considerable sufferer through having worn the end of his first finger down to the nerve. W. W. C.

BURNEY, CHARLES, Mus.Doc., was born at Shrewsbury, April 12, 1726, and educated at the free school there. He was subsequently removed to the free school at Chester, where he commenced his musical studies under Edmund Baker, the organist of the Cathedral. When about fifteen years of age he returned to his

native town, and for three years pursued the study of music, as a future profession, under his eldest half-brother James Burney, organist of St. Mary's, Shrewsbury. He was next sent to London, and for three years studied under Dr. Arne. He contributed some music to Thomson's 'Alfred,' produced at Drury Lane March 30, 1745. In 1747 he published six sonatas for two violins and bass. Shortly afterwards Fulke Greville paid Arne £300 to cancel his articles, and took Burney to live with him. In 1749 he was elected organist of St. Dionis-Backchurch, Fenchurch Street, and in the winter of the same year engaged to take the harpsichord in the 'New Concerts,' then recently established at the King's Arms in Cornhill. In 1749 he married Miss Esther Sleepe, who died in 1761. Eight years after her death he married Mrs. Stephen Allen of Lynn. In the following year he composed the music of two dramas—Mendez's 'Robin Hood,' and 'Queen Mab'—for Drury Lane. Being threatened with consumption, however, he could not continue these exertions, and, in 1751, accepted the situation of organist of Lynn-Regis, Norfolk, where he remained for the succeeding nine years. In this retreat he formed the design, and laid the foundation, of his future *History of Music.* In 1759 he wrote an Ode for St. Cecilia's Day, which was performed at Ranelagh Gardens. In 1760, his health being completely restored, he returned to London and again entered upon the duties of his profession.

Soon after his arrival in London, Burney published several concertos for the harpsichord which were much admired; and in 1766 he brought out at Drury Lane, with moderate success, both words and music of a piece entitled 'The Cunning Man,' founded upon, and adapted to the music of J. J. Rousseau's 'Devin du Village.' On June 23, 1769, the University of Oxford conferred upon him the degrees of Bachelor and Doctor of Music, on which occasion his exercise consisted of an anthem of considerable length, with overture, solos, recitatives, and choruses, which continued long to be a favourite at the Oxford Music Meetings, and was several times performed in Germany under the direction of Emanuel Bach. In the meantime, neither the assiduous pursuit of his profession, nor his many other engagements had interrupted his collections for his *History of Music.* He had exhausted all the information that books could afford him, and was far from what he desired. The present state of music could only be ascertained by personal investigation and converse with the most celebrated musicians of foreign countries, as well as his own. He resolved to make the tour of Italy, France, and Germany, and furnished with powerful letters of introduction from the Earl of Sandwich (a nobleman devoted to music) quitted London in June 1770. He spent several days in Paris, and then went by Lyons and Geneva (where he had an accidental interview with Voltaire) to Turin, Milan, Padua, Venice, Bologna, Florence, Rome, and Naples, consulting everywhere the libraries and the learned; hearing the best music, sacred and secular, and receiving the most cheerful and liberal assistance towards the accomplishment of his object. On his return to England, Dr. Burney published an account of his tour, in one volume, which was exceedingly well received, and deemed so good a model that Dr. Johnson professedly imitated it in his own *Tour to the Hebrides,* saying, 'I had that clever dog Burney's *Musical Tour* in my eye.' In July 1772, Dr. Burney again embarked for the continent to make the tour of Germany and the Netherlands, of which he published an account in two volumes. At Vienna he had the good fortune to make the intimate acquaintance of the celebrated poet Metastasio. Here he also found two of the greatest musicians of that age, Hasse and Gluck. From Vienna he proceeded through Prague, Dresden, and Berlin, to Hamburg, and thence by Holland to England, where he immediately devoted himself to arranging the mass of materials thus collected.

In 1773 Dr. Burney was elected an F.R.S.; and in 1776 the first volume of his *General History of Music* appeared in 4to. In the same year the complete work of Sir John Hawkins was published. Burney's subsequent volumes were published at unequal intervals, the fourth and last appearing in 1789. Between the two rival histories, the public decision was loud and immediate in favour of Dr. Burney. Time has modified this opinion, and brought the merits of each work to their fair and proper level—adjudging to Burney the palm of style, arrangement, and amusing narrative, and to Hawkins the credit of minuter accuracy and deeper research, more particularly in parts interesting to the antiquary and the literary world in general. Burney's first volume treats of the music and poetry of the ancient Greeks, the music of the Hebrews, Egyptians, etc. The second and third volumes comprise all that was then known of the biographies of the great musicians of the 15th, 16th, and 17th centuries. The fourth volume is perhaps less entitled to praise. Whole pages are given to long-forgotten and worthless Italian operas, whilst the great works of Handel and J. S. Bach remain unchronicled; the latter indeed is almost ignored.

When the extraordinary musical precocity of the infant Crotch first excited the attention of the musical profession and the scientific world, Burney drew up an account of the infant phenomenon, which was read at a meeting of the Royal Society in 1779, and published in the *Philosophical Transactions.* The commemoration of Handel in 1784 again called forth his literary talents; his account of these perform-

ances, published in 4to for the benefit of the musical fund, is well known to every musical reader. Dr. Burney also wrote *An Essay towards the History of Comets*, 1769; *A Plan for a Music School*, 1774; and the *Life and Letters of Metastasio*, 3 vols., 8vo, 1796. His last labour was on Rees's *Cyclopedia*, for which work he furnished all the musical articles, except those of a philosophical and mathematical kind. His remuneration for this was £1000, and as most of the matter was extracted without alteration from his *History*, the price was large.

During a long life Dr. Burney enjoyed the intimate acquaintance of almost every contemporary who was distinguished either in literature or the arts; with Johnson he was on terms of friendship; and it is known that soon after Johnson's death, he had serious thoughts of becoming his biographer. For many years Dr. Burney lived in St. Martin's Street, Leicester Square, in a house once the residence of Newton, and still standing; but in 1783, on being appointed organist of Chelsea College, he removed to a suite of apartments in that building, where he spent the last twenty-five years of his life in the enjoyment of independence, and of a family, each individual of which (thanks to their parents' early care and example) had attained high distinction in some walk of literature or science. 'In all the relations of private life,' says one of his biographers, 'his character was exemplary, and his happiness such as that character deserved and honoured. His manners were peculiarly easy, spirited, and gentlemanlike; he possessed all the suavity of the Chesterfield school without its stiffness—all its graces, unalloyed by its laxity of moral principle.' At length, full of years, and rich in all that should accompany old age, he breathed his last on April 12, 1814, at Chelsea College. His remains were deposited, on the 20th of the same month, in the burial-ground of that institution, attended by his own family (of which he lived to see the fourth generation), the chief officers of the college, and many others of rank and talent. A tablet to his memory was erected in Westminster Abbey. Since 1806 he had been in receipt of a pension of £300, granted by Fox. In 1810 he was made a foreign member of the Institut de France.

His intelligent and expressive face has been preserved by Reynolds, in a fine portrait, engraved by Bartolozzi, and Barry has introduced him in his large picture at the Society of Arts. His bust was executed by Nollekens in 1805.

As a composer Dr. Burney's principal works, in addition to those already mentioned, are 'Sonatas for two Violins and a Base,' two sets; 'Six Cornet Pieces with Introduction and Fugue for the Organ'; 'Twelve Canzonetti a due voci in canone, poesie dell' Abate Metastasio'; 'Six Duets for German Flutes'; Six Concertos for Violin, etc. in eight parts'; 'Two Sonatas for Pianoforte, Violin and Violoncello'; and 'Six Harpsichord Lessons.' [Additions and corrections from *Dict. of Nat. Biog.*] E. F. R.

The following is a catalogue of the musical extracts in his *History of Music*:—

Vol. 1. contains no musical example of consequence.

VOL. II.

	PAGE
Romance on the death of Richard I., from the Provençal	242
Prologue to the Paraphrase of the Epistle for St. Stephen's Day	252
Plain-Song for the Feast of St. John the Evangelist	255
Song for New Year's Day	258
Chanson de Roland	276
Two Chansons du Chatelain de Coucy	283
Chansons du Roman d'Alexandre	290
Song of Thibaut of Navarre	296
Chanson 'L'autrier par la matinée'	300
Old French song (fragment) 'Faux semblant'	305
Hymn 'Alla Trinità beata'	328
Song on the victory obtained at Agincourt	384
'Sumer is icumen in'	407
Cantilena of Guido	415
Canon in epidiapente by Okenheim	474
La Deploration de Jehan Okenheim, par Josquin des Prés	481
Two canons from Josquin's Missa sine nomine	490
Trio 'Pleni sunt' from Josquin's Missa 'l'homme armé'	495
Osanna from Josquin's mass 'Faysan regrés'	499
Benedictus from Do.	500
'Misericordias,' Motectus	503
'Murae Jovis ter maximi' (monody on Josquin's death) Benedictus	513
'Anima mea.' Isaac	521
'De testimoniis' Do.	523
Benedictus a 3. P. de la Rue	527
Crucifixus a 2. A. Brumel	529
Kyrie a 4. Anthony Fevin	531
Et vitem. Do.	532
'Quam pulcra es' (Motetti della Corona, lib. iii. no. 12), Mouton	535
'Youre counterfeyting.' Wm. Newark	541
'My woful hart.' Sheryngham	544
'That was my woo.' R. Fayrfax	546
'Alas, it is I.' Edmund Turges	548
'Dum transisset.' Taverner	557
'Qui tollis' from mass 'O Michael.' Taverner	560
Do. from mass 'Albanus' Fayrfax	561
'Quoniam' from Do.	563
'Gloria,' from another mass by Fayrfax	564
'Esurientes.' John Shepherd	587
'Et in terra pax,' from mass 'Euge bone.' Tye	589
'Sabbatum Maria Magdalene.' Robert Johnson	593
Song, 'Enforced by love and feare.' Robert Parsons	596

VOL. III.

'Heare the Voyce and Prayer.' Tallys	27
Ps. cxxviii. 'Selig ist der gepreiset.' Luther	35
Easter Hymn 'Jesus Christus unser Heiland'	36
'Ein veste burg'	37
Hymn 'Es woll uns Gott'	38
Ps. c. harmonised by Claude Lejeune	40
'Erhalt uns Herr'	53
Four-part song, 'In deep distresse.' Mundy	55
Anthem, 'Lord, who shall dwell.' Robert White	67
'Salvator Mundi,' from 'Cantiones Sacræ.' Tallys	77
Motet, 'Derelinquit.' Tallys	87
The Carman's Whistle. W. Bird	89
'O Lord my God.' Do.	95
'My mind to me a kingdom is.' Do.	97
Canzonet, 'Cease mine eyes.' T. Morley	103
Do. 'See, see, mine own sweet jewel.' Do.	*103
Dr. Bull's difficult passages, from Virginal Book	115
Dr. Bull's Jewel	117
Alman by Robert Johnson	118
'Fortune,' set by Bird for the Virginal	118
'My flockes feed not.' Weelkes	125
'Thou God of Night.' John Milton (Sir William Leighton's 'Tears and Lamentations')	139
'An heart that's broken.' Dowland	139
'I shame, I shame.' Do.	140
Airs, 'Like Hermit poore' and 'Sing we then.' A. Ferrabosco	141
Canon, 'Veni Creator.' Zarlino	169
'Deposuit' from Magnificat in Second Tone. Palestrina	170
'Sicut erat' from Do. Pietro Pontio	177
Miserere. Animuccia	184
Motet, 'Exaltabo te Domine.' Palestrina	191
Madrigal, 'Ahi tu mel neghi.' Marenzio	205
Villota alla Napolitana. Perissone Cambio	214
Canzone Villanesche alla Napolitana. Baldassare Donato	218
Madrigal, 'Moro lasso.' Gesualdo, Prince of Venosa	223
Fugue, 'Diffusa est gratia.' Costanzo Porta	227
Balleto, 'Il Bell' humore.' Gastoldi	231
Do. 'L' Innamorato'	232
Monteverde's New Discords	235
Madrigal, 'Straccia mi pur.' Monteverde	237
Motet, 'Quam pulcra.' Festa	245
Madrigal, 'Madonna, io v'amo.' Do.	246
Motet, 'Domine, quid multiplicati.' Goudimel	267
Chanson, 'Bonjour.' Claudin le Jeune	271
Extracts from 'Le Ballet Comique de la Royne.' Baltazarini	279
Noel. Caurroy	285
Madrigal, 'Il bianco e dolce cigno.' Arcadelt	303
Chanson, 'Ta bonne grace.' Cornelius Canis	309
Madrigal, 'Alma Nemus.' Orlando Lasso	317
Do. 'Calami sonum.' Cipriano de Rore	319
Catch and Canons from 'Pammelia'	349

	PAGE
Rounds and Canons	350
Anthem in 8 parts, exercise for an Oxford degree	351
Song, 'Come, my Celia.' A. Ferrabosco	354
Whitelocke's Coranto	378
Air in Comus. Henry Lawes	383
Song 'A lover once.' Do.	397
'Sing to the King of Kings.' William Lawes	405
'Lord, judge my cause.' Do.	406
'Who trusts in thee.' Do.	406
Five Bells Consort. John Jenkin	411
Canon, 'I am so weary.' Thomas Ford	415
Do. 'Lift up your heads.' Simon Ives	415
Do. 'Non nobis Domine.' Hilton	416
Do. 'Look down, O Lord.' T. Ford	418
Do. 'Hold thy peace'	416
Examples of Blow's crudities	449
Anthem, 'The ways of Zion.' Michael Wise	455
'Gloria Patri.' Deering	479
Glee, 'Ne'er trouble thyself.' Matthew Locke	480
Three-part song, 'Sweet Tyrannies,' by the father of Henry Purcell	486
Chant. Thomas Purcell	487
Canon. Turini	521
Divisions, specimens of. Seracini	528
Fragments of Italian melody from Pallavicini, Cifra, Rovetta, Merula and Facbo	544
'Tinna Nonna,' lullaby. Barbella	571
Aria dal Tasso. Tartini	572
Aria alla Lecese. Leo	572

VOL. IV.

Licences in Monteverde	27
Fragments of Peri, Caccini, and Monteverde	31
Rec. and Air from Cesti's 'Orontea'	67
Fragment of Cavalli's 'Erismena'	69
Scena from Bontempi's 'Paride'	71
Scene from the first Oratorio. Emilio del Cavaliere	91
Rec. from Mazzochi's 'Tears of Mary Magdalen'	96
Air from Federici's 'Santa Caterina da Siena'	117
Duet from Stradella's 'John the Baptist'	118
Air from Pietocchi's 'Maddalena'	121
Air 'Il mio figlio.' Scarlatti	121
Extract from Vecchi's 'Amfiparnasso'	127
Extract from Caccini	137
Fragments and Air from Cantata by Carissimi	143
Beauties of his cantatas	147
Duet from 'Musurgia.' Kircher	150
Fragments of cantatas and motet by Cesti	151
Fragments of cantatas by Luigi Rossi	157
Air, 'Dolce amor.' Cavalli	158
Fragment of Bandini	158
Specimens of Salvator Rosa	165
Fragments of Bassani	168
Fragments from Scarlatti's Cantatas	171
Divisions by various singers	218
Fragment from Handel's 'Teseo'	241
Divisions by Nicolai and others	243
Air from Ariosti's 'Vespasiano'	293
Divisions by Farinelli	437
Air sung by Farinelli in Broschi's 'Artaxerxes'	439
Divisions (1740 and 1755)	461

BURROWES, JOHN FRECKLETON, born in London, April 23, 1787, was a pupil of William Horsley. He first made himself known as a composer by an overture and several vocal pieces with orchestral accompaniments, and afterwards by an overture produced at the concerts of the Philharmonic Society, of which he was one of the original members. He soon, however abandoned these pursuits for the less distinguished but more profitable one of composing and arranging for the pianoforte. Burrowes was the author of *The Thorough-Bass Primer* and *The Pianoforte Primer*, both which have passed through many editions, and are still in request. He was also the composer of some ballads and many pianoforte pieces. For nearly forty years he held the situation of organist of St. James's Church, Piccadilly. He died March 31, 1852. W. H. H.

BURTON, AVERY. English pre-Reformation composer. A five-part Mass by him ('Ut Re Mi Fa Sol La') is in the Oxford Music School Collection (MS. *Mus. Sch. E.* 376-381). On Nov. 29, 1494, one pound was paid to 'Burton' for making a Mass (*Privy Purse expenses of Henry VII.*). He may be identified with the Auerie whom Morley names in his list of authorities (*Plain and Easy Introduction*, 1597), whose name appears as composer of a piece for the organ, in B. M. Add. MS. 29,996. The name of 'Davy' Burton appears in the List of Henry VIII.'s Chapel, 1520. G. E. P. A.

BURTON, JOHN, a native of Yorkshire, born 1730, was a pupil of John Keeble, the theorist. He became one of the first harpsichord players of his time, particularly as regards expression. He died in 1785. W. H. H.

BURTON, ROBERT SENIOR. Born Sept. 1, 1820, at Dewsbury, studied under Cipriani Potter, and succeeded S. S. Wesley in 1849 as organist of Leeds Parish Church, a post he occupied till 1880. His claim to notice rests chiefly on the important share he took in directing and improving the choral music for which the West Riding of Yorkshire is famous. He was conductor and chorus-master of many Yorkshire societies, in York, Leeds, Bradford, Huddersfield, Halifax, Barnsley, Harrogate, Holmfirth, Malton, and elsewhere. He was also chorus-master to the first Leeds Festival, in 1858, and received the same appointment for the abortive festival of 1861, and again when the festivals were resumed in 1874, but soon resigned the position, in consequence of differences of opinion with the committee. His most important work was perhaps in connection with the Bradford Festival Choral Society, which he trained and conducted from 1878 to 1887, an office which included the preparation of works for the Bradford subscription concerts founded and conducted for many years by Hallé. The essential feature of his method was his careful attention to vocal phrasing, by which he added greatly to the artistic refinement of Yorkshire choruses. He died at Harrogate, August 2, 1892. H. T.

BUSBY, THOMAS, the son of a coach-painter, was born in Westminster in December 1755. After an unsuccessful attempt to get him into the Westminster Abbey choir, he was placed under Champness for singing and Knyvett for harpsichord. In the summer of 1769 he sang at Vauxhall at a weekly salary of ten guineas. On the breaking of his voice in the same year, he was articled for three years to Battishill, and for some time after the expiration of his articles devoted himself to composition and musical literature, acting as parliamentary reporter to the *London Courant*, and contributing musical criticisms to the *European Review* and other periodicals. He worked at a setting of Pope's 'Messiah' for some years, and it was produced in 1799 with considerable success, as 'The Prophecy.' About 1786 he was appointed organist of St. Mary's, Newington, and in the same year collaborated with Arnold in bringing out a *Musical Dictionary*. In 1798 he was elected organist of St. Mary, Woolnoth. After the performance of his oratorio, he set to work on various odes by Pope and Gray, and Ossian's 'Comala'; in 1800 he wrote music for a ver-

sion of Kotzebue's 'Joanna,' and a so-called secular oratorio, 'Britannia,' was sung at Covent Garden, with Mara in the principal part. In June 1801 he took the degree of Mus.D. at Cambridge. In 1802 he wrote music to Holcroft's 'Tale of Mystery,' and in the following year to Miss Porter's 'Fair Fugitives.' His last dramatic work was the music to Lewis's 'Rugantino,' 1805. He died at Pentonville May 28, 1838. He was a man of great industry, and, besides the works enumerated, wrote and published the following: *The Age of Genius*, a satirical poem, 1785; *Dictionary of Music*, 1786, etc.; *The Divine Harmonist*, 1788; *Melodia Britannica*, 1790; *The Monthly Musical Journal* (four numbers), 1801; a translation of *Lucretius*, 1813; *A Grammar of Music*, 1818; *A History of Music* (compiled from Burney and Hawkins), 2 vols. 8vo, 1819; *Concert-Room and Orchestra Anecdotes*, 3 vols. 12mo, 1825; *A Musical Manual, or Technical Directory*, 1828. (*Dict. of Living Authors*, 1816; Busby, *Hist. of Music; Private Sources*.) [Additions and corrections from the *Dict. of Nat. Biog.*] E. F. R.

BUSNOIS, Anthoine, a distinguished musician of the latter part of the 15th century, was probably a native of Picardy. In a composition of his written between 1461 and 1467, and printed at p. 105 of the first volume of Dr. Adler's *Sechs Trienter Codices*, he describes himself as a pupil of Okeghem and as 'illustris comitis de Chaulois indignum musicum.' The person referred to is clearly the Comte de Charolais, who in 1467 became Duke of Burgundy and is known to history as Charles the Bold. Busnois continued in the service of the Court of Burgundy under Charles and his successor Mary down to 1481, and was afterwards director of the choir at the church of St. Sauveur, Bruges, where he died in November 1492.

Busnois is frequently cited as an authority by the theorists of the period. In 1476 Tinctor dedicated his treatise *De natura et proprietate tonorum* to 'præstantissimis ac celeberrimis artis musicæ professoribus Domino Johanni Okeghem, christianissimi regis Francorum protho-capellano, ac Magistro Antonio Busnois, illustrissimi Burgundorum ducis cantori.'

Two Magnificats, a Mass *Ecce Ancilla* and four motets by Busnois are extant in a manuscript of the Royal Library at Brussels. Many of his secular pieces are contained in the Dijon MS. 295 and in Cod. Magliabech. 59 of the National Library of Florence. Some of his songs are included in Petrucci's early publications, the *Odhecaton* (1501), *Canti cinquanta* (1501), and *Canti centocinquanta* (1503), from the latter of which Kiesewetter transcribed three songs in the appendix to *Verhandelingen*, etc., Amsterdam, 1829. Two more have been printed by Dr. Adler from the Trent manuscripts. J. F. R. S.

BUSONI, Ferruccio Benvenuto, born at Empoli near Florence, on April 1, 1866, was son of Ferdinando Busoni, a clarinet player, and Anna Weiss, his wife, a pianist, from whom he received his early tuition in music. At nine Busoni appeared in Vienna, and there he studied under Professor Hans Schmitt, and at Graz, under W. A. Remy (*i.e.* Dr. Wilhelm Mayer), after which came his first concert tour in Italy. At seventeen Busoni was elected a member of the Accademia Filarmonica of Bologna, and Florence struck a gold medal in his honour. In 1886 Busoni took up his residence in Leipzig in order to devote himself to composition; but financial considerations drove him to accept a post of professor at Helsingfors in 1888, which post he exchanged in 1890 for one at the Moscow Conservatoire, after winning the Rubinstein prize. After a brief stay in Boston, Mass., Busoni again returned to Europe in 1893, and has since resided in Berlin, whence he has made numerous concert tours, and has visited England repeatedly. His compositions include an orchestral suite, two string quartets, a large number of pianoforte pieces, notably op. 20, a 'ballet scene'; a 'Symphonisches Tongedicht,' op. 32; a violin concerto in D, op. 35; a 'Concertstück' for pianoforte and orchestra, op. 31; a pianoforte concerto (new); a fourth ballet scene, op. 33; and a brilliant set of variations and fugue (op. 22) on Chopin's C minor prelude, as well as a remarkable arrangement for pianoforte of Bach's organ works, in the execution of which Busoni is almost unrivalled in the present day. Busoni is a highly gifted and accomplished pianist of the romantic school; his technique is superb, and his power of poetical interpretation is very great. R. H. L.

BUTLER, Thomas Hamly, son of John Butler, professor of music, was born in London in 1762. He received his early musical education as a chorister of the Chapel Royal under Dr. Nares. On the breaking of his voice he was sent to Italy to study composition under Piccinni, where he remained three years. On his return to England he was engaged by Sheridan to compose for Drury Lane Theatre. Differences however arising, he quitted England at the expiration of his engagement and settled in Edinburgh, where he established himself as a teacher, and where he died in 1823. Butler, composed the music for 'The Widow of Delphi,' a musical comedy by Richard Cumberland, 1780, besides many pieces for the pianoforte. W. H. H.

BUTT, Clara, born at Southwick, Sussex, Feb. 1, 1873, studied with Daniel Rootham at Bristol, and in 1889 gained a scholarship at the Royal College of Music, where she was a pupil of Mr. J. H. Blower. After some appearances of a more or less tentative kind, at college concerts, etc. (she sang in a mass of Palestrina at a concert of the Bach Choir on May 31, 1892,

and at a Musical Guild concert in the following autumn), she made her début at the Albert Hall as Ursula in 'The Golden Legend,' on Dec. 7 of the same year, and three days afterwards sang the part of Orpheus at the pupils' performance of Gluck's opera at the Lyceum Theatre. Her commanding stature and fine stage presence greatly assisted the effect of her beautiful voice, and from that time her success has been unqualified. She was at once in great request for concerts of all kinds, and at her first festival engagements at Hanley and Bristol, in Oct. 1893, she made a most favourable impression. In 1895 she went to Paris to study with M. Bouhy, and at the same time had a few lessons from Mme. Etelka Gerster. The phenomenal beauty of her rich contralto voice led her at first to trust too exclusively to its natural qualities; but as she has advanced in her art, she has become more careful, and the interpretations she gives of the songs she sings are now always interesting and often admirable. In Elgar's 'Sea Pictures,' written especially for her (Norwich, Oct. 5, 1899) she made a conspicuous success. At the succeeding Norwich Festival of 1902, two new compositions were written for her, Frederic Cliffe's 'Triumph of Alcestis' and Herbert Bedford's 'Romeo and Juliet,' in the latter of which she was associated with her husband, Mr. R. KENNERLEY RUMFORD, a baritone singer of remarkable excellence, who was born in London, Sept. 2, 1870. He studied with Henschel and Alfred Blume, and in 1894 went to Paris to study with Georges Sbriglia. On Feb. 16, 1893, he had made a successful first appearance at one of Henschel's Symphony Concerts at St. James's Hall, and after his return from Paris rose rapidly to a position of remarkable popularity with the public and musicians. Among his greatest artistic successes may be mentioned his singing of the principal part in Bach's 'St. Matthew' Passion, at the Bach Festival on April 6, 1897, and at the Popular Concert of Jan. 31, 1898, he gave a singularly beautiful interpretation of the four 'Ernste Gesänge' of Brahms. He married Miss Butt at Bristol on June 26, 1900. M.

BUTTON & WHITAKER. A notable music-publishing house, the business of which was founded upon that of Messrs. Thompson and carried on in their old premises 75 St. Paul's Churchyard — the north-west side. S. J. Button, a bookseller of 24 Paternoster Row, at first became junior partner with Purday, and they directly succeeded Henry Thompson; this was about 1804-5. In 1807 the names were transposed into Button & Purday, and the following year the firm became Button & Whitaker, the latter being John Whitaker, the composer (*q.v.*). Button & Whitaker, besides republishing works originally issued by the Thompson family, put forth great quantities of the popular songs of the day, books of sacred music, small volumes of flute music, collections of glees, and of country-dances, etc.

Before 1816 the partnership existed under the titles 'Button, Whitaker, & Beadnell' or 'Button & Company,' and in 1820 as 'Whitaker & Co.' The business ceased about 1830. F. K.

BUTTSTETT (or BUTTSTEDT), JOHANN HEINRICH, born at Bindersleben near Erfurt, April 25, 1666, was a pupil of Pachelbel, and organist successively at the Reglerkirche (1684), the Kauffmannskirche (1687), and the Hauptkirche (1691) of Erfurt. He published a volume of harpsichord music, 'Musicalische Clavier-Kunst,' etc., in 1716, and a book of four masses in 1720, besides some choral-preludes, etc., for organ, but his chief claim to notoriety is his attack on Mattheson's 'Neu-eröffnetes Orchestre' (1713), published under the title of 'Ut, Re, Mi, Fa, Sol, La, tota musica' (Erfurt, 1717); as a defence of the principles of solmisation the work is of interest, but Mattheson's rejoinder in *Das beschützte Orchester* (1717), and *Das forschende Orchestre*, demolished Buttstett's position, and established the rights of modern musicians. Buttstett died at Erfurt, Dec. 1, 1727. M.

BUXTEHUDE, DIETRICH, a celebrated organist and composer, born 1637 at Helsingör, Denmark, where his father Johann was organist of the Olai-church. The father died Jan. 22, 1674, in his 72nd year. It is not known whether the son received his thorough musical education from his father or not. In April 1668 he obtained the post of organist at the Marienkirche of Lübeck—one of the best and most lucrative in Germany—where his admirable playing and promising abilities excited much attention. Here his energy and skill at once found their proper field. Not content with discharging his duties at the organ, he conceived the idea of instituting great musical performances in connection with the church services, and in 1673 started the 'Abendmusiken,' or evening performances, on which Lübeck peculiarly prided itself. They took place annually, on the five Sundays before Christmas, beginning between four and five o'clock, after the afternoon service, and consisted of concerted pieces of sacred music for orchestra and chorus—the former improved and the latter formed by Buxtehude—and organ performances. In such efforts Buxtehude was well seconded by his fellow citizens. The musical evenings continued throughout the 18th century, and into the 19th. Further particulars concerning them are given by Spitta in his *Life of J. S. Bach* (i. 258, from Möller's *Cimbria Litterati*, and Conrad von Höveln's *Beglückte und geschmückte Lübeck*); Mattheson also mentions them in his *Vollkommene Kapellmeister*. The best testimony to Buxtehude's greatness is contained in the fact of Sebastian Bach having made a journey of fifty miles on foot that he might become personally acquainted with the Lübeck concerts.

In fact Buxtehude became the great musical centre for the North of Europe, and the young musicians flocked around him. Amongst these was Nicolas Bruhns, who excelled Buxtehude himself both in composition and in organ-playing.

Buxtehude ended his active and deservedly famous life May 9, 1707. His strength lay in his free organ compositions (*i.e.* pieces not founded on chorals), and generally in instrumental music, pure and simple. These are remarkable as the earliest assertion of the principle of pure instrumental music, which was afterwards so fully developed by Bach. In treatment of chorales on the organ Buxtehude was not equal to the school of Pachelbel; but to judge him from one side only would be unfair. A list of his works is in the *Quellen-Lexikon.* Spitta edited two volumes of Buxtehude's organ-works (1876), including the 'Abendmusiken' from 1678 to 1687, and occasional pieces, many of them published at Lübeck during his lifetime. Earlier instrumental compositions Spitta was not able to discover; Mattheson also complained that of Buxtehude's clavier pieces, in which his principal strength lay, few if any existed. A collection of seven 'Claviersuiten' mentioned by Mattheson (*Vollk. Kapellmeister,* 130), 'in which the nature and character of the planets are agreeably expressed,' does not seem to be now in existence. Fourteen 'Choral-Bearbeitungen' were edited by Dehn (Peters). Commer (*Musica Sacra,* i. No. 8), G. W. Körner, Busby (*Hist. of Music*), and A. G. Ritter (*Kunst des Orgelspiels*), have also published separate pieces of his. [A volume of sonatas for violin, viol da gamba, and harpsichord, ed. by C. Stiehl, is vol. xi. of the *Denkmäler deutscher Tonkunst.* (1903.)] C. F. P.

BYFIELD, John, organ-builder. [See Harris & Byfield, and Byfield, Jordan & Bridge below.]

BYFIELD, John, junr., organ-builder. Nothing is known of his biography except that he died in 1774. The works of the two Byfields pass current under one head; but Dr. Rimbault is able to quote eighteen instruments (from 1750 to 1771) as made by the younger Byfield. The last six of these were built conjointly with Green. [See Green.] V. DE P.

BYFIELD, JORDAN & BRIDGE, conjointly. Many new organs were required for the new churches built at the beginning of the 18th century, and many incompetent persons were induced to become organ-builders. To prevent the sad consequences likely to follow, these three eminent artists formed a coalition to build organs at a very moderate charge, amongst which may be cited those of Great Yarmouth Church (1733) and of St. George's Chapel in the same town (1740). V. DE P.

BYRD, William, is generally said to have been the son of Thomas Byrd, a member of the Chapels Royal of Edward VI. and Mary; but this statement is purely conjectural, the only evidence upon which it rested—viz. that Byrd's second son was named Thomas, as it was supposed, after his grandfather—having been disproved by the discovery that he was named after his godfather Thomas Tallis. The date (1538) usually given as that of William Byrd's birth is conjectured from a statement that he was the senior chorister in St. Paul's Cathedral in 1554, when his name was alleged to appear in a petition of the choristers for the restoration of certain benefactions to which they were entitled. This petition cannot be found among the public records of the year, though documents relating to the restoration of the payments in question are in existence, and in these William Byrd's name does not occur, though two other choristers, named John and Simon Byrd, are mentioned. That he was born in 1542 or 1543 is proved by his will, made in November 1622, in which he describes himself as 'nowe in the eightieth yeare of myne age.' It seems most likely that the composer was a native of Lincoln, where a Henry Byrde, formerly mayor of Newcastle, died on July 13, 1512, and was buried in the Cathedral. Families of the same name were also settled in the 16th century at Spalding, Epworth, Moulton, and Pinchbeck. According to Anthony Wood, Byrd was 'bred up to musick under Thomas Tallis,' but the first authentic fact in his biography is his appointment as organist of Lincoln Cathedral, which took place probably about 1563. On Sept. 14, 1568, he was married at St. Margaret in the Close to Ellen or Julian Birley, and his eldest son Christopher was baptized at the same church on Nov. 18, 1569. On Feb. 22, 1569, he was sworn in as a member of the Chapel Royal, but he does not seem to have left Lincoln immediately, for his eldest daughter, Elizabeth, was baptized there on Jan. 20, 1571-72, and on Dec. 7, 1572, Thomas Butler was elected master of the choristers and organist 'on ye nomination and commendation of Mr. William Byrd.' In the Chapel Royal he shared with Tallis the honorary post of organist, and on Jan. 22, 1575, the two composers obtained a patent from Elizabeth for printing and selling music and music paper, English and foreign, for 21 years, the penalty for the infringement of which was 40 shillings. This monopoly does not seem to have been very valuable, as a petition preserved in the Stationers' Registers, in which a list of restrictions upon printing is given, records that 'Bird and Tallys . . . haue musike bokes with note, which the complainantes confesse they wold not print nor be furnished to print though there were no priuilege.' In 1575 Byrd and Tallis published a collection of motets, 'Cantiones, quæ ab argumento sacræ vocantur, quinque et sex partium,' of which 18 were the composition of Byrd. The work was printed by Thomas Vautrollier, and was dedicated to the Queen. It contains

eulogistic Latin verses by Richard Mulcaster and Ferdinando Richardson, an anonymous Latin poem 'De Anglorum Musica,' a short Latin poem by the composers,[1] and an epitome of their patent. On June 27, 1577, Byrd and Tallis petitioned the Queen for a lease in reversion for 21 years of the yearly value of £40. In this document (*Calendar of MSS. at Hatfield, Hist. MSS. Commission*, II. p. 155), it is stated that Byrd 'being called to Her Majesty's service from Lincoln Cathedral, where he was well settled, is now, through great charge of wife and children, fallen into debt and great necessity. By reason of his daily attendance in the Queen's service he is letted from reaping such commodity by teaching as heretofore he did. Her grant two years ago of a licence for printing music has fallen out to their loss and hindrance to the value of 200 marks at least.' From the endorsement of this document it would seem that the petition was granted. In 1578 he was living at Harlington in Middlesex where he probably remained until his removal to Stondon, in Essex, about 1593. A glimpse of Byrd is obtained in 1579 in a letter preserved in the British Museum (*Lansd.* 29, *No.* 38) from the Earl of Northumberland to Lord Burghley, which runs as follows: 'My dere good lorde I amme ernestly required to be a suiter to your l[ordship] for this berer, M^r. berde, that your l[ordshi]p wyll have hime in remẽbrance w̄h your fauer towardes hime seinge he cane not inioye that wyche was his firste sutte [suit] and granted vnto hime. I am̄e the more importenat to your l[ordship] for that he is my frend and cheffly that he is scollemaster to my daughter in his artte. The mane is honeste and one whome I knowe your l[ordship] may com̄ande.' The letter is dated Feb. 28, 1579, and endorsed Bird of ye Chappell,' but what the suit was to which it refers is not known. About 1579 Byrd wrote a three-part song for Thomas Legge's Latin play 'Richardus III.' On the death of Tallis in 1585 the benefit of the monopoly in music-printing became the sole property of Byrd, who during the next few years was unusually active in composition. In 1588 he published 'Psalmes, Sonets, and Songs of Sadnes and Pietie, made into Musicke of fiue parts: whereof, some of them going abroade among diuers, in vntrue coppies, are heere truely corrected, and th' other being Songs very rare and newly composed, are heere published, for the recreation of all such as delight in Musicke.' This work was published by Thomas Easte, 'the assigne of W. Byrd,' in 1588. In Rimbault's untrustworthy *Bibliotheca Madrigaliana* an undated edition is mentioned, which may be the same as one mentioned in the Stationers' Register as being in print on Nov. 6, 1687. The 'Songs of Sadnes' are dedicated to Sir Christopher Hatton: prefixed are the following quaint

[1] See TALLIS.

'Reasons briefely set downe by th' auctor, to perswade euery one to learne to singe':—

First, it is a knowledge easely taught, and quickly learned, where there is a good Master, and an apt Scoller.

2. The exercise of singing is delightfull to Nature, and good to preserue the health of Man.

3. It doth strengthen all parts of the brest, and doth open the pipes.

4. It is a singuler good remedie for a stutting and stamering in the speech.

5. It is the best meanes to procure a perfect pronunciation, and to make a good Orator.

6. It is the onely way to know where Nature hath bestowed the benefit of a good voyce; which guift is so rare, as there is not one among a thousand, that hath it: and in many, that excellent guift is lost, because they want Art to expresse Nature.

7. There is not any Musicke of Instruments whatsoeuer, comparable to that which is made of the voyces of Men, where the voyces are good, and the same well sorted and ordered.

8. The better the voyce is, the meeter it is to honour and serue God there-with: and the voyce of man is chiefely to be imployed to that ende.

Since singing is so good a thing,
I wish all men would learne to singe.

At the end of 1588 Byrd contributed two madrigals to the first book of Nicholas Yonge's *Musica Transalpina*, and in the following year published two more works. The first of these, 'Songs of Sundrie Natures, some of grauitie, and others of mirth, fit for all companies and voyces,' was dedicated to Sir Henry Cary, Lord Hunsdon, and was published by Thomas Easte; a second edition was issued by Easte's widow, Lucretia, in 1610. The second, 'Liber Primus Sacrarum Cantionum quinque vocum,' was dedicated to the Earl of Worcester. It was published by Easte on Oct. 25. In 1590 Byrd contributed two settings of 'This sweet and merry month of May' to Thomas Watson's 'First Sett of Italian Madrigalls Englished'; one of these seems to have been sung before Elizabeth on her visit to Lord Hertford at Elvetham in 1591. On Nov. 4, 1591, he published the *Liber Secundus Sacrarum Cantionum*, dedicated to Lord Lumley. During this period of his life Byrd wrote a very large amount of music for the virginals, many manuscript collections of which are still extant. One of the most important of these is the volume transcribed for the use of Lady Nevill by John Baldwin of Windsor, which consists entirely of Byrd's compositions. This manuscript was finished in 1591, and furnishes evidence of the repute which the composer enjoyed at this time, Baldwin quaintly writing against Byrd's name at the end of the 17th piece, 'Mr. W. Birde. Homo memorabilis.' The great esteem in which he was held as a musician must have been the reason why he continued to hold his appointment in the Chapel Royal, where for some time he had acted as organist, though throughout his life he was well known to be a Roman Catholic. In Father Morris's *Life of Father William Weston* ('The Troubles of our Catholic Forefathers,' second series, 1875, pp. 142-5) will be found several allusions to Byrd as a recusant from various lists preserved in the State Papers

(Domestic Series, Elizabeth, cxlvi. 137, cli. 11, clxvii. 47, cxcii. 48), and in the same work the following interesting passage is given from Father Weston's Autobiography, describing his reception at a house which the editor identifies as being in Berkshire, the residence of a certain Mr. Bold: 'We met there also Mr. Byrd, the most celebrated musician and organist of the English nation, who had been formerly in the Queen's Chapel, and held in the highest estimation; but for his religion he sacrificed everything, both his office and the Court and all those hopes which are nurtured by such persons as pretend to similar places in the dwellings of princes, as steps towards the increasing of their fortunes.' This was written in the summer of 1586. The Sessions Rolls of the County of Middlesex show that true bills 'for not going to church, chapel, or any usual place of common prayer' were found against 'Juliana Birde wife of William Byrde' of Harlington on June 28, 1581; Jan. 19, April 2, 1582; Jan. 18, April 15, Dec. 4, 1583; March 27, May 4, Oct. 5, 1584; March 31, July 2, 1585; and Oct. 7, 1586. A servant of Byrd's, one John Reason, was included in all these indictments, and Byrd himself was included in that of Oct. 7, 1586, and (without his wife or his servant) a true bill was found against him on April 7, 1592, at which date he is still described as of Harlington. As there is no mention in the Chapel Royal Cheque-Book of Byrd's giving up his place, it is not improbable that Father Weston's information on this point was incorrect.

About 1593 Byrd became possessed of the remainder of a lease (held by Lawrence and William Hollingworth) of Stondon Place, a farm of some 200 acres near Ongar, Essex, belonging to William Shelley, who was shortly afterwards committed to the Fleet and convicted of high treason for taking part in an alleged Popish plot. The property was sequestrated, and on July 15, 1595, Byrd obtained a crown lease of it for the lives of his son Christopher and his daughters Elizabeth and Rachel. Shelley died about 1601, and in 1604 his heir paid a large sum of money for the restoration of his lands, whereupon his widow attempted to regain possession of Stondon, which formed part of her jointure. But Byrd was still under the protection of the Court, and Mrs. Shelley was ordered to allow him to enjoy quiet possession of the property. In spite of this, on Oct. 27, 1608, she presented a petition to the Earl of Salisbury, praying for the restoration of Stondon, and setting forth eight grievances against the composer. In this document Mrs. Shelley alleged that Byrd went to law in order to compel her to ratify the crown lease, but being unsuccessful he combined with the individuals who held her other jointure lands to enter into litigation with her, and when all these disputes had been settled, and finally 'one Petiver' submitted, 'the said Bird did give him vile and bitter words,' and when told that he had no right to the property, declared 'that yf he could not hould it by right, he would holde it by might'; that he had cut down much timber, and for six years had paid no rent. Mrs. Shelley died in 1609, and the long suit was ended by Byrd's buying (7 James I.) the property from her son, who was created a baronet about that date. Byrd settled Stondon Place upon himself, in the names of John and Thomas Petre, and 'did set apart certain parcels of the said farm to the value of £20 for himself during his life and after his death for his son Thomas,' a settlement which subsequently led to further litigation. It is a curious fact that while Byrd was actually in the possession, under a crown lease, of lands confiscated from a Catholic recusant, and also had taken part (as a member of the Chapel Royal) in the Coronation of James I., both he and his family were not only regularly presented in the Archidiaconal Court of Essex from 1605 to 1612, and probably later, but since the year 1598 had been excommunicated by the same ecclesiastical body. A *modus vivendi* under these circumstances must have been rather difficult, and Byrd can only have remained secure from more serious consequences by the protection of powerful friends. To this he evidently alludes in the dedication to the Earl of Northampton of the first book of his *Gradualia*, in which he says, 'Te habui . . . in afflictis familiæ meæ rebus benignissimum patronum.'

Morley in his *Introduction* (ed. 1597, p. 115), mentions how Byrd, 'never without reverence to be named of the musicians,' and Alfonso Ferabosco the elder, had a friendly contention, each setting a plain-song forty different ways. It was no doubt this work which was published on Oct. 15, 1603, by Easte, under the following title: 'Medulla Musicke. Sucked out of the sappe of Two [of] the most famous Musitians that euer were in this land, namely Master Wyllism Byrd . . . and Master Alfonso Ferabosco . . . either of whom having made 40tie severall waies (without contention), shewing most rare and intricate skill in 2 partes in one vpon the playne songe "Miserere." The which at the request of a friend is most plainly sett in severall distinct partes to be sunge (with moore ease and vnderstanding of the lesse skilfull), by Master Thomas Robinson, etc.' Unfortunately no copy of this work is known to be extant, and its existence was only revealed by the publication of the entry in the Stationers' Registers. In 1607 appeared the first and second books of the *Gradualia*, a complete collection of motets for the ecclesiastical year of the Catholic Church, including (in the first book) a setting for three voices of the words allotted to the crowd in the Passion according to St. John, a modern edition of which was published by Messrs. Novello in 1899. The first

book is dedicated to the Earl of Northampton; the second to Lord Petre. A second edition of both books appeared in 1610. In 1611 was issued 'Psalmes, Songs, and Sonnets: some solemne, others joyfull, framed to the life of the Words: Fit for Voyces or Viols, etc.' This was dedicated to the Earl of Cumberland, and contains a quaint address 'to all true louers of Musicke,' in which, after commending 'these my last labours,' he proceeds: 'Onely this I desire; that you will be but as carefull to heare them well expressed, as I haue beene both in the Composing and correcting of them. Otherwise the best Song that euer was made will seeme harsh and vnpleasant, for that the well expressing of them, either by Voyces, or Instruments, is the life of our labours, which is seldome or neuer well performed at the first singing or playing. Besides a song that is well and artificially made cannot be well perceiued nor vnderstood at the first hearing, but the oftner you shall heare it, the better cause of liking you will discouer: and commonly that Song is best esteemed with which our eares are best acquainted.' Probably in the same year appeared 'Parthenia,' a collection of Virginal music, in which Byrd collaborated with Bull and Orlando Gibbons. In 1614 he contributed four anthems to Sir William Leighton's 'Teares or Lamentacions of a Sorrowfull Soule.' These were his last published compositions. He died, probably at Stondon, on July 4, 1623, his death being recorded in the Chapel Royal Cheque-Book as that of a 'Father of Musicke,' a title which refers both to his great age and to the veneration with which he was regarded by his contemporaries.

His will (Somerset House, Swan, 106), dated Nov. 15, 1622, has been printed in full in *The Musician* for June 2, 1897. It begins as follows: 'In the name of the moste glorious and undevided Trinitie ffather Sonne Holy Ghoste three distincte persons and Eternall God. Amen. I William Byrde of Stondon Place in the parish of Stondon in the countye of Essex gentleman doe nowe in the eightieth yeare of myne age but (throughe the goodnes of God) beinge of good healthe and perfect memorie make and ordaine this for my last will and Testament ffirste I give and bequeathe my Soule to God Almightye my Creator and Redem^r. and Preserver. And that I may live and dye a true and perfect member of his holy Catholicke Churche (withoute which I beleeve there is noe salvacon for me) my body to be honestlye buryed in that parish and place where it shall please God to take me oute of this live which I humbly desyre (yf soe it shall please God) maye be in the pishe of Stondon where my dwellinge is. And then to be buried neare unto the place where my Wief lyest buryed or ells where as God and the tyme shall permytte and suffer.' From the same document it seems that Byrd's later years had been embittered by a quarrel about the disposal of the Stondon property, in the settlement of which he had 'bynn letted and hindred'—'by the undutifull obstinacie of one whom I am unwillinge to name.' There can be but little doubt that this was the composer's eldest son, Christopher, who is passed over in the Will, though his wife Catherine and her son Thomas are appointed executors. In pursuance of an agreement with this daughter-in-law (whom he calls 'a verye good ffrend to hus both') the property was left to her, subject to certain rent charges and to charges of £20 yearly for his second son Thomas, and £10 to his daughter Rachel, with remainders to his grandson Thomas, his son Thomas, and the sons of his daughters Mary and Rachel. His goods 'in my lodgeinge in the Earle of Woster's house in the Strand' are left to his second son, and an annuity to his eldest daughter. The Stondon property came again before the Court of Chancery in 1635, on Oct. 10, in which year an order was made that Catherine Byrd should pay the annuities due to Thomas and Rachel, none of which had been paid since Byrd's death in 1623. From about 1637 to 1650 Stondon Place was occupied by one John Leigh, who was probably a tenant of the Byrd family, for in 1651 the Committee for Compounding with Delinquents was approached on behalf of Thomas Byrd, who was entitled to £20 annuity on the property, of which one of the Petre family (whose goods had been seized for recusancy) was then tenant. It was then pleaded on behalf of Thomas Byrd that he 'is seventy-five years old and has no other means of subsistence.' Soon afterwards the property was sold to Prosper Nicholas. Stondon Place itself was practically burnt down in 1877, and has since been rebuilt, and there is no record of the burial of any of the Byrd family in the parish church.

Byrd's arms, as entered in the Visitation of Essex of 1634 *ex sigillo*, were three stags' heads cabossed, a canton ermine. His children were (1) Christopher, who married Catherine, daughter of Thomas Moore of Bamborough, and had a son, Thomas, who was living at Stondon in 1634; (2) Thomas, a musician, who acted as deputy to John Bull at Gresham College, he was living in 1651; (3) Elizabeth who married (i.) John Jackson, and (ii.) —— Burdett; (4) Rachel, married (i.) —— Hook, by whom she had two children, William and Catherine, married to Michael Walton; between 1623 and 1634 Rachel Hook married (ii.) Edward Biggs; (5) Mary, married (i.) Henry Hawksworth, by whom she had four sons, William, Henry, George, and John: (ii.) Thomas Falconbridge. Anne Byrd, who is mentioned in the Exchequer proceedings, Shelley *v.* Byrd, was probably a fourth daughter who died young. It should be mentioned that the statement frequently made to the effect that Byrd and his family lived 'at the end of the 16th century' in the parish of St.

Helen's Bishopsgate, is inaccurate. The Byrds who lived there belonged to another family, and were probably not even relatives of the composer's. No authentic portrait of Byrd is known to exist. An oval (head and shoulders) was engraved by Vandergucht—on the same plate as a similar portrait of Tallis—for a projected *History of Music* by N. Haym which never appeared. The authority for this plate is unknown, and impressions are of extreme rarity.

In addition to the works already mentioned Byrd wrote three masses for 3, 4, and 5 voices respectively. Copies of these are sometimes found inserted in the 1610 edition of the *Gradualia.* It used to be assumed that these masses were written during the reign of Queen Mary, but the fact that the composer was throughout his life a Catholic, and continued to compose music for the old Ritual, renders the assumption extremely improbable, especially since all three masses display no traces of immaturity, but rather belong to the composer's best works. They were probably printed without title-pages in 1588, the type being that which Easte used when he began to print music as Byrd's assignee in that year, while the initials are the same as those in Yonge's *Musica Transalpina* (1588). The mass for 5 voices was reprinted in 1841 by Dr. Rimbault for the Musical Antiquarian Society; the title-page contains the unfounded statement that it was 'composed between the years 1553 and 1558 for the old cathedral of St. Paul's.' Another edition was published in 1899 by Messrs. Breitkopf & Härtel. Modern editions of the other masses have also appeared, that for 4 voices, published by Messrs. Novello in 1890, and that for 3 voices by Messrs. R. & T. Washbourne in 1901. Vols. vi.-ix. of G. E. P. Arkwright's *Old English Edition* contain nearly the whole of 'Songs of Sundrie Natures.' The Fitzwilliam Virginal Book contains a long series of interesting pieces by Byrd for the Virginal, and more still remain unpublished in Lady Nevill's Virginal Book (in the possession of the Marquess of Abergavenny), and other contemporary collections. The Libraries of His Majesty the King, the British Museum, Christ Church (Oxford), Peterhouse (Cambridge), the Bodleian, Lambeth Palace, and the Fitzwilliam Museum all contain many vocal and instrumental compositions awaiting publication.

The best estimate of Byrd's position as a composer will be found in chap. v. of pt. ii. of Nagel's *Geschichte der Musik in England* (Strasburg, 1897). He has been severely criticised for indulging in licenses which were forbidden by his stricter contemporaries on the continent, but in this respect he only followed the practice of the English school which preceded him; and it is remarkable that though his life extended so far into the 17th century he remained entirely untouched by the changed ideas which sprang up in Italy after the death of Palestrina. He excelled in every branch of his art, and throughout all his music there is an unmistakable note of personality which gives him a peculiar place among the great polyphonists of his day. His madrigals are less attractive than those of Morley, Wilbye, or Gibbons, but his virginal music is extraordinarily varied and individual in style, while his Latin church music is always solid and dignified, and often remarkable for a pathetic beauty that is one of his most interesting characteristics. W. B. S.

BYZANTINE SCALES were used in the early Greek Church, and are described in Bryennius's *Harmonicon* (*c.* 1320). This work may be found in the third volume of John Wallis's *Opera Mathematica* (1699), and a further description is given in Paranikas's *Aids to Byzantine Literature.*

The scales were four in number, with four Plagals, situated, like Greek Plagals, a fifth below the Authentics. Byzantine scales were reckoned upwards, unlike the Greek, which were reckoned downwards (Greek Dorian = *e'*—*e*), and were as follows:—

Authentics.	*Plagals.*	
1. *g*—*g'*	1. *c*—*c'*	Letters used in the modern sense.
2. *f*—*f'*	2. B—*b*	
3. *e*—*e'*	3. A—*a*	
4. *d*—*d'*	4. G—*g*	

all without chromatic notes.

The notes were named after the first seven letters of the Greek Alphabet, but the A was placed where our C is. The method of using the Greek letters was introduced into the Western Church by Ambrose, and, when afterwards the first seven letters of the Latin Alphabet were substituted for the Greek, the old pitch meaning was retained, and it was not till about 900 that the note which we call *c* was so named. The original name appears to have been A in both Eastern and Western Churches. It will be noticed that by the use of B♭ instead of B♮ the Plagals become simply transposed copies of their Authentics (this is true of all Plagals that are a fifth *below* their Authentics); when the Plagals are, as in the Western Church Scales, a fifth *above* (usually called a fourth below) the Authentic, the use of B♭ produces the Plagal without transposition.

i.e. C—c with B♮=F—*f* with B♭, while
C—c with B♭=G—*g*, and so on.

The pitch meanings of the letters in Byzantine Scales afterwards rose one degree, so that what had hitherto been called B was now A (using modern letters, but not modern meaning): thus Byzantine A = modern D, so that the Byzantine 4th Authentic = Church Dorian (not to be confused with Greek Dorian), but as the Byzantine 1st Authentic was called by the *title a* (alpha), it is easy to see how confusion arose when the change from Greek to Latin lettering took place.

The pitch meaning of the letters was somewhat arbitrary until the 10th century; and it is possible that some of our names for the Church Scales are erroneous. D. H.

C

C. The keynote of the 'natural' scale. In German also it is C, C♯ being called Cis; but in Italian and French it is called Ut and Do. [See UT, RE, MI.]

The scale of C is identical with the XIIth of the Ecclesiastical Modes (commonly called the Ionian Mode). In modern times it has been rendered illustrious by the Jupiter and C minor Symphonies, and the three Leonora overtures. Schubert's great Symphony is written in C major.

The C clef, either as 𝄡 or 𝄡 always indicated 'Middle C,' or *c′*, that note being on the line enclosed by the two cross lines of the clef. At one time or another it has been placed on every line of the stave, and at present is commonly used in three different places, being loosely termed the soprano, alto, and tenor clef, according to its position. Accurately, of course, the clef never alters its position, but different portions of the stave are arranged round it. See GREAT STAVE. For the derivation of the sign at present in use from the letter C, see CLEF.

Soprano. Alto. Tenor.

The pitch-note of horns, trumpets, and other brass instruments is usually written as if it were C, whatever the actual pitch of the instrument (see TRANSPOSING INSTRUMENTS). The drums which used to be given in the score in the key of C, are now printed as played.

As a sign of time C stands for common time, 4 crotchets in a bar; and ₵ for allabreve time, with 2 or 4 minims in a bar. These signs represent, not the letter C, but the unbarred and barred semicircle respectively of the complicated old system of rhythmic notation. See TIME-SIGNATURE. G.

The staveless designation of notes, according to the system long used in Germany, has been adopted in England during the past quarter of a century, for the names of the notes in various octaves, but in past times in England the nomenclature was very vague. Organists and writers on the organ have been in agreement for many years, and 'great C,' 'double C,' and 'tenor C' have been long recognised as denominating the notes sounded by pipes of 16, 8, and 4 feet respectively. 'High C' and 'low C' are terms which can only be understood in relation to different voices or instruments, and even then are sufficiently vague. The terms 'in alt' and 'in altiss' are rather loosely used, and, though as a general rule it may be taken that the octave called 'in alt' begins on the G above the treble stave, yet many persons call the F above it the 'F in altiss' instead of the 'F in alt.' It is greatly to be wished that the reasonable plan of designation shown above the notes in the following example should be generally understood by scientists and musicians. The main difficulty in regard to its universal adoption is that the note C of the 'Great

Octave' (German system) is identical with CC of the organ-nomenclature. M.

CABALETTA, also written CABBALETTA and CAVALETTA, originally CAVATINETTA, from CAVATINA, usually signifies the short final quick movement of an air. W. H. C.

CABEL, MARIE JOSEPHE, properly CABU, *née* DREULETTE, born at Liège, Jan. 31, 1827. Showed at an early age a great talent for the piano. After the death of her father she became acquainted with Cabu, a teacher of singing, who discovered her fine voice, instructed, and finally married her. In 1847 she went with her husband to Paris, and first appeared at the Château des Fleurs. On Meyerbeer's recommendation she studied at the Conservatoire in 1848-49, and in the latter year made her début at the Opéra Comique, with little effect, in 'Val d'Andorre' and 'Les Mousquetaires de la Reine.' She was next engaged at Brussels for three years, and obtained a great success. After performances at Lyons and Strasburg she appeared at the Lyrique, Paris, Oct. 6, 1853, as Toinon, on production of 'Le Bijou Perdu' (Adam). She also appeared in new operas, viz. 'La Promise' (Clapisson), March 16, 1854, and 'Jaguarita l'Indienne' (Halévy), May 14, 1855. In 1854 she came to England with the Lyrique company. She first appeared on June 7 in 'Le Bijou,' and made a great success in the 'Promise,' 'Fille du Régiment,' and 'Sirène.' On Feb. 23, 1856, she reappeared at the Opéra Comique on the production of 'Manon Lescaut' (Auber), and remained there until 1861, her best new part being Catherine,[1] on the revival of 'L'Étoile du Nord.' On April 4, 1859, she created the part of Dinorah (written for her) on the production of 'Le Pardon de Ploërmel.' In 1860 she played the Figlia del Reggimento at Her Majesty's Theatre, July 14, and appeared in the Shadow scene from 'Dinorah,' July 28. In 1861 she played at St. Petersburg, and afterwards renewed her successes in revivals of 'Le Bijou,' 'Jaguarita,' and appeared as Féline on the production of 'La Chatte merveilleuse' (Grisar), March 18, 1862. In 1861 she was again at the Lyrique, and on March 21, 1863, played in 'Così fan Tutte,' with a new libretto adapted to 'Love's Labour's Lost.' From 1865 to 1870 she was again at the Opéra Comique, and among her new parts were Philine in 'Mignon,' Nov. 17, 1866, and Hélène, 'Le Premier Jour de Bonheur,' Feb. 15, 1868. In 1871 she sang at the New

[1] Mme. Vandenheuvel, then Caroline Duprez, daughter of the tenor, was the heroine on its production, not Mme. Cabel.

Philharmonic and other concerts, and in 1872 sang at the Opéra Comique, London, in the 'Fille du Régiment,' 'L'Ambassadrice,' and 'Galathée.' She played in the French provinces until 1877, but in 1878 was struck with paralysis, from which she never wholly recovered. She died at Maisons Laffitte, May 23, 1885. Her voice was not large, but sympathetic and of extraordinary flexibility, and she was a very clever actress.

A brother-in-law (or son) of hers, ÉDOUARD, was a singer at the Opéra Comique and the Lyrique, and sang the song of Hylas in 'Les Troyens à Carthage.' See Berlioz's *Memoirs*. A. C.

CABEZON (or CABEÇON), FELIX ANTONIO DE, born March 30, 1510, at Madrid, although blind from birth became an organist and harpsichord player of great eminence; he was 'musico de la camera y capilla del Rey Don Felipe II.' He died at Madrid, in March 1566. (Fétis gives the day as the 21st, Pedrell, in the Spanish edition of his works, the 24th, and Eslava the 26th of the month, while Riemann's dictionary gives the 26th of May.) After his death his son, Hernando de Cabezon, edited a set of instrumental compositions, many of them arranged from vocal works by other composers, for 'tecla' (apparently some kind of keyed instrument), harp, and lute (vihuela), under the title of *Obras de musica*, etc., 1578, adding a few pieces of his own. In Ritter's *Geschichte des Orgelspiels* five pieces are reprinted, and the whole was reissued by Pedrell in his *Hispaniæ schola musicæ sacræ*. M.

CACCINI, GIULIO, a native of Rome, known also as GIULIO ROMANO, born, according to the preface of his own *Nuove Musiche*, in 1558 or 1560. He learned to sing and play the lute from Scipione della Palla, and in 1578 removed to Florence, where he was in the service of the Grand Duke of Tuscany for many years. In 1605 he visited Paris with his daughter Francesca (see below). He is supposed to have died about 1615 (Vogel in the *Vierteljahrsschr.* v. 533). Great as a singer, he was still greater as a reformer in music. Though neither harmonist nor contrapuntist, it was he who, following the lead of V. Galilei, first gave countenance and importance to music for a single voice. The recitatives which he composed and sang to the accompaniment of the theorbo, amid the enthusiastic applause of the musical assemblies meeting at the houses of Bardi and Corsi in Florence, were a novelty of immense significance. They were the first attempt to make music dramatic, to use it as the expression of emotion. From such small beginnings he proceeded to detached scenes written by Bardi, and thence to higher flights. The pastoral drama of Dafne, written by Rinuccini and set to music by Caccini and Peri in 1594, and still more the 'Euridice, Tragedia per Musica,' of the same poet and the same musicians in 1600, were the beginnings of the modern opera. Other compositions of Caccini's were the 'Combattimento d'Apolline col Serpente,' 'Il ratto di Cefale' (with Peri), and 'Le nuove Musiche,' a collection of madrigals and canzone for a single voice. 'Euridice' has been published—but with the name of Peri alone attached to it—by Guidi (1863, 8vo). Caccini's first wife composed an opera, and his daughter FRANCESCA was celebrated both as a singer and composer. [See *Quellen-Lexikon*, Parry's *Music of the 17th century* (*Oxford History of Music*, vol. iii.) pp. 35, 41, etc., and *Rivista Musicale*, iii. 714.]

CACHUCHA (Spanish). An Andalusian dance, introduced to the theatre by Fanny Elssler in the ballet of 'Le diable boiteux' (1836), the music of which is in 3-4 time, and closely resembles the BOLERO. The dance-tune was originally sung with a guitar accompaniment. Of the origin of the name nothing certain is known. E. P.

CADEAC, PIERRE, master of the choristers at Auch about the middle of the 16th century, church-composer of great merit in his day; composed masses and motets for the most part published in the following collections:—'Quintus liber Motettorum' (Lyons, 1543); Gardano's 'XII Missæ' (Venice, 1554); and 'Missarum Musicalium' (Paris, 1556). A four-part mass was published in Paris in 1556, and three others in 1558. M. C. C.

CADENCE. A term of the utmost importance in music of all periods. It will be well to consider it under several heads:—(*a*) in mediæval music, and (*b*) in modern music.

(*a*.) In mediæval music what is now called a Cadence or Close[1] was known as *Clausula*.

1. The most important Close employed in polyphonic music, is the *Clausula vera*, or true Cadence, terminating on the final of the mode. The *Clausula plagalis*, or Plagal Cadence, is rarely used, except as an adjunct to this, following it, at the conclusion of a movement, in the form of a peroration. A close, identical in construction with a true cadence, but terminating upon some note other than the final of the mode, is called a *Clausula ficta*, *subsidiaria*, or *media; i.e.* a False, Subsidiary, or Medial Cadence. A *Clausula vera*, or *ficta*, when accompanied, in the counterpoint, by a suspended discord, is called a *Clausula diminuta*, or Diminished Cadence.

Though the *Clausula vera* is the natural homologue of the perfect cadence of modern music, and may, in certain cases, correspond with it, note for note, it is not constructed upon the same principles—for the older progression

[1] It is necessary to be very cautious in the use of these two English words, which, in the 18th century, were not interchangeable. Morley, for instance, at pp. 73 and 127 of his *Plaine and Easie Introduction* (2nd Edit. 1608) applies the term 'Close' to the descent of the *Canto fermo* upon the Final of the Mode; and 'Cadence' to the dissonance with which this progression is accompanied, in the Counterpoint, when the form employed is that known as the *Clausula diminuta*. In cases like this, it is only by reference to the Latin terms that all danger of misconception can be avoided.

belongs to what has been aptly called the 'horizontal system,' and the later one, to the 'perpendicular, or vertical system.'[1] In the *Clausula vera*, the *Canto fermo* must necessarily descend one degree upon the final of the mode; the counterpoint, if above the *Canto fermo*, exhibiting a major sixth, in the penultimate note; if below it, a minor third. In the *Clausula diminuta*, the sixth is suspended by a seventh, or the third, by a second. In either case, the cadence is complete, though any number of parts may be added above, below, or between, its two essential factors. The constitution of the perfect cadence is altogether different. It depends for its existence upon the progression of the bass from the dominant to the tonic (see below); each of these notes being accompanied by its own fundamental harmony, either with, or without, the exhibition of the dominant seventh in the penultimate chord. But, by the addition of a sufficient number of free parts, the two Cadences may be made to correspond exactly, in outward form, through the joint operation of two dissimilar principles; as in the following example, in which a *Clausula vera*, represented by the semibreves, is brought, by the insertion of a fifth below the penultimate note of the *Canto fermo*, into a form identical with that of the perfect cadence.

Clausula vera. Clausula diminuta.

A close, formed exactly like the above, but terminating upon the mediant of the mode, is called a *Clausula media*. In like manner, a *Clausula ficta*, or *subsidiaria*, may terminate upon the dominant, or participant of the mode, or upon either of its conceded modulations.[2]

The form of *Clausula plagalis* most frequently employed by the polyphonists was that in which, after a *Clausula vera*, the last note of the *Canto fermo* was prolonged, and treated as an inverted pedal-point. It is used with peculiarly happy effect in Mode IV—the plagal derivative of the Phrygian—in which the impression of a final Close is not very strongly produced by the *Clausula vera*.

Clausula vera. Clausula plagalis.

The Dominant of this mode is the fourth degree above its final, corresponding with the modern Sub-dominant. And, as this forms so important an element in the treatment of the inverted pedal, modern composers apply the term Plagal to all cadences in which the subdominant precedes the tonic bass. The term serves its purpose well enough; but it rests upon an erroneous basis.

In all the *Clausulæ* hitherto described, the two essential parts form together, in the final note, either an octave, or unison. There is yet another class in which the parts form a fifth.

Morley[3] seems inclined to class these among the true closes; but most early writers regard them as *Clausulæ fictæ, vel irregulares.*

II. MEDIAL CADENCE (*Clausula in medio modi*). In plain chant melodies, the Medial Cadence sometimes leads to a close so satisfactory that it almost sounds final; as in the first ending of the first tone—

In polyphonic music, it is susceptible of infinite variety of treatment, as may be seen from the following examples:—

[1] See Modes. [2] See Harmony.

[3] *Plaine and Easie Introduction*, p. 74 (2nd edition, 1608).

In the selection of these examples, we have confined ourselves exclusively to true cadences, for the sake of illustrating the subject with the greater clearness: but the old masters constantly employed cadences of other kinds, in this part of the mode, for the purpose of avoiding the monotony consequent upon the too frequent repetition of similar forms. It is only by careful study of the best works of the best period, that the invigorating effect of this expedient can be fully appreciated. [See Mediant; Modes, the Ecclesiastical; Modulations.]

W. S. R.

(*b*) I. Perfect Cadence. Cadences, or (as they are often called) Closes, are the devices which in music answer the purpose of stops in language. The effect is produced by the particular manner in which certain chords succeed one another, the order being generally such as to produce suspense or expectation first, and then to gratify it by a chord which is more satisfying to the ear. They are commonly divided into three kinds—the Perfect cadence, the Imperfect cadence, and the Interrupted cadence. Some writers specify a greater number, but this only tends to confusion and misconception. All that is requisite is to group the various kinds under names which mark their common effect. Thus every cadence which can be used satisfactorily to end a movement must of necessity be a Perfect cadence. Every cadence which is broken away from at the very moment when it seemed to promise a conclusion is obviously an Interrupted cadence; and every cadence which without producing the effect of interruption leaves the mind unsatisfied and expecting something more should be called an Imperfect cadence. And this classification seems to include all the varieties. Every composer in writing feels that certain cadences are fitted for particular places in his work, and endeavours to give variety in his treatment of them. But it is unwise to give all these possible varieties definite titles, as what may answer the purpose of a full stop in one movement may only produce the effect of a semicolon in another, according to the calibre of the work.

The ideas at the root of the perfect cadence are two: first, that the key be emphatically defined; and secondly, that the expectation roused by the doubtful or discordant nature of one chord be absolutely satisfied by another.

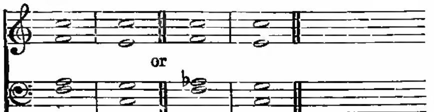
The simplest and most perfect manner of obtaining these effects is the progression from dominant to tonic harmony, as in the example, which is the type of all perfect cadences.

Here the key is strongly marked by the number of notes proper to it which are employed, and also, as Helmholtz has pointed out, 'by the distinct passage from the remotest parts of the scale to the centre of the system' of the key, since the dominant chord contains the notes which are most remote in their relation to the tonic. On the other hand, the tonic chord in its first position is the only chord sufficiently decisive to be used as a conclusion; and the dominant harmony must in any case be doubtful and inconclusive, even when concordant, and the effect is enhanced when, as in the example, a discord is made use of.

The common use of the major third in the tonic chord in the final cadences of pieces in a minor key (see Tierce de Picardie) is for the purpose above mentioned, of marking the key strongly, as the minor third is more obscure in character than the major third, and without the

latter, especially in vocal music, the conclusion would not be so clear and incisive.

In old times, especially in church music, another very simple form of cadence was common; viz. that in which the penultimate chord is that of the sub-dominant or 4th of the key, either major or minor, as, in the key of C—

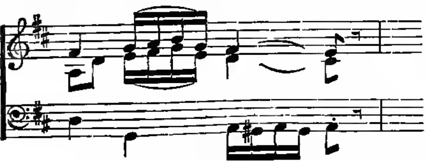


These two forms of the perfect cadence were distinguished as the Authentic and the Plagal, from the two main divisions of the ancient church modes. The latter is not so frequently used in modern music, except sometimes for variety, or to follow some particular turn of romance or sentiment which is expressed in the music.

II. The Imperfect Cadence, or Half-Close. The commonest form of Imperfect cadence is just a reversal of the dominant perfect cadence, so that the harmony of the dominant or 5th of the key is preceded by that of the tonic. In this case the effect will evidently not be conclusively satisfying, because a piece can only come to a complete stop on the harmony of the tonic. So, in the key of C, the cadence, Fig. 1,

will leave the mind unsatisfied, though to a certain extent it produces the effect of a stop.

Another common form of imperfect cadence is shown in Fig. 2, where the harmony of the dominant is preceded by that of the supertonic, or 2nd note of the scale, direct or in inversion, as in Mozart's Quartet in G, No. 1—



or the following from Beethoven's Symphony in C minor—

The chord of the submediant does not often occur as the penultimate, but it has been tried, as by Carissimi, as follows—

The chord of the augmented sixth is also not unfrequently found, as

from the Fugue in Beethoven's Sonata in B♭, opus 106.

The diminished seventh which is derived from the supertonic root is also common in various positions as (*a*) from the second of the Preludes in F minor in Bach's 'Wohltemperirtes Clavier.'

As an example of an Imperfect Cadence which concludes on a chord other than the Dominant the passage (*b*) from the slow movement of Beethoven's Violin Sonata in C minor, op. 30, will serve.

Occasionally the Imperfect Cadence appears to belong to another key, which is used transitionally on principles which are explained near the conclusion of the article Harmony. The following instance is from Mozart's Quartet in G, No. 1—

in which case the two chords forming the Imperfect Cadence are the only ones not in the key of G in the whole passage up to the first perfect cadence, and cannot be considered as constituting a modulation.

The properties of the Imperfect Cadence were apprehended by the earliest composers of the modern harmonic period, and it is frequently found in works of quite the beginning of the 17th century. An example from Carissimi has been given above. In the instrumental music of the epoch of Haydn and Mozart and their immediate predecessors and successors it played a conspicuous part, as the system of Form in Music which

was at that time being developed necessitated in its earliest stages very clear definition of the different sections and periods and phrases of which it was constructed, and this was obtained by the frequent use of simple and obvious forms of Perfect and Imperfect Cadences. The desire for continuity and intensity of detail which is characteristic of later music has inclined to lessen the frequency and prominence of cadences of all kinds in the course of a work, and to cause composers in many cases to make use of more subtle means of defining the lesser divisions of a movement than by the frequent use of recognisable Imperfect Cadences.

In Ellis's translation of Helmholtz the term 'Imperfect Cadence' is applied to that which is commonly called the Plagal Cadence. This use of the term is logical, but unfortunately liable to mislead through its conflicting with customary use. The common application of the term which has been accepted above is also not by any means incapable of a logical defence, but it must be confessed to be inferior both in accuracy of definition and comprehensibility to the expression 'Half-close,' which expresses admirably both the form of the succession of chords and the office it most frequently performs in music.

Cadences both perfect and imperfect are to a certain degree dependent on the position they occupy in the group of bars or rhythms which constitute the period or phrase; for when the succession of chords which theoretically constitutes a cadence occurs in the middle of a continuous passage it has not any actual significance of the kind implied by a cadence, but only when it occurs at the end of a period or phrase of some sort. This point is more important to note in relation to the Imperfect than to the Perfect Cadence; since the latter, being absolutely final, is restricted both as to its penultimate and to its ultimate chord.; but the former being final only relatively to an incomplete portion of the music, as a comma is to an incomplete portion of an entire sentence, admits of variety not only in its penultimate but also in its ultimate chord; the chief requisites being that the final chord shall be sufficiently clear in its relation to the Tonic and sufficiently simple in its construction to stand in a position of harmonical prominence, and be listened to without any strong craving in the mind for change or resolution; since the chord which comes last must inevitably have much stress laid upon it.

It is a common practice with writers of treatises on harmony to give a series of chords preparatory to the two final ones which are given above as the perfect cadence. This makes it look as though the treatises were meant to teach people to make music at so much a yard; for a man who really has something to say in music which he feels naturally is only hampered and worried with every extra direction of the kind, which tells him to put in so much that cannot possibly mean anything because it is everybody's property. A real musician only requires directions and general principles, which are capable of considerable expansion according to the power of his genius. The rule seems simply to be that, relative to the degree in which the cadence is final, the passage which immediately precedes it must mark the key in which it is made. The sense of the key in which any movement is written is of extreme importance for the comprehension of the music, especially in instrumental music, and such as depends much upon its form of construction. Hence a cadence of any finality must mark the key strongly. Subordinate cadences, such as occur in the course of the movement, especially apart from the broader divisions of the movement, need not be so marked; but if the final cadence of the whole movement, or that of an important subdivision of a movement, is simply a couple of chords or so immediately succeeding a passage in a foreign key, the sense of whereabouts is lost, and an entirely unsatisfactory effect produced by the indecisiveness of the conclusion.

The tendency of modern music has been to avoid full cadences in the course of a piece of music, and when they become necessary to vary them as much as possible. The former, because frequent cadences make a movement into a fragmentary series of continually recommencing passages, coming each time to a full stop and beginning again; the latter, because the mind has become so habituated to the form of the ordinary perfect cadence that in a movement of highly emotional character it comes rather like a platitude. Besides, though form is a great and often the principal element of beauty in a movement, to make it too obvious by the marked nature of the cadences destroys the interest and freshness of the work. Mozart marked the divisions of his movements very strongly, but in his day the forms of instrumental music were not by any means so familiar as they are now, and their being strongly marked was necessary for their due comprehension. Besides, in Mozart's day people had much more time to sit down and rest between one action and another than they seem to have now, and perfect cadences are exactly like sitting down and resting when one tune is over so as to be fresh for the next when it makes its appearance. And the analogy goes even further, for the movement in which one sits down least often and least completely is that which is most like one great action with a single principle at its basis rather than a series of somewhat disconnected motions, which are chiefly recommended by their mutual contrasts and relative proportions.

With regard to the position of the chords in the bar, the commonest position is that in which the final chord is on the first beat of the bar, or the strongest beat of all when the bars are

thrown into groups by the rapidity of the time of the movement. So that the cadence proceeds from a chord without emphasis to a chord with it, or in other words, from the unaccented to the accented part of the bar; as first—

from Mozart's Quartet in A, No. 5; or—

from his Quartet in E♭, No. 4.

The next commonest position is to find the final chord in the middle of a bar which is equally divisible into two halves, as on the third beat of a bar of four, and the fourth of a bar of six. Of both of these Mozart makes very frequent use—as in the first movement of the first Quartet, the slow movement of the Quartet in B♭, the Rondo for pianoforte in A, and the Variations in the Sonata in A. Very often he seems to use this position with a sense of its being weaker and less conclusive than that in which the last chord falls on the first beat of a bar, and hence as a kind of pseudo-imperfect cadence; as in the slow movement of the Quartet in D minor, No. 2, which begins thus—

Cadences are also, but far more rarely, found occupying reversed positions, as in polonaises, where the last chord of a cadence, owing to the peculiar rhythmic character of the movement, frequently falls on the last beat of a bar of three; as in Chopin's Polonaise in C♯ minor—

In Mozart's Rondeau en Polonaise, from the Sonata in D, the cadences fall on the second beat, as in

where the B and D are merely suspensions of the final chord of A—and in Beethoven's Quartet in A minor, op. 132, the last chord of the cadences in the movement 'Allegro ma non tanto,' falls on the second beat of a bar of three—

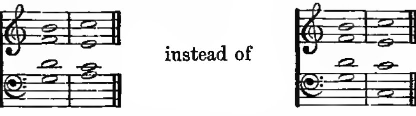
and in the slow movement of his Quartet in B♭, op. 130, at the end, the last chord falls on the last beat of a bar of four—

so that in point of fact the greatest authorities may be quoted to justify cadences in almost any position in the bar; but the last-mentioned instances are decidedly exceptional, and can only be justifiable when the movement in which they are used has some very marked peculiarities of rhythm or a very strong emotional character.

C. H. H. P.

III. The Interrupted Cadence is a progression which seems to tend towards the final Tonic chord of a perfect cadence through the usual Dominant harmony, but is abruptly deflected; so that the promised conclusion is deferred by the substitution of other harmony than that of the Tonic, after the Dominant chord which seemed to lead immediately to it.

The form which is frequently quoted as typical is that in which the chord of the submediant or third below the Tonic is substituted for the final Tonic chord, as—



from which the principle will be readily grasped.

But in point of fact this gives but a very

small notion of what an interrupted cadence really is. For it can only be distinguished from an imperfect cadence with certainty by reference to the context. The latter is a definite stop occurring in the natural course of the music, and marking a period, though not in such a way as to enable the passage which it ends to be taken as complete in itself. But the former is an abrupt and irregular interruption of the natural flow of the music towards its anticipated termination in a perfect cadence, postponing that termination for a time or altogether avoiding it. Thus at the end of the first movement of the Sonata in C, op. 53, Beethoven keeps on postponing the perfect cadence in this manner—

In his later works an entire evasion of the cadence is frequent, as in the first movement of the Sonata in E, op. 109—

In reality the number of different forms is only limited by the number of chords which can possibly succeed the Dominant chord, and it is not even necessary that the chord which follows it and makes the interruption shall be in the same key.

Handel frequently used the Interrupted Cadence or 'Inganno' (Deception) as it was formerly called), to make the final cadence of a movement stand out individually and prominently. The following example, which is made to serve this purpose, is from his Fugue in B minor from the set of Six for the Organ, and is very characteristic of him:—

It is interesting to compare this with the conclusion of the last movement of Schumann's Sonata for Pianoforte in G minor, where a very definite Interrupted Cadence is used for the same purpose of enforcing the final cadence of the work by isolation, and the process is carried out in a thoroughly modern spirit and on an extended scale. The Interrupted Cadence itself is as follows:

Bach frequently used Interrupted Cadences to prolong the conclusion of a work, and a form which seems to have been a great favourite with him is that in which the Tonic minor seventh succeeds the Dominant chord, thereby leading to a continuance and enforcement of the Tonic in the succession of chords at the conclusion. There are very remarkable and beautiful examples of this in the Prelude in E♭ minor, No. 8, in the Wohltemperirtes Clavier, the last—four bars from the end—being in the form above mentioned. The effect of this form of the Interrupted Cadence is most powerful when the seventh is in the bass, and of this there is a very striking instance in his Cantata 'Jesu, der du meine Seele,' which is as follows:—

Mozart uses the Interrupted Cadence in a similar manner to extend the movement or the section in which it occurs. As an example from him, which presents yet another form, the following from his Quartet in A, No. 5, may be taken :—

Beethoven also uses Interrupted Cadences for similar purposes to the instances quoted above ; but latterly he employed them in a manner which it is important to take note of as highly characteristic and conspicuous in modern music. This is the use of them actually in place of a perfect cadence, taking them as a fresh starting-point, by which means greater continuity is obtained. A well-known example is that at the end of the slow movement of the Appassionata Sonata, by means of which the last two movements are made continuous. Two very remarkable and unmistakable instances occur also in the first movement of the Sonata in E (op. 109), one of which has already been quoted in this article (see p. 440*b*). Another instance occurs in the String Quartet in A minor (op. 132), where, the cadence of F major being interrupted at *, the 'working out' commences in the next bar, proceeding immediately with modulation, as follows :—

Wagner has made great use of this device, and by it secures at once the effect of a conclusion and an uninterrupted flow of the music ; the voice or voices having a form which has all the appearance of a full cadence, and the instruments supplying a forcible Interrupted Cadence which leads on immediately and without break to the succeeding action. An instance which illustrates the principle very clearly is the following from 'Tristan und Isolde,' act i. sc. 3 :—

Another example which will probably be familiar is that at the conclusion of the chorus at the beginning of the 4th scene of the 2nd act of 'Lohengrin,' where Ortrud suddenly steps forward and claims the right to precede Elsa into the cathedral.

Beethoven also made occasional use of this device in 'Fidelio.' One specially clear instance is in the Finale of the last act, at the end of Don Fernando's sentence to Leonora—'Euch, edle Frau, allein, euch ziemt es, ganz ihn zu befrei'n.' By such means as this, one scene is welded on to another, and the action is relieved of that constant breach of continuity which resulted from the old manner of coming to a full close and beginning again. C. H. H. P.

IV. Mixed Cadence. The two most distinct and obvious forms of cadence are such as are formed either by the succession of dominant or of subdominant and tonic harmony, and these are respectively called Authentic and Plagal cadences. The term 'Mixed' has been applied to a cadence which is in some senses a combination of these two forms, by having both subdominant and dominant harmony in close juxtaposition immediately before the final tonic chord, by which means the tonality is enforced both by the succession of the three most important roots in the key, and also by giving all the diatonic notes which it contains. C. H. H. P.

V. Medial Cadence (in modern music). Besides its use as described above (see p. 435*b*), this term is also applied, by Dr. Callcott, and some other writers on modern music, to closes in which the leading chord is represented by an inverted instead of a fundamental harmony.

Though cadences of this kind are in constant use, we rarely meet with them, now, under their old name. Most writers of the present day prefer to describe them as inverted cadences, specifying particular instances, when necessary, as the first or second inversion of the perfect, imperfect, or plagal cadence, as the case may be : the opposite term, 'radical cadence,' being reserved for closes in which the root appears in the Bass of both chords. W. S. R.

CADENZA in its simplest acceptation is a flourish of indefinite form, introduced upon a bass note immediately preceding a close of some finality ; that is, occupying the position of full stop either to an entire movement, or to an important section of one. The custom was most probably originated by singers, who seized the opportunity afforded by the chord of 6–4 on the dominant immediately preceding the final close of an aria or scena, to show off the flexibility, compass, and expressive powers of their voices to

the highest advantage; so that the piece coming to an end immediately afterwards, the audience might have the impression of astonishment fresh in their minds to urge them to applause.

The idea thus originated spread widely to all kinds of music, and in course of time its character has changed considerably, though the flourish of which it is composed is still its conspicuous feature. In instrumental music it fulfils a peculiar office, as it is frequently introduced where a pause in the more important matter of the movement is desirable, without breaking off or allowing the minds of the audience to wander. Thus it occurs at points where the enthusiasm of the movement has been worked to such a heat that it is necessary to pause a little before returning to the level of the natural ideas of the themes, as in Liszt's 'Rhapsodie Hongroise' in A, and Chopin's 'Nocturnes' in F minor and C♯ minor. Chopin uses them frequently when the main business of the movement is over, in order to prevent the close, which follows immediately, being too abrupt. At other times it occurs as a connecting link between two movements, or between an introduction and the movement following it, where for certain reasons it is expedient to pause a while on some preparatory chord, and not to commence serious operations before the minds of the audience have settled to the proper level.

Specimens of this kind are common in the works of many great masters—*e.g.* Beethoven's Sonata in E♭ (op. 27, No. 1), Adagio; Sonata pathétique; Variations in F (op. 34); Brahms's Sonata in F♯ minor (op. 2, last movement); Mendelssohn's 'Lobgesang,' connecting the first movement with the second.

The greater cadenza, which is a development of the vocal flourish at the end of a vocal piece already spoken of, is that which it is customary to insert at the end of a movement of a concerto for a solo instrument. Like its vocal predecessors the cadenza usually starts from a pause on a chord of 6–4 on the dominant, preparatory to the final close of the movement, and its object is to show off the skill of the performer. Such cadenzas may occur either in the first or last movement, and even in both, as in Mozart's Concerto in D minor and in Beethoven's in G. With regard to their form there is absolutely no rule at all. They should contain manifold allusions to the chief themes of the movement, and to be successful should be either brilliant or very ingenious; containing variety of modulation, but rather avoiding progressions which have been predominant in the movement itself; and the more they have the character of abandonment to impulse the better they are. It was formerly customary to leave the cadenzas for improvisation, and certainly if the frenzy of inspiration could be trusted to come at the right moment, impromptu cadenzas would undoubtedly be most effective in the hands of real masters of the situation. Moreover, it is chiefly in the sense of their being the exposition of the player's special capacities that they are defensible, for as far as the composer is concerned the movement generally offers full opportunities for display of the powers of the executant.

Still custom is generally stronger than reason, and it does not seem likely that cadenzas will yet die out. And as the art of improvisation is for various reasons considerably on the wane it will probably become habitual for composere to write their own cadenzas in full, as Beethoven has done in the E♭ Concerto, and Schumann in his A minor Concerto.

Beethoven also wrote cadenzas for his other concertos and for Mozart's D minor; and these are published separately. Many famous musicians have supplied the like for classical concertos, Moscheles for Beethoven's, and Hummel for Mozart's. Perhaps the latest instance of this custom is the Violin Concerto of Brahms, for which Joachim wrote the cadenza.

The indication for a cadenza, when not written out in full is a pause or fermata 𝄐 indicating its commencement, usually over a rest in the solo part, and over the last note in each of the orchestral parts; another pause over a shake in the solo part indicating its close. The example is taken from Beethoven's Concerto in C minor, pianoforte part. C. H. H. P.

CÆCILIAN SOCIETY. This society was instituted in 1785 by a few friends who met weekly at each other's houses for the practice of hymns and anthems, but subsequently, having some instrumentalists among them, they united for the performance of sacred works on a more extended scale, and especially of Handel's oratorios. In 1791 an organ was erected in the society's room in Friday Street, and after meeting at Plasterers' Hall, Painters' Hall, Coachmen's Hall, and the Paul's Head, they obtained the use of Albion Hall, London Wall, where they met until the dissolution of the society in 1861. Among the works performed were all Handel's oratorios and secular compositions, Haydn's 'Creation' and 'Seasons,' Mozart's and Haydn's masses and Mendelssohn's 'Elijah.' For many years the society gave the only performances of the oratorios of Handel and Haydn which could be heard (except during Lent at the theatres of Covent Garden and Drury Lane), and its work may be said to have been taken up by the Sacred Harmonic Society, which was founded nearly thirty years before the dissolution of the older body. The first conductor of the Society was an amateur named Vincent, who filled the office for upwards of thirty years, when he was succeeded by Thomas Walker, whose place was taken by his son Joseph Walker. James Shoubridge was the last conductor. Among the

earlier members were some professional musicians who afterwards became famous, and who when they had left its ranks frequently came to assist in its performances. The society was almost entirely self-supporting, and the tickets of admission to the concerts were given by the members to their friends. C. M.

CÆSAR, JULIUS, M.D., of an ancient family of Rochester, many of whom are interred in the cathedral there, was an amateur composer in the 17th century. He was probably the same Julius Cæsar who was a son of Joseph Cæsar, and a grandson of Dr. Gerard Cæsar of Canterbury, and who died at Strood on April 29, 1712, aged fifty-five. Some catches by him appear in the collection entitled 'The Pleasant Musical Companion,' and one is in the Fitzwilliam Museum at Cambridge. W. H. H.

CÆSAR, *alias* WILLIAM SMEGERGILL, was the composer of some songs published in 'Select Musicall Ayres and Dialogues,' 1653, and other collections of the period. W. H. H.

CAFARO, PASQUALE, otherwise CAFFARO, and also known by his name of endearment CAFFARELLI, was born at Lecce near Naples Feb. 8, 1706. He was destined by his parents for a scientific career, but his bent towards music showed itself too strongly for contradiction, and he was entered at the Conservatorio della Pietà, at that time under the direction of Leonardo Leo. On the termination of his studies he became Maestro at the Chapel Royal of Naples, and in time Director of the Conservatorio as well. He died Oct. 23, 1787. Grace, purity of style, and poverty of invention were the characteristics of his work. The following are among his best-known productions:—

Oratorio per l' Invenzione della Croce; Naples, 1747. Ipermnestra; Naples, 1751. La Disfatta di Dario; 1756. Antigono; 1754. L' Incendia di Troia; Naples, 1757. Cantata a tre voci per festeggiare il giorno natalizio di Sua Maestà; Naples, 1764. Arianna e Teseo; 1766. Cantata a tre voci, etc. etc.; Naples, 1766. Il Creso; 1768. Giustizia placata; 1769. Cantata a più voci per la Traslazione di sangue di S. Gennaro; Naples, 1769. L' Olimpiade; Naples, 1769. Antigono, reset to fresh music; 1770. Il Natale di Apollo, 1775. Betulia liberata. Il Figluolo prodigo ravveduto, 1745. Oratorio on S. Antonio of Padua. Il Trionfo di Davidde, Oratorio, 1745.

A Stabat Mater was printed at Naples in 1785. In addition to these there are in existence by Cafaro many pieces of church music, consisting of masses, psalms, motets, etc., of acknowledged merit. An 'Amen' for five voices by him is included in Novello's *Fitzwilliam Music.* [See list of works in *Quellen-Lexikon.*] E. H. P.

CAFFARELLI, GAETANO MAJORANO, DETTO, was born at Bari, Naples, April 16, 1703. His father was a peasant, and for some time opposed his son's inclination for music at the expense of his ordinary tasks. Gaetano, however, by his assiduous attendance at the musical services in a certain chapel, soon attracted the notice and favour of Cafaro or Caffaro (see above). This artist, recognising the genius of the boy, rescued him from the toil to which he was destined by his ignorant parents, sent him to Norcia to be prepared for the career of an *evirato*, according to the barbarous custom of those days; and, upon his return, gave him in his own house elementary instruction in reading, writing, and music. When sent to study at Naples under Porpora, the grateful youth, as was not unusual, called himself Caffarelli, in remembrance of his first protector. It is of this extraordinary singer that the story is told that he was kept by old Porpora for five or six years to the uninterrupted and unvaried study of one page of exercises; and that, at the end of this time, he was dismissed with these words, 'Go, my son: I have nothing more to teach you. You are the greatest singer in Europe.' Whether Porpora's object in this system was to secure the perfect equality of the voice, which in his opinion could not be otherwise gained, or to humble the boy's pride, which was inordinate—whether the story be true or false, certain it is that, according to all competent authorities, the singers whom he sent forth into the world, Farinelli, Caffarelli, etc., were superior to any that preceded or followed them. His valedictory words, in any case, were ill calculated to check the pride and presumption which made Caffarelli, throughout a career of marvellous success, always ridiculous, always odious, and always a contrast to the modest Farinelli. In 1724 he made his début at Rome in a female character, as was usual for sopranists, when his beautiful voice, perfect method, and handsome face, procured him his first triumph. He now easily obtained engagements, and sang with similar success in the principal cities of Italy until 1728, when he returned to Rome. Here his success was more brilliant than before, and than that of any previous singer. He was courted by the highest society, and in one of his very numerous 'bonnes fortunes' he nearly lost his life. Owing to a sudden alarm, he had to escape by passing the night in an empty cistern in a garden, where he caught a severe cold, which kept him to his bed for a month. After this he went about everywhere protected by four bravos from the vengeance of the husband. He left Rome safe, however, in 1730; and, after singing in other places, arrived in London at the end of 1737. Here he made his first appearance at the King's Theatre on Jan. 7, 1738, in the principal character in Handel's 'Faramondo,' and in 'Serse' on April 15. He also sang the part of Jason in Pescetti's 'La Conquista del vello d'oro' in the same year. His name does not appear again; and it is said that during all his stay in London he was never in good health or voice. He does not appear to have fulfilled the expectation that his coming had created. He now returned to Italy, and passed through Turin, Genoa, Milan, Florence, and Venice, in a triumphal progress. At Turin, when the Prince of Savoy told Caffarelli, after praising him greatly, that the princess thought it hardly possible that any singer could

please after Farinelli, 'To-night,' he replied, 'she shall hear two Farinellis!' What would have been thought of this answer by the lady who once exclaimed in delirious excitement 'One God, and one Farinelli!' At Naples he excited the wildest enthusiasm. While he was singing there he was told of the arrival of Gizziello, whom, as a possible rival, he was most anxious to hear and estimate for himself. He posted all the way to Rome, arrived in time for the opera, and took a back seat in the pit. After listening attentively to Gizziello's *aria di entrata* he could not master his emotion; but, rising from his seat, exclaimed 'Bravo, bravissimo, Gizziello! È Caffarelli chi te lo dice!' and fled precipitately from the theatre. Throwing himself into his carriage, he posted rapidly back to Naples, and found he had barely time to dress and appear at the opera, where his absence had already been remarked. In 1740 he returned to Venice, where he received a higher salary than any singer had received before,—800 sequins (=£385), and a benefit of 700 sequins (=£335), for a season of three months. He reappeared at Turin in 1746, and then at Florence and Milan. On the invitation of the Dauphine he went to Paris in 1750, and sang at several concerts, where he pleased as much as he astonished the critics. Louis XV. sent him a present of a snuff-box; but Caffarelli, observing that it was plain, showed the messenger who brought it, one of the gentlemen of the court, a drawer full of splendid boxes, and remarked that the worst of them was finer than the gift of the King of France. 'If,' said he, 'he had sent me his portrait in it!' 'That,' replied the gentleman, 'is only given to ambassadors.' 'Well,' was the reply, 'and all the ambassadors of the world would not make one Caffarelli!' This, when repeated, made the King laugh heartily; but the Dauphine sent for the singer, and, giving him a passport, said—'It is signed by the King himself,—for you a great honour; but lose no time in using it, for it is only good for ten days.' Caffarelli left France in dudgeon, saying he had not gained his expenses there. Stories about him are innumerable: Metastasio, in one of his letters, tells an amusing one, according to which the intervention of Tesi, the celebrated singer, alone saved him from a duel at Vienna, provoked by his arrogance and folly. At the age of sixty-five he was still singing; but he had made an enormous fortune, had purchased a dukedom, and built at Santo Dorato a palace, over the gate of which he inscribed, with his usual modesty, 'Amphion Thebas, ego domum.' A commentator added 'Ille cum, sine tu!' It will be inferred from the above that he was the rival of Farinelli, to whom by some he was preferred as a singer. He excelled in slow and pathetic airs, as well as in the bravura style; and was unapproached both in beauty of voice and in the perfection of his shake and chromatic scales. He is said to have been the first to introduce the latter embellishment in quick movements. He died Nov. 30, 1783, leaving his wealth and his dukedom to a nephew. J. M.

CAGNONI, Antonio, born Feb. 8, 1828, at Godiasco, in the district of Voghera, entered the Milan Conservatorio in 1842, remaining there until 1847. Two operas of small calibre were performed in the theatre connected with the establishment, but his first essay before the public was with 'Don Bucefalo,' given at the Teatro Rè in Milan in 1847. This opera buffa, although it has kept the stage in Italy, has never attained success outside its own country; it was given at the Italiens in Paris, but very coldly received. His successive operas have not been received with uniform favour, though several, especially among his later works, have been attended by good fortune. Between 1856 and 1863 he held the post of maestro di cappella at Vigevano, and while there devoted himself entirely to religious music. The following is a complete list of his operas:—

Rosalia di San Miniato (1845); I due Savojardi (1846); Don Bucefalo (1847); Il Testamento di Figaro (1846); Amori e Trappole (1850); La Valle d' Andorra (1854); Giralda (1852); La Fioraja (1855); La Figlia di don Laborio (1856); Il Vecchio della Montagna (1863); Michele Perrin (1864); Claudia (1866); La Tombola (1869); Un Capriccio di Donna (1870); Papà Martin (1871), produced by Carl Rosa at the Lyceum in 1875 as The Porter of Havre; Il Duca di Tapigliano (1874); Francesca da Rimini (1878).

In that year he retired to Novara, where he became maestro di cappella in the cathedral, and director of the Istituto musicale. Subsequently he produced nothing but sacred music. Two motets, 'Inveni David' and 'Ave Maria,' were published in 1886. In February of that year Cagnoni was made a commander of the order of the Corona. He was from 1886 maestro di cappella at Santa Maria Maggiore in Bergamo, where he died April 30, 1896. M.

CAHEN, Albert, French composer, born Jan. 8, 1846, was a pupil of Mme. Szarvady for piano, and of César Franck for composition. He wrote several works of considerable importance; his 'Jean le Précurseur,' a biblical drama, was performed at the Concert National, Jan. 25, 1874; and 'Endymion,' a 'poème mythologique,' at the Concerts Danbé, Jan. 1875. His début on the stage was made with 'Le Bois,' a one-act piece (Opéra-Comique, 1880); in 1886, 'La Belle au Bois dormant,' a 'féerie,' came out at the Geneva Theatre; 'Le Vénitien,' a four-act opera was given at Rouen in 1890; 'Fleur de Neiges,' a ballet, at Brussels 1891; and 'La Femme de Claude' at the Opéra-Comique, June 24, 1896. He also wrote a set of songs called 'Marines,' etc. He died at Cap d'Ail in March 1903, after a very painful illness. G. F.

CAHUSAC, Thomas. The founder of an important London firm of music publishers and instrument-makers. Thomas Cahusac senior was 'at the sign of the Two Flutes and Violin opposite St. Clement's Church in the Strand' as early as 1755, and from that date to 1798

he carried on an extensive business there. He died May 18, 1798, and an obituary notice in *The Gentleman's Magazine* describes him as 'the oldest musical instrument-maker in and near London.' His son Thomas before his father's death had been established in Great Newport Street, but he now joined his brother W. M. Cahusac at 196 Strand, and for two or three years a partnership existed. In 1802 Thomas, however, sets up as a musical instrument-maker at 41 Haymarket, and W. M. Cahusac retains the Strand business until shortly before 1814, when he is established at 79 Holborn; he retired about 1816, living in 1824 at Maida Hill, and in 1829 at Bexley in Kent. The Cahusac firm made flutes, violins, and other of the smaller kind of musical instruments, issued numbers of interesting pocket volumes of airs, and much sheet music. F. K.

ÇA IRA. The earliest of French revolutionary songs, probably first heard on Oct. 5, 1789. when the Parisians marched to Versailles. The words were suggested to a street-singer called Ladré by General La Fayette, who remembered Franklin's favourite saying at each stage of the American insurrection. The burden of the song was then as follows:—

Ah! ça ira, ça ira, ça ira!
Le peuple en ce jour sans cesse répète:
Ah! ça ira, ça ira, ça ira!
Malgré les mutins, tout réussira.

At a later period the burden, though more ferocious, was hardly more metrical:—

Ah! ça ira, ça ira, ça ira!
Les aristocrat' à la lanterne;
Ah! ça ira, ça ira, ça ira!
Les aristocrat' on les pendra.

The tune—the length and compass of which show that it was not composed for the song—was the production of a certain Bécour or Bécourt, a side-drum player at the Opera; and as a contre-danse was originally very popular under the title of 'Carillon national.'

G. C.

The tune quickly became popular in England, and many copies are found in sheet music and in collections of airs. One sheet, published by A. Bland, gives it with the French words as: 'Ah Ça Ira Dictum Populaire ou Carrillon National Chanté a Paris a La Fédération de 14 Juillet 1790.' This and other copies have a strain following on, and additional to the one printed above. The melody was employed in an opera entitled 'The Picture of Paris,' arranged by Shield and produced at Covent Garden on Dec. 20, 1790. For many years afterwards, under the name 'The Downfall of Paris,' or 'The Fall of Paris,' it was used for a pianoforte piece with many variations. F. K.

CALAH, John, born 1758, was organist of St. Mary's Church, and master of the Song School, Newark-on-Trent, 1782. In 1785 he was appointed organist of Peterborough Cathedral, and held the post till his death, August 5, 1798. He was buried in the New Building of the cathedral. He composed some cathedral music, songs, and a sonata for piano with violin and violoncello. M.

CALANDO (Ital.), diminishing *i.e.* in tone; equivalent to *diminuendo* or *decrescendo*, and often associated with *ritardando*. G.

CALASCIONE or COLASCIONE (Ital.; Fr. *Colachon*). The name of a finger-board instrument of the tamboura kind belonging to Lower Italy. The calascione is strung with two catgut strings tuned a fifth apart. The body of it is like that of an ordinary lute, but it is relatively smaller towards the neck. Of all finger-board instruments the calascione is most like the Nefer of the old Egyptian monuments; but it would be a bold hypothesis to derive the modern instrument from one used in such remote antiquity, the long-necked Egyptian tamboura having been depicted as early as the fourth dynasty—according to recent investigations about 4000 B.C. The strings of the calascione are touched with a plectrum, rarely by the fingers. The finger-board has frets of ivory. About 1767 the brothers Colas were noted performers on it. A. J. H.

CALDARA, Antonio, born about 1670 in Venice, where he was a member of the choir of St. Mark's and a pupil of Legrenzi. The various authorities on his life differ very widely as to some important dates, but it seems fairly certain that he led a wandering life for many years. He was at Vienna in 1712, when Astorga acted as godfather to his daughter. In 1714 (according to Fétis) he was appointed maestro di cappella at Mantua. If this was the fact, he must have kept the post for a very short time, as he was for a time in Rome, and, giving up his position there, entered the service of the King of Spain; but was compelled by his wife's ill-health to return to Italy, finally settling down in Vienna some time before Jan. 1, 1716, when he was appointed vice-capellmeister under

J. J. Fux, a post which he held until his death Dec. 28, 1736. In spite of his roving life, and of the prodigious fecundity of his talent, Caldara's music has many qualities of a high order. He could write with great dignity, and his church music contains many examples of beautiful polyphonic effect. (See an example in the writer's *Age of Bach and Handel* (*Oxford History of Music*, vol. iv.), pp. 53-59.) In his writing for solo voices, there is a tendency to the florid style that was beginning to come into fashion, but the well-known 'Come raggio del Sol' is a noble song. Eitner (*Quellen-Lexikon*) enumerates thirty-six oratorios, sixty-six operas, besides numerous masses, motets, cantatas, a string septet, a set of 'XII suonate a tre' (his op. 1, dated 1700), etc. M.

CALL, LEONARD VON, born in 1779; a guitar player and composer of harmonious and pretty part-songs, which were greatly in fashion in Germany at the beginning of the 19th century, and contributed much to the formation of the 'Männer Gesangvereine' in that country. Some pleasing specimens will be found in *Orpheus*. De Call is also known for his instruction book for the guitar. He died at Vienna, 1815. G.

CALL CHANGES. Ringers are said to be ringing call changes when the conductor calls to each man to tell him after which bell he is to ring, or when the men ring changes with the order in which they are to ring written out before them. When such changes are rung, each change is generally struck consecutively from ten to a hundred times. C. A. W. T.

CALLCOTT, JOHN WALL, Mus.D., was born Nov. 20, 1766, at Kensington, where his father carried on the business of a bricklayer and builder. Whilst a school-boy he had frequent opportunities of examining the organ at Kensington Church, and having formed an acquaintance with the organist, Henry Whitney, became a constant visitor to the organ-loft on Sundays. There he acquired his knowledge of the rudiments of music. His intention was to follow the profession of surgery, but the sight of a severe operation so seriously affected his nerves that he abandoned it and turned his attention to music. In this pursuit his studies were prosecuted without the aid of a master. In 1780 he wrote music for a play performed at Mr. Young's school. By frequent attendance at the Chapel Royal and Westminster Abbey he became acquainted, in 1782, with Drs. Arnold and Cooke, and the elder Sale, from whom he derived much musical knowledge, although he did not receive any regular instruction. In 1783 he became deputy-organist, under Reinhold, of St. George the Martyr, Queen Square, Bloomsbury, which post he held until 1785. About 1782 Dr. Cooke introduced him to the orchestra of the Academy of Ancient Music, and the associations he there formed gave him his first bias towards glee writing; he occasionally played the oboe in the orchestra of the Academy. In 1784 he had submitted a glee, 'O sovereign of the willing soul,' as a candidate for a prize at the Catch Club, which was not successful; but in 1785 he carried off three of the four prize medals given by the club by his catch 'O beauteous fair'; his canon 'Blessed is he'; and his glee 'Dull repining sons of care.' On July 4 in the same year he took the degree of Bachelor of Music at Oxford, setting as his exercise Dr. Joseph Warton's 'Ode to Fancy.' In 1786 he composed an ode for the Humane Society, and gained two prizes from the Catch Club for his catch 'On a summer's morning,' and his canon 'Bow down Thine ear.' The next year, determined (as he said) to show that if deficient in genius he was not wanting in industry, he sent in nearly 100 compositions as competitors for the prizes. Of this large number, however, two only succeeded in obtaining the coveted distinction, viz. the canon 'Thou shalt show me,' and the glee 'Whann Battayle smethynge'; whilst the members of the club, to prevent the recurrence of so troublesome and inconvenient an event, resolved that in future the number of pieces to be received from any one candidate should be limited to twelve, *i.e.* three of each kind—catch, canon, and serious and cheerful glees. In 1787 Callcott took an active part with Dr. Arnold and others in the formation of the Glee Club. In 1788, offended at the new regulation of the Catch Club limiting the number of compositions to be received from each candidate for prizes, he declined writing for it, but in the next year, changing his determination, he sent in the full number of pieces permitted, and succeeded in carrying off all the prizes, a circumstance unparalleled in the history of the club. The four compositions which achieved this feat were the catch 'Have you Sir John Hawkins' History?' the canon 'O that Thou would'st'; and the glees 'O thou, where'er, thie bones att rest,' and 'Go, idle boy.' In the same year he was elected a member of the Royal Society of Musicians, and in 1789 was chosen joint organist, with Charles S. Evans, of St. Paul's, Covent Garden, and four years later organist to the Asylum for Female Orphans, which he held till 1802. Although he now ranked as one of the ablest and most popular composers of the day he had but little skill in orchestral writing. He therefore availed himself of the opportunity afforded by the visit of Haydn to England in 1791 to take lessons in instrumental composition from that illustrious master. Whilst studying under Haydn, Callcott composed his fine song 'These as they change' for Bartleman. From 1790 to 1793 (after which the Catch Club ceased to offer prizes) he was awarded nine medals for his compositions; two in 1790 for the canon 'Call to remembrance,' and the glee 'O voi che sospirate'; three in 1791 for the catch 'Tom Metaphysician,' the canon

'I am well pleased,' and the glee 'Triumphant Love'; three in 1792 for the canon 'O Israel,' and the glees 'See, with ivy chaplet bound,' and 'Father of heroes,' and one in 1793 for the canon 'Christ being raised.' In the latter year he was appointed organist to the Asylum for Female Orphans. It was about this time that he began to study the works of the best theorists, and to feel the desire of appearing as a writer on the theory of music. Having acquired the MSS. of Dr. Boyce and his pupil, Marmaduke Overend, organist of Isleworth, he projected a musical dictionary, and made large collections for the work, of which in 1797 he issued a prospectus. On June 18, 1800, he proceeded Doctor of Music at Oxford, his exercise being a Latin anthem, 'Propter Sion non taceho.' In 1795, upon the formation of a volunteer corps at Kensington, Callcott accepted a commission in it. Aided by a subscription he formed a band for the corps in 1801, for which he not only purchased the instruments and composed and arranged the music, but even instructed the performers. In 1802 he wrote an anthem for Arnold's funeral. The compilation of his dictionary proceeding but slowly, and thinking the public had a right to expect some theoretical work from him, he employed himself in 1804 and 1805 in writing his Musical Grammar, which was published in 1806. In the latter year he wrote for Bartleman a scena upon the death of Lord Nelson, and was appointed in 1807 to lecture on German music at the Royal Institution. His anxiety to distinguish himself in this new position, combined with the heavy labours of which he had so unsparingly imposed upon himself, and the daily drudgery of teaching, seriously impaired his health, and his mind suddenly gave way. For five years his life was a blank. During that period (in 1809) his professional friends gave a concert on his behalf, and so strong was the desire to show sympathy for him that it was found that the opera-house in the Haymarket was the only building large enough to contain the numbers who thronged to be present. After an interval of rather more than five years Dr. Callcott so far recovered as to lead his friends to hope that his health was completely restored, but their hopes were in vain. Two or three years passed and he was again afflicted with the most terrible calamity which can befall frail humanity. He lingered until May 15, 1821, when he died at Bristol, being buried at Kensington on the 23rd of the month.

Dr. Callcott's principal works were his very numerous glees and other pieces of vocal harmony, mostly published singly, but he left in manuscript many anthems, services, odes, etc. His fine scena 'Angel of life' was written for Bartleman. His son-in-law, the late William Horsley, Mus. B., edited in 1824 a collection of his best glees, catches, and canons, in two folio volumes, with a memoir of the composer, and an analysis of his compositions. The work also contains a portrait of Callcott from a painting by his brother Augustus, afterwards Sir Augustus Callcott, R.A. Besides the above-named works Callcott was associated with Dr. Arnold in the selection, adaptation, and composition of the tunes for 'The Psalms of David for the use of Parish Churches' (1791). Dr. Callcott left a numerous family. His daughter, SOPHIA, became eminent as a teacher of the pianoforte, and his younger son, WILLIAM HUTCHINS CALLCOTT (born Sept. 28, 1807, died August 5, 1882) attained distinction as a composer and arranger. One of his songs, 'The last man,' met with remarkable success, and his anthem 'Give peace in our time, O Lord,' has been very generally admired. [His son WILLIAM ROBERT STUART CALLCOTT (1852-86) was a very promising musician and an organist of rare skill.] W. H. H.

CALLINET. See DAUBLAINE.

CALORI, ANGIOLA, was born at Milan, 1732, and came to London in 1758. Here she appeared in 'Issipile,' by Cocchi. In 1759 she sang in 'Ciro riconosciuto,' by the same composer; and in his 'Erginda,' 1760. In the next season she performed the part of Eugenia in Galuppi's 'Filosofo di Campagna,' but her name does not occur here again after that. She had a soprano voice of great extent, a profound knowledge of music, and extraordinary rapidity of execution. In 1770 she was singing at Dresden with great success. She returned to her native country in 1774, and continued to sing at the various operas of Italy till 1783. She died about 1790. J. M.

CALVARY, the English version of Spohr's oratorio of 'Des Heilands letzte Stunden.' The translation was made by Edward Taylor, and the first performance was given in the Hanover Square Rooms by the Vocal Society, under Mr. Edward Taylor, March 27, 1837. It was performed at the Norwich Festival of 1839 under Spohr's own direction. It was again given in his presence, but under Costa's baton, by the Sacred Harmonic Society, at Exeter Hall, July 5, 1852. G.

CALVÉ, EMMA, born at Madrid in 1864, was a pupil of Mme. Marchesi and of Puget, and made her début at Nice at a charity performance. Her first important appearance was at the Théâtre de la Monnaie, Brussels, as Marguérite, Sept. 23, 1882. Her first engagement in Paris was at the Théâtre Italien, where she created the part of Bianca in Dubois's 'Aben Hamet,' Dec. 16, 1884. In the following March she sang at the Opéra Comique; and after some successful tours in Italy she reappeared at the Théâtre Italien as Leïla in Bizet's 'Pêcheurs de Perles' in 1889. Returning to the Opéra Comique, she sang the part of Santuzza in 'Cavalleria Rusticana' for the first time in Paris on Jan. 19, 1892; and on May 16 of the

same year made her first appearance in the same part at Covent Garden. Since that year she has been an almost annual visitor to London, and has established herself among the first favourites of the operatic public. In Santuzza and Carmen the southern blood which is so strongly characteristic of her enables her to give impersonations of the utmost vividness and dramatic force. She is universally accepted as the greatest Carmen of all who have appeared in the part. She created the part of Anita (written for her) in Massenet's 'Navarraise,' in London on June 20, 1894, and sang the same composer's 'Sapho' for the first time in November 1897 at the Opéra Comique. She gave some special representations of Ophélie in Ambroise Thomas's 'Hamlet' at the Opéra in Paris in May 1899, but the part was not considered to suit her style when she sang it in London. Like her acting her singing is strongly individual, for she is apt to sacrifice some of the composer's intentions in regard to rhythm for the sake of making dramatic effects. Her voice, a soprano of remarkably beautiful timbre, is very emotional, indeed almost luscious in quality, and exquisitely trained. M.

CALVISIUS, SETH, musician, astronomer, and chronologer, born at Gorsleben in Thuringia, Feb. 21, 1556, of very poor parents. The name is a refinement of Kallwitz. His poverty interfered greatly with his education, but he contrived to attend the Magdeburg Gymnasium, in 1572, and the Universities of Helmstedt (1579) and Leipzig (1580), and to avail himself of every opportunity of musical instruction. In 1581 he was made 'repetent' at the Pauliner Church, Leipzig, in 1582 Cantor at Schulpforte, and in 1594 Cantor and Schulcollege at the Thomasschule, and music director at the Thomaskirche of Leipzig. For music he gave up much —for instance, the chair of mathematics at Wittenberg, offered him in 1611. He died in Leipzig on Nov. 24, 1615. His treatises are *Melopœia* . . . (Erfurt, 1592, Magdeburg, 1630), *Compendium musicæ practicæ* . . . (Leipzig, 1594, 2nd ed. 1602), *Musicæ artis præcepta* . . . (Leipzig, 1612; ed. 3 of the *Compendium*), *Exercitationes musicæ duæ* . . . (*terti*) (Leipzig, 1600 and 1611). His music, original and edited, comprises 'Hymni sacri latini et germanici,' 1594, 'Harmonia cantionum, a M. Luthero . . . compositarum' (Leipzig, 1597), 'Bicinia 70,' 1599, 'Biciniorum libri duo . . .' (Do. 1590 and 1612), 'Tricinia . . .' (Do. 1603), 'Der 150 Psalm für 12 Stimmen . . .' (Do. 1615), 'Schwanengesang' for 8 voices, 1616, 'Der Psalter Davids . . .' (Do. 1617). Many motets and hymns are in MS. in the Library of the Thomasschule, and his pretty 'Joseph, lieber Joseph mein' is in vol. iii. of ARION. A full catalogue of MSS. and editions is in the *Quellen-Lexikon*. G.

CAMARGO, MIGUEL GOMEZ, born at Guadalajara about the middle of the 16th century, musical director at the Cathedral of Valladolid. Several of his compositions in MS. are in the library of the Escurial, and Eslava's *Lira Sacra-Hispana* contains a beautiful hymn to St. Iago in the purest counterpoint. M. C. C.

CAMBERT, ROBERT, the originator of French opera, born in Paris, 1628; was a pupil of Chambonnières, organist of the church of S. Honoré, and Intendant of Music to Anne of Austria, before 1665. The 'Euridice' of Peri and Caccini, performed at Florence in 1600, had set the musical world in a blaze, and the Abbé Perrin, after hearing that work, proposed to Cambert to compose a similar piece entitled 'La Pastorale.' This was performed for the first time, amid extraordinary applause, at the Château d'Issy in April 1659, and was the first French opera. 'La Pastorale' was followed by 'Ariane,' 1661, 'Adonis,' 1662, and other pieces, and on June 28, 1669, Perrin obtained a patent securing the right to perform opera. For thirty-two years Cambert was associated with Perrin in the enterprise, and the result was the production of the operas of 'Pomone' (March 19, 1671) and 'Les peines et les plaisirs de l'amour,' Nov. 1671. By Lully's intrigues Perrin lost the Académie, and Cambert took refuge in England, where he became first bandmaster to a regiment, and then master of the music to Charles II. He died in London in 1677. Portions of 'Pomone' were printed, and the MS. of 'Les peines' is in the Bibliothèque Nationale. [Both are reprinted in the 'Chefs d'œuvres classiques de l'Opéra français.'] Lully's jealousy implies that Cambert was a formidable rival. G.

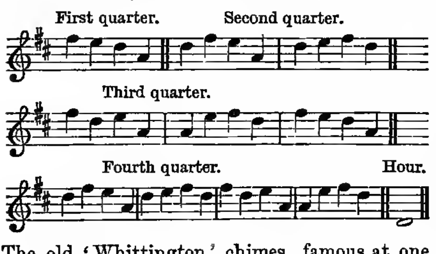
CAMBINI, GIOVANNI GIUSEPPE, born at Leghorn, Feb. 13, 1746, violinist and composer, studied under Padre Martini, at Bologna, between 1763 and 1766. In the latter year he produced an opera at Naples without success. Having formed an attachment for a girl from his native city, he was returning thither with her to be married when their vessel was captured by corsairs, and they were both sold as slaves in Barbary. Here a rich Venetian merchant bought Cambini and gave him his liberty. In 1770 he went to Paris, and was introduced to Gossec, who performed some of his symphonies at the Concerts Spirituels. These works, though very slight, were written with the flowing melody characteristic of Italian music, and created a highly favourable impression. During the ensuing twenty years, Cambini produced an enormous mass of music; 60 symphonies, 144 string-quartets, concertos for every variety of instrument, an oratorio, 'Le sacrifice d'Isaac' (Concerts Spirituels, 1774), and 12 operas, of which Fétis gives a list. Comparatively few of these are now to be found. See *Quellen-Lexikon*. He was conductor at the Théâtre des Beaujolais (1788-91), and of the Théâtre Louvois (1791-

1794). In 1804 he wrote some articles in the Leipzig *Allgem. Musik. Zeitung*, and in 1810 and 1811 was joint-editor of the *Tablettes de Polymnie*. Towards the end of his life Cambini maintained himself by arranging popular airs and other like drudgery, but even this resource failed him, and his last ten years were spent in the hospital of the Bicêtre, where he died in 1825. His best works were his quartets. He excelled so much in playing that style of music, that Manfredi, Nardini, and Boccherini, the three most eminent quartet players of that epoch, each chose him to play the viola with them. Cambini wasted in dissipation abilities which might have placed him in the foremost rank of musicians; and so little was he troubled with a conscience as to undertake to write some quartets and quintets in the style of Boccherini, which were published by Pleyel, indiscriminately with genuine compositions of that master.

M. C. C.

CAMBRIDGE. See DEGREES; MUSICAL LIBRARIES; PROFESSOR; UNIVERSITY MUSICAL SOCIETIES.

CAMBRIDGE QUARTERS. The most frequent application in England of the principle of CARILLONS is in the short musical phrases which are used to mark the divisions of the hour. Among these the quarter-chimes of Cambridge or Westminster, and those of Doncaster have become most famous. There is an interesting account of the origin of the Cambridge or Westminster chimes. It is said that Dr. Jowett, Regius Professor of Law, was consulted by the University authorities on the subject of chimes for the clock of St. Mary's, Cambridge, and that he took a pupil of the Regius Professor of Music into his confidence. The pupil, who was no other than the afterwards famous Dr. Crotch, took the fifth bar of the opening symphony of Handel's 'I know that my Redeemer liveth,' and expanded it into the musical chime, which is as follows:—

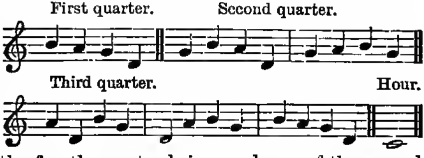


The old 'Whittington' chimes, famous at one time in London

have apparently become old-fashioned and out of date.

The chimes of the Royal Exchange (London) present the Cambridge arrangement; but with this difference, that bar 2 of the second quarter, and bar 2 of the third quarter, are transposed. It is generally considered that the old arrangement is best.

The Doncaster and Fredericton chimes are arranged to come in upon a set or ring of eight bells, whereas the Cambridge or Royal Exchange chimes need a set or part of a set of ten bells, and as so many churches have an octave of ringing bells the Doncaster arrangement has many advantages for the more general adoption, being arranged thus—



the fourth quarter being made up of the second quarter and the first two bars of the third quarter chimes. S. B. G.

CAMERA (Ital. 'chamber'). A sonata or concerto di camera was of secular character, and written for a room, and was so called to distinguish it from the sonata or concerto di chiesa, which was intended for performance in a church. G.

CAMIDGE, JOHN, born at York in 1735, was, on the resignation of his master, James Nares, in 1756, appointed organist of the cathedral church of York, which post he held until Nov. 11, 1799. He died April 25, 1803. He went to London before his first appointment to Doncaster Parish Church, and studied under Dr. Greene, taking some lessons from Handel. He published 'Six Easy Lessons for the Harpsichord.' His son MATTHEW was born at York in 1758, and received his early musical education in the Chapel Royal under Dr. Nares. He was at first assistant organist at the minster, and on the resignation of his father he was appointed his successor as organist. He published a number of sonatas, etc., a Collection of Tunes adapted to Sandys' version of the Psalms (York, 1789), and *A Method of Instruction in Musick by Questions and Answers*. He resigned Oct. 8, 1842, and died Oct. 23, 1844, aged eighty-six. His son JOHN, born at York 1790, graduated at Cambridge as Bachelor of Music in 1812, and as Doctor in 1819. About 1828 he published a volume of Cathedral Music of his composition. He received the appointment of organist of York Minster on the resignation of his father in 1842, having for many years previously discharged the duty. The present organ of the cathedral was constructed chiefly under his superintendence. On Nov. 28, 1848, he became paralysed while playing evening service, and never was able to play the organ again. His duties between his illness and death, on Sept. 21, 1859, were taken by his son, THOMAS SIMPSON CAMIDGE (organist in succession at

St. Saviour's York, Hexham Abbey, Swindon, and Swansea). His son, JOHN, organist of Beverley Minster, represents the fifth generation of organists in direct descent. W. H. H.

CAMPAGNOLI, BARTOLOMEO, a violinist of great repute, born Sept. 10, 1751, at Cento, near Bologna. He learned the violin from Dall' Ocha, a pupil of Lolli's, from Guastarobba, of the school of Tartini, and afterwards from Nardini. While in the orchestra of the Pergola at Florence he made the friendship of Cherubini. He led the opera bands at Florence and Rome alternately for some years, and in 1776 became Concertmeister to the Bishop of Freysing. In 1779 he entered the service of the Duke of Courland at Dresden. From 1783 to 1786 he was travelling in north Europe; in 1788 he revisited Italy. In 1797 he was conductor of the Gewandhaus Concerts in Leipzig. In 1801 he visited Paris, renewed his acquaintance with Cherubini, and heard R. Kreutzer. [He went in 1816 with his daughters, Albertina and Giannetta, two well-known singers, to Italy for a year, and in 1818 settled again in Leipzig.] On Nov. 6, 1827, he died at Neustrelitz. His works comprise concertos, sonatas, duets, and smaller pieces for the violin and flute, and a violin-school. P. D.

CAMPANA, FABIO, born 1815, at Bologna, and received his musical education there at the Liceo. In early life he produced several operas with more or less ill-success, according to Fétis, viz. 'Caterina di Guise,' Leghorn, 1838; another (name not given by Fétis), at Venice, 1841; 'Jannina d'Ornano,' Florence, 1842; 'Luisa di Francia,' Rome, 1844; and 'Giulio d'Este,' at Milan, in or about 1850. He then settled in London, where he was well known as a teacher of singing, and a composer, principally of Italian songs, some of which were successful. He composed two other operas, viz. 'Almina,' produced at Her Majesty's, April 26, 1860, with Piccolomini [see PICCOLOMINI], and 'Esmeralda,' produced at St. Petersburg, Dec. 20, 1869, and at Covent Garden Theatre, June 14, 1870, with Patti as heroine, afterwards produced through her instrumentality at Homburg, in 1872. Signor Campana died in London, Feb. 2, 1882. A. C.

CAMPANINI, ITALO, born June 29, 1846, at Parma, received instruction in singing there at the Conservatorio, and later from Lamperti of Milan. He first attracted public attention in 1871, on the production in Italy of 'Lohengrin' at Bologna under Angelo Mariani. On May 4, 1872, he first appeared in England at Drury Lane as Gennaro in 'Lucrezia,' with such success that hopes were entertained that a successor of Mario and Giuglini had been found. From that time until 1882, he sang every year in opera both there and (from 1887) at Her Majesty's. He did not fulfil his early promise, but he still obtained considerable popularity as a hard-working and extremely zealous artist. In addition to the usual repertory for tenors, he played Kenneth on the production of Balfe's 'Talismano,' June 11, 1874; Don José on the production of 'Carmen,' June 22, 1878; Rhadames ('Aïda') first time at Her Majesty's, June 19, 1879, and Faust on production in England of Boito's 'Mefistofele,' July 6, 1880. He had played the same part Oct. 4, 1875, on the occasion of the successful reproduction of that opera at Bologna. He sang also at St. Petersburg, Moscow, and later in America under Mapleson with great effect. After a retirement of a good many years, he returned to England and appeared at the Albert Hall in Berlioz's 'Faust' with qualified success. He died at the Villa Vigatto near Parma, Nov. 22, 1896 (Nov. 23 according to *The Athenæum*). A. C.

CAMPANOLOGY, the art and mystery of Bells and Bell-ringing. See BELL, CAMBRIDGE QUARTERS, CARILLON, CHANGE, CHIMES.

The following list of works on Campanology, published during the 19th century, is given in Rev. Woolmore Wigram's *Change-ringing Disentangled* (1871) as those most useful to ringers in general.

1. On the Bells themselves:—*Belfries and Ringers*, H. T. Ellacombe; *Clocks and Bells*, E. B. Denison; *Account of Church Bells*, W. C. Lukis.

2. On Change-ringing:—*Campanologia*, W. Shipway; *Campanologia*, H. Hubbard; *Change-ringing*, C. A. W. Troyte; *Church Bells and Ringing*, W. T. Maunsell; *Change-ringing*, W. Sottenshall. G.

CAMPBELL, ALEXANDER, born Feb. 22, 1764, at Tombea, Loch Lubnaig; he and his brother John were pupils of Tenducci. He was an organist in Edinburgh and edited and published, in 1792, a collection of twelve Scots songs, with an accompaniment for the violin, and later a similar collection with an accompaniment for the harp. Not long after the publication of his songs, he abandoned music and took to medicine, but subsequently fell into great poverty, and died May 15, 1824. (*Dict. of Nat. Biog.*) W. H. H.

CAMPBELLS ARE COMING. This fine and popular air has been the subject of many conflicting legendary statements, the most likely of which is that it became the gathering tune of the clan Campbell during the Scots Rebellion of 1715. Other accounts give an Irish origin, and one that it was used for a song, composed on and at the period of Mary Queen of Scots' imprisonment in Loch Leven Castle. However this may be the tune cannot be traced either in manuscript or print before 1745, about which year it was used for country dancing under the title 'Hob or Nob.' With this name the air is found in the fourth book of Walsh's 'Caledonian Country Dances' (*cir.* 1745), in Johnson's 'Collection of 200 Favourite Country Dances' 1748, and in other contemporary dance books.

HOB AND NOB.'

Under the heading 'The Campbells are Coming' the melody occurs in Oswald's 'Caledonian Pocket Companion' (*cir.* 1750), and a few years later in Bremner's 'Scots Reels.' The words with the air are in Johnsen's *Scots Musical Museum*, vol. iii. 1790. F. K.

CAMPENHOUT, FRANÇOIS VAN, born at Brussels, Feb. 5, 1779, died there April 24, 1848, began his career in the orchestra at the Théâtre de la Monnaie. Having developed a high tenor voice he appeared on the stage at the same theatre. During the ensuing thirty years he sang in the chief towns of Holland, Belgium, and France, and made his farewell appearance at Ghent in 1827. He composed several operas, 'Grotius' (Amsterdam, 1808); 'Le Passe-partout' (Lyons, 1815); 'L'heureux Mensonage,' and others unpublished, besides songs, choruses, and church music. His name, however, is chiefly associated with the BRABANÇONNE, which he composed at the time of the revolution in 1830, and has now become the national air of Belgium. M. C. C.

CAMPIOLI, ANTONIO GUALANDI, DETTO, born in Germany, of Italian parents. He learnt to sing in Italy and returned to Germany, where his lovely contralto voice created a great sensation. He appeared first at Berlin in 1708. In 1720 he was engaged at Wolfenbüttel. Six years later he visited Hamburg; and, after travelling in Germany and Holland, returned to Dresden, where he sang in Hasse's 'Cleofida' in 1731. At the end of that year he appeared in London in Handel's 'Poro.' On Feb. 19, 1732, he sang in the new opera 'Sosarme,' and in revivals of 'Flavio' and 'Acis,' all by the same master. He passed the remainder of his life in Italy. J. M.

CAMPION or CAMPIAN, THOMAS, M.D. [born 1575 (see *The Choir*, vol. iv. 3)], a physician by profession, was a poet, dramatist, composer, and writer on music in the earlier part of the 17th century. In 1602 he published *Observations on the Art of English Poesie*, and in 1607 wrote and invented a masque performed at Whitehall on Twelfth Night in honour of the marriage of Sir James Hay, for two of the songs in which he also furnished the music. [He had studied for the legal profession, and was a member of Gray's Inn. He seems to have studied medicine at Cambridge. Three songs, dated 1596, are in Harl. MS. 6910. His first publication was a volume of Latin epigram called *Poemata*, which appeared in 1595, reprinted in 1619. His first 'Booke of Ayres' was published in 1601, two books in 1613,[1] and the 'third and fourth' in 1617. As the first book contained songs by Rosseter, the publication of 1613 no doubt counts as the first and second books of Campion's exclusive production, both as regards words and music. A. H. Bullen's *Works of Dr. Thomas Campion*, 1889.] In 1613 he wrote 'Songs of Mourning bewailing the untimely death of Prince Henry, which were set to music by John Coperario; and also devised and wrote the entertainment given by Lord Knowles at Cawsome [Caversham] House, near Reading, to Queen Anne in her progress towards the Bath on April 27 and 28; the Masque presented in the Banqueting House at Whitehall on St. Stephen's night, 1613, on the marriage of the Earl of Somerset and Lady Frances Howard; the Masque of Flowers presented by the gentlemen of Gray's Inn in the same place on Twelfth Night, 1613, in honour of the same marriage;[2] and the Lords' Masque presented in the Banqueting House on the marriage of Frederick, the Elector Palatine, with the Princess Elizabeth on Feb. 13, 1613, for one song in which he also composed the music. Some lines by Campion are prefixed to Alfonso Ferrabosco's Ayres, 1609, and others to Ravenscroft's 'Briefe Discourse of the true (but neglected) use of Charact'ring the Degrees by their Perfection, Imperfection, and Diminution in Measureable Musicke,' 1614. Campion's treatise, 'A New Way of making Fowre parts in Counterpoint, by a most familiar and infallible Rule,' was first published without date, but probably about 1618; the second edition, with annotations by Christopher Sympson, was published in 1655 under the title of 'The Art of Setting or Composing of Musick in Parts by a most familiar and easie Rule'; and another edition called 'the last' appeared in 1664, with the word 'Setting' in the title changed to 'Descant.' The later editions were appended to the first eight or nine editions of John Playford's 'Introduction to the Skill of Musick.' [Mr. A. H. Bullen considers that the words of the 'Airs sung and played at Brougham Castle' (published 1618) as well as some of the songs in Robert Jones's collections, are by Campion.] Dr. Campion died in 1619, and was buried on March 1 in that year in the Church of St. Dunstan in the West, Fleet Street. W. H. H.

CAMPORESE, VIOLANTE, was born at Rome, 1785. She belonged to a good family, and had cultivated music only as an amateur; but, having married a gentleman of the noble family of

[1] The date is fixed by a reference to the death of Prince Henry.
[2] But Campion's authorship of this is disputed on internal evidence, in A. H. Bullen's edition of Campion's poetical works.

Giustiniani, she found herself compelled by circumstances to practise it as a profession. She appeared at first only in concerts. Possessed as she was of a very good soprano voice and great facility of execution, she was already a talented singer, when she was engaged for the private concerts of Napoleon in Paris, where she so profited by the lessons of Crescentini as to become an admirable artist. Ebers, while in Paris in the autumn of 1816, was introduced to Mme. Camporese at the house of Paer, and gives a good account of her voice, style, and appearance. She possessed a fine-toned voice of more than two octaves, from *a* to *c'''*; but her best notes were from *c'* to *f''*. She 'cultivated a pure, chaste, and expressive style, was a handsome and elegant woman of thirty-one with dark hair, eyes, and complexion, a tall, slender figure, a fine Roman countenance full of tragic dignity, and features rather strongly marked.' The purity and force of her singing, and the exquisite quality of her voice, were united to an execution refined, polished, and free from any effort at display. From Paris she went to Milan, where she sang at the Scala to crowded and enthusiastic houses. While there, she is said to have given up an evening engagement in order to visit a poor insane musician in the hospital, whom she soothed by singing to him. She was as kind and charitable as she was talented. In 1817 she was engaged for the King's Theatre in London, and made her début on Jan 11 in Cimarosa's 'Penelope.' She was not accustomed to the stage, and was therefore at first nervous and embarrassed, and made little effect. A critic of the day said, 'Her intonation is generally good, and her science is indisputable. It is alike manifest in what she does and in what she declines. She never attempts in the way of ornament what she cannot perfectly execute. Catalani takes her hearers by storm; Camporese wins by more quiet, more regular, but not less certain approaches.' As Susanna in 'Le Nozze di Figaro,' she established her reputation, and this success was followed by another when she played Donna Anna in 'Don Giovanni.' In May she appeared as Agnese in Paer's opera of that name, taken from Mrs. Opie's 'Father and Daughter,' in which she delighted the critics by her pure and tasteful singing. Ambrogetti's acting, however, was so strongly and painfully dramatic, that the piece gave more pain than pleasure, and was soon withdrawn. In July 'La Clemenza di Tito' was given, Camporese sustaining the principal part of Sesto. Lord Mount-Edgcumbe declares that she gave more effect to it than Braham or Tramezzani. She sang also at the Ancient Music and Philharmonic Concerts. Owing to a mistake, she was not re-engaged for the opera, and she consequently went to Milan. After singing there and at other places in Italy, she returned in 1821 to London, with an engagement for the season at a salary of £1550, with extra allowance for costumes, permission to sing at concerts, and her salary paid in advance. Meanwhile she was welcomed in all ranks of society, even the most exclusive. She sang, March 10, in 'La Gazza ladra,' with the greatest éclat; but, thinking she could succeed in comic parts still more than in tragic, she attempted Zerlina, but had the good sense not to repeat the experiment. In 1822 she was again engaged, and appeared in 'Le Nozze di Figaro' and 'Otello'; and she sang also at the concerts at the Argyll Rooms. She appeared again at the King's Theatre in 1823, bringing out at her benefit Rossini's 'Riccardo e Zoraide,' in which opera she took her leave August 5. In 1824 she again returned; but her voice was worn, and she could not bear comparison with Malibran and Sontag, then in full force. She prudently retired to Rome; but we find her singing in Rossini's 'Aureliano' and other operas at Ancona, 1827. Two years later she came once more to London, and sang in concerts; but her voice was gone, and her performance was not successful. She had a public benefit concert, with guinea tickets, June 12. She died at Rome in 1839. J. M.

CAMPRA, ANDRÉ, born Dec. 4, 1660, at Aix, in Provence, and educated in music by G. Poitevin. He gave little promise of distinction until his sixteenth year, when his talent made a sudden stride; and a motet, 'Deus noster refugium et virtus,' then composed by him, was so full of scholarly and contrapuntal writing, that his master predicted his future eminence. As early as 1679 Campra was selected to fill the place of maître de musique in the Cathedral of Toulon, and was in the same position at Arles, in 1681, and in 1683 at Toulouse, where he remained until his removal to Paris in 1694. His first post there was the directorship of the music at the church of the College of the Jesuits; and from this he was soon promoted to the directorship at Notre Dame. His reputation as a composer would appear to have been already established, for we are told that crowds went to hear his motets at great church festivals; but while thus employed, Campra was also studying the dramatic works of Lully and Cambert, and discovering where his own special talent lay. In 1697 he produced his first opera, 'L'Europe galante,' and this was followed in 1699 by an operatic ballet called 'Le Carnaval de Venise,' but both these compositions appeared in his brother's name.[1] He was deterred from publishing them in his own name by fear of losing his valuable ecclesiastical appointment. In 1700, however, he decided to abandon the church for the stage. Indeed he may have been constrained to do so, because we learn from a popular rhyme of the day—

[1] Joseph Campra, a double-bass player at the Opera in 1699. He received a pension in 1727, and was still living in 1744.

Quand notre archevêque saura
L'auteur du nouvel opéra
M. Campra décampera.
Alleluia—

that the true authorship of his operas had ceased to be a secret. 'Hésione,' the first opera produced under his own name, appeared in 1700; and thenceforth for forty years his works held the stage with ever-growing popularity. His last opera, 'Les Noces de Vénus,' came out in 1740. Honours and emoluments were freely bestowed on him: at a date not yet discovered he was made teacher and director of the pages at the Chapelle Royale, an appointment he held until his death; by a patent dated Dec. 15, 1718, the King granted him a pension of 500 livres, 'in recognition of his merits as a dramatic composer, and as an incentive to continued composition for the Académie Royale de Musique.' In 1722 he was given the title of composer and director of music to the Prince de Conti, and in the same year he was nominated maître de chapelle to the King. He died at Versailles on June 29, 1744.

Campra's historic place in the French opera was between two composers whose eminence transcended his own; he followed Lully and preceded Rameau,[1] but his inferiority to them should not make us overlook his marked superiority to his own contemporaries, such as Colasse and Destouches. Indeed Campra's operas are the only ones besides those of Lully which kept their place on the stage during the first half of the 18th century. In the opera of 'Tancrède,' Campra rises to a very high level; it is a work full of warmth, life, and genuine feeling, which was popular from its first appearance in 1702 until its last performance in 1764.[2] Still it must be owned that Campra failed to contribute to the progressive development of the French opera, and his failure may be ascribed in part to want of originality, but even more to an excessive deference to the taste and fancies of the public. It was a time when the so-called *spectacles coupés*—*i.e.* performances in one evening of favourite acts or scenes from different operas—were in special vogue, and to Antoine Danchet, the librettist of 'Hésione' and several other operas of Campra's, is assigned the dubious distinction of having popularised this fragmentary kind of dramatic representation. Campra himself, with his 'L'Europe galante,' was one of the first composers to enter upon this debased path of art; and as a perfect type of his work in this category, we may mention the operatic ballet called 'Les Fêtes Vénitiennes,' which has been described as a lyrical kaleidoscope.

The following is a list of his operas:—

'L'Europe Galante,' 1697 (with some pieces by Destouches); 'Carnaval de Venise,' 1699; 'Hésione,' 1700; 'Aréthuse,' 1701; 'Fragments de Lulli,' Sept. 1702; 'Tancrède,' Nov. 1702; 'Les Muses,' 1703; 'Iphigénie en Tauride,' May 1704 (with Desmarets); 'Télémaque,' Nov. 1704; 'Alcine,' 1705; 'Le Triomphe de l'Amour,' Sept. 1705; 'Hippodamie,' 1708; 'Les Fêtes Vénitiennes,' 1710; an act of 'Laure et Petrarque,' Dec. 1711; 'Idoménée,' 1712; 'Les Amours de Mars et de Vénus,' 1712; 'Téléphe,' 1713; 'Camille,' 1717; 'Les Ages,' 1718; 'Le Jaloux trompé,' 1731; 'Achille et Déidamie,' 1735; several acts of 'Silène et Bacchus,' Oct. 1722.

Besides these works, Campra wrote also:—

'Vénus,' 1698; 'Le destin du nouveau Siècle,' a divertissement for the year 1700; 'Les Fêtes de Corinthe,' 1717; 'La Fête de l'Ile Adam,' divertissement for the Court, 1722; 'Les Muses rassemblées par l'Amour,' 1723; 'Le Génie de la Bourgogne,' divertissement for the Court, 1732; 'Les Noces de Venus,' a score written in 1740, at the age of eighty,

as well as three books of cantatas, a mass, and five books of motets. The once celebrated air 'La Furstemberg' was also by him.

In the preface to his 'Cantates Françoises' (dated 1708) Campra states that he has attempted to combine the characteristics of the French and Italian schools, and the attention paid by him to the latter school is clearly indicated by the use of the orchestra and the more expressive treatment of the words, especially in the later collections, dated respectively 1714 and 1718. In his motets[3] he paid special heed to the solo voice, and emancipated it from the mere declamatory phrases so prevalent in Lully's time. It is noteworthy also that Campra was the first composer who obtained permission to use other instruments besides the organ in church music; and his indications of the different instruments employed give proof of his acquaintance with them, although his study of orchestral colouring may have been very slight.[4] Among the more beautiful of his motets is the last of the third book: its brilliant and effective passages for the solo voice, and expression marks, such as *affettuoso*, etc., are tokens of its thoroughly Italian character. A more solid piece of work is a very fine 'In convertendo' in six parts with accompaniment of strings in five parts. These works furnish us with the best criterion of Campra's merits as a cultivated musician, although his operas chiefly established his popular fame.

(See also A. Pougin's study of Campra and his works, which appeared in the *Ménestrel*, Series 47, No. 15.) A. H. W.

CANALI or CANALE, Floriano (1575-1603). Little is known of Canali's life, but from the title-pages of his printed works it appears that he was organist of San Giovanni Evangelista in Brescia from 1581 to 1603. If he was the Florian Canale, Bresciano, who wrote the medical treatise entitled 'Dei Secreti universali,' Venetia, 1640 (in the Bodleian Library), he was still alive in 1612, for the dedication is signed *Da Brescia*, 12 *Decembre* 1612, *Florian Canale.* E. van der Straeten, who holds that Canali came from the Netherlands, says that the literal Flemish translation of the Latin name Canalis is *Pype;* many Flemish families have this name. He suggests that *Buys* (*c.* 1554) has

[1] For Campra's high appreciation of Rameau, see Rameau.

[2] This opera partly owed its great success to the circumstance that the heroine (Clorinde) was taken by a contralto (Mlle. Maupin) for the first time since the foundation of the French opera.

[3] Campra's five books of motets did not appear first in 1706 (Fétis), nor in 1699 (Pougin), for Dr. W. Langhans says he is in possession of a *second* edition dated 1699. They are dedicated to the Abbé of St. Sever de la Grange Trianon.

[4] In the motet on the 126th Psalm, à grand Chœur, there is a group of two oboes and bassoon used for strengthening the accompaniment, and also for short solos; but written on the title-page is the remark '*ou de flûtes d'Allemagne.*'

a name that can be translated *Canalis*, although Buys's identity is more probably connected with that of Buus (*c.* 1541 to 1551). List of works:—

1. Psalmodia, 5 et 4 voc. Venetia. Scotto, 1575. In the Berlin Königl. Bibl. 5 part-books (Eitner).
2. Sacræ Cantiones quæ vulgo Motecta dicantur, quatuor vocibus decantandæ: nec non quibuscunque Organorum sonis accommodatæ, a Floriano Canali Brixiano organa modulante, nunc primum in lucem editæ. Brixiæ apud Vincentium Sabbium, 1581. In the Bologna Liceo Musicale 4 part-books 4to. In the Dedication, written from Bologna, Canali calls these compositions his 'first-fruits' (Parisini).
3. Missæ Introitus, ac motecta quatuor vocibus nec non quibuscunque organorum sonis accommodatæ, A. D. Floriano Canali Brix. organa modulante, nunc primum in lucem editæ. Brixiæ, apud Thomam Bozzolam, 1588. In the British Museum, four part-books, 4to, pp. 30.
4. Canzoni da sonare a quattro et otto voci di D. Floriano Canale da Brescia organista. Libro primo. In Venetia appresso Giacomo Vincenti, 1600. In the Augsburg Bibl. 4 part-books, 4to; 17 canzoni a 4 voci, 2 a 8 voci (Schletterer).
5. Canzonette a tre voci di D. Floriano Canale da Bressa organista. Primo libro. Venetia, Giacomo Vincenti, 1601. In the Cassel Ständisches Landesbibl. 3 part-books, 8vo pp. 29 (Israël).
6. Sacræ Cantiones—5 voc. Venetia. Vincenti, 1602. In the Bischöfliches Privatbibl. Regensburg, 22 compositions (Eitner).
7. Sacræ Cantiones sex vocibus concinendæ, Tum viva voce, tum Instrumentis cuiusuis generis cantatu accommodissimæ. A. D. Floriano Canali in Ecclesia Divi Joannis Evangelistæ de Brixia organista, noviter compositæ. Liber primus. Venetiis apud Jacobum Vincentium, 1603. In the Bologna Liceo Musicale, 8 part-books, 4to (Parisini).

In the collection 'Promptuarii Musici, Sacras harmonias sive motetas v. vi. vii. et viii vocum' Abrahamo Schadaeo, 1611, are two compositions, No. 14 'Quem vidistis pastores' 2nd part 'Dicite quidnam vidistis?' and No. 50 'Ego vos elegi de mundo,' each headed 'Floriani Canali a 6.' A manuscript of the former in lute tablature is in the Bibl. Rudolfina der Königl. Ritteracademie at Liegnitz (Pfudel and Eitner). A manuscript score ('Cantiones sacræ diversorum auctorum') of 'La Balzana *a* 8 parti, una canzona da sonare,' in two movements (see Torchi's *Musica istrumentale* for music), is in the Bologna Liceo Mus. Some of the music is given by Torchi in the *Rivista Musicale Italiana* for 1897, p. 601, and in his *Musica Istrumentale in Italia*, 1901, p. 22. C. S.

CANARIE. A now antiquated dance, deriving its name from the Canary Islands, whence it is said to have been introduced, in which the two partners danced alternately before each other with the gestures of savages (Littré). It was greatly in vogue at the time of Louis XIV. According to some authorities, however, it is of Spanish origin. It is a species of gigue, usually in 3–8 or 6–8 time, the distinctive peculiarity of which is that the first note of the bar is almost always dotted. In this respect it resembles the LOURE, but differs from it in its tempo, the Canarie being moderately quick and the Loure somewhat slow. It always commences on the first beat of the bar, and consists of two short periods, each repeated. [A specimen occurs in Purcell's 'Dioclesian,' and] the following example, dating from the 17th century is quoted from F. L. Schubert's 'Die Tanzmusik':—

A specimen may also be found, in 3–4 time by the way, in the second suite (or 'ordre,' to use the composer's own term) of the first book of Couperin's 'Pièces de Clavecin.' E. P.

CANCAN, a word applied by modern slang to a peculiar way of dancing at public balls, which became popular in Paris shortly after 1830, and has even been brought on the stage in operettas. It is neither a national dance nor a characteristic step; but a mere succession of extravagant jumps, with loose and obscene gestures, introduced into the usual figures of the quadrille. According to Francisque Michel it is called *cancan* either because the performers imitate the walk of a goose (or rather a duck—*cane*), or because they quack like that animal. It is more probably from the Latin word *quamquam*, a fruitful subject of squabbles in the schools of the Middle Ages, and written indifferently 'cancan' and 'quanquan.' French people still employ the expression 'faire un grand cancan de quelque chose,' in order to say 'much ado about nothing.' G. C.

CANCRIZANS. This is a name given to canons by retrogression, on account of their *crab-like* motion—from the Latin word *cancer*, a crab. The German term is *krebsweis*. An example (from A. Andre's 'Lehrbuch der Tonsetzkunst') will best explain their construction.

Sometimes a canon is both cancrizans and by contrary motion—'Rétrograde-inverse,' of which we give an example from Fétis's *Traité du Contrepoint et de la Fugue*.

Renversez le livre.

The book should be turned upside down to show the retrograde and inverse structure.

F. A. G. O.

CANNABICH, CHRISTIAN, a violin player, composer, and renowned orchestral conductor, was born at Mannheim in 1731. He was a pupil first of his father, a flute player, and afterwards of Stamitz (see that name), the celebrated violinist at the head of the Mannheim orchestra. The Elector afterwards sent him to Italy, where he studied composition under Jommelli. In 1759 he was appointed leader, in 1775 conductor, of the orchestra at Mannheim; and in 1778 followed the Elector in the same capacity to Munich. He died in 1798 at Frankfort, while on a visit to his son.

Cannabich was a very good violinist and a fair composer, but all contemporary writers on musical matters lay most stress on his great skill as a leader and conductor. Mozart in many letters to his father praises the perfect ensemble in the orchestral performances at Mannheim, and speaks of Cannabich as the best conductor he ever met with. Burney, in his *Present State*, etc. (*Germany*), is not less hearty in his praise, and Schubart, a German writer of considerable authority, reports upon the Mannheim orchestra in the flowery style of the period as follows: 'Here the *forte* is a thunder, the *crescendo* a cataract, the *diminuendo* a crystal streamlet babbling away into the far distance, the *piano* a breeze of spring.'

There can be no doubt that the performances at Mannheim under Cannabich enjoyed a special reputation for refinement and observance of *nuances*, somewhat like those of the Paris Conservatoire concerts at a later period. And although it has been suggested with much probability, that Cannabich had in this respect derived his experience from Italy, where his master Jommelli had introduced more refinement into orchestral playing, he must still be considered as one of the first and most successful promoters of that exact style of performance, which alone can do justice to the works of the great modern composers. He was also a successful teacher. Most of the violinists at Mannheim,—some of them artists of reputation,—were his pupils. That he was not only a fervent admirer of Mozart's genius, when it was by no means universally recognised, but also for many years a true and useful friend to the great master, is another point which secures him a lasting place in history, and in the hearts of all lovers of music.

He composed a number of operas, which were not particularly successful. Some ballets, symphonies, and quartets were very popular, and a thematic catalogue of the symphonies is given in the *Denkmäler der deutscher Tonkunst* (Bayern), Jhrg. III. vol. i.

His son CARL, born at Mannheim in 1769, was also a good violinist and composer. After having for some time conducted the opera at Frankfort he succeeded his father in 1800 as conductor at Munich, and died there March 3, 1806. His compositions are numerous but of no importance. Lists of the works of both father and son are given in the *Quellen-Lexikon*. P. D.

CANNICIARI, DON POMPEO, a composer of the Roman School. The date of his birth seems to be unknown; but we know that he was appointed maestro at S. Maria Maggiore in 1709, and that he retained that post until his death, which took place Dec. 29, 1744. He amassed a large musical library, and bequeathed it to the Basilica in the service of which his manhood had been passed. This collection, along with the other contents of S. Maria, has been dispersed, and much of it has probably been lost. In the Santini library there were various pieces by Canniciari, [and a list of the works that still exist is given in the *Quellen-Lexikon*]. He wrote music for two and for four choirs. An Ave Maria for four voices is given by Proske, *Musica Divina*, ii. No. 10. E. H. P.

CANON. This is the strictest and most regular species of imitation. [See IMITATION.] It is practised in music for two, three, or more parts. The word is derived from the Greek κανών, a rule or standard. A canon, therefore, is a composition written strictly according to rule. The principle of a canon is that one voice begins a melody, which melody is imitated precisely, note for note, and (generally) interval for interval, by some other voice, either at the same or a different pitch, beginning a few beats later and thus as it were running after the leader. For this reason the parts have been sometimes respectively called 'Dux' and 'Comes,' or 'Antecedens' and 'Consequens.'

The following is a simple example of a canon 'two in one at the octave,' *i.e.* for two voices an octave apart, and both singing one and the same melody.

By means of a coda (or tail-piece) this canon is brought to a conclusion. But many canons lead back to the beginning, and thus become 'circular' or 'infinite.' The following is a specimen of this kind, which is 'two in one at the fifth below,' or 'canon ad hypodiapente':—

Sometimes two or more canons are simultaneously woven into one composition. The following, for instance (from Travers's Service, 1740), would be called a canon 'four in two.'

Byrd's 'Diliges Dominum,' for 8 voices, consists of four canons all sung together, each voice singing the melody of its fellow reversed.

Often in a quartet there may be a canon between two of the voices, while the other two are free; or three voices may be in canon and the fourth part free. We would quote as an example the admirable Gloria Patri to Gibbons's 'Nunc dimittis' in F, in which the treble and alto are in canon while the tenor and bass are free. Again, there are canons by inversion, diminution, augmentation, or 'per recte et retro,' cancrizans, etc. [See those headings.] A modern one of great ingenuity by Weber exists to the words 'Canons zu zwey sind nicht drey' (Jähns, No. 90).

The old writers often *indicated* canons by monograms, symbols, or other devices, instead of writing them out in full. Indeed they went so far as to write their indications in the form of a cross, a hand, or other shape, with enigmatical Latin inscriptions to indicate the solution. Such pieces were called 'enigmatical canons.' As compositions of this nature can only be regarded in the light of ingenious puzzles, bearing the same relation to music that a clever riddle does to poetry, it will be needless to give examples here,—let it suffice to refer to those which are to be found in Fétis's admirable *Traité du Contrepoint et de la Fugue*, and in Marpurg's celebrated work on the same subjects.

The great masters were fond of the relaxation of these plays on notes. They occur often in Beethoven's letters, and the well-known Allegretto Scherzando of his Eighth Symphony originated in a canon to be sung at Maelzel's table. Köchel's Catalogue of Mozart's works contains 23 canons; that of Weber by Jähns, 8; and an interesting collection will be found in the Appendix to Spohr's *Autobiography*. [The wonderfully expressive canons in Bach's '30 Variations' are far more than examples of mere ingenuity. Every third variation is a canon, and each successive canon is at the distance of an interval by one degree larger than the one before it. Nearly all the cânons are in two parts upon a free bass, a few in contrary motion, and they proceed from a canon at the unison (No. 3) to a canon at the ninth (No. 27).]

As popular examples of canons may be named the well-known 'Non nobis Domine,' which is a canon three in one, in the fourth and eighth below, and Tallis's 'Canon,' a hymn-tune (usually adapted to Ken's evening hymn) in which the treble and tenor are in canon while the alto and bass are free. The lover of cathedral music will find specimens of almost every variety of canon in the service by Purcell in B♭, which is a masterpiece of ingenuity and skill. Other good specimens will be found in the Collection of his Gloria Patris, published by V. Novello for the Purcell Club. On the tablet erected in the cloisters of Westminster Abbey to the memory of Dr. Benjamin Cooke, organist of Westminster Abbey at the close of the 18th century, there is engraved a canon, three in one, by *double* augmentation, which is one of the best extant specimens of that kind of composition. See AUGMENTATION. Another, by Andre, four in one, by *threefold* augmentation, is given in Ouseley's *Counterpoint, Canon, and Fugue*, example 12.

Canons are often introduced into fugues as the closest species of 'stretto' [see FUGUE and STRETTO], and are to be found both in vocal and instrumental compositions. As specimens of the former we would refer, in addition to the references given above, to many of Handel's choruses, especially to one in 'Judas Maccabæus,' 'To our great God,' which contains a canon by inversion; also to Sebastian Bach's magnificent cantata on the chorale 'Ein' feste Burg.' As specimens of instrumental canons we would refer to the first movement of Mozart's sonata for pianoforte and violin in E minor; or to the minuet of Haydn's symphony in the same key.

The word 'canon' is also applied, somewhat incorrectly, to a species of vocal composition called a ROUND. And thus we have duets, trios, and quartets 'a canone,' especially in the works of modern Italian composers, which are not really canons, but a much freer and less scientific kind of music. Good examples may be quoted in Beethoven's 'Mir ist' (Fidelio), Curschmann's 'Ti prego,' Cherubini's 'Perfida Clori,' and Rossini's 'Mi manca la voce.' F. A. G. O.

CANON, MINOR. See MINOR CANON.

CANTABILE, *i.e.* singable, a direction placed

against an instrumental phrase when it is to be 'sung' with feeling. Beethoven does not often use it, and when he does it is always with special intention, as in the second subject of the Larghetto of the B♭ Symphony, and in the semiquaver figure in the working out of the first movement of the Ninth Symphony :—

He has before marked it 'expressivo'—but now it is as if he said '*you* may see no special melody in this group, but *I* do, and will have it played accordingly.'

CANTATA. The idea of reviving the declamation of tragedies after the manner of the ancients led to the invention of recitative, which is attributed to Caccini and Giacomo Peri about 1600. It was at first confined to the opera, but the desire to adapt it to music for the chamber soon led to the invention of the Cantata, which in its earliest form was simply a musical recitation of a short drama or story in verse by one person, without action, accompanied in the simplest manner by a single instrument.

The first change was the introduction of an air, repeated at different points in the course of the recited narrative; thus producing a primitive kind of rondo.

The cantata in this style was brought to great perfection by the Italians of the 17th century. The composer who produced the most perfect examples was Carissimi; apparently they are all for a single voice, or at most for two, with accompaniment of a single instrument—lute, violoncello, harpsichord, etc. Shortly after his time the accompaniment took a much more elaborate form, and the violoncello parts to some of Alessandro Scarlatti's cantatas were so difficult that it was considered the mark of a very distinguished artist to be able to play them. Carissimi was the first to adopt this form of composition for church purposes. His cantatas, like those of his contemporaries, are only known by the first few words, so that it would answer no purpose to quote their names. One only is mentioned as having been suggested by a special event—the death of Mary Queen of Scots. Among his contemporaries the most famous cantata composers were Lotti, Astorga, Rossi, Marcello, Gasparini, and Alessandro Scarlatti, whose cantatas were extraordinarily numerous. One by Cesti, 'O cara libertà,' is said to have been especially famous. Specimens by most of these composers are quoted in Burney's *History*, and a collection of twenty-six by Carissimi was published in London at the end of the 18th century, apparently after Burney had finished his work. Twenty-six by Marcello for different voices with accompaniment of different instruments have also been published, and a great number for soprano and contralto with harpsichord accompaniment.

At the beginning of the 18th century cantatas of more extended form and various movements were written by Domenico Scarlatti and by Pergolesi. The most famous was the 'Orfeo ed Euridice,' which the latter composed in his last illness. Handel also wrote cantatas after the same fashion, for single voices, both with accompaniments of strings and oboes, and with thorough-bass for clavier, and many of these have been published. But they are not well known; and since his time this form of cantata has quite fallen into disuse, and has gradually changed into the concert-aria, of which Mozart has left many fine examples, and of which Beethoven's 'Ah, perfido!' and Mendelssohn's 'Infelice,' are well-known instances. The name Cantata is given to a composition by Mozart for three solo voices, chorus and orchestra in three movements, composed in or about 1783 (Köchel, No. 429).

The Church-Cantata is a much more extended kind of composition, and of these Handel also wrote some, mostly in his younger days, and at present little known (see Chrysander's *Händel*, i.). The greatest and most valuable examples are the Kirchen-cantaten of Sebastian Bach. See the list under BACH-GESELLSCHAFT. Mendelssohn adopted the same form in more than one of his early works, as in op. 23, No. 1, and op. 39, No. 3, which are written on chorales, and correspond closely with Bach's cantatas, though not so entitled.

In modern times the word Cantata is used to supply an obvious want. The idea as well as the use of 'Cantate da Camera' having quite gone out of fashion, the term is applied to choral works of some dimensions—either sacred and in the manner of an oratorio, but too short to be dignified with that title; or secular, as a lyric drama or story adapted to music, but not intended to be acted. Specimens of the former kind are very numerous. Of the latter we may mention Bennett's 'May Queen' and Brahms's 'Rinaldo.' C. H. H. P.

CANTATE DOMINO is the name by which the 98th Psalm is known in its place as an alternative to the Magnificat in the evening service of the Anglican Church. The title is formed of the first words of the Vulgate version, according to the practice of the Anglican Psalter. The 17th canon of the council of Laodicea appointed lessons and psalms to be read alternately, and on this principle the 'Cantate' is to be considered as a 'responsory psalm,' coming between the lessons. It has no history attached to it in the position it now occupies, as it was not used specially in the ancient church. It was not in the Prayer-Book of Cranmer, which was published in 1549, and consequently does not appear in Marbeck's 'Book of Common Praier Noted,' published in 1550. But it was introduced in

the revision of 1552, probably to obviate the recurrence of the Magnificat when that canticle happened to be in the second lesson of the day.

It appears not to have been a favourite with musicians. Indeed the Magnificat is in every way preferable, as regards both the service and the opportunities the words seem to offer to the composer. 'Cantate Services' are therefore rare, and in the most famous collections of our church music there are very few of them. In Barnard there is not one; in Boyce only three, viz. two by Blow and one by Purcell; and in Arnold one by Aldrich and one by King. C. H. H. P.

CANTERBURY PILGRIMS, THE. Opera in three acts; written by Gilbert à Beckett, music by C. Villiers Stanford. Composed for, and produced by, the Carl Rosa Company, Drury Lane, April 28, 1884. M.

CANTICLE is the name now generally given to certain hymns taken from the Bible, and sung in the services of the different churches of Christendom: such as the Benedictus, the Benedicite, the Magnificat, and the Nunc Dimittis. In the Prayer-Book the word is used for the Benedicite only. The word is derived from the Latin *canticum*, the term applied in the Vulgate to the Song of Moses, the Song of Solomon, many of the Psalms, etc. etc. In the Calendar of the Prayer-Book the Song of Solomon is entitled 'The Canticles,' but in common parlance the above is the meaning of the term. C. H. H. P.

CANTILENA—etymologically, a little song. This term was formerly applied to the upper or solo part of a madrigal; also to a small cantata or any short piece for one voice. At the present time the term is employed in instrumental music to denote a flowing melodious phrase of a vocal character; or to indicate the smooth rendering of slow expressive passages. It is also sometimes used as a substitute for *Cantabile*. A. H. W.

CANTIONES SACRÆ. The name given to several collections of Latin motets published in London between 1575 and 1610. They comprise the following:—'Cantiones quæ ab argumento sacræ vocantur, quinque et sex partium,' by Tallis and Byrd, 1575 [see those names]; and the following by Byrd alone:—'Liber Primus Sacrarum Cantionum Quinque Vocum,' 1589 (reprinted in score by the Musical Antiquarian Society, 1842); 'Liber Secundus Sacrarum Cantionum Quinque Vocum,' 1591; 'Gradualia, ac Cantiones Sacræ quinis, quaternis, trinis vocibus concinnatæ, Liber Primus,' and the same, 'Liber Secundus,' 1607. W. H. H.

CANTO (Lat. *Cantus*; Fr. *Chant*). With the Italians this word has a great variety of acceptations; *e.g.* music, instrumental as well as vocal; the *motif*, subject or leading idea, of a musical composition; the art and practice of singing; a section of a poem, etc. etc. Canto fermo or cantus firmus is the tune or melody of an ancient hymn on which a motet is founded, and which remains *firm* to its original shape while the parts around it are varying with the counterpoint. Technically canto is more generally understood to represent that part of a concerted piece to which the melody is assigned. With the old masters this was, as a rule, the TENOR: with the modern it is almost always the SOPRANO. Thence canto (voice as well as part) has become synonymous with soprano. The canto clef is the C clef on the first line. J. H.

CANTO FERMO, or CANTUS FIRMUS, the plain-song—as distinguished from Canto figurato, the florid or figured song—is the simple unadorned melody of the ancient hymns and chants of the church. Such tunes are often employed by the great church composers of the Roman Church as the basis of their compositions. Thus in Palestrina's masses 'Æterna Christi munera,' and 'Assumpta est Maria,' each movement begins with the first phrase of the hymn. His motet 'Beatus Laurentius' is still more completely founded on the canto fermo, since the tune is sung throughout the piece in the first tenor, while the other four parts are moving in counterpoint above and below it—a counterpoint more or less closely modelled on the tune. In such cases the tune is usually marked in the score as C. F. (canto fermo). Bach treats his choral-melodies in the same way (see his cantata 'Ein' feste Burg'; his organ 'Vorspiele' on 'Kyrie'; 'Christe'; 'Allein Gott'; 'Dies sind die heiligen'; 'Vater unser,' etc.), and in so doing styles them 'canti fermi.' In English the term is often translated by 'Plain-chant.' G.

CANTOR (Mediæval Lat. *Primicerius, Cantor*, etc.; Eng. *Precentor, Chanter*; Fr. *Chantre, Grand Chantre*).

I. A title given in Cathedral, Collegiate, and Monastic churches, to the official in charge of the music. [In the Norman constitution of the cathedrals, introduced at the end of the 11th century, the Chanter was the second in rank of the four principal dignitaries of the church; and gradually the greater part of the secular cathedrals of the old foundation conformed themselves to this model; the most notable exception was the Church of St. David's, where there was no Dean until the middle of the 18th century, and the Chanter was the chief dignitary.] Normally as second only to the Dean, in choir, he had the first return-stall; on the north side of the choir, facing the altar; for which reason the north side is called Cantoris, or the Chanter's side. [In monastic corporations the position was different, for the Chanter there was merely one of the officers nominated by the Abbot or Prior, and had no particular precedence. Consequently in cathedrals that were formerly monastic, but are now governed by new statutes dating back only to the Reformation, the Chanter or Precentor is not a Canon, but a Minor Canon.]

In some few cathedrals in this country the

familiar term, Chanter, is still retained; and his deputy, the Succentor, is called the Sub-Chanter. The Latinised form, Cantor, is always used in Germany; but, in France, Chantre is frequently exchanged for Maître de Chapelle.

The duty of the precentor is to superintend the intoning of the psalms and canticles—at least, where plain-song services are used; to exercise a general supervision over the singing; to select the music; and to take care that it is properly performed. It is from the first of these functions that he derives his title. [But in consequence of the high rank attached to the preferment in cathedrals of the old foundation, it is generally given to one whose qualifications for the position are other than musical, and the duties are entrusted to the Succentor. Even where this is not the case, and in the new foundations where the precentor is usually chosen for his musical capacities, the importance of the office is increasingly modified by the growing importance of the organist—an official of more modern origin.]

II. A name given to the principal of a college of church music.

We hear of the foundation of such a college, in Rome, as early as the 4th century; but it was not until the Pontificate of S. Gregory the Great (590-604) that the Roman Scholæ Cantorum began to exercise any very serious influence upon the development of church music. A sketch of their subsequent history will be found under SISTINE CHOIR. Charlemagne founded singing schools in many parts of his dominions; and watched over them with paternal care. Every such school was governed by its own special Primicerius, or Cantor; and, as the curriculum was not confined to singing, but comprised a complete course of instruction in music, the influence of a learned Cantor was very great.

[In mediæval England these song-schools existed in connection with the establishments that had a precentor and an organised choir, and were of the greatest importance in general as well as in musical education: unfortunately the greater number of them were destroyed at the Reformation, those only surviving which were connected with the cathedrals and a very few collegiate churches. Abroad in like manner as time went on the number of these institutions increased rapidly. The secularisation of ecclesiastical foundations has in most places wrought some of the same havoc as was wrought in England at an earlier date, and in some places the destruction has been even more sweeping], but some of the old foundations still flourish. The French MAÎTRISES were excellent in principle; but, as time progressed, they admitted the secular element, and their Chantres developed into true Maîtres de Chapelle. One of the oldest and most important foundations in Germany was that at the Abbey of Fulda. But the Cantors who have exercised the strongest influence on modern art are those of the Thomasschule at Leipzig. [See LEIPZIG.] W. S. R., with additions by W. H. F.

CANTORIS. In the antiphonal singing in English cathedrals the words *Decani* and *Cantoris* are used to signify respectively the side of the dean's stall (the south side), and that of the cantor or precentor (the north side). Though these positions were not invariably those occupied by these officers in all churches, the names derived from them are used without variation for the south and north sides respectively. In the pre-Reformation times the distinction was not of the same importance, for each side of the choir in turn took precedence; consequently the important thing to know, was not which was *Cantoris* and which *Decani*, but which of the two sides was at any given moment 'The Choir Side.' In some cathedrals the custom survives still of giving such precedence to each of the sides in turn, and of putting up a notice to show which side is for the time being 'The Choir Side.' W. H. F.

CANTUS FICTUS. See MUSICA FICTA.

CANZONA (Ital.). The name of a particular variety of lyric poetry in the Italian style, and of Provençal origin, which closely resembled the madrigal. Musically, the term is applied (1) to the setting to music of the words of a canzona, whether for one or more voices, the only difference between the canzona and the madrigal being that the former was less strict in style. (2) The name was also given to an instrumental piece written in more or less strict imitation. Many examples are to be found in Purcell's sonatas of three and four parts. An example of such a canzona, by Sebastian Bach, may be found in the B.-G., vol. xxxviii. p. 126. (3) It appears to have been used as an equivalent for sonata for a piece of several movements; and also as a mark of time, in place of Allegro (Brossard). E. P.

CANZONET (in Italian *Canzonetta*) originally meant a smaller form of canzona. Morley in 1597 published 'Canzonets or little short songs to four voices; selected out of the best and approved Italian authors.' Afterwards the word was used for vocal soli of some length in more than one movement; nowadays it is applied to short songs, generally of a light and airy character. Haydn has left us some admirable canzonets, grave and gay; for example, 'She never told her love,' and 'My mother bids me bind my hair.' W. H. C.

CAPOCCI, the name of two highly distinguished organists of St. John Lateran in Rome. The father, GAETANO, was born Oct. 16, 1811, in Rome; began his musical studies under Sante Pascoli, organist of St. Peter's; and was afterwards a pupil of Valentino Fioravanti and Francesco Cianciarelli for counterpoint and composition. In 1831 he received the diploma of organist, and in 1833 that of composer from

the academy of St. Cecilia. His first post as organist was in S. Maria in Vallicella; in 1839 he was appointed to S. Maria Maggiore; in 1855 he was made maestro direttore of the Cappella Pia of the Lateran, a post which he occupied till his death, Jan. 11, 1898. His sacred compositions were constantly in use at the Lateran, where his Responsori for Holy Week were universally admired; seven published volumes, containing forty-two compositions such as masses, motets, psalms, etc., represent only a comparatively small proportion of his works, which are remarkable for their faithful adherence to the ecclesiastical style of the great Italian school, and for melodies of a flowing, facile type.

His more distinguished son, Filippo, born in Rome, May 11, 1840, began the study of music at nine years old, learning the organ and harmony from his father. In 1861 he gained a diploma as a pianist in the academy of St. Cecilia. He was appointed first organist at the Lateran in 1873, and succeeded his father as maestro direttore di cappella in 1898. A visit of Alexandre Guilmant to Rome in 1880 inspired Capocci to devote himself to the highest branch of organ technique, and he shortly became famous for the excellent taste of his arrangement of stops, for the admirable clearness of his playing, and for his musicianly phrasing. A great number of compositions for the organ have been published by Augener & Co., Laudy & Co., R. Cocks & Co. of London; by Kistner & Rieter-Biedermann of Leipzig; and by Leduc of Paris. They include five sonatas of very decided originality and vigorous effect, eleven books of original pieces, in all of which the composer shows himself fully in sympathy with the most modern ideas of harmony and melody. M.

CAPORALE, Andrea, an Italian violoncello-player who arrived in London in 1735, and excited much attention. In 1740 he joined Handel's opera-band, and died in London in or about 1756. He was more famous for tone and expression than for execution. [Eighteen solos for his instrument were published in London (*Quellen-Lexikon*).] G.

CAPO TASTO (Ital., from *Capo*, 'head,' and *tasto*, 'touch,' or 'tie'; Germ. *Capotaster*, sometimes *Capo d'astro*). In Italian the nut of a lute or guitar, but also the general name of a contrivance for shortening the vibratory lengths of strings, thus forming a second nut, expressed in French by 'barre,' to facilitate change of key. The construction of a capo tasto varies according to the stringing and shape of the neck of the instrument it is to be applied to, but it may be described as a narrow rail of hard wood, metal, or ivory, clothed with leather or cloth, and often fastened by a screw upon the fret from which it is intended to mark off the new length of the strings. There are other but less simple ways of attaching it. The technical advantage of using a capo tasto is that higher shifts can be more easily obtained; and the use of open strings, upon which the possibility of chords often depends, is facilitated in a higher compass than that natural to the instrument. How much transposition may be facilitated by it is thus shown by Herr Max Albert in Mendel's *Lexicon*. Take a guitar the strings of which are tuned in real notes the basis of sharp keys: with a capo tasto on the first semitone fret we have

the basis of flat keys, the fingering remaining the same. With bow instruments the capo tasto is no longer used, but it was formerly with those having frets, as the viol da gamba. The use of the thumb as a bridge to the violoncello serves as a capo tasto, as also, in principle, the pedal action of the harp. A. J. H.

CAPOUL, Joseph Victor Amédée, born Feb. 27, 1839, at Toulouse, entered the Paris Conservatoire in 1859, studied singing there under Révial, and comic opera under Mocker, and in 1861 gained the first prize in the latter class. On August 26 of the last-named year he made his début at the Opéra Comique as Daniel in 'Le Châlet' (Adam), and next played Tonio in 'La Fille du Régiment.' He became a great favourite there, being good-looking, with a pleasant tenor voice, somewhat spoiled by the 'vibrato'; he was a good actor in both serious and light parts, and was considered by the Parisians as the successor to Roger, though never the equal of that famous artist. He remained at that theatre until 1870. Among his best parts may be mentioned Georges Brown ('La Dame Blanche'), Mergy ('Pré aux Clercs'), Raphael D'Estuniga ('La Part du Diable'), Fra Diavolo, etc., and of those he created, Eustache in 'Les Absents' (Poise), Oct. 26, 1864; Horace in 'La Colombe' (Gounod), June 7, 1866; the tenor part in 'La Grande Tante' (Massenet), April 3, 1867; Gaston de Maillepré in 'Le Premier Jour de Bonheur' (Auber), Feb. 15, 1868; the title-part in 'Vert-Vert' (Offenbach), March 10, 1869. In 1872 and 1873 he sang in Italian opera in Paris (Salle Ventadour), in 1876 at the Théâtre Lyrique and Gaîté, where on Nov. 15 he played the hero on the production of Massé's 'Paul et Virginie,' and in 1878 he returned to the Salle Ventadour, where he played Romeo on the production, Oct. 12, of 'Les Amants de Vérone' (Marquis D'Ivry).

On June 1, 1871, Capoul first appeared in England at the Italian Opera, Drury Lane, as Faust, and sang there with success, and also during the season as Elvino, and the Duke in 'Rigoletto.' He appeared at the same theatre every season until 1875, with the exception of 1874, in several characters, being especially

MARIA CATERINA ROSALBINA CARADORI-ALLAN

good as Lionel ('Martha'), Wilhelm Meister ('Mignon'), and Faust. From 1877 to 1879 he appeared at Covent Garden with tolerable success, in spite of great exaggeration and mannerism both in singing and acting, and played for the first time Fra Diavolo, his original characters in the above operas of Massé and D'Ivry, June 1, 1878, and May 24, 1879, and Camoens on the production of Flotow's 'Alma l' Incantatrice,' July 9, 1878. He has also sung in Italian opera in Vienna, and in America with Nilsson, where he was also in 1879 and 1880 as principal tenor of the French Opéra Bouffe company. On Dec. 18, 1881, he played Naghib at the Renaissance on the production of 'Le Saïs' (Mme. Marguérite Olagnier), and on June 8, 1887, took part in the concert given at the Trocadéro for the benefit of the sufferers in the Opéra Comique fire. On Oct. 13, 1888, he sang the part of Jocelyn in Godard's opera of that name, at the Château d'Eau. He is now engaged in an administrative capacity at the Paris Opéra. A. C.

CAPRICCIETTO (Ital., dimin. of *capriccio*). A Capriccio, on a small scale, and of no great development. E. P.

CAPRICCIO (Ital.; Fr. *caprice*). (1) This name was originally given, according to Marpurg, to pieces written for the harpsichord in a fugued style, though not strict fugues. It was also sometimes applied to actual fugues, when written upon a lively subject; and the composition was consequently for the most part in quick notes. Examples of this kind of capriccio can be found in Handel's 'Third set of Lessons for the Harpsichord' (German Handel Society's edition, part 2), and in the second of Bach's 'Six Partitas.' Bach also uses the word as synonymous with 'fantasia,' *i.e.* a piece in a free form, in his 'Capriccio on the departure of a beloved brother.' (2) In the middle of the 18th century the term was applied to exercises for stringed instruments, such as would now be called 'études,' in which one definite figure was carried through the composition. (3) In the present day the word CAPRICE is usually employed, and the name is applied to a piece of music constructed either on original subjects, and frequently in a modified sonata- or rondo-form (as in Mendelssohn's 'Three Caprices,' op. 33, or Sterndale Bennett's Caprice in E), or to a brilliant transcription of one or more subjects by other composers. As examples of the latter kind may be named Heller's 'Caprice brillant sur la Truite de Schubert,' and Saint-Saëns' 'Caprice sur les Airs de Ballet d'Alceste de Gluck.' Although, as already mentioned, the sonata- or rondo-form is frequently adopted for the caprice, there is, as implied by the name, no limitation in this respect, the composer being at liberty to follow his inclinations. [The title 'Capriccio' is applied to many of the short pieces which form an important part of Brahms's later works. His opp. 76 and 116 consist of 'Capricci' and 'Intermezzi,' the former name being applied to the more rapid movements, the latter to the slower.] E. P.

CAPULETTI ED I MONTECCHI, I, an Italian opera in 3 acts, taken from Romeo and Juliet; libretto by Romani, music by Bellini, produced at Venice, March 12, 1830, at Paris Jan. 10, 1833, and in London at the King's Theatre July 20, 1833. A fourth act, from Vaccai's 'Giulietta e Romeo,' was usually appended to Bellini's opera. G.

CARACCIO, GIOVANNI, was born at Bergamo about the middle of the 16th century. He was at first a singer in the private choir of the Elector of Bavaria. Having quitted this service he spent some years at Rome and at Venice, and then returned to his native place, where he was appointed maestro at the cathedral. He held this post for twenty-three years, when he migrated to Santa Maria Maggiore at Rome, remaining there until his death in 1626. He was one of those fourteen composers of different nations who showed their appreciation of Palestrina's genius by dedicating to him a volume of Psalms to which each had contributed. [PALESTRINA.] His published works are:—Magnificat omnitonum, pars 1; Venice, 1581. Magnificat omnitonum, pars 2; Venice, 1582. Madrigali a 5 voci, lib. 1; Venice, 1583. Musica a 5 voci da sonare; *id.* 1585. Dialogo a 7 voci nel lib. 1, di Madrigali di Claudio da Correggio; Milan, 1588. Madrigali a 5 voci, lib. 2; Venice, 1589. Salmi di compieta con le antifone della Vergine, ed otto falsi bordoni a 5 voci; Venice, 1591. Salmi a cinque per tutti i vesperi dell' anno, con alcuni hymni, mottetti, e falsi bordoni accommodati ancora a voci di donne; Venice, 1593. Madrigali a 5 voci, lib. 4; Venice, 1594. Salmi a cinque; Venice, 1594. Madrigali a 5 voci, lib. 5; Venice, 1597. Canzoni francesi a quattro; Venice, 1597. Canzonette a tre; Venice, 1598. Madrigali a 5 voci, lib. 6; Venice, 1599, Messe per i defonti a quattro e cinque, con motetti; Milan, 1611.

Bergameno inserted some of Caraccio's work in his 'Parnassus musicus Ferdinandæus,' 2-5 vocum; Venice, 1615. E. H. P.

CARADORI-ALLAN, MARIA CATERINA ROSALBINA, *née* de Munck, was born in 1800 in the Casa Palatina at Milan. Her father, the Baron de Munck, was an Alsatian, and had been a colonel in the French army. Mlle. de Munck's musical education was completed entirely by her mother, without assistance. Her father's death obliged her to avail herself of her gifts in order to support herself. Having attempted the stage in the course of a tour through France and part of Germany, she took her mother's family name of Caradori, and accepted an engagement in London in 1822. She made her début on Jan. 12 at the King's Theatre as Cherubino. 'It may be observed,' says Lord Mount-Edgcumbe,

'as an odd coincidence that Pasta, Vestris, and Caradori all have acted the Page in "Le Nozze di Figaro," and none more successfully than the last, who by accident, not choice, made her début in that part; and it proved fortunate for her, as her charming manner of performing it laid the foundation of her subsequent favour.' She sang afterwards in 'La Clemenza di Tito,' 'Elisa e Claudio,' and 'Corradino,' as prima donna; and in 1824, as seconda donna, in 'Il Fanatico,' with Catalani. She continued engaged through 1823 and 1824; and in the latter year took her benefit in 'Don Giovanni.' In 1825 she sang the second part in 'L' Adelina' of Generali, with Mme. Ronzi de Begnis as prima donna, showing thereby her great good nature. The same year, she played Fatima in Rossini's 'Pietro l' eremita,' and chose 'Così fan tutte' for her benefit; and at Velluti's début in 'Il crociato,' Mme. Caradori sang the first woman's part, distinguishing herself particularly in the duet 'Il tenero affetto' with the musico. On March 21, 1825, she sang in Beethoven's Ninth Symphony on its production by the Philharmonic Society. In 1826, though still belonging to the company, she was removed for the purpose of introducing Bonini, who was better suited as a foil for Velluti; and Caradori, when she reappeared in 'La Donna del Lago,' was received with joy by the public. She sang also in the 'Barbiere' and in 'Romeo e Giulietta'; and took her benefit in 'Le Nozze,' as Susanna.

Pasta having returned to London, and chosen Mayr's 'Medea' for her benefit, Caradori acted and sang most charmingly the tender and gentle part of Creusa. There is a good portrait of her in this character by J. Hayter, lithographed by Hullmandel. Her voice, though not very powerful, was exceedingly sweet and flexible, and her style almost faultless. She had much knowledge of music, and sang with great delicacy and expression. In a room she was perfect. Her appearance was interesting, her countenance very agreeable, and her manner modest and unassuming: she always pleased, though she never astonished her audience. Her salary rose gradually from £300 in 1822 to £1200 in 1827. In 1834, happening to be again in England, she carried on the operas with tolerable success until the arrival of the expected prima donna, Giulia Grisi. But it was in concerts that she now achieved her greatest success, and most prominently in the Festival in Westminster Abbey in this same year, in which she sang with her usual excellence, and was well heard, though it had been feared that her voice was not powerful enough for so large a space. Her 'With verdure clad' appeared to Lord Mount-Edgcumbe to be 'decidedly the best solo performance of the whole concert.' She took part also in the performance of the 'Mount of Olives,' 'in which it need not be said she sang well,' and gave equally well 'Rejoice greatly,' which, though a brilliant song, did not show her to the best advantage. During the carnival of 1830 she sang with success at Venice, but after 1835 she remained in England, singing at festivals and concerts. She sang the soprano part in the first performance of 'Elijah' at Birmingham, August 26, 1846, when Mendelssohn's judgment of her performance was not so favourable as Lord Mount-Edgcumbe's (*Letters*, August 31, 1846). She died on Sunday, Oct. 15, 1865. J. M.

CARAFA (DI COLOBRANO) MICHELE ENRICO, born at Naples, Nov. 17, 1787; studied under Fazzi, Fenaroli, and Ruggi, and in Paris under Cherubini. His first opera was 'Il Fantasma.' So little, however, did Carafa feel his vocation that he entered the army, and became an officer in the bodyguard of Murat, then king of Naples. Like Henri Beyle (Stendhal) he made the campaign of Russia in 1812, and was decorated by Napoleon. After the Emperor's fall he left the army and embraced music as his profession. The first opera after this decision, 'Il vascello di occidente,' was produced at Naples in 1814, and was followed by a large number of others. 'Gabriele' (1818), 'Ifigenia,' 'Berenice,' etc. etc., were produced in Italy, but he was equally successful in Vienna and in Paris. In the latter city he made his début with 'Le Solitaire,' August 17, 1822, which long remained extraordinarily popular. In 1827 he took up his residence in Paris, and brought out 'La Violette,' in Oct. 1828. 'La Fiancée de Lammermoor,' 'Masaniello' (Dec. 27, 1827), evidently written in competition with Auber's 'Muette,' Feb. 29, 1828), 'La Prison d'Edimbourg,' etc. These operas, and many others, were very popular, notwithstanding the immense counter attractions of Auber and Rossini. This they owe more to an easy flow of melody and natural unaffected instrumentation than to any original character, and in consequence they have now fallen into oblivion. As a composer for the pianoforte Carafa was almost equally the fashion, and at Cherubini's instance he was made Professor of Composition in the Conservatoire shortly after his arrival in Paris, where he died July 26, 1872. In 1837 he was elected a member of the Académie des Beaux Arts.

The *Dictionnaire lyrique* of Felix Clément mentions no less than thirty-five of his operas. G.

CARDON, LOUIS, a harpist of great repute, of Italian parentage, but born in Paris, 1747. On the outbreak of the Revolution he migrated to Russia, where he died in 1805. His 'Art de jouer la harpe' (1805) was for long esteemed. His brother Pierre, born 1751 in Paris, was a singer and violoncello player. M. C. C.

CARDOSO, MANUEL, a Spanish priest, born at Fronteira 1569; entered the Carmelite order at Lisbon, 1588, and became its sub-prior and chapel-master, and a great favourite of King John IV. He died Nov. 29, 1650. His works are exclusively for the church. Several are said

to have been published, but only one is quoted 'Livro . . . na Semana Santa,' Lisbon, 1648. Two motets are given by Proske in the *Musica Divina*, ii. Nos. 5 and 33, and eight are mentioned in the *Quellen-Lexikon*. M. C. C.

CARESANA, CRISTOFORO, an Italian musician of note, born at Tarentum 1655, and settled in Naples in 1680, when he became organist to the royal chapel, dying there about 1730. He published motets, hymns, and duetti da camera, and left many MSS. in the library at Naples. But his most famous work is his *Solfeggi* (Naples, 1680), of which Choron published a new edition for use in the Conservatoire. M. C. C.

CARESTINI, GIOVANNI, one of the greatest of Italian singers, was born at Monte Filatrano, Ancona, about 1705. At the age of twelve he went to Milan, where he gained the protection of the Cusani family, in gratitude to whom he assumed the name of Cusanino. His voice, at first a powerful clear soprano, afterwards changed to the fullest, finest, and deepest contralto ever, perhaps, heard. His first appearance was at Rome 1721, in the female part of Costanza in Bononcini's 'Griselda.' In 1723 he sang at Prague, at the coronation of Charles VI. as King of Bohemia. The following year he was at Mantua, and in 1725 sang for the first time at Venice in the 'Seleuco' of Zuccari, and in 1726 with Farinelli and Paita. In 1728 and 1730 he visited Rome, singing in Vinci's 'Alessandro nell' Indie' and 'Artaserse.' Owen Swiny, happening to be in Italy with Lord Boyne and Mr. Walpole, wrote to Colman from Bologna, on July 12, 1730, mentioning letters which he had received from Handel, and goes on to say: 'I find that Senesino or Carestini are desired at 1200 guineas each, if they are to be had. I am sure that Carestini is engaged at Milan, and has been so for many months past.' Senesino was engaged for London on this occasion; but three years later Handel was more fortunate, and Carestini made his début here on Dec. 4, 1733, in 'Cajus Fabricius,' a pasticcio; and his magnificent voice and style enabled Handel to withstand the opposition, headed by Farinelli, at the other house. In 1734 he sang in 'Ariadne,' 'Pastor Fido,' 'Parnasso in Festa,' 'Otho,' 'Terpsichore,' 'Deborah,' and 'Athaliah'; and the next season in 'Ariodante' and 'Alcina.' In the cast of the latter his name is spelt Carestino, as it is also by Colman. In 'Alcina' occurs the beautiful song 'Verdi prati,' which he sent back to the composer as not suited to him. Handel on this became furious, ran to the house of the singer, and addressed to him the following harangue: 'You tog! don't I know petter as yourseluf vaat es pest for you to sing? If you vill not sing all de song vaat I give you, I vill not pay you ein stiver' (Burney). In 1735 Carestini left England for Venice, and for twenty years after continued to enjoy the highest reputation on the continent, singing at Berlin in 1750, 1754, and 1755. In 1755 he was engaged at St. Petersburg, where he remained till 1758, when he quitted the stage, to retire to his native country and enjoy a well-earned repose. Shortly after, he died. He was held in the highest esteem by Handel, Hasse, and other composers, in whose works he had sung. Quantz says: 'He had one of the strongest and most beautiful contralto voices, which extended from *d* to *g''*.' He was also extremely perfect in passages which he executed with the chest-voice, according to the principles of the school of Bernacchi, and after the manner of Farinelli; in his ornaments he was bold and felicitous. He was also a very good actor; and his person was tall, handsome, and commanding. There is a good mezzotint of him by J. Faber, engraved in 1735 from a picture by George Knapton, a fine impression of which is now rare. J. M.

CAREY, HENRY, a reputed natural son of George Savile, Marquis of Halifax, was a popular composer and dramatist in the first half of the 18th century. [He was born probably about 1690.] His first music-master was a German named Olaus Westeinson Linnert, and he subsequently received instruction from Thomas Roseingrave and Geminiani. Although possessed of ready invention as a melodist, yet, his acquaintance with the science of his art being but limited, he had to gain a subsistence chiefly by teaching. In 1715 he wrote and composed the music for the farce of 'The Contrivances; or, More Ways than One,' which was produced at Drury Lane Theatre on August 9 in that year with much success. The character of Arethusa in this piece was long the probationary part for female singers before they ventured on parts of more importance. His next production was a farce called 'Hanging and Marriage; or, The Dead Man's Wedding,' performed March 15, 1722, at Lincoln's Inn Fields Theatre. In 1728 he set to music the songs in Vanbrugh and Cibber's comedy 'The Provoked Husband.' He next wrote the operas of 'Amelia' (the music by Lampe), which was performed at the Haymarket Theatre in the summer of 1732, and 'Teraminta,' which was set to music by John Christopher Smith and produced at Lincoln's Inn Fields Theatre on Oct. 20, 1732. Each of these pieces was described as 'a New English Opera after the Italian manner.' On Dec. 2, 1732, Carey produced at Drury Lane Theatre a ballad opera called 'Betty; or, The Country Bumpkins,' which met with a cold reception. In 1733 he wrote and composed a musical entertainment called 'Cephalus and Procris,' which was produced at Drury Lane Theatre with a pantomime interlude entitled 'Harlequin Volgi.' On Feb. 22, 1734, he produced at the Haymarket Theatre 'The most Tragical Tragedy that ever was Tragedized by any Company of Tragedians, called, Chrononhotonthologos'; a highly humor-

ous burlesque of the bombast and fustian prevalent among some of the dramatists of the day, and especially of their partiality for tautological expressions. This he also described as his 'Tragedy of half an act.' In 1735 he produced a ballad-opera entitled 'A Wonder; or, the Honest Yorkshireman,' performed by the Covent Garden company at Lincoln's Inn Fields Theatre for one night only, July 11, 1735, but which, when transferred to the Haymarket and Goodman's Fields Theatres later in the same year under its second title, met with such success that it was soon adopted at the other theatres and long remained a stock piece. On Oct. 26, 1737, Carey's burlesque-opera 'The Dragon of Wantley,' a satire on the Italian opera of the day, the music by Lampe, was produced at Covent Garden Theatre with such signal success that it ran sixty-seven nights during the season. In the next year the author and composer joined in the production of a sequel entitled 'Margery; or, A Worse Plague than the Dragon' (a title afterwards changed to 'The Dragoness'), which was produced at Covent Garden Theatre on Dec. 9, 1738. Although by no means deficient in merit, its success was but partial. In 1739, on the breaking out of the war with Spain, Carey wrote and composed a musical interlude called 'Nancy; or, The Parting Lovers,' which was brought out at Drury Lane Theatre and was remarkably successful. It was revived at Covent Garden Theatre, with alterations in 1755 (on the prospect of a war) under the name of 'The Press Gang; or, Love in Low Life,' and frequently brought forward on similar occasions under the title of 'True Blue.' In the latter part of his life Carey collected his principal dramatic pieces, and published them in 1743 by subscription in a quarto volume.

In 1713 Carey published a small volume of his poems. This he afterwards enlarged and published by subscription in 1729, with the addition of a poem called 'Namby Pamby' (a good-humoured satire on a poem written by Ambrose Phillips on the infant daughter of Lord Carteret), which received the commendations of Pope. [Handel's name appears among the subscribers.]

The songs and cantatas written and composed by Carey were very numerous. [In the early part of his career he issued his songs in half-sheet form, employing Thomas Cross to engrave them with the music. F. K.] A book of cantatas appeared in 1724, and in 1732 he published 'Six Cantatas'; in 1737, under the title of 'The Musical Century, in One hundred English Ballads on various subjects and occasions, adapted to several characters and incidents in Human Life, and calculated for innocent conversation, mirth, and instruction,' there appeared two folio volumes of songs written and composed by himself, to the first of which his portrait is prefixed. A second edition appeared in 1740, and a third in 1743. Of all his compositions, the most popular, and that which will transmit his name to posterity, is his ballad of 'Sally in our Alley,' one of the most striking and original melodies that ever emanated from the brain of a musician. The author's account of its origin is as follows:—'A shoemaker's prentice, making holiday with his sweetheart, treated her with a sight of Bedlam, the puppet shows, the flying chairs, and all the elegancies of Moorfields, from whence proceeding to the Farthing Pye House he gave her a collation of buns, cheese-cakes, gammon of bacon, stuffed beef and bottled ale, through all which scenes the author dodged them. Charmed with the simplicity of their courtship, he drew from what he had witnessed this little sketch of nature.' He adds, with pardonable pride, that Addison had more than once expressed his approbation of his production.

Carey died at his house in Great Warner Street, Clerkenwell, on Oct. 4, 1743. It has been generally said that 'he put a period to a life which had been led without reproach, at the advanced age of eighty, by suicide,' and the impulse to the act has been variously assigned to pecuniary embarrassment, domestic unhappiness, and the malevolence of some of his fellow professors. But the manner of his death seems doubtful. In the *Daily Post* of Oct. 5, 1743, we read: 'Yesterday morning Mr. H. Carey, well known to the musical world for his droll compositions, got out of bed from his wife in perfect health and was soon after found dead. He has left six children behind him.' An advertisement in the same newspaper on Nov. 17, 1743, announces a performance on that evening at Covent Garden Theatre 'For the Benefit of the Widow and Four small Children of the late Mr. Henry Carey,' in which the widow describes herself as 'left entirely destitute of any provision.' His age at the time of his death was probably much overstated. Sir John Hawkins thus estimates Carey's abilities:—'As a musician Carey seems to have been one of the first of the lowest rank; and as a poet the last of that class of which D'Urfey was the first, with this difference, that in all the songs and poems written by him on wine, love, and such kinds of subjects, he seems to have manifested an inviolable regard for decency and good manners.'

Carey's posthumous son, GEORGE SAVILE CAREY (1743-1807), inherited much of his father's talent. He became an actor, but not succeeding he contrived by giving entertainments of singing, recitation, and imitations, to earn a precarious living for about forty years. In the latter part of his life he claimed for his father the composition of 'God save the King,' and the claim occupied much attention for some time. Indeed it is still as hotly debated as ever, and will probably never be satisfactorily decided. G. S. Carey's daughter, Anne, was the mother of Edmund Kean, the tragedian. W. H. H.

CARILLON is the name given to a set of bells so hung and arranged as to be capable of being played upon, either by manual action or by machinery, as a musical instrument, *i.e.* so as to give out a regularly composed melody in correct and unvarying time and rhythm, in contradistinction to the wild and irregular music produced by change-ringing on a peal of bells hung to swing in the more usual manner. [BELL.] A much larger number of bells are required to make a good carillon than are ever hung for an ordinary peal, which latter, owing to the difficulties of ringing and the space required for the bells to swing in, can scarcely exceed ten or at most twelve bells with advantage, whereas a carillon peal not infrequently includes as many as forty or more bells, the adequate performance of set tunes requiring not only a more extended range but the presence of the chromatic intervals of the scale, instead of the simple diatonic scale of the ordinary peal. The most radical distinction in the method of hanging and sounding a carillon as compared with a peal is that while in the latter the bells are slung to a wheel and axle, and are sounded by the stroke of the clapper inside on being swung round, in the carillon the bells are absolutely fixed on the frame, and are struck by a hammer on the outside. It is owing to this stationary position of the bell that so large a number of bells can be safely hung in a tower which would not accommodate half the number of swinging bells; and it is obvious that the precise moment of the stroke is much more under the control of the ringer when he has only to regulate the striking of the hammer than when he has to bring about this by causing the bell to swing: and it need hardly be mentioned that the system of striking on the outside of the bell is always employed when the latter is made use of for striking the hours upon in connection with a clock. In fact, the carillon system, when sounded mechanically (as in a majority of cases it is), may be regarded as an extension and multiplication of the stroke of the clock, with which it is generally connected, rather than as allied to bell-ringing properly so-called. Occasionally, however, the ringing-bells are also used as part of the carillon, an apparatus being fitted up in the ringing chamber whereby the carillon and clock hammers can be simultaneously pulled off the bells before commencing the ringing of the peal.

The system of playing tunes on small bells, hung in a graduated order and struck by hand, is believed to be of some antiquity, as indicated by occasional illustrations of some such system in mediæval manuscripts; and it seems probable enough that so obvious a means of music-making in a simple form may be even older than any such records imply. But we first meet with carillon music in its greater form in the 15th century, when the steeples of the churches and hôtels-de-ville of Holland, Belgium, and North Germany made the country resound with the bell-music for which Belgium especially was famed during that and the three succeeding centuries. The Van den Gheyn family, of whom the most notable member, Mathias van den Gheyn, was born in 1721, were pre-eminent among the Belgian makers of carillons; Mathias himself having been also an organ player and carillon player. The family were of Mechlin, but migrated to Louvain, where the traditions of their manufacture are kept up by the firm of Aerschodt. Among the most celebrated and largest carillon-peals of the continent may be mentioned those of Antwerp (40 bells), Bruges (48 bells), Malines (44 bells), Ghent (48 bells), de Tournai (42 bells), de Boulers (39 bells), Louvain [1] (two carillons of 40 and 41 bells respectively), etc. It is worth remark that this bell-music has had its special development in flat countries, where its loud and travelling sounds are heard with far more effect and at far greater distance than in hilly districts, where the sound is closed in, interrupted, and echoed back. Indeed, the instinctive feeling which has led to great sets of bells being placed in the towers of flat countries is analogous to the instinct which gave rise to the towers themselves. A flat landscape suggests the building of towers, which become far-seen landmarks, and connect one city with another; and what the towers were to the eye the bells were to the ear, sending greeting or warning from one city to another over a vast expanse of level landscape.

Carillon-playing in these cities of the Low Countries, however, was not always a mere piece of mechanism; it took rank as a branch of executive art in music, and required the culture of a musician to develop its resources. The Belgian and Dutch carillons were furnished with a keyboard, rough and uncouth enough indeed, but still such as enabled the carillonneur to perform pieces in two, or (by the aid of pedals and of the prolonged resonance of the bells) even in three parts. Compositions were written for or extemporised on them; and some of the 'morceaux fugués' for carillons by Mathias van den Gheyn have been collected and published (by Messrs. Schott & Co.). The bells which were intended thus to be played by hand were furnished with an inside clapper as well as the outside hammers, the clapper being connected by a wire with the keyboard below, and the hammer operated upon by the mechanical barrel, so that the same set of bells could be played either by machinery or by hand. The keyboard, though arranged on the same principle as the ordinary pianoforte keyboard, was a large affair with wooden keys, so far distant from one another as to admit of being struck with the

[1] The Louvain peal has been reproduced, or nearly so, in the carillon made by Aerschodt (machinery by Gillet and Bland), for Cattistock Church in Dorsetshire.

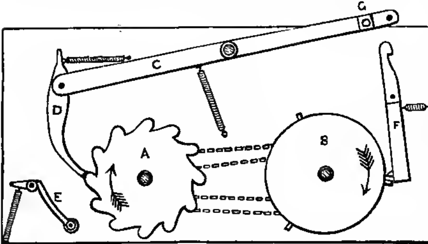
fist without disturbing the keys on either side; for as the leverage of the key had to raise the weight of the clapper, which in the larger bells was considerable, and as the force of the sound depended also in great measure on the force with which the key was struck, it is obvious that mere finger work was out of the question. The keyboard in fact was analogous rather to the pedal board of an organ, and in some cases the largest bells actually were connected with pedal keys, so as to enable the player to strike a heavier blow than he could with his hands. It may easily be imagined that, on this system, carillon-playing was a matter of no small physical exertion, and required the performer to possess *mens sana in corpore sano* to have a chance of getting successfully through his task, for which he clothed himself generally in a suit of flannels alone, the hands being protected by thick gloves to prevent injury in striking the keys.

It was perhaps owing to these practical difficulties that the art of carillon-playing never seems to have been very extensively practised, and has now very much fallen into disuse. But the difficulty arising from the player having to contend with the weight of the clapper in sounding the bells was even more felt in the application of chiming machinery to the hammers which struck on the exterior of the bells. The chimes were sounded by means of a large barrel connected with and regulated by clockwork, by which it was periodically released, and driven round under the ordinary motive power of a weight, strong pins fixed on the barrel coming in contact, each at the proper moment, with levers which raised the hammers, and released them to fall upon the bell at the moment when the pin on the barrel quitted the lever. The barrel was 'pricked' for various tunes (generally seven or eight), a change being effected by shifting it slightly, on the principle familiar to every one in the 'musical-box' toy, which is in fact a carillon on a minute scale, playing on vibrating tongues instead of on bells. [See AUTOMATIC APPLIANCES.] The application of this principle, on the large scale necessary for carillon-ringing, is fraught with difficulties, which the rude and unscientific system still prevalent on the continent (and clung to, apparently, with the same kind of conservatism which leads the North German organ-builders to ignore many refinements of modern mechanism) quite failed to meet. As with the clavier-system, the difficulty really lies in the weight to be overcome in lifting the striking hammer. As the pins on the barrel had to take this whole weight, it was necessary that they should be very strong, and the barrel itself thus became so large, cumbrous, and expensive an affair as to add very much to the difficulties of fixing a large carillon-machine both in regard to cost and space. The time occupied in raising the hammer rendered any rapid repetition of a note impossible with a single hammer, especially with the larger bells; consequently a large proportion of the bells had to be furnished with two or more hammers to provide for this difficulty, the pins being arranged so as to sound two or three hammers successively on the same bell when the immediate repetition of a note was required. The method of sounding the note by the release of the lever from the pin did not conduce to precise accuracy in the time of sounding, but a much more serious interference with correct *tempo* arose from the fact that as some of the heavier hammers offered much greater resistance to the pins than others, while the barrel was driven by the same uniform weight, the progress of the tune was constantly retarded before the striking of the larger bells, producing the irregular or 'stuttering' effect which those who have listened to carillon chimes must have noticed.[1] The system is in fact mechanically so clumsy, and involves so much loss of time and power, that it is obvious that carillon-chimes, if worth doing at all, are worth doing better than this.

England has borrowed the idea of carillons only recently from the continent, but has the credit of inventing and perfecting the principle of mechanism which has surmounted all the above-named drawbacks of the Belgian carillon machinery. The part which English science and ingenuity has played in the matter is, in fact, exactly similar to that which it has taken in regard to organ-building. We borrowed from the Germans the idea of the grand instruments with full pedal organ which supplemented the 'box of whistles' of the old English builders, but our modern builders have applied to them mechanical refinements which have almost revolutionised organ-playing (not perhaps always in the right direction), and have placed at the disposal of the English organist facilities for variety of effect and brilliant execution such as his German brother in the art is scarcely cognisant of at all. In regard to the improvement in carillons it is only simple justice to say that, so far, its history is identified entirely with one firm, who perseveringly set themselves to accomplish the task of simplifying and perfecting the control of the bells on true mechanical principles. Messrs. Gillett and Bland, of Croydon, clock manufacturers, having turned their attention to the construction of carillons, aimed at getting rid of the main difficulty which is, as we have shown, at the bottom of all the defects of the old system, namely, the use of the same action both for lifting and letting go the hammers. The principle on which this improvement is effected is by the introduction of a revolving cam-wheel beneath each lever, which, continually turning, raises the lever the moment the hammer has

[1] To many listeners, no doubt, this irregularity, so far from detracting from the effect of this airy music, would seem rather pleasing from its old-fashioned sound and associations. This association, however, though it may be a reason for not interfering with old chimes, is no reason for repeating the same defects in new ones.

struck the bell, so that the latter is at once brought into position again for striking, and the action of the pins on the barrel, instead of being a lifting and letting-off action, is merely a letting-off, the whole of the lifting being done by the cam-wheels. As in many other mechanical inventions, the simplicity of action which characterises the new carillon machinery was not attained at once. In the first attempts, of which the chiming machine at St. Patrick's Cathedral, Dublin, is an example, the barrel was still of an unwieldy size, though an attempt was made to compensate for this in some measure by a novelty of construction, the barrel consisting not of a solid cylinder but a series of double bars, between which the pins were fixed in such a manner, by screws, as to be readily capable of being loosened and shifted one way or the other, so as to be adjusted to a new set of tunes if desired. The first machine made on this system was put up at Boston, playing twenty-eight tunes on forty-four bells, but the connection between the letting-off and lifting action being much too complicated and circuitous, the inventors patented a further improvement which very much simplified the action, and the contact between the pins and the levers was brought to the front instead of the top of the barrel, so as to render the most important portion of the mechanism more easily accessible. These improvements were first introduced in the machine erected in Croydon Church. There was still a weak point in the action ; but it would be impossible to explain all the intermediate stages of improvement without the aid of a number of diagrams, and we must be content here with giving a description of the new carillon action in its most perfected form, as described in the following extract from the *Engineer* of August 13, 1875, and which is rendered more intelligible by the accompanying diagram, representing in a simple manner the principle of the action, without encumbering it with details :—



'The diagram is supposed to show the gear for working one hammer. It must be multiplied in proportion to the number of hammers, but the parts are all repetitions of each other.

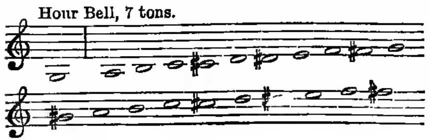
'The musical barrel B is set with pins in the usual way. A is a cam-wheel of very peculiar construction, operating on a lever C by what is to all intents and purposes a new mechanical motion, the peculiarity of which is that, however fast the cam-wheel revolves, the tripping of the lever is avoided. In all cases the outer end must be lifted to its full height before the swinging piece D quits the cam. The little spring roller E directs the tail D of the lever into the cam-space, and when there it is prevented from coming out again by a very simple and elegant little device, not yet made public, by which certainty of action is secured. At the other end of the lever C is a trip lever F. This lever is pulled toward C by a spring, and whenever C is thrown up by the cam-wheel, F seizes it and holds it up ; but the wire to the bell-hammer in the tower above is secured to the eye G, so that when D is lifted, the eye G being pulled down, the hammer is lifted. The pins in the musical barrel B come against a step in F, and as they pass by they push F outwards and release C, which immediately drops, and with it the hammer, so that the instant the pin passes the step F a note is sounded. But the moment D drops it engages with A, which last revolves at a very high speed, and D is incontinently flung up again, and the hammer raised, and raised it remains until the next pin on B passes the step on F, and again a note is struck. It will be seen therefore that, if we may use the phrase, B has nothing to do but let off traps set continually by A, and so long as A sets the traps fast enough, B will let them off in correct time. But A revolves so fast and acts so powerfully that it makes nothing of even a 3 cwt. hammer, much less the little ones ; and thus a facility of execution is obtained hitherto unknown in carillon machinery. We venture to think that our readers will agree with us that such a carillon machine as we illustrate is about as ingenious a combination of mechanism as is to be met with in the range of the arts.'

It will be seen that here we have a system in which all the direct work that the musical barrel has to do is merely to let off the triggers, so to speak, of the hammers, while the force necessary to raise them is so distributed and so much better applied than when the pins on the barrel had to perform this office, that the inequality of weight between the large and small hammers is not felt as a perturbing influence on the speed of working. One result of this is that the barrel is greatly reduced in dimensions ; the pins being required only for such light work can be made much smaller, and require little or no leverage power in themselves ; and consequently, while the old carillon barrels were sometimes eight or ten feet in diameter, that at Shoreditch is only ten inches diameter. A barrel of this size, besides taking up so much less room, can easily be taken out and exchanged for a fresh one, with a new set of tunes, when desired.

But the crowning advantage of the system of the letting-off barrel is that by this means music can be played on the bells by a keyboard like that of a pianoforte attached to the frame, with

no more exertion than on the pianoforte itself. Thus the physical effort entailed by carillon-playing on the old continental system, which rendered it an art only to be attacked by a muscular person in rude health, is entirely a thing of the past, and there is no reason, so far as the difficulty of the task is concerned, why carillon-playing should not be as common, in connection with large churches and public buildings, as organ-playing. The carillon at Manchester Town Hall is furnished with such a keyboard in addition to the mechanical arrangement for sounding the chimes. It may also be observed that the carillon system can be applied to produce mechanical change-ringing, by having a barrel pricked with changes, and thus the 'ringing for church' can be done automatically, in places where ringers capable of change-ringing are not to be found. This, however, can only be regarded as an inferior and meagre substitute for the grand effect produced by change-ringing with swinging-bells; and many, perhaps, would even prefer round-ringing with the swung bells to mechanical change-ringing with fixed bells. The result, however, can be heard and judged of at Greenfield Church, and at St. Mark's, Oldham, where this contrivance has been applied.

The bells composing a carillon peal are fixed to a frame, generally of oak, slightly pyramidal in shape, so that while the lower cross-beams bear upon the wall, the upper portion of the frame stands free; this is not so absolutely essential as in the case of bells hung to swing, where the swaying action is very violent when the peal is being rung; but still it is better to keep the vibration off the wall as much as possible. The large bells are hung at the bottom of the frame (in some of the continental towers they were hung low down, below the barrel and quite apart from the rest), and the smaller ones above. In arranging the scale of the bells it is seldom considered necessary to have the complete chromatic scale throughout; and in almost all the older carillons the lower portion of the scale was restricted to a few notes giving the tonic or dominant to the keys intended to be most used, the intermediate intervals being omitted on account of the great expense of the larger bells, and the amount of space which they occupied. The arrangement, in fact, is much the same as that which obtained on the pedal boards of old English organs, before what were at first called 'German pedals' (*i.e.* the complete scale) were introduced. This principle has mostly been more or less followed in the modern English peals. The following is the scale for Manchester Town Hall, consisting of twenty-one bells:—



Here the carillon scale is laid out for the keys of D and A principally, and the selection of G for the hour bell appears out of keeping; but in fact the hour bell is never used in the carillon, and the quarter chimes are sounded on a selection from the carillon peal forming a scale in the key of C. The ten bells used for this purpose are also hung so as to swing and be rung by hand in the ordinary manner, the carillon action being lifted off for the purpose; so that Manchester in reality has two peals, the carillon peal as given above, rung mechanically, and the natural diatonic scale from *c′* to *e″* formed of bells selected out of the carillon peal, rung by hand. There is also an automatic change-ringing barrel to operate upon these bells when desired. It may be mentioned that this is the first town-hall in England fitted with a ringing peal. [Carillons on the perfected principle above described were also put up in the towers of Worcester, Monaghan, Londonderry, Dublin, and Sligo Cathedrals; of Bradford, Rochdale, and Reading Town Halls; in the churches of Leek, Oldham, Shoreditch, Holsworthy, Witney, St. Stephen's Hampstead; the Royal Exchange, London; as well as the Town Halls of Pietermaritzburg (S. Africa), Montreal, and London (Canada)—all by the same Croydon firm before referred to, now styled Gillett and Johnston.] H. H. S.

CARIO, Johann Heinrich, born at Eckernforde in Holstein, 1736, was instructed by Emanuel Bach, Telemann, and Schwenke, and became a great trumpet player. He is said to have invented a keyed trumpet which would play in every key, and to have executed a prelude in B♭ minor. He may therefore have been able to execute Bach's trumpet parts. Cario was living in 1800. G.

CARISSIMI, Giacomo, was born at Marino near to Rome in 1604, according to Pitoni, whom both M. Fétis and the Abbé Alfieri follow upon this point; but at Padua in 1582, if Spiridione[1] be trusted for the place of his birth, and Mattheson for the date of it. His first professional post was that of maestro at Assisi. This he held from about 1624 to 1628, when he went to Rome, and obtained the Mastership at the church of S. Apollinare, attached to the German College. In this office he passed the remainder of his days, without, in all probability, ever having crossed the Papal frontier. He died Jan. 12, 1674. That he gained his taste and style, which were admirable, by long residence in Paris, and by writing for French audiences, is one of by no means the least foolish and perverse of the many foolish and perverse assertions of the Seigneur de Fréneusc.[2]

Carissimi has the reputation of having done more than any other Italian of his epoch towards the perfection of recitative. To him Kircher

[1] *Musica Romana D. D. Foggiæ, Carissimi, Gratiani, aliorumque.* Bamberg, 1665.

[2] *Comparaison de la Musique Italienne et de la Musique Française*, 3me partie, p. 2020. Brussels, 1704.

admits that he owes much that is valuable in his 'Musurgia' upon this branch of art. He was, moreover, although not the actual inventor of the sacred cantata, at least its parent by adoption and development, and at his hands it received that elevation of form and accession of beauty which enabled it to supplant the madrigal, and give to sacred music those elements of pathos and dramatic force for which the rise of the opera had created a general appetite. A third contribution by Carissimi to the progress of his art was the lightness and variety of his accompaniments. He had less learning and more imagination and playfulness than his predecessors in the Roman school. But if his harmonies were less elaborate than theirs, his melodies were freer and more graceful, and his effects more dramatic. There was something essentially modern in his music, and he was the precursor and teacher of a large group of polished and pleasant artists, among whom Bassani, Cesti, Bononcini, and Alessandro Scarlatti were conspicuous. No less prolific than original, Carissimi left a great quantity of finished work behind him. Unhappily too little of it has been published, and too much of it was destroyed at the time of the suppression of the Jesuits, when the collections of S. Apollinare and the Gesù were sold for waste paper. In the library of the Abbé Santini there were two printed collections of motetti by Carissimi for two, three, and four voices, which had been published at Rome in 1664 and 1667, and a Lauda Sion and a Nisi Dominus, both for eight voices, and both in manuscript. In the archives of the Lateran there is a mass by Carissimi for twelve voices, written on the famous Provençal melody 'L'homme armé.' This is believed to be the last occasion on which that favourite theme was ever employed. The National Library in Paris has a rich manuscript collection of oratorios by Carissimi. The following is a list of their names:—'La Plainte des Damnés'; 'Histoire de Job'; 'Ezéchias'; 'Baltazar'; 'David et Jonathas' [probably not by Carissimi] 'Abraham et Isaac'; 'Jephte'; 'Le Jugement Dernier'; 'Le Mauvais Riche'; 'Job'; 'Jonas.' [Besides these the following are in existence (see list in the *Quellen-Lexikon*): 'Felicitas beatorum,' 'Lucifer,' 'Martyres,' 'Vir frugi et pater familias,' and 'Daniele.'] Chief among these ranks the 'Jephthah,' of which Hawkins has said that 'for sweetness of melody, artful modulation, and original harmony, it is justly esteemed one of the finest efforts of musical skill and genius that the world knows of.' Croft has imitated his 'Gaudeamus,' and Aldrich adapted his motets to English words for anthems. Hawkins prints a remarkably graceful little duet of Carissimi, called 'Dite, o Cieli.' It was in emulation of this piece, upon hearing it over-praised by King Charles II., that Dr. Blow composed his celebrated 'Go, perjured man.' The library of the Paris Conservatoire is rich in the manuscripts of Carissimi, and there are some valuable volumes of his music at Versailles and in the British Museum. But the magnificent collection of his works made by Dr. Aldrich at Oxford throws all others into the shade, and forms one of the special ornaments of the library at Christ Church. A few of his pieces are in the *Musica Romana* of Spiridione, and a few more, disfigured by French words, in the collection of *Airs sérieux et à boire*, published by Ballard. There are some motets of his in Stevens's *Sacred Music*, and Crotch has published one or two examples in his *Selections of Music.* Five specimens are printed in the *Fitzwilliam Music*, 'Jephte,' 'Judicium Salomonis,' 'Jonas' and 'Baltazar' have been published by Chrysander from a MS. now at Hamburg (Schott); and 'Jonah' by Henry Leslie (Lamborn Cock). Enough has now been said to indicate where those who are interested in this master may form acquaintance with his work; and it only remains to add that the 'Judgment of Solomon,' a cantata often attributed to him, was in all probability not his, but the production either of Cesti or Samuel Bockshorn. E. H. P.

CARLO (or CARLI), GERONIMO, born at Reggio in the first half of the 16th century; author of a collection of five-part motets by eminent composers, Créquillon, Clemens non Papa, Ciera, etc., entitled 'Motetti del Labirinto,' 2 vols. (Venice, 1554 and 1555). M. C. C.

CARLTON (CARLETON or CHARLTON), REV. RICHARD, Mus.B., published in 1601 a collection of twenty-one 'Madrigals for five voyces,' the preface to which is dated from Norwich. He had in the same year contributed a madrigal, 'Calme was the aire,' to 'The Triumphes of Oriana.' All that is known of his biography is that he was at Clare College, Cambridge, and took the degree of B.A. in 1577. Soon after his ordination he obtained an appointment at Norwich Cathedral. In Oct. 1612 he was presented by Thomas Thursby to the rectory of Bawsey and Glosthorp. (*Dict. of Nat. Biog.*) He is supposed to have died in 1638.

CARMAGNOLE. The French song called 'La Carmagnole' is a popular tune originating in Provence. Grétry (*Mémoires*, iii. 13) thought it was originally a sailor-song often heard in Marseilles; it is more probably a country roundelay or dance-tune, adapted to a patriotic military song which was written either at the end of August or early in September 1792. The four stanzas of this national song are known to a very few historians only; we transcribe the first couplet:—

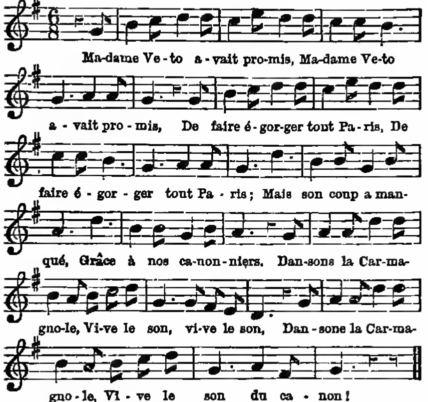
Le canon vient de résonner :
Guerriers, soyez prêts à marcher.
Citoyens et soldats,
En volant aux combats,
Dansons la carmagnole :
Vive le son, vive le son,
Dansons la carmagnole,
Vive le son
Du canon !

The unknown author of these lines was prob-

ably some brave soldier, whilst the bloody 'Carmagnole des Royalistes' may be attributed to the worst of demagogues. The original eight stanzas of the latter began as follows :—

> Oui, je suis sans culotte, moi,
> En dépit des amis du roi.
> Vive les Marseillois,
> Les Bretons et nos lois!

But this new song was soon enlarged, and when published by Frère it contained thirteen stanzas, the first of which ran in the following manner, to the tune of the Carmagnole :—



During the French Revolution a great many songs were adapted to this tune, which, in spite of its association with the *Terreur*, has often been introduced on the stage in vaudevilles or burlettas. G. C.

CARMAN'S WHISTLE, THE, an old English tune found in the Virginal book of Lady Nevill (1591) and in the Fitzwilliam Virginal book (ed. Fuller Maitland & Squire, vol. i. p. 214), in both with harmony and variations by Byrd. The following is the air as there given (see Burney, *History*, iii. 89) :—

In Chappell's *Popular Music of the Olden Time* the tune is given to the words of 'The Courteous Carman and the Amorous Maid,' and is mentioned as suiting 'The Country Hostesses Vindication.' G.

CARMEN. Opéra comique in four acts; words by Meilhac and Halévy (founded on Prosper Mérimée's story with the same title), music by Georges Bizet. Produced at the Opéra Comique, Paris, March 3, 1875. In Italian, at Her Majesty's, June 22, 1878 [see HAUCK, MINNIE]. In English (Carl Rosa) at Her Majesty's, Feb. 5, 1879. In French, at the same theatre, Nov. 8, 1886 (Mme. Galli-Marié in her original part). M.

CARMEN, JOHANNES, a composer of the early part of the 15th century. His nationality is not known, but he is named by Martin le Franc in *Le Champion des Dames*, as one of three musicians who achieved popularity in Paris immediately before the rise of Dufay and Binchois. The passage in Le Franc's poem, which seems to have been written about 1440, is as follows :—

> Tapissier, Carmen, Cesaris
> N'a pas long temps (ai) bien chantèrent
> Qu'ilz esbahirent tout Paris
> Et tous ceulx qui les fréquentèrent:
> Mais oncques jour ne deschantèrent
> En mélodie de tel chois,
> Ce m'ont dit qui les escoutèrent,
> Que Guillaume du Fay et Binchois.

A four-part motet of his in praise of St. Nicholas of Myra, with the two upper parts in canon, is printed in Stainer's *Dufay and his Contemporaries*, from MS. Canonici Misc. 213 in the Bodleian Library. The statement by Ambros (*Geschichte der Musik*, iii. 18) that two motets by Carmen are included in Cod. Mus. 37 of the Liceo Musicale of Bologna has been shown to be an error. J. F. R. S.

CARNABY, WILLIAM, Mus.D., born in London in 1772, was a chorister of the Chapel Royal under Dr. Nares and Dr. Ayrton. On leaving the choir he became organist at Eye, which he quitted for a similar appointment at Huntingdon. Whilst residing at the latter place he published 'Six Canzonets,' and also 'Six Songs,' which were favourably received. In 1805 he graduated at Cambridge as Bachelor of Music, and in 1808 proceeded to Doctor. In the interval he had settled in London, and on the opening of Hanover Chapel, Regent Street, in 1823, he was appointed its organist. His compositions, chiefly vocal, were numerous. They have been characterised as scientific, but deficient in taste. He died in London, Nov. 13, 1839. W. H. H.

CARNAVAL DE VENISE. This popular air, which was heard by Paganini at Venice, in 1816, 1824, and 1826, and which his magic bow has made a favourite tune all over the world, is the effusion of an unknown musician probably of the end of the 18th century. Several talented composers have embroidered it, and all pianists have played the brilliant variations and fantasias written upon it by Herz and Schulhoff. Ambroise Thomas has composed very clever variations on the tune for the overture to his opera 'Le Carnaval de Venise,' and Victor Massé, in his 'Reine Topaze,' introduces an *air varié* upon it to the words

> Venise est tout en fêtes,
> Car voici le carnaval.

In England it was for long known to the words

> O come to me, I'll row thee o'er
> Across yon peaceful sea,

as adapted in Thomas Moore's 'Melodies.' The air, as given by Paganini, is as follows :—

G. C.

CARNEVAL,[1] Scènes mignonnes sur 4 notes (the translation, on the printed copy, of the autograph heading, 'Fasching. Schwänke auf vier Noten f. Pfte von Eusebius'). A set of 21 piano pieces written by Schumann in 1834, dedicated to Carl Lipinski and published as op. 9. Each piece has its title. The allusions to the Carnival are obvious—'Pierrot,' 'Arlequin,' 'Pantalon et Colombine'; but the other subjects of which Schumann's mind was then full are brought in, such as 'Chiarina' (Clara Wieck), 'Estrelle' (Ernestine von Fricken), 'Chopin,' 'Paganini,' 'Papillons'; he himself is depicted under the two aspects of his mind as 'Florestan' and 'Eusebius,' and the events of a ball are fully delineated in the 'Valse noble' and 'Valse allemande,' 'Coquette' and 'Réplique,' 'Reconnaissance,' 'Aveu' and 'Promenade.' The whole winds up with a 'March of the Davidsbündler against the Philistines,' who are represented by the commonplace and domestic 'Grossvatertanz.' [See Grossvatertanz.] The arrangement of the pieces, however, was made, and the title added afterwards. Between numbers 8 and 9 are inserted the 'Sphinxes,' or 'Lettres dansantes,' that is, the 4 notes which in Schumann's mind formed the mystical basis of the whole.[2]

No. 1 is to be read as S (Es), C, H, A, the musical letters in the composer's name; Nos. 2 and 3 as As, C, H, and A, S, C, H, the letters forming the name of a town in Bohemia, the residence of a Baron von Fricken, to whose daughter Ernestine he was actually engaged at this time.[3]

The 'Carneval' was published in 1837. It was probably first played in England on June 17, 1856, when Mme. Schumann performed 16 of the 21 numbers.

Schumann returned to the Carnival as the subject of a composition in his 'Faschingsschwank aus Wien' (op. 26). G.

[1] This is the spelling of the original edition; in his letters Schumann generally, but not always, writes Carnaval.

[2] These were seldom or never played in public by Mme. Schumann.

[3] Schumann's *Jugendbriefe*, Sept. 5, 1834, *note*; but see Litzmann's *Clara Schumann*, vol. i. p. 73 ff.

CARNICER, Ramon, Spanish dramatic composer, born near Lerida in Catalonia, Oct. 24, 1789, died in Madrid, March 17, 1855. In 1818 he was appointed conductor at the Italian Opera of Barcelona, and here he produced successfully his first opera 'Adela de Lusignano,' which was followed by several others. Between 1820 and 1827 he visited Paris and London, and was favourably received in both. In 1828 he was appointed conductor at the Theatre Royal in Madrid, for which he composed 'Elena e Malvino' (1829), and 'Colombo' (1831), generally considered his best work. He largely contributed to the foundation of a national opera. From 1830 to 1854 he was professor of composition at the Madrid Conservatoire. Besides nine operas, he composed church music, symphonies, military marches, national hymns, and an infinity of songs. His music is original and rhythmical, though much impregnated with phrases from national airs. M. C. C.

CAROL. The history of this word presents a remarkable parallel to that of the kindred term Ballad. Both originally implied dancing: both are now used simply to denote a kind of song.

In old French, *Carole* signified a peculiar kind of dance in a ring. This dance gave its name to the song by which it was accompanied: and so the word passed, in one or both of these senses, into most of the languages of Western Europe.

In the English of Chaucer carolling is sometimes dancing and sometimes singing. In modern usage a carol may be defined as a kind of popular song appropriated to some special season of the ecclesiastical or natural year. There are, or were, Welsh summer carols, and winter carols; there are also Easter carols; but the only species which remains in general use, and requires a more detailed examination, is the Christmas carol.

Christmas carols then are songs or ballads to be used during the Christmas season, in reference to the festival, under one or other of its aspects. In some it is regarded chiefly as a time of mirth and feasting; in others as the commemoration of our Lord's nativity. In many carols of widely different dates some one or more of the customary circumstances or concomitants of the celebration appear as the main subject of the verse. This is the case with the oldest known carol written in England, which exists in the Norman French language in a manuscript of the 13th century. (Joshua Sylvester, in 'A Garland of Christmas Carols,' etc., J. C. Hotten, 1861, states that it was discovered on a leaf *in the middle of one of the MSS. in the British Museum*, but as he gives no reference, its identification is almost impossible.) This points to an important fact in the history of the Christmas festival. In Northern Europe especially the solemnities of the annual celebration of Christ's birth were grafted upon a great national holiday-time, which had a religious significance in the days of paganism; and this

has left a distinct impression upon Christmas customs and on Christmas carols. The old heathen Yule has lent its colouring to the English Christmas; and it is largely to this influence that we must attribute the jovial and purely festive character of many of the traditional and best known, as well as of the most ancient Christmas carols. These carols have not, like the hymns appropriate to other Christian seasons, exclusive reference to the events then commemorated by the Church, but represent the feelings of the populace at large, to whom the actual festivities of the season are of more interest than the event which they are ostensibly intended to recall.

At the same time there are many other Christmas carols, ranging from an early period, which treat entirely of the occasion, the circumstances, the purpose, and the result of the Incarnation. These differ from hymns chiefly in the free ballad style of the words and the lighter character of the melody. Moreover, a large proportion of them embody various legendary embellishments of the Gospel narrative, with a number of apocryphal incidents connected with the birth and early years of Jesus Christ. For these they are in all probability indebted immediately to the Mystery Plays, which were greatly in vogue and much frequented at the time from which Christmas carols trace their descent; that is, the 12th or 13th century. Indeed, it seems probable that the direct source of Christmas carols, as we understand the term, is to be found (as stated in the article HYMN) in similar compositions which were introduced between the scenes of the Mysteries or Miracle-plays, the great religious and popular entertainments of the Middle Ages. Three such compositions, belonging to one of the Coventry plays,[1] have been preserved, by accident, apart from the play itself, with this note: 'The first and last the shepheards singe: and the second or middlemost the Women singe.' It is easy to see from this how carols relating to the mysteries of man's redemption might become rooted in the memories and affections of the people. Christmas carols have also been affected by the hymns of the Church on the one side, and by purely secular songs or ballads on the other. The words of a very large number, dating from the 15th century downward, are extant, and have been published in such collections as those of Sandys, Husk, Sylvester, and, more recently, A. H. Bullen; but the materials for a history of their musical character are less copious and less easily accessible. It cannot be doubted that the style of the tunes was that of the ballad music of the period to which they belong: a period which extends, so far as concerns existing melodies, from the 15th century to the 19th. An example of a strictly mediæval carol tune is to be found in that of the second of the carols introduced into the Coventry play already mentioned. 'Lully, lulla, y^{w} littell tine childe,' which has been published in modern notation by E. Pauer. Others, in three or four parts, of the time of Henry VII. and Henry VIII. exist in manuscript.[2]

In the time of King Henry VII. and later it was one of the duties of the choir of the Chapel Royal to sing Christmas carols before the sovereign; and it may be that this custom gave rise to the elaborate compositions bearing that name, of which three specimens are preserved among the works of William Byrd. These, however, were not carols in the popular sense, or for popular use. They exhibit the same abundance of contrapuntal resources which is conspicuous in Byrd's other compositions; nor do they differ, except so far as they may be affected by the character of the words, from other madrigalian music of the Elizabethan era. They may well be compared, both in regard to their structure and their position in the development of vocal music, with the Italian and French examples of a similar treatment of this species of composition referred to under NOEL.

The 'Sacred Hymnes,' of Byrd's contemporary John Amner, published in the year 1615, include two 'Motects' for Christmas, each for six voices. The former, which begins 'O yee little flock, O ye faithful shepherds,' is divided into three parts; the latter, of which the first words are 'Loe, how from heaven like stars the angels flying,' into two. There is also a carol, 'Upon my lap my Soveraigne sits,' which approaches more to the character of a part-song, in the 'Private Musicke' of Martin Peerson, printed in the year 1620.

Meanwhile, no doubt, the older and simpler kind of Christmas carol held its place among the lower orders of society; and it reappeared, which these more elaborate and artificial forms of Christmas songs never did, when the pressure of the Puritan ascendancy which prevailed during the Commonwealth was removed. Both before and after that period books of carols for Christmas Day and its attendant feasts were printed, with the names of the tunes to which they were to be sung. These are in most cases popular airs of secular character.[3] But gradually even these musical directions disappeared. During the 18th century the carol literature was of the humblest kind. Sheets of words were printed for the use of itinerant singers; but if the strains to which they were to be sung were committed to paper at all, the possession of them must have been pretty well confined to parish

[1] 'The Pageant of the Company of Sheremen and Taylors in Coventry, as performed by them on the festival of Corpus Christi,' etc. Coventry, 1817.

[2] Additional MSS. 5465 and 5665 in the British Museum contain such tunes.

[3] For example: in 'Christmas Carols Good & True, Fresh & New,' printed in 1642, the tunes are as follows:—For Christmas Day, (1) Troye Towne, (2) All you that are good fellowes: (the first line of the Carol following). St. Steven's, (1) Wigmore's Galliard, (2) Bonny Sweet Robin. St. John's Day, (1) Flying Fame, (2) The King's going to Bulleine. Innocents' Day, (1) As at noone Dulcina rested, (2) The Spanish Pavin. New Yeares-Day, Green Sleeves. Twelfe Day, (1) The Ladies' Fall, (2) The Spanish Gipsies.

clerks and village amateurs. Still they were handed on by tradition; and many of them have been rescued from oblivion, and may even now be heard, in a more or less modernised form.

The first person who attempted to fix these vanishing memories of the past seems to have been Davies Gilbert, F.R.S., etc., who in the year 1822 published 'Some Ancient Christmas Carols with the Tunes to which they were formerly sung in the West of England'; 'being desirous,' as he says in his preface, 'of preserving them in their actual forms . . . as specimens of times now passed away, and of religious feelings superseded by others of a different cast.' Another reason he gives for so doing is the delight they afforded him in his youth, when, as he seems to imply, they were sung in churches on Christmas Day, and in private houses on Christmas Eve. [In these and other later collections are many tunes which indicate an origin in days when the ecclesiastical modes were still current among the people. A series of thirteen 'Carols of the Fifteenth Century,' edited from a MS. in Trin. Coll. Cambridge by J. A. Fuller Maitland and W. S. Rockstro, appeared in 1891.] H. R. B.

CARON, PHILIPPE, a composer of the 15th century, probably born about 1420. He is said by Tinctor, who names him Firmin, to have been the scholar of Binchois or Dufay. The name is Flemish [and a chorister of the name is mentioned as a member of the cathedral choir of Cambrai. See the *Quellen-Lexikon* for the three masses in the Library of the Pope's Chapel, among which is one on 'L'omme armé.' Caron also wrote secular songs, eight of which are in the Bibliothèque Nationale in Paris.]

CARON, ROSE-LUCILE, *née* Meuniez, a famous French operatic soprano, born at Monerville (Seine-et-Oise), Nov. 17, 1857, was a pupil of the Paris Conservatoire from 1880, when she was already married, until 1882, when she obtained a second prize for singing and an *accessit* for opera. Her début took place at the Théâtre de la Monnaie, Brussels, in 1882, where she created the part of Brunehilde in Reyer's 'Sigurd'; she remained there till 1885, when (June 12) she appeared at the Paris Opéra, again in Reyer's work. She sang in Paris the principal parts in 'La Juive,' 'Freyschütz,' 'Henry VIII.,' and Massenet's 'Cid'; returned to Brussels in 1887 and created the soprano parts in Godard's 'Jocelyn' (1888) and Reyer's 'Salammbô' (1890). In the latter year she went again to Paris, appearing in 'Sigurd,' 'Lohengrin' (1891), and 'Salammbô' (1892). She sang the part of Sieglinde in the French performance of 'Die Walküre' (1893), and that of Desdemona in Verdi's 'Otello' (1894). Elizabeth in 'Tannhäuser,' and Donna Anna are among her finest parts, and she was engaged in 1898 at the Opéra Comique to appear in 'Fidelio,' a part she had undertaken in Brussels. She also sang in Gluck's 'Iphigénie en Tauride' at the same theatre in 1900. Since that date she has been chiefly heard in concerts, and the nobility of her art, and the beauty of her voice, have distinguished her as much on the platform as on the stage. In 1902 she became one of the professors of singing in the Conservatoire of Paris. G. F.

CAROSO, FABRITIO, of Sermoneta, author of *Il Ballarino* (Venice, 'appresso Francesco Ziletti,' 1581), a valuable work upon dancing, dedicated to Bianca Cappella de' Medici, Grand Duchess of Tuscany. It gives instructions for performing the dances of the period, with music in lute-tablature, and plates showing the attitudes of the dancers. It contains the author's portrait at the age of forty-six. Another publication, based upon the former, but so much revised and rewritten as to make it a new book, entitled *Nobiltà di Dame* (Venice, 'presso il Muschio,' 1600), has a dedication to the Duke and Duchess of Parma and Piacenza dated 1600. It contains the same portrait of the author altered so as to present him at the age of seventy-four. G. E. P. A.

CARPANI, GIUSEPPE, poet and writer on music, born Jan. 28, 1752, at Villalbese, in the district of Brianza. As his father destined him for the law, he studied at Milan and Padua, and practised under the celebrated advocate Villata at Milan. But he soon gave up the law, entered the society of artists and literary men, and indulged his natural taste for art. He had already written more than one comedy and several opera-libretti for the Italian stage, among others 'Camilla,' composed by Paër. In consequence of some violent articles against the French Revolution in the *Gazzetta di Milano*, of which he was editor from 1792 to 1796, he had to leave Milan when it was taken by the French. Until the peace of Campo Formio in 1797 he lived at Vienna; after that date he became censor and director of the stage in Venice, but a malady of the eyes drove him back to Vienna, where the Emperor pensioned him till his death. He published a number of translations of French and German operas, and also wrote an oratorio on 'La passione di Gesù Cristo,' which was set to music by Weigl, and performed in 1804 in the palace of Prince Lobkowitz, and in 1821 by the Gesellschaft der Musikfreunde. He also translated the 'Creation' into Italian, and wrote a sonnet on the celebrated performance of that work, at which Haydn was present the year before his death. Carpani had the greatest esteem and affection for Haydn, which led to his publishing his well-known *Haydine*, etc. (Milan, 1812, and a second enlarged edition at Padua, 1823). *La Haydine* is a kind of æsthetical work, and a eulogy on Haydn's compositions, written with enthusiasm. It quickly found a translator in Beyle, the French writer, who published it as his own composition under

the name of Bombet — *Lettres écrites de Vienne*, etc., by Louis Alexandre César Bombet (Paris, 1814). Carpani attacked this piracy in two spirited letters—'Lettere due, dell' Autore delle Haydine' (Vienna, 1815). Beyle was, nevertheless, audacious enough again to publish his work, this time under the alias of Stendahl, *Vies de Haydn, Mozart, et Métastase*, etc. (Paris, 1817). In spite of Carpani's protestations, the first of the two appeared in English as *Lives of Haydn and Mozart* (Murray, 1817; and Boston, U.S., 1839). Extracts of Carpani's original work, translated by D. Mondo, appeared at Niort in 1836, and in a complete form at Paris, 1837, under the title *Haydn, sa vie, ses ouvrages, et ses aventures*, etc., par Joseph Carpani; traduction de Mondo. Some clever but partial sketches of Rossini were published by Carpani in one volume as *Le Rossiniane* (Padua, 1824). This also was pirated anonymously by Beyle (Paris), and published by Mondo. [Yet another book, *Le Mayeriane*, on the work of Simon Mayr, is mentioned by Riemann.] In 1809 Carpani accompanied the Archduke John on his expedition to Italy. After the return of peace, he devoted himself to starting the *Biblioteca Italiana*. He died in the smaller Liechtenstein Palace at Vienna, a bachelor of seventy-three, on Jan. 22, 1825, from simple decay of nature. C. F. P.

CARPENTRAS, or IL CARPENTRASSO, the sobriquet of Eleazar Genet; see GENET, E.

CARR, JOHN, a 17th-century London music publisher, who issued many of the important musical treasures of his day. He was a friend, and in some degree a partner, of John Playford, his contemporary in music-publishing, while his shop 'near the Middle Temple Gate' must have been in close proximity to Playford's —this latter was 'in the Inner Temple and near the Church door.' Among the works published by Carr, either alone or in conjunction with Playford, are: 'Tripla Concordia'; Matthew Locke's 'Melothesia or certain rules for playing upon a continued Bass,' 1673; 'Comes Amorie, or the Companion of Love, being a collection of Choice Songs,' two books, 1687-88; 'The Lawfulness and Expediency of Church Musick' (a sermon preached at St. Bride's in 1693); and many others now of antiquarian interest. Thomas Salmon published through him his famous 'Essay to the advancement of Musick by the casting away the perplexity of different cliffs,' 1672, a work which, attacked by Matthew Locke, John Playford, and others, caused a small paper war. With Playford, Carr published Henry Purcell's 'Sonnata's of III Parts,' 1683.

Richard Carr, son of the above, was a musician in Charles the Second's royal band, and he, for a very short time, was connected with Henry Playford as publisher—see imprint on *Theater of Musick*, 1685. John Playford the elder in bidding farewell to the public in 'Choice Ayres,' fifth book, 1684, says that he will now leave his labours to be taken up by two young men, 'my own son and Mr. Carr's son who is now one of His Majesty's Musick, and an ingenious person whom you may rely upon.' F. K.

CARREÑO, TERESA, one of the most eminent of female pianists, was born at Caracas, Venezuela, Dec. 22, 1853. From her father, a Minister of Finance in her native place, she received her earliest musical instruction, but while quite young she studied further under L. Gottschalk in New York, and later under G. A. St. C. Mathias in Paris, and still later under Rubinstein. At the age of nine she made her public début at a charity or benefit concert in the Academy of Music in New York, subsequently making a tour through the States. But for a time pianoforte-playing was in abeyance, for it is recorded that she sang at four days' notice, for Mapleson, the part of the Queen in 'Les Huguenots,' this being her first appearance on the stage. In 1875 she (temporarily as it proved) adopted the profession of the stage, under the management of Maurice Strakosch, and became part of the company which included Brignoli and Tagliapietra, the latter her husband after her separation from E. Sauret. In 1892 she married Eugen D'Albert, from whom, however, she parted three years later. While touring in Venezuela with Tagliapietra's opera company Mme. Carreño conducted the performances for three weeks during a quarrel between the official conductor and the singers. In 1889 she reappeared as a pianist, and it is from that date that her fame developed, which fame has increased year by year until now Mme. Carreño holds one of the first places among contemporary pianists; her playing being remarkable for almost masculine vigour combined with much romantic charm and poetry, and a superb technical finish. Mme. Carreño composed the Venezuelan National Anthem. R. H. L.

CARRODUS, JOHN TIPLADY, born at Keighley, Yorkshire, Jan. 20, 1836. His father was a zealous amateur, a violin player, and leader of the local Choral Society. The boy was destined to music from the first, and at twelve years of age was put into the able hands of Molique, whom he accompanied to Stuttgart, and with whom he remained till he was nearly eighteen. [He had appeared in public in London on June 1, 1849, at a concert given by C. Salaman in the Hanover Square Rooms.] On his return to London he entered the orchestra of Covent Garden, and made his first appearance as a soloplayer at a concert of the Musical Society of London, on April 22, 1863, since which time he was frequently heard at the Philharmonic, the Crystal Palace, and other leading concerts, both metropolitan and provincial. He published two Violin Solos and a Morceau de Salon. [He was leader of the opera band for many years, and his

death took place on July 13, 1895, within a few hours of his return from the opera-house.] G.

CARTER, THOMAS, born in Dublin, in 1734, showed rare musical talent in his sixteenth year, and was appointed organist of St. Werburgh's Church, then a fashionable place of worship, in 1751, which position he held till the close of the year 1769. John O'Keeffe says: 'Carter had been brought up in the choir of Christ Church Cathedral, Dublin [1740-45], and was organist to Werburgh Church. Any music he had never seen before, even upside down, he played it off on the harpsichord.' In 1755 he published six sonatas for the harpsichord, and in 1760 wrote 'Shannon's Flowery Banks,' followed by the enormously popular 'Guardian Angels' (sung by Mr. Robert Mahon) in 1762, which was adapted as a hymn-tune, 'Oliver's,' in 1764, and as 'Helmsley' in 1769. At the close of the year 1769 he set 'O Nancy, wilt thou fly with me' (Scotticised as 'O Nannie, wilt thou gang wi' me')—words by Thomas Percy, subsequently Bishop of Dromore—to music which at once made his name, and he settled in London in 1772. His elder brother, Sampson Carter, graduated Mus.D. at Dublin University in 1771.[1] Between the years 1773 and 1777 Carter's songs were popularised by Vernon at Vauxhall, but he also wrote what would now be termed 'musical comedies,' *e.g.* 'The Rival Candidates' (1775), 'The Milesians' (1777), and 'The Fair American' (1782), all performed at Drury Lane Theatre. In 1787 he was given the post of musical director of the Royalty Theatre, Goodman's Fields, where he produced 'The Birthday' (1787) and 'The Constant Maid'; and in 1792 he composed the comic opera 'Just in Time' for Covent Garden. O'Keeffe, in his *Recollections,* has some amusing stories of Carter (who was as improvident as his countryman Bickerstaffe), and praises highly his hunting song 'Ye Sportsmen, give ear.' Carter died Oct. 16, 1804, aged seventy. He was musical director of Lord Barrymore's Theatre at Wargrave from 1786 to 1789. W. H. G. F.

CARTER, THOMAS (No. 2), was born in Dublin, in May 1769, and was a chorister in Cloyne Cathedral. So great was his musical precocity that he was taken up by the Earl of Inchiquin, who sent him to Italy. Having finished his studies at Naples in 1788 he went to India, and was musical director of the theatre at Calcutta. His health broke down and he returned to London, where, in 1793, he married a Miss Wells, of Cookham, Berkshire. He composed many theatrical interludes, and some trivial songs. His death occurred on Nov. 8, 1800, aged thirty-one. W. H. G. F.

CARTIER, JEAN BAPTISTE, a French violinist, born at Avignon, May 28, 1765; the son of a dancing-master. His first teacher on the violin was an Abbé Walrauf. In 1783 he went to Paris and continued his studies under Viotti. His progress must have been rapid, as he very soon, on Viotti's recommendation, obtained the post of accompanist to Marie Antoinette, which he held up to the outbreak of the Revolution. From 1791 to 1821 he was in the band of the opera as assistant-leader and solo-player. From 1804 he was a member of the Emperor Napoleon's private band under Paisiello and of the Royal band from 1815 till 1830. He died at Paris in 1841. Cartier was a good violinist, and it was his great merit to have revived the noble traditions of the old Italian school of violin-playing by publishing new editions of the works of Corelli, Tartini, Nardini and other great masters, which at that time were all but unknown in France. He thereby caused not only his own numerous pupils but all the young French violinists of his time to take up the study of these classical works for the violin. In his work 'L'art du violon' (Paris, 1798 and 1801) Cartier gives a comprehensive selection from the violin music of the best Italian, French, and German masters, which is rightly regarded as a practical history of violin literature in the 17th and 18th centuries.

It is much to be regretted that a history of violin-playing, which he wrote, has never been made public. His compositions are of no importance. He published sonatas in the style of Lolli, études, and duos for violins. Fétis also mentions two operas, two symphonies and violin concertos, which have remained in MS. P. D.

CARULLI, FERDINANDO, an eminent guitarist, born at Naples, Feb. 10, 1770, died in Paris in Feb. 1841. Though self-taught he attained a perfection of execution before unknown on the guitar, and on his arrival in Paris in 1808 created a perfect furore. In the space of twelve years he published 300 compositions, including a 'Method' which passed through four editions. He was also the author of *L'Harmonie appliquée à la Guitare* (Paris, 1825), a treatise on the art of accompanying, which was the first work of its kind. M. C. C.

CARUSO, LODOVICO or LUIGI, born at Naples, Sept. 25, 1754, died at Perugia, 1822; son of a musician at Naples, studied under Nicolo Sala, composed in all sixty operas (for list see Fétis), of which the first was 'Il Barone di Trocchia' (Naples, 1773), and the last 'L' Avviso ai Maritati' (Rome, 1810). His 'Artaserse' was performed in London in 1774. He also composed four oratorios, four cantatas, and masses, etc., of a style more dramatic than ecclesiastical. He is said to have lived for some time in Paris and Germany, and to have been conductor at Palermo. He had a brother Emmanuele, also a musician. M. C. C.

CARVALHO, MARIE CAROLINE FÉLIX, *née* Miolan, born Dec. 31, 1827, at Marseilles, received instruction from her father, Félix Miolan,

[1] Dr. Sampson Carter was lay Vicar-Choral of both Dublin Cathedrals—Christ Church and St. Patrick's—and survived his brother Thomas by some years.

an oboe player, and from Duprez at the Conservatoire, Paris (1843 to 1847), where she obtained the first prize in singing. She made her début in the first act of 'Lucia,' and in the trio of the second act of 'La Juive,' at Duprez's benefit Dec. 14, 1849. In 1849-1856 she sang at the Opéra Comique, and made her reputation as Isabelle in 'Le Pré aux Clercs,' as the heroines on the respective productions of 'Giralda' and 'Les Noces de Jeannette,' July 20, 1850, and Feb. 4, 1853. In the latter year she married Carvalho (see below) then engaged at the same theatre. From 1856 to 1869 she sang at the Lyrique, where she first appeared in a new opera, 'La Fanchonnette' (Clapisson), and where she increased her reputation as the foremost female lyric artist of the French stage. She appeared as Cherubino, Zerlina ('Don Giovanni'), with Nilsson (Elvira) and Charton-Demeur (Donna Anna), as Pamina to the Astrifiammante of Nilsson, and in new operas of Massé and Gounod, *i.e.* 'La Reine Topaze,' Dec. 27, 1856; 'Faust,' March 19, 1859; 'Philémon et Baucis,' Feb. 18, 1860; 'Mireille,' March 19, 1864, and 'Roméo et Juliette,' April 27, 1867. 'The opera stage has rarely seen a poet's imagining more completely wrought than in the Marguérite of Mme. Miolan-Carvalho . . . I had . . . watched the progress of this exquisitely finished artist with great interest . . . finding in her performances a sensibility rarely combined with such measureless execution as hers . . . but I was not prepared for the delicacy of colouring, the innocence, the tenderness of the earlier scenes, and the warmth of passion and remorse and repentance which one then so slight in frame could throw into the drama as it went on. . . . Those know only one small part of this consummate artist's skill that have not seen her in this remarkable "Faust"' (Chorley). In 1869-1870 and later she sang alternately at the Grand Opéra and the Opéra Comique until her final retirement, which took place in scenes from 'Faust' and 'Mireille' at the latter theatre, June 9, 1885. She sang in a duet from the latter opera, with Faure, at the concert given at the Trocadéro on June 8, 1887, for the benefit of the sufferers in the fire at the Opéra Comique. She first appeared in England at the Royal Italian Opera as Dinorah, with great success, on the production of that opera ('Pardon de Ploërmel') July 26, 1859. She sang every season until 1864 inclusive, and again in 1871-1872, and worthily maintained her reputation—viz. as Margaret on the production of 'Faust,' Oscar ('Ballo in Maschera'), the Zerlinas (Mozart and Auber), Matilde, Donna Elvira, Rosina ('Barbiere' and 'Nozze'), Catarina ('L'Étoile du Nord'), etc., and in the small part of the Happy Shade in 'Orfeo.' Mme. Carvalho has also sung at Berlin, St. Petersburg, and elsewhere. She died July 10, 1895.[1]

LÉON CARVAILLÉ, known as Carvalho, born 1825, educated at the Paris Conservatoire, where in 1848 he obtained an *accessit,* played small parts at the Opéra Comique, was manager of the Lyrique, 1856 to 1869, afterwards at the Vaudeville, where he produced Sardou's celebrated 'Rabages'; in 1876 became manager of the Opéra Comique. In consequence of the fire of May 25, 1887, a heavy fine was imposed upon him, and he was imprisoned for a time, since the accident was judged to be the result of managerial carelessness. In 1888 he was succeeded by M. Paravey, and died Dec. 29, 1897. A. C.

CARY, ANNIE LOUISE, American concert and opera singer, born in Wayne, Kennebec Co., Maine, on Oct. 22, 1842. From 1864 to 1866 she studied in Boston with J. Q. Wetherbee and Lyman Wheeler. In August of the latter year she went to Milan and prepared for an operatic career with Giovanni Corsi. After fifteen months of study she secured her first operatic engagement and effected her début in Copenhagen. For two seasons she sang in theatres of the Scandinavian peninsula devoting her vacations to study with Mme. Viardot-Garcia at Baden-Baden. In the autumn of 1869 she sang at Brussels, then spent the winter in Paris studying with Maurice Strakosch and Bottesini. She now signed a contract with the brothers Maurice and Max Strakosch for three years, and in August 1870 returned to the United States. From that time till her retirement at the height of her popularity in 1882, she was one of the most admired of opera and concert contraltos, her services being always in demand at the opera houses of London, St. Petersburg, and New York. The seasons of 1875 to 1877 were spent in Russia. She married Charles Monson Raymond in the spring of 1882, and has since lived in retirement in New York. Her voice was a mezzo-contralto of wide range and great beauty. H. E. K.

CASALI, GIOVANNI BATTISTA. Chapel-master of St. John Lateran in Rome from 1759 till his death 1792. An opera of his, 'Campaspe,' was produced at Venice 1740 [and another, 'Antigone,' at Turin in 1752]. Grétry was his pupil for two years in Rome, but Casali did not detect his talent, and sent him back with a letter of introduction in which he described the great opera writer as 'a nice fellow, but a thorough ass and ignoramus in music.' Casali's works comprise four masses, motets, magnificats, and many other pieces for the church [as well as an oratorio, 'Labenedizione di Giacobbe.' See list in the *Quellen-Lexikon.*] He wrote in a very pure style, though without much invention. A mass and four other pieces are given by Lück (Sammlung, 1859), two motets in Schott's Répertoire, and an 'O

[1] Two brothers of Mme. Carvalho were also musicians. (1) AMÉDÉE FELIX, orchestral conductor, who died at New Orleans; and (2) ALEXANDRE, professor of organ and harmonium, and as such attached to the Lyrique for several years; died April 26, 1873.

quam suavis,' a pretty melodious movement, by Novello, from Choron. G.

CASE, JOHN, M.D., a native of Woodstock, was a chorister, first at New College and afterwards at Christ Church, Oxford. He became a scholar of St. John's College in 1564, and took the degree of B.A. in 1568, and that of M.A. in 1572. (*Dict. of Nat. Biog.*) He subsequently became a fellow of St. John's College, which he vacated on marriage, when he established himself in Oxford as a lecturer to private pupils on philosophy, for which he enjoyed a high and deserved reputation. In 1586 he published *The Praise of Musicke*, and in 1588 *Apologia Musice tam vocalis tam instrumentalis et mixtæ*. [There is in the Cambridge Univ. Library a broadside of 'A gratification unto Master John Case, for his learned booke, lately made in the praise of Musicke. VI. voc.' Cantus secundus begins 'Let others prayse what seemes them best.'] Thomas Watson wrote a song in his praise, which was set to music by William Byrd. He died Jan. 23, 1599-1600. W. H. H.

CASENTINI, SIGNORA, a good singer in the comic style, appeared at the Pantheon in London in 1791, taking the principal part in Paisiello's 'Locanda,' and other operas. Lord Mount-Edgcumbe describes her as 'a pretty woman and genteel actress.' In 1893 she had married Borghi, second violin at the opera, and was singing at the King's Theatre; but she was not in good health, and her voice was too weak for that house. Her later history is not known. J. M.

CASINI, GIOVANNI MARIA, was a Florentine priest, born towards the close of the 17th century. Fétis gives 1675 as the date of his birth, but it is not ascertained. He came to Rome early in life, but not before he had learnt the elements of counterpoint in his native town. At Rome he was successively the pupil of Matteo Simonelli and Bernardo Pasquini, under the last-named of whom he perfected himself as an organ player. The only post which he is known to have held was that of organist in the cathedral of Florence, which he held from 1703 until 1714 or later. He was simply a perverse man of talent who elected to join the ranks, and to add one or two more to the absurdities, of those musical reactionaries who tried to stop the progress of the art in the 17th century. He followed in the wake of Doni Vicentino and Colonna in endeavouring to revive the three old Greek 'genera' of progression, viz. the diatonic, the chromatic, and the enharmonic. Fétis, indeed, says that, as several enthusiastic pedants of his class had done before him, he constructed a harpsichord in which the notes represented by the black keys were subdivided, so as to obtain just intonation. Baini does not go so far as this, but only states him to have adopted the views of those who thus wasted their labour and ingenuity. He describes a harpsichord which Casini had constructed in 1606 at the expense of Camillo Gonzaga, Count of Novellara. It had four octaves, each divided into 31 notes, and as the highest of the treble was in octaves to the lowest of the bass, it had 125 keys in all, black and white.

Casini's extant works consist of a MS. oratorio 'Il Viaggio di Tobia,' and another dealing with the Flight into Egypt (at Modena), 'Canzonette spirituali,' Florence, 1703, a volume of motets for four voices in the 'stile osservato,' intituled 'Johannis Mariæ Casini, Majoris Ecclesiæ Florentiæ modulatoris, et sacerdotio præditi, Moduli quatuor vocibus: opus primum. Romæ, apud Mascardum, 1706,' 'Responsori per la Settimana Santa, a 4 voci, op. 2, Florence, C. Bindi, 1706,' 'Pensieri for the Organ, op. 3, Florence, 1714.' A motet of his is given by Proske in his *Musica Divina*, ii. No. 58, and two of the 'Pensieri' in vol. iii. of Torchi's *L'Arte Musicale in Italia*. E. H. P.

CASSATION, perhaps implying 'farewell,' designates a piece of instrumental music of the 18th century, for the open air [some writers claim a derivation from the German *Gasse*, a street] in several movements, much like the SERENADE or DIVERTIMENTO, though it seems appropriate only to the finale of such a composition. In Köchel's Mozart Catalogue there are three, Nos. 62, 63, 99, the last two of seven movements each. G.

CASSEL, GUILLAUME, born at Lyons, 1794, died at Brussels, 1836; dramatic singer; studied first under Georges Jadin, and then at the Paris Conservatoire under Garat and Talma. He made his début at Amiens, and sang at various places previous to his appearance at the Opéra Comique in Paris, where he remained for three years. At the end of that time he quarrelled with Pixérécourt, the director, and retired to Belgium, where he settled for life. After a five years' engagement in Brussels he retired from the stage in 1832, and became a teacher. He trained many eminent pupils, including Madame Dorus-Gras. In 1833 he was appointed professor of singing at the Brussels Conservatoire. His compositions were unimportant, but he was successful as a teacher. M. C. C.

CASTANETS. A pair of castanets (or castagnettes) consists of two small pieces of hard wood, shaped somewhat like the bowl of a spoon, or a scallop shell. These are hinged together by a cord, the ends of which pass over the thumb and first finger of the performer. The remaining fingers strike the two halves together, either in single strokes or in trills; the instrument emitting a deep hollow *click*, which, although not a musical note, is nevertheless not disagreeable to the ear. The performer has usually a pair in each hand. It is a Moorish and Spanish instrument, and is intended for accompanying dances. Its use by ballet-dancers is well known.

When required to be played in the orchestra, to accompany dance-music, it is usual to attach a

pair, half on each side, to a flat piece of hard wood, ending in a stick about eight inches long. By shaking this apparatus, the required effect is produced, without the necessity of fitting the castanets to the performer's fingers, who generally is playing some other instrument, and must suddenly take up the castanets to play a few bars. [Another contrivance, used chiefly in military bands, consists of a double pair of castanets held open by light springs and mounted on a frame attached to the hoop of a side-drum. In this form the castanets are worked by the drummer with the ordinary side-drum sticks. D. J. B.] The Spanish name is *Castañuela*, either because made sometimes from the wood of the chestnut-tree (*castaño*) or from some fancied resemblance to the two halves into which the chestnut (*castaña*) naturally divides itself. V. DE P.

CASTELLAN, JEANNE ANAÏS, born at Beaujeu (Rhone), Oct. 26, 1819, received instruction in singing from Bordogni and Nourrit at the Paris Conservatoire, where she remained six years; she obtained an *accessit* in solfeggio in 1831, first premium 1833, second premium in singing 1835, and finally a first premium in singing and second premium in opéra comique in 1836. She went on the operatic stage in Italy, and sang with success at Turin, Milan, and Florence (where in 1840 she married Enrico Giampetro, a singer), also at Vienna, etc. She next sang in the United States and Mexico. She first appeared in England, May 13, 1844, at a Philharmonic concert, with such success that she was re-engaged at a subsequent concert on June 10, also at concerts given by Sterndale Bennett, Benedict, etc. In the winter she sang in Italian opera in St. Petersburg. On April 1, 1845, she first appeared at Her Majesty's as Lucia, with fair success, and remained there during that and the two next seasons, as the successor to Persiani, singing, among other parts, Zerlina ('Don Giovanni'), Fiordiligi ('Così fan Tutte'), Amina, Linda di Chamouni, Adina ('L'Elisire d'Amore'), and Isabella, on production in Italian of 'Robert le Diable,' May 4, 1847, with Jenny Lind. From 1848 to 1852, except 1849, when she was at the Grand Opéra, Paris, where she was the original Bertha in 'Le Prophète,' she sang each season at Covent Garden, where she proved herself a pre-eminently useful singer in many parts of a different character, viz. Margaret of Valois, on the production in Italian of 'Les Huguenots,' July 20, 1848, Juliet, Bertha, Isabella, Elvira ('Masaniello'), Agatha ('Der Freischütz'), Anaïs ('Mosè in Egitto'), Matilde ('Guillaume Tell'), Ninetta, Rosina, Abigail ('Nabuco'), Pamina, Glicera on production in England of Gounod's 'Sapho' (August 12, 1851), Cunegunda on production of Spohr's 'Faust,' July 15, 1852 (the composer interpolated an air for her from his opera 'Der Zwiekampf'), Pamina, and Leonora ('Fidelio'), Madame Castellan sang frequently at the Philharmonic and other concerts, and at the festivals at Norwich, Gloucester, Worcester, and at Birmingham four times, from 1849 to 1858, where in 1855 she originally sang the soprano music in Costa's 'Eli,' and in 1858 the same in Leslie's 'Judith.' Madame Castellan also played in Paris in Italian in 1847, and for the last time in 1859, as well as in Italy and elsewhere. She has long since retired from public life. A. C.

CASTELLI, IGNAZ FRANZ, born at Vienna, March 6, 1781, died there, Feb. 5, 1862; German dramatist of great popularity, author of the librettos of Weigl's 'Schweizerfamilie,' and Schubert's 'Verschwornen' or 'Häusliche Krieg,' and adaptor amongst others of Meyerbeer's 'Huguenots.' From 1811 he held the post of 'Hoftheater dichter' at the Kärnthnerthor Theatre in Vienna. He was the founder, and from 1829 to 1840, sole editor of the *Allgemeiner musikalischer Anzeiger*. He was a good amateur violinist, and was greatly esteemed and beloved. M. C. C.

CASTILLON, ALEXIS DE, Vicomte de Saint Victor, born at Chartres, Dec. 13, 1838, died in Paris, March 5, 1873, was at first at the military academy of Saint Cyr, but abandoned the military career for music, becoming a pupil of Victor Massé and subsequently of César Franck, who was his chief instructor. He joined with two great friends, H. Duparc and Saint-Saëns, in the foundation of the 'Société Nationale de Musique.' Castillon, whose serious and refined talents mark him as one of the most original of Franck's pupils, left behind him a quintet, op. 1, a quartet and two trios for piano and strings; a string quartet; a sonata for piano and violin; a concerto for piano and orchestra; an orchestral suite, a 'Marche Scandinave,' 'Equisses symphoniques,' an overture, 'Torquato Tasso,' for orchestra; Psalm lxxxiv. for soli, chorus, and orchestra; many songs, and pianoforte pieces, etc. The composer must be considered one of the protagonists of the revival of chamber music in France. G. F.

CASTRO, JEAN DE, a native of Evreux, was living at Antwerp in 1571, in 1582-1584 was vice-capellmeister at Vienna, in 1588 and in 1591 was in the service of Duke William of Juliers, and was at Cologne in 1593 and 1596. (Fétis apparently confuses him with another composer of the same name, who was at Lyons in 1570). A three-part mass was published at Cologne in 1599, books of motets at Louvain 1571, 1574, at Douai 1588, at Antwerp 1592, at Cologne 1593 and 1596; books of madrigals and chansons at Louvain 1570, 1575, 1576, Paris 1575, 1580, Antwerp 1569, 1582, 1586, 1591, 1592, 1595, etc. See list in *Quellen-Lexikon*.

CASTRUCCI, PIETRO, pupil of Corelli, and distinguished violin player, born at Rome 1689. In 1715 he came to England with Lord Burlington and became leader of Handel's opera-band. He had a special reputation as performer

on the VIOLETTA MARINA, an instrument of his own invention. In Handel's 'Orlando' is an air accompanied by two Violette marine with violoncelli pizzicati, 'per gli Signori Castrucci' (see the MS.) meaning Pietro and his brother Prospero. In Handel's 'Sosarme' is also an air with Violetta marina obbligato. In 1737 he was superseded at the opera by Festing. To his undoubted talent Castrucci added an amount of charlatanism surprising in a pupil of Corelli's. An instance is given by Burney (*Hist.* iv. 353 note). [J. C. Walker (*Irish Bards*, 1786) states that Castrucci was invited to Dublin to conduct the Rotunda Concerts, that he died there in great poverty, but was honoured by a splendid funeral. If John O'Keeffe's *Recollections* are to be trusted, the date of Castrucci's death was 1751-52, as O'Keeffe describes himself as 'about four years old' at the time (born 1747); but the date 1769 is given by most of the authorities.—W. H. G. F.] He published twelve concerti grossi and three books of violin sonatas. His brother, Prospero, was director of the 'Castle Society of Music,' and, according to Burney, died in 1760. He published six violin sonatas in 1739 (*Quellen-Lexikon*). P. D.

CATALANI, ALFREDO, born at Lucca, June 19, 1854, studied at first with his father, the organist of the church of S. Frediano in that city. At the age of fourteen he wrote a mass which was sung in the cathedral. At seventeen he went to the Paris Conservatoire, where he studied in Bazin's class. Returning to Italy, he studied for two years at the Milan Conservatorio, at the theatre of which his first essay at dramatic composition, an 'Egloga' in one act, 'La Falce,' was produced in the summer of 1875. On Jan. 31, 1880, his grand four-act opera, 'Elda' (words by D'Ormeville), was brought out at Turin; on March 17, 1883, a similar work, 'Dejanice,' in four acts (libretto by Zanardini), was given at the Scala at Milan; in 1885 a symphonic poem for orchestra, 'Ero e Leandro,' attained considerable success; 'Edmea,' a three-act opera (libretto by Ghislanzoni), was produced at the Scala, Feb. 27, 1886; 'Loreley' was given at Turin in 1890, and 'La Wally' in 1892. The composer died at Milan, August 7, 1893. M.

CATALANI, ANGELICA, born May 10, 1780, at Sinigaglia, where her father was a tradesman. About the age of twelve she was sent to the convent of Santa Lucia at Gubbio, where her beautiful voice soon became a great attraction. In its full freshness, according to Fétis and all other authorities, it must have been one of extraordinary purity, force, and compass, going as far as g''' with a sweet clear tone. This exquisite quality was allied to a marvellous truth and rapidity of execution. No singer has ever surpassed, or perhaps equalled, her in chromatic scales, whether in velocity or precision. On leaving the convent, into which she had been introduced by the Cardinal Onorati, and where the congregation could frequently not be prevented from openly applauding her splendid notes in the services, she found herself, owing to the sudden impoverishment of her parents, compelled to perform in public. Her musical education had been but ill cared for in the convent, where she passed three years; and she had contracted bad tricks of vocalisation, which she never entirely overcame even after hearing such great models as Marchesi and Crescentini. One of her faults was that she could never execute certain passages without a very perceptible oscillation of the lower jaw, which made them, instead of being even and smooth, sound like a succession of staccato passages on the violin. In spite of this fault, which was indeed more within the criticism of connoisseurs than of the public generally, her voice was so full, powerful, and clear, her intonation so pure and true, and her instinctive execution of difficult and brilliant music so easy and unfaltering, that her singing had a charm which has scarcely ever been equalled, and her very first steps in a theatrical career were marked by the most extraordinary success. When she began, the favourite style was that of expressive and pathetic song, and in this she never produced the effect which she subsequently made in bravura. Thus at Paris she failed comparatively in a tender song of Piccinni's, 'Se'l ciel mi divide,' though shortly after she created the greatest enthusiasm by her 'Son regina,' by an air of Rode's with variations, concerti for the voice, and other pieces of the most florid execution. In 1795, at the age of sixteen, she obtained her first engagement at the Fenice at Venice, and made her début as Lodoiska in the opera of that name by Mayr. Her face, figure, and voice, assured her success, a success which grew day by day, and lasted for nearly thirty years. In the season of 1798, she sang at Leghorn with Crivelli, Marchesi, and Mrs. Billington; the year after, at La Pergola in Florence, in Nasolini's 'Monima e Mitridate'; and, in 1801, at Milan, in the 'Clitennestra' of Zingarelli, and Nasolini's 'Baccanali.' In these early efforts her effect was not due to method or skill; it was her superb voice that carried all before her, From Milan she went to Florence, Trieste, Rome. and Naples, exciting everywhere the same astonishment and admiration.

Her reputation now reached the ears of the Prince Regent of Portugal, who engaged her, with Mme. Gafforini and Crescentini, to sing at the Italian Opera there, and she arrived about the end of the year 1804. Her salary was 24,000 cruzados (£3000).

Some writers have said that she derived very great advantage from the instruction of Crescentini, which, indeed, seems more than likely; but Fétis, on the authority of Crescentini himself, contradicts this statement categorically, affirming that Crescentini told him that he had endeavoured to give her a little advice, which she had seemed incapable of understanding. It was here that

she married Valabrègue, of the French embassy; but she never quitted her name of Catalani before the public. Her husband, a stupid, ignorant soldier, appears to have had no ideas beyond helping his talented wife to gain the utmost possible amount of money on every occasion, and spending it for her afterwards. From their marriage dates one of the worst of the many speculations that have been based on the capital of a grand voice and great personal charm. They went first to Madrid, and then to Paris, where she sang only in concerts, but where she gained even more fame than before.

On Oct. 26, 1805, Mme. Catalani signed her first engagement (in the possession of the writer) with F. Goold and W. Taylor, manager and proprietors of the King's Theatre in the Haymarket, for the season from Sept. 15, 1806, to August 1807, at a salary of £2000 sterling, with 'a further sum of £100 sterling to defray the expenses of her journey to London,' and also 'one Benefit Night free of expence in the month of March, at which a new opera shall be performed.' Before crossing, however, she gave concerts at Madrid and Paris, by which she gained large sums of money, and created a deep impression; indeed, Napoleon offered her an engagement from which she had some difficulty in escaping, in order to fulfil that at the King's Theatre. At the moment of her arrival in London, Grassini and Mrs. Billington had just retired; and, as Lord Mount-Edgcumbe says, 'the great, the far-famed Catalani supplied the place of both, and for many years reigned alone, for she would bear no rival, nor any singer sufficiently good to divide the applause.' 'It is well known,' he continues, 'that her voice is of a most uncommon quality, and capable of exertions almost supernatural. Her throat seems endued (as has been remarked by medical men) with a power of expansion and muscular motion by no means usual, and when she throws out all her voice to the utmost, it has a volume and strength that are quite surprising; while its agility in divisions, running up and down the scale in semi-tones, and its compass in jumping over two octaves at once, are equally astonishing. It were to be wished,' says this connoisseur of the old school, 'that she was less lavish in the display of these wonderful powers, and sought to please more than to surprise; but her taste is vicious, her excessive love of ornament spoiling every simple air, and her greatest delight (indeed her chief merit) being in songs of a bold and spirited character, where much is left to her discretion (or indiscretion), without being confined by the accompaniment, but in which she can indulge in *ad libitum* passages with a luxuriance and redundancy no other singer ever possessed, or if possessing ever practised, and which she carries to a fantastical excess.' The opinions of all good judges were nearly identical with the above; but the public was led completely away by her marvellous powers. She made her début Dec. 15, 1806, in the 'Semiramide' of Portogallo, composed for her. She appeared also in 'Mitridate,' 'Elfrida,' and most unwillingly in 'La Clemenza di Tito,' for the strict time required in Mozart's music, and the importance of the accompaniments, were not suited to her style. She was, however, the singer who introduced to the English stage his 'Nozze di Figaro,' in which she played Susanna to admiration. In the 'Orazi' she performed the part of the first soprano, Curiazio, that of the first woman being filled by Ferlendis. In 'Didone' she caused the rôle of Enea to be sung by Madame Dussek, who was entirely unfitted for it; and, in another opera, she made Madame Dussek act the first woman's part, choosing for herself that of the *primo uomo*. Subsequently she assumed also the place of *prima buffa*, and succeeded equally well in that line; singing with greater simplicity and ease, she was by some preferred in comic opera. Her face and figure suited both styles; for her handsome countenance was capable of great varieties of expression. Her gains soon became enormous. She was the great attraction of Goold's management, and her engagements entailed on the theatre an expense surpassing anything before experienced. Mr. Waters, in a pamphlet which he published, gives the total amount received by her from the theatre in 1807, including benefits, at £5000, and her total profits that year, with concerts, provincial tour, etc., at £16,700,—an immense sum to be received in such a period for the services of a single artist. That she sometimes found a difficulty in getting payment is not surprising, especially from such a manager as Taylor. Ebers relates that, on one occasion, she refused to sing unless a debt of £1000 due to her was paid; and that he gave security for this, of which he had ultimately to pay every farthing. She received as much as 200 guineas for singing 'God save the King' and 'Rule Britannia,' and at a single festival £2000. Had she practised the least economy she must have amassed a very great fortune; but this she did not do. It is said, for example, that the consumption of beer by her servants during a single year amounted to £103. More serious causes, however, contributed to dissipate these riches as fast as she gained them; for her husband was passionately addicted to gambling, and lost vast sums at play. She remained seven years in England, where she finally succeeded in becoming the only singer of eminence, and led in both lines; but one singer does not constitute an opera, though Valabrègue used to say, 'Ma femme et quatre ou cinq poupées,—voilà tout ce qu'il faut.' Neither would her disposition endure the possibility of rivalry, nor the extravagance of her increasing demands allow any manager to engage other singers. She sang at the Birmingham Festival of 1811. She quitted

the theatre at the end of the season of 1813, having first endeavoured (unsuccessfully) to purchase it, and so become sole proprietor, sole manager, and sole singer. After leaving this stage, she for many years never trod any other, except at Paris, where she obtained the management of the Italian opera, with a subvention of 160,000 francs; but the undertaking was not fortunate. On the return of Napoleon, in 1815, she left Paris, going first to Hamburg, and afterwards to Denmark and Sweden, and exciting everywhere the wildest admiration and enthusiasm. She returned to France, after the Restoration, by Holland and Belgium. On her arrival at Paris, she resumed the direction of the Théâtre Italien, and established the same ruinous system which had, for a time, destroyed opera in London. Every expense of scenery, orchestra, and chorus, was curtailed, and every singer of worth excluded, in order that the entire receipts might go, with the subvention, into the purse of Valabrègue. This was not all. To suit this state of things the operas were arranged in such a manner that little of the original but the name remained. The rest consisted of variations by Rode, and similar things, with the famous 'Son regina,' interpolated in place of the concerted pieces and songs which had been cut out. In May 1816 Catalani left her opera in the hands of managers, and went to Munich to give some concerts and representations. Thence she proceeded to Italy, and only returned to Paris in August 1817. In the next April she left her opera entirely, and resumed her wanderings. Having engaged Mme. Gail to accompany her, as Pucitta had done in London and Paris, she started for Vienna. No sooner had they arrived than she quarrelled with her companion, who returned to Paris. Catalani continued her tour alone, and it lasted nearly ten years. In 1824 she returned to London, performing a certain number of nights with no regular engagement. She reappeared in 'Il Nuovo Fanatico per la Musica,' an opera by Mayr, *arranged* for her. 'Her powers were undiminished, her taste unimproved.' She next continued her wanderings on the continent. In 1826 an attempt was made by Ebers to engage her, but the terms proposed by her were so exorbitant that it was impossible to consider them seriously. Her voice was, however, no longer what it had been, especially in the highest part of her register. Though still beautiful, flexible, and strong, it was losing gradually a little of these qualities. In turn she visited Germany, Italy, and Paris once more, where she sang without success; then Poland, Russia, and the north of Germany again in 1827. About this time she sang for the last time at Berlin, and resolved to cease singing in public. But she revisited England once more in 1828, and sang at the York Festival. Lord Mount-Edgcumbe heard her the same year at Plymouth, and describes her as having lost, perhaps, a little in voice, but gained more in expression: as electrifying an audience with her 'Rule Britannia'; and as still handsome, though somewhat stout. After a time, she retired to a villa which she had bought in the neighbourhood of Florence. On the stage she is described as having always produced an unnatural impression, owing to an invincible nervousness, which made her exaggerate the effects she wished to create. She said herself, that it was as painful to her to sing in the theatre as it was delightful to perform at a concert. She never lost her simplicity and purity of manners, nor her piety, modesty, and generosity. Her charitable deeds were innumerable, and the amount of money earned by her in concerts for such purposes alone has been estimated at 2,000,000 francs. At her residence she founded a school of singing for young girls. Catalani died of cholera at Paris, June 12, 1849. J. M.

CATCH originally meant simply a round for three or more voices (unaccompanied), written out at length as one continuous melody, and not in score. The catch was for each succeeding singer to take up or catch his part in time; this is evident not only from the manner in which they were printed, but also from the simple and innocent character of the words of the oldest catches, from which it would be impossible to elicit any ingenious cross-reading. But in course of time a new element was introduced into catches, and words were selected so constructed that it was possible, either by mispronunciation or by the interweaving of the words and phrases given to the different voices, to produce the most ludicrous and comical effects. The singing of catches became an art, and was accompanied by gesture, the skill with which they were sung has become a tradition, and certainly many old specimens are so difficult that they must have required considerable labour and practice to sing them perfectly. The oldest published collections containing catches were—

1. 'Pammelia: Musicke's Miscellanie, or mixed varietie of Pleasant Roundelayes and delightful Catches of 3, 4, 5, 6, 7, 8, 9, 10 parts in one. None so ordinarie as musicall, none so musicall as not to all very pleasing and acceptable. 1609.'

2. 'Deuteromelia: or second part of Musicke's Melodie, or Melodious Musick of Pleasant Roundelaies. K. H. Mirth, or Freemen's songs, and such delightful catches. 1609.'

3. 'Melismata: Musicall Phansies fitting the court, citie, and countrey Humours. 1611.'

Catches were most in vogue in the reign of the dissolute Charles II., and as much of the popular literature of that period was sullied by indecency and licentiousness it is not surprising that catches were contaminated with the prevailing and fashionable vice; the more than questionable character of the words to which many of the catches of that age were allied has

sufficed to ensure the banishment of a large amount of clever and learned musical contrivance. In later times Dr. William Hayes, S. Webbe, and Dr. Callcott have excelled in the composition of catches: 'Would you know my Celia's charms' by Webbe is a well-known example; 'Ah, how, Sophia,' and 'Alas cry'd Damon' by Callcott are also tolerably well known, and still occasionally performed.

Dr. W. Hayes published several collections of catches, some with words by Dean Swift, and in his preface to the first set (1763) says 'the Catch in Music answers to the Epigram in poetry, where much is to be exprest within a very small compass, and unless the Turn is neat and well pointed, it is of little value.' W. H. C.

The following are the principal collections of catches and glees published in England.

Glees, rounds, catches, and canons are so inextricably mixed in publication that it would be an extremely difficult task to indicate the particular character of each collection.

After the publication of the above-named 'Pammelia,' 'Deuteromelia,' and 'Melismata,' John Playford and his son were responsible for catch books. John Walsh and John Johnson followed, but their issues were mainly reprints from the earlier books. The institution of the different catch and glee clubs throughout the country gave great impetus to the composition and publication of this class of music. The list does not pretend to anything like completeness, but it may be of use to the student of the subject, and may be taken also as an illustration of the article GLEE.

1609. Pammelia.
1609. Deuteromelia. } As above, in small quarto.
1611. Melismata.
The first two were edited and collected by Thomas Ravenscroft; the last bears in addition the name William Ravenscroft.

1652. Catch that Catch can, or a choice collection of Catches, Rounds, and Canons for 3 and 4 voyces. Collected and published by John Hilton. 8m. oblong. John Playford.
The punning title and much of the contents are taken from Ravenscroft's publications.

1667. Catch that Catch can, or The Musical Companion (a second edition of the above, with additions). Oblong 4to. J. Playford.

1672-1673. The Musical Companion in two books (a third edition with additions). Oblong 4to. J. Playford.

1685. Catch that Catch can, or the second part of the Musical Companion. Oblong 4to. John Playford.
The Pleasant Musical Companion: Being a choice collection of Catches for three and four voices. Oblong 4to. John Playford.
The date of first edition not ascertained. The sixth dated 1720; eighth, 1724; ninth, 1726; and tenth, 1730.

1686. The Second Book of the Pleasant Musical Companion. Oblong 4to. J. Playford.

1667 to 1728. The Second Book of the Pleasant Musical Companion. Second edition dated 1687; a fourth dated 1701 (with a Supplement, 1702); a fifth, 1707; and a ninth, 1726.
Another book, with the title, 'The Pleasant Musical Companion,' was published by John Johnson of Cheapside about 1740. It is from engraved plates, and appears to be a reprint from the Playford predecessors.

Circa 1730. The Catch Club, or Merry Companions: Being a choice collection of the most diverting catches for three or four voices (with a second part). Oblong 4to. Published by John Walsh, senior. A later one bearing the same title, but selected by C. J. F. Lampe, was published about 1762 by Walsh, junior, in oblong folio.

1763. A Collection of Catches, Canons, and Glees, for three, four, five, six, and nine voices, never before published. Selected by Thomas Warren, London, for the editor. Oblong folio.
This most valuable collection extended from the above first volume, dated 1763, to the thirty-second. It contained 852 pieces. Warren was secretary to the Noblemen and Gentlemen's Catch Club.
A Collection of Vocal Harmony, consisting of Catches, Canons, and Glees. Selected by Thomas Warren. Oblong folio.

1763. Social Harmony, consisting of a collection of songs and catches. By Thomas Hale, of Darnhall, Cheshire. 8vo.
Another work with this title was published in octavo volume by Jones & Co. about 1830.

1764. Catches, Canons, and Glees. Composed by Samuel Webbe. Nine volumes. Oblong folio.
This was issued at intervals by Webbe from 1764 onwards to about 1798. A selection from the work was made and published in three volumes.

1769. The Essex Harmony: Being an entire new collection of the most celebrated Songs and Catches, Canzonets, Canons, and Glees. By John Arnold. 2 vols. 8vo, 1769; second edition, 1777; third edition, 1788.
A much later work under this title was published by Bland & Weller in two vols. 4to, *circa* 1795.

Circa 1776. A Collection of Catches and Glees. Composed by L. Atterbury. Oblong folio.

1780. A Collection of Catches, Canons, Glees, Duets, etc. Four vols. Edinburgh, J. Sibbald.
This was reprinted by Longman & Broderip, and again by Muzio Clementi.

Circa 1780 to 1790. The Gentleman's Collection of Catches, Glees, Canons, etc. Selected by J. Bland. Folio.
The Ladies' Collection of Catches, Glees, Canons, etc. Selected by J. Bland. Folio.
Two collections of selected glees, etc., which extended to twenty or more numbers. John Bland published other collections, besides quantities in sheet form.

Circa 1790. Apollonian Harmony: A collection of scarce and celebrated Glees, Catches, Madrigals, Canzonets, Rounds, and Canons. Six vols. 8vo. Thompson.
A later issue from the same plates was issued by Button & Whitaker.
Vocal Harmony: A collection of Glees, Madrigals, etc., including the prize glees from 1763 to 1794. Edited by Wm. Horsley. Nine vols. Folio.
The Flowers of Harmony. Four vols. 8vo.

Circa 1800. British Vocal Harmony: A select collection of ancient and modern Duets, Glees, and Catches. H. Gray. Oblong 8vo.

Circa 1810 to 1815. A Collection of Catches and Glees. By William Craumer, Edinburgh. 4to.

1821, etc. Kentish Harmony (a series of small square volumes published by W. Blackman).
The Apollo. A similar series, but embellished with portraits.
Convito Armonico: A collection of Madrigals, Elegies, Glees, Canons, Catches, and Duets. Selected by S. Webbe, junior. Four vols. Folio.

1824. A Collection of Glees, Canons, and Catches. Composed by the late John Wall Callcott. Edited by Wm. Horsley. Two vols., with fine portrait.

1864. The Rounds, Catches, and Canons of England. Edited by Dr. Rimbault. Large 4to.

To the above might be added many collections of glees and catches by different writers, as those of Benjamin Cooke, Maurice Greene, J. Stafford Smith, J. Danby, Wm. Horsley, and others. In addition is the great mass of minor publications and single sheets from Purcell's time onward. F. K.

CATCH CLUB. This society, the full title of which was 'The Noblemen and Gentlemen's Catch Club,' was formed in 1761 for the encouragement of the composition and performance of canons, catches, and glees, and the first meeting took place in November of that year, when there were present the Earls of Eglinton, Sandwich, and March, Generals Rich and Barrington, the Hon. J. Ward, and Messrs. H. Meynell and R. Phelps. These gentlemen, with the Duke of Kingston, the Marquesses of Lorne and Granby, the Earls of Rochford, Orford, and Ashburnham, Viscounts Bolingbroke and Weymouth, Lord George Sutton, Colonels Parker, Windus, and Montgomery, Sir George Armytage, and Messrs. H. Penton, W. Gordon, and J. Harris, who joined in 1762, were the original members, and all subsequently enrolled were balloted for. Among distinguished persons afterwards admitted to the Club were George IV. (elected when Prince of Wales in 1786), William IV. (elected when Duke of Clarence in 1789), the Dukes of Cumberland (1786), York (1787), Cambridge (1807), and Sussex (1813). The professional members elected into the Society of the Catch

Club included Beard, Battishill, Arne, Hayes, Atterbury, Paxton, S. Webbe, Piozzi, Knyvett, Stevens, Callcott, Danby, Greatorex, Bartleman, R. Cooke, Horsley, Goss, Walmisley, and Turle. In 1763 the Club offered its first prizes, one for two catches, a second for two canons, and a third for two glees, and they were awarded to Baildon, Marella, Dr. Hayes, and G. Berg. From its foundation to 1794 the prizes were competed for annually, and among the winners were Arne, Hayes, J. S. Smith, Danby, S. Webbe, Lord Mornington, Paxton, Atterbury, Dr. Cooke, R. Cooke, Dr. Alcock, Stevens, Spofforth, and Callcott. In 1787, in consequence of Dr. Callcott having submitted nearly 100 compositions in competition for the prizes, a resolution was passed that 'in future no composer should send in more than three compositions for one prize.' From 1794 to 1811 no prizes were offered, and after being awarded for two years they were again discontinued, until in 1821 they were once more revived, a gold cup taking the place of the medals. The rules of the Club required the members to take the chair in turns at the dinners which were held at the Thatched House Tavern every Tuesday from February to June, except in Passion and Easter weeks. The successive secretaries of the Club were Warren (1761-94), S. Webbe (1794-1812), Sale (1812-28), R. Leete (1828-36), Jas. Elliott (1836-52), O. Bradbury (1852-73), E. Land (1859-76), Dr. W. H. Cummings (1876-97), and James A. Brown (appointed 1897). Webbe's glees 'Hail! Star of Brunswick' and 'The Mighty Conqueror' were composed specially for George IV., who invariably took his call and sang in his glee; and the Duke of Cambridge attended to the last year of his life and rarely omitted his call, one of his favourite glees being Webbe's 'Glorious Apollo.' In 1861 the Club celebrated its centenary with much vigour, and to commemorate the event offered a silver goblet for the best four-part glee, which was awarded to Dr. W. H. Cummings for 'Song should breathe.' The present subscription is five guineas each season, and the meetings are held fortnightly at the Criterion Restaurant, from Easter to the end of June. C. M.

CATEL, Charles Simon, born June 10, 1773, at l'Aigle (Orne); began his studies very early under Sacchini, Gobert, and Gossec, in the 'École royale de chant et de déclamation,' at Paris. [Conservatoire de Musique.] In 1787 he was made accompanist and 'professeur-adjoint' of the School, and in 1790 accompanist at the Opera. The same year he became chief, conjointly with Gossec, of the band of the Garde Nationale, for which he wrote a vast quantity of military music, which was adopted throughout the revolutionary army. His first work of public note was a 'De profundis' for the funeral of Gouvion in 1792. Another was a Hymn of Victory on the battle of Fleurus (June 26, 1794), written for chorus with wind accompaniment only. On the formation of the Conservatoire in 1795 Catel was made professor of harmony. He immediately began the compilation of his *Traité d'harmonie*, which was published in 1802, and remained for many years the sole text-book of France. In 1810 he became one of the Inspectors of the Conservatoire, a post which he retained till 1814. In 1817 he was elected Member of the Institut, in the room of Monsigny, and in 1824 Chevalier of the Legion of Honour. He died at Paris, Nov. 29, 1830. Catel wrote largely for the stage—'Semiramis' (1802), 'L'Auberge de Bagnères' (1807), 'Les Bayadères' (1810), and other operas in 1808, 1814, 1817, 1818, and 1819. They had the merit of elegance and purity, but they were not successful; the public insisted on recognising Catel as a savant and a professor, and prejudged his works as 'learned music.' On one occasion Napoleon, who had a singular taste for soft and ineffective music, had the 'Bayadères' performed with all the instruments muted and every mark of expression suppressed—a very severe trial for any opera. Besides his theatrical and military music Catel wrote symphonies for wind only, hymns and choral pieces, quintets and quartets for strings and wind, songs, solfeggi, etc.; but it is by his treatise on harmony, by his great practical sense and ability, and by his character for goodness and probity that he will be known to posterity.

His treatise, which was translated into German, Italian, and English, is founded on those of Kirnberger and Türk, and at once superseded the more artificial and complicated theories of Rameau, which had till that time reigned supreme in France. G. C.

CATELANI, Angelo, musician and writer on music, born at Guastalla, March 30, 1811. He received his first instruction from the organist of the place, and afterwards at Modena from Giuseppe Asioli and M. Fusco. In 1831 he entered the Conservatorio of Naples, then under Zingarelli, and became the special pupil of Donizetti and Crescentini. In 1834-37 he was director of the theatre at Messina, in 1837 at Correggio, and finally settled at Modena in 1838, where he was successively maestro di cappella, and (from 1859) keeper of the Este Library. He died at S. Martino di Mugnano, Sept. 5, 1866. Catelani is the author of three or four operas, as well as of a Requiem and other pieces of church music; but his claim to mention rests on his archæological works—Notices of P. Aron; N. Vincentino (*Gazzetta musicale*, 1851); *Epistolario di autori celebri in musica* (1852-54); *Bibliografia di due stampe ignote di O. Petrucci da Fossombrone* (1856)—a treatise on the two first pieces of music printed from type; *Della vita e della opere di Orazio Vecchi* (1858); Ditto *di Claudio Merulo da Correggio* (1860); Ditto *di Alessandro Stradella* (Modena, Vincenzi, 1866). G.

CATERS. The name given by change-ringers to changes on nine bells. The word should probably be written *quaters*, as it is meant to denote the fact that *four* couples of bells change their places in the order of ringing. C. A. W. T.

CATHEDRAL MUSIC. (1) Music composed for use in the English Cathedral Service since the Reformation.

Just as the Reformed Liturgy was composed of prayers, versicles, responses, and other elements which, though in a different language, had formed the basis of the church services for centuries, so the music to which the new services were sung was not so much an innovation as an inheritance from earlier times: precedents can be found for the greater part of it in the pre-Reformation church music. The truth of this will appear if we compare the style of church music used in England at the end of the 15th and beginning of the 16th centuries with what was introduced about 1550 as an accompaniment to the reformed liturgy. Our inferences as to the music of the former date must be drawn chiefly from breviaries and antiphonaries with musical notes, from compositions for the church, such as masses and motets, and from treatises on music. We learn from these sources that the psalms, canticles, versicles, responses, and creeds were sung invariably in plain-song, which signifies a certain specific mode of chanting in unison, guided by definite rules that can still be ascertained, and implying to a great extent the use of certain well-known melodies appropriated to particular parts of the service. Of this mode of chanting, the Gregorian chants used at the present day are a regular form. [PLAIN-SONG.] So far then as regards simple melody we are fairly well informed as to pre-Reformation church music. But there is less certainty as to the use of harmony. It is true that a rude style of part-singing, called 'organising,' had been known for centuries before the Reformation, and later on the development of counterpoint had resulted in the composition of masses and motets, of which we have specimens by English composers, *e.g.* Byrd, Taverner, Fayrfax, and Tye, dating from before the Reformation. But though these compositions show that harmony was recognised in English church music before 1550, it is difficult to show to what extent they were used, and whether they were regularly introduced in the way that anthems by various composers are now employed in cathedral service. Possibly at ferial times plain-song may have predominated, and at festal times harmonised compositions, chants, and canticles, as well as anthems, may have been used; though these would interfere with the plain-song, which invariably formed the 'subject' to which the parts were adapted.

Such was the general character of English church music as it was found by the reformers of the 16th century. We must now inquire in what way it was dealt with by them in the transition from the Romish to the reformed service, and in what form it appeared after the change had taken place. The two works which directly illustrate the mind of the English Church as to the musical rendering of her reformed services are, (1) the Litany published by Cranmer with its musical notation; (2) the more important work containing the musical notation of the remainder of the then Common-Prayer Book, edited by John Marbeck. Now both these works seem to show that the aim of the reformers was not to discard but to utilise the ancient plain-song, by adapting it to the translated services. In the first place the music of Cranmer's litany is a very ancient chant, almost identical with that appointed for the Rogation days in the Roman processional, and with that which occurs in the Salisbury ritual for the procession of peace: hence we see that it was from the oldest sources that Cranmer obtained the musical setting of the new litany in English. Secondly, the music of Marbeck's work consists of the old plain-song simplified and adapted to the new services. W. Dyce, in his *Preface and Appendix to the Book of Common Prayer*, shows conclusively that Marbeck intended to follow the ancient use of Sarum (the great standard of English choral music) note for note, as far as the rules of plain-song would permit; and that where his notation varies from that of Sarum, the variation is due to the difference between the English and Latin syllables, and as such is merely what the technical rules of plain-song would dictate.

It would appear then that as regards plain-song, the Reformation brought little or no change to our services; the ancient melodies were preserved intact, except where change was required to adapt them to the new liturgy.

As to compositions in harmony, these, as we saw above, had been undoubtedly introduced into the service to some extent before the Reformation, but were sung to Latin words. During the changing times of Henry VIII., Edward VI., Mary, and Elizabeth, when the form of church service was not yet settled, the great church composers wrote and arranged for whatever services were established at the time—for the Latin words of matins, vespers, the little hours, and the mass, or for the English canticles of Morning and Evening Prayer, and for the English Communion Service, according as the Romish or Protestant liturgy was recognised. Sometimes, as in the case of Byrd's 'Ne irascaris, Domine,' and 'Bow thine ear, O Lord,' the same music was set to the two languages, or what had been written for the one was adapted to the other. And thus the change of ritual may be said to have affected compositions in harmony even less than it affected the mere melodic forms or plain-song.

Though a complete scheme for the musical service was set forth in Marbeck's book (except for the litany, which Cranmer had already

supplied, and the Psalms, which no doubt Marbeck intended to be sung in the manner he indicated for the Canticles, viz. in the old plain-song); the canticles and other parts of the service were set very frequently in harmony, about the time when Marbeck's book appeared. All the church musicians whose harmonised compositions remain to us, from the time of Edward VI. onwards, have set the canticles anthemwise as 'services'; and thus, even while Marbeck's was the only authorised musical-service book, a more perfect system was displayed alongside of it. Hearers could not fail to be struck by the superiority of harmonised canticles and services over the simple melodies sung in unison, of which Marbeck's book consists. Dr. Jebb considers that the latter work was only meant as an elementary and tentative one, and that it never became authoritative. However this may be, it was superseded by a work containing harmonised compositions, contributed by Tallis, Shepherd, Taverner, and some others. This was John Day's book, published in 1560, and entitled, 'Certaine Notes, set forth in foure and three partes, to be sung at the Morning, Communion, and Evening Praier, . . . and unto them be added divers Godly praiers and psalmes in the like forme.'

The latter clause leads us to the consideration of the anthem, with reference to which Blunt (*Introduction to the Book of Common Prayer*) says as follows:—'It is difficult to ascertain the exact time when the practice of popular hymn and metrical psalm singing established itself in connection with our revised ritual, though independently of its direct authority. Such singing was in use early in Elizabeth's reign, having doubtless been borrowed from the Protestants abroad. For the purpose of giving a quasi-official sanction to a custom which it would have been very unwise to repress, it was ordained by a royal injunction in the year 1559, that while there was to be a 'modest and distinct song so used in all parts of the common prayer, that the same might be understanded as if it were read without singing' (in other words, while the old traditional plain-song in its simplified form is to be employed throughout the whole service, yet) 'for the comforting of such as delight in music it may be permitted that in the beginning or at the end of the common prayer there may be sung an hymn or such like song, to the praise of Almighty God, in the best melody and music that may be devised, having respect that the sentence of the hymn may be understanded & perceived.'

This injunction gave legal authority to the setting of English words to be sung anthemwise. The first anthems written for the Reformed Church are full, *i.e.* sung in regular alternation by the whole choir; they resemble the motets of the Italian Church, which furnished models to the first English anthem-writers. 'Verse anthems,' *i.e.* those in which certain passages, called verses, were sung in slower time, not by all the voices on one side but by a selected number, were introduced about 1670; though Dr. Jebb informs the writer that precedents for verse anthems existed in the pre-Reformation service.

As principal composers of cathedral music from the Reformation to the Rebellion we may mention Tye, Tallis, Farrant, Shepherd, Taverner, Redford, Morley, Byrd, Bull, and Gibbons. The compositions of this period are more conspicuous for technical skill than for musical expression, and little difference can be traced between the secular and the sacred style. Dr. Jebb, however, maintains that the latter was at least national and peculiar to this country, and that the Church of England was not indebted to Palestrina; which statement he supports by urging the similarity of the style of Byrd and Tallis to that of Robert White, who was anterior to the great Italian composer.

Under the Commonwealth, music, except in the form of metrical psalmody, was expelled from English churches; it was restored in 1660 by Charles II., the effect of whose French tastes upon cathedral music is thus described by Tudway (Burney's *History*, vol. iii. 443): 'His majesty was soon tired with the grave and solemn way which had been established by Bird and others, and ordered the composers of his chapel to add symphonies with instruments to their anthems; and established a select number of his private music to play the symphony and ritornellos which he had appointed. The old masters of music, Dr. Child, Dr. Gibbons, Mr. Low, etc., hardly knew how to comport themselves with these new-fangled ways, but proceeded in their compositions according to the old style.' There was great difficulty during the first years of the Restoration in finding boys capable of singing in the choirs, since the art had been so much neglected during the Protectorate. Hawkins (*History of Music*, iv. 349) says on this point, 'Nay, to such streights were they driven, that for a twelvemonth after the Restoration the clergy were forced to supply the want of boys by cornets, and men who had feigned voices.'

It appears from a passage in the life of Archbishop Whitgift (*Biographia Britannica*, p. 4255) that cornets had been before introduced; for an allusion is made to the 'solemn music with the voices and organs, cornets and sackbuts'; and in Stow's *Annals* (864), we read that at the churching of the Queen after the birth of Mary daughter of James I., in the Royal Chapel, sundry anthems were sung with organ, cornets, sackbuts, and other instruments of music.' [See ANTHEM, 2nd period.]

'In about four or five years' time,' says Tudway, 'some of the forwardest and brightest children of the chapel, as Pelham Humphrey, John Blow, etc., began to be masters of a faculty

in composing; this his majesty greatly encouraged, by indulging their youthful fancies. In a few years more, several others educated in the chapel, composed in this style; otherwise it was vain to please his majesty.' The peculiar influence here ascribed to Charles II. may be traced in the works of Humphrey, Blow, Wise, and their contemporaries, in the too evident aim at effect, and the mannerisms and exaggerated ornaments which characterise them; even the great genius of Purcell did not escape the effect of Charles's fantastic tastes. Many of his finest anthems are disfigured by symphonies of such a kind as were evidently invented merely to gratify the king's desire for French mannerisms. But it was in the 18th century that the lowest musical standard prevailed in the service of the church. A florid sing-song melody, with a trivial accompaniment, was the type to which everything was sacrificed, and a rage set in for objectionable adaptations and arrangements. The works of Jackson and Kent may be taken as specimens of this class, though one worthy exception should be noticed in Dr. Boyce.

Within the last sixty years choral communions have been introduced: they had been discarded at the Restoration, from which time up to 1840 the Communion Service was never set to music except in so far as parts of it, *e.g.* the Sanctus, and the Gloria, were arranged as anthems and introits. E. H. D.

CATHEDRAL MUSIC (2). For the contents of various important collections of anthems and services see ARNOLD, BARNARD, BOYCE, and TUDWAY.

CATHERINE GREY, an opera in 3 acts; libretto by Bunn; music by Balfe. Produced at Drury Lane May 27, 1837, the composer himself playing the Earl of Hertford. G.

CATLEY, ANNE, was born in 1745 in an alley near Tower Hill, of very humble parents, her father being a hackney coachman, and her mother a washerwoman. Endowed with great personal beauty, a charming voice, and a natural talent for singing, she gained her living at the early age of ten years by singing in the public houses in the neighbourhood, and also for the diversion of the officers quartered in the Tower. When about fifteen years of age she was apprenticed by her father to William Bates for the purpose of receiving regular instruction in the art of singing, Catley binding himself in the penalty of £200 for her due fulfilment of the covenants in the indenture. She made rapid progress, and in the summer of 1762 made her first appearance in public at Vauxhall Gardens. On Oct. 8 in the same year she appeared at Covent Garden Theatre as the Pastoral Nymph in Dr. Dalton's alteration of Milton's 'Comus.' Early in 1763 she became acquainted with Sir Francis Blake Delaval, a young baronet, who prevailed on her to quit the house of Bates and reside with him. Desirous of obtaining a legal control over her, Delaval, in April 1793, induced Bates to consent to an arrangement for his pupil doing some act which would put an end to the apprenticeship, Delaval paying him the £200 penalty, and also the amount of an engagement he had entered into for her singing during the summer season at Marylebone Gardens. She was then colourably apprenticed to Delaval to be taught singing by him. Application being made to her father, who was then coachman to Barclay, the quaker, of Cheapside, for his concurrence, he consulted his master, who, shocked at the iniquity of the transaction, at once sent Catley to his attorney. A habeas corpus was obtained for Delaval to produce Anne Catley before the Court of King's Bench, where the affair being inquired into, the Court ordered that Delaval, Bates, and John Frayne, an attorney employed by Delaval, should be prosecuted for conspiracy, the Chief Justice, Lord Mansfield, denouncing their conduct in strongly indignant language. They were accordingly tried, convicted, and fined. In the summer of 1763 Anne Catley fulfilled her engagement at Marylebone Gardens, and shortly afterwards became a pupil of Macklin, the actor, who procured her an engagement at Dublin, where she became a great favourite. O'Keeffe, the dramatist, who became acquainted with her there, says, in his amusing *Reminiscences*, 'She wore her hair plain over her forehead in an even line almost to her eyebrows. This set the fashion in Dublin, and the word was with all the ladies to have their hair *Catley-fied*.' He elsewhere observes, 'She was one of the most beautiful women I ever saw; the expression of her eyes and the smiles and dimples that played round her lips and cheeks enchanting. She was eccentric, but had an excellent heart.' In 1770 she returned to England, and reappeared at Covent Garden Theatre on Oct. 1 as Rosetta in 'Love in a Village.' After the season she was again engaged at Marylebone Gardens, where she appeared on July 30, 1771, and sang until the close of the season. On Feb. 6, 1773, O'Hara's burletta, 'The Golden Pippin,' was produced at Covent Garden Theatre. Miss Catley performed the part of Juno with a spirit and humour that excited the utmost applause, and was particularly admired for her singing of two of the songs, viz. 'Push about the jorum,'—the tune of which has been used for an almost endless number of comic songs,—and 'Where's the mortal can resist me?'—the tune of which, slightly varied, has long been associated with the hymn, 'Lo, He comes.' [The tune, which was not in the original burlesque, was introduced into it at a revival in 1776. It appears to have been first sung in Dublin by Mahon, and to be the composition of Thomas Carter. (See CARTER, and LO, HE COMES).] Having amassed an independence Miss Catley retired from public life in 1784. She died Oct. 14, 1789, at the house of General Lascelles (to whom she was married), near Brentford. The

public prints of the day eulogised her as a good mother, a chaste wife, and an accomplished woman. W. H. H.

CAURROY, FRANÇOIS EUSTACHE DU, Sieur de St. Frémin, born at Gerberoy near Beauvais in Feb. 1549, died in Paris, August 7, 1609; canon of the Ste. Chapelle and prior of St. Aïoul de Provins; a composer of great merit in his day. He was appointed director of the King's band in 1569, and continued in office during the reigns of Charles IX., Henry III., and Henry IV. In 1599 the post of Surintendant de la Musique du Roi was created for him. He was buried in the Church des Grands Augustins. A monument (destroyed in the Revolution) was erected to his memory by his successor Nicolas Formé, with an epitaph by his friend Cardinal du Perron. Du Caurroy was called by his contemporaries 'Prince des professeurs de musique,' a title he shared with Orlando Lasso and Palestrina. His compositions include 'Missa pro defunctis,' performed at the funerals of the kings of France until the 18th century; one copy only exists at the Bibliothèque-Nationale in Paris; 'Preces ecclesiasticæ' for five voices (two books) (Paris, 1609), and published by his grandnephew André Pitart, 'Fantaisies' in three, four, five, and six parts (Paris, 1610) and 'Mélanges de musique' (Paris, 1610) from which Burney prints in his third volume a Noël in four parts. Du Caurroy has been credited with the airs 'Charmante Gabrielle' and 'Vive Henri IV.' M. C. C.

CAUSTON, THOMAS, was a gentleman of the Chapel Royal in the reigns of Edward VI., Mary, and Elizabeth. He contributed to the curious collection published by John Day, the eminent printer, in 1560, in separate parts, under the title of 'Certain Notes, set forth in four and three parts, to be sung at the Morning, Communion, and Evening Prayer'; he was also a contributor to the collection of psalm tunes published by Day in 1563 under the title of 'The whole Psalmes in foure parts, which may be sung to all musical instruments.' Some of his compositions are in Add. MSS. 30,480-4 and 31,226. Causton died Oct. 28, 1569. A 'Venite exultemus,' and a Communion service by him were reprinted by Dr. Jebb in 1862. W. H. H.

CAVACCIO, GIOVANNI, was born at Bergamo about 1556, and was in 1581 maestro at the Cathedral. Thence after twenty-three years' service he was called to be maestro at S. Maria Maggiore at Bergamo, where he remained till his death, August 11, 1626. Cavaccio contributed to a collection of Psalms, dedicated in 1592 to Palestrina. His works include a Requiem published at Milan, 1611; Magnificats, 1581 and 1582; Psalms, 1585; Madrigals, 1585, 1597, etc. (see list in *Quellen-Lexikon*). Some of his pieces are found in the 'Parnassus musicus' of Bergameno, and three organ pieces are given in vol. iii. of Torchi's *L'Arte Musicale in Italia.* G.

CAVAILLÉ, the name of several generations of distinguished organ-builders in the south of France. The most eminent member of the family was ARISTIDE CAVAILLÉ-COL, born at Montpellier, Feb. 2, 1811. The name of Col was that of his grandmother. In 1833 he went to Paris, to see what progress was being made in his art, but without the intention of establishing himself there. Hearing that there was to be a competition for the construction of a large organ for the royal church of St. Denis, he determined to send in a tender, although only two days remained for preparing it. When called up before the committee he gave them such interesting explanations of his plans that they decided to accept his tender. Barker's pneumatic lever was first used in this organ. He thus became established in Paris, built the fine organ of the Madeleine, and many others in the capital and in the provinces. [He wrote *Études expérimentaux sur les tuyaux d'orgue* (1849); *De l'orgue et de son architecture* (1856); and *Projet d'orgue monumental pour la basilique de St. Pierre de Rome* (1875). He died in Paris in January 1886.] V. DE P.

CAVALIERI, EMILIO DEL, was a Roman gentleman of good family and fine musical perceptions. He was born about the year 1550, and is generally considered to have died some time before the end of the 16th century, for his most important work, 'La Rappresentazione di Anima e di Corpo,' was performed for the first time in 1600, and all the accounts of him agree in stating that it was not performed in his lifetime. [Riemann, on the authority of the *Rassegna Nazionale* of Nov. 15, 1893, gives the date of Cavalieri's death as March 11, 1602.] He spent a great portion of his life at the court of Ferdinand dei Medici, who appointed him to the quaintly-named office of 'Inspector-General of the Artists' at Florence. There he lived upon terms of intimacy with Giovanni Bardi of Vernio, Giulio Caccini, Vincenzo Galilei, Peri, Corsi, and Rinuccini, a group of accomplished artists and gentlemen, who were bent upon freeing music from the trammels of the 'stile osservato,' and bringing about some better result from the union of instruments, poetry, and the human voice than had up to their time been achieved.

Cavalieri, then, was one of the earliest projectors of instrumental accompaniment, and among the first to employ that early form of it which goes by the name of the Basso Continuo, with figures and signs attached to guide the different instruments in filling up the intermediate parts. Alessandro Guidotti, who published 'La Rappresentazione di Anima e di Corpo,' in 1600, thus explains the system of the 'Basso figurato':—'I numeri piccoli posti sopra le note del basso continuato per suonare, significano le consonanze e le dissonanze di tal numero, come il 3 terza, il 4 quarto, e così di mano in mano.' Cavalieri did not attempt to elaborate the accompaniment thus suggested;

a great deal was still left to the players themselves, just as in the plain-song the underlying parts were filled in by what in England was known as 'descant,' and in Italy as 'Il Contrapunto della Mente.' Not the less, however, did the labours of Cavalieri and his contemporaries constitute at once a starting-point and a stride in art. He was also among the earliest employers of vocal ornaments, such as the gruppetto or groppolo, the monachina, the zimbalo, and perhaps the trillo. It may be questioned, however, whether the last mentioned was the true 'shake,' that is to say, a rapid oscillation between two tones or semitones; or whether it was only a certain vibratory production of the voice, probably considered an elegance in early times, but now more fitly estimated as a fault common among bad singers, and known as the 'tremolo.' [Shake; Tremolo.]

A dramatic tendency naturally arose out of the desire to make vocal and instrumental music subservient to the illustration of words, and it is not surprising therefore that Cavalieri should have produced musical dramas. Of these he composed four—'Il Satiro' (1590); 'La disperazione di Fileno,' 'Il giuoco della cieca' (1595); and 'La Rappresentazione,' mentioned already. They were one and all of them arrangements of words provided by Laura Guidiccioni, an accomplished lady of the Lucchesini family. Of these works the last named only was edited, as stated above, by Guidotti of Bologna. [See the *Rivista Musicale Italiana*, vol. ix. p. 797.] E. H. P.

CAVALIERI, Katharina, dramatic singer, born at Währing, Vienna, 1761. At a very early age she was placed under Salieri by some wealthy connoisseurs who had heard her sing in church, and in 1775, when barely fourteen, was engaged at the Italian Opera. A year later the Emperor Joseph founded a German Opera, to which she was transferred. As Cavalieri never sang out of Vienna her name is almost unknown elsewhere, but Mozart's approval stamps her as an artist of the first rank. In one of his letters (1785) he says, 'She was a singer of whom Germany might well be proud'; and it was for her he composed the part of Constance in the 'Entführung,' the soprano part in 'Davidde penitente,' that of Mme. Silberklang in the 'Schauspiel-Director,' and the air 'Mi tradì' in 'Don Giovanni,' on its first representation at Vienna, May 7, 1788. Salieri called her his favourite pupil, and wrote the principal parts of several operas for her. She sang in nearly all the oratorios produced by the Tonkünstler-Societät (now the Haydn-Verein), and maintained her popularity to the last, against many eminent singers. Her voice was of considerable compass, and she was a cultivated musician. She made up for her want of personal attractions by her fascinating manners. She was compelled, from over-exertion, to retire when in the prime of life (1793), and died June 30, 1801. C. F. P.

CAVALLERIA RUSTICANA, opera in one act, libretto by G. Targioni-Tozzetti and G. Menasci, founded on a tale by Verga. Set to music by Pietro Mascagni for the prize offered by the publisher Sonzogno, which was awarded to it. It was first performed at the Costanzi Theatre, Rome, May 17, 1890; in London, at the Shaftesbury Theatre (under the direction of Signor Lago), Oct. 19, 1891; and at Covent Garden (under Harris), May 16, 1892.

CAVALLI, Pietro Francesco, eminent composer of the 17th century, born at Crema, Venice, in 1599 or 1600. His real name was Caletti-Bruni, and he took that of Cavalli from his patron, a Venetian nobleman. In 1617 he became singer in the choir of St. Mark's under Monteverde; in 1639 organist of the second organ; in 1665 organist of the first organ in that church; in 1668 maestro di cappella; and on Jan. 14, 1676, he died. Of his church music nothing has been published beyond 'Musiche sacre,' containing a Mass, Psalms, and Antiphons, for two to twelve voices (Venice, 1656), and Vespers for eight voices (*ib.* 1675). Santini possessed a Requiem of his (sung at Cavalli's funeral) for eight voices in MS. His operas were very numerous. He began to write for the theatre in 1639 ('Le Nozze di Teti'), and continued so to do for thirty-two years. There were then five theatres in Venice, and Cavalli was fully employed. Eitner (*Quellen-Lexikon*) gives a list of twenty-seven operas still extant in MS. In 1660 he was called to Paris for the marriage of Louis XIV., and produced his opera of 'Xerse' in the Grand Gallery of the Louvre; to Paris again in 1662 for the Peace of the Pyrenees, when he brought out 'Ercole amante'; and to Innspruck for the fête on the reception of Queen Christina. His wife belonged to the Sozomeni family; he grew rich and enjoyed the esteem and affection of his fellow-citizens. He took the opera from the hands of Monteverde, and maintained it with much dramatic power and with a force of rhythm before unknown. An air by Cavalli and some fragments will be found in Burney's *History*, vol. iv. [Two three-part motets and one two-part were printed in Marcello's *Sacra Corona*, Venice, 1656. For further information as to Cavalli and his influence on dramatic music, see Parry's *Music of the XVIIth Century* (*Oxford History of Music*, vol. iii.); articles by Ambros in the *Neue Zeitschr. f. Mus.*, 1869, vol. lxv. p. 314 *ff.*; by H. Kretzschmar in the *Vierteljahrsschrift für Mus.-Wiss.*, 1892, p. 1 *ff.*; and Galvani's *Teatri musicali di Venezia*.] G.

CAVALLINI, Ernesto, a great clarinet-player, born at Milan, August 30, 1807. He was taught in the Milan Conservatorio, and after an engagement at Venice and considerable travelling he returned to his native city, first as player in the Scala orchestra, and then as professor in the Conservatorio. In 1852 he accepted a post

at St. Petersburg, which he filled for fifteen years, after which he returned to Milan in 1870, and died there Jan. 7, 1873. In 1842 he was elected member of the Paris Académie des Beaux Arts. Cavallini travelled much and was well known in Paris, London, and Brussels. He played a concerto of his own at the Philharmonic Concert, June 23, 1845. Fétis describes his volubility and technique as prodigious, and his breath as inexhaustible; his intonation was also very good, though his instrument was only the old six-keyed clarinet. The late H. Lazarus considered his music very difficult, his studies and duets excellent; and said that although his tone was not of the purest, he might well be called the Paganini of the clarinet for his wonderful execution. Lists of his works are given by Fétis, and by Pougin in the Supplement thereto. G.

CAVATINA (Ital., diminution of *cavata*, the act of producing tone from a musical instrument) originally signified a short song, without a second part and the repetition of the first, but has been frequently applied to a smooth melodious air, forming part of a grand scena or movement. Thus Mozart's noble scena 'Andromeda' commences with a recitative 'Ah, lo previdi!' followed by aria, allegro, then more recitatives in several tempi, and lastly a cavatina, andantino. Examples of cavatine may be found in many well-known operas. The word is sometimes used for a complete air or song, as in Gounod's 'Roméo'—'L'amour! oui, son ardeur a troublé'; and in 'Faust'—'Salve dimora.' In the full score of Mendelssohn's 'St. Paul,' 'Be thou faithful unto death' is called a cavatina, but in the vocal scores it is described as an aria. Beethoven has given this title to the second slow movement, *Adagio molto espressivo*, in his great Quartet in B♭ (op. 130), one of the most touching and individual pieces to be found in all his works. It consists of a song in two strains in E flat and A flat, an episode in E flat minor (expressive of the deepest distress, and marked in the autograph *Beklemmt*—choked with grief), and a return to the original strain. [Add. MS. 14,221 (f. 86), in the British Museum, contains a Recitativo con Cavata by Cafaro.] W. H. C.

CAVENDISH, MICHAEL, was the composer of a set of 'Ayres for four Voyces,' published in 1599. He contributed a madrigal—'Come, gentle swaines'—to 'The Triumphes of Oriana,' 1601, and was one of the ten composers who harmonised the tunes for 'The Whole Booke of Psalmes with their wonted Tunes as they are song in Churches composed into foure parts,' published in 1592 by Thomas Este. Nothing is known of his biography. W. H. H.

CAVOS, CATTERINO, born in Venice, 1776, son of the musical director of the famous 'Fenice' Theatre. At fourteen he was the chosen candidate for the post of organist to St. Mark's, but relinquished his chance in favour of a poor musician. He became by turns assistant to his father, conductor of the opera in Padua, and teacher in Venice. In 1797 he went to Russia as conductor of Astarti's opera company. When the Emperor Paul succeeded Catharine II., the company was disbanded, but Cavos remained in Russia, and, in 1799, was made director of the Italian and Russian operas, and Professor in the Theatrical School. It was his duty to compose for three companies—Italian, Russian, and French. The success of his operas on Russian fairy-tales encouraged him to make some tentative efforts for national colouring in his music. 'Ivan Sonsanin,' an opera on the same subject as 'A Life for the Tsar,' met with great success in 1815. The Russian element is very slight in the music of Cavos; nevertheless he must be reckoned one of the first to start that movement towards nationality in music which Verstorsky strove to develop, and which eventually culminated in the genius of Glinka. Cavos composed a vast number of operas and vaudevilles. His music was pleasing but not inspired. He died in Russia in 1840. R. N.

CAZZATI, MAURIZIO, born at Guastalla about 1620, died there 1677, was organist of S. Andrea in Mantua in 1641, maestro di cappella to the Duke of Sabioneta, from 1648 to 1651 at the Accademia della Morte in Ferrara, in 1653 was appointed maestro di cappella at S. Maria Maggiore in Bergamo, and in 1658 to San Petronio in Bologna. He resigned this post in 1671, possibly on account of a violent quarrel with Arresti, organist of the same church, who had severely criticised the Kyrie in a mass of Cazzati's. His 'Risposta alle oppositioni,' etc., was printed at Bologna, 1663. His voluminous compositions (for list see the *Quellen-Lexikon*) comprise masses, psalms, and motets, besides canzonets and airs, and sonatas and other instrumental works. One of his motets, 'Sunt breves mundi Rosæ,' was printed in Ballard's collection for 1712, and other pieces in Profe's *Geistlicher Concerten* (Leipzig, 1641).

CEBELL, a name used by Purcell and others for the dance form now generally known by the name of Gavotte. An instance occurs in a suite of Purcell's printed in Pauer's 'Old English Composers,' and in vol. vi. of the Purcell Society's publications, and 'The Old Cebell' is given by Hawkins, *History*, App. 22. M.

CECILIA, ST., VIRGIN and MARTYR, was a young Roman lady of noble birth, who, being educated in the Christian faith, vowed to lead a celibate life and to devote herself to the service of religion. She was, however, compelled by her parents to marry Valerianus, a young Roman noble and a Pagan, with whom she prevailed so much as not only to induce him to respect her vow, but, with his brother, to embrace the Christian faith. Seized and brought before the Pagan authorities, and refusing to abjure their

faith, they were condemned to death, the brothers being decapitated, and the virgin-wife placed in a dry bath with fire beneath, which failing to terminate her existence as rapidly as her persecutors desired, they sent an executioner to despatch her by severing her head from her body. These events occurred at Rome about 229, under Alexander Severus, according to most writers, although some state them to have happened in Sicily under Marcus Aurelius between 176 and 180. Her house at Rome, where she was put to death, was converted into a church, or a church was built over it, to which in 821 her remains, with those of her husband, his brother, and other martyrs, were translated. This church was repaired and sumptuously embellished in 1599, and a monument of the saint erected.

St. Cecilia has long been regarded as the tutelary saint of music and musicians, but the period at which she was first so looked upon is involved in obscurity. There is a tradition that an angel by whom she was visited was attracted to earth by the charms of her singing, but when it originated is equally unknown. Early writers make no mention of her skill in music; even as late as 1594 a long Italian poem by Castelletti, entitled 'La Trionfatrice Cecilia, Vergine e Martire Romana,' was published at Florence, which does not allude to it. It is certain, however, that nearly a century before she had been considered as Music's patroness, for in 1502 a musical society was established in Louvain, the statutes of which were submitted to the magistrate for his sanction. The founders desired to place the new association under the patronage of 'St. Job,' but the magistrate decided that it should be put under the auspices of St. Cecilia.

For a very long time the custom of celebrating upon St. Cecilia's festival (Nov. 22) the praise of music by musical performances existed in various countries, and many associations were formed for the purpose. The earliest of such associations of which any notice has been found was established in 1571, at Evreux in Normandy, under the title of 'Le Puy de Musique.' A solemn celebration of vespers and compline took place in the cathedral on the vigil; high mass, vespers, and compline were performed on the feast day, and a requiem mass for the souls of departed founders on the morrow. A banquet was given after mass on the feast day, and prizes were awarded for the best motets, part-songs, airs, and sonnets. The best composers of the day were competitors for these prizes, and amongst those who obtained them are found the names of Orlando de Lasso, Eustache du Caurroy, and Jacques Salmon.

It was a century later before any similar association was regularly established in England. In 1683 a body of persons known as 'The Musical Society,' held the first of a series of annual celebrations. Their practice was to attend Divine worship (usually at St. Bride's Church), when a choral service and anthem with orchestral accompaniments (often composed expressly for the festival), were performed by an exceptionally large number of musicians, and a sermon, usually in defence of cathedral music, was preached. They then repaired to another place (commonly Stationers' Hall), where an ode in praise of music, written and composed expressly for the occasion, was performed, after which they sat down to an entertainment. These odes were written by Dryden (1687 and 1697), Shadwell, Congreve, D'Urfey, Hughes, and other less-known writers, and composed by Henry Purcell (1683 and 1692), Blow (1684, 1691, 1695, and 1700), Draghi, Eccles, Jeremiah Clarke, and others of lesser note. Purcell produced for 1694 his 'Te Deum and Jubilate in D,' and Blow his for 1695. These celebrations were kept uninterruptedly (with the exception of the years 1686, 1688, and 1689) until 1703, after which they were held only occasionally. Pope wrote his fine ode in 1708, but it was not set to music until 1730, and then in an altered and abbreviated form by Dr. Greene, as the exercise for his doctor's degree. It was first set in its original form about 1757 by William Walond, organist of Chichester Cathedral, and at a much later period by Dr. Thomas Busby. In 1736 Handel reset Dryden's 'Alexander's Feast,' originally composed in 1697 by Jeremiah Clarke, and in 1740 Dryden's first ode, originally set in 1687 by Draghi. Odes were composed at various periods by Drs. Pepusch and Boyce, by Festing, Samuel Wesley, Sir Hubert Parry, and others.

About the same time that the London celebrations were established similar meetings were held at Oxford, for which odes were written by Addison, Yalden, and others, and set by Blow, Daniel Purcell, etc. These meetings were continued until 1708, and perhaps later. Other places followed the example, as Winchester, Gloucester, Devizes, and Salisbury. At the latter place, in 1748 (the time of holding it having previously been changed), the meeting was extended to two days, and gradually developed into the modern musical festival, oratorios being performed at the cathedral in the morning, and secular concerts at the Assembly Room in the evening.

There are some records of a musical celebration having taken place on St. Cecilia's Day in Edinburgh in 1695, and in the early part of the 18th century several took place in St. Patrick's Cathedral, Dublin.

In Paris some years since it was the custom to have a solemn mass performed in the fine church of St. Eustache on St. Cecilia's Day, for the benefit of the Society of Artist Musicians. On these occasions a new mass, composed expressly by some eminent musician, was usually produced. Amongst those who wrote such masses were Adolph Adam, Niedermeyer (1849), Dietsch, Gounod (1855), and Ambroise Thomas (1857).

Musical celebrations on St. Cecilia's Day are recorded as having taken place at various periods in Italy, Germany, and elsewhere. Spohr composed a 'Hymn to St. Cecilia' for the Cecilian Society at Cassel in 1823, and Moritz Hauptmann another for the same society in the following year. W. H. H.

CELESTA. A keyboard instrument of the harmonica family, in which plates of steel suspended over resonating boxes of wood are struck by hammers after the manner of the pianoforte action. It was invented in 1886 by M. Auguste Mustel of Paris, who has since combined its characteristic effects with those of the 'Mustel Organ,' producing some distinctly new qualities of tone. The tone of the celesta itself is of exquisite purity, and as an orchestral instrument it has been used by a large number of modern French composers in operas, ballets, and mystic pieces, where a special quality of tone is required. Outside France, few composers of eminence have as yet employed the instrument, chief among them being Tchaikovsky, who introduces it into the 'Danse de la Fée Dragée' in his 'Casse-Noisette' ballet suite. Leoncavallo and Puccini have also used it. Its compass is five octaves upwards from the bass *c*. M.

CELESTINO, ELIGIO, a violin player, born at Rome about 1739. Burney heard him in that city in 1770, and considered him the best Roman violinist of the period. In 1772 he began to travel [he appeared in London in that year, and was appointed violinist of the court band at Stuttgart in 1776. He gave a concert with his wife at Frankfort in 1780, and already had the title of concertmeister to the Duke of Mecklemberg, at Ludwigshut, a post which he retained till his death, Jan. 14, 1812]. In Preston's Catalogue (London, 1797), we find of his composition Six Sonatas for a Violin and Bass (op. 9), and three Duos a Violino e Violoncello (London, Clementi, 1798). [Some other works, such as a vocal solo or trio with orchestral accompaniment, are mentioned in the *Quellen-Lexikon.*] P. D.

CELLIER, ALFRED, born Dec. 1, 1844, at Hackney, the son of a teacher of French, was educated there at the Grammar School, and from 1855 to 1860 was a chorister at the Chapel Royal, St. James's, under the Rev. Thomas Helmore. In 1862 he was appointed organist to the church of All Saints, Blackheath. At the age of twenty-one he became Director of the Ulster Hall Concerts, Belfast, succeeding Dr. Chipp, and conductor of the Belfast Philharmonic Society. He was appointed organist to St. Alban's, Holborn, in 1868. Cellier was conductor at the Prince's Theatre, Manchester (1871-75); Opera Comique, London (1877-79), and joint conductor, with Sir A. Sullivan, of the Promenade Concerts, Covent Garden (1878 and 1879), besides holding numerous smaller appointments at the Court, St. James's, and Criterion Theatres. His compositions include a setting of Gray's 'Elegy,' written for the Leeds Festival (Oct. 10, 1883), a Suite Symphonique for orchestra, various songs and PF. pieces, among which latter must be mentioned a charming 'Danse Pompeuse,' 1880, dedicated to and frequently played by Mme. Montigny-Rémaury. But Cellier was best known as a composer of light opera or opéra bouffe. Besides much incidental music to plays, etc., he produced the following:—'Charity begins at Home,' Gallery of Illustration, 1870, 'The Sultan of Mocha,' produced at the Prince's Theatre, Manchester, Nov. 16, 1874, with great success, and at St. James's Theatre, London, April 17, 1876; 'The Tower of London,' Oct. 4, 1875; 'Nell Gwynne,' Oct. 16, 1876; 'Bella Donna, or the Little Beauty and the Great Beast,' April 27, 1878, all produced at Manchester; 'The Foster Brothers,' 1876 (St. George's Hall); 'Dora's Dream,' Nov. 17, 1877; 'The Spectre Knight,' Feb. 9, 1878; 'After All,' Dec. 16, 1879; 'In the Sulks,' Feb. 21, 1880, operettas in one act, all produced at the Opera Comique Theatre. 'Pandora,' a grand opera in three acts, words by Longfellow, was produced in Boston in 1881. Few of the larger works obtained other than provincial popularity, in spite of the pleasing and elegant music contained therein, probably owing to weak librettos; but on Sept. 25, 1886, in his opera of 'Dorothy,' produced at the Gaiety Theatre, a fresh setting of his 'Nell Gwynne' to a new book, Cellier gained his first real success, thanks to the musical merits of the work, which ran through the entire autumn season, and on Dec. 20, was transferred to the Prince of Wales' Theatre, where it enjoyed an exceptionally long career. [Its successor, 'Doris,' Lyric Theatre, April 20, 1889, was less popular, but 'The Mountebanks,' to an admirable libretto by W. S. Gilbert (Lyric, Jan. 4, 1892), was another great success. It was technically a posthumous work, as the composer died Dec. 28, 1891, before he could complete it by the composition of an overture: a movement from his Suite Symphonique was adapted for the purpose.] A *lever du rideau* entitled 'The Carp,' was produced at the Savoy Theatre on Feb. 13, 1886, and another 'Mrs. Jarramie's Genie,' at the same, Feb. 14, 1888. On Sept. 21, 1887, the 'Sultan of Mocha' was revived at the Strand Theatre, with a new libretto by Lestocq. During his later years Cellier resided in America and Australia, but returned to England in 1887. His death took place in London, and he was buried in the Norwood Cemetery. A. C.

CELLO, a contraction of VIOLONCELLO.

CEMBAL D' AMORE translated is 'harpsichord of love,' but, according to Adlung (*Musica Mechanica*), this instrument did not belong to the clavicembalo or harpsichord genus, but to that of the clavichord. The instrument should

be regarded as a double clavichord, the two instruments being separated by the tangents. The strings, he states, were as long again as in the ordinary clavichord, and the tangents which produced the tone from the strings, instead of touching them near to their left-hand terminations, made the impact exactly in the middle of their whole length between the bridges, of which there were two instead of one as in the clavichord, and two soundboards of unequal forms and dimensions. Both halves of the strings were thus set in vibration simultaneously, which necessitated the use of a different damping contrivance from the simple one of the clavichord. In the cembal d' amore the strings lay upon the damping-cloth instead of its being woven between them, and small wooden uprights supported it. The strings were therefore damped when at rest; when raised upwards by the tangents they were free to vibrate, and remained so as long as the keys were pressed down. The form of a cembal d' amore was that of an English spinet with the keyboard to the right hand of the player instead of the left, thus reversing the extension of the instrument laterally. Adlung attributed to it more tone than the ordinary clavichord, and more capability of *bebend* effect by the gently reiterated movement of the key. But too much pressure on the key would affect the intonation as in a clavichord. In estimating its dynamic power he places the cembal d' amore far behind the pianoforte, though beyond the clavichord. Mattheson (*Critica Musica*) refers to it and to a parallel between the Florentine (pianoforte) and Freiberg (cembal d' amore) in a bantering tone. Gottfried Silbermann of Freiberg (1683-1753) invented it, and Hähnel of Meissen attempted to improve it by adding a 'Celestine' register. Others, as Oppelmann and Masse of Mamburg, made the instrument.

Through the even series of partial tones being virtually banished by the contact with the second or node at the half length of the string, the quality of tone or *timbre* must have tended towards that of the clarinet. The Rev. J. R. Cotter, of Donoughmore Rectory, Cork, between the years 1840 and 1865 endeavoured to obtain this effect from a pianoforte which he had constructed in Messrs. Broadwood's workshops, by making a 'striking place' at the middle of the vibrating length of string. In this, the Lyrachord, as he named it, the clarinet quality was a prominent characteristic. A. J. H.

CEMBALO or CIMBALO (Italian), a dulcimer, an old European name of which, with unimportant phonetic variations, was Cymbal. According to Carl Engel this ancient instrument is at the present day called *cymbaly* by the Poles, and *cimbalom* by the Magyars. The derivation of cembalo is from the Greek κύμβη (Latin *cymba*), a hollow vessel; and with the Greeks κύμβαλα were small cymbals, a larger form of this ringing instrument being well known in modern military bands. These cymbals and bells in the Middle Ages were regarded as closely allied, and rows of bells of different sizes, *tintinnabula* or *glockenspiel*, were also called *cymbala*. Virdung (1511) names *zymbeln* and *glocken* (cymbals and bells) together. It was most likely the bell-like tone of the wire strings struck by the hammers of the dulcimer that attracted to it the name of cymbal or cembalo. It is explained here, however, not only for the meaning dulcimer, but for the frequent use of the word 'cembalo' by composers who wrote figured basses, and its employment by them as an abbreviation of clavicembalo. The dulcimer, or cembalo, with keys added, became the clavicembalo. In course of time the first two syllables being, for convenience or from idleness in speaking or writing, dropped, 'cembalo' also was used to designate the keyed instrument, that is, the clavicembalo or harpsichord—just as 'cello' in the present day frequently stands for violoncello. In the famous Passacaille of J. S. Bach, 'cembalo' occurs where we should now write 'manual,' there being a separate pedal part. [See PEDALS.] But we know from Forkel that Bach used a double 'flügel' or clavicembalo, having two keyboards and obbligato pedals, as well as the organ with pedals. There is a story in the *Decamerone* of Boccaccio of one Dion, who being asked to sing, said he would if he had a cembalo. The early date of this quotation (1352-53) has led to much difference of opinion among musical authorities as to the instrument that was meant. Burney leans to a tambour de basque, a tambourine, which by some caprice had been designated, some time or other, cembalo. Dr. Rimbault (*Pianoforte*, p. 36) maintains that it was a small clavichord, but for this explanation the date is almost too early. The opinion of Fétis, that it was a dulcimer, is probably the true one. [HARPSICHORD.] A. J. H.

CENERENTOLA, LA, opera on the story of Cinderella, by Rossini, libretto by Feretti; produced at the Teatro Valle in Rome at the carnival, 1817, at the King's Theatre, London (much mutilated), Jan. 8, 1820, and at the Théâtre des Italiens, Paris, June 8, 1822.

'Cinderella . . . with the music by Rossini' was produced in English at Covent Garden, April 13, 1830; but it was a mere pasticcio, the music being made up from 'Cenerentola,' 'Armida,' 'Maometto,' and 'William Tell.' No better adaptation has yet been made. G.

CERONE, DOM PIETRO, priest, born at Bergamo about 1566, migrated to Spain in 1592, and entered the chapel of Philip II. in 1593. In 1608 he left Spain for Naples, where he belonged to the Chapel Royal, and was living in 1613. He wrote *Le Regole più necessarie per l' introduttione del Canto fermo*, etc., Naples, 1609, and *El Melopeo*, a folio volume, in Spanish, of 22 books and 1160 pages of small print (Naples,

1613), a work, according to the account of Fétis, valuable in some respects, but tedious, confused, and unequal to an astonishing degree. It is founded on the system of Zarlino; indeed there is some reason to believe that it is a mere redaction of a work with the same title which Zarlino speaks of as having completed in MS., but which has totally disappeared. The whole edition of Cerone's work is said to have been lost at sea except thirteen copies [but ten copies are mentioned as still extant, in the *Quellen-Lexikon*, which refers to a third work of Cerone's, 'Curiosidades del cantollano' (Madrid, 1709 *sic*, perhaps for 1609). See also *Proceedings of the Mus. Assoc.* 1878-79, p. 87]. G.

CERTON, PIERRE, died in Paris, Feb. 23, 1572 (Riemann), a French musician of the first half of the 16th century; master of the choir at the Sainte-Chapelle, Paris; mentioned by Rabelais in the Nouveau prologue to the 2nd book of Pantagruel. A list of his works is given in the *Quellen-Lexikon*. They include 'Raceus modulorum editio' (motets, Paris, 1542), Psalms (1554); 4 Masses and a Requiem (1558). A Magnificat of his is found in a collection of 8 (Canticum B. M. Virginis, etc. 1559), and many of his motets are included in the collections of Attaignant, 1533-49), Susato (Antwerp, 1543-50), Phalése (Louvain, 1558), and Cipriani (Venice, 1544). In the 'Collection of Ancient Church Music printed by the Motet Society' (1843), a piece by Certon is given for two trebles and tenor, to English words, which is very melodious and graceful, and has a marked character of its own. G.

CERVETTO. The name of two eminent violoncello players of the 18th century.

1. It was the sobriquet of GIACOBBE BASSEVI, born in Italy 1682. He came to England and joined the orchestra of Drury Lane in 1738. The violoncello was not then known in England, but Cervetto, though his tone is said to have been coarse and his execution not remarkable, made it a popular instrument. Probably there was something genial and attractive in the personality of the man. He had a very large nose, and it was a favourite joke to call to him from the gallery, 'Play up, Nosey'—an expression long heard in the theatres. That he was a man of humour is shown by an anecdote given in the books. Garrick was playing a drunken man, and ended by throwing himself into a chair. At this moment, the house being quite still, Cervetto gave a long and loud yawn, on which Garrick started up, and coming to the footlights demanded furiously what he meant. 'I beg your pardon,' said Cervetto, 'bnt I always gape when I am particularly enjoying myself.' He became manager of Drury Lane, and died Jan. 14, 1783, over a hundred years old, leaving £20,000 to his son,

2. JAMES, who was born in London about 1749. He made his first appearance when eleven years old on April 23, 1760, at the Haymarket Theatre, at a performance given mainly by children, such as Barron, a pupil of Giardini (eleven), Gertrude Schmeling (nine)—afterwards the celebrated Madame Mara, but then a violin player—and Miss Burney, sister of the authoress of *Evelina* (Pohl's *Haydn in London*, p. 339). Up to the death of his father he played at the professional concerts and other orchestras of the day, Crosdill being his only rival; but after that event he retired upon his fortune, and died Feb. 5, 1837, leaving a few unimportant pieces for his instrument behind him. G.

CES. See CIS.

CESARIS, JOHANNES, an early fifteenth-century composer. He is one of the three musicians named by Martin Le Franc as predecessors of Dufay and Binchois (see CARMEN). A motet of his in four parts and five secular songs to French words are contained in MS. Canonici Misc. 213 in the Bodleian Library. One of the latter (in three parts, with two sets of words) is transcribed in Stainer's *Dufay and his Contemporaries*. J. F. R. S.

CESTI, MARCANTONIO, was an ecclesiastic, a native of Arezzo according to Baini, whom Fétis follows, but of Florence according to Adami. He was born about 1620, and in due course became a pupil of Carissimi. He was maestro di cappella in Florence in 1646, was made a member of the papal choir on Jan. 1, 1660, and vice-capellmeister at Vienna from 1666 to 1669, in which year he died in Venice.

The bent of Cesti's genius was towards the theatre, and he did much for the progress of the musical drama in Italy. Bertini says of him—'Contribui molto ai progressi del teatro drammatico in Italia, riformando la monotona salmodia che allova vi regnava, e trasportando ed adattando al teatro le cantate inventate dal suo maestro per la chiesa.' That he owed much to his master Carissimi, as he did to his contemporary Cavalli, whose operas were then in vogue at Venice, cannot be doubted, but that he deserves to be dismissed as the plagiarist of either of them is untrue.

The following is a list of the operas of Cesti—'L'Orontea,' 1649; 'Cesare Amante,' 1651; 'La Dori,' 1663; 'Tito,' 1666; 'Semiramide,' 1667; 'Il Pomo d'oro,' 1668; 'L'Argia,' 1669; 'La Schiava fortunata,' 1674; this, and another, 'Genserico,' were left unfinished at his death, the former being completed by Marcantonio Ziani, the latter by Domenico Partenio. Four others, without date of production, are mentioned in the *Quellen-Lexikon*. Bertini and Gerber say that he set Guarini's 'Pastor Fido' to music, but the work is not known to exist. Dr. Burney has preserved a scene from 'L' Orontea' in his *History of Music*, and Hawkins has done the like by a pretty little duet for soprano and bass, called 'Cara e dolce è libertà.' His name is chiefly known in the present day by the melodious

song, 'Intorno all' idol mio,' quoted by Burney. The Abbé Santini had a collection of his chamber pieces, and the score of his Dori; some of his canzonets were published in London by Pignani in 1665; there are seven motets by him in the Christ Church Library, Oxford, and one in the National Library at Paris. The 'Judicium Salomonis' published as Carissimi's, is almost certainly by Cesti. E. H. P.

CETERA. See CITHER.

CEVALLOS, FRANCISCO, Spanish composer, from 1535 to 1572 canon and musical director of the cathedral at Burgos. Among his compositions, scattered throughout Spain, may be mentioned a fine mass in the church 'Del Pilar' at Saragossa, and three motets for four voices in Eslava's 'Lira Sacra Hispaña.' M. C. C.

CHABRIER, ALEXIS EMMANUEL, born at Ambert (Puy de Dôme), Jan. 18, 1841,[1] at first took up music as an amateur, while he was studying law at Paris, and was employed at the Ministère de l'Intérieur. While at the Lycée St. Louis he had been taught the piano by Edouard Wolff, and he afterwards studied harmony and counterpoint with Aristide Hignard; but in reality he was self-taught. His first works of any importance were two operettas, more worthy of notice than most compositions of their kind: 'L'Étoile'[2] (Bouffes Parisiens, Nov. 28, 1877) and 'L'Éducation manquée' (Cercle de la Presse, May 1, 1879). Two years later, having devoted himself entirely to music, he published 'Dix Pièces pittoresques' for piano; and in Nov. 1883, a Rhapsody on original Spanish airs, entitled 'España,' was very successful at the concerts of the Château d'Eau, where he was for two years (1884-85) chorus master, and where he helped Lamoureux to produce the first two acts of 'Tristan und Isolde.' While there he produced a scena for mezzo-soprano and female chorus, 'La Sulamite' (March 15, 1885), also selections from his opera 'Gwendoline,' which was given in its entirety at the Théâtre de la Monnaie, Brussels, April 10, 1886; finally he produced, at the Opéra Comique in Paris, a very remarkable work, 'Le Roi malgré lui' (May 18, 1887), which, after three performances, was stopped by the fire of May 25; it was reproduced at the temporary establishment on Nov. 16, 1887. [Its extraordinary brilliance, verve, and wit, would have ensured its success, had the libretto been at all worthy of the music.] Chabrier's works show a rare power of combining all the musical materials at his disposal, and his 'España' is a model in this respect; but in his original compositions a lack of spontaneity is apparent, and his orchestration, though not deficient in variety of colouring, is noisy and too thick. [His unfinished opera, 'Briséïs,' consisting of one act only, was produced at the Grand Opéra in Paris, May 8, 1899. Chabrier died in Paris, Sept. 13, 1894.] A. J.

CHACONNE (Ital. *Ciacona*), an obsolete dance, probably of Spanish origin. At any rate the name is Spanish, *chacona*, from the Basque *chocuna*, 'pretty' (Littré). The chaconne was a dance usually in 3-4 time, of a moderately slow movement, which belonged to the class of variations, being, in fact, in the large majority of cases, actually a series of variations on a 'ground bass,' mostly eight bars in length. It closely resembles the Passacaglia, the only differences being that the tempo of the latter is somewhat slower, and that it begins upon the third beat of the bar, whereas the chaconne commences upon the first. [In the Passacaglia it was usual to vary the place of the theme, while in the chaconne it was confined to the bass. See PASSACAGLIA.] Among the most celebrated examples are that in Bach's fourth sonata for violin solo, and the two (one with twenty-one, the other with sixty-two variations) in Handel's 'Suites de Pièces.' As a modern example of the chaconne (though not so entitled) may be instanced Beethoven's 'thirty-two variations in C minor on an original theme.' Gluck has also used this form, with some modifications, in the ballet music of his 'Iphigénie en Aulide' [and at the close of 'Orfeo,' there is one, for the composer here yielded to the convention of his time, that an opera should always end with a chaconne]. In Couperin's 'Pièces pour le Clavecin,' edited by Brahms, is a chaconne in 2-4 time. E. P.

CHADWICK, GEORGE WHITEFIELD, American composer, was born in Lowell, Mass., on Nov. 13, 1854. An elder brother first gave him instruction on the pianoforte. Having resolved to make music his vocation he went to Boston, and became the pupil of Eugene Thayer, devoting himself chiefly to the organ. In 1876 he accepted an invitation to become head of the musical department of Olivet College, Michigan, but a year later went to Leipzig and entered the Conservatory, where Carl Muck, Helen Hopekirk, and Battison Haynes were among his classmates. During 1877 and 1878 he studied under Reinecke and Jadassohn, and during 1879 under Rheinberger in Munich. His thesis at Leipzig was inspired by an American subject. It was an overture entitled 'Rip Van Winkle,' which had a performance at a conservatory concert, and was given a place on the programme of the Boston Handel and Haydn Society in 1880. He had just returned to the United States, and was invited by the festival management to conduct it. He elected to make Boston his home, became organist of the South Congregational Church, and professor of harmony, composition, and orchestration at the New England Conservatory of Music, of which he became Musical Director in 1897. He still (Nov.

[1] Date verified by the register of birth.

[2] The libretto of this work was used as the basis of 'The Lucky Star,' by a number of adapters and Mr. Ivan Caryll (produced at the Savoy Theatre, Jan. 7, 1899), a single number from the original music being introduced. This is, so far, the only example of the admirable composer's work that has been heard on the stage in England.

ALEXIS EMMANUEL CHABRIER

GEORGE WHITFIELD CHADWICK

1903) fills that post and that of organist of the Second Universalist Church. In 1897 he received the honorary degree of M.A. from Yale University, whose Professor of Music, Horatio W. Parker, was one of his pupils before going to Germany. For several years he was conductor of the annual music festivals at Springfield and Worcester, Mass. The rest of Mr. Chadwick's art-life can be told in connection with an enumeration of his principal compositions. He has composed in all the forms, large and small, the list comprising three symphonies, six overtures, eight choral works with orchestra, seven chamber pieces, about half a hundred songs, some pianoforte and organ pieces, choruses for male and female voices, and a text-book on harmony.

Symphonies: No. 1, in C major (MS.) composed in 1881 and performed the same year in Boston by the Harvard Musical Association; No. 2, in B flat major, composed in 1885, performed by the Boston Symphony Society in 1886; No. 3, in F major, composed in 1894, awarded first prize of the National Conservatory of Music in New York, performed by the Boston Symphony Orchestra in 1895.

Overtures, etc.: overture, 'Rip Van Winkle,' 1879, performed the same year in Leipzig and Dresden, in Boston in 1880 by the Harvard Musical Association, and at a festival of the Handel and Haydn Society (MS.); overture, 'Thalia,' 1882, the Boston Symphony Orchestra (MS.); overture, 'The Miller's Daughter,' 1884 (MS.); dramatic overture, 'Melpomene,' 1886, Boston Symphony Orchestra, 1888, Worcester (Engl.) Festival, 1902; Serenade in F, 1890 (MS.); 'A Pastoral Prelude,' 1891, Boston Symphony Orchestra, 1891 (MS.); Suite in A, 1896, Springfield Festival, 1897 (MS.); elegiac overture, 'Adonais,' 1899, Boston Symphony Orchestra, 1900 (MS.). His newest works, still in MS., are a concert overture, 'Euterpe,' and a Sinfonietta in D major.

Choral Works: 'The Viking's Last Voyage,' 1880, Boston Apollo Club, 1881; 'Dedication Ode,' for the dedication of the new Hollis Street Church, 1883; 'The Pilgrims,' 1888, Boston Cecilia Society; 'Lovely Rosabelle,' 1889, Boston Orchestral Club, 1890; 'Phœnix Expirans,' 1891, Springfield Festival; 'Columbian Ode,' 1892, for the dedication of the buildings of the Chicago World's Fair, 1893; 'The Lily Nymph,' 1895, Springfield Festival, 1896; 'Ecce jam Noctis,' 1897, composed for the commencement exercises of Yale University, 1897.

Chamber music: String Quartet, No. 1, G minor, 1878, Conservatory concert, Leipzig (MS.); String Quartet, No. 2, C major, 1897, concert of the Conservatory, Leipzig (MS.); String Quartet, No. 3, D major, 1885, Kneisel Quartet, 1888 (MS.); Quintet for pianoforte and strings, E flat, 1887, Kneisel Quartet, 1888; String Quartet, No. 4, E minor, 1896, Kneisel Quartet, 1896; String Quartet, No. 5, D minor, 1888, Adamowski Quartet, 1901.

Operas and operettas: 'The Quiet Lodging,' operetta in 2 acts, 1892, privately performed in Boston; 'Tabasco,' comic opera, 1893, Boston Cadet Theatricals, 1894, afterward in many cities; 'Judith,' lyric drama in three acts, 1900, Worcester (Mass.) Festival, 1901 and 1902.

Though he has given titles to his concert overtures, Mr. Chadwick is not an out-and-out believer in programme music. He has a critical and conservative mind, and his compositions are chiefly moulded in the classical forms. In his lyric drama 'Judith,' he utilises considerably the modern device of typical phrases. In his Symphony in F and Quartet in E minor there are traces of an idiomatic expression which, since Dr. Dvořák's sojourn in the United States, has been discussed more or less intelligently as a possible trait for an American School of Composition. H. E. K.

CHAIR ORGAN, an older name for CHOIR ORGAN, not impossibly arising from the fact that in cathedrals the choir organ often formed the back of the organist's seat.

CHÂLET, LE. A comic opera of three characters and in one act; the libretto by Scribe and Mélesville, the music by A. Adam—his most popular work. It was produced in Paris, Sept. 25, 1834, and revived at Covent Garden, July 8, 1899. G.

CHALUMEAU (from *calamus*, a 'reed'). An obsolete instrument of the beating single reed type. In its rudest form it was made from a cylindrical reed in which the speaking tongue was cut, and this was therefore not removable, in the manner of the modern clarinet reed. An interesting example lent by M. Césare Snoeck to the Royal Military Exhibition, London, 1890, was $8\frac{1}{4}$ inches long, and about $\frac{6}{10}$ inch internal diameter, and was pierced with six finger-holes on the upper side, and one thumb-hole beneath. The tongue or reed was cut on the upper side. By the 17th century the instrument, from its rude original form, had developed into a family, of soprano, alto, tenor, and bass, with a slightly increased compass due to the introduction of two keys. In this state it was ready by means of a slight modification to become the modern clarinet (*q.v.*). The name Chalumeau especially in its German form Schalmei or Schalmey, is also given to a totally different instrument from the foregoing, that is, to an instrument with conical tube and double reed, the antetype of the oboe (see SCHALMEY). There may be room for doubt as to which of the two instruments is intended where the name occurs in the scores of Gluck's operas. The word is also used for the lowest register of the clarinet. D. J. B.

CHAMBER MUSIC is the name applied to all that class of music which is specially fitted for performance in a room, as distinguished from concert music, or dramatic music, or ecclesiastical music, or such other kinds as require many performers and large spaces for large volumes of sound.

It was early recognised as a special department of the art, as we find Louis XIV. with a 'Maître de la Musique de la Chambre du Roy,' and in Italy as early as the beginning of the 17th century Peri and Caccini and many other distinguished composers of that time and shortly after produced an abundance of 'Cantate da Camera' and 'Madrigali da Camera,' which were generally pieces for a single voice with accompaniment of a single instrument. These were probably the most important part of chamber music for some time, but they changed their character by degrees, and becoming more extensive, and more fitted for large numbers of performers, passed out of its domain. The name is now more generally applied to instrumental music, either for single instruments or solo instruments in combination; though it is still appropriate to songs, and vocal pieces for a few voices, alone or with a simple accompaniment.

The earliest forms of instrumental chamber music, as indeed of all instrumental music, were the dance tunes, and the collections of dance tunes which were called suites; and great quantities of these exist for various combinations of instruments, but most of those which are still well known are for 'clavier' alone. These were the forerunners of the sonata or 'sound piece,'

which is the type of the greater part of modern instrumental music. This designation is now almost entirely restricted to works for pianoforte or pianoforte and one solo instrument, but the first sonatas were for combinations of various instruments, and especially for strings; and works of this kind exist by many of the great Italian masters, as by Corelli, and by our own Purcell, whose 'Golden Sonata' for two violins and bass was held in great repute. It is somewhat singular that the name should have been so restricted, as the works which we now know as trios, quartets, quintets, and like names designating the number of solo instruments for which they were written, are always in the same form with the pianoforte works which we call sonatas, and the legitimate descendants of the earlier combinations of instruments which went by the same name. Works of this description form a very considerable portion of modern music both in value and amount, almost all the greatest composers of the last hundred years having produced some, especially Haydn, Mozart, and Beethoven. The latter seemed in his later years to regard the quartet of strings as one of the most perfect means of expressing his deepest musical thoughts, and left some of the greatest treasures of all music in that form. In the present day the most popular form of instrumental music of this description seems to be the combination of pianoforte and strings, as duos, trios, quartets, etc., and of such works great quantities are constantly produced by many distinguished composers of Germany.

Chamber music offers such signal opportunities for the display of the finest qualities of great players that it has become a common practice to perform it in large concert rooms where great numbers of people can come together to hear it, so that the title threatens to become anomalous; but it so aptly describes the class of music which is at least most fitted for performance in a room that it is not likely to fall into disuse. C. H. H. P.

CHAMBER ORGAN. An organ of small size, suitable for use in a dwelling.

CHAMBONNIÈRES, JACQUES CHAMPION DE, son of Jacques and grandson of Thomas Champion, took the name of Chambonnières from his wife's estate near Brie, was first harpsichord player to Louis XIV. Le Gallois, in his *Lettre à Mlle. Regnault* (Paris, 1680), says that Chambonnières excelled every performer of his day in the roundness and softness of his touch. He formed the school of harpsichord players which preceded Rameau. Among other pupils he taught Anglebert, Le Bègue, and the earlier Couperins, of which celebrated family he introduced Louis to the court. Chambonnières published two volumes of harpsichord music (Paris, 1670), of which the first is in the library of the Conservatoire and the second at the Bibliothèque Nationale. These pieces are elegant, original, and correctly harmonised. They are reprinted in Farrenc's *Trésor des Pianistes*. He died in or soon after 1670. M. C. C.

CHAMINADE, CÉCILE, pianist and composer, born August 8, 1861, at Paris; studied various branches of music with Le Couppey, Savart, Marsick, and Godard. At eight years of age she wrote some pieces of church music, and gave her first concert when she was eighteen. Since that time her numerous works of all kinds have attracted the attention of the public, and she has brought them forward during many concert-tours, in France and abroad, particularly in England, where she has been a regular visitor since her first appearance in June 1892. A great number of songs, pianoforte pieces, a 'concertstück' with orchestra, etc., are among her most successful works. She has essayed the larger forms of music, having written several orchestral suites, a 'Symphonie lyrique' with chorus and orchestra, called 'Les Amazones'; two trios for piano and strings; a ballet, 'Callirhoë,' produced at Marseilles, 1888; and an opéra comique, 'La Sévillane,' unpublished. Notwithstanding the real charm and clever writing of many of Mlle. Chaminade's productions, they do not rise above the level of agreeable salon-music. G. F.

CHAMPION, ANTOINE, an eminent organist in the reign of Henri IV. A five-part mass in the Royal Library at Munich, attributed to him by Fétis, is the work of Nicolas Champion, a 16th-century composer of psalms, motets, etc. A book of organ pieces by Antoine Champion (in MS.), which Fétis stated to be in his own possession, is not now to be found in the Fétis library. Thomas Champion was organist and harpsichord player under Charles IX. and Henri III. He published a book containing sixty psalms for four voices, in 1561. His son Jacques was also a good organist in the reign of Louis XIII., and was the father of Chambonnières.

CHANGE. I. The word used as the short for change of key or MODULATION, under which latter head a fuller account is given. Changes are commonly spoken of as of three kinds, representing three degrees of abruptness.

1. The Diatonic, which passes from one key to another, nearly related to it, by means of notes common to both, as—

from Bach's Cantata, 'Freue dich, erlöste Schaar.'

2. The Chromatic, when accidentals appear which are not common to both keys, as—

Tu suscipe pro animabus illis.

from Mozart's Requiem.

3. The Enharmonic, where advantage is taken of the fact that the same notes can be called by different names, which lead different ways, and consequently into unexpected keys. For instance, the dominant 7th can be translated into the chord of the augmented 6th, and by that means lead into very remote keys, and by the universal transformable power of the inversions of the minor 9th, we can pass from any one key to almost any other; *e.g.* in Beethoven's 'Leonora No. 3' Overture the transition from E major to F is thus managed—

the chord * being resolved as if it had been written B♭, D♭, G, and being approached as if it should be written A♯, C♯, G. Thus there is a double equivoque. The chord as it is approached seems to be an inversion of the minor 9th of the supertonic of E; it is then written as an inversion of the chord of the minor 9th of the dominant in the key of D, and resolved as an inversion of the minor 9th of the dominant of F. A more obvious instance to the uninitiated is the following—

from Chopin's Nocturne in G minor (op. 15), where he passes from C♯ major to F in this manner. C. H. H. P.

II. Change is the term applied to any order in which bells are struck other than the usual order in which rings of bells are arranged, viz. the diatonic scale—struck from the highest to the lowest bell; and CHANGE RINGING [1] is the continual production of such changes—without any repetition—from the time the bells leave the position of *rounds* (1 2 3 4 5 6) to the time they return to that position again. It is an interesting, and, to many, an engrossing art, and has been in practice in this country, it is supposed, for the last 250 years; during which time many persons of rank and education have practised it as an amusement, among the earliest of whom may be mentioned Lord Brereton, and Sir Cliff Clifton in about 1630. Change-ringing, as has been said, is the constant production of changes without repetition from the time that the bells leave the position of rounds to the time that they return to that position again. It is a rule that every bell which can change its position should do so in order of striking at each successive blow, thus:—

1 2 3 4 5

---

2 1 4 3 5
2 4 1 5 3

It is the change-ringers' and the composer's object to obtain with as musical a combination as may be, the whole of the changes to be produced on any given number of bells. It will be seen by examining the following figures that with this simple rule—that every bell which can must change places—only ten changes can be produced on five bells:

1 2 3 4 5	5 4 3 2 1
———	5 3 4 1 2
2 1 4 3 5	3 5 1 4 2
2 4 1 5 3	3 1 5 2 4
4 2 5 1 3	1 3 2 5 4
4 5 2 3 1	1 2 3 4 5

It will also be observed that the bells work in regular order from being first bell to being last, striking two blows as first and two as last: this is called by ringers 'hunting up and down'—all the work from being first bell being called hunting 'up,' till she becomes the last striking bell, and the reverse being termed going 'down.' A bell can never be made to skip a place, she must always be rung in the next place to that in which she last struck. This being the rule, therefore, that bells must thus change places, and it having been shown that by simply doing so only 10 changes of the 120 on five bells (see Table) can be produced, it becomes necessary to alter the rule in the case of some of the bells, by

[1] This work being a Dictionary of Music, a long description of the art of change-ringing would be out of place, and we must therefore refer the reader to the elementary book entitled *Change Ringing* by Charles A. W. Troyte, Esq., of Huntsham, Devon (Masters, New Bond Street), and for the more advanced stages to the book of the same name by Mr. William Banister (Pollard, Exeter).

making fresh ones; and these rules, being more or less intricate, comprise the methods by which peals or touches are produced. For the purposes of this work it will be enough to glance at one or two of those in most general use.

The *Grandsire* method is supposed to be the original one, and shall therefore be first noticed. Taking the rule above given as to plain 'hunting,' which has been shown to produce ten changes only on five bells, it is by this method thus altered:—The bell that leads next before the treble only goes up into 3rd's place and then goes back to lead again; the bells in 4th's and 5th's places are by this thrown out of their work, as will be seen by the following diagram at the asterisk, and are said to dodge:—

1 2 3 4 5	5 1 4 2 3
2 1 3 5 4	1 5 2 4 3
2 3 1 4 5	1 2 5 3 4*
3 2 4 1 5	2 1 5 4 3
3 4 2 5 1	2 5 1 3 4
4 3 5 2 1	5 2 3 1 4
4 5 3 1 2	5 3 2 4 1
5 4 1 3 2†	

By following this rule again only 30 changes of the 120 can be produced, and now the services of the conductor have to be called in, who uses the terms 'Bob' or 'Single' to denote the changes in work shown in the following diagrams, taking up the work from the † in the foregoing one. We will in the first show the working of a Bob, in the second that of a Single,—these changes of course always taking place when the treble is leading:—

'Bob'	'Single'
5 4 1 3 2	5 4 1 3 2
5 1 4 2 3	5 1 4 2 3
1 5 4 3 2	1 5 4 3 2
1 4 5 2 3	1 5 4 2 3
4 1 5 3 2	5 1 4 3 2
4 5 1 2 3	5 4 1 2 3

It will be observed that all the bells, except the treble are thrown out of their plain hunting work; the 4th and 5th remain below 3rd's place, and the 2nd and 3rd keep changing places: in change-ringing terms the 4th and 5th are said to 'make places,' and the 2nd and 3rd are said to make a 'double dodge.' It is by calling these bobs and singles at intervals previously settled on that the conductor is able to produce the whole 120 changes.

This method is much and generally practised on all numbers of bells from 5 to 12, its working being exactly the same on all, with the only difference that when the courses of the bells are altered by the rule, there are more bells to dodge, and the arrangements of bobs and singles become more complicated. It is, however, considered better suited to an uneven number of bells with a tenor covering,—such as would be ten bells when only the first nine were changing.

The *Stedman* method is another and favourite method among change-ringers. It derives its name from a Mr. Fabian Stedman by whom it was invented about the year 1640. It is on an entirely different principle from the Grandsire method, the foundation of it being that the three first bells go through the six changes of which they are capable (see Table of Changes) while the bells behind 'dodge'; at the end of each six changes one of these bells going up to take part in the dodging, and another coming down to take its place in the changes. It is an intricate method, and our space will not allow of a fuller explanation; it is carefully explained in Troyte's *Change Ringing,* to which we have already referred.

Treble Bob.—There are many variations of this, which is usually performed on an even number of bells. It derives its name from the fact that, instead of the plain hunting course, the bells, and more especially the 'Treble' have a dodging course. This will be seen by the following diagram, and for further explanation we must again refer to Troyte's *Change Ringing.*

1 2 3 4 5 6	5 2 6 3 4 1
———————	2 5 3 6 1 4
2 1 3 4 6 5	2 3 5 1 6 4
1 2 4 3 5 6	3 2 1 5 4 6
2 1 4 3 6 5	3 2 5 1 6 4
2 4 1 6 3 5	2 3 1 5 4 6
4 2 6 1 5 3	2 1 3 4 5 6
4 2 1 6 3 5	1 2 3 4 6 5
2 4 6 1 5 3	2 1 4 3 5 6
2 6 4 5 1 3	1 2 4 3 6 5
6 2 5 4 3 1	1 4 2 6 3 5
6 2 4 5 1 3	4 1 2 6 5 3
2 6 5 4 3 1	1 4 6 2 3 5
2 5 6 3 4 1	4 1 6 2 5 3
5 2 3 6 1 4	4 6 1 5 2 3

The foregoing remarks, we trust, will explain the general meaning of the term 'Change Ringing' as used technically. The following Table shows the number of changes to be derived from any given number of bells up to 12 (the largest number ever rung in peal), the names given to such changes, and the time generally allowed for ringing them:—

No. of Bells.	Name.	No. of Changes.	Years.	Days.	Hours.	Minutes.
3	....	6	..	..	..	..
4	Singles . .	24	..	..	..	1
5	Doubles . .	120	..	..	..	5
6	Minor . .	720	..	..	..	30
7	Triples . .	5,040	..	..	3	..
8	Major. . .	40,320	..	1	4	..
9	Caters (quaters)	362,880	..	10	12	..
10	Royal. . .	3,628,800	..	105	..	..
11	Cinques . .	39,916,800	3	60	..	..
12	Maximus . .	479,001,600	37	355	..	..

C. A. W. T.

CHANGING-NOTE. See Nota Cambiata.

CHANOT, François, son of a violin-maker,

was born in 1787 at Mirecourt in France. He entered the army as an engineer under the Empire, but quitted it after the Restoration. Returning to Mirecourt, he made special studies on the construction of the violin, and ultimately built one which deviated considerably in form from the accepted pattern. Believing that, in order to make every part of the instrument partake equally of the vibrations of the sound, the fibres of the wood should be preserved in their entire length, he considered the corners and curves of the outline as so many obstacles to the propagation of the waves of sound, and accordingly gave his violin a pear-shaped form, resembling that of the guitar. The belly he made quite flat, and left out the sound-post altogether, on the ground that it merely served to break the waves of sound, while in reality it transmits them from belly to back.

This violin (if one may still call it so), the only one Chanot ever made, he submitted to the authorities of the Institut de France. After having been examined by a committee of eminent men, both scientific and musical, and tried against instruments of Guarnerius and Stradivarius, it was pronounced not inferior in quality to the violins of these great makers. ('Rapport de l'Institut,' in the *Moniteur*, August 22, 1817.) It is difficult to account for this decision, which experience quickly proved to be a complete delusion, as all instruments made after the new pattern turned out of indifferent quality. A brother of Chanot's, a violin-maker at Paris, for some time continued to make violins of this kind, but was soon obliged to give it up. This endeavour to improve upon the generally adopted pattern of the great Italian makers, resulted, like all similar attempts before and since, in complete failure. Chanot died at Brest in 1823. P. D.

CHANOT, GEORGES, brother of François, was born at Mirecourt in 1801, came to Paris in 1819, and, as stated above, worked with his brother for a time in making violins of the 'Chanot' model. In 1818 he began to work for Clément, and in 1821 for Gand, whom he left in 1823 to set up for himself. After several changes of address he settled in 1848, on the Quai Malaquais, where he remained until his retirement from business in 1872. Georges Chanot was an admirable maker of violins and a skilful repairer. Madame Chanot, his wife (*née* Florentine Démoliens), was also a violin-maker, and is probably the only female one known to fame. She made several violins with her own hands, worked assiduously with her husband at his trade, and died leaving him a widower some years before his retirement. The violins of G. Chanot command high prices (£80 to £50). E. J. P.

CHANOT, GEORGES, junior, born 1831, son of the last named by Madame Chanot, the female violin-maker, learnt the trade from his father, and in 1851 left Paris for London, where he worked for several years with Maucotel. In 1858 he set up for himself, and was known for many years as one of the best workmen in London, gaining gold medals at various exhibitions, including the London Inventions Exhibition, 1885. He died in 1895. His eldest son, G. A. Chanot, of Manchester, is an excellent violin-maker. His second son, F. W. Chanot, is also a violin-maker, but is better known as a publisher of violin music. His business in Wardour Street is carried on by his third son Joseph Chanot, an artist-craftsman who fully sustains the reputation of the family, and specially excels in making and adjusting bridges and sound-posts. E. J. P.

CHANSON. The French *chanson*, derived from the Latin *cantio*, *cantionem*, is a little poem of which the stanzas or symmetrical divisions are called 'couplets.' Being intended for singing, the couplets are generally in a flowing rhythm, and written in an easy, natural, simple, yet lively style. As a rule, each couplet concludes with a repetition of one or two lines constituting the 'refrain'; but the refrain is sometimes separate, and precedes or follows the couplet, in which case it may be a distich or quatrain, or even a stanza, of different rhythm from the rest of the song. The history of the chanson would involve a review of the whole history of France, political, literary, and social. Suffice it to say here that all modern songs may be classed under four heads—the 'chanson historique'; the 'chanson de métier'; the 'chanson d'amour'; and the 'chanson bachique': four divisions which may be traced in the ancient poets.

1. The historical songs may be subdivided into four classes, sacred, military, national, and satirical. The sacred songs include the 'cantique,' the 'noël,' or Christmas carol, the 'hymne,' and also the 'complainte,' or lament, and the 'chanson de solennités politiques,' composed to celebrate an accession to the throne, or other public event. The 'cantatas' performed on state occasions by other nations took their origin from these 'chansons de solennités.' The national songs of France are entirely modern. [See HENRI IV., VIVE; MARSEILLAISE; DÉPART, CHANT DU; PARISIENNE, LA, etc.]

2. The 'chansons de métier,' like the 'chansons militaires,' were originally merely cries. (Kastner, 'Les Voix de Paris.') Of all the popular songs, these professional chansons are the fewest in number, and the least interesting both as regards words and music.

3. On the other hand, the 'chansons d'amour' are innumerable and well worth studying. In them the French poets exhausted all the resources of rhythm. The 'lai,' an elegiac song, accompanied by the rote, harp, or vielle (hurdy-gurdy); the 'virelai,' turning entirely on two rhymes; the 'descort,' in which the melody, and sometimes the idiom, changed with each couplet;

the 'aubade,' the 'chant royal,' the 'ballade,' the 'brunette,' the 'rondeau,' and the 'triolet,' are all forms of the 'chanson amoureuse,' which was the precursor of the modern 'romance.'

4. The 'chansons bachiques' are also remarkable for variety of rhythm, and many of them have all the ease and flexibility of the 'couplets de facture' of the best vaudeville writers. In some songs the words are more important, in others the music. Hence arose a distinction between the 'note' or air, and the 'chanson' or words. The old chansons have a very distinctive character; so much so that it is easy to infer the time and place of their origin from their rhythm and style. The popular melodies of a country where the inhabitants live at ease, and sing merely for amusement, have as a rule nothing in common with those of a people whose aim is to perpetuate the memory of the past. The songs, too, of those who live in the plains are monotonous and spiritless; whilst those of mountaineers are naturally picturesque, impressive, and even sublime. It is not only the influence of climate which leaves its mark on the songs of a people; the spirit of the age has a great effect, as we may see if we remark how the chansons of France have drawn their inspiration mainly from two sources—church music, and the 'chansons de chasse.' Even in its songs, the influence of the two privileged classes, the clergy and the nobility, was felt by the people. Without pursuing this subject further, we will merely remark that the name 'chansons populaires' should be applied only to songs of which the author of both words and music is unknown.

It is also important to distinguish between the anonymous chanson, transmitted by tradition, and the 'chansons musicales,' by which last we mean songs that were noted down from the first, and composed with some attention to the rules of art. Such are those of the Châtelain de Coucy, composed at the end of the 12th century, and justly considered most curious and instructive relics in the history of music (Michel et Perne, *Chansons du Châtelain de Coucy*, Paris, 1830). Of a similar kind, and worthy of special mention, are the songs of Adam de la Halle, of which some are in three parts (Coussemaker, *Adam de la Halle*, Paris, 1872). True, these first attempts at harmony are rude, and very different from the 'Inventions Musicales' of Clement Jannequin, and the songs for one or more voices by the great masters of the madrigal school; but the chanson of the Middle Ages was nevertheless the parent of the ariette in the early French opéra-comiques, and of the modern couplet; while the 'chanson musicale' in several parts is the foundation of choral music with or without accompaniment. By some of the great Flemish musicians the word chanson was extended to mean psalms and other sacred pieces. It is much to be regretted that the French, who are so rich in literary collections of songs, should have at present no anthology of 'chansons musicales' in notation, where might be seen not only 'Belle Erembor' and 'l'Enfant-Gérard,' anonymous compositions of the 12th century, but the best works of the troubadours Adenez, Charles d'Anjou, Blondel, Gace Brulés, Colin Muset, Thibault IV., Comte de Champagne, and of the Norman and Picardy trouvères of the 13th, 14th, and 15th centuries. One great obstacle to such a work lies in the fact that the chansons of the 12th, 13th, and 14th centuries were so often altered in transcribing. It is, however, much to be hoped that some musician of taste and erudition will before long place within our reach the 'chansons d'amour,' and the 'chansons à boire,' which have been the delight of the French from the Middle Ages downwards.

The best works on the subject at present are:—*Histoire littéraire de la France*, vol. xxiii.; *Les Poëtes français* (Crépet, Paris, 4 vols.); Du Mersan's 'Chants et Chansons populaires de la France' (Paris, 1848, 3 vols.), with accompaniments by Colet, not in the style of the chansons; Coussemaker's 'Chants populaires des Flamands de France' (Ghent, 1856); Champfleury and Wekerlin's 'Chansons populaires des provinces de France' (Paris, 1860); Gagneur's 'Chansons populaires du Canada' (Quebec, 1865); Landelle's 'Chansons maritimes' (Paris, 1865); Nisard's 'Des Chansons populaires' (Paris, 1867); Capelle's 'La Clé du Caveau' (4th ed. Paris, 1872); and Verrimst's 'Rondes et Chansons populaires illustrées' (Paris, 1876). In the last two works the songs are not always correctly given. See SONG. G. C.

CHANT. To chant is, generally, to sing; and, in a more limited sense, to sing certain words according to the style required by musical laws or ecclesiastical rule and custom; and what is thus performed is styled a Chant and Chanting, *Cantus firmus*, or *Canto fermo*. The method of chanting that belongs to the Latin service-books is described under the heading GREGORIAN TONES. Practically, the word is now used for the short melodies sung to the psalms and canticles in the English Church. These are either 'single,' *i.e.* adapted to each single verse after the tradition of sixteen centuries, or 'double,' *i.e.* adapted to a couple of verses, or even, according to a recent still greater innovation, 'quadruple,' ranging over four verses.

The qualifying terms *Gregorian*, *Anglican*, *Gallican*, *Parisian*, *Cologne*, etc., as applied to tone or chant, simply express the sources from which any particular chant has been derived.

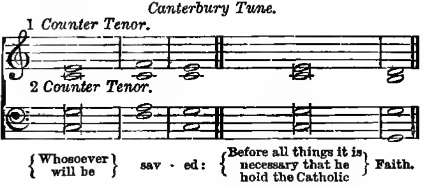
It is historically incorrect to regard the structure of ancient tones and of modern chants as being antagonistic each to the other. The famous *Book of Common Praier noted*, of John Marbeck (1550), which contains the first adaptation of music to the services of the Reformed Anglican Church, is an adaptation of the ancient

music of the Latin ritual, according to its then well-known rules, *mutatis mutandis*, to the new English translations of the Missal and Breviary. The ancient Gregorian chants for the psalms and canticles were in use not only immediately after the Reformation, but far on into the 17th century; and although the Great Rebellion silenced the ancient liturgical service, with its traditional chant, yet in the fifth year after the Restoration (1664) the well-known work of the Rev. James Clifford, Minor Canon of St. Paul's, gives as the 'Common Tunes' for chanting the English Psalter, etc., correct versions of each of the eight Gregorian Tones for the Psalms, with one ending to each of the first seven, and both the usual endings to the eighth, together with a form of the Peregrine Tone similar to that given by Marbeck.[1] Clifford gives also three tones set to well-known harmonies, which have kept their footing as chants to the present day. The first two are arrangements of the 1st Gregorian Tone, 4th ending—the chant in Tallis's 'Cathedral Service' for the Venite—with the melody, however, not in the treble but (according to ancient custom) in the tenor. It is called by Clifford 'Mr. Adrian Batten's Tune'; the harmony is essentially the same as that of Tallis, but the treble takes his alto part, and the alto his tenor. The second, called 'Christ Church Tune' and set for first and second altos, tenor, and bass, is also the same; except the third chord from the end—

Christ Church Tune.

Clifford's third specimen is quoted as 'Canterbury Tune,' and is that set to the Quicunque vult (Athanasian Creed) in Tallis's 'Cathedral Service'; but, as before, with harmonies differently arranged.

Canterbury Tune.



It has all the characteristics of the 8th Gregorian Tone, with just such variations as might be expected to occur from the lapse of time, and decay of the study of the ancient forms and rules of Church music.

The fourth of Clifford's examples is also a very good instance of the identity, in all essential characteristics, of the modern Anglican chant and the ancient Gregorian psalm tones. It is an adaptation of the 8th Tone, 1st ending—the tone being in the Tenor:—

The Imperial Tune.

The work published in 1661 by Edward Lowe, entitled *Short Directions for the Performance of Cathedral Service* (2nd ed., 1664), also gives the whole of the tones, and nearly all their endings, according to the Roman Antiphonarium, and as Lowe had sung them before the Rebellion when a chorister at Salisbury. He also gives the harmonies quoted above as the 'Imperial' and 'Canterbury' tunes, and another harmony of the 8th Tone, short ending (Marbeck's 'Venite') with the plain-song in the bass.

The *Introduction to the Skill of Music*, by John Playford (born 1623), in its directions for the 'Order of Performing the Divine Service in Cathedrals and Collegiate Chapels' confirms the above statements. Playford gives seven specimens of psalm tones, one for each day of the week, with 'Canterbury' and the 'Imperial' tunes in 'four parts, proper for Choirs to sing the Psalms, Te Deum, Benedictus, or Jubilate, to the organ.'

The Rev. Canon Jebb, in the second volume of his *Choral Responses and Litanies of the United Church of England and Ireland*, gives from the three writers quoted and from Morley's *Introduction* (1597) a table of such old English chants as are evidently based upon or identical with the Gregorian psalm tones. [He also gives some interesting specimens of the experiments made by English composers shortly after the Reformation, preliminary to the settling down of the new four-part chant into the rhythm which it permanently adopted, based upon the rhythm of some of the old tones.]

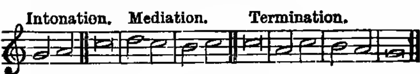
It is interesting to note also that in the earliest days of the Reformation on the Continent, books of music for the service of the Reformed Church were published, containing much that was founded directly upon the Gregorian plain-song; and it was chiefly through the rage for turning everything into metre that the chant proper fell into disuse among Protestant communities on the Continent. See the *Neu Leipziger Gesangbuch* of Vopelius (Leipzig, 1682).

The special work for the guidance of the clergy of the Roman Church, and all members of canonical choirs, in the plain-song which they have specially to chant, is called the *Directorium Chori*. The present *Directorium* corresponds to

[1] See Table of chants in *Acc. Harmonies to Brief Directory*, by Rev. T. Helmore. App. II. No. cxi.

the famous work prepared by Guidetti (1582), with the aid of his master Palestrina. But as is the case in most matters of widespread traditional usage, differences are found between the books of present and past liturgical music, not simply in different countries and centuries, but in different dioceses of the same country and the same century. The York, Hereford, Bangor, and Lincoln 'uses' are named in our Prayer-Book, as is also that of Salisbury, which obtained a foremost place of honour for the excellence of its church chant. Our own chants for the responses after the Creed, in the matins and vespers of English cathedrals, are almost the same to the present day as those found in the most ancient Sarum Antiphonary, and differ slightly from the Roman.

The psalm tone, or chant, in its original and complete form, consists of (1) An Intonation at the beginning, followed by a recitation on the dominant of its particular mode; (2) A Mediation, *a tempo*, closing with the middle of each verse; (3) Another recitation upon the dominant with a Termination completing the verse, as in the following—the Third Tone:—



In the modern Anglican chants the Intonation has been discarded, and the chant consists of the Mediation and Termination only.

When the tune or phrase coincides with a single verse of the psalm or canticle it is styled a 'single chant,' as are all those hitherto cited. At the time of the Restoration, as already stated, the Gregorian chants were still commonly used, till lighter tastes in music and the lessened numbers of men in cathedral choirs led to the composition of new treble chants and a rage for variety. Some of these, which bear such names as Farrant, Blow, and Croft, are fine and appropriate compositions. But a different feeling gradually arose as to the essential character of church music; double chants and pretty melodies with modern major or minor harmonies, came to be substituted for the single strains, the solemn and manly recitation tones, and the grand harmonies of the 16th century. The Georgian period teemed with flighty chants, single and double: many of which can hardly be called either reverential or beautiful—terms which no one can apply to the following (by Camidge), still in frequent use, and by no means the worst that might be quoted:—

But however objectionable this practice may be, it must be confessed that many very charming melodies have been produced on the lines of the modern double chant by modern composers of great eminence. The following by Dr. Crotch is remarkable for its grace and elegance, as well as for the severity of the contrapuntal rule to which the quondam Oxford professor has subjected himself in its construction (*per recte et retro*). Each of the four parts in the former half of the chant has its notes repeated backwards in the corresponding bars of the second half.

[A triple chant by J. M. Coward, and the well-known quadruple chant by Sir Herbert S. Oakeley, may be mentioned as evidences of a desire to break through the monotony of the Anglican chant. Reference may be made to a useful 'Bibliography of Chant-Books' by the Rev. H. Parr, in the *Musical Times* for 1879, p. 299; and to Sir John Stainer's article on 'The Rhythmical form of the Anglican chant' in the *Musical Times*, Jan. 1872.]

It remains to add a few remarks on Pointing, or the arrangement of the words in chanting.

That the principles of the old Latin chanting were adopted in setting the music to the new English liturgy and offices, is evident from every text-book of English chanting from Archbishop Cranmer's letter to Henry VIII. and from Marbeck downwards, as long as any decent knowledge of the subject remained in English choirs. Little by little, however, the old rules were entirely neglected; generally speaking, neither the clergy nor the lay members of the English choirs knew anything more about chanting than the oral traditions of their own churches; thus things grew gradually worse and worse, till no rule or guide seemed left; choirmen and boys took their own course, and no consent nor unity of effect remained, so far as the recitation and division of the words were concerned.

On the revival of Church principles in 1830-1840 our own English documents of ecclesiastical chanting, and the pre-Reformation sources from which they were derived, began to be studied. Pickering and Rimbault each re-edited Marbeck. Dyce and Burns published an adaptation of his plain-song to the Prayer-Book. Oakeley and Redhead brought out the 'Laudes diurnæ' at the chapel in Margaret Street, London. Heathcote published the Oxford Psalter, 1845. Hel-

more's 'Psalter Noted' (1849-50) took up Marbeck's work, at the direction after the Venite—'and so with the Psalms as they be appointed'—and furnished an exact guide for chanting according to the editor's view of the requirements of the case.

Meantime the modern Anglican chant was being similarly cared for. Numerous books, beginning with that of Robert Janes (1843), issued from the press, giving their editors' arrangement of the syllables and chant notes for the Psalter and Canticles. Among the most prominent of these may be mentioned Mr. Hullah's 'Psalms with Chants' (1844); Helmore's 'Psalter Noted' (1850); the Psalter of the S.P.C.K. edited by Turle (1865); the 'English Psalter' (1865); the 'Psalter Accented' (1872); the 'Cathedral Psalter' (1875); the Psalters of Ouseley, Elvey, Gauntlett, Mercer, Doran and Nottingham, Heywood, and Sargent. [In recent years the 'Cathedral Psalter' and its larger counterpart 'The Cathedral Prayer-Book' have gained great popularity, but without entirely superseding the older books. In the 'St. Mary Abbott's Psalter' (Sampson Low) Mr. S. S. Higham introduced a method of indicating the 'pointing' by miniature musical notes placed over the syllables.] Among these various publications there reigned an entire discrepancy as to the mode of distributing the words. Beyond the division of the verse into two parts given in the Psalms and Canticles of the Prayer-Book, no pointing or arrangement of the words to the notes of the chant has ever been put forward by authority in the Anglican Church, or even widely accepted. Each of the editors mentioned has therefore followed his own judgment, and the methods employed vary from the strictest syllabic arrangement to the freest attempt to make the musical accent and expression agree with those which would be given in reading—which is certainly the point to aim at in all arrangements of words for chanting, as far as consistent with fitness and common sense. [References should be made to Heywood's 'Art of Chanting' and Pott's 'Free Rhythm Psalter.'] T. H.

CHANTERELLE, a French term for the upper or E string of the violin—that on which the melody is usually *sung*. G.

CHAPEAU CHINOIS. [CHINESE PAVILION.]

CHAPELLE, originally the musicians of a chapel, and now extended to mean the choir or the orchestra, or both, of a church or chapel or other musical establishment, sacred or secular. The maître de chapelle is the director of the music. In German the word Kapelle or Capelle is used more exclusively for the private orchestra of a prince or other great personage, and the Capellmeister is the conductor or director. Cappella pontificale is the term for the whole body of singers in the Pope's service, the cantatori cappellani, the cantatori apostolici, and the cantatori pontificali.

The word 'cappella' is said to be derived from the *cape* of S. Martin, on which solemn oaths used to be taken. Thence it came to mean the building containing the cape, and thence the musicians, also the vestments, and the vessels of the building. G.

CHAPELS ROYAL. Bodies of clergy and lay-clerks who minister at the courts of Christian monarchs; and also the places in which they worship. There are several in England—viz., at St. James's Palace, Whitehall, and St. George's, Windsor, etc. From the *Liber Niger Domus Regis* (1461), the earliest known record on the subject, we learn that in Edward IV.'s reign there was a well-established Chapel Royal, consisting of a dean; a confessor to the household; twenty-four chaplains and clerks variously qualified—by skill in descant, eloquence in reading, and ability in organ-playing; two epistlers, ex-chorister-boys; eight children; a master of the grammar school; and a master of the children, or master of song.

The term Chapel Royal is now usually applied to that at St. James's Palace. The chapel is between the Colour Court and the Ambassadors' Court. The establishment consists of the Dean, the Lord High Almoner; the Clerk of the Closet, and two deputies; the sub-dean; forty-eight chaplains; eight priests in ordinary, a master of the children; one lay composer; one lay organist and chapel-master or choir-master; eight lay gentlemen and ten boys; one sergeant of the vestry; one groom of ditto; and other attendants.

The service is a full choral one, at 10 A.M., 12 noon, and 5.30 P.M. on Sundays, and at 11 A.M. on feast-days. The boys are educated at the cost of the chapel, and as a rule sing there only. The chief musical posts of the establishment are at present held as follows:—Sub-Dean Rev. Edgar Sheppard, D.D., C.V.O.; Master of the Children, C. R. Selfe, B.A.; Composer, Organist, and Choir-master, Walter Alcock, appointed 1902.

The Chapel Royal at WHITEHALL (Banqueting House) was under the same chief officers as St. James's—but was latterly attended only once a year by the choir of that establishment in the special service of Maundy Thursday, on the afternoon of Thursday in Holy Week, when gifts called 'Benevolences' were distributed by the Lord High Almoner to certain poor people, as many in number as the sovereign is years old. The ceremony was a relic of a service which included washing the feet of the poor, of the same nature with that performed by the Pope on the same day.

The following special anthems were formerly sung in the course of the service: 'Hide not Thou Thy face from us, O Lord' (Farrant); 'Prevent us, O Lord' (Byrd); 'Call to remembrance, O Lord' (Farrant); 'O praise the Lord, all ye heathen' (Croft). [There is a quaint

etched view of the Chapel Royal at Whitehall prefixed to John Weldon's 'Six Select Anthems for one Voice,' published by Walsh & Hare, *circa* 1720, folio. It is especially curious as giving record of the musical instruments then in use there; which comprise violins, lutes, bassoons, hautboys, etc. F. K.] The Chapel Royal of the SAVOY (Strand) is a Chapel Royal in name only. The appointment of minister is in the gift of the Duchy of Lancaster, and the service is dependent on the taste or ability of the minister, as in any other ordinary chapel. T. H.

CHAPPELL & CO. This musical firm commenced business in January 1812, at 124 New Bond Street, previously tenanted by Goulding, D'Almaine, & Co. The firm consisted of Samuel Chappell, John Baptist Cramer, and Francis Tatton Latour. At the expiration of seven years, J. B. Cramer retired, Chappell & Co. having previously removed to a nearly opposite house, 50 New Bond Street. The first partnership is noticeable for the establishment of the Philharmonic Society, all the business arrangements for which were made at No. 124. At the end of the second term of partnership (1826), Latour withdrew, and carried on a separate business until 1830, when he sold it to his former partner. [In 1829 Samuel Chappell was in partnership with G. Longman and Bates, who had been musical instrument-makers at 6 Ludgate Hill in 1824.—F. K.] Samuel Chappell died December 1834, and the business was then carried on for the widow by her sons,—William, the eldest, being twenty-five years old. [He was born in London, Nov. 20, 1809, and died there August 20, 1888.] Desiring to propagate a knowledge of the music of the Madrigalian era, William (in 1840) projected the Musical Antiquarian Society, which held its meetings and rehearsals at No. 50. He edited Dowland's songs for the Society, and also edited and published (1838-40) a 'Collection of National English Airs,' giving their pedigrees and the anecdotes connected with them, with an essay on minstrelsy in England. This was afterwards expanded into his 'Popular Music of the Olden Time' (2 vols. 1855-59). [This standard book was afterwards recast, and published in 2 vols. under the editorship of Professor H. E. Wooldridge, in 1893. W. Chappell projected a general history of music, and the first volume was published in 1874.] The business was greatly extended by Thomas Patey Chappell, under a family arrangement by which his elder brother left, and bought the half of the business carried on under the name of Cramer & Co., with the late T. F. Beale as his partner. It was under Thos. Chappell's management that the great extension of the buildings took place, and he was the projector of the Monday Popular Concerts, and the Saturday Popular Concerts which sprang out of them, both of which have owed their success in great measure to the management of S. Arthur Chappell, the younger brother. T. P. Chappell died in London, June 1, 1902. [POPULAR CONCERTS.] A large concert-room had been much wanted at the west end of London, and St. James's Hall was projected and carried out mainly by the Chappells. [SAINT JAMES'S HALL.]

[The piano factory of Chappell & Co. is in Chalk Farm Road. Under the guidance of the late Mr. E. Glandt, who was their piano constructor, their instruments have largely gained in favour and commensurate sale. They have successfully entered the lists of concert grand manufacturers. The firm became a limited company in December 1896. Mr. Thomas Chappell was succeeded by his son, Mr. T. Stanley Chappell, as the chairman of the company of which Mr. William Boosey is the managing director. A. J. H.] W. C.

CHAPPINGTON, JOHN, built an organ in 1597 for Magdalen College, Oxford. He was born at South Molton, Devon, and died at Winchester, June 27–July 4, 1606; he was buried at Wells Cathedral (Wills, Somerset House; 62 Stafford).

CHAPPLE, SAMUEL, was born at Crediton, in 1775. Whilst an infant he was deprived of sight by small-pox. At an early age he commenced the study of the violin, and when about fifteen was taught the pianoforte by a master named Eames, who had been a pupil of Thomas, a scholar of John Stanley—all blind men. In 1795 he was appointed organist of Ashburton, where he continued for upwards of forty years. He composed and published many anthems, songs, glees, and pianoforte sonatas. He died at Ashburton, Oct. 3, 1833. W. H. H.

CHARACTERISTIC. This term is sometimes applied to music which is designed as the expression of some special sentiment or circumstance. Thus in vocal music, if the melody is appropriate to the words, we may speak of the 'characteristic setting of the text.' In instrumental music, also, the word may be used where what is known as 'local colouring' is introduced; *e.g.* the 'Ranz des vaches' movement in Rossini's overture to 'Guillaume Tell' might be properly described as 'characteristic.' The term is also occasionally applied to programme music. Beethoven's sonata 'Les Adieux,' etc., is frequently entitled the 'Sonata Caractéristique,' though it does not appear that the title was given by the composer. He has, however, himself used it for the overture 'Leonora No. 1,' published as op. 138. (See Nottebohm's *Them. Verz.*) Spohr's Fourth Symphony is entitled 'Die Weihe der Töne; charakteristisches Tongemälde,' etc. E. P.

CHARD, GEORGE WILLIAM, Mus.D., was born at Winchester in 1765. He received his early musical education in the choir of St. Paul's under Robert Hudson, Mus.B. In 1787 he became lay clerk and assistant organist of Win-

GUSTAVE CHARPENTIER

chester Cathedral, and in 1802 was appointed organist. [His appointment to Winchester College seems not to have taken place till 1832. He was also organist of St. Maurice with St. Mary Kalender Church, Winchester. He was famous as a trainer of boys' voices (West's *Cath. Org.*)] In 1812 he took the degree of Doctor of Music at Cambridge. He composed some church music and other sacred pieces, some of which have been published, and some songs and glees; of the latter he published 'Twelve Glees, for three, four, and five voices.' He died May 23, 1849, aged eighty-four, and was buried in the cloisters of Winchester College Chapel. W. H. H.

CHARITY CHILDREN, MEETING AT ST. PAUL'S. A festival service attended by the children of the old charity schools of the metropolis, was held annually in June under the dome of St. Paul's Cathedral, the children taking a prominent part in the singing. The first of these festivals was held in 1704, on the Thursday in Whitsun-week, at St. Andrew's Holborn; the second in 1705 at St. Sepulchre's, where the service took place until 1738, when it was held at Christ Church, Newgate St., and was continued there until 1801. In that year the children met at the cathedral, where the services were subsequently held, except in 1860 when the cathedral was under repair and the schools assembled on the Handel orchestra at the Crystal Palace. On April 23, 1789, the children met at St. Paul's, when George the Third went in state to return thanks for his restoration to health; and, earlier still, on July 7, 1713, at the thanksgiving for the Peace of Utrecht they were assembled in the streets. The effect of the music has been recorded by many eminent musicians, including Haydn, in whose memorandum book in the Conservatoire at Vienna there is a note on the service, quoting Jones's double chant (Pohl's *Haydn in London*, p. 212), and Berlioz, who was present in 1851 ('Soirées de l'Orchestre,' No. 21). The number of the children varied, but was generally between 5000 and 6000; they were arranged in an amphitheatre constructed for the occasion under the dome. The service, which included the Hallelujah Chorus, was accompanied by the organ, trumpets, and drums. Up to 1863 the 113th Psalm had been sung before the sermon, but in that year Mendelssohn's 'Sleepers, wake' was substituted for it. In 1865 Sir John Goss wrote a unison setting of the 'Te Deum,' which took the place of Boyce in A, and in 1866 he wrote a 'Jubilate' in the same form. Among the conductors have been Mr. Bates, Mr. H. Buckland, and Mr. Shoubridge. [The last festival service was held in June 1877, after which the custom was discontinued.] C. M.

CHARLES THE SECOND. An English opera in two acts; the words by Desmond Ryan, the music by Macfarren. Produced at the Princess's Theatre, London, Oct. 27, 1849. G.

CHARPENTIER, GUSTAVE, French composer, born at Dieuze (Alsace-Lorraine), June 25, 1860, was at school at Tourcoing, where his parents took up their residence after the Franco-German war. At the age of fifteen he was put into business for two years, but was admitted into the Lille Conservatoire, and having carried off many prizes then entered the Paris Conservatoire in 1881. A pupil of Massart for violin, he was afterwards in Pessard's class for harmony, competing twice for prizes without success. In 1885 he entered Massenet's composition class, and in 1887 won the grand prix de Rome, with his 'scène lyrique,' 'Didon,' first performed at one of the séances of the Institut, and afterwards at a Colonne Concert and at Brussels. Among the works composed at Rome were the orchestral suite, 'Impressions d'Italie,' which rapidly became famous, and was heard at the leading centres of symphonic music; and 'La Vie du Poète,' a 'symphonie-drama' in four movements for orchestra, soli, and chorus, set to words of his own. His latest works include 'Fleurs du Mal,' set to Baudelaire's poems, some with chorus; 'Quinze poèmes chantés,' some with chorus; a second orchestral suite (1894); 'Sérénade à Watteau' (performed in the Luxembourg Gardens, Nov. 9, 1896); 'Impressions fausses,' voices and orchestra; 'Orphée' in four acts, 'Tête rouge,' 'La Couronnement de la Muse,' etc., not yet performed.

Charpentier's most important work is the 'roman musical' of 'Louise,' in four acts, produced at the Opéra Comique in Paris, Feb. 2, 1900, and since then on all the most important continental stages; the independence and novelty of this work has made it one of the most noteworthy of modern French operas. The poetic instinct, the exact observation of character, the art of contrast, and the balance of proportion, are marked features of the libretto, which is by Charpentier himself; the orchestral writing and the treatment of the voices are alike skilful in the highest degree, and show consummate musical taste throughout. G. F.

CHARPENTIER, MARC-ANTOINE, was born in Paris, 1634. He went to Italy while still young, and studied music under Carissimi in Rome for some years. On his return to France Louis XIV. appointed him maître de chapelle to the Dauphin, a position afterwards held by Lulli. Charpentier then entered the household of Mademoiselle de Guise as maître de musique; and later on gave lessons in composition to the Duc d'Orléans, Regent of France, and became his Intendant de musique. He was appointed maître de musique to the Collège and to the Maison-professe of the Jesuits in Paris, and soon afterwards to the Sainte-Chapelle, where he remained till his death in March 1702, and where he was buried.

Although working in Paris at a time when all operatic composers were more or less overshadowed by Lulli's influence and capacity,

Charpentier's musical ability was generally recognised, and he was considered a more learned and cultivated musician than Lulli. His opera 'Médée' has genuine touches of dramatic feeling, and makes an effort to break new ground; that it did not lead to any great result shows how impossible it was to breathe fresh life into the then existing forms of music. He obviously found it difficult to follow a definite dramatic development; irrelevant matter is frequently introduced in 'Médée'; the opening prologue, quite unconnected with the Greek tragedy following, consists of dances, songs in praise of Louis XIV., etc., while later on, an Italian love-song is suddenly dropped into the middle of the dramatic action. The structure is much the same as in the operas of Lulli, but the music, on the whole, of finer quality, the declamatory passages being better modelled and more melodious without losing their oratorical effect. That he was a great admirer of Italian composers, especially of Carissimi, explains the good style and melodiousness of his vocal writing. In the treatment of the instruments there is a great deal more careful work, both in accompaniments and independent movements, than in Lulli's operas, and more genuine feeling for instrumental style and effect (Parry, *Oxford Hist., 17th Century Music*).

'Médée,' tragédie lyrique, in five acts and a prologue, the words by Thomas Corneille, was performed in Paris, Dec. 4, 1693, by the members of the Académie royale de musique; but although it had 'un grand succès,' was never repeated. The principal parts were taken by Mademoiselle le Rochois (Médée), Mademoiselle Moreau (Créuse), M. Dun (Créon), and M. Du Mesny (Jason).

A folio edition was published, 'Médée tragédie mise en musique par Monsieur Charpentier. A Paris, par Christophe Ballard, 1694' (in the British Museum), and another edition in 1704 (in the Berlin Royal Library). Charpentier is said to have composed seventeen operas. A large number of his MS. compositions are in the Paris Conservatoire Library, and in the Bibliothèque Nationale. List of works:—

1. Molière's play 'Le mariage forcé,' comédie-ballet en 3 actes, set to music by Lulli, was revived (with 'La Comtesse d'Escarbagnas') at the Palais Royal, July 8, 1672, with music by Charpentier.
2. La musique du 'Malade Imaginaire,' comédie-ballet en 3 actes de Molière, produced at the Palais Royal, Feb. 10, 1673. The fragments of this work have been completed and published by M. C. Saint-Saëns.
3. 'Circé,' tragédie, précédée d'un prologue par M. Corneille de l'Isle; the music to the 'Intermèdes' by Charpentier. First performed at the Théâtre de Guénégaud, March 17, 1675. More than thirty performances were given. In 'Nouvelles parodies bachiques,' vol. iii. Paris, 1702, p. 101, are the following airs from 'Circé.' Prologue: premier menuet, l'air 'Tout rit dans ce bocage,' l'air 'Les plaisirs suivent les peines,' 1er acte: l'air 'Je fais ma félicité,' 4ème acte: première loure, seconde loure, prélude des vents, menuet des Néréides.
4. 'L'Inconnu,' comédie en 6 actes de M. Corneille de l'Isle et de M. Visé; mêlées d'ornemens de musique par Charpentier. First performed at the Théâtre de Guénégaud, Nov. 17, 1675. (In 'La Clef des Chansonniers,' 1717, ii. 226, is 'L'air de la Sarabande de l'Inconnu').
5. 'Les amours d'Acis et Galatée,' opéra, représentée chez M. de Rians, procureur du roi au Châtelet, in Jan. 1678.
6. 'Les fous divertissans,' comédie en 3 actes, avec trois divertissements par M. Raymond Poisson. First performed at the Théâtre de Guénégaud, Nov. 14, 1680.
7. Les airs de danse et les divertissements de la 'Pierre Philosophale,' comédie en 5 actes, de M. Corneille de l'Isle et de M. Visé. Given at the Théâtre de Guénégaud on Feb. 23 and 25, 1681.
8. 'Endimion,' tragédie. First performance on July 22, 1681.
9. 'Les amours de Vénus et d'Adonis,' tragédie de Visé, was revived Sept. 3, 1685, with the addition of 'divertissements et danses,' composed by Charpentier; six performances were given.
10. Médée, 1693.
11. 'La sérénade,' comédie en 1 acte de M. Regnard. Performed on July 8, 1694.
12. 'Philomèle,' un opéra, was performed three times at the Palais Royal. It was said that the Duc d'Orléans, who had some share in the composition of the opera, would not allow it to be published.
13. 'Jonathas,' opéra, performed by the actors of the Académie royale de musique at the theatre of the Maison-professe des Jésuites in Paris.
14. Pastorales: Le sort d'Andromède (c. 1670); Les arts florissans (c. 1673); Le retour du printems, idylle sur la convalescence du roi (c. 1680); La noce de village (1682); Le jugement de Pan (c. 1690); Le fête de Ruel (c. 1690); Actéon (c. 1680); Les plaisirs de Versailles (c. 1695); La couronne de fleurs; Flore (an 'air de Flore' is given in 'La clef des chansonniers,' 1717, vol. i. p. 168); Dialogue de Vénus et Médor.
15. Prologues: pour les tragédies 'Polyeucte,' 1680, and 'Andromède,' 1682.
16. Plusieurs airs à boire et sur des sujets plaisans à 2, 3, et 4 parties.
17. Air nouveau: 'Quoy, rien ne vous peut arrester,' air: 'En vain, rivaux assidus' (published in 'Le Nouveau Mercure Galant,' de l'an 1678).
18. Chanson à danser, 'Celle qui fait tout mon tourment' with the basse continue, published in the 'Recueil d'airs sérieux et à boire de différents autheurs, pour l'année 1695.'
19. Lamentation sur la mort de la reine Marie-Thérèse.
20. David et Jonathan, 1689.
21. 'L'enfant prodigue,' oratorio.
22. Le reniement de S. Pierre.
23. Dialogus inter Christum et peccatores.
24. 'Le sacrifice d'Abraham.' oratorio.
25. Des motets (mêlés de symphonies): some were published in 1709 (Paris, 4to).
26. Quelques tragédies spirituelles représentées au Collège des Jésuites.

Eitner (*Quellen-Lexikon*) mentions twenty-eight folio MS. volumes of Mélanges in the Bibliothèque Nationale, containing masses for 2, 4, 5, 6, and 8 voices; a mass for 4 choirs; requiem mass for 4 voices; thirty Psalms for 3, 4, 5, and 6 voices with orchestra; Lamentations of Jeremiah for 1, 2, and 4 voices with orchestra; Pastorale sur la naissance de Jésus Christ; more than sixty motets from the oratorios: S. Cecilia, Cædes SS. Innocentium, Filius Prodigus, Esther, Extremum Dei Judicium, Joshua, Judith, Judicium Salomonis, Mors Saulis et Jonathæ, Prœlium Michaelis cum Dracone, Sacrificium Abramæ.

M. Brenet finishes the list with a comprehensive 'Cantatas, overtures, preludes, symphonies for a procession, Concert for 4 viols, and much else.'

In view of the amount Charpentier seems to have written, it is satisfactory to learn from a German biographer (Walther, 1732) that he was especially praised for the way in which he set Latin words to appropriate sounds.

The opinion of his own time may be illustrated by the warm and naïve remarks in *Le Nouveau Mercure Galant*, 1678: 'Je prétens que vous me ferez un fort grand remerciement de cet air ("Quoy rien ne peut"), puisqu'il est de Mr. Charpentier, fameux par mille ouvrages, qui ont esté le charme de toute la France, et entr'autres, par l'air des "Maures" du "Malade Imaginaire," et par tous ceux de "Circé" et de "l'Inconnu." Il y a eu icy ce Carnaval plusieurs sortes de Divertissements, mais un des plus grands que nous ayons eus, a esté un petit Opéra intitulé "les Amours d'Acis et Galatée" dont M. de Rians, Procureur du Roy de l'ancien Chastelet, a donné plusieurs représentations dans son Hostel, avec sa magnificence ordinaire. L'Assemblée a esté chaque fois de plus de quatre cens Auditeurs, parmy lesquels plusieurs Personnes de la plus haute qualité ont quelquefois eu peine à trouver place.

'Tous ceux qui chantèrent et jouèrent des Instrumens, furent extrêmement applaudis. La musique estoit de la composition de Mr. Charpentier dont je vous ay déjà fait voir deux airs ("Quoy rien" and "En vain"). Ainsi vous en connoissez l'heureux talent par vous-mesme.

Madame de Beauvais, Madame de Boucherat, Monsieurs les Marquis de Sable et de Biran, Mr. Deniel, Monsieur de Sainte Colombe si célèbre pour la Viole, et quantité d'autres qui entendent parfaitement toute la finesse du Chant, ont esté des admirateurs de cet Opéra.'

It is curious that De La Borde in his 'Essai sur la musique,' Paris, 1780, in giving the same information about the play, should have said, '*les paroles* étaient de Mesdames de Beauvais, et de Boucherat, et de MM. de Sablé, de Biran, de Niel et de Sainte Colombe si célèbre sur la Viole.' C. S.

CHARTON-DEMEUR. See DEMEUR.

CHATTERTON, JOHN BALSIR, eminent harpist, born at Norwich about 1802, studied under Bochsa and Labarre; first appeared at a concert of Aspull's in 1824, succeeded Bochsa as professor of the harp at the Royal Academy, and in 1842 was appointed harpist to the Queen. He retained both appointments till his death, which took place in London, April 9, 1871. Chatterton wrote much for the harp, chiefly operatic selections. M. C. C.

CHAUNTER. The highest pipe of the bagpipe, from which the 'chaunt' or melody is produced, as opposed to the drones, which each speak only to a single note. [BAGPIPE.] W. H. S.

CHAUSSON, ERNEST, born in Paris, 1855, died, from a bicycle accident, at Limay, July 10, 1899. Was a pupil of César Franck, from whom he received the traditions of his solid structural style, of his rare simplicity of accentuation, of his refined methods of expression, qualities which were enhanced by his delicate, sensitive nature, which was prone to a gentle melancholy. It was especially in instrumental works and chamber music that his talent was manifested, though everything he wrote reveals an individuality becoming ever stronger and stronger. A two-act lyrical drama, 'Hélène,' incidental music for Shakespeare's 'Tempest,' 'La Légende de Sainte-Cécile,' a lyrical drama in three acts for soprano and female chorus, and 'Le Roi Arthus,' in three acts, to a libretto of his own (produced Théâtre de la Monnaie, Brussels, Nov. 30, 1903), represent his work for the stage. His orchestral compositions include a prelude, 'La Mort de Cœlio' (from Musset's *Caprices de Marianne*), (1885); three symphonic poems, 'Solitude dans les bois' (1886), 'Viviane' (1888), and 'Soir de fête' (1898); a symphony in B♭ (1891); a 'poème' for violin and orchestra; and several vocal works with orchestra, 'La Caravane' (1888), 'Le Poème de l'Amour et de la Mer' (1892), 'Chanson perpétuelle,' 'Hymne védique,' 'Jeanne d'Arc,' etc. Chausson wrote some church music, many songs of rare attraction; solos for piano and organ; choruses; and chamber works, including a so-called 'Concert' for piano, violin, and string quartet; a trio in G minor; a quartet in A for piano and strings; and a string quartet, unfinished.

For some ten years Chausson acted as secretary to the 'Société Nationale de Musique,' of which he was one of the most ardent promoters. G. F.

CHAUVET, CHARLES ALEXIS, distinguished French organist, born at Marines (Seine-et-Oise), June 7, 1837. A pupil of the Paris Conservatoire from 1850, in Benoist's organ class, and that of Ambroise Thomas for composition, he won the first organ prize in 1860; and in 1869, having filled various posts as organist, he was appointed to the new organ of the Trinité in Paris. Soon after this, on Jan. 28, 1871, at Argentan, a premature death deprived the world of his brilliant talents. He left many works for organ, and for piano, which show much refinement of style, and elegiac charm. G. F.

CHECK (Fr. *L'Attrape*, *La Chaise*; Ital. *Ribatto* or *Paramartello*; Ger. *Fänger*), an important member in the action of a grand pianoforte, consisting of an upright of thick wire, bearing an almost spade-shaped head of leather or some light wood covered with leather. It is fixed in the back part of the key behind the hammer, and its duty is to catch the hammer when it falls a certain distance away from the string, and hold it until it is released by the finger of the player allowing the key to rise. In upright pianofortes which now are always made with check actions the check is placed before the hammer, and a stud projecting from the butt of the hammer comes in contact with the check. [PIANOFORTE.] A. J. H.

CHEESE, GRIFFITH JAMES, born May 2, 1751, organist of Leominster in 1771, and subsequently organist and professor of the pianoforte in London, published 'Practical Rules for Playing and Teaching the Pianoforte and Organ, likewise useful Information to Teachers and Pupils born Blind,' op. 3, London, 1806. He died Nov. 10, 1804. W. H. H.

CHELARD, HIPPOLYTE ANDRÉ JEAN BAPTISTE, born Feb. 1, 1789, in Paris, son of a clarinettist at the Grand Opéra, was destined for the musical profession from his childhood, and studied at the Conservatoire from 1803 under R. Kreutzer for the violin, and Gossec, Méhul, and Cherubini for composition. Having won the 'Grand Prix' for composition in 1811 he went to Italy, and studied church music under Baini and Zingarelli in Rome, and dramatic music under Paisiello and Fioravanti at Naples. He produced his first work, a comic opera, 'La casa da vendere,' at Naples in 1815. On his return to Paris in 1816 he became a violinist at the Grand Opéra, and gave lessons, composing diligently at the same time. After infinite trouble his tragic opera of 'Macbeth' (libretto by Rouget de l'Isle) was produced at the Grand Opéra (June 29, 1827), but it was soon removed from the boards, and Chelard left Paris for Munich, where the success of 'Macbeth' was so decided, that the King of Bavaria made him his capellmeister. He returned to Paris in 1829,

produced an unsuccessful opera 'La table et le logement,' established a music business, and remained there till the Revolution of 1830 drove him back to Munich to become widely known as a composer and leader. 'Der Student' and 'Mitternacht' won much success there. In 1831 he led the Thuringian Festival at Erfurt. In 1832 and 1833 he was in London conducting the German opera company, of which Schröder-Devrient and Haitzinger were members.[1] In 1835 his best work, 'Die Hermannschlacht,' a solid and carefully written work in the German style, was given in Munich; in 1836 he was employed as theatre and concert director at Augsburg, and in 1840 succeeded Hummel as court capellmeister at Weimar. Here two more operas were brought out, 'Der Scheibentoni' (1842) and 'Der Seekadett' (1844). One of the events of this time was the arrival of Berlioz in 1843; and it is pleasant to remember that it was Chelard who urged the eccentric Frenchman to visit Mendelssohn at Leipzig, and 'made him blush' at the suggestion that his old friend would probably not be glad to see him. (*Voyage musicale*, Lettre 4.) He was succeeded by Liszt in 1852, and for two years went to live in Paris, returning to Weimar in 1854, where he died Feb. 12, 1861. A posthumous opera, 'L' Aquila Romana,' was given in Milan in 1864. His operas, though full of merit, and effective in their day, are no longer performed; the overture to 'Macbeth' alone is occasionally heard at concerts. While he clung to the style of French romantic opera, he strove somewhat ostentatiously to adopt that of the German school. But he wanted the power to enable him to weld these conflicting elements into a harmonious whole. A. M. [with additions from Riemann's *Lexikon.*]

[1] Fétis says that Malibran sang in his 'Student' in 1834.

CHELL, WILLIAM, Mus.B., successively lay vicar, prebendary (from 1532) and precentor (from 1554) of Hereford Cathedral, graduated in music at Oxford in 1524. After the accession of Elizabeth in 1559 he was deprived of his appointments. He was the author of two works, entitled *Musicæ practicæ Compendium*, and *De Proportionibus Musicis*, but they appear to be merely copies of the treatises of John de Muris and Hothby. W. H. H.

CHERUBINI, MARIA LUIGI CARLO ZENOBIO SALVATORE, born in Florence, Sept. 14, 1760, son of a musician at the Pergola Theatre. His musical faculty was evident from the first. 'I began,' says he, in the Preface to his autograph Catalogue, 'to learn music at six, and composition at nine. The first from my father, the second from Bartolomeo and Alessandro Felici, and after their death from Bizzarri and J. Castrucci.' His first work was a Mass and Credo in D, for four voices and accompaniment, and by the time he was sixteen he had composed three Masses, two Dixits, a Magnificat, a Miserere, and a Te Deum, besides an Oratorio, three Cantatas, and other smaller works. In 1777 or 1778 the Grand Duke, afterwards the Emperor Leopold II., granted him an allowance that he might study under Sarti at Bologna. Thither Cherubini went, and there he remained for four years, thoroughly acquiring the old Italian contrapuntal style, and gaining that proficiency in polyphonic writing in which scarcely any composer since his time has equalled him. The compositions given in the Catalogue[1] under 1778 and 1779 are all Antiphons written on *Canti fermi, alla Palestrina.* With the early part of 1780, however, this stops. His first opera, 'Quinto Fabio,' was written during that summer and produced at Alessandria, and for the next fourteen years operas and dramatic music seem to have engaged almost his entire attention:—1782, 'Armida' (Florence), 'Adriano in Siria' (Leghorn), 'Il Messenzio' (Florence); 1783, 'Lo sposo di tre' (Venice); 1784, 'L' Idalide' (Florence), 'L' Alessandro nell' Indie' (Mantua). These operas must have made his name known all over Italy. In 1784 he was invited to London, and wrote 'La Finta Principessa' (1785), and 'Giulio Sabino' (1786), for the King's Theatre, but without success. He also made large additions to Paisiello's 'Marchese Tulipano,' and other operas then on the stage in London. He was much noticed by the Prince of Wales, and held the post of Composer to the King for one year. In July 1786 he left London for Paris, where he seems to have remained for the whole of the next year, very much fêted and liked. In the winter of 1787-88 he brought out his eleventh opera at Turin, 'Ifigenia in Aulide.' He then returned to Paris, which from that time became his home. His first opera in Paris was 'Démophon,' to Marmontel's libretto, Dec. 5, 1788. In this opera he broke loose from the light and trivial vein of the Neapolitan school, and laid the foundation of the grand style which he himself afterwards so fully developed. Meanwhile he was fully employed. Léonard, Marie Antoinette's coiffeur, had obtained permission to found an Italian Opera, and Cherubini received the entire musical direction of it. During the years 1789-92, he conducted the so-called 'Bouffons' at the Théâtre de la Foire St. Germain, in operas of Anfossi, Paisiello, Cimarosa, and other Italians, besides writing a great number of separate pieces in the same style for insertion into these works. At the same time he was eagerly pushing on in the path opened by 'Démophon.' 'Marguérite d'Anjou' was produced in 1790, and on July 18, 1791, he brought out 'Lodoïska,' a decided step in advance. The effect produced by his new style,

[1] The Catalogue referred to here and elsewhere in this article was compiled by Cherubini himself, with an interesting Preface, and published after his death by Bottée de Toulmon, under the title of 'Notice des manuscrits autographes de la musique composée par feu M. L. C. Z. S. Cherubini, Paris, chez les principaux Éditeurs de musique,' 1843. It has been reprinted by Mr. Bellasis in his *Memorials.* [A still more complete catalogue is in the *Quellen-Lexikon.*]

MARIA LUIGI CARLO ZENOBI SALVATORE CHERUBINI

with its unusual harmonic combinations and instrumental effects, was both startling and brilliant, and took the composers of the day completely by surprise. 'Lodoïska' was followed by a series of operas in which he advanced still farther. 'Koukourgi' (1793) remained in MS. to be afterwards adapted to 'Ali Baba'; but 'Elisa' (Dec. 13, 1794), 'Médée' (March 13, 1797), 'L'Hôtellerie Portugaise' (July 25, 1798), 'La Punition,' and 'La Prisonnière' (1799), 'Les deux Journées' (Jan. 16, 1800), known in Germany as 'Der Wasserträger,' as well as a number of small one-act works, such as 'L'Épicure' (1800), 'Anacréon' (1803), and 'Achille à Scyros' (1804), both ballet-operas and both masterpieces, show how unceasing was his activity, and how much he must have pleased the opera-goers. But though successful with the public, his pecuniary position was anything but satisfactory. When the 'Conservatoire de Musique' was founded in 1795, he was appointed one of the three 'Inspecteurs des Études,' an appointment by no means commensurate with his genius and artistic position, chiefly no doubt because of Napoleon's dislike to him, a dislike which the Emperor took no pains to conceal. Cherubini's nature, at all times grave, not to say gloomy, became visibly depressed under these circumstances, and he began to lose all pleasure in his profession. In 1795 he married Mlle. Cécile Tourette, a step not likely to diminish his anxieties. He therefore willingly accepted an offer to write an opera for the Imperial Theatre at Vienna, where he arrived early in July 1805. Here he made acquaintance with Beethoven, whose deafness was not then so great as to be an obstacle to conversation, and the two were often together. Beethoven esteemed Cherubini above all the then living writers for the stage, and his vocal music was much influenced by him. What Cherubini thought of Beethoven's music is not so clear. He was present at the first performances of 'Fidelio,' but beyond his remarks that no one could tell what key the overture was in, and that Beethoven had not sufficiently studied writing for the voice, nothing is known. 'Il était toujours brusque,' was his one answer to inquiries as to Beethoven's personal characteristics. (See Schindler's *Beethoven*, i. 118, also p. 241 of this volume.)

The 'Wasserträger' was performed shortly after Cherubini's arrival, and 'Faniska' produced Feb. 25, 1806. But it was a poor time for operas in Vienna. The war between Austria and France broke out immediately after his arrival; Vienna was taken on Nov. 13, and Cherubini was soon called upon to organise and conduct Napoleon's *soirées* at Schönbrunn. But his main object at Vienna was frustrated, and he returned to France. His mind became so much embittered as to affect his health. Whilst living in retirement at the château of the Prince de Chimay, his friends entreated him to write some sacred music for the consecration of a church there; for a long time he refused, but at last set to work secretly, and surprised them with the Mass in F for three voices and orchestra (1809). With this work a new epoch opens. It is true that both in 1809 and 1810 we find operas ('Pimmalione,' Nov. 30, 1809, 'Le Crescendo,' Sept. 1, 1810), that in 1813 he wrote the 'Abencérages,' and even so late as 1833, 'Ali Baba,' but the fact remains that after 1809 sacred music was Cherubini's main occupation. Besides a number of smaller sacred pieces for one, two, three, or more voices, with orchestra, organ, or quartet, the Catalogue contains four masses, in F, D minor, A flat, and the 'Messe Solennelle' in C (March 14, 1816), 'Messe des Morts' (Requiem) in C minor (1817), the 'Messe Solennelle' in E (1818); that in G, and a 'Kyrie' (both 1819); that in B♭ (Nov. 1821); a 'Kyrie' in C minor (Sept. 13, 1823); the Coronation Mass for three voices (April 29, 1825); and lastly the 'Requiem' in D for men's voices (Sept. 24, 1836).

During the hundred days Napoleon made him Chevalier of the Legion of Honour; and shortly after, under Louis XVIII., he was elected member of the Institut, and in 1816 was appointed jointly with Lesueur 'musician and superintendent of the King's Chapel,' with a salary of 3000 francs. Thus almost at once did honour, position, and income, all fall upon him. In 1822 he became Director of the Conservatoire, and the energy which he threw into his new work is shown by the *Solfèges pour l'examen de l'École*, which fill the Catalogue during the next few years, and by the *Cours de Contrepoint et de la Fugue*, which was published in 1835. [It was largely the work of Halévy.] Nor are these years barren in instrumental works. In 1815 the Philharmonic Society, then recently formed, offered him the sum of £200 for a symphony, an overture, and a vocal piece, and at their invitation he paid a second visit to London. He arrived in March; the Symphony (in D) was finished on April 24, and played on May 1. It was afterwards (in 1829) scored as a quartet. The overture was performed at the concert of April 3, and another MS. overture on May 29. In addition to these the Catalogue shows a Funeral March for full orchestra (March 1820); a march for 'Faniska' (May 15, 1831); six string quartets, viz. in E♭ (1814), in C, from the Symphony, with a new Adagio (1829), in D (July 31, 1834), in E (Feb. 12, 1835), in F (June 28, 1836), in A minor (July 22, 1837); and a string quintet in E minor (Oct. 28, 1837). Cherubini died on March 15, 1842, highly honoured and esteemed. In addition to the works above mentioned he wrote several operas in conjunction with other composers, such as 'Bayard à Mézières,' with Boieldieu, Catel, and Isouard, in 1814, and 'Blanche de Provence' in 1821, to celebrate the baptism of the Duc de

Bordeaux, with Boieldieu, Paer, Berton, and Kreutzer; also a great number of canons for two, three, or more voices. The catalogue contains in all 305 numbers, some of them very voluminous, besides a supplementary list of thirty works omitted by Cherubini, as well as eighteen volumes (some of them of more than 400 pages) of music by various Italian writers, copied out by the great composer himself, a practice which he admits having learned from his old master Sarti.

Cherubini's artistic career may be divided into three periods. The first, 1760-91, when he was writing motets and masses *à la* Palestrina, and operas in the light Neapolitan vein, may be called his Italian period. The second operatic period opens with 'Lodoïska,' though the beginning of the change is apparent in 'Démophon' (1788) in the form of the concerted pieces, in the entrances of the chorus, and the expressive treatment of the orchestra. 'Lodoïska,' however, shows an advance both in inspiration and expression. 'Médée' and 'Les deux Journées' form the climax of the operatic period. In the former the sternness of the characters, the mythological background, and above all the passion of Medea herself, must have seized his imagination, and inspired him with those poignant, almost overpowering accents of grief, jealousy, and hatred in which 'Médée' abounds. But it is impossible not to feel that the interest rests mainly in Medea, that there is a monotony in the sentiment, and that the soliloquies are tedious; in a word that in spite of all its force and truth the opera will never command the wide appreciation which the music as music deserves. The 'Deux Journées' forms a strong contrast to 'Médée,' and is a brilliant example of Cherubini's versatility. Here the sphere of action is purely human, simple, even plebeian, and it is impossible not to admire the art with which Cherubini has laid aside his severe style and adapted himself to the minor forms of the arietta and *couplet*, which are in keeping with the idyllic situations. The finales and other large movements are more concise, and therefore more within the range of the general public, and there is an ease about the melodies, and a warmth of feeling, not to be found elsewhere in Cherubini. This period closes with the 'Abencérages' in 1813, for 'Ali Baba,' though completed in 1833, was largely founded on 'Koukourgi' (1793), and 'Olimpiade,' to Metastasio's words, was incomplete. The third period, that of his sacred compositions, dates, properly speaking, from his appointment to the Chapelle Royale in 1816, though it may be said to have begun with the Mass in F (1809), which is important as being the first sacred work of his mature life, though it is inferior to that in A, and especially to the Requiem in D minor. The three-part writing in the Mass in F seems scarcely in keeping with the broad outlines of the work, and the fugues are dry and formal. That in A, also for three voices, is concise, vocal, and eminently melodious. The Requiem in C minor is at once his greatest and most famous work. The Credo for eight voices *a cappella* is an astonishing instance of command of counterpoint, and shows how thoroughly he had mastered the style of Palestrina, and how perfectly he could adapt it to his own individual thoughts. Technique apart, it ranks below his other great sacred works. It is probable that Cherubini intended it to be considered as a study, for only two numbers were published during his lifetime, viz. the concluding fugue 'Et vitam,' and an elaborately developed 'Ricercar' in eight parts with one chief subject and three counter-subjects, in which all imaginable devices of counterpoint are employed.

In estimating Cherubini's rank as a musician, it must be remembered that though he lived so long in Paris, and did so much for the development of French opera, he cannot be classed among French composers. His pure idealism, which resisted the faintest concession to beauty of sound as such, and subjugated the whole apparatus of musical representation to the idea; the serious, not to say dry, character of his melody, his epic calmness—never overpowered by circumstances, and even in the most passionate moments never exceeding the bounds of artistic moderation—these characteristics were hardly likely to make him popular with the French, especially during the excitement of the Revolution. His dramatic style was attractive from the novelty of the combinations, the truth of the dramatic expression, the rich harmony, the peculiar modulations and brilliant instrumentation, much of which he had in common with Gluck. But his influence on French opera was only temporary. No sooner did Boieldieu appear with his sweet pathetic melodies and delicate harmonies, and Auber with his piquant elegant style, than the severer muse of Cherubini, dwelling in a realm of purer thought, dropped her hold on the public. His closest tie with the French school arose from the external accident of his connection with the Conservatoire, where he had the formation of all the important French composers of the first half of the 19th century. It is in Germany that his works have met with the most enduring appreciation. His church music, 'Médée,' and the 'Deux Journées,' still keep their hold on the German public. One of the first things Mendelssohn did after he felt himself safe in the saddle at Düsseldorf was to revive the latter opera, and to introduce the Mass in C in the church. Six months later he brought forward one of the Requiems, and when he had to conduct the Cologne Festival in 1835 it was to Cherubini's MS. works that he turned for something new and good. A reference to the Index of the Leipzig *Allgem. musikalische*

Zeitung will show how widely and frequently his works are performed in Germany. In England, too, the operas just named were revived some years ago, and the opera-overtures are stock pieces at all the best concerts. Cherubini forms the link between classic idealism and modern romanticism. His power of making the longest and most elaborate movements clear is very remarkable, especially when combined with the extraordinary facility of his part-writing; while his sense of form was almost as perfect as Mozart's, though he cannot compare with Mozart in the intensity of his melodic expression, or in the individuality with which Mozart stamped his characters. In the technique of composition, and in his artistic conception and interpretation, he shows a certain affinity to Beethoven, more especially in his masses. His greatest gift was perhaps the power of exciting emotion. His style had a breadth and vigour free from mannerism and national peculiarities. It was in his sacred music that he was most free to develop his individuality, because he could combine the best points in his operas with masterly counterpoint. When we consider the then deplorable state of church music, it is difficult to exaggerate the importance of the change he wrought.

The most complete work on Cherubini is the biography by Edward Bellasis, *Cherubini: Memorials illustrative of his Life*, London, 1874; the preface to which contains a list of the principal authorities, including Cherubini's own Catalogue, of which the title has been already given in full. For personal traits and anecdotes —and in the case of Cherubini these are more than usually interesting and characteristic—the reader should consult Adolphe Adam's *Derniers souvenirs d'un musicien* (1859), the article in Fétis's *Biographie universelle*, and Berlioz's *Mémoires*, also an article by Ferdinand Hiller, which appeared in *Macmillan's Magazine*, July 1875, and afterwards in his *Musikalisches und Persönliches*, 1876. [Eight other biographical notices are mentioned in the *Quellen-Lexikon*.] His portrait by Ingres is in the gallery of the Louvre, Paris. He left one son and two daughters, the younger of whom was married to Hippolyte Rossellini of Florence. A. M.

CHEST OF VIOLS. A set of six viols, properly matched as to size, power, and colour, used for chamber performance. It usually consisted of two trebles, two tenors, and two basses: occasionally of two trebles, three tenors, and one bass, the bass being properly twice as long in the string as the treble. [See VIOLIN.] Sets of viols, thus duly proportioned, were often made by the old English makers. They were carefully fitted into a 'chest,' which seems to have been a shallow vertical press with double doors. Dr. Tudway, in a letter addressed to his son, printed in Hawkins (ch. 144), describes it as 'a large hutch, with several apartments and partitions in it, each partition was lined with green bays, to keep the instruments from being injured by the weather.' Hawkins quotes an advertisement, dated 1667, of two 'chests of viols' for sale, one made by John Rose in 1598, the other by Henry Smith in 1633. 'Both chests,' says the advertiser, probably referring to the instruments, but possibly to the hutches, 'are very curious work.' In a well-known passage in *Musick's Monument* (p. 245), Mace says of the 'Press for Instruments,' which forms a conspicuous part of the furniture of his elaborately designed music room, 'First see that it be conveniently large, to contain such a number as you shall design for your use, and to be made very close and warm, lyn'd through with bayes, etc., by which means your instruments will speak livelily, brisk and clear. . . . Your best provision, and most complete, will be a good chest of viols, six in number, viz. two basses, two tenors, and two trebles, all truly and proportionably suited. . . . Suppose you cannot procure an entire chest of viols, suitable, etc., then thus: endeavour to pick up, here or there, so many excellent good odd ones, as near suiting as you can, every way, viz. both for shape, wood, colour, etc., but especially for size.' Mace's Press for Instruments includes, besides the 'chest of viols,' a pair of violins, a pair of 'lusty full-sized theorboes,' and three 'lusty smart-speaking' lyra-viols, the whole constituting 'a ready entertainment for the greatest prince in the world.' The principle of the 'chest of viols' is found in the quartets and quintets of violins which were occasionally made by the Cremona makers. E. J. P.

CHEST-VOICE. That no voice is 'produced' throughout its extent in precisely the same manner, is certain. The results of the different manners of vocal 'production'—three in number—are sometimes spoken of in England as 'chest-voice,' 'head-voice,' and 'falsetto.' The classification and terminology adopted by the French, viz. 'first, second, and third registers,' are however much to be preferred, since the causes of the variety of *timbre* they indicate, of which little is known, are left by them unassumed. The average compass of each vocal register is perhaps naturally an octave; but the facility with which the mode of production natural to one register can be extended to the sounds of another renders this uncertain. By 'chest-voice' is commonly understood the lowest sounds of a voice, and any others that can be produced in the same manner; in other words, the 'first register.' See SINGING. J. H.

CHESTER MUSICAL FESTIVAL. The first Festival was held June 16, 17, and 18, 1772, under the management of Mr. Orme, the Cathedral organist, with Dr. William Hayes as conductor. The *Chester Courant* for June 23 of that year says:—

'On Tuesday, Thursday & Friday last, were

performed in the Broad Isle of the Cathedral, the celebrated Oratorios of "MESSIAH," "SAMSON," and "JUDAS MACCHABAEUS," before a most polite and numerous audience. The several performers filled their respective Departments with spirit and execution; and the amazing powers of the two Miss Linleys conspired to render the Entertainment so great and excellent as can be expected, or ever was produced from the human voice.

'On Wednesday Evening a Concert of Select Musick was performed in the Exchange Hall, where amongst other very capital pieces, Mr. Linley, Junr., distinguished himself as one of the greatest masters of the Violin which this nation has produced.'

A masked Ball was held at the Exchange, on the Thursday night, and was conducted 'with the greatest elegance and decorum.' Although apparently successful, it is remarkable that this Festival of 1772 is not mentioned in any work on Chester, and so completely had the memory of it died out, that a correspondent writing to the *Chester Chronicle*, Oct. 5, 1821, states that from all the information he had been able to collect, 'the First General Festival of Oratorio Music was held in 1783.' This, as we have seen, is erroneous, and the Festival of Sept. 16 to 19, 1783, was the second held in Chester. The committee, encouraged by past experience, extended the festivities, and the following exhausting programme was gone through: 'Messiah,' 'Jephtha,' 'Judas Maccabeus' (in the Cathedral); 'Acis and Galatea,' and a miscellaneous concert in the County Hall, as well as Assembly Balls on Tuesday, Thursday, and Friday evenings; a Fancy Dress Ball on Wednesday evening; and a Public Breakfast (with Catches and Glees) on Saturday morning. The musical portion was directed by Mr. Knyvett, and led by Mr. Cramer; and amongst the performers were Kotzwara (the composer of 'The Battle of Prague'); John Ashley (the celebrated bassoon player); and Crosdill, the violoncellist.

Some idea of making the festival triennial now began to manifest itself, and the third meeting was held Sept. 1786, with the same number of Concerts, Cathedral Performances, Public Balls, etc. The Oratorios given were 'Messiah' and 'Joshua,' and the Handel Festival Selection, as performed in Westminster Abbey at the Great Celebration, 1784. Handel's 'L'Allegro' was also given at the Evening Concerts. The singers included Mrs. Billington and Rubinelli, and Mrs. Siddons acted during the week at the Theatre Royal.

For the first time, the organ and orchestra were erected at the west end of the nave—an arrangement which was continued until 1829, and reverted to again in 1891.

The triennial arrangement, however, fell to the ground, and 1791 saw the fourth Chester Festival—one important feature being the substitution for the morning concert of a fourth day's performance in the Cathedral, where the 'Messiah,' 'Samson,' and two Handel selections were given. The vocalists comprised Madame Mara, Mrs. Crouch (Miss Phillips), Michael Kelly, and Harrison. Owing to the disturbed state of affairs at home and abroad, it is scarcely surprising that no other Festival was held until 1806—when the usual week's festivities took place. The Cathedral performances included the 'Messiah' (with Mozart's additional accompaniments for the first time); and, as a complete novelty, Haydn's 'Creation.' The vocalists included Mrs. Billington, Mrs. Dickons, Harrison, and Bartleman. The band consisted of most of the leading players of the day, including Lindley, and Dragonetti. Mr. Greatorex, the organist of Westminster Abbey, presided at the pianoforte and organ, and conducted the Festival, which was under the patronage and enjoyed the presence of His Royal Highness the Duke of Gloucester.

1814 saw the sixth Festival, commencing Sept. 27, and the performance contained a curious item, called—

'A new occasional Oratorio, compiled chiefly from "JUDAS MACCABEUS," in which will be produced "THE BATTLE," by Raimondi.'

The vocalists included Madame Catalani, Mrs. Salmon; Braham, Kellner, and Bartleman. Mr. Greatorex conducted and Mr. Cramer led the band, which again included Dragonetti and Lindley, and other excellent players.

The seventh Festival took place in 1821; the 'Messiah' being given on the first day, and selections from the 'Creation,' 'Judas Maccabeus,' 'Joshua,' and Mozart's 'Requiem.' The vocalists included Mrs. Salmon, Miss Stephens, and Madame Camporese; and Braham, Swift, Rolle, and Kellner. The orchestra was led by Mr. Cramer.

The eighth Festival was held in 1829. The works performed included the 'Messiah,' and selections from 'Judas Maccabeus,' 'Joshua,' 'Jephthah,' 'Solomon,' 'Israel in Egypt,' and the 'Creation.' The principal vocalists were Madame Malibran, Miss Paton, Mrs. Knyvett, and Braham and Phillips. The orchestra was led by F. Cramer and Mori, and Mr. Greatorex again conducted. This was the last of the old series of Chester Festivals.

Fifty years afterwards they were revived by a two days' Festival (the ninth) held in the Cathedral, July 23 and 24, 1879, under the management of the Rev. C. Hylton-Stewart, Cathedral Precentor, and Dr. J. C. Bridge the Cathedral Organist, the latter of whom conducted. This was so successful that the Festival was expanded to three days for the tenth meeting in 1882, and has been held triennially up to 1900, the sixteenth.

Among the works specially written for these Festivals are: 'Daniel,' an oratorio (1885);

'Rudel,' a dramatic cantata (1891); a 'Symphony in F,' descriptive of historical incidents in the history of Chester (1894); and a 'Requiem' (1900), all by Dr. J. C. Bridge; a Psalm, 'By the Waters,' Oliver King; Cantata, 'The Soul's Forgiveness,' Dr. Sawyer, and overtures by E. H. Thorne, Sir Frederick Bridge, etc.

In addition to the standard works of the great composers, many of their lesser known works have been included, such as 'Organ Concerto' and 'Concertante for stringed instruments,' Handel; the 'Funeral and Triumphal Symphony,' and selection from 'Childhood of Christ,' Berlioz; 'Journey to Emmaus,' Jensen; Symphony, 'The Earthly and the Divine,' Spohr; Oratorio, 'The Deluge,' Saint-Saëns, etc.; while many works such as Verdi's 'Requiem,' Tchaikovsky's 'Pathetic Symphony,' and selections from Wagner's 'Parsifal' have been performed for the first time in an English cathedral.

In conclusion it should be stated that the receipts have always covered expenses, and that a high level of artistic excellence has been maintained throughout. J. C. B.

CHEVAL DE BRONZE, LE. A comic opera on a Chinese subject, in three acts; words by Scribe, music by Auber. Produced at the Opéra Comique, March 23, 1835. On Sept. 21, 1857, it was reproduced with additions in four acts at the Académie (Grand Opéra). As 'The Bronze Horse' it has been often played on the London boards since Jan. 5, 1836, when it was produced at Drury Lane. G.

CHEVALIER, played the violin and the quint, a kind of viol, in the private band of Henri IV. and Louis XIII., and composed in whole or in part between the years 1587 and 1617 no less than thirty-four court ballets, according to a list drawn up by Michael Henry, one of Louis XIII.'s twenty-four violins, and now in the Bibliothèque Nationale at Paris. M. C. C.

CHEVÊ or GALIN-PARIS-CHEVÉ SYSTEM. A method of teaching part-singing and sight-reading, much used in France, is thus called, from the names of its founder and chief promoters. Its essential features are two: first, the use of the principle of 'tonic relationship,' the learner being taught to refer every sound to the tonic, and secondly, the use of a numeral notation, the figures 1, 2, 3, etc., serving as the written symbols for the several sounds of the scale. *Do* (*ut*) = 1, *Re* = 2, etc. The following is an example of 'God save the King,' thus written in two parts,

1 1 2	7 • 1 2	3 3 4	3 • 2 1	2 1 7	1 • 0
3 3 5	5 • 3 5	1 1 2	1 • 5 3	5 3 5	3 • 0

A dot under a figure shows that it is in a lower octave, a dot above a figure in a higher. The zero shows a 'rest' or silence; a thick dot, as in the second measure, continues the preceding sound. The varying lengths of sound are shown by a bar or bars above the figures, as in the second and fourth measures. The numerals are treated only as visual signs; the names sung are the old sol-fa syllables. The use of the numerals is to keep the positions of the sounds in the scale impressed on the learner's mind, and thus help him to recognise and sing the sounds. This figure notation is used only as introductory to the ordinary musical notation. The system has been the subject of much controversy in France, but it has made considerable way, and is now allowed to be used in the Paris Communal Schools. It has been adapted for English use by M. Andrade and Mr. G. W. Bullen. The English class-books and exercises are published by Messrs. Moffatt & Paige, 28 Warwick Lane. The 'École Galin-Paris-Chevé' has its headquarters at 36 Rue Vivienne, Paris, and has for many years been under the direction of M. Amand Chevé. He edits the monthly paper, *L'Avenir Musical* (10 centimes), which gives full accounts of the progress of the method.

The idea of using numerals in the way above shown is best known to the general world through the advocacy of Jean Jacques Rousseau. PIERRE GALIN (1786-1821), who first developed the plan practically, was a teacher of mathematics at Bordeaux. AIMÉ PARIS (1798-1866), one of his most energetic disciples, was educated to be an avocat, but devoted his life to the musical propaganda. He added to this system a special nomenclature, since adopted into the Tonic-Sol-fa system, for teaching time. EMILE CHEVÉ (1804-64) was a doctor, and married a sister of Paris. His *Méthode Élémentaire de la Musique Vocale*, a complete exposition of the system, has a curious title-page. The title is followed by the words 'ouvrage repoussé [in large capitals] à l'unanimité 9 avril, 1850, par la Commission du Chant de la ville de Paris, MM. Auber, Adam, etc. etc.,' and below this is a picture of a medal 'Décernée Juin 1853 à la Société Chorale Galin-Paris-Chevé' for 'lecture à première vue' and other things, by a jury composed of Hector Berlioz and other musicians (6th ed. 1856). R. B. L.

CHEVILLARD, PIERRE ALEXANDRE FRANÇOIS, born at Antwerp, Jan. 15, 1811, a very distinguished French violoncellist, became famous for the brilliance and accuracy of his execution, for the success of his teaching at the Paris Conservatoire, and for the foundation, in 1835, of the 'Société des derniers quatuors de Beethoven,' the oldest institution of the kind in France, so far as can be ascertained, and one of the most important. Chevillard died in Paris, Dec. 18, 1877. His son, CAMILLE, born in Paris, Oct. 14, 1859, is one of the most prominent of the modern French school of composers. He was at first a pianoforte pupil of the Conservatoire; and afterwards followed his own instincts as a composer, without more definite teaching than such advice as was essential to his success as an aspirant to musical honours. Chevillard's

works are remarkable for the most artistic aims, a style at once personal, solid, and refined; they include a trio, quartet, and quintet for piano and strings; a string quartet; a very remarkable sonata for violin and piano; a sonata for violoncello and piano; smaller violin and violoncello pieces; a set of variations and an 'Étude Chromatique' for piano; a 'Ballade symphonique'; a symphonic poem, 'Le Chêne et le Roseau,' and a 'Fantaisie symphonique'; as well as songs. Since the death of M. Lamoureux, Chevillard has directed the concerts given under his name. In 1887 he assisted Lamoureux in the first representation of 'Lohengrin' in Paris, and was his substitute in 1897-99, and on many other occasions. He is at the head of the 'Société française de musique de chambre.' Madame Chevillard, a daughter of Lamoureux, translated Weingartner's pamphlet on the symphony since Beethoven. G. F.

CHIABRAN, FRANCESCO (alias CHABRAN, or CHIABRANO), a violin player, was born in Piedmont, about 1723. He was a nephew and pupil of the celebrated SOMIS. In 1747 he entered the royal band at Turin, and about the year 1751 appears to have gone to Paris, where his brilliant and lively style of playing created a considerable sensation. His compositions show that his character as a musician was somewhat superficial, and wanting in true artistic earnestness. The three sets of sonatas which he published in 1756 and the following years are flimsy in construction and devoid of ideas, and appear to be intended merely to give the player an opportunity of displaying his proficiency in the execution of double stops, staccato passages, harmonics, and other technical difficulties. He occasionally indulges in realistic traits of descriptive music. If we consider that Chiabran, through Somis, was indirectly a pupil of Corelli, his deterioration from the noble style of that great master is really astonishing, though not without parallel in the present day, when the traditions of the great Paris school of Rode, Kreutzer, and Viotti appear almost equally forgotten in France. P. D.

CHIAVETTE (*i.e.* little keys, or clefs). Under this name, the acute clefs were used, by the polyphonists, for certain Modes of high range, such as Modes VII. and XIV. [apparently with no other reason than that of keeping the notes within the limits of the stave;] those of more moderate pitch were used for Modes I., III., or VIII., and others of like extent; and the graver forms for the lowest Modes in use—such as Mode XIV. transposed. The ordinary clefs were called the *Chiavi* or *Chiavi naturali*, and both the acute and the grave forms, the *Chiavi trasportati*; but the term *Chiavette* was generally reserved for the acute form only.

It has been suggested, that the system of *Chiavi* and *Chiavette* may serve to assist in the determination of the Mode, especially with regard to its Authentic or Plagal character: but

this is not true. Palestrina's 'Missa Papæ Marcelli,' in Mode XIV. (Plagal), and his 'Missa Dies sanctificatus,' in Mode VII. (Authentic), are both written in the *Chiavette.* Asola's 'Missa pro Defunctis,' in Mode XIV. transposed, is written in the *Chiavi trasportati.* Palestrina's 'Missa brevis,' Mode XIII. transposed, is written in the *Chiavi naturali.* [See also CLEFS.] W. S. R.

CHICAGO ORCHESTRA. See SYMPHONY CONCERTS.

CHICKERING. Messrs. Chickering & Sons, pianoforte-makers of Boston and New York, U.S.A., claim to be the earliest existing American house, and the first to have obtained any prominence. According to information supplied by Messrs. Chickering, the first pianoforte made in America was upon an English model, probably one of Broadwood's. It was made by Benjamin Crehorne, of Milton, U.S.A., before the year 1803. From that year the construction of American pianofortes was persistently carried on, but without any material development, until a Scotchman named James Stewart, afterwards known in London through his connection with Messrs. Collard & Collard, gave an impetus to the American home-manufacture. Stewart induced Jonas Chickering (1798-1853) to join him, but two years after Stewart returned to Europe, when Chickering was left upon his own account. The year given as that of the actual establishment of the Chickering firm is 1823. Two years subsequent to this, Alpheus Babcock, who had served his time with Crehorne, contrived an iron frame for a square pianoforte, with the intention to compensate for changes of temperature affecting the strings, for which he took out a patent. Whether this was suggested by an improvement with the same object patented in London in 1820 by James Thom and William Allen, or was an independent idea, is not known, but Babcock's plan met with no immediate success. However, this attempt at compensation laid the foundation of the modern equipoise to the tension in America as Allen's did in England. Jonas Chickering produced a square pianoforte with an iron frame complete, except the wrest-pin block, in 1837. From 1840 this principle was fostered by Messrs. Chickering, and applied to grand pianofortes as well as square, and has since been generally adopted everywhere. The president of this company is Mr. C. H. W. Foster. A. J. H.

CHILCOT, THOMAS, was organist of the Abbey Church, Bath, from 1733 until his

death, and was the first master of Thomas Linley, the composer. He produced 'Twelve English Songs, the words by Shakespeare and other celebrated poets' (1745); two sets of harpsichord concertos (1756), and other works. He died at Bath, Nov. 1766. W. H. H.

CHILD, William, Mus.D., was born at Bristol in 1606, and received his musical education as a chorister of the cathedral there under Elway Bevin, the organist. In 1631 he took the degree of Bachelor of Music at Oxford, and in 1632 was appointed one of the organists of St. George's Chapel, Windsor, jointly with Nathaniel Giles, in the room of Dr. John Mundy, and in the same year one of the organists of the Chapel Royal. In 1643, when the whole establishment was expelled, Child is said to have retired to a small farm and to have devoted himself to composition, the anthem 'O Lord, grant the King a long life' dating from this time. About 1660 he was appointed chanter of the Chapel Royal and one of the King's private musicians. At the Restoration he was present at Charles II.'s coronation, April 23, 1661. On July 4 in the same year he was appointed composer to the King, in place of the Ferraboscos deceased. On July 8, 1663, he proceeded Doctor of Music at Oxford, his exercise being an anthem which was performed in St. Mary's Church on the 13th of the same month. He died at Windsor, March 23, 1697, in the ninety-first year of his age, and was interred in St. George's Chapel, where a tablet to his memory is placed. [His epitaph is given in West's *Cath. Org.*] Dr. Child published in 1639, in separate parts, engraven on small oblong copper plates, a work entitled 'The first set of Psalmes of iii voyces, fitt for private chappells, or other private meetings with a continuall Base, either for the Organ or Theorbo, newly composed after the Italian way,' and consisting of twenty short anthems for two trebles and a bass, the words selected from the Psalms. This work was reprinted, with the same title, in 1650, and was again reproduced, from the same plates, in 1656, but with the title changed to 'Choise Musick to the Psalmes of Dauid for Three Voices, with a Continuall Base either for the Organ or Theorbo.' His other published works consist of 'Divine Anthems and vocal compositions to several pieces of Poetry'; Catches in Hilton's 'Catch that Catch can,' 1652, and Playford's 'Musical Companion,' 1672; and some compositions in 'Court Ayres.' Several of his Church Services and Anthems are printed in the collections of Boyce and Arnold, in Smith's 'Musica Antiqua,' and elsewhere, and many more are extant in manuscript in the choir books of various cathedrals and the collection made by Dr. Tudway for Lord Oxford. His Service in D is a fine specimen of writing in the imitative style, with much pleasing melody, a feature which distinguishes Child's music generally. Dr. Child did a munificent act which ought not to be left unnoticed. The chapter records stand as follows:—'Dr. Child having been organist for some years to the king's chapel in K. Ch. 2nds time had great arrears of his salary due to him, to the value of about £500, which he and some of our canons discoursing of, Dr. C. slited (*sic*), and said he would be glad if anybody would give him £5 and some bottles of wine for; which the canons accepted of, and accordingly had articles made with hand and seal. After this King James 2 coming to the crown, paid off his Brs. arrears; wch. much affecting Dr. Child, and he repining at, the canons generously released his bargain, on condition of his paving the body of the choir wth. marble, wch. was accordingly done, as is commemorated on his gravestone.' His generosity likewise manifested itself on other occasions. He gave £20 towards building the Town Hall at Windsor, and bequeathed £50 to the corporation to be applied in charitable purposes. A portrait of Dr. Child, painted in 1663, shortly after taking his doctor's degree, was presented by him to the Music School at Oxford. W. H. H.

CHILESOTTI, Oscar, born at Bassano, July 12, 1848, is one of the most eminent of Italian musical antiquaries. He was at the university of Padua, where he graduated in law, subsequently attaining high rank as an amateur violoncellist and flute-player, and a musical theorist. His life has been devoted to the cause of reviving old music, and he has edited, among other things, a valuable *Biblioteca di rarità musicali*, containing (vol. i.) Dances from books of the 16th century; (vol. ii.) Pichi's 'Balli d' arpicordo' (1621); (vol. iii.) G. Stefani's 'Affetti amorosi' (1624); and (vol. iv.) Marcello's 'Arianna.' Mention must also be made of his edition (1881) of L. Roncall's 'Capricci armonici' (1692); of his translations of various collections of lute-music, from the tablature, and of such historical and critical work as *I nostri maestri del passato* (1882); *Di G. B. Besardo*, etc. (1886); *Sulla lettera critica di B. Marcello contro A. Lotti* (1885); *Sulla melodia popolare nel secolo xvi.*; and some Italian translations from Schopenhauer. He is a regular contributor to the *Gazzetta musicale di Milano*, and occasionally writes in the *Rivista musicale*, and the publications of the Int. Mus. Gesellschaft. M.

CHILSTON, the name of the author of a short treatise 'of musical proporcions and of theire naturis and denominacions,' written in English about the middle of the 15th century, and included in the famous manuscript from the monastery of the Holy Cross at Waltham, which once belonged to Thomas Tallis and is now among the treasures of the British Museum (MS. Lansdowne, 763). Nearly the whole of this treatise is printed in Hawkins's *History of Music*, ii. 229. The writer, in common with all mediæval theorists, treats the science of music as a branch of Applied Mathematics:—'Numbers

may be referred to length and breadth of earth or of other measure that belongeth to Geometry, or they may be considered as they be number in themselves and so they belong to Arithmetic, or they may be referred to length and shortness and measure of musical instruments, the which cause highness and lowness of voice, and so they belong to harmony and to craft of music.' Harmonic progression is illustrated by the ratio of the fifth and the octave :—'Diapason, *i.e.* proportio dupla is the most perfect accord after the unison. Between the extremities of the Diapason, *sc.* the treble and the tenor, will be given a middle that is called the Mean, the which is called Diapente *i.e.* sesquialtera to the tenor and Diatessaron *i.e.* sesquitercia to the treble. Therefore that manner of middle is called Medietas Armonica. Sequitur exemplum: a pipe of six foot long with his competent breadth is a tenor in diapason to a pipe of 3 foot with his competent breadth: then is a pipe of 4 foot the mean to them twain, diatessaron to the one and diapente to the other, as thou shalt find more plainly in the making of the Monochord that is called the Instrument of Plain-song.'

Immediately preceding this treatise in the manuscript is 'a litil tretise acording to the ferst tretise of the sight of Descant, and also for the sight of Counter and for the syght of the Countirtenor and of Faburdon.' The 'ferst tretise' referred to is that of Lionel Power, which is fully described by Burney and Hawkins. We are left in doubt whether the supplementary treatise is the work of Power or of Chilston. The earlier portion of it appears in almost identical language in MS. Bodl. 842 at Oxford, where it is headed 'Opinio Ricardi Cutelle de London' (see DISCANT, FAUXBOURDON). J. F. R. S.

CHIMES. Certain beats on one or more bells used to give notice of the commencement of religious services or of the time of day. It is not difficult to trace the origin of chimes in our own land, or in other European Christian countries, whether applied to sacred or secular purposes.

The famous manuscript of St. Blaise, said to be of the 9th century, shows that there was an attempt made in early times to produce a set of chimes with small suspended bells which were tapped with a hammer or wooden mallet by a cleric or lay performer. The later illustrations from the illuminated manuscript of the Benedictional of S. Æthelwold, which was executed at Hyde Abbey about the year 980, would show that chime bells in early times were mounted in campaniles without the appendages for ringing or swinging according with the present custom.

There are examples of the introduction of the half swinging chimes in the 15th century which have been carefully recorded, and which show a more convenient arrangement in 'the dead rope pull' than the earlier arrangements of levers; and also of 'full pull swing' or ringing the bells mouth upwards, in distinction to chiming them, where if swung at all half the distance is sufficient. In most cases, however, for the purposes of chiming, the bells hang dead, and are struck with the clapper or with an outside or distinct hammer, or are only swung a short distance on centres, which facilitates the work on large or Bourdon bells. As soon as S. Paulinus had determined to erect the new churches in Northumbria, and as soon as S. Dunstan had with his usual energy devoted himself to the elevation of the Christian Church among the Saxons, an impetus was given to chime ringing, in the one case by the importation and in the other by the manufacture at home of the necessary bells for chiming and of the wooden structures with which they were associated and which would not have carried large sets of chimes. This system of application has been repeated down to modern times in the large stone fabrics, and is employed in the cases of the famous christened bells, such as Tom of Oxford, Tom of Lincoln, Big Ben, and Great Paul.

In King's *Rites and Ceremonies of the Greek Church in Russia*, it has been said that 'Bells are now always used in Russia, and the chiming them is looked upon as essential to the service, the length of the time signifies to the public the degree of sanctity in the day; every church, therefore, is furnished with them, they are fastened immovably to the beam that supports them, and are rung by a rope tied to the clapper, which is perhaps a mark of their antiquity in that country, our method of ringing being more artificial.'

A manual chiming apparatus, as distinct from chime barrel machines, was introduced by the Rev. H. T. Ellacombe at Bitton Church. His system has been somewhat modified and elaborated by Messrs. Warner, the well-known bell-founders of London, who have erected many of these instruments in churches for chiming either tunes or changes on church bells.

An apparatus for chiming by pneumatics has been introduced by Mr. Lewis, the church organ-builder, which has some advantages, as the simple touch on a keyboard produces the required sound, but on the other hand the complication of an organ bellows and valves to supply the compressed air required for working, has not recommended it for general use. The simple rope-pull apparatus before referred to may in a minute be put into gear for chiming, or out of gear to admit of the bells being rung.

The proportions and shapes of bells used for chimes should be of a different character from ringing bells, to admit of tune and accord in more pleasant harmonics, a point which also has bearing upon the cup or hemispherical form of chimes which have of late years been adopted, a flattened form of hemisphere giving

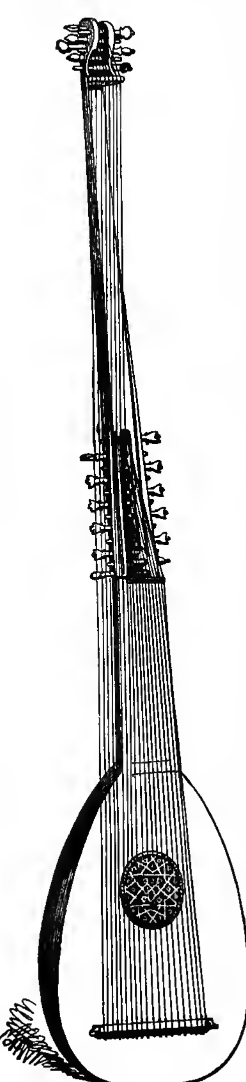
far better results than the more circular or cup outlines. S. B. G.

CHINESE PAVILION, CHINESE CRESCENT, or CHAPEAU CHINOIS. This consists of a pole with several transverse brass plates of some crescent or fantastic form, and generally terminating at top with a conical pavilion or hat, whence its several names. On all these parts a number of very small bells are hung, which the performer causes to jingle, by shaking the instrument, held vertically, up and down. It is only used in military bands, and more for show than use: it is now practically obsolete. V. DE P.

CHIPP, EDMUND THOMAS, Mus.D. Cantab., eldest son of T. P. Chipp (well known as the player of the 'Tower drums'), born Christmas Day, 1823; was a chorister in the Chapel Royal, St. James's. Studied the violin under Nadaud and Tolbecque, and was in the Queen's private band from 1843 to 1845; became known as an organist of some repute, from his holding the position of honorary organist at Albany Chapel, Regent's Park, 1843-46, and in 1847 succeeded Dr. Gauntlett at St. Olave's, Southwark, a position he resigned on being elected organist to St. Mary-at-Hill, Eastcheap, in 1852. On W. T. Best's retirement from the Panopticon in 1855, Chipp was chosen to succeed him as organist, and retained the appointment until the close of that institution. He was invited to become organist to Holy Trinity, Paddington, where he remained from 1856 until his appointment as organist of the Ulster Hall, Belfast, in 1862. He took the degree of Mus.B. at Cambridge in 1859, and of Mus.D. in 1860. In 1866 he was appointed organist to the Kinnaird Hall, Dundee, and also to St. Paul's Church, Edinburgh. In November of that year both appointments had to be resigned, as he was appointed organist and Magister Choristarum to Ely Cathedral. He died at Nice, Dec. 17, 1886.

The works produced by this composer are the Oratorio of 'Job'; 'Naomi, a Sacred Idyl'; much church music; a book of twenty-four sketches for the organ, and various minor works, songs, etc. M.

CHITARRONE (Ital., augmentative of *Chitarra*). A theorbo, or double-necked lute of great length, with wire strings and two sets of tuning-pegs, the lower set having twelve, and the higher eight strings attached; the unusual extension in length affording greater development to the bass of the instrument. The Italian chitarra was not strung with catgut like the Spanish guitar, but with wire, like the German cither and the old English cithern. The chitarrone, as implied by the suffix, was a large chitarra; and the Italian instrument called by this name is a theorbo with a shorter neck, strung with wire, and played with a plectrum. In Italy the instrument figured here is called Arciliuto; but the German authorities, Praetorius (1619), and Baron (1727), call it Chitarrone. Both the chitarrone and the archlute were employed in Italy in the 16th century with the clavicembalo and other instruments to accompany the voice, forming a band, the nutty, slightly bitter *timbre* of which must have been very sympathetic and agreeable. Lists of these earliest orchestras are extant, notably one that was got together for the performance of Monteverde's 'Orfeo' in 1607, in which appear two chitarroni. The very fine specimen of this interesting instrument here engraved is in the South Kensington Museum. The length of it is 5 feet 4 inches. It is inscribed inside 'Andrew Taus in Siena, 1621.' [ARCHLUTE, CITHER, LUTE, THEORBO.] A. J. H.



CHLADNI, ERNST FLORENS FRIEDRICH, who has been called the father of modern acoustics, was born at Wittemberg, Nov. 30, 1756. His father was a stern educator, and his youth was consequently spent in close application to the study of a variety of subjects, of which geography seems to have been the chief, and music very subordinate, for he did not begin to study the latter consistently till he was nineteen. At the college of Grimma he studied law and medicine, apparently uncertain to which to apply himself. At Leipzig in 1782 he was made doctor of laws, but soon abandoned that position and the study of jurisprudence to apply himself exclusively to physical science. His attention was

soon drawn to the imperfection of the knowledge of the laws of sound, and he determined to devote himself to their investigation. His first researches on the vibrations of round and square plates, bells, and rings, were published as early as 1787. It was in connection with these that he invented the beautiful and famous experiment for showing the modes of vibration of metal or glass plates, by scattering sand over the surface.

His researches extended over a considerable part of the domain of acoustics; embracing, besides those mentioned above, investigations on longitudinal vibrations, on the notes of pipes when filled with different gases; on the theory of consonance and dissonance; the acoustical properties of concert-rooms; and the distribution of musical instruments into classes. With short-sightedness characteristic at once of the greatest and least of mortals, he thought the noblest thing to do would be to invent some new instrument on a principle before unknown. To this object he himself said that he devoted more time, trouble, and money, than to his great scientific researches. The result was first an instrument which he called Euphon, which consisted chiefly of small cylinders of glass of the thickness of a pen, which were set in vibration by the moistened finger. This he afterwards developed into an instrnment which he called the Clavi-cylinder, and looked upon as the practical application of his discoveries, and the glory of his life. In form it was like a square pianoforte, and comprised four and a half octaves. The sound was produced by friction from a single glass cylinder connected with internal machinery, by which the differences of the notes were produced. Its advantages were said to be the power of prolonging sound and obtaining 'crescendo' and 'diminuendo' at pleasure. After 1802, when be published his *Treatise on Acoustics*, he travelled in various parts of Europe taking his clavi-cylinder with him, and lecturing upon it and on acoustics. In Paris, in 1808, he was introduced to Napoleon by Laplace. The Emperor with characteristic appreciation of his importance gave him 6000 francs, and desired him to have his great work translated into French, for the benefit of the nation. This work he undertook himself, and in 1809 it was published with a short autobiography prefixed, and dedicated to Napoleon. After this he resumed his travels and lectures for some years. His labours in science, mostly but not exclusively devoted to acoustics, continued up to the year of his death, which happened suddenly, of apoplexy, April 3, 1827, at Breslau.

The following is a list of his more important works in connection with acoustics, in the order of their appearance.

1. Entdeckungen über die Theorie des Klanges. 1787.
2. Ueber die Längentöne einer Saite. 1792.
3. Ueber die Longitudinelschwingungen der Saiten und Stäbe. 1796.
4. Ueber drehende Schwingungen eines Stabes.
5. Beiträge zur Beförderung eines bessern Vortrags des Klanglehre. 1797.
6. Ueber die Töne einer Pfeife in verschiedenen Gasarten.
7. Eine neue Art die Geschwindigkeit des Schwingungen bei einem jeden Töne durch den Angeschein zu bestimmen 1800.
8. Ueber die wahre Ursache des Consonirens und Dissonirens. 1801 (?).
9. Nachricht von dem Clavicylinder, einen neugefundenen Instrumente. 1800 (?).
10. Zweite Nachricht von dem Clavicylinder, und einem neuen Baue desselben. 1837 (?).
11. Die Akustik. Breitkopf und Härtel. 1802.
12. Neue Beiträge zur Akustik. *Ib.* 1817.
13. Beiträge zur praktischen Akustik, etc. (with remarks on the construction of instruments). *Ib.* 1821.
14. Kurze Uebersicht der Schall- und Klanglehre, etc. Schott, 1827.

C. H. H. P.

CHOICE OF HERCULES, THE, a 'musical interlude' for solos and chorus; the words from Spenser's 'Polymetis'; the music by Handel, partly adapted from his 'Alcestis.' Autograph in Buckingham Palace—begun June 28, 1750, finished July 5, 1750; but last chorus added afterwards. Produced at Covent Garden, March 1, 1751. G.

CHOIR, sometimes spelt QUIRE. The part of the church east of the nave, in which the services are celebrated. The term is now almost restricted to cathedrals and abbey churches, 'chancel' being used for the same part of an ordinary church. 'Choir' is also used for the singers in churches of all kinds; and for the portions into which a chorus is divided when the composition is written for two, three, or any other number of 'choirs.' G.

CHOIR ORGAN. The name given to the small organ which, in cathedral and other churches, used to hang suspended in front of, and below, the larger or Great Organ. It derived its name from its employment to accompany the vocal choir in the chief portions of the Choral Service except the parts marked 'Full,' and the 'Glorias,' which were usually supported by the 'Loud Organ' as it was sometimes called. The choir organ was generally of very sprightly tone, however small it might be; one of three stops only not unfrequently consisting of the following combination — Stopped Diapason, Principal, Fifteenth. [As a rule a good Choir Organ should have a sufficient proportion of string and reed-toned stops to give variety, colour, and contrast in accompanying voices; and for use in solo-playing as opposed to the reedy tone of the Small Organ and the powerful tone of the Great.]

Father Smith's choir organ at St. Paul's Cathedral (1694-97), the most complete he ever made, had the following eight stops:—Stopped Diapason (Wood), Principal, Flute (Metal), Gemshorn Twelfth, Fifteenth, Mixture III ranks, Cremona (through), Vox humana (through).

[In modern instruments this organ is much enlarged, and is often enclosed in a swell-box. There is generally a better balance of tone than was formerly the case, and the octave and fifteenth are much less fierce and assertive in tone. Occasionally a Tuba is played from the Choir Manual, so as to leave the Great and Swell available for its accompaniment.] E. J. H. [additions in square brackets by T. E.]

FRANÇOIS FREDERIC CHOPIN

CHOLLET, Jean Baptiste Marie, born May 20, 1798, at Paris, was from 1804 to 1816 taught singing and the violin at the Conservatoire, and in 1814 gained a solfeggio prize. In 1815, the Conservatoire having been closed owing to political events, he became chorus singer at the Opera and the Italian and Feydeau Theatres. From 1818 to 1825 he played in the provinces, under the name Dôme-Chollet, the quasi-baritone parts played formerly by Martin and others. In 1825 he played both at Brussels and the Opéra Comique, Paris, and obtained in 1826 an engagement at the latter, where, having adopted the tenor répertoire, he remained until 1832. His principal new parts were in operas of Hérold and Auber, viz. Henri ('Marie'), August 12, 1826, in which he made his first success by his singing of the song 'Une robe légère'; Fritz, in 'La Fiancée,' Jan. 10, 1829; 'Fra Diavolo,' Jan. 28, 1830, and 'Zampa,' May 3, 1831. In 1832-35 he was again in Brussels, where hereafter he enjoyed even greater favour than he obtained in Paris. In 1834 he sang at the Hague, and in 1835 returned to the Opéra Comique, where he remained several years, and created several other parts in operas of Adam, Halévy, and Balfe, viz. Lionel in 'L'Éclair' (Halévy), Dec. 30, 1835; Chapelon in 'Postillon de Longjumeau,' Oct. 13, 1836; Josselyn in 'Roi d'Yvetot,' Oct. 13, 1842; Edward III. in 'Puits d'Amour,' April 20, 1843; 'Cagliostro,' Feb. 10, 1844; Beaumanoir in 'Quatre fils d'Aymon' July 15, 1844. He left the Comique, directed the Hague Theatre for a time, and finally reappeared in Paris at the Lyrique without success. In 1850 he played with Mitchell's company at St. James's Theatre, viz. as Lejoyeux ('Val d'Andorre'), in which he made his début, Jan. 4, as Barnabé (Paer's 'Maître de Chapelle'), and in his well-known parts of Zampa, Josselyn, and the Postilion. He was well received, on account of his easy, gentlemanly, and vivacious acting, and his command both of humour and pathos, which atoned for loss of voice. Fétis says of him that 'endowed with qualities that should have taken him to the highest point of art, if he had received a better musical education, he had more ingenuity than real ability, more mannerism than style.' Sometimes he jerked out his song with affectation; he often altered the character of the music by introducing variations of the phrase and numerous cadenzas in which he made use of his head voice. Vocal exercises had not been studied, inasmuch that his 'mezza voce' was defective, and that he executed ascending chromatic passages in an imperfect manner. In spite of these faults, the charm of his voice, his knowledge of what would please the public, and his *aplomb* as a musician often caused him to make more effect than skilful singers deprived of these advantages. His farewell benefit took place at the Opéra Comique, April 24, 1872, when Roger reappeared in a scene from 'La Dame Blanche,' and Chollet himself as Barnabé in the celebrated duo from Paer's 'Maître de Chapelle.' On this occasion Paladilhe's musical setting of Coppée's 'Le Passant' was first produced, with Mme. Galli-Marié and Mlle. Priola. Chollet died at Nemours, Jan. 12, 1892. A. C.

CHOPIN, François Frédéric, was born March 1, 1809,[1] at Zelazowa Wola, a village belonging to Countess Skarbek, about twenty-eight miles from Warsaw. The father, Nicholas Chopin, was born in 1770 at Nancy, in Lorraine, and came to Warsaw about 1787 as a book-keeper in a manufactory of snuff, which business collapsed during the political troubles of the close of the 18th century. Nicholas Chopin became a captain in the National Guard, and on retiring, a teacher of French. In this capacity, while acting as tutor to the son of Countess Skarbek, he made the acquaintance of Justine Kryzanowska, whom he married in 1806. Three daughters and one son were born to the Chopins, and the father was appointed professor of French in the newly-founded Lyceum of Warsaw. He held similar appointments in the school of artillery and engineering, from 1812, and in the military preparatory school from 1815, besides keeping a boarding-school of his own. The general education which the composer received seems to have been of a strangely superficial order, considering his father's profession. A fair amount of French, a little Latin, and mathematics and geography are mentioned; but in music he had the advantage of learning from a good all-round musician, Adalbert Zywny, a Bohemian, who was a violinist, pianist, and composer, and from whom he learnt with such success that he played a concerto by Gyrowetz in public on Feb. 24, 1818, before he was nine years old. He was called a second Mozart, and became the object of that female adoration, one instance of which had an important effect on the circumstances of his later life. In 1820, Mme. Catalani heard him play, and gave him a watch with an inscription. He had already attempted composition, and dedicated a march to the Russian Grand Duke Constantine, who had it scored for a military band. The lessons with Zywny were continued until Chopin was twelve years old, and in 1824 he entered the Lyceum. About the same time his father sent him to the head of the Warsaw Conservatorium, Joseph Elsner, for instruction in harmony and counterpoint. According to Liszt, 'Elsner taught Chopin those things that are the most difficult to learn and most rarely known; to be exacting to one's self, and to value the advantages that are only obtained by dint of patience and labour.'

There is evidence that while at the Lyceum, whatever may have been the shortcomings of his general education, he was a lively boy, so fond of private theatricals as to call from an

[1] Not 1810, as was inscribed on his tombstone.

eminent Polish actor the opinion that he ought to have gone on the stage. This opinion was endorsed in after years by some French professional actors, and by John Parry, who met Chopin at Chorley's house in 1848.[1] He collaborated with his youngest sister in writing a one-act comedy, 'The Mistake; or the Pretended Rogue.' In 1825 he played again in public in the first movement of a concerto by Moscheles; he also improvised upon one of the instruments invented about that time, which aimed at uniting the harmonium with the pianoforte. (See AEOLODION.)

This year, 1825, saw the publication of Chopin's op. 1, the first rondo, in C minor; but he remained at the Lyceum until 1827, and it seems probable that his efforts to do his school work without diminishing the amount of time he wished to devote to his music, acted detrimentally on his health, and perhaps laid the foundations of that delicacy which has been so absurdly exaggerated. On leaving the school he was allowed to devote himself exclusively to music, and in the course of certain short excursions, such as that to Reinerz in Silesia, and to the country house of a member of the Skarbek family, he appeared as a pianist. Prince Radziwill, Governor of Posen, took great interest in the boy, but there is no foundation for the assertion made by Liszt, that Radziwill paid for Chopin's education. About this time, too, he wrote the variations on 'La ci darem,' op. 2, and the trio, op. 8, for piano and strings; the other works of the period were published posthumously, such as the rondo for two pianos, the sonata, op. 4, the E minor nocturne, and the polonaises in G minor, D minor, and B flat.

In 1828 Chopin got his first sight of the great world.. He was taken by a friend of his father's, Professor Jarocki, to Berlin, where a congress of scientists under Alexander von Humboldt was to be held. In Berlin Chopin caught sight of several musical celebrities, among others, Spontini, Zelter, and Mendelssohn, but seems to have been too shy to introduce himself. He heard a few operas, such as Spontini's 'Cortez,' and the 'Matrimonio Segreto' of Cimarosa, and was much impressed by Handel's 'Ode on St. Cecilia's Day,' which was given at the Sing-Akademie. After some months spent at home in Warsaw, during which he heard Hummel and Paganini, he went, in July 1829, to Vienna, where he found that Haslinger was about to publish his 'La ci darem' variations. Count Gallenberg and others urged him to give a concert, and this took place on August 11, 1829, a time when the fashionable world was away from Vienna. The composer was announced to play his variations, and the 'Krakowiak,' both for piano and orchestra. The parts of the latter piece were so illegible that it had to be withdrawn, and he improvised in its stead, taking as his theme a subject from the 'Dame Blanche,' and a Polish tune. His success was great, and another concert, at which both the variations and the 'Krakowiak' were given, took place one week afterwards, on August 18. The criticisms on his playing are full of interest; one writer noticed as a defect 'the non-observance of the indication by accent of the commencement of musical phrases,' and there are allusions to his 'precision and accuracy,' as well as to the fact that his tone was considered by some, Moscheles for instance, as insufficient for a large room.

We gather from confidential letters to a bosom friend and schoolfellow named Woyciechowski,[2] that about this time Chopin was (or believed himself) in love with a pupil of the Warsaw Conservatorium, Constantia Gladkowska, whose attractions inspired some of the compositions of the period, notably the adagio of the concerto in F minor, and the valse in D flat, op. 70, No. 3 (posthumously published).

He was now to set forth upon the regular career of a travelling virtuoso, and a farewell concert was given on March 17, 1830. The interest taken in him was so great that every seat was occupied, and a second, and even a third concert had to be given, in spite of the fact that at the first he and the audience were not in perfect sympathy. It is significant of the state of musical taste in Warsaw that on each of the three occasions the concerto was divided; on the first occasion the allegro from the F minor concerto was separated from the remainder by a divertissement for the French horn; and at the second concert by a violin solo. At the third, which took place on Oct. 2, 1830, the E minor concerto was subjected to similar treatment, and on each of the three occasions Chopin played potpourris on Polish tunes, either written down beforehand or extemporised. At the second the 'Krakowiak' was also given, and the profits were about £125. At the third Mlle. Gladkowska was one of the singers, so it was no wonder that the concert was the most successful of the three in point of Chopin's own performances. He left Warsaw on Nov. 1, 1830, and went to Breslau, Dresden, Prague, Vienna, Munich, and Stuttgart, on the way to Paris. Besides the works already enumerated, his compositions now included the polonaise in E flat, with orchestra, the introduction and polonaise for piano and violoncello (in its first form), and a number of études, nocturnes, valses, polonaises, and mazurkas. The tour, from a financial point of view, was not a success; Haslinger, in Vienna, found it too expensive to publish good music, and so laid everything but waltzes aside. Some of Chopin's letters from Vienna contain amusing remarks on those whom he met. Thalberg 'takes tenths as easily as I do octaves, and wears studs with

[1] This was told to the writer by Chorley in 1864.

[2] Quoted in Karasowski's *Life*, vol. ii.

diamonds'; 'Moscheles does not at all astonish me'; Czerny 'has again arranged an overture for eight pianos and sixteen performers, and seems to be very happy over it,' and so on. In July 1831 he was obliged to wait at Munich till money was sent him from home; he gave a concert, at which he played the E minor concerto, and the fantasia on Polish airs.

At Stuttgart he heard of the taking of Warsaw by the Russians, an event which is said to have inspired the wild despair of the study in C minor, op. 10, No. 12.

Although Chopin arrived in Paris in a mood of despondency and rather short of money, the Parisians received him all the more readily because he was a Pole, and a wave of sympathy with the troubles of Poland was just then passing over the French nation. With his clear-cut profile, high forehead, thin lips, tender brown eyes, delicately-formed hands, and pale complexion, it was little wonder that he rapidly made friends among the most important musical people of Paris. Of the pianists of the time, he chiefly admired Kalkbrenner for his technique, and even went so far as to join some of his classes! Although much of the information that is forthcoming as to Chopin's first impressions of Paris must be considered apocryphal, we know from his letters that he was not slow in realising the kind of work which lay before him to do, and that this was something else than the career of a mere virtuoso-pianist. On all hands it is admitted that he did not excel in the interpretation of music other than his own, and that his technique was less certain than that of some of his contemporaries. 'Perhaps I cannot create a new school, however much I may wish to do so, because I do not know the old one; but I certainly *do* know that my tone-poems have some individuality in them, and that I always strive to advance.' 'So much is clear to me, I shall never become a Kalkbrenner; he will not be able to alter my perhaps daring but noble resolve—to create a new era in art.'

Among Chopin's earliest friends in Paris were Cherubini, Bellini, Berlioz, Meyerbeer, Liszt, Hiller, Osborne, among composers, and Baillot, Brod, Franchomme, and Pixis, among executive artists. His first concert took place on Feb. 26, 1832. He played the F minor concerto and the 'La ci darem' variations, besides taking part with Kalkbrenner in a duet for two pianos by the latter, accompanied on four other pianos. Hiller tells us that Mendelssohn, who was present, 'applauded triumphantly.' Another appearance was made by Chopin on May 20, 1832, at a charity concert given by the Prince de la Moskowa. In another letter he touches upon the sordid little tragedy which must have been the lot of so many artists at various times, the need of keeping up the appearance of a larger income than was actually existing, in order to secure the patronage of the fashionable world, and to pose as a successful teacher. He speaks of having many pupils belonging to the Conservatoire, as well as private pupils of Moscheles, Herz, and Kalkbrenner, and says that they profess to regard him as the equal of Field (!). When John Field came to Paris, in the winter of 1832-33, he and Chopin had not very much personal sympathy, in spite of the undoubted influence which Field's characteristics as a composer had exercised upon the younger man. Field spoke of Chopin as 'un talent de chambre de malade.' In the same winter Chopin took part with Hiller and Liszt in a performance of Bach's concerto for three harpsichords (played on pianos), in the intervals of a theatrical performance for the benefit of Miss Smithson, afterwards the wife of Berlioz. Both Berlioz and Liszt were not quite sympathetic to Chopin, and their excesses of style seemed to him ridiculous. As early as 1833, it is said[1] that Chopin declared that Berlioz's music was such as to justify any man who chose to break with him,—an unusually violent expression of opinion for Chopin. It was not till after Chopin's death that Berlioz uttered his famous sneer, 'Il se mourait toute sa vie.'

Meanwhile Chopin's music was steadily making its way, and between 1833 and 1847 every year saw the publication of some of his works, so that it must have been worth the publishers' while, financially speaking, to bring them out. The vogue of his music was started in Germany with Schumann's article on 'op. 2,' and the often-quoted words, 'Hats off, gentlemen! a genius!'

After the winter of 1834-35 Chopin's appearances as a virtuoso were very rare; three quasi-private concerts were given in 1841, 1842, and 1848, but they were distinctly for the sake of bringing forward new works, not in order to exhibit the composer's ability as a pianist. On Dec. 7, 1834, he played an andante (probably that which stands as the introduction to the polonaise in E flat (at a concert given by Berlioz in the Conservatoire, and on Christmas Day of the same year he played with Liszt Moscheles' 'grand duo,' op. 47, and a duet on two pianos written by Liszt on a theme of Mendelssohn's (the MS. of which has disappeared). Chopin's retirement from the public career of a pianist seems to date from April 1835, and a performance of his E minor concerto, at which he met with a lukewarm reception from the public. His actual last appearance in public (not including the quasi-private concerts already referred to) was at Habeneck's benefit at the Conservatoire, where he played the andante and polonaise, op. 22. In the summer of the same year he met his parents at Carlsbad, and afterwards visited Dresden and Leipzig, where Mendelssohn introduced him to Schumann, and he and

[1] Franchomme is the witness.

Clara Wieck played to each other; she played her future husband's sonata in F sharp minor, op. 11, and he 'sang' (as Schumann says) his nocturne in E flat, op. 9. Mendelssohn gives an amusing account[1] of an evening during which he played 'St. Paul' to Chopin, the two parts of which were separated by Chopin's performance of some new études and a concerto movement: 'It was just as if a Cherokee and a Kaffir had met and conversed.' With Schumann's opinions of Chopin every musical reader is familiar.

In the summer of 1836 a similar journey was made to Marienbad, Dresden, and Leipzig, the first place being visited with the object of meeting again a certain Mlle. Maria, daughter of Count Wodzinski, whose three sons had been at the school kept by Nicholas Chopin. Chopin proposed to, and was rejected by, the young lady, who subsequently made a better match in a worldly point of view. The most permanent trace of the affair is in a 'tempo di valse' in F minor, op. 69, No. 1, which is dated 'Dresden, September 1835, pour Mlle. Marie'; the lady cherished the autograph as 'L'Adieu.'

The first of Chopin's visits to England took place in July 1837; his object was primarily to consult a doctor, and to arrange certain business matters, the latter resulting in the publication of his works by the firm of Wessel & Co. (later Ashdown & Parry, now Edwin Ashdown). Chopin played at the house of James Broadwood in Bryanston Square, but his delicate state of health was one of the obstacles to his visiting or receiving visits. It was about this time that the first unmistakable signs of pulmonary disease began to show themselves.

Chopin used to say that his life consisted of an episode without a beginning and with a sad end. He referred to the intimacy with George Sand (Mme. Dudevant), the history of which has been related by various persons, with greater or less opportunities for ascertaining the truth, but, as regards a good many of them, with very incomplete success, so far as absolute veracity is concerned. The acquaintance began, at Liszt's instigation, early in 1837, when Chopin visited the novelist at Nohant. They planned a sojourn in the island of Majorca, where Chopin was to recover his health in the company of his friend. He borrowed money for his expenses, and the party, consisting of Mme. Sand, her son, daughter, and maid, and Chopin, started by Port-Vendres and Barcelona in November 1838 for Palma, where for a time everything was *couleur de rose.* After some time an exceptionally wet season set in, and Chopin was miserable, his illness increasing on him to such an extent that the landlord insisted on their quitting his house, and paying for the process of disinfecting it. To add to the other troubles, his piano was seized by the Custom-house officers, and not released till February 1839. The various accounts of the sojourn in Majorca are embodied, in a more or less credible way, in George Sand's *Un Hiver à Majorque* and *Histoire de ma Vie;* the other side of the picture is given, after the quarrel and separation, in *Lucrezia Floriani* (published in 1847), where Chopin figures as Prince Karol—a high-flown, consumptive, and exasperating nuisance. The most important of the works completed at Palma is the set of preludes, op. 28, in which the curious may see reflected the various moods of the composer's temperament during this famous 'episode.' The ballade in F, op. 38, the polonaise in C minor, op. 40, No. 2, and the scherzo in C sharp minor, op. 39, seem all to have been conceived about the same time. Early in March (1839), Chopin and George Sand returned to France, and after being nursed at Marseilles the invalid was taken to Genoa, and thence to Nohant. For the next seven years or so their summers were spent at Nohant, the rest of the year in Paris—at first at No. 10 Rue Pigalle, and afterwards in the Cité d'Orléans. During this period his relations with publishers were satisfactory, and his lessons commanded a high price. He played at St. Cloud before the royal family, together with Moscheles, in the winter of 1839, and gave two concerts of his own, on April 26, 1841, and Feb. 21, 1842. On the second occasion we learn from Maurice Bourges that Chopin played the mazurkas in A flat, B major, and A minor; three studies (probably op. 25, Nos. 1 and 2, and op. 10, No. 12); the ballade in A flat; four nocturnes, one of which was in F sharp minor, op. 55; the prelude in D flat; and the impromptu in G flat. The conditions of these concerts appear to have been almost ideal in their avoidance of the ordinary drawbacks of public entertainments. The audience consisted mainly of his friends and pupils, and the tickets were eagerly taken up in private. About this time Moscheles says of him in his Diary: 'His *ad libitum* playing, which, with the interpreters of his music, degenerates into disregard of time, is with him only the most charming originality of execution; the amateurish and harsh modulations which strike me disagreeably when I am reading his compositions no longer shock me, because his delicate fingers glide lightly over them in a fairy-like way; his *piano* is so soft that he does not need any strong *forte* to produce contrasts: it is for this reason that one does not miss the orchestral effects which the German school demands from a pianoforte player, but allows one's self to be carried away, as by a singer who, little concerned about the accompaniment, entirely follows his feelings.' In another place he says: 'Personally I dislike the artificial, often forced, modulations; my fingers stumble and fall over such passages;

[1] *Letters to his Family*, Oct. 8, 1835.

however much I may practise them I cannot execute them without tripping.'

In 1847 Chopin's connection with George Sand came to an abrupt and painful end. It is unnecessary to discuss the details of the quarrel between them, but it is pretty certain that the consequent distress of mind accelerated the composer's ill-health, if it was not a primary cause of his early death. In October 1847, was published Chopin's last composition, the sonata for piano and violoncello, op. 65, in G minor. His last concert was given in Paris on Feb. 16, 1848, when the approach of the Revolution was already being felt. He played with Alard and Franchomme in Mozart's trio in G (Köchel, No. 496), and with Franchomme in three movements of his new sonata, besides a number of solos, among which were the Berceuse, the valse in D flat, op. 64, and the Barcarole. Sir Charles Hallé, who was present on the occasion, gave an account to the writer of how Chopin played the *forte* passages towards the end of the Barcarole *pianissimo* with all manner of refinements. Like so many other musicians, Chopin fled from the disturbances of the Revolution to London, where he arrived on April 21, 1848. He played at Lady Blessington's, at Gore House, Kensington, and at the Duchess of Sutherland's, at Stafford House. Erard, Broadwood, and Pleyel sent him pianos, and almost wherever he played he had to be carried upstairs. That, nevertheless, his playing could occasionally produce the effect of unexpected force, as in the octaves of the A flat polonaise, was recorded by the late Mr. Henry Fowler Broadwood. Two morning concerts were given at Mrs. Sartoris's and Lady Falmouth's, and the price of tickets was a guinea. He appeared at Manchester on August 28, 1848, but did not excite as much enthusiasm as was to have been expected, and he also played at Glasgow and Edinburgh, the latter on Oct. 4. Between whiles he had been visiting Scotch friends, such as Miss J. W. Stirling, Lady Murray, and Lord Torphichen. At the close of this tour he was in the deepest dejection of spirits, and was evidently nearing the end. He returned to Paris, and died there between three and four in the morning of Oct. 17, 1849. There was a grand funeral service at the Chapelle de la Madeleine, when Mozart's Requiem was sung; the body was afterwards interred in the cemetery of Père-la-Chaise, near the graves of Cherubini and Bellini. A false date of birth was inscribed on his tombstone.

Robert Schumann, when reviewing Chopin's Preludes for the *Neue Zeitschrift für Musik*, in 1839, called him 'the boldest and proudest poetic spirit of the times!' (*Ges. Schriften*, iii. 122); he might have added with at least equal truth, and in the face of all contemporary opposition, that Chopin was a legitimately trained musician of quite exceptional attainments, a pianist of the first order, and a composer for the pianoforte pre-eminent beyond comparison—a great master of style, a fascinating melodist, as well as a most original manipulator of puissant and refined rhythm and harmony. As he preferred forms in which some sort of rhythmic and melodic type is prescribed at the outset,—such as the mazurka, polonaise, valse, bolero, tarantelle, etc., he virtually set himself the task of saying the same sort of thing again and again; yet he appears truly inexhaustible. Each étude, prelude, impromptu, scherzo, ballade, presents an aspect of the subject not pointed out before; each has a *raison d'être* of its own. With few exceptions, all of which pertain to the pieces written in his teens, thought and form, matter and manner, shades of emotion and shades of style, blend perfectly. Like a magician he appears possessed of the secret to transmute and transfigure whatever he touches into some weird crystal, convincing in its conformation, transparent in its eccentricity, of which no duplicate is possible, no imitation desirable. He was a great inventor, not only as regards the technical treatment of the pianoforte, but as regards music *per se*, as regards composition. He spoke of new things well worth hearing, and found new ways of saying such things. The emotional materials he embodies are not the highest; his moral nature was not cast in a sublime mould, and his intellect was not profound; his bias was romantic and sentimental rather than heroic or *naïve*—but be his material ever so exotic, he invariably makes amends by the exquisite refinement of his diction. He is most careful to avoid melodic, rhythmic, or harmonic commonplaces; a vulgar melody or a halting rhythm seem to have been revolting to him; and as for refined harmony, he strove so hard to attain it, that in a few of his last pieces he may be said to have overshot the mark, and to have subtilised his progressions into obtuseness.

The list of his works extends only up to op. 74, and when bound up in a few thin volumes Chopin is certainly not formidable, yet his published pieces represent an immense amount of care and labour. With regard to rare musical value, originality and perfection of style, the solo pieces may be classed as follows:—études and preludes; mazurkas and polonaises; ballades and scherzi; nocturnes and valses; etc. The two concertos are highly interesting as far as the treatment of the solo part is concerned, but the orchestration is poor. This obvious fact has led certain lovers of Chopin's music to rescore the accompaniments of the two concertos; but, apart from the want of reverence, and apart from what may be called the artistic immorality of such a proceeding, it may be maintained that Chopin did not intend to accompany the solo part more heavily than he has done. At the same time, the concertos and other works with orchestra are more effec-

tive when played on two pianos than in their original form. In his treatment of other instruments than the piano, he is hardly at his ease, and neither the trio, op. 8, nor the sonata with violoncello, op. 65, represents him at his best. In the light but effective polonaise in C for piano and violoncello, Franchomme made various modifications in the violoncello part which are undoubtedly great improvements; the melodic value of the work becomes greater, as well as its general effect. But these changes were made with the composer's sanction.

The seventeen Polish Songs, which were published as op. 74, owe much to traditional sources. They are characteristic of the sort of thing Chopin often contributed, and liked to contribute, to the social gatherings, and to the albums of his female compatriots. The collection consists of a number of fine old tunes, set to new words, and arranged by Chopin. In one or two instances, such as Nos. 16 and 17, it may be that the songs are the work of some amateur, corrected by Chopin.

From certain records by his pupils, it is possible to realise what qualities in a pianist seemed to Chopin most valuable. Touch was of supreme importance; scales were to be practised *legato* with full tone, very slowly at first, and gradually increasing in speed. Scales with many black keys were chosen first, and C major last of all. Selections were made from the studies of Clementi, Cramer, and Moscheles, from the suites, preludes and fugues, of Bach, and from his own Études. Several of Field's nocturnes were recommended for the production of a rich singing tone. 'Everything is to be read *cantabile*, even my passages; everything must be made to sing—the bass, the inner parts, etc.' Double notes and chords in music of Hummel's date and later, had to be struck together, no *arpeggio* being allowed unless indicated by the composer. He generally played shakes according to the old tradition of beginning with the auxiliary note. Many old-fashioned tricks in fingering were revived by Chopin, in spite of the horror with which the pedants of his time regarded them. He would pass the thumb under the little finger, or *vice versâ*, with a distinct bend of the wrist. He would slide from one key to another with the same finger, and this not merely when gliding down from a black to a white key, and he allowed the longer fingers to pass over the shorter, without the aid of the thumb. The fingering of chromatic thirds as he himself marked it in the study, op. 25, No. 5, gives the possibility of a perfect *legato* with a quiet hand.

As to *tempo rubato*, it is most interesting to learn that Chopin always kept a metronome on his piano; his rubato was by no means the unreasoning abandonment of rhythm which we often hear in the present day; 'the singing hand,' as he said, 'may deviate from strict time, but the accompanying hand must keep time.' 'Fancy a tree with its branches swayed by the wind—the stem is the steady time, the moving leaves are the melodic inflections.' He disliked exaggerated accentuation, which 'produces an effect of pedantic affectation.' He also strongly advised his pupils to cultivate ensemble playing.

As to the comparative value of the various editions of Chopin's works, a few words may not be out of place. The earliest, and in many ways the most authoritative, are those published in Paris during the composer's lifetime. Next in order of importance come the collective editions of Tellefsen, Klindworth, and Mikuli (Paris, Moscow, and Leipzig respectively). The English edition of Wessel & Co. (now Edwin Ashdown) ranks as one of the early editions, but there is no evidence that Chopin corrected the proofs. Klindworth's edition is of considerable practical value; his fingerings, however, and occasionally his alterations of the text, diminish its authority. The Peters and Litolff editions are fairly accurate as far as the text is concerned, though the fingering is often queer (*i.e.* based on Klindworth), and the Breitkopf & Härtel edition of the complete works, including the songs and the ensemble pieces, is convenient, although various misprints are copied from older editions, and it is not always a safe guide in regard to details of harmony.

As to the lives of the composer: Liszt's *F. Chopin* is based on some articles which appeared in the *Gazette Musicale* in 1851-52, and was published in book-form in 1879; an English translation, by M. Walker Cook, appeared in 1877, and a German version in 1881. Mme. de Wittgenstein was Liszt's collaborator in this book, as well as in other of his literary productions. Many of the misleading statements regarding Chopin are said to be due to the reminiscences of a Pole named Grzymala. Moritz Karasowski's *Friedrich Chopin*, in two volumes, appeared in 1877. The standard biography of the composer is Professor Niecks's *Life* in two volumes, London, 1888. It is thoroughly trustworthy. Certain books by George Sand, referred to above, may be consulted; and in regard to the works, rather than to the man, Jean Kleczynski's *Chopin—de l'interprétation de ses œuvres*.

The list of Chopin's works is as follows. Those marked with an asterisk were published posthumously:—

Op.
1. Rondo, C minor.
2. 'La ci darem' Variations (with Orchestra).
3. Introduction and Polonaise, in C (PF. and Vcello).
4. *Sonata, C minor.
5. *Rondeau à la Mazur.
6. Four Mazurkas.
7. Five Mazurkas.
8. Trio (PF. and Strings).
9. Three Nocturnes.
10. Twelve Studies.
11. Concerto, E minor.
12. Variations (with Orch.), 'Ludovic' (Hérold).
13. Fantasia on Polish airs.
14. Krakoviak Rondo (with Orch.)
15. Three Nocturnes.
16. Rondo, E♭.
17. Four Mazurkas.
18. Valse, E♭.
19. Bolero.
20. Scherzo, B minor.
21. Concerto, F minor (with Orch.)
22. Polonaise, E♭ (with Orch.)
23. Ballade, G minor.
24. Four Mazurkas.
25. Twelve Studies.
26. Two Polonaises.
27. Two Nocturnes.
28. Twenty-four Preludes.
29. Impromptu, A♭.

Op.
30. Four Mazurkas.
31. Scherzo, B♭ minor.
32. Two Nocturnes.
33. Four Mazurkas.
34. Three Valses.
35. Sonata, B♭ minor.
36. Impromptu, F♯.
37. Two Nocturnes.
38. Ballade, F.
39. Scherzo, C♯ minor.
40. Two Polonaises.
41. Four Mazurkas.
42. Valse, A♭.
43. Tarantelle.
44. Polonaise, F♯ minor.
45. Prelude, C♯ minor.
46. Allegro de Concert.
47. Ballade, A♭.
48. Two Nocturnes.
49. Fantasia, F minor.
50. Three Mazurkas.
51. Impromptu, D♭.
52. Ballade, F minor.
53. Polonaise, A♭.
54. Scherzo, E.
55. Two Nocturnes.
56. Three Mazurkas.
57. Berceuse.
58. Sonata, B minor.
59. Three Mazurkas.

Op.
60. Barcarole.
61. Polonaise Fantaisie.
62. Two Nocturnes.
63. Three Mazurkas.
64. Three Valses.
65. Sonata, G minor (PF. and Violoncello).
66. *Fantaisie Impromptu.
67. *Four Mazurkas.
68. *Four Mazurkas.
69. *Two Valses.
70. *Three Valses.
71. *Three Polonaises.
72. *Nocturne, E minor, Marche funèbre in C minor, and three Écossaises.
73. *Rondo for two PFs. in C.

Without opus-number.

*Seventeen Songs with PF. acct.
Three Studies.
*Mazurkas in G, B♭, D, C, and A minor.
*Valses, E major and minor.
*Polonaises, G♯ minor and B♭ minor.
*Variations in E, 'The Merry Swiss Boy.'
Duet Concertante, on 'Robert' (for PF. and Vcello, written with Franchomme).

In addition to these have lately appeared a fugue and a nocturne, the musical value of which is *nil*. E. D.

CHORAGUS. A titular functionary in the University of Oxford, who derives his name from the leader of the chorus in the ancient Greek drama (χοραγός). In the year 1626 Dr. William Heather, desirous to ensure the study and practice of music at Oxford in future ages, established the offices of Professor, Choragus, and Coryphæus, and endowed them with modest stipends. The Professor was to give instruction in the theory of music, the Choragus and the Coryphæus were to superintend its practice. 'Twice a week,' say the ordinances of Dr. Heather, 'is the Choragus to present himself in the Music School and conduct the practice, both vocal and instrumental, of all who may choose to attend.' The instruments to be used by the students at these performances were furnished out of Dr. Heather's benefactions; provision was made for obtaining treble voices, and everything requisite to the regular and practical cultivation of music as one of the academic studies appeared to have been devised. Yet Dr. Heather must have had certain misgivings as to the future of his institutions, for he enacts that 'if *no one* shall attend the meetings in the Music School, then the Choragus himself shall sing with two boys for at least an hour.' Little as Dr. Heather asked of posterity, he obtained still less. The practices ceased; the instruments were dispersed, and their remnant finally broken up by the authorities as old lumber; and no Choragus has either conducted or sung in the Music School within the memory of man. The history of this well-meant endowment may point either to the indifference and mismanagement of the University, or to the doubtful vitality of official attempts to foster a free art. Latterly the Choragus was charged, along with the Professor, with the conduct of the examinations for musical degrees, but this duty no longer exists, and even the name and office of the Coryphæus have become extinct. The emoluments of the office, derived in part from the above-mentioned endowment, in part from fees paid on examination, amount in all to an insignificant total. C. A. F.

CHORAL FANTASIA. A composition of Beethoven's (op. 80) in C minor, for piano solo, orchestra, solo quartet, and chorus. It is in two sections—an 'Adagio' and a 'Finale, Allegro.' The Adagio is for piano solo in the style of an improvisation; indeed it was actually extemporised by Beethoven at the first performance, and not written down till long after. The Orchestra then joins, and the Finale is founded on the melody of an early song of Beethoven's—'Gegenliebe'—being the second part of 'Seufzer eines Ungeliebten' (1795—first, variations for piano and orchestra, Allegro; then an Adagio; then a Marcia, assai vivace; and lastly, an Allegretto in which the solo voices and chorus sing the air to words by Kuffner in praise of music. The form of the piece appears to be entirely original, and it derives a special interest from its being a precursor of the Choral Symphony. In both the finales are variations; the themes of the two are strikingly alike; certain passages in the vocal part of the Fantasia predict those in the Symphony (compare 'und Kraft vermählen' with 'überm Sternenzelt'); and lastly, there is the fact that Beethoven speaks of the finale of the Symphony as 'in the same style as the Fantasia but far more extended' (Letter to Probst, March 10, 1824). It was first performed by Beethoven himself, at the Theatre 'an der Wien,' Dec. 22, 1808; published July 1811; and dedicated to the King of Bavaria. Its first appearance in the Philharmonic programmes is April 24, 1843—repeated on May 22,—Mrs. Anderson pianist both times. Sketches for the Fantasia are said to exist as early as 1800, with those for the six Quartets (op. 18), and the C minor Symphony (Thayer, *Chron. Verzeichniss*, No. 142). G.

CHORAL HARMONIC SOCIETY. The members of this amateur society met at the Hanover Square Rooms for the practice of concerted vocal and instrumental music. In 1837 J. H. B. Dando was the leader, Holderness the conductor, and H. Bevington the organist. The programmes usually included a glee or madrigal with symphonies, overtures, and vocal solos. C. M.

CHORAL HARMONISTS' SOCIETY. An association of amateurs devoted to the performance of great choral works with orchestral accompaniments; held its first meeting at the New London Hotel, Bridge Street, Blackfriars, Jan. 2, 1833, and the subsequent ones at the London Tavern until the last Concert, April 4, 1851, twelve months after which the Society was dissolved. It had a full band (containing, in 1838, 14 violins, 6 violas, 3 violoncellos, 3 basses, with complete wind) and chorus. The solo singers were professionals — Clara Novello, Miss Birch, Miss Dolby, J. A. Novello, etc. Its conductors were V. Novello, Lucas, Neate, and Westrop; leader J. H. B. Dando. The programmes were excellent.

Among the works performed were Beethoven's Mass in D (April 1, 1839, and again April 1, 1844), Haydn's 'Seasons,' Mendelssohn's 'Walpurgisnight,' etc.

The Choral Harmonists were a secession from the CITY OF LONDON CLASSICAL HARMONISTS, who held their first meeting April 6, 1831, and met alternately at Farn's music shop, 72 Lombard Street and the Horn Tavern, Doctors' Commons. T. H. Severn was conductor, and Dando leader, and the accompaniments were arranged for a septet of strings. Among the principal works thus given were—'Oberon,' Spohr's Mass in C minor, and 'Letzten Dinge,' a selection from Mozart's 'Idomeneo,' etc. The name 'City of London' was intended to distinguish it from the CLASSICAL HARMONISTS, a still older society, meeting at the Crown and Anchor Tavern, Strand, of which Griffin and V. Novello were conductors. C. M.

CHORAL SYMPHONY. The ordinary English title for Beethoven's Ninth Symphony (op. 125) in D minor, the Finale of which is a chain of variations for solos and chorus. Fr. 'Symphonie avec Chœurs.' Beethoven's own title is 'Sinfonie mit Schluss-Chor über Schiller's Ode An die Freude.' The idea of composing Schiller's Ode to Joy 'verse by verse,' occurred to Beethoven as early as 1792 (see p. 220); but no traces remain of music to it at that date. In 1811 we find a sketch for an 'Ouverture Schiller,' with the opening words of the ode set to notes (Thayer, *Verz.* No. 238), but no further mention of it has been discovered till 1822. The first allusion to the Symphony in D minor is as the third of three which he projected while writing Nos. 7 and 8 in 1812 (pp. 246, 247). The first practical beginning was made in 1817, when large portions of the first movement and the Scherzo are found in the sketch-books. The Finale was settled to be choral, but Schiller's Ode is not named till after the revival of 'Fidelio,' in Nov. 1822. It then appears in the sketch-books. After inventing with infinite pains and repetitions the melody of the Finale, and apparently the variations, a mode had to be discovered of connecting them with the three preceding movements. The task was one of very great difficulty. The first solution of it was to make the bass voice sing a recitative, 'Let us sing the song of the immortal Schiller.' This was afterwards changed to 'O friends, not these tones' (*i.e.* not the tremendous discords of the Presto 3-4—which follows the Adagio—and of the Allegro assai), 'Let us sing something pleasanter and fuller of joy,' and this is immediately followed by the Chorus 'Freude, Freude.' The whole of this process of hesitation and invention and final success is depicted in the most unmistakable manner in the music which now intervenes between the Adagio and the choral portion of the work, to which the reader must be referred.

The Symphony was commissioned by the Philharmonic Society (Nov. 10, 1822) for £50, and they have a MS. with an autograph inscription, 'Grosse Sinfonie geschrieben für die Philharmonische Gesellschaft in London von Ludwig van Beethoven.' But it was performed in Vienna long before it reached the Society, and the printed score is dedicated (by Beethoven) to Frederick William III., King of Prussia. The autograph of the first three movements is at Berlin, with a copy of the whole carefully corrected by Beethoven.

The first performance took place at the Kärnthnerthor Theatre, May 7, 1824. First performance in London, by the Philharmonic Society, March 21, 1825. At the Paris Conservatoire it was played twice, in 1832 and 1834, half at the beginning and half at the end of a concert. At Leipzig, on March 6, 1826, it was played from the parts alone; the conductor having never seen the score! G.

CHORALE (Ger. *Choral*, and *Corale*), a sacred choral song (*cantus choralis*) which may almost be said to belong exclusively to the reformed church of Germany, in which it originated. Luther introduced a popular element into worship by writing hymns in the vernacular and wedding them to rhythmic music, which should appeal to the people in a new and more lively sense than the old-fashioned unrhythmic church music. The effect was as great (with all due respect to the different quality of the lever) as the 'Marseillaise' in France or 'Lillibullero' in England, or Auber's 'Masaniello' and the 'Brabançonne' in Brussels; for it cannot be doubted that no insignificant share in the rapid spread of the new ideas was owing to these inspiriting and vigorous hymns, which seemed to burst from the hearts of the enthusiastic and earnest men of whom Luther was the chief. The movement passed rapidly over Germany, and produced in a short time a literature of sacred hymns and tunes which cannot be surpassed for dignity and simple devotional earnestness. Luther and his friend Walther brought out a collection at Erfurt in 1524, which was called the 'Enchiridion,' or handbook. Though not absolutely the first, it was the most important early collection, and had a preface by Luther himself. A great number of collections appeared about the same time in various parts of Germany, and continued to appear till the latter part of the 17th century, when, from political as well as religious circumstances, the stream of production became sluggish, and then stopped altogether.

The sources of the chorales were various; great numbers were original, but many were adapted from the old church tunes, and some were from altogether secular sources. For instance, the chorale 'Der Du bist drei' is from the ancient 'O beata lux Trinitatis'; and 'Allein Gott in der Höh' sei Ehr,' which Mendelssohn uses in a modified form in 'St. Paul,' is also

based upon a hymn of the Roman Church. On the other hand, 'Herr Christ der einig' Gott's Sohn' is taken from a secular tune, 'Ich hört' ein Fräulein klagen'; and 'Herzlich thut mich verlangen,' which appears several times in Bach's 'Matthäus-Passion'—for instance to the words 'O Haupt voll Blut und Wunden'—is taken from a secular tune, 'Mein G'muth ist mir verwirret.' Of many of them it is difficult to fix the origin. That generally known in England as Luther's Hymn ('Es ist gewisslich') cannot with probability be attributed to him; but there seems no doubt that the famous 'Ein' feste Burg,' which Meyerbeer took as the text of 'Les Huguenots,' and Mendelssohn used in his Reformation Symphony, Wagner in his 'Kaisermarsch,' and Bach in various ways in his Cantata to the same words, is really by the great reformer. The most prolific composer of chorales was Johann Crüger, who was born some time after Luther's death. One of his, 'Nun danket alle Gott,' is best known in England from its use by Mendelssohn in his 'Lobgesang.'

The chorale which Mendelssohn uses in 'St. Paul,' at the death of Stephen, is by Georg Neumark, who also wrote the original words to it. In the preface to Bennett and Goldschmidt's 'Chorale-book for England' this tune is said to have been so popular that in the course of a century after its first appearance no less than 400 hymns had been written to it.

A very famous collection of tunes was published in Paris in 1565 by Claude Goudimel. Most of these soon found their way into the German collections, and became naturalised. Among them was the tune known in England as the 'Old Hundredth.' See OLD HUNDREDTH TUNE.

The custom of accompanying chorales on the organ, and of playing and writing what were called figured chorales, caused great strides to be made in the development of harmony and counterpoint, and also in the art of playing the organ; so that by the latter part of the 17th century Germany possessed the finest school of organists in Europe, one also not likely to be surpassed in modern times. C. H. H. P.

In tracing the history of the Chorale it is extremely difficult to distinguish the composer of the melody or canto fermo from the harmoniser (called *Tonsetzer* by Winterfeld). A large proportion of extant chorales appear to be based on old church tunes, so that they present a continuity with the past which is quite consistent with Luther's earlier practice. As to the ancient origin of these tunes, see LUTHER. The Chorales used in this first period are treated as Motets [see MOTET], as the examples in Winterfeld show: that is, the melody is given out as a canto fermo, generally in a tenor or at least a middle part, with the other parts in more or less florid counterpoint. The music is not yet measured [see MEASURE] or divided into equal rhythm (*musica mensurabilis*). The contrapuntal treatment, which became more elaborate under such musicians as Stephen Mahu and Joh. Kugelmann—both early in the 16th century—advanced greatly in the number of voice-parts and general complexity towards the end of the 16th and first half of the 17th century, the chief writers being Gumpelzhaimer, Joh. Eccard, Mich. Praetorius, Joh. Schopp, and Joh. Rosenmüller. This again, when the singing came to be restricted to the canto fermo in unison, originated the school of organ accompaniment to the Chorales such as we see in Bach's organ works, and as it is still occasionally to be heard in Germany.

It has been noticed that some chorales are based on secular songs of an earlier date. The old ecclesiastical forms of music inherited from Saint Gregory were proper to the Latin hymns of the Breviary; but for hymns written in a modern language and forming no part of a prescribed ritual, the freer style used in secular songs was, or was soon found to be, quite natural. Most, however, of the secular melodies thus used were not so employed till towards the end of the 16th or beginning of the 17th century.

Simultaneously with this elaborate contrapuntal treatment, which demanded the resources of a church with a good choir, it is interesting to note the tendency towards a simpler treatment. This is found *par excellence* in Goudimel's setting of Marot and Beza's Psalms, 1565 [see GOUDIMEL], in which there are four voices, with counterpoint note against note, and the melody generally in the tenor, but in twelve psalms in the discant. In the latter point this book is the harbinger of one of the chief revolutions in the history of hymn-music. The revolution is fully effected in 1586 by Lucas Osiander in his 'Geistliche Lieder und Psalmen mit 4 Stimmen auf Contrapunkts weiss . . . *also gesetzt, dass ein christliche Gemein durchauss mit singen kann.*' The title shows that the removal of the melody to the upper part was due to a desire for congregational singing [and implies that the custom of putting the melody in the top part was even then coming into use. In the Scottish Psalter of 1635 the tenor part is still labelled 'the Church Part']. This book was followed in 1594 by a similar treatment of the Psalter in Lobwasser's version by Samuel Marschal. The chorale was after this sung either in four voice-parts, with the canto fermo in the discant; or in unison, with florid counterpoint on the organ. The latter is considered the more classical form in Germany. [See also BOURGEOIS and FRANC.]

The composition, harmonisation, and collection of chorales for the services of the Lutheran (and other Protestant) churches engaged the artistic talents of a whole school of musicians, of whom some of the most eminent are treated in special articles. [See AGRICOLA, Martin; ALTENBURG, M.; BRUCK, A. de; CALVISIUS,

Seth; CRÜGER, J.; DIETRICH, S.; DUCIS, Benedictus; EBELING, J. G.; ECCARD, Joh.; FRANK, Melchior; FREYLINGHAUSEN, J. A.; GUMPELZHAIMER, A.; HAMMERSCHMIDT, A.; HERMAN, N.; HINTZE, J.; ISAAC, Heinrich; KUGELMANN, J.; LÖWENSTERN, M. A. von; MAHU, Stephen; MARSCHAL, S.; NEUMARK, Georg; OSIANDER, L.; PRAETORIUS, Michael and Jacob; RESINARIUS, B.; RHAU, G.; ROSENMÜLLER, J.; SCHEIDT, S.; SCHEIN, J. The literature of the subject is considerable, and only a few of the most important modern works can conveniently be mentioned here. The great standard work is that of Carl von Winterfeld, *Der evangelische Kirchengesang und sein Verhältniss zur Kunst des Tonsatzes*, in three large quarto volumes, with abundant specimens of the setting of the old tunes from ancient manuscripts (Leipzig, 1843-47); it is, however, not clearly arranged. G. Döring's *Choralkunde* (Danzig, 1865), and E. E. Koch's *Geschichte des Kirchenlieds und Kirchengesangs, mit besonderer Rücksicht auf Württemberg*, 2 vols. (Stuttgart, 1847), are useful guides. [Mention should be made of Dr. Philipp Wolfrum's *Entstehung und erste Entwickelung des deutschen evangelischen Kirchenliedes* (1890).] Of collections of chorales, treated either as four-voice hymns or for singing in unison, there is a great number. The following may be noted as having especial interest:—'J. S. Bach's mehrstimmige Choralgesänge und geistliche Arien zum erstenmal unverändert . . . herausgegeben von Ludwig Erk,' 1850; 'Choralbuch, enthaltend eine Auswahl von 272 der schönsten . . . Kirchengesänge in vierstimmige Bearbeitung. Nebst einem Anhang, bestehend aus 69 von J. S. Bach theils ganz neu componirten, theils im Generalbass verbesserten Melodien. Herausgegeben von J. G. Lehmann,' third edition, 1871; '371 vierstimmige Choralgesänge von J. S. Bach.' [Edited by C. F. Becker.] To what extent the melodies of these, which editors persist in attributing to Bach, are really his, is a very difficult question on which the present writer hesitates as much to pronounce an opinion as on the similar question of Luther's authorship of the music of certain hymns. Another carefully prepared collection which bears the respectable names of Baron von Tucher, Immanuel Faisst, and Joh. Zahn, is entitled 'Die Melodien des deutschen evangelischen Kirchen-Gesangbuchs in vierstimmigen Satze für Orgel und Chorgesang,' Stuttgart, 1854. A good popular book also is 'Hauschoralbuch: alte und neue Choralgesänge mit vierstimmigen Harmonien,' of which the 7th edition was published at Gütersloh, 1871. R. M.

CHORALE-ARRANGEMENTS. The chorale-melodies of the Lutheran Church have exerted a powerful, although indirect, influence on classical music, an influence far greater than that of any of the older ecclesiastical plain-song melodies, with the possible exception of the 'Dies iræ.' One main cause of this is that the composers of the classical school were mostly Germans, and to them and their hearers the chorales afforded an obvious means of conveying the expression of many moods of emotion; and another important cause was derived from the circumstance that the chorale-tunes were in a special manner the property of the people, of the congregation, rather than of the trained choir. It was this circumstance which in the earlier days made it necessary to pause at the end of each line of the hymn, in order to allow a margin of time for the laggards among the congregation to overtake the rest before beginning a new line. The organist very soon found that these pauses allowed room for the introduction of impromptu interludes, and by degrees the interludes grew in importance and in organic connection with the chorale-tune in which they occurred, until the ingenious musicians were accused of distracting the congregation by means of the interludes—a charge actually brought against Bach (see Spitta, *Bach*, Engl. tr. i. 312, 315, 316). Whether any great number of this master's very numerous chorale-arrangements were intended to be used during the actual performance of the hymns in church, may be doubted; but the convention of separating the lines of the hymn-tune by long passages theoretically based on it undoubtedly gave rise to the forms of chorale-prelude, which, with the allied forms of chorale-arrangement, and chorale-interlude, had an influence which has lasted to the present day. In what may be called their typical structure, as shown in the works of Joh. Pachelbel and others, and as perfected by Bach, these organ-pieces, whatever their exact title, generally begin with a phrase taken from the first notes of the hymn-tune, a phrase often treated fugally, preparing the way for the announcement of the hymn-tune itself, which is given out line by line, each line being preceded by a passage closely connected with its opening notes. The same structure is apparent in many of the great 'chorale-choruses' in Bach's church cantatas, where the preludial matter is confined to the instrumental accompaniment, and each line of the chorale is sung in long notes by one section of the choir, while the others sing passages of a more or less ornate description, above or below. Sometimes both in organ-pieces and choral works, the preludial matter is independent of the chorale-tune, and in other cases the chorale is treated as a *canto fermo*, or introduced in the course of a solo or duet which is otherwise free in structure. The great majority of the cantatas, if not quite all, end with a version of the chorale in solid harmony, obviously intended for congregational use, like those which occur at frequent intervals in the course of the Passion Music. No more instructive instance of Bach's

manner of treating a chorale-tune can be pointed out than the cantata 'Wachet auf,' where the preludial matter of the first chorus is based on the hymn, which is gone through in very florid guise, line by line; the middle number of the cantata starts with an independent bourrée-theme of the most inspiring kind, in the course of which the chorale is again sung in the tenor part, and finally the last stanza of the hymn is sung in straightforward, homophonic form. The gigantic chorus at the opening of the 'St. Matthew Passion' is another example of Bach's finest treatment of a chorale; the two choirs proceed with a kind of dialogue on a theory independent of the chorale, and the hymn-tune is sung by a third choir in combination with the rest. To enumerate the instances in which German composers, before or after Bach, have employed chorales, is quite superfluous; but a few examples may be quoted of special importance. The use of 'Ach Gott vom Himmel' in the duet of armed men in 'Die Zauberflöte' gives special solemnity to the noble scene in which it occurs; and among other operatic instances mention must be made to the frequent use of 'Ein' feste Burg' in 'Les Huguenots,' where it stands as a type of the reformed faith. Apart from the stage, the value of an emotional suggestion, conveyed by allusions to well-known chorale-tunes was not ignored by composers of the 'romantic' school; Mendelssohn, in the finale of the trio in C minor, in the slow movement of the violoncello sonata in D, at the close of the pianoforte fugue in E minor, and in other places, employed the device with success, and Chopin was fond of creating a kind of ecclesiastical atmosphere by strains in more or less conscious imitation of chorales, while in one of his finest compositions, the scherzo in C sharp minor, he introduces portions of an actual chorale, associated with the words 'Er ist auf Erden kommen arm,' the same tune that Mendelssohn refers to in his trio. The employment of 'Wie schön leuchtet' in the third of Cornelius's exquisite 'Weihnachtslieder' will be remembered; and more recently, the emotional and spiritual eloquence of the chorales has been well brought out by Dr. Philipp Wolfrum, who has not only written a book on the subject of the chorales (referred to above, *s.v.* CHORALE) but has written a Christmas cantata in which many of the most familiar of German hymn-tunes are elaborately treated.

In some of the eleven 'Choral-Vorspiele' which make up the only posthumous work of Brahms, the composer reverts to the strict Bach pattern, basing his preludial matter on the theme of each line in succession (see Nos. 1, 4, and 7); others, such as 'Schmücke dich, o liebe Seele,' are set with a florid accompaniment, and in this particular instance it may be remarked that the pauses printed over the last note of each line seem to indicate merely the fact that the lines end with these notes, not to direct any cessation of the flowing accompaniment. In Nos. 2, 3, 8, and 9, the melody itself is ornamented, and in one only, No. 10, is the preludial figure independent of the chorale. The last introduces, in its exquisite effect of a double echo, a device new in chorale-arrangement, and in the subject of the words, and the inherent beauty of the music, is altogether worthy to be the last musical utterance of one of the greatest masters of all time. M.

CHORD is the simultaneous occurrence of several musical sounds, producing harmony, such as the 'common chord,' the chord of the sixth, of the dominant, of the diminished seventh, of the ninth, etc. C. H. H. P.

CHORISTER (Querestere and other variants). The origin of the word is obvious—a singer in a chorus in church or theatre. Strictly speaking the designation has no age limit or sex restriction, but it is now generally reserved for boy singers in cathedrals or church choirs. This ecclesiastical office is of ancient origin. Considerations of space allow the following historical outline in regard to England only. At an early period the education and training of choristers were considered. The oldest choral grammar school in this country is that of St. Paul's Cathedral, which dates from the time of Edward the Confessor. It is mentioned by Ingulphus; and through all the vicissitudes of more than eight centuries, this Foundation still exists, and to-day the Choir School of St. Paul's Cathedral is a model of its kind. The office of Master of the Children (choristers) at the Chapel Royal can be traced as far back as the reign of Edward IV., *circa* 1473-74. (See an article on 'The Chapel Royal,' *Musical Times*, Feb. 1902.)

In the Foundation Statutes of Cathedrals, Chapels Royal, and College Chapels at the Universities of Oxford and Cambridge choristers find a place. When, nearly six hundred years ago, King Edward III. founded the College of Windsor (St. George's Chapel), provision was made for six choristers (increased to thirteen by Edward IV.), who should have 'clear tuneable voices' and 'be duly instructed in grammar and song, when not engaged in the services of the chapel.' In 1550 it was provided further that 'every chorister of the College, whose voice from henceforth shall change, shall have five marks yearly for his exhibition towards his finding at grammar school for the space of four years, if he be apt and will diligently apply himself to learn.' Also it was enjoined that 'one of the priests or clerks should be chosen yearly to be Grandsire of the choristers, and to teach them the catechism and the principles of grammar and to write, and also to see to their manners'; he was 'bound to teach ten other poor children at the least freely, if they resort unto him.' He was to 'teach the ten choristers every week day in the year from six o'clock in the morning until eight, and from

twelve o'clock daily until two; which teacher should receive for his labours quarterly twenty-five shillings. The rest of the day the teacher of Music shall instruct the choristers diligently to sing and to play upon instruments.'

As an example of a Cathedral 'choir school' Foundation, that of Durham may be instanced. Patrick Sanderson, in his *Antiquities of the Abbey, or Cathedral Church of Durham* (1767), p. 62, thus refers to it:—

> In the centry-garth, under the south end of the nine altars betwixt two pillars adjoining to the nine altars door, was a song-school, erected for the teaching six children to sing, for the maintenance of God's service in the Abbey Church, who had their meat and drink among the children of the Almery, at the expence of the house. This school was built with the Church, and was neatly wainscotted within, round about, two yards high, and had a desk from one end of the school to the other to lay their books on. The floor was boarded for warmness, and round about it long forms were fastened in the ground for the children to sit on, and the place where the master sat and taught was all close boarded for warmness. His office was to teach the six children to sing, and play on the organs every principal day, when the monks sang their high mass, and at even-song; but when the monks were at mattens, and service at midnight, one of them played on the organs himself, and none else. The master had his chamber adjoining to the song-school, where he lodged, and his diet in the prior's hall among the prior's gentlemen: and his other necessaries were supplied at the common charge, till the suppression of the house, when the school was pull'd down, so it is difficult to find where it stood.

The Durham Statutes were revised in 1555. Statute XXVII., 'The Choristers and their Master,' reads thus:—

> There shall be ten young boys as choristers, with good voices, to serve in the choir; to teach whom (as well in singing as in good manners, besides the number of clerks) a person shall be appointed, of good fame and conversation, skilful in singing and in the management of the organ: And to encourage his greater attention, he shall have leave of absence on ordinary days; but he must constantly attend upon Sundays and holidays to perform the service.
>
> When he has leave of absence, the precentor shall appoint one of the minor canons, or singing-men who understands playing on the organ, to do that office. If the master is negligent of the boys' health or education, after a third admonition, to be removed. He shall likewise be sworn to perform his duty.

Statute XXXI. ('of the commons') was to the effect that the minor canons, the upper-master of the Grammar School, and the master of the choristers should receive six shillings per month; the singing men each four shillings and eightpence; the grammar scholars and choristers three shillings and fourpence. Statute XXXII. (The Minister's Vestments, commonly called *Liveries*) enacted that 'The minor canons, clerks, and other ministers of the church, choristers, grammar scholars, cooks, and poor men shall use an upper vestment of the same colour. Each minor canon, and the head-master of the grammar school, four yards of cloth for his gown at five shillings a yard; the master of the choristers three yards of the same; the choristers, grammar scholars, and under-cook, two yards and a half at three shillings and fourpence.'[1]

Quite within living memory cathedral choristers suffered scandalous neglect at the hands of deans and chapters, and the treatment meted out to those children of tender years by the masters set over them was often brutal. Cathedral choristers owe their present happy condition very largely to a lady whose name should ever be honoured and remembered—Miss Maria Hackett (1783-1874). This tender-hearted benefactress devoted her time and means to ameliorating the condition of choristers in all parts of the kingdom, by personal visitations to the various cathedrals, and by her pen in vigorously waging war with deans and chapters, and bringing them to a sense of their duties. Miss Hackett, who died at the ripe age of ninety-one, was permitted to see the realisation, to a very large extent, of the object to which she had devoted her long, useful, and beneficent life.

In olden times choristers were employed in the Mystery Plays, and the demanding of spur-money was formerly one of their pecuniary diversions. The 'boy bishop' (at Salisbury and elsewhere) came from the ranks of the choristers. As showing to what distinction a chorister may attain, it will suffice to mention a few names of English church musicians who held that office at the outset of their careers: Tallis, Orlando Gibbons, Henry Purcell, Blow, Croft, Greene, Attwood, Goss, S. S. Wesley, E. J. Hopkins, Stainer, and Sullivan.

For literature on the subject see: (1) *Historical Notices of the Office of Choristers*, by the Rev. James Elwin Millard, B.A. (Joseph Masters), 1848; (2) Sir F. A. Gore Ouseley's 'Essay on Cathedral Choristers' in *Essays on Cathedrals*, edited by Dean Howson (John Murray), 1873; (3) *The Organists and Composers of St. Paul's Cathedral*, by John S. Bumpus, 1891; (4) an article on 'St. Paul's Cathedral Choir School,' in *Musical Times*, May 1900; (5) an article on 'The Choir School of St. George's Chapel, Windsor,' *Musical Times*, March 1903; (6) a series of articles, by John S. Bumpus, on 'St. Paul's Cathedral Choir School,' in *Musical News*, beginning Nov. 21, 1903; and (7) especially the various writings of Miss Maria Hackett, the choristers' friend, above referred to. F. G. E.

CHORLEY, HENRY FOTHERGILL, journalist, author, and art critic, was born Dec. 15, 1808, at Blackley Hurst, in Lancashire. Sprung from an old Lancashire family, he had a self-willed, eccentric character, and an erratic temperament, common to most of its members, which accorded ill with the rigid tenets of the Society of Friends, to which they belonged. At eight years of age he lost his father, and he received afterwards a

[1] The writer is indebted to Professor Philip Armes, organist of Durham Cathedral, for this information. See also William Hutchinson's *History and Antiquities of the County Palatine of Durham* (Newcastle, 1785-94), vol. ii. p. 133 *et seq.* for further information.

somewhat desultory education, first at the hands of private tutors, and then at a day-school at St. Helen's. School, however, was intolerable to him. At an early age he was removed, and placed in a merchant's office. This suited him as little. The only approach to systematic teaching in music which he ever received was from J. Z. Herrmann, afterwards conductor of the Liverpool Philharmonic Society. It soon became evident that nothing like executive proficiency was to be attained by him, and this he had the sense to perceive and acknowledge. Music, however, remained his leading passion. He frequented all the performances within reach; and his notes of these in his journal bear witness to the steady growth of his judgment. In September 1830 he made his first appearance in the columns of the *Athenæum*, and shortly after was received upon its staff. He then settled in London, and continued to write for the *Athenæum* until within a few years of his death in 1872. The work entrusted to him was very varied, and shows how high an estimate of his ability must have been formed by its shrewd editor, before an untried youth could have been selected to criticise such authors as Moore, Landor, Southey, Crabbe, Mrs. Hemans, William and Mary Howitt, and Mrs. Jameson; or to write the obituary notice of Coleridge. In all this he acquitted himself admirably, but naturally made some enemies, partly through the criticisms of other writers being attributed to his pen. At the same time he attempted composition in other branches of literature—novels, dramas, biographies, and poems. Among these may be mentioned *Sketches of a Seaport Town* (1834); *Conti, the Discarded* (1835); *Memorials of Mrs. Hemans* (1836); *The Authors of England* (1838); *The Lion, a Tale of the Coteries* (1839); *Music and Manners in France and North Germany* (1841); *Pomfret* (1845); 'Old Love and New Fortune' (1850), a five-act play in blank verse; *The Lovelock* (1854); *Roccabella* (1859); *The Prodigy* (1866); *Duchess Eleanour* (1866). He dramatised G. Sand's 'L'Uscoque,' set to music by Benedict; for whom also he wrote the libretto of 'Red Beard.' Besides translating many foreign libretti, he wrote the original word-books of one version of the 'Amber Witch' (Wallace), of 'White Magic' (Biletta), of the 'May Queen' (Bennett), 'Judith' and 'Holyrood' (Leslie), 'St. Cecilia' (Benedict), 'Sapphire Necklace' and 'Kenilworth' (Sullivan), and words for many songs by Meyerbeer, Goldschmidt, Gounod, Sullivan, etc. He will be best remembered, however, as a musical critic. Within a year of his joining the staff of the *Athenæum* he had that department entrusted entirely to him, which he did not give up till 1868. His two published works which will live the longest are those which contain the deliberate expression of his opinions on the subject of music, viz. *Modern German Music* (1854)—a republication, with large additions, of his former work *Music and Manners*—and *Thirty Years' Musical Recollections* (1862). Beside these may be mentioned his *Handel Studies* (1859), and *National Music of the World* (edited by H. G. Hewlett after Chorley's death, and published 1880). His musical ear and memory were remarkable, and his acquaintance with musical works was very extensive. He spared no pains to make up for the deficiency of his early training, and from first to last was conspicuous for honesty and integrity. Full of strong prejudices, yet with the highest sense of honour, he frequently criticised those whom he esteemed more severely than those whom he disliked. The natural bias of his mind was undoubtedly towards conservatism in art, but he was often ready to acknowledge dawning or unrecognised genius, whose claims he would with unwearied pertinacity urge upon the public, as in the cases of Hullah, Sullivan, and Gounod. Strangest of all was his insensibility to the music of Schumann. 'Perhaps genius alone fully comprehends genius,' says Schumann, and genius Chorley had not, and, in consequence, to the day of his death he remained an uncompromising opponent of a musician whose merits had already been amply recognised by the English musical public. He was still more strongly opposed to recent and more 'advanced' composers. Of Mendelssohn, on the other hand, he always wrote and spoke with the enthusiasm of an intimate friend. Besides his many notices in the *Athenæum* and in the musical works already mentioned, he contributed an article on Mendelssohn to the *Edinburgh Review* (January 1862), and a Preface to Lady Wallace's translation of the *Reisebriefe*. In the second volume of his letters Mendelssohn names him more than once. He had, indeed, won the esteem and friendship of most of the distinguished literary and artistic men and women of his day, and 'it was not a small nor an obscure number, either in England or on the continent, who felt, at the announcement of his death, Feb. 16, 1872, than an acute and courageous critic, a genuine if incomplete artist, and a warm-hearted honourable gentleman had gone to his rest.' (See *H. F. Chorley, Autobiography, Memoir, and Letters*, by H. G. Hewlett. London, 1873.) He died in London, and was buried in the Brompton Cemetery. J. M.

CHORON, ALEXANDRE ÉTIENNE, born at Caen, October 21, 1772, died at Paris, June 29, 1834. He was a good scholar before becoming a musician. He began the study of music without assistance, but afterwards received lessons from Roze, Bonesi, and other Italian professors. Highly gifted by nature, he soon acquired great knowledge in mathematics, languages, and every branch of music, and published his *Principes d'accompagnement des écoles d'Italie* (Paris, 1804, 3 vols.), in which he introduced Sala's practical exercises on fugue and counterpoint,

Marpurg's treatise on fugue, many exercises from Padre Martini's 'Esemplare,' and a new system of harmony of his own—a work which cost him much time and money. In 1805 he became a music publisher, and published many fine works of the best Italian and German masters. In conjunction with Fayolle he then undertook the publication of his *Dictionnaire des Musiciens* (2 vols., 8vo, Paris, 1810-11). Though devoted to his scientific studies and hampered with an unsuccessful business, Choron could not resist the temptation of trying his powers as a composer, and gave to the public 'La Sentinelle,' a song still popular, and introduced in many French plays. But his great scheme was his *Introduction à l'étude générale et raisonnée de la Musique*, a capital book, which he left unfinished, because his necessities obliged him to devote his time to teaching music and to accept the situation of 'Directeur de la musique des fêtes publiques' from 1812 to the fall of Napoleon. He was appointed director of the Académie royale de Musique (Opéra) in January 1816, but the appointment having been rudely revoked in 1817 he founded a school for the study of music, which was supported by the Government from 1824 to 1830 under the title of 'Institution royale de Musique classique et religieuse,' but declined rapidly after the revolution of the latter year. Amongst the musicians educated by Choron in this famous school we shall mention only the composers Dietsch, Monpou, Boulanger-Kunzé, G. Duprez, Scudo, Jansenne, and Nicou-Choron; the lady singers Clara Novello, Rosine Stolz, and Hébert-Massy.

The premature death of Choron may be attributed to disappointments and difficulties after the fall of Charles X. This learned musician and very kind-hearted man composed a Mass for three voices, a Stabat for three voices, and a number of hymns, psalms, and vocal pieces for the church; but his best titles to fame, after the works already mentioned, are his translations and editions of Albrechtsberger's works, his *Méthode concertante de Musique à plusieurs parties* (Paris, 1817), his *Méthode de Plain-Chant* (1818), his *Manuel complet de Musique vocale et instrumentale ou Encyclopédie musicale*, which was published by his assistant Adrien de La Fage in 1836-38 (Paris, 6 vols. and 2 vols. of examples), and several other didactic treatises, which contributed greatly to improve the direction of musical studies in France. In fact, Choron may be considered as a pedagogue of genius, and he had the credit of opening a new field to French musicians, such as Fétis, Geo. Kastner, and Adrien de La Fage. A full list of his essays, titles, and prefaces of intended works, revised treatises of Italian, German, and French didactic writers is given by Fétis in a remarkable article on Choron in his *Biographie Universelle* [and in the *Quellen-Lexikon*]. For more detailed information the reader may be referred to those works and to the *Éloges* of Gauthier (Caen, 1845) and A. de La Fage (Paris, 1843). Scudo, in his *Critique et Littérature musicales* (Paris, 1852, p. 333), has given a vivid picture of Choron as director of his school of music. Choron's drawback appears to have been a want of perseverance, and a propensity to forsake his plans before he had carried them out. But he exercised a very useful influence on musical education in France, and will not soon be forgotten there. G. C.

CHORTON. The 'Chorus' or ecclesiastical pitch to which organs were usually tuned in the 17th and 18th centuries. It was considerably higher than the chamber pitch, used for secular music. This chamber pitch (Kammerton) was of two kinds, the high and the low, but both were below the chorus pitch. [See PITCH. Also Spitta, *J. S. Bach*, Engl. tr. ii. 286, 324, 676, etc.] M.

CHORUS. 1. The body of singers at an opera, oratorio, or concert, by whom the choruses are sung.

2. Compositions intended to be sung by a considerable body of voices—not like glees, which are written for a single voice to each part, or like part-songs, which may be sung indifferently by single voices or larger numbers. Choruses may be written for any number of parts, from unison (Bach, No. 5, in 'Ein' feste Burg'; Mendelssohn, parts of No. 7 in 'Lauda Sion') and two parts (Haydn, Credo of Mass No. 3; Mendelssohn, No. 2 of 95th Psalm) to 40 or 50; but the common number is from 4 to 8. Handel mostly writes for 4, though occasionally, as in 'Acis and Galatea,' for 5, and, in 'Israel in Egypt,' for 8, divided into two choirs. In the latter days of the Italian school, Gabrielli, Pitoni, etc., wrote masses and motets for as many as 10 and 12 choirs of 4 voices each. Tallis left a motet in 40 independent parts, called his '40-part song.' Choruses for 2 choirs are called double choruses; those in Handel's 'Israel in Egypt' and Bach's 'Matthew Passion' are the finest in the world. The two choirs answer one another, and the effect is quite different from that of 8 real parts, such as Palestrina's 'Confitebor,' 'Laudate,' or 'Domine in virtute' (see De Witt's ed. ii. 132, etc.), Gibbons's 'O clap your hands,' or Mendelssohn's 'When Israel out of Egypt came.' Handel often begins with massive chords and plain harmony, and then goes off into fugal treatment. In the 'Darkness' chorus in 'Israel,' he introduces choral recitative: and Mendelssohn does something similar in the chorus in 'St. Paul,' 'Far be it from thy path.' In his 'Kirchen Cantaten' Bach's choruses are often grounded on a chorale worked among all the parts, or sung by one of them, with independent imitative counterpoint in the rest. See CHORALE-ARRANGEMENTS.

In the opera the chorus has existed from the first, as is natural from the fact that opera began by an attempt to imitate the form of Greek

plays, in which the chorus filled an all-important part. Till Gluck's time the chorus was ranged in two rows, and however stirring the words or music they betrayed no emotion. It was he who made them mix in the action of the piece. In modern operas the choruses are absolutely realistic, and represent the peasants, prisoners, fishermen, etc., who form part of the *dramatis personæ* of the play. [The word was very commonly used, in the 17th and 18th centuries, to denote the concerted conclusion of duets, trios, etc., and was in fact the exact equivalent of our 'ensemble.' The meaning of the word has frequently been misunderstood, as for instance in many modern editions of Purcell's well-known duet 'Hark, my Daridcar!' where the last ensemble section, beginning 'So ready and quick is a spirit of air has been omitted, no doubt under the impression that the word 'Chorus' meant that these bars were to be sung by many voices. Conclusive proof that the word was used commonly in this sense is afforded in many of Handel's Italian operas, in the scores of which the names of the quartet of soloists are placed at the beginning of their respective lines in ensemble numbers, though the movement is entitled 'Coro.'] G.

CHOUDENS FILS. This important Parisian music-publishing business was founded in June 1845 by Antoine de Choudens, at whose death, in 1888, his son Paul succeeded him. The publications of the firm, which began with an anthology of over 200 vocal pieces called 'I Canti d' Italia,' include most of the works of Berlioz, Gounod, Reyer, Lalo, Bruneau, Offenbach, Audran, etc. G. F.

CHOUQUET, ADOLPHE GUSTAVE, born at Havre, April 16, 1819, wrote the verses of a great many choruses and songs. From 1840 to 1856 he was teaching in New York. He contributed for a number of years to *La France musicale*, and *L'Art Musical*, giving occasional musical articles to *Le Ménestrel* and the *Gazette musicale*; but his chief works are *Histoire de la Musique dramatique en France, depuis ses origines jusqu'à nos jours*, Paris, 1873, and *Le Musée du Conservatoire national de Musique*, Paris, 1875, two works containing original views and much information. M. Chouquet was made keeper of the museum of the Conservatoire in 1871, and made large additions to it. He published the catalogue of the museum in 1875. He died in Paris, Jan. 30, 1886. G.

CHRISMANN, FRANZ XAVIER, secular priest, eminent organ-builder, date and place of birth unknown. He worked chiefly in Upper and Lower Austria and in Styria. His name first appears in connection with a monster organ at the monastery of St. Florian, near Linz, begun in 1770, but left unfinished in consequence of a quarrel with the provost. The fame of this organ spread far and wide, though it was not completed till 1837. He also built organs at the abbey Spital-am-Pyhrn, and in the Benedictine monastery at Admont, both organs destroyed by fire. The latter he considered his best work. Mozart and Albrechtsberger were present in 1790 at the opening of an organ built by Chrismann in the church of Schottenfeld, one of the suburbs of Vienna, and both pronounced it the best organ in Vienna. Though little known it is still in existence, and in spite of its small dimensions the workmanship is admirable, particularly the arrangement and voicing of the stops. Chrismann died in his seventieth year, May 20, 1795, when engaged upon an organ for the church of the small town of Rottenmann in Styria, where there is a monument to his memory. C. F. P.

CHRISTMANN, JOHANN FRIEDRICH, born at Ludwigsburg Sept. 10, 1752, died at Heutingsheim, near Ludwigsburg, May 21, 1817; Lutheran clergyman, composer, pianist, flautist, and writer on the theory of music. He was educated at Tübingen, and in 1783 was appointed minister of Heutingsheim. His great work *Elementarbuch der Tonkunst* is in two parts (Spire, 1782 and 1790) with a book of examples. He was joint editor of the Spire *Musikalische Zeitung*; in which among other articles of interest he detailed a plan (Feb. 1789) for a general Dictionary of Music. This scheme was never carried out. He was also a contributor to the *Musikalische Zeitung* of Leipzig. Christmann composed for voice and piano, and with Knecht arranged and edited a valuable collection for the Duchy of Würtemberg, entitled 'Vollständige Sammlung... Choral-melodien.' Many of the 266 hymns were his own composition. He was a friend of the Abbé Vogler. M. C. C.

CHRISTMAS ORATORIO (*Ger.* Weihnachtsoratorium). The name commonly given in its own day, and ever since, to what is properly speaking a sequence of six church cantatas, by Bach, for the various holy days of Christmastide. The words are written and compiled by Picander and Bach himself, and the series was composed in 1734 (see Spitta, *Bach*, Engl. tr., ii. 570 ff.).

CHRISTUS, an oratorio projected by Mendelssohn to form the third of a trilogy with 'St. Paul' and 'Elijah.' The book of words was sketched by Chevalier Bunsen, and given to Mendelssohn at Easter 1844. He made great alterations in it, and in 1847, his last year, after 'Elijah' was off his hands, during his visit to Switzerland, made so much progress with the work that 8 numbers of recitatives and choruses —3 from the first part, 'the birth of Christ,' and 5 from the second part, 'the sufferings of Christ,'—were sufficiently completed to be published soon after his death (op. 97; No. 26 of the posthumous works). The fragments were first performed at the Birmingham Musical Festival, September 8, 1852. G.

CHRISTUS AM OELBERGE. The original title of Beethoven's MOUNT OF OLIVES.

CHROMATIC is a word derived from the Greek χρωματικος, the name of one of the ancient tetrachords, the notes of which were formerly supposed to be similar to the scale known as 'chromatic' in modern times. It is applied to notes marked with accidentals, beyond those normal to the key in which the passage occurs, but not causing modulation. A scale of semitones does not cause modulation, and is called a chromatic scale, as in the following from the andante of Mozart's Symphony in D—

which remains in the key of G throughout; and various chords, such as that of the augmented sixth, and the seventh on the tonic, are chromatic in the same manner. The following example, from Beethoven's Sonata in B♭ (op. 106), is in the key of D—

With regard to the writing of the chromatic scale, the most consistent practice is obviously to write such accidentals as can occur in chromatic chords without changing the key in which the passage occurs. Thus taking the key of C as a type the first accidental will be D♭, as the upper note of the minor ninth on the tonic; the next will be E♭, the minor third of the key, the next will be F♯, the major third of the supertonic—all which can occur without causing modulation—and the remaining two will be A♭ and B♭, the minor sixth and seventh of the key. In other words the twelve notes of the chromatic scale in all keys will be the tonic, the minor second, the major second, the minor third, the major third, the perfect fourth, the augmented fourth, the perfect fifth, minor sixth, major sixth, minor seventh, and the major seventh.

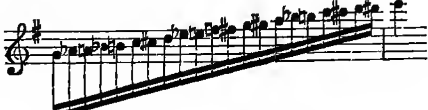
Thus in Mozart's Fantasia in D minor, the chromatic scale in that key, beginning on the dominant, is written as follows—

in Beethoven's Violin Sonata in G (op. 96), the chromatic scale of that key is written thus, beginning on the minor seventh of the key—

and as a more modern instance, the chromatic scale of A which occurs in Chopin's Impromptu in F major, is written by him thus—

beginning on the minor third of the key.

The practice of composers in this respect is however extremely irregular, and rapid passages are frequently written as much by Mozart and Beethoven as by more modern composers in the manner which seemed most convenient for the player to read. Beethoven is occasionally very irregular. For instance, in the last movement of the Concerto in G major he writes the following—



in which the same note which is written A♭ in one octave is written G♯ in the other, and that which is written E♭ in one is written D♯ in the other. But even here principle is observable, for the first octave is correct in the scale of G according to the system given above, but having started it so far according to rule he probably thought that sufficient, and wrote the rest for convenience. In another place, viz. the slow movement of the Sonata in G (op. 31, No. 1), he affords some justification for the modern happy-go-lucky practice of writing sharps ascending and flats descending; but as some basis of principle seems desirable, even in the lesser details of art, the above explanation of what seems the more theoretically correct system has been given. C. H. H. P.

CHROTTA. See Crwth.

CHRYSANDER, Friedrich, born July 8, 1826, at Lübthee, in Mecklemburg, studied at the university of Rostock, lived for some time in England, and later on his own estate at Bergedorf, near Hamburg. Chrysander is known to the musical world chiefly through his profound and exhaustive researches on Handel, to which he devoted his life. His biography of Handel, standing evidence of these studies, remains incomplete.[1] In detail and historical research this work is all that can be wished, but its view of Handel's abstract importance as a musician must be accepted with reservation, and has indeed roused considerable opposition. It cannot be denied that Chrysander's bias for Handel in some measure prejudiced his judgment. He represents him not only as the culminating point of a previous development, and the master who perfected the oratorio, but as the absolute culminating point of all music, beyond whom further progress is impossible. While holding these views Chrysander was naturally a declared

[1] Breitkopf & Härtel, Leipzig: vol. i. 1858; vol. ii. 1860; vol. iii. part 1, 1867.

opponent of all modern music; he was also partial, if not unjust, in his criticisms on the older masters, such as J. S. Bach. Besides these biographical studies Chrysander edited the complete works of Handel for the German 'Händel-Gesellschaft.' [HÄNDEL-GESELLSCHAFT.] His laborious collations of the original MSS. and editions, his astounding familiarity with the most minute details, and his indefatigable industry, combine to make this edition a work of the highest importance, at once worthy of the genius of Handel and honourable to the author. [In continuation of his task of popularising Handel's works in Germany, after the completion of the undertaking, Chrysander issued several of the oratorios with suggested abbreviations such as are required in the present day, and with the addition of many cadenzas from old copies. Some so treated are 'Hercules,' 'Deborah,' 'Esther,' and 'Messiah.'] Amongst other writings of Chrysander may be mentioned two admirable treatises, *Über die Molltonart in Volksgesängen*, and *Über das Oratorium* (1853); also *Die Jahrbücher für Musikalische Wissenschaft*, in 2 vols., 1863 to 1867 (Breitkopf & Härtel); and finally a number of articles in the *Allgemeine Musikalische Zeitung* of Leipzig (which he edited from 1868 to 1871, and again from 1875 to its cessation in 1882), violently criticising the productions of the modern school. [Of the highest importance in musical literature was the *Vierteljahrsschrift für Musikwissenschaft*, undertaken with Spitta and Guido Adler, which appeared between 1885 and 1895.] He has also published some excellent editions of Bach's 'Klavierwerke' (4 vols., with preface; Wolfenbüttel, 1856), and Carissimi's oratorios 'Jephte,' 'Judicium Salomonis,' 'Jonas,' and 'Baltazar,' which appeared in his collection *Denkmäler der Tonkunst* (Weissenborn, Bergedorf). [Complete editions of the works of Corelli (ed. Joachim) and Couperin (ed. Brahms) began in the same series. As a supplement to the Handel edition, five works were reissued, from which Handel had appropriated ideas or portions: No. 1 was the 'Magnificat' of Erba; No. 2 the 'Te Deum' of Urio (previously published in the *Denkmäler*); No. 3 a serenata of Stradella; No. 4 a book of duets by Clari; and No. 5 Gottlieb Muffat's harpsichord pieces, 'Componimenti musicali' (see also DENKMÄLER). Dr. Chrysander died at Bergedorf, Sept. 3, 1901. An interesting obituary notice, by his son-in-law, Mr. Charles Volkert, appeared in the *Musical Times* for Oct. 1901.] A. M.

CHURCH, JOHN, born at Windsor in 1675, received his early musical education as a chorister of St. John's College, Oxford. On Jan. 31, 1697, he was admitted a gentleman of the Chapel Royal, and on August 1 following was advanced to a full place, vacant by the death of James Cobb. He obtained also in 1704 the appointments of lay vicar and master of the choristers of Westminster Abbey. Church composed some anthems and services (Tudway Collection, MSS. in Royal College of Music, British Museum, Christ Church, Oxford, etc.). His service in F appears in Ouseley's 'Cathedral Music,' 1853; he wrote also many songs, which appeared in the collections of the period, and he was the author of an *Introduction to Psalmody*, published in 1723. The compilation of a book of words of Anthems published in 1712 under the direction of the Sub-dean of the Chapel Royal (Dr. Dolben) has been ascribed to Church, although it is more generally attributed to Dr. Croft, and perhaps with greater reason, considering the intimacy between the sub-dean and the organist. Church died Jan. 6, 1741, and was buried in the south cloister of Westminster Abbey. W. H. H.

CHWATAL, FRANZ XAVER, born June 19, 1808, at Rumburg in Bohemia, was a music-teacher from 1832 at Merseburg, and from 1835 at Magdeburg. He produced salon-pieces for the piano (to the number of 200 or upwards), and two pianoforte methods. He died at Soolbad (Elmen), June 24, 1879. His brother, JOSEPH, born Jan. 12, 1811, founded an organ-factory at Merseburg, under the name of Chwatal und Sohn, which has brought out several small improvements in organ-action. M.

CIAJA, AZZOLINO BERNARDINO DELLA, born at Siena, March 21, 1671, composer, organist, and amateur organ-builder. Besides his published works—'Salmi concertati' (Bologna, 1700), 'Cantate da camera' (Lucca, 1701, and Bologna, 1702), 'Sonate per cembalo' (Rome, 1727), he left in MS. four masses, and several cantatas and motets [list in *Quellen-Lexikon*]. In 1733 Ciaja, as a Knight of St. Stephen, presented a magnificent organ to the church of that order in Pisa, still one of the finest in Italy, containing 4 manuals and 100 stops. He not only superintended its construction but personally assisted the workmen. M. C. C.

CIAMPI, LEGRENZIO VINCENZO, born at Piacenza, 1719, dramatic composer; came to London in 1748 with a company of Italian singers, and between that year and 1762 produced 'Gli tre cicisbei ridicoli,' 'Adriano in Siria,' 'Il trionfo di Camilla,' 'Bertoldo in Corte,' previously performed in Italy, 'Didone,' 'Catone in Utica,' 'Il Negligente,' and some songs in the pasticcio 'Tolomeo.' Burney says that 'he had fire and abilities' but no genius. His comic operas were the most successful, but 'Didone' is said to contain beautiful music. He also composed twelve trios for strings, six organ concertos, six concertos of six parts, Italian songs, overtures, and a mass (1758), now in the Royal Library at Berlin. [Ciampi was almost certainly the composer of the popular 'Tre giorni son che Nina,' usually called Pergolesi's; it occurs in 'Gli tre cicisbei ridicoli.' See *Musical Times* for 1899, pp. 241-3.] M. C. C.

CIANCHETTINI, VERONICA, sister of J.

L. Dussek, born at Czaslau in Bohemia, 1779, pianist and composer, studied the pianoforte under her father from infancy. In 1797 she joined her brother in London, where she married Francesco Cianchettini. She was a successful teacher, and composed two concertos and several sonatas for the pianoforte.

Her son, PIO, born in London, Dec. 11, 1799, was a composer and pianist. At five years old he appeared at the Opera House as an infant prodigy. A year later he travelled with his father through Holland, Germany, and France, where he was hailed as the English Mozart. By the age of eight he had mastered the English, French, German, and Italian languages. In 1809 he performed a concerto of his own composition in London. Catalani appointed him her composer and director of her concerts, and frequently sang Italian airs which he wrote to suit her voice. He published a cantata for two voices and chorus, to words from 'Paradise Lost'; music to Pope's 'Ode on Solitude'; 'Sixty Italian Notturnos' for two, three, and four voices, and other vocal pieces. He was also editor and publisher of a book of canons by Padre Martini, as well as of the scores of many symphonies and overtures of Mozart and Beethoven; he died at Cheltenham, July 20, 1851. (Dates of birth and death from *Brit. Mus. Biog.*) M. C. C.

CIBBER, SUSANNA MARIA, sister of Dr. Thomas Augustine Arne, the celebrated composer, was born in February 1714. She made her first public appearance March 13, 1732, at the Haymarket Theatre, as the heroine of Lampe's opera 'Amelia,' with considerable success. In April 1734 she became the second wife of Theophilus Cibber. On Jan. 12, 1736, Mrs. Cibber made 'her first attempt as an actress' at Drury Lane Theatre in Aaron Hill's tragedy of 'Zara,' and was soon accepted as the first tragedian of her time, a position which she maintained for thirty years. Her success as an actress did not, however, lead her to abandon her position as a vocalist; in the theatre she continued to represent Polly in 'The Beggar's Opera,' and other like parts, but it was in the orchestra, and more especially in the oratorio orchestra, that her greatest renown as a singer was achieved. The contralto songs in the 'Messiah,' and the part of Micah in 'Samson,' were composed by Handel expressly for her, and when we consider that the great composer must have regarded singing as an intellectual art, and not merely as the means of displaying fine natural gifts of voice, unaided by mental cultivation or musical skill, we may judge why he selected Mrs. Cibber as the exponent of his ideas. Her voice, according to all contemporary testimony, although small, was indescribably plaintive, and her powers of expression enabled her to impress most forcibly upon the mind of the hearer the meaning of the language to which she gave utterance. Passing by the songs in 'Messiah,' which call for the highest power of declamation and pathetic narration, we have only to examine the part of Micah in 'Samson,' comprising songs requiring not only the expression of pathetic or devout feelings, but also brilliancy and facility of execution, to judge of Mrs. Cibber's ability. And what sterling advantages must have been derived from the combination of the powers of a great actress with those of a vocalist in the delivery of recitative! Mrs. Cibber died Jan. 30, 1766, and was buried in the north cloister of Westminster Abbey. It is said that Garrick, on hearing of her death, exclaimed, 'Then Tragedy expired with her.' W. H. H.

CID, LE. Opera in four acts, by Ad. D'Ennery, Louis Gallet, and Edouard Blau; music by J. Massenet. Produced at the Grand Opéra, Paris, Nov. 30, 1885.

CIFRA, ANTONIO, was born at Rome about 1575, and was one of the few pupils actually taught by Palestrina during the short time that the great master associated himself with the school of Bernardino Nanini. In 1609 he was Maestro at the German college in Rome, in 1610 he was Maestro at Loreto, but in 1623 removed to San Giovanni in Laterano. Two years later he entered the service of the Archduke Charles, and about 1628 returned to Italy, where he died about 1638. That he was an erudite and elegant musician is shown by the fact that the Padre Martini inserted an Agnus Dei of his, as a specimen of good work, in his essay on counterpoint. He himself published a large quantity of his masses (1619 and 1621), motets, madrigals, and psalms, at Rome and at Venice, of which a detailed catalogue is given in the *Quellen-Lexikon*. After his death Antonio Poggioli of Rome published a volume containing no less than 200 of his motets for two, three, four, six, and eight voices. The title-page of this book contains a portrait of him taken in the forty-fifth year of his age. Underneath the engraving are the following exceedingly poor verses—

> Qui poteras numeris sylvas lapidesque movere,
> Siccine præruptus funere, Cifra, siles?
> Fallimur; extincto vivis lætissimus ævo,
> Et caneris propriis clarus ubique modis.

Cifra is among the 'masters flourishing about that time in Italy,' of whose works Milton sent home 'a chest or two of choice music books.' (Phillips's *Memoir.*) E. H. P.

CIMADOR, GIAMBATTISTA, born of a noble family in Venice about 1761, died in London about 1808; composer, and player on the violin, violoncello, and pianoforte. In 1788 he produced in Venice 'Pimmalione,' an interlude, with which, notwithstanding its success, he was so dissatisfied as to burn the score and renounce composition for the future. Cherubini used the words of several scenes from this interlude for his opera of 'Pimmalione.' About 1791 Cimador settled in London as a teacher of singing.

Hearing that the orchestra of the King's Theatre, in the Haymarket, had refused to play Mozart's symphonies on account of their difficulty, he arranged six of them as sestets for strings and flute. The work was well done, and the symphonies first made known in this form speedily took their proper place with the public. He composed duos for two violins and violin and alto, a concerto for the double-bass, and a few vocal pieces. M. C. C.

CIMAROSA, DOMENICO, one of the most celebrated Italian dramatic composers, the son of poor working people, born at Aversa, Naples, Dec. 17, 1749. Cimarosa received his musical training at the Conservatorio Santa Maria di Loreto. He attended that celebrated school for eleven years (1761-72), and acquired a thorough knowledge of the old Italian masters under Manna, Sacchini, Fenaroli, and Piccinni. In 1772 he produced his first opera, 'Le Stravaganze del Conte,' at the Teatro de' Fiorentini in Naples, which was so successful as to give him at once a place among composers. From that date till 1780 he lived alternately at Rome and Naples, and composed for the two cities some twenty operas, 'L' Italiana in Londra' (Rome, 1779) among the number. Between 1780 and 1787 he was busy writing as the acknowledged rival of Paisiello, who, up to that time, had been undisputed chief of Italian operatic composers. His operas were also performed abroad, not only in London, Paris, Vienna, and Dresden, where an Italian opera existed, but elsewhere, through translations. To this period belong 'Il pittore Parigino' (1781), 'Il convito di pietra' (1781), 'La ballerina amante' (Venice, 1783), 'L' Olimpiade' (1784), 'Artaserse' (1784), 'Il Sacrifizio d' Abramo,' and 'L' Impresario in angustie' (1786). In 1787 Cimarosa was invited to St. Petersburg as chamber composer to Catherine II., and there developed an amazing fertility in every species of composition. Among his operas of this time should be mentioned 'La Cleopatra' and 'La Vergine del Sole' (1788). Some years later, on the invitation of Leopold II., he succeeded Salieri as court capellmeister, and it was in Vienna that he composed his most celebrated work 'Il matrimonio segreto' (1792), a masterpiece of its kind, which at the time roused an extraordinary enthusiasm, and is the only work by which Cimarosa is at present known. So great was the effect of its first performance, that at the end the Emperor had supper served to all concerned, and then commanded a repetition of the whole. His engagement at Vienna terminated by the Emperor's death (1792). Salieri was again appointed chapel-master, and in 1793 Cimarosa returned to Naples, where he was received with every kind of homage and distinction; the 'Matrimonio segreto' was performed fifty-seven times running, and he was appointed capellmeister to the King, and teacher to the princesses. From his inexhaustible pen flowed another splendid series of operas, among which may be specified 'Le astuzie femminile' (1794), 'L' Amante disperato' and 'L' impegno superato' (1795), and the serious operas 'Gli Orazii e Curiazii' (1794), 'Penelope' (1795), 'Achille all' assedio di Troja' and 'Semiramide' (1799). His last years were troubled by a melancholy change of fortune. The outbreak of revolutionary ideas carried Cimarosa with it, and when the French republican army marched victoriously into Naples (1799) he expressed his enthusiasm in the most open manner. Cimarosa was imprisoned and condemned to death. Ferdinand was indeed prevailed upon to spare his life and restore him to liberty on condition of his leaving Naples, but the imprisonment had broken his spirit. He set out for St. Petersburg, but died at Venice, Jan. 11, 1801, leaving half finished an opera, 'Artemisia,' which he was writing for the approaching carnival. It was universally reported that he had been poisoned, and in consequence the Government compelled the physician who had attended him to make a formal attestation of the cause of his death.

Besides his operas (sixty-six are enumerated in the *Quellen-Lexikon*), Cimarosa composed several oratorios, cantatas, and masses, etc., which were much admired in their day. His real talent lay in comedy—in his sparkling wit and unfailing good-humour. His invention was inexhaustible in the representation of that overflowing and yet naïf liveliness, that merry teasing loquacity which is the distinguishing feature of genuine Italian 'buffo'; his chief strength lies in the vocal parts, but the orchestra is delicately and effectively handled, and his ensembles are masterpieces, with a vein of humour which is undeniably akin to that of Mozart. It is only in the fervour and depth which animate Mozart's melodies, and perhaps in the construction of the musical scene, that Cimarosa shows himself inferior to the great master. This is more the case with his serious operas, which, in spite of their charming melodies, are too conventional in form to rank with his comic operas, since taste has been so elevated by the works of Mozart. Cimarosa was the culminating point of genuine Italian opera. His invention is simple, but always natural; and in spite of his Italian love for melody he is never monotonous; but both in form and melody is always in keeping with the situation. In this respect Italian opera has manifestly retrograded since his time. A bust of Cimarosa, by Canova, was placed in the Pantheon at Rome. A. M.

CIMBALOM. See DULCIMER.

CINCINNATI MUSICAL FESTIVAL. The most notable of the regularly recurring musical meetings in the United States are those held biennially in Cincinnati, Ohio. They had their origin in 1873, have been from the beginning under the artistic direction of Theodore THOMAS

(*q.v.*), and have beyond question exerted a more powerful influence on musical culture than any institution of their kind. Their story belongs to the musical history of America, and begins, logically, with the first of the German *Sängerfeste*, which have been held periodically in different cities of the United States since 1849. German societies devoted to *Männergesang* existed in the large cities of the Atlantic coast before they did in the Ohio valley, but the first union of such societies for festival purposes took place in Cincinnati in 1849. It was an extremely modest affair, the choir numbering only 118 singers, and only one concert being given. But as a result of the meeting the North American *Sängerbund* was formed, and its festivals soon grew to such enormous dimensions that it became necessary to erect temporary halls for their accommodation. In 1870 one of these festivals was given in the city which had seen their birth. Nearly 2000 singers participated, and the merchants of the city, desirous of having a building spacious enough to accommodate a textile fabrics' exhibition, aided the *Sängerfest* officials in the erection of a large hall, and after the festival preserved it for exhibition purposes.

At this period Theodore Thomas used to visit the larger cities of the middle West with his symphony orchestra. When in Cincinnati one day in the spring of 1872, the project of holding a national festival of the singers of the United States in the convenient Exposition Hall was broached to him. The plan was not essentially different from that of the German festivals which had prompted it, except that it was to be a meeting of mixed choirs, the English language was to be used, and the orchestral feature was to be lifted into prominence. A committee was formed, a guarantee fund collected, and an invitation issued 'to the Choral Societies of America,' describing the projected festival, and stating its object to be 'to elevate and strengthen the standard of choral and instrumental music, and also to bring about harmony of action between the musical societies of the country, and more especially of the West.' Thirty-six societies, representing 1250 singers, accepted the invitation. Some of the acceptances came from cities many hundred miles distant, but the majority were from Cincinnati and the cities and towns of Ohio. Twenty-nine societies were present at the first general rehearsal. The festival was held on May 6, 7, 8, 9, 10, 1873. The chorus numbered about 1000, the orchestra 108, with Mr. Thomas's band as a nucleus, and the principal works performed were Beethoven's 'Choral' symphony, Handel's 'Dettingen Te Deum,' and scenes from Gluck's 'Orpheus.' The festival aroused much popular enthusiasm, and steps were at once taken for a second meeting two years later, the most important being the formation of the Cincinnati Biennial Musical Festival Association, a corporate body that has conducted the business affairs of all the festivals since. The second festival, held in 1875, was followed by a movement looking to the permanency not only of the festivals but also of their home. The wooden building which had housed the German *Sängerfest* of 1870 was replaced by a substantial and beautiful hall with wings constructed to serve exposition purposes, a gift to the city made by Reuben R. Springer, a retired merchant, and other public-spirited citizens. The hall was provided with a magnificent organ (at the time of its construction one of the half-dozen largest in the world). The erection of this building compelled the postponement of the third festival to 1878, but public interest had been so wrought up that with expenses aggregating $55,595, there was yet a profit from the festival of over $32,000, nearly one-half of which was given by the Festival Association to the fund then being raised for the organ, the building of which had been undertaken by a special organisation. The plan of uniting societies in the festival was now abandoned, and the singers organised into a permanent choir, whose affairs are all managed by the Festival Association. In 1880 this choir contained over 600 voices, but since 1890 it has numbered about 400. Until that time, too, the orchestra, which generally numbers about 150, was drawn chiefly from New York; since then it has come from Chicago, whither Mr. Thomas went to assume the conductorship of the Chicago Symphony Orchestra. See SYMPHONY CONCERTS.

The following are the principal choral works performed at the biennial meetings in the order of their first production:—

1873: Gluck, Scenes from 'Orpheus'; Handel's 'Dettingen Te Deum'; Beethoven's 'Choral' Symphony.
1875: Bach, 'Magnificat' in D; Brahms, 'Triumphal Hymn'; Liszt, 'Prometheus'; Mendelssohn, 'Elijah.'
1878: Gluck, Scenes from 'Alceste'; Handel, the 'Messiah'; Liszt, 'Missa Solemnis'; Otto Singer, 'Festival Ode.'
1880: Bach, 'A Stronghold Sure'; Beethoven, 'Missa Solemnis'; Dudley Buck, 'The Golden Legend'; Handel, 'Utrecht Jubilate' and 'Zadok, the Priest.'
1882: Bach, 'Passion according to St. Matthew'; Berlioz, Scenes from 'Les Troyens'; Gilchrist, 'The Forty-Sixth Psalm'; Mozart, 'Requiem'; Schumann, 'Scenes from Faust' (Part III.).
1884: Brahms, 'A German Requiem'; Gounod, 'The Redemption'; Handel, 'Israel in Egypt.'
1886: Bach, 'Kyrie' and 'Gloria' from the Mass in B minor; Haydn, the 'Creation'; Rubinstein, 'The Tower of Babel.'
1888: Dvořák, 'The Spectre's Bride'; Mendelssohn, 'St. Paul'; J. K. Paine, 'A Song of Promise'; Rubinstein, 'Paradise Lost'; Weber, hymn, 'In Seiner Ordnung.'
1890: Bach, 'Passion according to St. Matthew'; Dvořák, 'Stabat Mater'; Saint-Saëns, 'The Deluge'; Verdi, 'Requiem.'
1892: Bach, 'Christmas Oratorio' (Parts I. and II.); Albert Becker, Cantata, op. 50; Anton Bruckner, 'Te Deum'; Dvořák, 'Requiem.'
1894: Berlioz, 'Requiem'; Brahms, 'Song of Destiny'; Goetz, 'By the Waters of Babylon'; Horatio W. Parker, 'Hora Novissima'; Rubinstein, 'Moses' (Scenes III. and IV.).
1896: Handel, 'Judas Maccabæus'; Saint-Saëns, 'Samson and Delilah'; A. Goring Thomas, 'The Swan and the Skylark'; Tinel, 'St. Francis.'
1898: Berlioz, 'Damnation of Faust'; Grieg, Scenes from 'Olaf Trygvasson'; Schumann, 'Paradise and the Peri.'
1900: Berlioz, 'Te Deum'; Stanford, 'East to West.'
1902: Bach, Mass in B minor; Franck, 'The Beatitudes.'

H. E. K.

CINELLI. The ordinary Italian name for CYMBALS. The name Piatti is almost universally used in orchestral scores, though it is, strictly speaking, only applicable to the small cymbals used in JANITSCHARENMUSIK. M.

CINQ MARS. An 'opéra dialogué' in four acts; words by Poirson and Gallet, music by Gounod. Produced at the Opéra Comique, Paris, April 5, 1877; first time in London, at the Coronet Theatre (Carl Rosa Company), Nov. 17, 1900. M.

CINQUES. The name given by change-ringers to changes on eleven bells, probably from the fact that *five* pairs of bells change places in order of ringing in each successive change. C. A. W. T.

CINTI. See DAMOREAU.

CIPRANDI, ERCOLE, an excellent tenor, who sang in London from 1754 to 1765. He was born about 1738. He played Danao in 'Ipermestra' by Hasse and Lampugnani, produced at the King's Theatre Nov. 9, 1754. In 1765 he was still singing at the same theatre, and appeared as Antigone in 'Eumene.' Burney found him at Milan in 1770, as fine a singer as before. He was living in 1790. J. M.

CIPRIANI, LORENZO, a capital *buffo* singer at the Pantheon in London, about 1790. He performed in the same company with Pacchierotti, Mara, and Morelli. In 1791 he played Valerio in 'La Locanda' of Paisiello. There is a capital sketch-portrait of him 'in the character of Don Alfonso Scoglio, in La Bella Pescatrice, performed at the King's Theatre, Pantheon, Dec. 24, 1791; drawn by P. Violet, and engraved by C. Guisan, pupil to F. Bartolozzi, R.A.' J. M.

CIRCASSIENNE, LA, opéra-comique in three acts; words by Scribe, music by Auber; produced at the Opéra Comique, Paris, Feb. 2, 1861, and in London. G.

CIS, CES. The German term for C♯ and C♭. None of the books explain the origin of this form, which runs through the German scale—Dis, Es, As, etc., except B and H; and in the double flats and sharps, Deses, Gisis, etc. G.

CITHER, CITHERN, CITHORN, or CITTERN (Fr. *Cistre*, *Sistre*, or *Courante*; Ital. *Cetera*; Ger. *Cither*, *Zither*). An instrument shaped like a lute, but with a flat back, and with wire strings, generally adjusted in pairs of unisons, and played with a plectrum of quill. The cither during the 16th and 17th centuries appears to have enjoyed great favour on the continent and in England. The English citherns had usually four pairs of wire strings, but according to Carl Engel (*Musical Instruments*, etc., 1874) they were not limited to this number. He quotes a curious title-page: 'New Citharen Lessons with perfect Tunings of the same from four course of strings to four-teene course, etc.' adorned with an engraving of a Bijuga (two-necked) cither, the counterpart of a theorbo or two-necked lute, strung with seven pairs of strings over the finger-board, and seven single strings at the side. The date of this is 1609. John Playford published a book entitled 'Musick's Delight, containing new and pleasant lessons on the Cithern, London, 1666.' Praetorius (*Synt. Mus.* 1618) gives various cither tunings, including the common French (*a*) and Italian (*b*) four-course tunings—

He speaks of the *illiberale sutoribus et sartoribus usitatum instrumentum*; he gives the old lute-tunings (*c*) and (*d*), and says that the last is called *in corda valle*, and is used with small instruments an octave higher, and, as usual, with strings of brass or steel. Among other tunings there is an old Italian six-course (*e*) and, in Prague, a twelve-course (*f*) with resonance, says Praetorius, like a Clavicymbel or Symphony.

He gives woodcuts in *Sciagraphia* (1620) of these larger citherns, and two of the smaller. The Cetera or Italian cither was used by improvisatori, and extant specimens are often tastefully adorned with ornament. Stradivari is known to have made one. Finally, keyed cithers with hammers were patented by English and German makers. The cither, under the name of English Guitar, and tuned in the common chord (*g*), was very popular in this country during the 18th century. Many specimens are to be met with, bearing the name of Preston, a music-seller in the Strand. The German Streichzither, as the name indicates, was played with a bow. This was horizontal, like the Schlagzither and its prototype the Scheidholt, all of which variants will be more conveniently described under the accepted modern appellation of Zither, an instrument to place upon a table, well known in South Germany. The difference between a cither and a lute is in the shape of the body, flat-backed in the former, pear-shaped in the latter; the cither has wire strings and is played with a plectrum, while the lute has catgut strings to be touched with the fingers. (See ZITHER.) [The cither-notation, or tablature, is similar to that of the lute, but is written on four lines, to correspond with one of the commoner tunings (*a*) or (*b*). G. E. P. A.] A. J. H.

(g)

CITOLE. This word, used in Wiclif's Bible (2 Sam. vi. '5 Harpis and sitols and Tympane') and by poets in the 13th, 14th, and 15th centuries, has been derived from *cistella* (Lat.) a small box, and is supposed to mean the small box-shaped psaltery, sometimes depicted in MSS. of the period in representations of musicians. Dr. Rimbault (*The Pianoforte*, 1860, p. 25) has collected several poetic references to the citole, including quotations from the 'Roman de la Rose,' Gavin Douglas, Gower, and Chaucer ('Knight's Tale,' 'a citole in hire

right hand hadde she'). According to the same authority (p. 22) the name was used as late as 1543. [See PSALTERY.] As the passage in Wiclif is the equivalent of the Vulgate 'citharis et lyris et tympanis' the English word seems to indicate something more like the Rota than the Psaltery. A modern instance of the use of the name is in D. G. Rossetti's 'Blessed Damozel,'

> And angels meeting us shall sing
> To their citherns and citoles.

A. J. H.

CITY OF LONDON CLASSICAL HARMONISTS. See CHORAL HARMONISTS.

CIVIL SERVICE MUSICAL SOCIETY, instituted in 1864 for the practice of vocal and instrumental music among the civil servants and excise servants of the crown. King Edward VII., when Prince of Wales, was patron, and all the members of the Royal Family were life members. Sir W. H. Stephenson, of the Board of Inland Revenue, was the first president, and Frederick Clay the first vice-president. The first conductor of the orchestra was Arthur Sullivan, and the first conductor of the choir John Foster; but upon the resignation of Sullivan, Foster became sole conductor. The society met for practice at King's College, Strand, where it had an exceptionally good library of vocal and instrumental music. Its concerts, of which upwards of fifty were given, took place at St. James's Hall, admission being confined to members and their friends. The programmes included symphonies, overtures, and other orchestral works; the special feature in the vocal music was the singing of the male voice choir, the society's original plan of practising exclusively music written for male voices having been rigidly adhered to. The society ceased to exist in 1880, owing to financial difficulties consequent upon the resignation of several of the older members. A concert was given on May 11 of that year in Steinway Hall. C. M.

CLAGGET, CHARLES, a violinist, born at Waterford in 1740, became leader of the band at the theatre in Smock Alley, Dublin, in 1764, retaining the post till 1774. He was noted for his skill in accompanying the voice. He was also a composer of songs (one of which, 'I've rifled Flora's painted bowers,' gained much popularity), and of duets for violins, violin and violoncello, and flutes. Coming to London in 1776, and being of an inventive turn of mind, he devoted his attention to the improvement of various musical instruments. In Dec. 1776 he took out a patent for 'Improvements on the violin and other instruments played on finger boards,' which he asserted rendered it 'almost impossible to stop or play out of tune.' In August 1788 he took out another patent for 'Methods of constructing and tuning musical instruments which will be perfect in their kind and much easier to be performed on than any hitherto discovered.' Among these were the following:—'A new instrument called the Teliochordon, in form like a pianoforte, but capable of being put much better in tune, for the grand pianoforte or harpsichord divide every octave only into thirteen parts or semitones, whereas on this instrument every octave can be divided into thirty-nine parts or gradations of sound; for any finger-key will, at the pleasure of the performer, produce three different degrees of intonation.' He represented that by this instrument all thirds and fifths could be highly improved, and what is called the 'woulfe' entirely done away with.—A method of uniting two trumpets or horns, one in D, and the other in E flat, so that the mouthpiece might be applied to either instantaneously, thereby getting the advantage of a complete chromatic scale.—Tuning-forks with balls or weights for the more easy tuning of musical instruments.—A new instrument composed of a proper number of these tuning forks or of single prongs or rods of metal fixed on a standing board or box and put in vibration by finger keys. Or a celestina stop made by an endless fillet might be applied, producing the sounds on these forks or prongs as it does on the strings.—Tuning keys of a form which rendered them steadier and easier to use than others.—And lastly, a better method of fitting the sounding post of a violin to its place. Clagget was also the inventor of the 'Aiuton, or, Ever-tuned Organ, an instrument without pipes, strings, glasses, or bells, which will never require to be retuned in any climate.' Of this instrument and others he published a descriptive account under the title of 'Musical Phenomena.' He kept his collection of instruments at his house in Greek Street, Soho, which he called 'The Musical Museum.' About 1791 he exhibited them publicly at the Hanover Square Rooms. On Oct. 31, 1793, Clagget gave what he termed an 'Attic Concert,' at the King's Arms Tavern, Cornhill, several of the pieces being played on or accompanied by the various instruments invented or improved by him. The performance was interspersed with 'A Discourse on Musick,' the object of which was professedly to prove the absolute necessity of refining the harmony of keyed instruments, and of course to insist that Clagget's inventions had effected that object. In the course of this address a letter from Haydn to Clagget, dated 1792, was read, in which the great composer expressed his full approbation of Clagget's improvements on the pianoforte and harpsichord. The discourse was published with the word-book of the concert, and to it was prefixed a well-engraved portrait of Clagget, who is described beneath it as 'Harmonizer of Musical Instruments,' etc. etc. He is represented with a violin bow in his right hand, and in the left one of the sounding bars of his 'Aiuton.' He wrote some songs and a duet for violins, and is said to have died in 1820. W. H. H.

CLAPISSON, ANTOINE LOUIS, born at Naples, Sept. 15, 1808, died at Paris, March 19, 1866, was a good violin player before becoming a composer, and published a great many romances and songs, which exhibit an easy vein of melody. His operas are 'La Figurante' (5 acts, 1838); 'La Symphonie' (1839); 'La Perruche' (1840); 'Frère et Mari' (1841); 'Le Code noir' (3 acts, 1842); 'Les Bergers-Trumeau' (1845); 'Gibby la Cornemuse' (3 acts, 1846); 'Jeanne la Folle' (5 acts, 1848); 'La Statue équestre' (1850); 'Les Mystères d'Udolphe' (3 acts, 1852); 'La Promise' (3 acts, 1854); 'La Fanchonnette' (3 acts, March 1, 1856); 'Le Sylphe' (2 acts, Nov. 1856); 'Margot' (3 acts, 1857); 'Les trois Nicolas' (3 acts, 1858); and 'Madame Grégoire' (3 acts, 1861). The plots are generally poor, and many of them were unsuccessful. In fact, 'La Promise' and 'La Fanchonnette' are the only two of his operas which gained public favour. There is however much good music in 'Gibby,' 'Le Code noir,' and several others. His style is somewhat bombastic and deficient in genuine inspiration; but, in almost every one of his operas there are to be found graceful and fluent tunes, fine harmonies, pathetic passages, and characteristic effects of orchestration.

Clapisson was made Chevalier de la Légion d'Honneur in 1847, and member of the Institut in 1854. He collected ancient instruments of music, and sold his collection to the French Government in 1861; it is now included in the museum of the Conservatoire. Annibale dei Rossi's splendid spinet, ornamented with precious stones and exhibited at the South Kensington Museum, was bought from Clapisson. G. C.

CLARABELLA. A wooden organ stop (open) of 8-foot pitch, invented by Bishop. Its compass downward extends only to middle C, being carried further by means of stopped wood pipes. T. E.

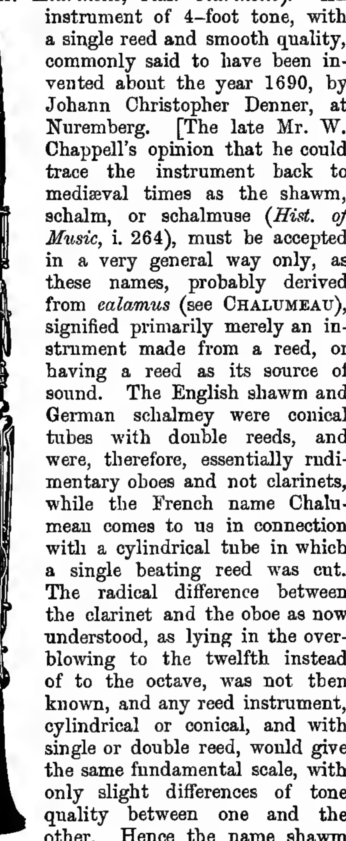
CLARI, GIOVANNI CARLO MARIA, was born at Pisa about 1669. He studied music at Bologna, under the well-known Colonna, of whom he has always been considered to have been one of the best pupils. He was maestro di cappella at Pistoia about 1712, at Bologna in 1720, and at Pisa in 1736. For Bologna he wrote in 1695 an opera entitled 'Il Savio delirante,' which had considerable success. But his renown chiefly comes from a collection of vocal duets and trios written with a basso continuo which he published between 1740 and 1747. A later edition is extant, published by Carli of Paris in 1823, and arranged with a modern accompaniment for the piano by a Polish composer named Mirecki, who called the composer 'Abate.' In these his novel treatment of fugue, and his approach towards the modulation of later times, help to mark an epoch in composition, and stamp him as a progressive and profound musician. [Several of the duets were the subject of some of Handel's appropriations, and a selection of them was published by Dr. Chrysander, as No. 4 of the 'Supplemente' to his great edition of Handel.]

There is a Stabat Mater by Clari in C minor in the Royal Library at Copenhagen; and Landsberg of Rome had the following works of his: a Mass for five voices, strings and organ; a Credo for four voices; Psalms for four voices in two dialogued choruses; a De Profundis for four voices and the organ; a Requiem for nine voices, strings and organ; a Mass di Cappella for four voices; some Psalms for Complins arranged for two choruses. [A fuller catalogue is in the *Quellen-Lexikon.*] Novello's 'Fitzwilliam music' contains no fewer than twenty-three compositions of Clari's from Masses, and the Stabat Mater, which for science, dignity, and sweetness fully bear out his reputation.

The exact date of his death is unknown, but it was probably about 1745. E. H. P.

CLARIBEL. See BARNARD, CHARLOTTE ALINGTON.

CLARINET or CLARIONET (Fr. *Clarinette*, Ger. *Klarinette*, Ital. *Clarinetto*). An instrument of 4-foot tone, with a single reed and smooth quality, commonly said to have been invented about the year 1690, by Johann Christopher Denner, at Nuremberg. [The late Mr. W. Chappell's opinion that he could trace the instrument back to mediæval times as the shawm, schalm, or schalmuse (*Hist. of Music*, i. 264), must be accepted in a very general way only, as these names, probably derived from *calamus* (see CHALUMEAU), signified primarily merely an instrument made from a reed, or having a reed as its source of sound. The English shawm and German schalmey were conical tubes with double reeds, and were, therefore, essentially rudimentary oboes and not clarinets, while the French name Chalumeau comes to us in connection with a cylindrical tube in which a single beating reed was cut. The radical difference between the clarinet and the oboe as now understood, as lying in the over-blowing to the twelfth instead of to the octave, was not then known, and any reed instrument, cylindrical or conical, and with single or double reed, would give the same fundamental scale, with only slight differences of tone quality between one and the other. Hence the name shawm and its variants may have been used somewhat indiscriminately.



The present name for the single reed instrument, clarinet or clarionet, is evidently a diminutive of *Clarino*, the Italian for the trumpet taking the highest parts in trumpet bands, and *Clarion*, the English equivalent. If the chief characteristic of the clarinet, as distinguished from the chalumeau, that is to say, the register a twelfth higher than the fundamental, obtained by opening the 'speaker' key, is considered, a correspondence is seen both in compass and brightness of quality between the instrument and the clarino.

Mr. V. C. Mahillon (*Catalogue descriptif et analytique du Musée Instrumental du Conservatoire Royal de Musique de Bruxelles*, 1893) adduces evidence to show that the work of Denner in the transition from the chalumeau to the clarinet was in the nature of slight modifications rather than a distinct invention. Since Denner's time the instrument has been successively improved by Stadler of Vienna, Iwan Muller, Klosé, and others, the improvements, or at least modifications, being continuous up to the present day.]

In 1843 Klosé completely reorganised the fingering of the instrument, on the system commonly called after Boehm, which is also applied to the flute, oboe, and bassoon. A general description of the older and more usual form will be given. It may, however, be remarked here, that Boehm or Klosé's fingering is hardly so well adapted to this as to the octave-scaled instruments. It certainly removes some difficulties, but at the expense of greatly increased complication of mechanism, and liability to get out of order.

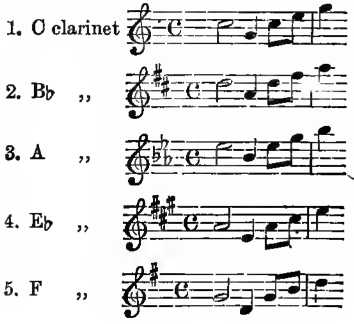
[The clarinet consists essentially of a mouthpiece furnished with a single beating reed, and a cylindrical tube pierced with many side-holes, terminating in a bell. The fundamental scale comprises nineteen semitones from *e* in the bass stave to *b♭'*. As the lowest note is emitted through the bell, a true chromatic scale necessitates the use of eighteen side-holes as a minimum, but the simplest clarinet in customary use at the present day, and known as the ordinary thirteen-keyed instrument, has twenty side-holes, of which seven are closed by the left thumb and by the first, second, and third fingers of the right and left hands, two by the little fingers acting through open standing keys, one by an open standing key closed by either or both of the second and third fingers of the right hand acting by means of ring touch-pieces, and eleven by closed keys. The thumb and finger-holes being closed, and the keys untouched, the note produced is *g*, and the raising of the fingers successively gives *a*, *b*, *c'*, *d'*, *e'*, *f♯'*, *g'*, the last note sounding from the thumb-hole. The closing of the two lower keys gives the low *f* and *e*, intermediate semitones are obtained by keys, and by the same means the range of the fundamental compass upwards is completed from *g'*, the thumb-hole note, often called 'the open note,' to *b♭'*. The thumb-key, giving *b♭'*, is very generally known as the 'speaker-key,' as when it is open the twelfths speak instead of the fundamental notes.] This register[1] is termed Chalumeau (see ABBREVIATIONS, p. 4*a*, and CHALUMEAU, p. 495*b*), and is of a somewhat different quality from the higher notes. The latter are obtained by a contrivance which forms the chief initial difficulty in learning the instrument, but has the advantage of giving it a very extended compass. The lever of the B♭ key named above ends close to the back thumb-hole, and answers a double purpose. In conjunction with the A♮ key it produces its own open note, but when raised by the point of the left thumb, while the ball of the same closes the back hole, it serves to determine a node within the tube, and raises the pitch by an interval of a twelfth. If all the side-holes be now closed by the fingers, the note issuing by the bell is B♮, in the treble stave, and by successive removal of fingers or opening of keys fifteen more semitones are obtained, reaching to *c'''* sharp; the thumb being constantly kept at its double duty of closing the G hole and opening the B♭ key. With the high C♯, what may be termed the natural scale of the instrument ends, although a whole octave more of notes may be got by cross-fingerings, depending considerably on the individual skill of the player. It is usually understood that the extreme note obtainable is *c''''* natural or sharp, an octave above that just given. But it is most undesirable to write for the instrument above the intermediate *g'''*, and in piano passages above *c'''*. We thus have in all three octaves and a sixth, of which the lower three octaves are perfectly available for legitimate use, and which, it will be presently shown, are considerably extended by the employment of several instruments in different keys.

The mouthpiece is a conical stopper, flattened on one side to form the table for the reed, and thinned to a chisel edge on the other for convenience to the lips. The cylindrical bore passes about two-thirds up the inside, and there terminates in a hemispherical end. From this bore a lateral orifice is cut into the table, about an inch long and half as wide, which is closed in playing by the thin end of the reed. The table on which the reed lies, instead of being flat, is purposely curved backwards towards the point, so as to leave a gap or slit about the thickness of a sixpence between the end of the mouthpiece and the point of the reed. It is on the vibration of the reed against this curved table that the sound of the instrument depends. The curve of the table is of considerable importance. [See MOUTHPIECE.] The reed itself is a thin flat slip cut from a kind of tall grass (*arundo sativa*), commonly, though incorrectly, termed 'cane.'

[1] Berlioz rather unnecessarily makes four registers, treating Chalumeau as the second.

[See REED.] It is flattened on one side, and thinned on the other to a feather-edge. The older players secured this to the table of the mouthpiece by a waxed cord, but a double metallic band with two small screws, termed a ligature, is now employed. The reed was originally turned upwards, so as to rest against the upper lip; but this necessitated the holding of the instrument at a large ungraceful angle from the body, and caused it to bear against a weaker mass of muscles than is the case when it is directed downwards. In England, France, and Belgium it is always held in the latter position.

The compass given above is that of an instrument in C, which sounds corresponding notes to the violin, descending three semitones below 'fiddle G.' But the C clarinet is not very extensively used in the orchestra or military bands. The latter employ an instrument in B♭, sounding two semitones below its written position, and consequently standing in the key of two flats. For the acuter notes they use a smaller clarinet in E♭, which sounds a minor third above its written scale, and stands in three flats. This is also employed occasionally in the modern orchestra by Richard Strauss and others. In the usual orchestra an instrument in A, sounding a minor third below the corresponding note of a C instrument, is much used, and stands in three sharps. It will be seen that the B♭ and A clarinets respectively lower the range of the lowest note to *d*♮ and *c*♯, thus augmenting the whole compass of the instrument. They also have the advantage of lessening the number of flats and sharps in the signature. Although the clarinet has been much improved it still presents great difficulties in extreme keys, and these are to some extent avoided by the B♭ instruments lessening the flats by two in flat keys, and the A instrument the sharps by three in sharp signatures. A melody in C would thus have to be played in G by the F, in A by the E♭, in D by the B♭, and in E♭ by the A clarinets. The following table shows how the notes will be written for each instrument, so as to sound like those of the C clarinet:—



6. For Corno di bassetto in F:

7. The Italians—as Cavallini and Canongia—sometimes write for the B♭ clarinet in the *tenor* clef; sounding as if written in the ordinary way (No. 2 above). The two intrinsic flats of the instrument have of course to be supplied by the player.

Besides the four instruments already named others are occasionally used. A small clarinet in F, above the C instrument, has been happily given up, except in an occasional piece of German dance music. The D, between these two, is also considered by some composers to blend better with the violins than the graver-pitched clarinets. There is a clarinet in H (*i.e.* B♮) in Mozart's 'Idomeneo.' Below the A clarinet we also have several others. One in A♭ is useful in military music. In F we have the tenor clarinet, known also as the alto clarinet, and the corno di bassetto or basset-horn, perhaps the most beautiful of the whole family. The tenor in E♭ stands in the same relation to this as the B♭ does to the C, and is consequently used in military bands. [BASSET-HORN.] Proceeding still lower in the scale we arrive at the bass clarinets. The commonest of these is in B♭, the octave of the ordinary instrument, and Wagner has written for an A basso. They are none of them perfectly satisfactory as examples of the characteristic clarinet tone, which seems to end with the corno di bassetto. [See BASS CLARINET.]

Helmholtz has analysed the tone and musical character of the clarinet among the other wind-instruments, and shows that the sounds proper to the reed itself are hardly ever employed, being very sharp and of harsh quality; those actually produced being lower in pitch, dependent on the length of the column of air, and corresponding to the sounds proper to a stopped organ-pipe. With a cylindrical tube these are the third, fifth, seventh, and ninth partial sounds of the fundamental tone. The upper register rising a twelfth from the lower or chalumeau, seems to carry out the same law in another form. On the other hand, the conical tubes of the oboe and bassoon correspond to open pipes of the same length, in which the octave, the twelfth, and the double octave form the first three terms of the series. See his paper in the *Journal für reine und angewandte Mathematik*, vol. lvii. [See, for quality of tone, notes by D. J. Blaikley in the *Proceedings of the Musical Association*, 1879-80, p. 84.]

The lowest note of the register is clearly an arbitrary matter. It has probably been dic-

tated by the fact that nine of the ten available digits are fully occupied. But M. Sax, whose improvements in wind-instruments have surpassed those which explicitly bear his name, has extended the scale another semitone by adding another key for the right little finger. Even the octave C can be touched by employing the right thumb, which at present merely supports the instrument. It is always so employed in the basset-horn, and a B♭ instrument thus extended must have been known to Mozart, who writes the beautiful obbligato to 'Parto,' in his 'Clemenza di Tito,' down to bass B♭, a major third below the instrument as now made.

To whatever period we may ascribe the invention of the clarinet, it is certain that it does not figure in the scores of the earlier composers. Bach and Handel never use it. An instrument entitled Chalumeau appears in the writings of Gluck, to which Berlioz appends the note that it is now unknown and obsolete. This may have been a clarinet in some form. Haydn uses it very sparingly. Most of his symphonies are without the part, and the same remark applies to his church music. There is, however, a fine trio for two clarinets and bassoon in the 'Et Incarnatus' of the First Mass, and there are one or two prominent passages in the 'Creation,' especially obbligatos to the air 'With verdure clad,' and 'On mighty pens,' and a quartet of reeds accompanying the trio 'On Thee each living soul awaits.' But it is with Mozart that the instrument first becomes a leading orchestral voice. 'Ah, if we had but clarinets too!' says he: 'you cannot imagine the splendid effect of a symphony with flutes, oboes, and clarinets' (Letter 119). Nothing can be more beautiful, or more admirably adapted to its tone than the parts provided for it in his vocal and instrumental works. The symphony in E♭ is sometimes called the Clarinet Symphony from this reason, the oboes being omitted as if to ensure its prominence. There is a concerto for clarinet with full orchestra (Köchel, No. 622) which is in his best style. For the tenor clarinet or basset-horn, the opera of 'Clemenza di Tito' is freely scored, and an elaborate obbligato is allotted to it in the song 'Non più di fiori.' His 'Requiem' contains two corni di bassetto, to the exclusion of all other reed-instruments, except bassoons. His chamber and concerted music is more full for clarinets than that of any other writer, except perhaps Weber. It is somewhat remarkable that many of his great works, especially the 'Jupiter' Symphony, should be without parts for the instrument, notwithstanding his obvious knowledge of its value and beauty. The ordinary explanation is probably the true one; namely, that being attached to a small court, he seldom had at his disposal a full band of instrumentalists.

Beethoven, on the other hand, hardly writes a single work without clarinets. Indeed there is a distinct development of this part to be observed in the course of his symphonies. The trio of the First contains a passage of importance, but of such simplicity that it might be allotted to the trumpet. The Larghetto (in A) of his Second Symphony is full of melodious and easy passages for two clarinets. It is not until we reach the 'Pastoral' Symphony that difficulties occur; the passage near the close of the first movement being singularly trying to the player:—

But the Eighth Symphony contains a passage in the Trio, combined with the horns, which few performers can execute with absolute cor-

rectness. Beethoven does not seem to have appreciated the lower register of this instrument. All his writings lie in the upper part of its scale, and, except an occasional bit of pure accompaniment, there is nothing out of the compass of the violin.

Mendelssohn, on the other hand, seems to revel in the chalumeau notes. He leads off the Scotch Symphony, the introductory notes of Elijah,' and the grand chords of the overture to 'Ruy Blas' with these, and appears fully aware of the singular power and resonance which enables them to balance even the trombones. Throughout his works the parts for clarinet are fascinating, and generally not difficult. The lovely second subject in the overture to the 'Hebrides' (after the reprise)—

the imitative passage for two clarinets, which recurs several times in the Overture to 'Melusina'—

and the rolling wave-like passages in his 'Meeresstille,' deserve special mention. On the other hand, there are occasional phrases of great complexity in his works. The scherzo of the Scotch Symphony, the saltarello of the Italian, are cases in point; but even these are exceeded by a few notes in the scherzo of the 'Midsummer Night's Dream,' which are all but unplayable.

Weber appears to have had a peculiar love for the clarinet. Not only has he written several great works especially for it, but his orchestral compositions abound in figures of extreme beauty and novelty. The weird effect of the low notes in the overture to 'Der Freischütz,' followed by the passionate recitative which comes later in the same work—both of which recur in the opera itself—will suggest themselves to all; as will the cantabile phrase in the overture to 'Oberon,' the doubling of the low notes with the violoncellos, and the difficult arpeggios for flutes and clarinets commonly known as the 'drops of water.' His Mass in G is marked throughout by a very unusual employment of the clarinets on their lower notes, forming minor chords with the bassoons. This work is also singular in being written for B♭ clarinets, although in a sharp key. The 'Credo,' however, has a characteristic melody in a congenial key, where a bold leap of two octaves exhibits to advantage the large compass at the composer's disposal.

Meyerbeer and Spohr both employ the clarinets extensively. The former, however, owing to his friendship with Sax, was led to substitute the bass clarinets in some places. [BASS CLARINET.] Spohr has written two concertos for the instrument, both—especially the second—of extreme difficulty. But he has utilised its great powers in concerted music, and as an obbligato accompaniment to the voice, both in his operatic works and his oratorios, and in the six songs, of which the 'Bird and the Maiden' is the best known.

An account of this instrument would be incomplete without mention of Rossini's writings. In the 'Stabat Mater' he has given it some exquisite and appropriate passages, but in other works the difficulties assigned to it are all but insuperable. The overtures to 'Semiramide,' 'Otello,' and 'Gazza Ladra,' are all exceedingly open to this objection, and exhibit the carelessness of scoring which mars his incomparable gift of melody.

No instrument has a greater scope in the form of solo or concerted music specially written for it. Much of this is not so well known in this country as it ought to be. The writer has therefore compiled, with the assistance of Mr. Leonard Beddome, whose collection of clarinet music is all but complete, a list of the principal compositions by great writers, in which it takes a prominent part. This is appended to the present notice.

A few words are required in concluding, as to the weak points of the instrument. It is singularly susceptible to atmospheric changes, and rises in pitch very considerably with warmth. It is therefore essential, after playing some time, to flatten the instrument; a caution often neglected. On the other hand it does not bear large alterations of pitch without becoming out of tune. In this respect it is the most difficult of all the orchestral instruments, and for this reason it ought undoubtedly to exercise the privilege now granted by ancient usage to the oboe; that, namely of giving the pitch to the band. In the band of the Crystal Palace this was done, and it is done in some other bands; it deserves general imitation. Moreover, the use of three, or at least two, different-pitched instruments in the orchestra, is a source of discord, which it requires large experience to counteract. Many performers meet the difficulty to some extent by dispensing with the C clarinet, the weakest of the three. Composers would do well to write as little for it as may be practicable. Mendelssohn, in his Symphonies, prefers to write for the A clarinet in three flats rather than for the C in its natural key, thus gaining a lower compass and more fulness of tone. [The inconvenience of changing from a warm to a cold clarinet has been one of the reasons given to justify the ingenious attempts that have been made to design an instrument that can be transposed as from A♮ to B♭ without suffering in quality. Mr. Buffet exhibited such an instrument in the Paris Exhibition of 1867, and more recently, the late Mr. Jas. Clinton brought out a very cleverly contrived instrument of the kind. In such instruments, however, it is difficult to attain to really accurate intonation, and there are also the objections of increased weight, cost, and liability to get out of order.] Lastly, the whole beauty of the instrument depends on the management of the reed. A player, however able, is very much at the mercy of this part of the mechanism. A bad reed not only takes all quality away, but exposes its possessor to the utterance of the horrible shriek termed *couac* (*i.e.* 'quack') by the French, and 'a goose' in the vernacular. There is no instrument in which failure of lip or deranged keys produce so unmusical a result, or one so impossible to conceal; and proportionate care should be exercised in its prevention.

List of the principal solo and concerted music for the clarinet: original works, not arrangements.

MOZART.—Trio for clarinet, viola, and piano, op. 14; Two Serenades for two oboes, two clarinets, two horns, and two bassoons, opp. 24 and 27; Quintet for oboe, clarinet, horn, bassoon, and piano, op. 29; Concerto for clarinet and orchestra, op. 107; Quintet for clarinet and strings, op. 101; Grand Serenade for two oboes, two clarinets, two basset-horns, two French horns, two bassoons, and double bassoon.

BEETHOVEN.—Three Duets for clarinet and bassoon; Trio for clarinet, violoncello, and piano, op. 11; Quintet for oboe, clarinet, horn, bassoon, and piano, op. 16; Grand Septet for violin, viola, violoncello, contra-basso, clarinet, horn, and bassoon, op. 20; the same arranged by composer as trio for clarinet, violoncello, and piano; Sestet for two clarinets, two horns, and two bassoons, op. 71; O tet for two oboes, two clarinets, two horns, and two bassoons, op. 103; Rondino for two oboes, two clarinets, two horns, and two bassoons.

WEBER.—Concertino, op. 26; Air and Variations, op. 33; Quintet for clarinet and string quartet, op. 34; Concertante duet, clarinet and piano, op. 48; Concerto 1, with orchestra, op. 73; Concerto 2, with orchestra, op. 74.

SPOHR.—Concerto 1, for clarinet and orchestra, op. 26; Concerto 2, for clarinet and orchestra, op. 57; Nonet for strings, flute, oboe, clarinet, horn, and bassoon, op. 31; Octet for violin, two violas, violoncello, basso, clarinet, and two horns, op. 32; Quintet for flute, clarinet, horn, bassoon, and piano, op. 52; Septet for piano, violin, violoncello, and same wind, op. 147; Six songs, with clarinet obbligato, op. 103.

SCHUMANN.—Fantasiestücke for clarinet and piano, op. 73; Mährchenerzählungen, for clarinet, viola, and piano, op. 132.

BRAHMS.—Trio in A minor, for piano, clarinet, and violoncello, op. 114; Quintet, for clarinet and strings, in D, op. 115; two sonatas, clarinet and piano, op. 120.

ONSLOW.—Septet for flute, oboe, clarinet, horn, bassoon, double bass, and piano, op. 79; Nonet for strings, flute, oboe, clarinet, horn, and bassoon, op. 77; Sestet for piano, flute, clarinet, horn, bassoon, and double bass, op. 30.

KALLIWODA.—Variations with orchestra, op. 128.

A. ROMBERG.—Quintet for clarinet and strings, op. 57.

HUMMEL.—Military Septet, op. 114.

C. KREUTZER.—Trio for piano, clarinet, and bassoon, op. 43; Septet for violin, viola, violoncello, contra-basso, clarinet, horn, and basson, op. 62.

S. NEUKOMM.—Quintet for clarinet and strings, op. 8.

A. REICHA.—Quintet for clarinet and strings; Twenty-four quintets for flute, oboe, clarinet, horn, and bassoon, opp. 88-91, 99, 100.

E. PAUER.—Quintet for piano, oboe, clarinet, horn, and bassoon, op. 44.

REISSIGER.—Concertos, opp. 63*a*, 14*b*, 180.

STANFORD.—Three Intermezzi for clarinet and piano, op. 13.

S. COLERIDGE TAYLOR.—Four characteristic waltzes, clarinet and piano.

W. H. S., with additions and corrections by D. J. B.

CLARINO. The Italian name for a trumpet of small bore, used chiefly in its extreme upper register. (See TRUMPET.) D. J. B.

CLARION. An organ reed stop of 4 ft. pitch, the treble portion of which is carried upwards by means of open flue pipes voiced to match the tone. T. E.

CLARK, the REV. FREDERICK SCOTSON, was born in London of Irish parents, Nov. 16, 1840. He received his earliest musical instruction from his mother, a pupil of Chopin and Mrs. Anderson. His musical tastes became so strongly developed that he was soon sent to Paris to study the piano and harmony with Sergent, organist of Notre Dame, and at the age of fourteen was appointed organist of the Regent Square Church. He next studied under E. J. Hopkins, and subsequently entered the Royal Academy of Music, where his masters were Sterndale Bennett, Goss, Engel, Pinsuti, and Pettit. In 1858 he published a Method for the Harmonium, and for a few years was organist at different churches in London. In 1865 he founded a 'College of Music' for students of church music and the organ. Soon after this he became organist of Exeter College, Oxford. He graduated Mus.Bac. in 1867, and was appointed Head Master of St. Michael's Grammar School, Brighton. Six months later he was ordained deacon, and afterwards priest. He next went to Leipzig, where he studied under Reinecke, Richter, etc. When in charge of the English church at Stuttgart, he pursued his musical studies under Lebert, Krüger, and Pruckner. In 1873 he returned to London, and in 1875 resumed his connection with the London Organ School. In 1878 he represented English organ-playing at the Paris Exhibition. Besides being a remarkable executant on the organ, he had great facility in composition. His works, which amount to over five hundred, consist principally of small organ and pianoforte pieces, many of which have attained great popularity. He died in London, July 5, 1883. W. B. S.

CLARK, J. MOIR, born at Aberdeen about 1863, was a pupil of Professor Prout at the Royal Academy of Music in 1883-86, and afterwards went to study in Germany. Among his most remarkable works is a quintet for piano and strings in F, first played in Dresden in 1892, and introduced to England by Miss Dora Bright in the following year. It even obtained an entrance into the programme of a Popular Concert in November 1894. Some pianoforte variations were also played by Miss Bright in 1889, and a suite for piano and flute was brought forward by Mr. F. Griffiths in 1893; a Scotch Suite for orchestra was performed by the Stock Exchange Orchestral Society in 1895. M.

CLARK, RICHARD, was born at Datchet, Bucks, April 5, 1780. At an early age he became a chorister at St. George's Chapel, Windsor, under Dr. Aylward, and at Eton College under Stephen Heather. In 1802 he succeeded his grandfather, John Sale, the elder, as lay clerk at St. George's Chapel and Eton College; these appointments he held until 1811. In 1805 he officiated as deputy in the metropolitan choirs, and in the same year was appointed secretary to the Glee Club. In 1811 he obtained the places of lay vicar of Westminster Abbey, and vicar-choral of St. Paul's, and in 1820 succeeded Joseph Corfe as a gentleman of the Chapel Royal. In 1814 Clark published a volume of the words of the most favourite glees, madrigals, rounds, and catches, with a preface containing an account of the song 'God save the King,' the composition of which he there attributed to Henry Carey. A second edition of this work appeared in 1824, but the subject of the popular tune was omitted, Clark having in 1822 published a separate volume assigning its composition to Dr. John Bull. [See GOD SAVE THE KING.] Clark distinguished himself by his assiduity in endeavouring to procure for the various cathedral and collegiate choirs a restitution of their statutory rights and privileges. He was the composer of a few anthems, chants, and glees, and the author of several pamphlets on *Handel and the Harmonious Blacksmith*, etc.; *Handel's 'Messiah'*; the derivation of the word 'Madrigale,' *Musical Pitch*, etc. He died Oct. 5, 1856. W. H. H.

CLARKE, JEREMIAH, born about 1669 (most probably much earlier), was a chorister in the Chapel Royal under Dr. Blow. After leaving the choir he became, for a short time, organist of Winchester College 1692-95 (see P. Hayes's *Harmonica Wiccamica*). In 1693 his master, Dr. Blow, resigned in his favour the appointments of almoner and master of the children of St. Paul's Cathedral. In 1695 he was appointed organist of St. Paul's and a vicar choral in 1705. On July 7, 1700, Clarke, and his fellow-pupil, William Croft, were sworn in as gentlemen extraordinary of the Chapel Royal, with the joint reversion of an organist's place, whenever one should fall vacant, a contingency which happened on May 15, 1704, by the death of Francis Piggott, on which Clarke and Croft were on May 25 sworn in as joint organists. [For New Year's Day 1706-7, Clarke composed an ode beginning 'O Harmony, where's now thy power?' the MS. of which is in the Bodleian (MS. Mus. C. 6)]. Clarke having the misfortune to become enamoured of a lady whose position in life rendered his union with her hopeless, fell into a state of despondency, under the influence of which he shot himself [at his house in St. Paul's Churchyard on Dec. 1, 1707, and was buried in the New Crypt of St. Paul's Dec. 3. See the *Athenæum* of April 2, 1887]. Clarke composed several anthems, chiefly of a pathetic kind, but not deficient either in force or dignity. [One of the most important was an 'Ode on the Glorious Assumption of the Blessed Virgin,' beginning 'Hark, she's call'd,' for solos (two sopranos, two altos, tenor, and bass), and chorus with accompaniment for two trumpets, two flutes, strings, and continuo. An early MS. of it is at St. Michael's, Tenbury.] He was the original composer of Dryden's famous ode, 'Alexander's Feast,' which was performed at Stationers' Hall on the occasion for which it was written, the feast on St. Cecilia's Day, Nov. 22, 1697, and at two or three concerts shortly afterwards; but the music was not printed, and seems now irretrievably lost. In 1699 Clarke (in conjunction with Daniel Purcell and Richard Leveridge) composed the music for the opera 'The Island Princess,' and (jointly with Daniel Purcell) for the opera 'The World in the Moon,' 1697. He also furnished music for 'The Fond Husband' (1676), Sedley's 'Antony and Cleopatra' (1677), 'Titus Andronicus' (1687), 'A Wife for any Man,' 'The Campaigners' (1698); 'The Bath' (1701); 'All for the Better' (1702), and 'The Committee' (1706), besides composing an ode in praise of the Island of Barbados, a cantata, some lessons for the harpsichord, and numerous songs published in the collections of the day. W. H. H.

CLARKE, JOHN, Mus.D., afterwards known as CLARKE-WHITFELD, was born at Gloucester, Dec. 13, 1770, and received his musical education at Oxford under Dr. Philip Hayes. In 1789 he was appointed organist of the parish church of Ludlow; in 1793 he took the degree of Bachelor of Music at Oxford; in the same year he was appointed master of the choristers at St. Patrick's Cathedral and Christ Church, Dublin. In 1794 he succeeded Richard Langdon as organist of Armagh Cathedral, which post he held till 1797. In 1795 he took the degree of Mus.D. in Dublin, and in 1799 the Irish rebellion led him to resign his appointments and return to England, where he soon afterwards became organist and master of the choristers of Trinity and St. John's Colleges, Cambridge. In 1799 he was granted the degree of Doctor of Music at Cambridge, *ad eundem* from Dublin; in 1810 incorporated at Oxford. He assumed the name of Whitfeld, in addition to his paternal name of Clarke, on the death of his maternal uncle, Henry Fotherley Whitfeld, in 1814. In 1820 he resigned his appointments at Cambridge for those of organist and master of the choristers of Hereford Cathedral, and on the death of Dr. Hague, in 1821, he was elected Professor of Music in the University of Cambridge. In 1832, in consequence of an attack of paralysis, he resigned his appointments at Hereford. He died at Holmer, near Hereford, Feb. 22, 1836, and was buried in the East Walk of the Bishop's cloister, Hereford Cathedral, where a mural tablet is erected to his memory. Dr. Clarke-Whitfeld's compositions consist of Cathedral Services and Anthems (published in four vols. in 1805 and subsequently), 'The Crucifixion and the Resurrection,' an oratorio, and numerous glees, songs, etc. He edited a collection containing thirty anthems from the works of various composers. Amongst the many works arranged by him for voices and pianoforte his edition of several of Handel's oratorios and other pieces must not be forgotten, as being the first of that author's works so treated. W. H. H.

CLASSICAL is a term which in music has much the same signification as it has in literature. It is used of works which have held their place in general estimation for a considerable time, and of new works which are generally considered to be of the same type and style. Hence the name has come to be especially applied to works in the forms which were adopted by the great masters of the latter part of the 18th century, as instrumental works in the sonata form, and operas constructed after the received traditions; and in this sense the term was used as the opposite of 'romantic,' in the controversy between the musicians who wished to retain absolutely the old forms, and those, like Schumann, who wished music to be developed in forms which should be more the free inspiration of the composer, and less restricted in their systematic development. [See ROMANTIC.] C. H. H. P.

CLASSICAL HARMONISTS. See CHORAL HARMONISTS.

CLAUDIN, the name by which Claude le Jeune and Claude de Sermisy were known to their contemporaries. [See LE JEUNE and SERMISY.]

CLAUDINE VON VILLABELLA. Drama by Goethe, music by Schubert; composed in 1815 but not performed. The first Act alone survives, and is now in the library of the Gesellschaft der Musikfreunde (Breitkopf's complete edition, ser. xv. vol. 7); the other Acts were burnt by accident, with those of the 'Teufels Lustschloss.' It is dated at beginning and end July 26 and August 5. G.

CLAUSS-SZARVADY, WILHELMINE, one of the eminent pianists of our time, daughter of a merchant, born at Prague, Dec. 13, 1834. She received her musical education at the Proksch Institute at Prague, and in 1849 made her first concert tour, exciting great attention both at Dresden and Leipzig (1850). Nevertheless, she lived almost unnoticed in Paris for nearly a year, although Berlioz interested himself much in her favour. She announced a concert, but it was postponed on account of her mother's death. Being now a total orphan, she was kindly received by the singer Mme. Ungher-Sabatier, and in the following year her claims were acknowledged in Paris. From thence her fame spread through Europe; she gave concerts in Paris, London, and Germany, receiving everywhere tributes of the warmest admiration. She was in London in 1852, and again in 1871. Her last visit was in 1886. She married (1857) the author Friedrich Szarvady (he died March 1, 1882), and now lives in Paris, seldom appearing in public. Her répertoire mainly consists of the works of Scarlatti, Bach, Beethoven, and it is upon her execution of these that her great reputation is founded. Her chief gift is the power of penetrating into the spirit of the work she executes; her conscientiousness is great, and she rejects all arbitrary interpretations, no matter how ingenious they may be. In this respect she worthily ranks with Madame Schumann. Madame Szarvady had a strong and romantic individuality, which used to be very charming. A. M.

CLAUSULA. See CADENCE (*a*).

CLAVECIN. The French name for a harpsichord, derived by apocope from the Latin clavicymbalum. According to M. Viollet Le-Duc (*Dictionnaire du Mobilier Français*, 1872) the clavecin superseded the psaltery in France some time in the 16th century. [See HARPSICHORD and PSALTERY.] A. J. H.

CLAVICEMBALO. One of the Italian names for a harpsichord, and the most used. It is derived from *clavis*, a key, and *cembalo*, a dulcimer or psaltery. Other Italian names for this instrument are *gravicembalo* (a phonetic variation caused by the interchange of *r* with *l*) and *arpicordo*, from which comes our 'harpsichord.' [See CEMBALO and HARPSICHORD.] A. J. H.

CLAVICHORD (Ger.; Med. Latin, *Clavicordium*; Ital. *Manicordo*; Span. *Manicordio*; Fr. *Manicorde*). In the Romance tongues Clavicordo and similar names imply a spinet. The real clavichord is different, and is a keyboard stringed instrument, the tones of which are elicited by tangents, slender upright blades of brass inserted in the key levers, and flattened at the top where the contact is with the strings; rising to them in playing, to excite the sound and at the same time mark off the vibrating lengths of the strings from the belly bridge. In these respects the clavichord differs from the virginal or spinet and harpsichord which have another bridge, mechanical plectra and dampers, and from the piano, which has also two bridges and is acted upon by hammers. The clavichord is developed from the simple monochord, the virginal, spinet and harpsichord from the psaltery, and the piano from the dulcimer. There is no evidence as to which was first, although the simplicity of its structure points to the priority of the clavichord. Virdung (*Musica getutscht und auszgezogen*, Basle, 1511), our earliest authority, says he never could learn who, by putting keys to a monochord, had invented it, or who, on account of those keys, first called it Clavicordium. The earliest record of it is in Eberhard Cersne's *Rules of the Minnesingers*, A.D. 1404, where it appears with the clavicymbal and the monochord itself. Quotations from Dr. Murray's *New English Dictionary* are, A.D. 1483, Caxton, *G. de la Tour*, k. vi., 'where his vyell and clavicordes were,' and as Clarichord, A.D. 1508, the will of Wyldegris (Somerset House), 'Payre of Clarycordes,' A.D. 1509, Hawe's *Past Pleas*, xvi. xii., 'Rebeckes, Clarycordes, eche in theyr degre.' The substitution of *r* for *v* has probably arisen from a copyist's error, afterwards continued. It is not certain whether true clavichords or spinets are meant by these and other contemporary quotations. The oldest existing specimen known of the real tangent clavichord is dated A.D. 1537, and is in the Metropolitan Museum, New York. It is said to be Italian but has German attributes. There are older spinets preserved. Sebastian Virdung in the above-mentioned work describes and figures the clavichord, but his woodcuts of keyboard instruments, not having been reversed for the engraver, are wrong as to the position of bass and treble. Other writers who have followed Virdung and have used his illustrations, Martin Agricola, 1529, Luscinius, 1536, and even Dr. Rimbault (*The Pianoforte*, p. 30), 1860, have not observed his obvious error.

In shape the clavichord has been followed by the square pianoforte, of which it was the prototype (Fig. 1). The case was oblong and was placed upon a stand or legs. The length, according to the compass and period of construction, was from four to five feet; the breadth less than two feet; the depth of case five to seven inches. The keys were in front, and

extended beneath the sound-board to the back of the case, each being balanced upon a wire pin, and prevented from rattling against its neighbour by a small piece of whalebone projecting from the key and sheathed in a groove behind (Fig. 2). The lower or natural keys were usually black, and the upper or chromatic, white. In Italy and the Netherlands the practice was the reverse. The strings, of finely-drawn brass wire, were stretched nearly in the direction of the length of the case, but with a bias towards the back. On the right of the player were inserted in the sound-board, strengthened on the under side by a slip of oak

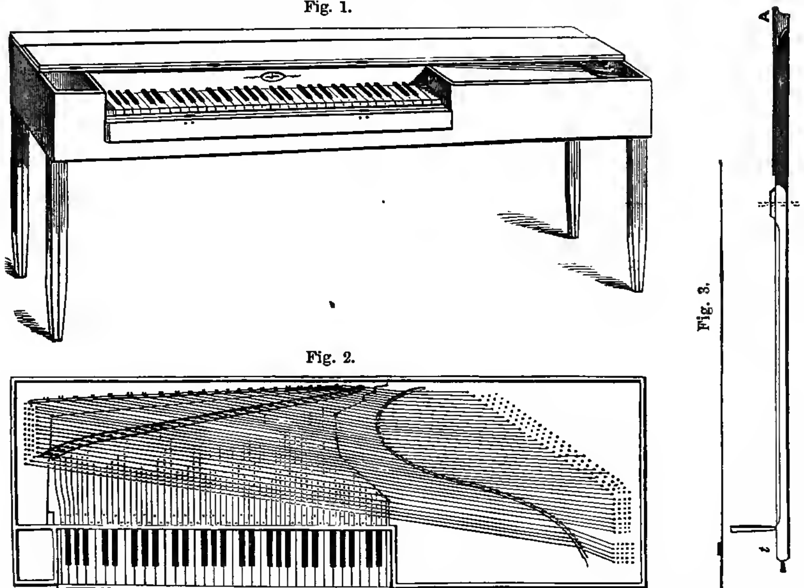


Fig. 1.

Fig. 2.

Fig. 3.

to receive them, the wrest or tuning-pins round which the strings were fastened, while at the back and partly along the left-hand side of the case, they were attached by small eyes to hitch-pins of thicker wire. On the right hand the strings rested upon a curved bridge, pinned to fix their direction, and conducting their sound-waves to the sound-board, a flat surface of wood beneath, extending partly over the instrument, but in clavichords of the 18th century we miss the harpsichord sound-hole cut as a rose or some other ornamental device—often the initials of the maker's name. Nearly at the back of each key, in an upright position, was placed the small brass wedge or 'tangent' (*t*) about an inch high and an eighth of an inch broad at the top (Fig. 3). The tangent, when the key was put down, rose to the string and pressing it upwards set it in vibration. With a good touch the player could feel the elasticity of the string, and the more this was felt the better the instrument was considered to be. By the pressure of the tangent the string was divided into two unequal lengths, each of which would have vibrated, but the shorter was instantly damped by a narrow band of cloth interlaced with the strings, which also damped the longer section directly the player allowed the key to rise and the tangent to fall. The tangents thus not only produced the tones, but served as a second bridge to measure off the vibrating lengths required for the pitch of the notes. Thus a delicate tone was obtained that had something in it charmingly hesitating or tremulous; a tone although very weak, yet capable, unlike the harpsichord or spinet, of increase and decrease, reflecting the finest and most tender gradations of the touch of the player, and in this power of expression without a rival until the pianoforte was invented. To ears accustomed to the pianoforte, the 'blocking' sound inseparable from the clavichord tone would seem a disadvantage. Koch, in his *Musikalisches Lexikon*, describes the clavichord as 'Labsal des Dulders, und des Frohsinns theilnehmenden Freund' ('the comfort of the sufferer and the sympathising friend of cheerfulness').

Up to the beginning of the 19th century the use of the clavichord in Germany was general. It was a favourite instrument with J. S. Bach, who preferred it to the pianoforte; and with his son Emmanuel, who wrote the *Versuch über die wahre Art das Klavier zu spielen*, an essay on the true method of playing the clavichord, and the basis of all succeeding text-books of keyed stringed instruments.

Mattheson lauded the clavichord above the clavicymbel or harpsichord. Mozart used the clavichord now in the Mozarteum at Salzburg in composing his 'Zauberflöte' and other masterpieces, although in playing he leant to the harpsichord style. Beethoven is reported to have said 'among all keyed instruments the clavichord was that on which one could best control tone and expressive interpretation' (*Vortrag*). Beethoven's own style of performance on the piano is shown more than by any tradition, by his commentary on Cramer's studies, preserved by Schindler, to have been founded upon the technique of the clavichord.

Clavichords made before the 18th century had two or three unison strings to a note, beginning in the bass with one string and one tangent to each note, then continuing with two strings and, from *c'* upwards, three, up to the highest notes of a four-octave compass. The lowest key, apparently E, was of 'short measure' and made to sound C, and the F♯ to sound D, according to the convention of the 'short octave' (see SHORT OCTAVE). One string or set of strings was, moreover, made to serve for two, or even more notes, in the 'gebunden' clavichords, so that F and F♯ were on the same string, the latter note being produced by a tangent stopping the string at a shorter length. The notes chosen for the longest stopping in these fretted ('gebunden') clavichords, appear to have been G♯, B♮, D, and F. About the end of the 17th century the clavichord was enlarged and the compass extended, so that fretted clavichords were made with only two tangents to a pair of strings, but leaving the notes A and D throughout the scale with one tangent and 'bundfrei,' (*i.e.* free from fretting). The strings were arranged according to their greatest sounding lengths, in the scale F, G, A, B♭, C, D, and E♭, the nearer tangent stopping the semitones F♯, G♯, B♮, C♯ and E♮. The explanation of the longer stopping is in the tuning, the groundwork being derived from fifths, upwards C, G, D, A, and downwards F, B♭ and E♭; octaves being employed to bring the scheme within an octave and a fifth. F or C were used as pitch notes, and the nearer sharps and naturals, semitones to the first scale, were made as well as could be done by regulating the spacing of the tangents. With this imperfect tuning it is no wonder J. S. Bach hailed with joy the 'bundfrei' or fret-free clavichord where each pair of strings had its own tangent, and devoted himself to the composition of the immortal 'forty-eight,' of the 'well-tuned clavichord' (*Wohltemperirtes Clavier*) where an endurable chromatic, or Equal-Temperament tuning could, as in the harpsichord, be observed, and each semitone become the keynote of a Major and Minor scale. The 'bundfrei' clavichord has been attributed to Daniel Faber of Crailsheim, the year given being 1720, or thereabouts, but as Bach's first collection of twenty-four preludes and fugues was complete in 1722, the improved instrument was certainly a few years earlier.

An unduly strong pressure on the key, by displacing a little the point of contact of the tangent, tightened the vibrating part of the string and made the note very slightly sharper in pitch; this fault was deprecated by C. P. E. Bach. There is no doubt that clavichord players preserved a very tranquil position of the hand in order to preserve truth of intonation. Another special grace was that of repeating a note several times in succession without quitting the key, a dynamic effect (German *Bebung*) which could not be done on the harpsichord or piano. [BEBUNG.]

The early history of the clavichord previous to the 15th century, together with that of the chromatic keyboard—a formal division at the very foundation of modern music—rests in profound obscurity. However, the keyboard with its familiar division into seven long and five short notes, was not designed to bring within the limits of the octave the theoretical circle of fifths; the short notes or semitones were long used 'per fictam musicam,' and not, like the seven naturals, as practical starting-points for scales. It was not until the epoch of J. S. Bach that the semitones gained equal privileges with the naturals. Again, our chromatic keyboard was not suggested by the 'chromatic' genus of the Greeks, a totally different idea. The problem really solved by it was that of the transposition of the church tones, a series of scales on the natural keys employing each in succession as a starting-point. The first and seventh were consequently nearly an octave apart. Bearing in mind that some of the Latin hymns embraced a compass of twelve or thirteen notes, it is evident that ordinary voices could not sing them or even those of less extent, without concession in pitch. Arnold Schlick (*Spiegel der Orgelmacher und Organisten*, Mainz, 1511) gives several instances of necessary transposition, which were only possible by the insertion of the semitones between the naturals, as even then it was a law that the interval of an octave should be grasped by the hand, the broader keys of the older organs having been abolished. By this insertion of the semitones they became the willing guides to the cadences; the G♯ alone being doubtful on account of the 'wolf' in tuning. Schlick in his chapter on tuning,—in which he includes the clavichord and clavizymmel (clavicembalo), the symphonia, a smaller keyed instrument, lute, and harp—says that the semitones could not be rightly tuned or brought into concord. But he names all the semitones we now use, and speaks of double semitones having been tried in the organ twelve years before (1499), which failed through the difficulty of playing. The complete chromatic scale is found in the keyboard of the Halberstadt organ, built about A.D. 1360.

As already said, Virdung, a priest at Basle, who published his *Musica getutscht und auszgezogen* in 1511 (afterwards translated into Latin by Luscinius as *Musurgia, seu Praxis-Musicae*, Strasburg, 1536) is the oldest authority we can specially refer to about the clavichord. The next in order of time, but a hundred years later, is Praetorius (*Syntagma Musicum*, 1614-1618). We are told by him that the earliest clavichords had only twenty keys, in *genere diatonico*, with two black keys (B♭), so there were not more than three semitones in an octave; like the scale attributed to Guido d'Arezzo, the full extent of which would have embraced twenty-two keys in all—

but Praetorius gives no nearer indication of the compass, and of course none of the pitch. [HEXACHORD.] But in Virdung's time there were thirty-five keys or more, starting from the F below the bass stave and embracing the complete system of half-tones; and in that of Praetorius at least four octaves, still the usual compass when J. S. Bach wrote the *Wohltemperirtes Clavier*. By the middle of the century five octaves were attained.

There is great probability that the Greek monochord, a string stretched over a soundboard, and measured off into vibrating lengths by bridges, was a stepping-stone to the invention of the clavichord. Used for centuries in the Church to initiate the singers into the mysteries of the eight tones, it must at last have seemed more convenient to dispense with shifting bridges, and at the points of division to adjust fixed bridges raised by an apparatus imitated from the keys of the organ, to press the strings and produce the notes required. This would be an elementary clavichord action, and may account for clavichords, and harpsichords too, being styled monochords in the 15th and 16th centuries, and even as late as the 18th (D. Scorpione, *Riflessione armoniche*, Naples, 1701). The earliest notice of a monochord among musical instruments is to be found in Wace's *Brut d'Angleterre* (*circa* A.D. 1115), 'Symphonies, psaltérions, monachordes.' Ambros (*Geschichte*, 1864, vol. ii. p. 199), from the silence of Jean de Muris as to the clavichord, though repeatedly enumerating the stringed instruments in use (*Musica Speculativa*, 1323), infers that it did not then exist, and from this and other negative evidence would place the epoch of invention between 1350 and 1400. De Muris refers to the monochord with a single string, but recommends the use of one with four strings, to prove intervals not previously known. These four strings were the indices to the eight church tones. Dr. Rimbault (*The Pianoforte*, p. 36) has been deceived in quoting from Bohn's edition of Sismondi the well-known advice to a jongleur by Guiraut de Calanson (died A.D. 1211). It is there stated that the jongleur should play on the citole and mandore, and handle the *clarichord* and guitar. Reference to the original (Paris MS. La Vallière, No. 14, formerly 2701), confirms the citole and mandore, but instead of 'Clarichord' we find 'Manicorda una corda,' doubtless a simple monochord, for in the 'Roman de Flamenca' we find 'l' autr' accorda lo sauteri al manicorda' ('the other tune the psaltery to the monochord'). In the *Dictionnaire étymologique*, Paris, 1750, 'manicordion' is rendered by monochord. Citole and mandore are also there, but not clavichord.

As to the etymology of clavichord: the word *clavis*, key, in the solmisation system of Guido d'Arezzo, was used for note or tone, and thus the *clavis* was the 'key' to the musical sound to be produced. The *claves* were described by alphabetical letters, and those occupying coloured lines, as F on the red and C on the yellow, were *claves signatæ*, the origin of our modern clefs. When the simple monochord gave place to an instrument with several strings and keys, how easy the transference of this figurative notion of *claves* from the notes to the levers producing them! Thus the name Clavichord from *clavis*, key, and *chorda*, string, would come very naturally into use. (Ambros, *Geschichte der Musik*, vol. ii. Breslau, 1864.)

Virdung and Reynvaan (*Musijkaal kunst Woordenboek*, Amsterdam, 1795) mention clavichords with pedals, and Adlung describes them. These clavichords had two octaves and a note of pedals on a separate pedalier, which had three or four strings to each note, for which the tangents were arranged as fretted ('gebunden'). An example has been recently found by Herr Paul de Wit of Leipzig. It is a combination of three instruments, two of four-foot pitch, the middle one, or lower manual, to be drawn forward when required. The pedalier, the lowest in position, is of eight- and sixteen-foot pitch, the strings being overspun. It has twenty-five pedals. The maker's nameplate is inscribed 'Johann David Gerstenberg, Orgelbauer zu Geringswald, hat uns gemacht, 1760.' Experiments were made with the clavichord to introduce a damper register, instead of the muting cloth or tape, and to get a mechanical *piano* effect by a shortened rise of the tangent, useless additions to an expressive instrument. No doubt these contrivances were instigated by the square piano, which was then becoming popular, and was soon to supersede the clavichord altogether.

According to Fischhof (*Versuch einer Geschichte*, etc., 1853), Lemme of Brunswick, Wilhelmi of Cassel, Vensky, Horn and Mack of Dresden, and Krämer of Göttingen, were reputed in the 18th century good clavichord

makers. Carl Engel quotes the prices of Lemme's as having been from three to twelve louis d'or each ; Krämer's from four to fourteen, according to size and finish. Wilhelmi charged from twenty to fifty thalers (£3 to £7 : 10s.).

Among the latest clavichords that were made were those constructed by Hoffmann, Stuttgart, in 1857, on the pattern of one belonging to Molique. They were made for the late Joseph Street, of Lloyd's. A few were made by Mr. Arnold Dolmetsch in 1896. [See also TANGENT.] A. J. H.

CLAVICYTHERIUM. The monkish Latin name for a vertical spinet. There is a valuable specimen of this instrument in the Donaldson Museum belonging to the Royal College of Music, South Kensington, which was formerly in the collection of Count Giovanni Correr of Venice. There is no name or date on this instrument, but it can be hardly later than the first years of the 16th century; Virdung gives a woodcut of such an instrument (*Musica getutscht und auszgezogen*, Basle, 1511). The keyboard of this specimen has three octaves and a minor third, E to g'', less than Virdung's compass, but we may regard the lowest E as being tuned down to C, according to the 'short octave' arrangement. The jacks have plectra of wire, not quill. The upright harpsichord has been also called clavicytherium. There is a fine example in the Metropolitan Museum, New York. A. J. H.

CLAVIER. In French, a keyboard or set of keys of an organ or pianoforte ; Italian *Tastatura ;* in German expressed by *Claviatur* or *Tastatur*. Clavier in German stands for a piano, a harpsichord, a clavichord, and in fact for any keyboard stringed instrument. [CLAVICHORD, KEYBOARD, PIANOFORTE.] A. J. H.

CLAY, FREDERIC, son of James Clay, M.P., a very famous whist-player, and author of a well-known treatise on the game. Born August 3, 1838,[1] in the Rue Chaillot, Paris ; he held a post for a time in the Treasury. He was educated in music entirely by Molique, with the exception of a short period of instruction at Leipzig under Hauptmann. His compositions were almost wholly for the stage. After two small pieces for amateurs, 'The Pirate's Isle' (1859) and 'Out of Sight' (1860), he made his public début in 1862 at Covent Garden with 'Court and Cottage,' libretto by Tom Taylor. This was followed by 'Constance' (1865), by 'Ages Ago' (1869), 'The Gentleman in Black' (1870), 'Happy Arcadia' (1872), 'Cattarina' (1874), 'Princess Toto' and 'Don Quixote' (both 1875). In addition to these Mr. Clay wrote part of the music for 'Babil and Bijou' and the 'Black Crook' (both 1872), and incidental music to 'Twelfth Night' and to Albery's 'Oriana.' 'The Merry Duchess' was produced at the Royalty Theatre, May 23, 1883, and 'The Golden Ring' at the Alhambra, Dec. 3, 1883. He also composed two cantatas, 'The Knights of the Cross' (1866) and 'Lalla Rookh' (containing what is perhaps his best-known song, 'I'll sing thee songs of Araby'), produced with great success at the Brighton Festival in February 1877 ; and not a few separate songs.

In all his works Clay showed a natural gift of graceful melody and a feeling for rich harmonic colouring. Although highly successful in the treatment of dramatic music, it is probable that his songs will give him the most lasting fame. 'She wandered down the mountain side,' 'Long ago,' and 'The Sands of Dee,' among others, are poems of great tenderness and beauty, and not likely to be soon forgotten. [He was struck with paralysis immediately after the production of 'The Golden Ring,' and died at Great Marlow, Nov. 24, 1889.] A. S. S.

CLAYTON, THOMAS, born about 1670, was one of the King's band from 1692 to 1702. He went to Italy for improvement in the latter year. On his return he associated himself with Nicola Francesco Haym and Charles Dieupart, both excellent musicians, in a speculation for the performance of musical pieces at Drury Lane Theatre. Clayton had brought with him from Italy a number of Italian songs, which he altered and adapted to the words of an English piece written by Peter Motteux, called 'Arsinoe, Queen of Cyprus,' and brought it out in 1705 as an opera of his own composition. Elated by his success he proceeded to set to music Addison's opera, 'Rosamond,' which was performed in 1707 and completely exposed his incapacity. The speculation, however, continued to be carried on until 1711, when the Italian opera being firmly established in the Haymarket, the managers of Drury Lane Theatre determined to discontinue the production of musical pieces. Clayton and his colleagues then gave concerts at the Music Room in York Buildings, and John Hughes, the poet, having at the request of Sir Richard Steele, altered Dryden's 'Alexander's Feast,' it was set to music by Clayton and performed there on May 24, 1711, in conjunction with 'The Passion of Sappho,' a poem by Harrison, also set by Clayton. Both failed from the worthlessness of the music, and have long since sunk into oblivion ; but copies of some of his operas which were printed testify to Clayton's utter want of merit as a composer. As to his residence in Dublin, see *Dict. of Nat. Biog.*, *s.v.* WHARTON, Thomas, Marquis of, vol. lx. He is said to have died about 1730. W. H. H.

CLÉ DU CAVEAU. The title of a large collection of French airs, including the tunes of old songs dating from before the time of Henry IV., old vaudevilles, commonly called *pont-neufs*, and airs from operas and *opéras-comiques* which from their frequent use in *comédies-vaudevilles* have become popular airs (what are called *timbres*). The fourth and last edition of the work, published by Capelle, goes down to 1848 ;

[1] See *London Figaro* for Dec. 7, 1889.

a new edition would have to include airs taken from comic operas by Auber, Adam, etc., written since the above date, and airs from the operettas of Offenbach and Lecocq, which have now become new types for the vaudeville couplet and have enriched the domain of the popular song. The collection is so arranged that it is perfectly easy to find either the tune of a song of which the words only are known, or the metre and rhythm of words which will fit any particular air. The publication is especially useful to dramatists who have to write couplets for a vaudeville, and to amateur song-writers; it contains 2350 different airs, and as many forms or models for couplets. The origin of the title is as follows:—Three French song-writers of the 18th century, Piron, Créhillon *fils*, and Collé, instituted, in 1733, a sort of club, where they dined regularly, together with other song-writers and literary men. They called their society le Caveau, from the place of meeting, an inn of that name kept by one Landelle in the Rue de Buci, near the Comédie Française and the Café Procope, where these boon companions finished their evenings. From that time all societies of song-writers have connected themselves as much as possible with this first society, and so the name Caveau is synonymous with a club of the same kind. The original society lasted exactly ten years, after which, in 1762, Piron, Crébillon *fils*, and Gentil-Bernard formed a new society in the same place, which lasted only five years. After the Revolution, the 'Caveau moderne' was founded in 1806 by Capelle, the author of the Clé du Caveau, with the help of Grimod de la Reynière, Piis, Armand Gouffé, and Philippon de la Madeleine; they met at Balaine's in the Rocher de Cancale, rue Montorgueil. The society lasted till 1815, and in 1825 an effort was made to revive it, but after a year's existence it disappeared, together with another club, 'Les Soupers de Momus,' founded in 1813. In 1835 a new society was founded at Champeaux's under the direction of Albert Montémont, and was called at first les Enfants du Caveau, and then le Caveau only. It still exists, and is managed by a committee headed by a president elected every year, who holds Panard's glass and Collé's bells as symbols of his office. A. J.

CLEF (Ital. *Chiave*, from the Lat. *Clavis;* Ger. *Schlüssel*), *i.e.* key, the only musical character by which the pitch of a sound can be *absolutely* represented. The clefs now in use are three only—, , and . These severally represent *c'*, *g'*, and *f*. Two other clefs, severally representing *d''* and *G*, have been long obsolete. From the last of these, Γ, the Greek gamma, which represents the lowest sound of the musical system, is derived the word *gamut*, still in use. [A *d* clef, indicating the note a third below that to which the bass clef is applied, occurs in a collection of old English motets, etc., by Tallis and others (Brit. Mus. Add. MSS., 17,802-3). It stands thus on the stave, , and occurs in the 'bassus' part.]

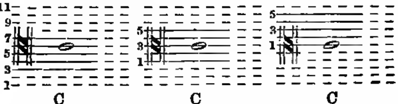
The following tables (from Koch's *Musikalisches Lexikon*) will show that the three clefs now in use are but corruptions of old forms of the letters C, G, and F.

[In addition to these forms, the C clef appears sometimes thus, , while the F clef occasionally takes such forms as and].

One or other of these characters, placed on one or other of the lines of a stave, indicates the name and pitch of the notes standing on that line, and by inference those of other notes on lines and spaces above and below it.

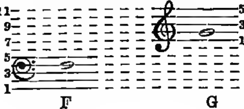
The stave which, at various times and for various purposes, has consisted of various numbers of lines, consists now commonly of five. On any one of these each of the three clefs might be (almost every one has been) placed. In the following examples they occupy the positions in which they are now most commonly found:—

Only, however, in its relation to the stave of five lines can a clef be said with truth to change its place. On the Great Stave of Eleven Lines the clefs never change their places; but any consecutive set of five lines can be selected from it, the clef really retaining, though apparently changing, its place:—



From the above it will be seen that when notes are written 'in the tenor clef' (more properly 'on the tenor stave') they are written on the 3rd, 4th, 5th, 6th, and 7th lines of the 'great stave' of eleven; that when written 'in the alto clef' they are written on the 4th, 5th, 6th, 7th, and 8th lines of this great stave; and when 'in the soprano clef' on the 6th, 7th, 8th, 9th, and 10th.

The more familiar 'bass and treble staves' consist severally of the lowest and the highest five lines of the great stave:—



In early musical MSS. two, and even three, clefs are sometimes found on the same stave. It would be in no way inconsistent with modern theory, and indeed might be convenient in books of instruction, so to place them now:—

J. H.

CLEGG, JOHN, a distinguished violinist, was born in Dublin in 1714. He appears to have been a pupil of Dubourg, at Dublin, and afterwards of Bononcini. In 1723, when only nine years of age, he performed in London in public a concerto of Vivaldi, and afterwards gained an eminent position in the musical profession, surpassing, according to contemporary writers, every other player in England in tone and execution. On Jan. 21, 1743-44, owing probably to excessive practice, he became insane, and was confined in Bedlam Hospital, where, as Burney relates, 'it was long a fashionable, though inhuman amusement, to visit him there, among other lunatics, in hopes of being entertained by his fiddle or his folly.' [He was discharged as cured on July 20, 1744, but was again admitted on Dec. 15 of the same year. He was finally discharged Oct. 13, 1746, and died in London about 1750.] Clegg appears also to have been a composer for his instrument, but no work of his has come down to us. P. D.

CLEMENS NON PAPA, the sobriquet of Jacques, or Jacob, Clément, one of the most renowned musicians of the 16th century. He was born in Flanders, and is said to have been chapel-master at Vienna to Charles V. and his brother Ferdinand I. According to E. G. J. Grégoir (*Galérie Biographique des Artistes Musiciens Belges*, 1862, p. 199) he was connected with Antwerp Cathedral, but as the same writer (in his *Notice Historique sur les Sociétés . . . de Musique d'Anvers*, etc., 1869) omits the name of Clément from his notice of the Cathedral choir, the statement in the earlier work is probably a mistake. Fétis attempts to prove that he was born before 1475, but the evidence is quite unsatisfactory, and all that is practically known of him is that he died before 1558, since a motet on his death, by Jacob Vaet, is contained in a work published in that year ('Novum et insigne Opus Musicum,' tom. I. Noribergæ, 1558). Clément was one of the most prolific and popular composers of his day. His very sobriquet is a proof of the high reputation in which he was held by his contemporaries, since it was intended to distinguish him from Pope Clement VII. Ten volumes of his masses were issued in folio size by Phalèse at Louvain between 1556 and 1560, and in 1559 the same publisher issued seven books of his motets. Eitner's *Quellen-Lexikon* gives a long list of his works. Commer has published forty-three of his motets, chansons, and Flemish psalms ('Collectio Op. Mus. Batavorum'). Proske has included three motets in his *Musica Divina*, and winds up a notice of his life by the following remarks:—'He seems to have attempted all the styles then known. He was no slave to counterpoint, but for his time possessed an extraordinary amount of melodies and clear harmony. No one in his day surpassed him for tunefulness and elegance, his melodies are far more fresh and pleasing than those of his contemporaries, and his style is easy, simple, and clear. That he often pushed imitation too far and neglected the due accentuation of the text is only to say that he belonged to the 16th century.' W. B. S.

CLÉMENT, FELIX, born at Paris, Jan. 13, 1822, composer, and writer on musical history and archæology. From 1843 onwards he held various posts as organist and director of church music, ultimately at the Sorbonne. In 1849 he directed choral performances in the Sainte-Chapelle, the outcome of which was the publication of a collection of ancient music in that year. His most important published compositions are choruses for Racine's 'Athalie' and 'Esther.' For several years he contributed largely to Didron's *Annales archéologiques*, thus preparing himself for his *Histoire générale de la Musique religieuse* (Paris, 1861), in which are included translations from Cardinal Bona's treatise 'De divinâ Psalmodiâ' and Formby's 'Gregorian chant compared to modern music.' He edited several books of religious music for the Roman Church, such as 'Eucologie en musique selon le rit parisien' (Paris, 1843 and 1851); 'Le Paroissien romain' (Paris, 1854); and 'Chants de la Sainte-Chapelle' (1849). His 'Méthode complète de Plain-Chant' (2nd ed. 1872), does not contain anything new, but is clear and orderly. His 'Méthode d'orgue' (1874), exhibits a moderate knowledge of thorough-bass and fugue. Clément's most useful compilation is his *Dictionnaire lyrique*, a convenient list of operas on the plan of Allacci's 'Drammaturgia,' compiled from Babault's *Dictionnaire général des Théâtres* and similar works, not without occasional errors and omissions. Four supplementary parts have been issued, bringing the work down to 1881; and a second edition of the whole, edited by A. Pougin, appeared in 1897. Clément also published *Les Musiciens célèbres depuis le 16ème siècle* (Paris, 1868, forty-two portraits) [and a *Histoire de la Musique* in 1885. He died Jan. 23, 1885]. G. C.

CLEMENT, FRANZ, an eminent violin player, was born Nov. 17, 1780, at Vienna, where his father was butler in a nobleman's establishment, and at the same time, after the fashion of the period, a member of his master's private band. His father and Kurzweil, the leader of another nobleman's band, were his teachers. Clement began to play the violin when he was only four,

and in March 1789 made his first successful appearance in public at a concert in the Imperial Opera-house. He soon began to travel with his father, and in 1790 came to London, where he gave very successful concerts, some of which were conducted by Haydn and Salomon. He also played at Oxford at the second concert given in celebration of Haydn's installation as Doctor of Music. Having returned to Vienna he was appointed Solo-player to the Emperor, and in 1802 conductor of the newly established theatre 'an der Wien,' which post he retained till 1811. From 1812 to 1818 he travelled in Russia and Germany, and then again in 1818-1821 conducted the Opera in Vienna. In 1821 he began to travel with the celebrated singer Catalani, conducting her concerts, and also was for a short time (about 1816) conductor of the Opera at Prague. He died in poor circumstances at Vienna, Nov. 3, 1842.

Clement was not only a remarkable violin player, but an unusually gifted musician. Some curious facts are reported, bearing testimony to his general musical ability and especially to his prodigious memory. Spohr, in his *Autobiography*, relates that Clement, after having heard two rehearsals and one performance of the oratorio 'The Last Judgment,' remembered it so well, that he was able, on the day after the performance, to play several long pieces from it on the piano without leaving out a note, and with all the harmonies (no small item in a composition of Spohr's) and accompanying passages; and all this without ever having seen the score. Similarly he was said to have made a piano score of the 'Creation' from memory, after having heard the oratorio a few times, merely with the help of the book of words, and that his arrangement was so good that Haydn adopted it for publication. If Weber, in one of his published letters, does not speak highly of Clement as a conductor, it must be remembered that Weber's criticism was seldom unbiassed, and that he probably felt some satisfaction at Clement's want of success at Prague, where he was Weber's successor.

Clement's style was not vigorous, nor his tone very powerful: gracefulness and tenderness of expression were its main characteristics. His technical skill appears to have been extraordinary. His intonation was perfect in the most hazardous passages, and his bowing of the greatest dexterity. Beethoven himself has borne the highest testimony to his powers by writing especially for him his great violin-concerto. The original manuscript of this greatest of all violin-concertos, which is preserved in the imperial library at Vienna, bears this inscription in Beethoven's own handwriting:—'Concerto par Clemenza pour Clement, primo violino e Direttore al Theatro à Vienne dal L. v. Bthvn., 1806.' Clement was the first who played it in public, on Dec. 23, 1806.

If we hear that in later years Clement's style deteriorated considerably, and that he yielded, to a lamentable degree, to the temptation of showing off his technical skill by the performance of mere *tours de force* unworthy of an earnest musician, we may ascribe it to his unsteady habits of life, which brought him into difficulties, from which he had to extricate himself at any price. But the tendency showed itself early. It is difficult to believe, if we had not the programme still to refer to, that at the concert at which he played Beethoven's Concerto for the first time, he also performed a set of variations 'mit umgekehrter Violine'—with the violin upside down.

He published for the violin twenty-five concertinos, six concertos, twelve studies, a great number of airs variés and smaller pieces. For the piano, a concerto. For orchestra, three overtures. For the stage, an opera and the music for a melodrame. All these works are, however, entirely forgotten, and the greater part seem to have disappeared. P. D.

CLEMENT, or CLEMENS, JOHANN GEORG, whom Gerber calls Clementi; born at Breslau about 1710, Knight of the Golden Spur, and capellmeister for over fifty years (from 1735) at the church of St. Johann in Breslau. His numerous compositions for the church comprise fourteen masses, twenty-seven offertories, eighteen graduals, Te Deums, etc., and a requiem performed at the funeral of the Emperor Charles VI. (1742). None of them have been published. For list see Fétis. He left two sons, one at Vienna; the other first violin at Stuttgart, 1790, at Cassel 1792, and afterwards capellmeister at Carlsruhe. The latter adopted the name Clementi. M. C. C.

CLEMENTI, MUZIO, born at Rome, 1752, died at Evesham, March 10, 1832. [See Chester's *Registers of Westminster Abbey*, and the *Quarterly Musical Magazine*, ii. 308.] Clementi's father, an accomplished workman in silver, himself of a musical turn, observed the child's uncommon musical gifts at an early period, and induced a relation of the family, Buroni, choirmaster at one of the churches at Rome, to teach him the rudiments. In 1759 Buroni procured him lessons in thorough-bass from an organist, Cordicelli, and after a couple of years' application he was thought sufficiently advanced to compete for an appointment as organist which he obtained. Meanwhile his musical studies were continued assiduously: Carpani taught him counterpoint and Santarelli singing. When barely fourteen Clementi had composed several contrapuntal works of considerable size, one of which, a mass, was publicly performed, and appears to have created a sensation at Rome. An English gentleman [Mr. Peter Beckford, M.P., nephew of Alderman Beckford, and cousin of the author of *Vathek*], with some difficulty induced Clementi's father to give his consent to

the youth's going to England, when Beckford offered to defray the expenses of his further education, and introduce him to the musical world of London. Until 1770 Clementi quietly pursued his studies, living at the house of his protector in Dorsetshire. Then, fully equipped with musical knowledge, and with an unparalleled command of the instrument, he came upon the town as a pianist and composer. His attainments were so phenomenal that he carried everything before him, and met with a most brilliant, hardly precedented, success. From 1777 to 1780 he acted as cembalist, *i.e.* conductor, at the Italian Opera in London. In 1781 Clementi started on his travels, beginning with a series of concerts at Paris; from thence he passed, *vià* Strasburg and Munich, to Vienna, where he made the acquaintance of Haydn, and where, at the instigation of the Emperor Joseph II., he engaged in a sort of musical combat at the pianoforte with Mozart. Clementi, after a short prelude, played his Sonata in B♭—the opening of the first movement of which was long afterwards made use of by Mozart in the subject of the 'Zauberflöte' overture—and followed it up with a Toccata, in which great stress is laid upon the rapid execution of diatonic thirds and other double notes for the right hand, esteemed very difficult at that time. Mozart then began to preludise, and played some variations; then both alternately read at sight some MS. sonatas of Paisiello's, Mozart playing the allegros and Clementi the andantes and rondos; and finally they were asked by the Emperor to take a theme from Paisiello's sonatas and accompany one another in their improvisations upon it on two pianofortes. The victory, it appears, was left undecided. Clementi ever afterwards spoke with great admiration of Mozart's 'singing' touch and exquisite taste, and dated from this meeting a considerable change in his method of playing: striving to put more music and less mechanical show into his productions. Mozart's harsh verdict in his letters (Jan. 12, 1782; June 7, 1783) was probably just for the moment, but cannot fairly be applied to the bulk of Clementi's work. He disliked Italians; the popular prejudice was in their favour, and they were continually in his way. He depicts Clementi as 'a mere mechanician, strong in runs of thirds, but without a pennyworth of feeling or taste.' But L. Berger, one of Clementi's best pupils, gives the following explanation of Mozart's hard sentence:—'I asked Clementi whether in 1781 he had begun to treat the instrument in his present (1806) style. He answered *no*, and added that in those early days he had cultivated a more brilliant execution, especially in double notes, hardly known then, and in extemporised cadenzas, and that he had subsequently achieved a more melodic and noble style of performance after listening attentively to famous singers, and also by means of the perfected mechanism of English pianos, the construction of which formerly stood in the way of a cantabile and legato style of playing.'

With the exception of a concert tour to Paris in 1785 Clementi spent all his time from 1782 to 1802 in England, busy as conductor, virtuoso, and teacher, and amassing a considerable fortune. He had also an interest in the firm of Longman & Broderip, 'manufacturers of musical instruments, and music-sellers to their majesties.' The failure of that house, by which he sustained heavy losses, induced him to try his hand alone at publishing and pianoforte making; and the ultimate success of his undertaking (see CLEMENTI & Co.) shows him to have possessed commercial talents rare among great artists. In March 1807 property belonging to Clementi's new firm, to the amount of £40,000, was destroyed by fire.

Amongst his numerous pupils, both amateur and professional, he had hitherto trained John B. Cramer and John Field, both of whom soon took rank amongst the first pianists of Europe. In 1802 Clementi took Field, *vià* Paris and Vienna, to St. Petersburg, where both master and pupil were received with unbounded enthusiasm, and where the latter remained in affluent circumstances. On his return to Germany Clementi counted Zeuner, Alex. Klengel, Ludwig Berger, and Meyerbeer amongst his pupils [and made the acquaintance of Beethoven (see his letter to Collard, dated April 22, 1807) and of Haydn. During this tour, on Sept. 15, 1804, he married a daughter of J. G. G. Lehmann, cantor of the Nicolaikirche in Berlin, who, after a journey to Italy with her husband, died in childbirth, in August 1805.] With Klengel and Berger he afterwards went again to Russia. In 1810 he returned to London for good, gave up playing in public, devoting his leisure to composition and his time to business. He wrote symphonies for the Philharmonic Society, which succumbed before those of Haydn, many pianoforte works, and above all completed that superb series of one hundred studies, *Gradus ad Parnassum* (1817), upon which to this day the art of solid pianoforte-playing rests. In 1820 and 1821 he was again on the continent, spending an entire winter at Leipzig, much praised and honoured. A public dinner was given in his honour in London on Dec. 17, 1827. He lived to be eighty, and the last years of his life were spent at Evesham, in Worcestershire, where he died. [His remains were honoured by a public funeral, and were deposited in the cloisters of Westminster Abbey.] He retained his characteristic energy and freshness of mind to the last. He was married three times, had children in his old age, and shortly before his death was still able to rouse a company of pupils and admirers—amongst whom were J. B. Cramer and Moscheles—to enthusiasm with his playing and improvisation.

Clementi left upwards of one hundred sonatas, of which about sixty are written for the piano without accompaniment, and the remainder as duets or trios—sonatas with violin or flute, or violin or flute and violoncello; moreover, a duo for two pianos, six duets for four hands, caprices, preludes, and 'point d'orgues composés dans le gout de Haydn, Mozart, Kozeluch, Sterkel, Wanhal et Clementi,' op. 19; *Introduction à l'art de toucher le piano, avec 50 leçons;* sundry fugues, toccatas, variations, valses, etc., preludes and exercises remarkable for several masterly canons, and lastly, as his lasting monument, the *Gradus ad Parnassum* already mentioned.

As Viotti has been called the father of violin-playing, so may Clementi be regarded as the originator of the proper treatment of the modern pianoforte, as distinguished from the harpsichord. His example as a player and teacher, together with his compositions, have left a deep and indelible mark upon everything that pertains to the piano, both mechanically and spiritually. His works fill a large space in the records of piano-playing; they are indispensable to pianists to this day, and must remain so.

In a smaller way Clementi, like Cherubini in a larger, foreshadowed Beethoven. In Beethoven's scanty library a large number of Clementi's sonatas were conspicuous; Beethoven had a marked predilection for them, and placed them in the front rank of works fit to engender an artistic treatment of the pianoforte; he liked them for their freshness of spirit and for their concise and precise form, and chose them above all others, and in spite of the opposition of so experienced a driller of pianoforte players as Carl Czerny, for the daily study of his nephew.

The greater portion of Clementi's *Gradus*, and several of his sonatas—for instance the Sonata in B minor, op. 40; the three Sonatas, op. 50, dedicated to Cherubini; the Sonata in F minor, etc.—have all the qualities of lasting work: clear outlines of form, just proportions, concise and consistent diction, pure and severe style; their very acerbity, and the conspicuous absence of verbiage, must render them the more enduring.

Like his Italian predecessor Domenico Scarlatti, Clementi shows a fiery temperament, and like Scarlatti, with true instinct for the nature of the instrument as it was in his time, he is fond of quick movements—quick succession of ideas as well as of notes; and eschews every sentimental aberration, though he can be pathetic enough if the fit takes him. His nervous organisation must have been very highly strung. Indeed the degree of nervous power and muscular endurance required for the proper execution of some of his long passages of diatonic octaves (as in the Sonata in A, No. 26 of Knorr's edition), even in so moderate a tempo as to leave them just acceptable and no more, from a musical point of view (bearing in mind Mozart's sneer that he writes prestissimo and plays moderato, and recollecting the difference in touch between his piano and ours), is prodigious, and remains a task of almost insuperable difficulty to a virtuoso of to-day, in spite of the preposterous amount of time and labour we now devote to such things.

He is the first completely equipped writer of sonatas. Even as early as his op. 2 the form sketched by Scarlatti, and amplified by Emanuel Bach, is completely systematised, and has not changed in any essential point since. Clementi represents the sonata proper from beginning to end. He played and imitated Scarlatti's harpsichord sonatas in his youth; he knew Haydn's and Mozart's in his manhood, and he was aware of Beethoven's in his old age; yet he preserved his artistic physiognomy—the physiognomy not of a man of genius, but of a man of the rarest talents—from first to last. He lived through the most memorable period in the history of music. At his birth Handel was alive, at his death Beethoven, Schubert, and Weber were buried.

There is an annoying confusion in the various editions of his works: arrangements are printed as originals, the same piece appears under various titles, etc. etc. The so-called complete editions of his solo sonatas—the best, that published by Holle at Wolfenbüttel, and edited by Schumann's friend Julius Knorr, and the original edition of Breitkopf & Härtel, since reprinted by that firm—are both incomplete; the sonatas with accompaniment, etc., are out of print, and only two of his orchestral works seem to have been printed at all. [See *Quellen-Lexikon.*] A judicious selection from his entire works, carefully considered with a view to the requirements and probable powers of consumption of living pianists, would be a boon. E. D.

Additions, in square brackets, from the composer's grandson, Mr. H. Clementi Smith.

CLEMENTI & CO. Muzio Clementi was an unfortunate loser at the bankruptcy of Messrs. Longman & Broderip, in which he was a partner, when that firm failed about 1798. He, however, entered immediately into a fresh partnership with John Longman, at one of the old shops (26 Cheapside), and when Longman leaving him went to another address in Cheapside, Clementi became head of a new firm consisting of himself, Banger, F. A. Hyde, F. W. Collard, and D. Davis. The new partnership, at first known as Clementi, Banger, Hyde, Collard, & Davis (afterwards shortened into Muzio Clementi & Co., or Clementi & Co.), underwent gradual changes. In 1810 Hyde's name disappears and the firm becomes Clementi, Banger, Collard, & Davis. In 1819 it is Clementi, Collard, Davis, & Collard, and in 1823 Clementi, Collard, & Collard, while after Clementi's death in 1832 it finally appears as Collard & Collard, who remained at 26 Cheapside, the old Longman address, until a few years ago.

The Clementi firm had great trade and reputation in the manufacture of pianofortes, as had their predecessors, Longman & Broderip. Clementi's name was doubtless of great weight as a guarantee of good workmanship. Violins and other instruments bear their stamp; they were, besides, music publishers. (See COLLARD.) F. K.

CLEMENZA DI TITO, LA. Mozart's twenty-third and last opera, in two acts, words adapted from Metastasio by Mazzola. Finished Sept. 5, 1791, and first performed the following day at Prague. At the King's Theatre, Haymarket, March 27, 1806, for the benefit of Mrs. Billington (see Pohl's *Mozart in London*, p. 145). The autograph is entirely in Mozart's hand, and contains no recitatives. They were probably supplied by Süssmayer. The German title of the opera is 'Titus.' G.

CLICQUOT, FRANÇOIS HENRI, eminent organ-builder, born in Paris, 1728, died there 1791. In 1760 he built the organ of St. Gervais. In 1765 he entered into partnership with Pierre Dallery, and the firm constructed the organs of Notre Dame, St. Nicolas-des-Champs, the Sainte-Chapelle, and the Chapelle du Roi at Versailles. Clicquot's finest organ was that of St. Sulpice, built after his partnership with Dallery had been dissolved, and containing five manuals and sixty-six stops, including a pedal-stop of 32 feet. For the organ in the Cathedral at Poitiers, his last work, he received 92,000 francs. His instruments were overloaded with reeds—a common defect in French organs. M. C. C.

CLIFFE, FREDERICK, born at Lowmoor near Bradford, Yorkshire, May 2, 1857, received his earliest musical instruction from his father, an amateur violoncellist. At the age of six he played the pianoforte in a manner far beyond his years, at nine he began to study the organ, and at eleven was appointed organist to Wyke Parish Church, while a year later he is said to have been able to play the whole of Bach's forty-eight preludes and fugues. Meanwhile Cliffe acquired a local reputation by the beauty of his voice. After being appointed organist to a dissenting chapel, Cliffe's services became in great demand for 'opening' new organs. From 1873 to 1876 he was organist to the Bradford Festival Choral Society, and later, on being elected to the Titus Salt scholarship at the National Training School of Music, he studied under Sullivan, Stainer, Prout, and Franklin Taylor. In 1883 he was appointed to a pianoforte professorship at the then recently-founded Royal College of Music. Next he toured as solo pianist and accompanist with Mme. Lemmens-Sherrington and others; became in succession organist to Curzon Chapel and St. George's, Albemarle St., and to the Leeds Festival under Sullivan as assistant to Dr. Spark. In the latter capacity he played in 'The Golden Legend,' and for the Festival he arranged and played the organ part in the first performance there of Bach's B minor Mass. After twenty years of continuous church work Mr. Cliffe retired in 1889. He was organist to the Bach Choir from 1888 to 1894, and of the Italian Opera at Drury Lane, Her Majesty's, and Covent Garden about the same time. It is, however, as a composer that he made his greater reputation, and it is curious to note that the work which *par excellence* established that reputation, his opus 1, a fine symphony in C minor, was rejected by the Leeds Selection Committee. In 1901 he became a pianoforte professor at the Royal Academy of Music, and an examiner for the Associated Board of the R.A.M. and R.C.M.; for them he toured in Australia in 1898, while in 1900 and 1903 he visited South Africa on behalf of the Cape of Good Hope University, and has travelled also in America and Australia.

Mr. Cliffe's list of works is not long, but nearly all are of important aim. The most important are the symphony, already mentioned, which on being produced with characteristic generosity at his benefit by Sir (then Mr.) August Manns at the Crystal Palace, on April 20, 1889, created a very unusual amount of interest; and a second in E minor, first given at the Leeds Festival of 1892; 'Cloud and Sunshine,' an orchestral poem (Philharmonic, London, 1890); a violin concerto in D minor (Norwich Festival, 1896); 'The Triumph of Alcestis,' a scena for contralto and orchestra (Norwich Festival, 1902); while not yet completed is an 'Ode to the North-East Wind' for chorus. Mr. Cliffe has also written a number of songs, and some church music. R. H. L.

CLIFFORD, REV. JAMES, the son of Edward Clifford, a cook, was born in the parish of St. Mary Magdalen, Oxford, in 1622. In 1632 he was admitted a chorister of Magdalen College, Oxford, and so remained until 1642. On July 1, 1661, he was appointed tenth minor canon of St. Paul's Cathedral, and in 1675 was advanced to the sixth minor canonry. In 1682 he became senior cardinal. He was also for many years curate of the parish church of St. Gregory by St. Paul's, and chaplain to the Society of Serjeants' Inn, Fleet Street. He died in September 1698. In 1663 Clifford published, under the title of 'The Divine Services and Anthems usually sung in the Cathedrals and Collegiate Choirs of the Church of England,' a collection of the words of anthems; the first of its kind which appeared in the metropolis. (It had been anticipated in a collection compiled and printed by Stephen Bulkley at York in 1662, [and in a book of 'Anthems to be sung . . . in the Cathedral Church of the Holy and Undivided Trinity in Dublin,' printed 1662. The only known copy of this is in the library of Trin. Coll. Dublin; it contains the words of

fifty-one anthems and the names of most of the composers. L. M'C. L. D.]). So great was the success of the work that a second edition, with large additions, appeared in 1664. To the first edition are prefixed 'Briefe Directions for the understanding of that part of the Divine Service performed with the Organ in St. Paul's Cathedral on Sundayes and Holydayes'; and to the second chants for Venite and the Psalms and for the Athanasian Creed. The work is curious and interesting as showing what remained of the cathedral music produced before the parliamentary suppression of choral service in 1644, and what were the earliest additions made after the re-establishment of that service in 1660. Clifford's only other publications were *The Catechism, containing the Principles of Christian Religion*, and *A Preparation Sermon before the receiving of the Holy Sacrament of the Lord's Supper, preached at Serjeants' Inn Chapel, in Fleet Street*, which appeared together in 1694. Clifford had a younger brother, Thomas, born in October 1633, who was admitted chorister of Magdalen College in 1642 and resigned in 1645. W. H. H.

CLIFTON, JOHN C., born in London, 1781, studied for five years under Richard Bellamy. He subsequently became a pupil of Charles Wesley, and devoted himself entirely to music, resigning an appointment in the Stationery Office which he had held for about two years. After an engagement at Bath, where he conducted the Harmonic Society, he went in 1802 to Dublin, and in 1815 produced there a musical piece called 'Edwin.' He organised, together with Sir John Stevenson, a concert in aid of the sufferers by the Irish famine. In 1816 he invented an instrument called the 'Eidomusicon,' intended to teach sight-reading. An attempt made in 1818 to bring out his invention in London failed, and he then adopted Logier's system of teaching, and remained in London for some time. He wrote numerous glees and songs. He married the proprietress of a ladies' school at Hammersmith, where he died Nov. 18, 1841, having become partially insane some three years previously. W. B. S.

CLIVE, CATHERINE, known as 'Kitty Clive,' daughter of William Raftor, an Irish gentleman, was born in London in 1711. Displaying a natural aptitude for the stage she was engaged by Colley Cibber for Drury Lane Theatre (1728-1741), and made her first appearance there in November 1728, as the page Ismenes, in Nat. Lee's tragedy 'Mithridates.' In 1729 she attracted great attention by her performance of Phillida in Colley Cibber's ballad opera, 'Love in a Riddle.' Her personation of Nell in Coffey's ballad opera, 'The Devil to Pay,' in 1731, established her reputation, and caused her salary to be doubled. On Oct. 4, 1734, she married George Clive, a barrister, but the pair soon agreed to separate. She continued to delight the public in a variety of characters in comedy and comic opera [and was engaged by Garrick in 1746 for Drury Lane], until April 24, 1769, when, having acquired a handsome competence, and being pensioned by Horace Walpole, she took leave of the stage, and retired to Twickenham, where she occupied a house in the immediate vicinity of Horace Walpole's famous villa at Strawberry Hill, until her death, which occurred on Dec. 6, 1785. One of the most prominent events in Mrs. Clive's career as a singer was Handel's selection of her as the representative of Dalila in his oratorio 'Samson,' on its production in 1742. She was the first to sing Arne's 'Where the Bee sucks.' W. H. H.

CLOSE is a word very frequently used in the same sense as CADENCE, which see. In ordinary conversation it may very naturally have a little more expansion of meaning than its synonym. It serves to express the ending of a phrase or a theme, or of a whole movement or a section of one, as a fact, and not as denoting the particular succession of chords which are recognised as forming a cadence. Hence the term 'half-close' is very apt, since it expresses not only the most common form of imperfect cadence which ends on the dominant instead of the tonic, but also the position in which that form of close is usually found, viz. not at the end of a phrase or melody, but marking the most usual symmetrical division into two parts in such a manner that the flow of the complete passage is not interrupted.

CLUER, JOHN, appears to have been originally a ballad and chap-book printer early in the 18th century, and to have worked at premises in Bow Churchyard. Afterwards he issued the most beautifully engraved and adorned music of his period. He was entrusted by Handel with the publication of several of that master's early productions. Cluer, as shown by a type-printed music sheet in the British Museum ('The Pedigree of a Fiddler'), claims to have invented some improvements in music type or the setting of it: this was before he worked from the engraved plate. The passage on the sheet referred to runs: 'For the future all the songs printed by J. Cluer in Bow Churchyard will be set to musick, and as he hath invented a new and quick way of doing the same in letterpress for the enlargement of musick, songs will now be sold by him at a much cheaper rate,' etc. etc. The periodical squabbles which Handel had with the elder Walsh caused the former to grant to Mears, and also to Cluer, the right of publication of some of the Italian operas. The first which Cluer had of these was 'Giulio Cesare,' published in 1724; but he had previously printed Handel's 'Suites de Pièces' in 1720. The other operas are 'Tamerlane,' 'Rodelinda,' 'Scipio,' 'Alessandro,' 'Riccardo Primo,' 'Admeto,' and 'Lotario.' The first three were also issued in octavo, transposed for

the flute. The operas have very finely engraved pictorial title-pages. Among other of Cluer's publications are *A Pocket Companion for Gentlemen and Ladies*, 2 vols. 1724-25, a couple of dainty volumes from copperplates; two quaint packs of musical playing-cards (one set in the British Museum); 'Psalm Tunes,' by William Anchors; Twelve Overtures by Handel, and other works. Cluer was associated with B. Creake, a bookseller in Jermyn Street, whose name appears on the imprints. Thomas Cobb was Cluer's engraver and successor in business, having married his widow. Cluer must have died about 1729-30, and Cobb having had the business for a few years was followed by Wm. Dicey. After Cluer's death, the imprints frequently merely give 'at the printing-office in Bow Churchyard.' F. K.

COBBOLD, WILLIAM, born in the parish of St. Andrew, Norwich, Jan. 5, 1559-60. He was organist of Norwich Cathedral before 1599, and held the post till 1608, when he became a singing-man in the cathedral, W. Inglott being appointed organist. He was one of the ten musicians who harmonised the tunes for 'The Whole Booke of Psalmes with their wonted Tunes as they are song in Churches, composed into foure partes,' published by Thomas Este in 1592. He contributed a madrigal, 'With wreaths of rose and laurel,' to 'The Triumphes of Oriana,' 1601. The only other known compositions by him are another madrigal, 'New Fashions,' and an anthem, 'In Bethlehem towne,' of which some separate parts are preserved in the library of the Royal College of Music. He died at Beccles, Nov. 7, 1639, and was buried on the south side of the chancel of the parish church. His epitaph is quoted in J. E. West's *Cathedral Organists*, from which most of the above information is taken. Dr. A. H. Mann has re-edited the madrigal from 'Oriana,' with biographical note.

COCCHETTA. See GABRIELLI, C.

COCCHI, GIOACCHINO, born at Padua considerably before 1720, as he wrote a 'Dixit Dominus' in 1735; died in Venice about 1804; dramatic composer; produced his first operas, 'Adelaide' and 'Bajasette,' in Rome (1743 and 1746). In 1735 he was at Naples, and about 1753 was appointed maestro di cappella of the Conservatorio degli Incurabili at Venice. Here he wrote 'Il Pazzo glorioso.' In 1757 he came to London as composer to the Opera till 1762, where he conducted Mrs. Cornelys' subscription concert for two years. During a sixteen years' residence in England he composed eleven operas, as well as contributing to several pasticcios. For list see the *Quellen-Lexikon*. About 1772 he returned to Venice. His reputation was considerable for a time both in Italy and England. Burney praises 'his good taste and knowledge in counterpoint,' but says he 'lacked invention, and hardly produced a new passage after his first year in England.' He realised a large sum by teaching. M. C. C.

COCCIA, CARLO, born at Naples, April 14, 1782; died at Novara, April 13, 1873; son of a violinist, studied under Fenaroli and Paisiello. His early compositions were remarkable for his years. Paisiello was extremely fond of him, procured him the post of accompanist at King Joseph Bonaparte's private concerts, and encouraged him after the failure of his first opera, 'Il Matrimonio per cambiale' (Rome, 1808). Between the years 1808 and 1819 he composed twenty-two operas for various towns in Italy, and two cantatas, one for the birth of the King of Rome (Treviso, 1811), the other (by a curious irony, in which Cherubini also shared) for the entry of the allied armies into Paris (Padua, 1814). In 1820 he went to Lisbon, where he composed four operas and a cantata, and thence to London (August 23), where he became conductor at the Opera. He discharged his duties with credit, and profited by hearing more solid works than were performed in Italy, as he showed in the single opera he wrote here, 'Maria Stuarda' (1827). He was also professor of composition at the Royal Academy on its first institution. In 1828 he returned to Italy. In 1833 he paid a second visit to England, and then settled finally in Italy. In 1840 he succeeded Mercadante as maestro di cappella at Novara, and was appointed Inspector of Singing at the Philharmonic Academy of Turin. His last opera, 'Il Lago delle Fate' (Turin, 1814), was unsuccessful. Coccia wrote with extreme rapidity, the entire opera of 'Donna Caritea' (Turin, 1818) being completed in six days. 'Clotilde' (Venice, 1815) was the most esteemed of all his works in Italy. He was highly thought of in his day, but his science was not sufficient to give durability to his compositions. (For list see Fétis.) M. C. C.

COCCIA, MARIA ROSA, born Jan. 4, 1759, in Rome, a composer who won a remarkable degree of contemporary renown, although very few of her works are still in existence. A Magnificat for four voices and organ (Fitzwilliam Museum, Cambridge) is dated Oct. 2, 1774, and soon after that date she underwent an examination by four professors of the Academy of Saint Cecilia, with such credit that an account of the examination was printed at Rome in 1775, with her portrait and a specimen of her work. In this latter year she seems to have been given the title of maestra di cappella by the Accademia Filarmonica of Bologna, and the Cambridge collection already mentioned contains an eight-part 'Dixit Dominus' by her, in which is her portrait and some biographical information. In 1780 was published an *Elogio storico della signora Maria Rosa Coccia Romana*, with letters addressed to her by Metastasio, Padre Martini, and Farinelli. A cantata for four voices is in the Dresden

Museum, and is dated 1783. Nothing is known as to her death. M.

COCKS & CO., ROBERT. The business was established in 1823 by Robert Cocks at No. 20 Princes Street, Hanover Square, until the end of 1845, when it was removed to No. 6 New Burlington Street. In 1868 Robert Cocks took into partnership with him his two sons, Arthur Lincoln Cocks and Stroud Lincoln Cocks. During the 75 years of its existence upwards of 16,000 publications have issued from the house, including many works of solid and permanent worth, such as Czerny's Schools of Practical Composition and of the Pianoforte; Spohr's and Campagnoli's Violin Schools; Albrechtsberger's and Cherubini's Treatises on Counterpoint; Bertini's Method; J. S. Bach's Pianoforte Works, etc. etc. A periodical, the *Monthly Miscellany*, contained original notices of Beethoven by Czerny. W. H. H. [Robert Cocks, the original founder, died April 7, 1887, in his ninetieth year, and was buried at Kensal Green. At his death Mr. Robert M. Cocks became proprietor and carried on the business until Dec. 1898, when he retired and transferred the concern to Messrs. Augener, who purchased the leases and goodwill for this branch, retaining the old name. F. K.]

CODA. *Coda* is the Italian for a tail, and that which goes by the name in music is very fairly expressed by it. For it is that part which comes at the end of a movement or piece of any kind, and has to a certain extent an independent existence and object, and though not always absolutely necessary cannot often be easily dispensed with. The earliest idea of a musical coda was probably a few simple chords with a cadence which served to give a decent finish to the mechanical puzzles over which so much ingenuity was wont to be expended in old days. For instance when a number of parts or voices were made to imitate or follow one another according to rigorous rules it would often occur that as long as the rules were observed a musical conclusion could not be arrived at. Indeed sometimes such things were constructed in a manner which enabled the piece to go on for ever if the singers were so minded, each following the other in a circle. In order to come to a conclusion a few chords would be constructed apart from these rigorous rules, and so the coda was arrived at. Applied to modern instrumental music this came to be a passage of optional dimensions which was introduced after the regular set order of a movement was concluded. For instance, in a series of variations, each several variation would only offer the same kind of conclusion as that in the first theme, though in a different form; and in the very nature of things it would not be æsthetically advisable for such conclusion to be very strongly marked, because in that case each several variation would have too much the character of a complete set piece to admit of their together forming a satisfactorily continuous piece of music. Therefore it is reasonable when all the variations are over to add a passage of sufficient importance to represent the conclusion of the whole set instead of one of the separate component parts. So it is common to find a fugue, or a finale or other passage at the end which, though generally having some connection in materials with what goes before, is not of such rigorous dependence on the theme as the variations themselves.

Similarly in the other forms of instrumental composition there is a certain set order of subjects which must be gone through for the movement to be complete, and after that is over it is at the option of the composer to enlarge the conclusion independently into a coda. When the sections of a complete movement are very strongly marked by double bars the word is frequently written, as in the case of Minuet and Trio, and the corresponding form of Scherzos, which are mostly constructed of a part which may be called A, followed by a part which may be called B, which in its turn is followed by a repetition of the part A; and this is all that is absolutely necessary. But beyond this it is common to add an independent part which is called the coda, which serves to make the whole more complete. In instrumental forms which are less obviously definite in their construction, the coda is not distinguished by name, though easy to be distinguished in fact. For instance, in a rondo, which is constructed of the frequent repetition of a theme interspersed with episodes, when the theme has been reproduced as many times as the composer desires, the coda naturally follows and completes the whole. The form of a first movement is more involved, but here again the necessary end according to rule may be distinguished when the materials of the first part have been repeated in the latter part of the second, generally coming to a close; and here again the coda follows according to the option of the composer.

In modern music the coda has been developed into a matter of very considerable interest and importance. Till Beethoven's time it was generally rather unmeaning and frivolous. Mozart occasionally refers to his subjects, and does sometimes write a great coda, as in the last movement of his Symphony in C, known as the 'Jupiter,' but most often merely runs about with no other ostensible object than to make the conclusion effectively brilliant. The independent and original mind of Beethoven seems to have seized upon this last part of a movement as most suitable to display the marvellous fertility of his fancy, and not unfrequently the coda became in his hands one of the most important and interesting parts of the whole movement, as in the first movement of the 'Adieux' Sonata, op. 81, the last movement of the quartet in E♭, op. 127, and the

first movement of the Eroica Symphony. Occasionally he goes so far as to introduce a new feature into the coda, as in the last movement of the violin and pianoforte sonata in F major, but it is especially noticeable in him that the coda ceases to be merely 'business' and becomes part of the æsthetical plan and intention of the whole movement, with a definite purpose and a relevancy to all that has gone before. Modern composers have followed in his steps, and it is rare now to hear a movement in which the coda does not introduce some points of independent interest, variety of modulation and new treatment of the themes of the movement being alike resorted to, to keep up the interest till the last. C. H. H. P.

CODETTA is the diminutive of Coda, from which it offers no material differences except in dimensions. It is a passage which occurs independently after the set order of a piece is concluded, as for instance in the combination of the minuet and trio, or march and trio; after the minuet or march has been repeated a short passage is frequently added to give the end more completeness. [See CODA; and for the special meaning of Codetta in fugal composition, see FUGUE.] C. H. H. P.

COENEN, the name of two brothers, sons of an organist at Rotterdam. The elder, FRANZ, born there Dec. 26, 1826, was a pupil of Vieuxtemps and Molique, and became famous as a violin player; he toured in America with Herz, Lübeck, and others, and settled in Amsterdam, where he was appointed director of the Conservatorium, a post he relinquished in 1895. Among his compositions are a setting of Psalm xxxii., a symphony, cantatas, and quartets. His brother, WILLEM, was born Nov. 17, 1837, and attained some distinction as a pianist in America and elsewhere. He settled in London in 1862, and has frequently played in public. His compositions include an oratorio, 'Lazarus' (1878), pianoforte music, and songs. Two more musicians of the same name may be mentioned: CORNELIUS, born at the Hague 1838, is a successful violinist, who became conductor of the orchestra at Amsterdam in 1859, and bandmaster of the Garde Nationale at Utrecht in 1860; JOHANNES MEINARDUS, born at the Hague, Jan. 28, 1824, died at Amsterdam, Jan. 9, 1899, was educated at the Conservatorium of the Hague, became a bassoon player in the royal orchestra, was conductor at the Dutch theatre of Van Lier, Amsterdam, from 1851, succeeded Van Bree as director of the Felix Meritis Society in 1857, and gave up the post in 1865 in order to devote himself to the direction of the music at the Palais voor Volksvlyt. He was virtually the creator of the orchestra which became renowned as the 'Palais-Orchester'; he retired in 1896. He wrote many cantatas, incidental music to Dutch plays, ballet-music, overtures, an opera, 'Bertha en Siegfried,' two symphonies, concertos for clarinet and flute respectively, a quintet for piano and wind instruments, a sonata for bassoon (or violoncello), clarinet, and piano, etc. (Riemann's *Lexikon*, and Baker's *Biog. Dict.*)

COGAN, PHILIP, Mus.D., was born in Cork in 1750, and became a chorister and afterwards a member of the choir of St. Finbar's Cathedral in that city. In 1772 he was appointed a stipendiary in the choir of Christ Church Cathedral, Dublin, but soon resigned his post. In 1780 he became organist of St. Patrick's Cathedral, and about the same time obtained the degree of Mus.D. from the University of Dublin. He resigned the organistship of St. Patrick's in 1806, and resided in Dublin as a teacher of music, dying there in 1834. He was distinguished as a player on the organ and the harpsichord, as well as for his powers of fugue extemporisation. He published a pianoforte concerto in 1793 in Edinburgh, and several sonatas of merit in London, written somewhat in the manner of Mozart. Michael Kelly, who took lessons from Cogan about 1777, describes his execution as 'astounding.' G. A. C.

COHEN, JULES ÉMILE DAVID, born at Marseilles, Nov. 2, 1835, was a pupil of the Paris Conservatoire, where he took first prizes for piano (1850), organ (1852), counterpoint and fugue (1854). Besides holding the office of inspector of music under Napoleon III. he was professor in the Conservatoire for thirty-five years, and chorus master at the Opéra for twenty years. He wrote many opéras-comiques, such as 'Maître Claude' (1861), 'José Maria' (1866), and 'Les Bleuets,' a four-act opera (produced at the Théâtre Lyrique, 1867), etc., and composed choruses for 'Athalie,' 'Esther,' and 'Psyché,' for revivals at the Comédie Française. He left, moreover, a great number of choral works, pianoforte pieces, symphonies, masses, etc. He died in Paris, Jan. 13, 1901. G. F.

COLASSE, PASCAL, born at Rheims, Jan. 22, 1649, was a pupil of Lully's, who procured him a place as 'batteur de mesure' at the Paris opera in or about 1677. In 1683 the office of 'surintendant de la chapelle royale' was divided into four, each official being only required to direct the music for three months of each year; through Lully's influence Colasse obtained the second of these posts, and in 1696 was made 'maître de musique de chambre.' This post he resigned in order to manage an operatic undertaking at Lille, for which Louis XIV. granted a privilege; but on the destruction of the theatre by fire, he was allowed to resume his office at court. He finally ruined himself in the search for the philosopher's stone. He wrote numerous motets, 'cantiques spirituels,' etc.; but his energies were chiefly devoted to operatic composition. Of the nine operas mentioned in the *Quellen-Lexikon*, the following were published by Ballard: 'Achille et Polyxène,' 1687

(performed also at Hamburg in the early days of opera there, 1692); 'Thétis et Pélée' (1689), his most popular work; 'Énée et Lavinie,' (1690); 'Jason' and 'La naissance de Vénus' (1696); and 'Polyxène et Pyrrhus' (1706). He collaborated with Lully in the 'Ballet des Saisons' (1695). He died at Versailles, July 17, 1709. M.

COLBRAN, ISABELLA ANGELA, born at Madrid, Feb. 2, 1785. Her father was Gianni Colbran, court-musician to the King of Spain. At the age of six she received her first lessons in music from F. Pareja, of Madrid. Three years later, she passed under the care of Marinelli, by whom she was taught until Crescentini undertook to form her voice and style. From 1806 to 1815 she enjoyed the reputation of being one of the best singers in Europe. In 1809 she was *prima donna seria* at Milan, and sang the year after at the Fenice at Venice. Thence she went to Rome, and so on to Naples, where she sang at the San Carlo till 1821. Her voice remained true and pure as late as 1815, but after that time she began to sing excruciatingly out of tune, sometimes flat and sometimes sharp. The poor Neapolitans, who knew her influence with Barbaja, the manager, were forced to bear this in silence. She was a great favourite with the King of Naples; her name became a party-word, and the royalists showed their loyalty by applauding the singer. An Englishman asked a friend one night at the San Carlo how he liked Mlle. Colbran: 'Like her? I am a royalist!' he replied. On March 15, 1822, at Castenaso near Bologna, she was married to Rossini, with whom she went to Vienna. In 1824 she came with her husband to London, and sang the principal part in his 'Zelmira.' She was then entirely *passée*, and unable to produce any effect on the stage; but her taste was excellent, and she was much admired in private concerts. On leaving England, she quitted the stage, and resided at Paris and Bologna. She was herself a composer, and has left a few collections of songs. She died at Bologna, Oct. 7, 1845. J. M.

COLE, BLANCHE, a distinguished English operatic soprano, was born in 1851 at Portsmouth. Her début as an opera singer took place in the part of Amina ('La Sonnambula') at the Crystal Palace, May 31, 1869, and thenceforward she established herself as a favourite in English opera. In 1879 she toured with a company of her own, and at various times was a member of the Carl Rosa Company. She married the pianist, Sidney Naylor, in 1868, and died in London, August 31, 1888. M.

COLEMAN (or COLMAN), CHARLES, Mus.D., was chamber musician to Charles I. [He wrote the music for 'The King and Queen's Entertainment at Richmond,' a masque presented by Prince Charles, Sept. 12, 1636.] After the breaking out of the civil war he betook himself to the teaching of music in London, and was one of those who taught the viol lyra-way. [He was recommended for the degree of Mus.D. at Cambridge by the committee appointed for the reformation of the university in 1651, and took the degree on July 2 of that year.] He was appointed composer to the king in Nov. 1662, with a salary of £40 per annum. He contributed the musical definitions to Phillips's *New World of Words* (1658). Some of his songs are contained in the several editions of 'Select Musicall Ayres and Dialogues,' 1652, 1653, and 1659, and some of his instrumental compositions are to be found in 'Courtly Masquing Ayres,' 1662. He was associated with Henry Lawes, Capt. Cooke, and George Hudson in the composition of the music for Sir William Davenant's 'First Day's Entertainment at Rutland House by Declamations and Musick,' 1656. He died in Fetter Lane before July 9, 1664. [He had a son named Charles, a member of the Royal Band, who died about 1694. Information as to his existence was advertised for in the *London Gazette* of April 12-15, 1697.] W. H. H.

COLEMAN, EDWARD, son of Dr. Charles Coleman, was a singing master and teacher of the lute and viol. He composed the music in Shirley's 'Contention of Ajax and Achilles' in 1653. In 1656 he and his wife took part in the performance of the first part of Sir William Davenant's 'Siege of Rhodes,' at Rutland House, she playing Ianthe, and the little they had to say being spoken in recitative. Upon the re-establishment of the Chapel Royal in 1660 Coleman was appointed one of the gentlemen. On Jan. 21, 1662, he succeeded Nicolas Laniere in the Royal Band. Of Mrs. Coleman, who was one of the first females who appeared on the English stage, Pepys, who was well acquainted with both her and her husband, writes, under date of Oct. 31, 1665, 'She sung very finely, though her voice is decayed as to strength, but mighty sweet, though soft.' Coleman died at Greenwich on Sunday, August 29, 1669. Some of his songs are printed in 'Select Musicall Ayres and Dialogues,' 1653, and other of his compositions in Playford's 'Musical Companion,' 1672. W. H. H.

COLLA, GIUSEPPE, born about 1730 at Parma, was maestro di cappella to the duke of that place. He wrote the following operas: 'Adriano in Siria' (Milan, 1763), 'Licida e Mopso' (1769), 'Enea in Cartagine' (Turin, 1770), 'Andromeda' (*ib.* 1772), 'Didone' (*ib.* 1773), 'Tolomeo' (Milan, 1774). In the last of these the soprano Agujari appeared with great success; Colla married her in 1780, and accompanied her to England and elsewhere. He died at Parma, March 16, 1806. (*Quellen-Lexikon*, etc.)

COLLA PARTE or COLLA VOCE, 'with the part,' denoting that the tempo of the accompaniment is to be accommodated to that of the solo instrument or voice.

COLLARD. This firm of pianoforte-makers in Grosvenor Street and Cheapside, London, is in direct succession, through Muzio Clementi, to Longman & Broderip, music publishers located at No. 26 Cheapside, as the parish books of St. Vedast show, as long ago as 1767. (See Clementi & Co.) Becoming afterwards pianoforte-makers, their instruments were in good repute here and abroad, and it is a tradition that Geib's invention of the square hopper or grasshopper was first applied by them. Their business operations were facilitated by money advances from Clementi, whose position as a composer and pianist was the highest in England. The fortunes of Longman & Broderip do not appear to have been commensurate with their enterprise: Clementi, about 1798-1800, had to assume and remodel the business, and we find him in the early years of the 19th century associated with F. W. Collard (d. 1879) and others, presumably out of the old Longman & Broderip concern, pianoforte-makers in Cheapside. There can be no doubt that the genius of this eminent musician applied in a new direction bore good fruit, but it was F. W. Collard, whose name appears in the Patent Office in connection with improvements in pianofortes as early as 1811, who impressed the stamp upon that make of pianofortes which has successively borne the names of 'Clementi' and of 'Collard & Collard.' The present head of the firm (1903) is Mr. John Clementi Collard. A. J. H.

COLLECTIONS OF MUSIC. Lists of contents of the following collections of music will be found in this Dictionary under the headings printed in capital letters:—

ALFIERI. Raccolta di Musica Sacra.
Alte Klaviermusik. See KLAVIERMUSIK.

COLLEGE YOUTHS, ANCIENT SOCIETY OF. This is the chief of the change-ringing societies of England. It dates back to the early part of the 17th century, and derives its name from the fact that the students at the college founded by the renowned Sir Richard Whittington about that date, having six bells in their college chapel, used to amuse themselves by ringing them; and the annals of the society show that, being joined by various gentlemen in the neighbourhood, the society was definitely started under the name 'College Youths' by the then Lord Salisbury, Lord Brereton, Lord Dacre, Sir Cliff Clifton, and many other noblemen and gentlemen connected with the city of London, on Nov. 5, 1637. There are books in possession of the society (which has gone through many vicissitudes) in which are recorded the performances of its members for the last 170 years. Of late years the society has been in a most flourishing condition; its books contain the names of many noblemen and gentlemen, not only as patrons but as actual performers, and there are few counties in England in which it has not members. It flourishes also in the ringing line, for there is no society of ringers in England who can equal some of its later performances, amongst the most important of which should be mentioned a peal of 15,840 changes of Treble Bob Major rung by eight of its members in 1868 at St. Matthew's, Bethnal Green, lasting without any pause for nine hours and twelve minutes. C. A. W. T.

COL LEGNO, 'with the wood,' a term indicating that a passage is to be played by striking the strings of the violin with the stick of the bow instead of with the hair. Amongst others Spohr has employed it in the Finale all' Espagnola of his sixth violin-concerto, and Auber in Carlo Broschi's air in 'La part du diable.' P. D. [An effective example of Col Legno bowing will be found in study No. 14 of Woldemar's *Nouvel Art de l'Archet*. It is entitled 'Imitation du Psalterium, par Michel Esser,' the latter a violinist who may be assumed to have brought this grotesque trick into use. Three strings are directed to be struck at once, the effect resembling that produced by the dulcimer, or the Hungarian cimbalom. E. J. P.]

COLOGNE CHORAL UNION, the English title of a singing society of men's voices only, which visited London in 1853 and 1854. [See LIEDERTAFEL, and MÄNNERGESANGVEREIN.]

COLOMBA. Opera in four acts; the words, founded on Prosper Mérimée's story with the same title, by Francis Hueffer; music by A. C. Mackenzie (op. 28). Written for, and produced by the Carl Rosa Company, Drury Lane, April 5, 1883. Given at Hamburg (in German), Jan. 27, 1884, and at Darmstadt, April 29 of the same year. M.

COLOMBANI or COLUMBANI, ORAZIO, born at Verona in the 16th century, eminent contrapuntist, a pupil of Costanzo Porta, a

Cordelier monk, and maestro di cappella at the cathedral of Vercelli, from about 1584 filled the same office in the convent of San Francesco at Milan. In 1587 he was in Venice, and in 1593 at the Santo of Padua, and for a time at Urbino. Besides five collections of Psalms for five, six, and nine voices, and two of madrigals, published in Italy (1576-92), [see the *Quellen-Lexikon*], there is a Te Deum of his in Lindner's *Corollario cantionum sacrarum*, and two Magnificats and some madrigals in the King of Portugal's Library at Lisbon. One of the Magnificats is in fourteen parts. Colombani united with other musicians in dedicating a collection of Psalms to Palestrina (1592). M. C. C.

COLOMBE, LA. A comic opera in two acts, words by Barbier and Carré, music by Gounod; produced at the Opéra Comique, June 7, 1866. The libretto was translated by Farnie as 'The Pet Dove,' and produced at the Crystal Palace on Sept. 20, 1870. G.

COLOMBI, VINCENZO, an Italian, built the magnificent organ in the church of St. John Lateran at Rome, in 1549. V. DE P.

COLONNA, GIOVANNI PAOLO, was born about 1637, at Brescia, according to Cozzando, but at Bologna according to other authorities. He was the son of Antonio Colonna, a maker of organs, who must not be confounded with the Fabio Colonna who constructed the 'Penteconta chordon.' The subject of this notice studied music at Rome under Carissimi, Abbatini, and Benevoli. [He was for some time organist at San Apollinare at Rome, and had become famous as a composer as early as 1659, in which year he was elected organist of San Petronio, Bologna, becoming maestro di cappella there in 1674.] He was four times elected Principal of the Accademia Filarmonica. Among many pupils of note he numbered the famous Bononcini. Nearly all his compositions were for the church, but he condescended to write one opera, 'Amilcare,' which was performed at Bologna in 1693. He is certainly entitled to take rank among the most distinguished Italians of his century. He died on Nov. 28, 1695. [Among his printed works (for list of these and his MSS. see the *Quellen-Lexikon*) are three books of masses, opp. 5, 6, and 10 (Bologna, 1684, 1685, and 1691), four books of 'Salmi brevi,' opp. 1, 7, 11, 12 (Bologna, 1681, 1683, 1694), two books of motets, opp. 2 and 3 (*ib.* 1681), litanies, op. 4 (1682), and other sacred works, op. 8 (1687 and 1689). Six oratorios in MS. and many sacred compositions are referred to in the same list.] A Magnificat and Nunc Dimittis of his for two choirs are printed in the collection of the Motet Society, and four other pieces in the Fitzwilliam Music. E. H. P.

COLONNE, JUDAS (called ÉDOUARD), violinist and conductor, born at Bordeaux, July 24, 1838, studied music at the Paris Conservatoire, where he gained the first prize for harmony in 1858, and the same for violin in 1863. He became first violin in the Opéra orchestra, but left it in 1873 to establish, with the music-publisher Hartmann, the 'Concert National.' These concerts lasted two seasons, and were first held at the Odéon theatre, where Franck's 'Rédemption' and Massenet's 'Marie Magdeleine' were performed for the first time; the concerts were subsequently held at the Châtelet. In 1874, Hartmann having retired, Colonne endeavoured to form an association among artists which should be patronised by amateurs and the public. In this way were founded the Concerts du Châtelet, which, though at first unsuccessful, have since gained so wide a reputation. It was not easy to struggle against the established popularity of the Concerts Populaires, conducted by Pasdeloup, but Colonne had the excellent idea of giving more prominence to the works of the younger French composers; he produced several orchestral suites by Massenet, the first and second of which had previously been given at the Concerts Populaires, and various orchestral compositions by Lalo, Dubois, Franck, etc.; but the success of the concerts was not fully assured until Colonne, foreseeing a reaction in favour of Berlioz, and incited by the example of Pasdeloup, in a manner devoted his concerts to the great French composer by producing with great care, and in their entirety, all his works for chorus and orchestra; 'L'Enfance du Christ,' 'Roméo et Juliette,' and particularly 'La damnation de Faust,' the success of which crowned the popularity of his undertaking. The enterprise, having quite replaced the Concerts Populaires in public favour, became most profitable to all concerned in it, and to its director, who in 1880 was decorated with the Légion d'Honneur; he had before, in 1878, been chosen to conduct the concerts at the Trocadéro during the Exhibition. He conducted at the Grand Opéra in 1892, and visited London in 1896. He is an extremely careful conductor, he rehearses with the most scrupulous care, and succeeds in giving a correct and vigorous interpretation of the works he performs. In his anxiety for clearness he had at one time a tendency to slacken the *tempi*, and was sometimes lacking in fire and energy; but in this respect he has corrected his deficiencies, and now infuses more warmth into the members of his orchestra. [Mme. Colonne, *née* Eugénie Élise Vergin, born at Lille in March 1854, was a pupil of the Paris Conservatoire, and made a successful début as Zerlina ('Don Juan') at the Opéra in 1876, appearing afterwards at the Opéra Comique and the Théâtre Lyrique. She has lately devoted herself to teaching, and has brought out some excellent pupils. G. F.] A. J.

COLOPHANE, COLOPHONIUM, the French and German names, respectively, for the rosin used for fiddle bows, from κολοφωνία, so called because the best rosin came from Colophon, in Asia Minor, the same place which gave its name to the imprints of early books, and has

thus left a double mark on modern times. (See Rosin.) G.

COLORATUR. Vocal music *coloured*, that is, ornamented, by runs and rapid passages or divisions, where each syllable of the words has two or more notes to it. It is what the old school called 'figurato'—figured. Coloratur may be employed in slow or fast airs, plaintive or passionate. Almost all the great airs contain examples of it. The air 'Rejoice greatly' from the 'Messiah' contains both plain and coloratur passages. G.

COLPORTEUR, LE, ou l'enfant du bûcheron, lyric drama in three acts; words by Planard, music by Onslow; produced in Paris, Nov. 22, 1827. Given at Drury Lane as 'The Emissary; or, the Revolt of Moscow,' May 13, 1831. The overture was formerly a favourite at classical concerts. G.

COLTELLINI, Celeste, born at Leghorn, 1764, daughter of a poet and a celebrated singer, made her first appearance at Naples in 1781. The Emperor Joseph II. engaged her for the Opera at Vienna in 1783, and she did not return to Naples till 1790. She married a French merchant named Méricofre, and retired from the stage in 1795. Her voice was a mezzo-soprano, and she excelled in the expression of sentiment. Paisiello wrote his 'Nina' for her, and on one occasion as she was singing the air 'Il mio ben quando verra?' a lady among the audience burst into tears, crying aloud, 'Si, si, lo rivedrai il tuo Lindoro.' She died in 1817. M. C. C.

COLYNS, Jean-Baptiste, a distinguished violinist, was born at Brussels, Nov. 25, 1834. He was admitted to the Brussels Conservatoire at the age of eight, where he gained prizes for violin-playing, harmony, etc. He became solo violinist at the Théâtre de la Monnaie at a very early age, and soon afterwards was appointed professor of his instrument at the Conservatoire. In 1888 he was given a similar post at Antwerp. He made many professional tours in Europe with great success, and at various times received advantageous offers to leave his native city. Among others he was in 1876 invited by the King of Saxony to migrate to Dresden as Concertmeister and Professor at the Conservatorium there. He visited England in 1873, and played at the Crystal Palace, April 12, and at the Philharmonic, July 7. Colyns occupied himself with composition for his special instrument, and also produced several dramatic works —for example, an opera in one act, 'Sir William' (1877); opera in three acts, 'Capitaine Raymond' (1881). He died at Brussels, Oct. 31, 1902. T. P. H.

COMBARIEU, Jules Léon Jean, French writer on music, was born at Cahors, Feb. 3, 1859; after studying music in France, went to Berlin, where he received instruction from Philipp Spitta. Among his numerous works the following are the most important; *Les rapports de la musique et de la poésie* (Paris, 1893, a thesis for the doctorate); *De parabaseos partibus et origine* (1893); published together as *Études de philosophie musicale; Théorie du rythme dans la composition moderne d'après la doctrine antique*, with an *Essai sur la critique musicale au XIXme. siècle* and *Le problème de l'origine des neumes* (Paris, 1897, a work which received the prix Kastner-Boureault, from the Institut); *Fragments de l'Énéide en musique d'après un manuscrit inédit* (1898, from a MS. in neumes in the Laurentian Library at Florence). Combarieu has also contributed important articles to magazines, such as *La musique d'après Spencer, La pensée musicale*, and *L'influence de la musique allemande sur la musique française, etc.* He is professor at the Lycée Grand, in Paris. G. F.

COMBINATION PEDALS (*Pédales de combinaison*) are an ingenious modern French invention originating with the eminent firm of Cavaillé-Col. Instead of operating upon the draw-stops they act upon the wind-supply, and in the following manner. A great organ contains, say, twelve stops. The first four (1–4) will be placed on one sound-board; the next four (5–8) on a second; and the remaining four (9–12) on a third sound-board. Each sound-board receives its wind-supply through its own separate wind-trunk, and in that wind-trunk is a ventil which when open allows the wind to reach the sound-board, and when closed intercepts it; which ventil the organist controls by means of a pedal. The advantages of the ventil system are, first, that instead of the stops coming into use in certain fixed and invariable groups, any special combination can be first prepared on the three sound-boards, and then be brought into use or silenced at the right moment by simply the admission or exclusion of the wind. Moreover their action is absolutely noiseless, as it consists in merely opening or closing a valve, instead of shifting a number of long wooden sliders to and fro. The objection has been raised, that in the ventil system the stops no longer 'register' what is about to be heard; and the extreme case is cited that every stop in the organ may be drawn, and yet no sound respond to the touch if the ventils be closed. [See Composition Pedals, Organ, and Ventil System.] E. J. H.

COME SOPRA, 'as above'; when a passage or section is repeated, to save the trouble of recomposing, reprinting, or recopying.

COMES. See Answer, Dux, and Fugue.

COMES, Juan Bautista, born in the province of Valencia about 1560; maestro de capilla of the Cathedral and of the Church del Patriarca at Valencia. His compositions, said to be excellent, are to be found mainly at Valencia and in the Escurial. Eslava in his 'Lira Sacro-hispana' publishes a set of Christmas Day responses for three choirs in twelve parts, which amply justify Comes's reputation in Spain. [According to Pedrell, Comes lived from 1568

to 1643, and held the post in the cathedral of Valencia, 1632-38.] M. C. C.

COMETTANT, JEAN PIERRE OSCAR, born at Bordeaux, April 18, 1819, entered the Paris Conservatoire in Nov. 1839, where he studied under Elwart and Carafa till the end of 1843. He first became known as a pianist, and as the author of a number of pieces for that instrument, duets for piano and violin, as well as songs and choruses. [He lived in America, 1852-55.] He also came forward as a writer, and soon obtained reputation as the musical critic of the *Siècle*, with which he was connected for many years. Comettant had an easy, humorous, brilliant style; he was a great traveller, and published a large number of books on various subjects which are both instructive and pleasant reading. Of his musical works, the following are among the most important: *Trois ans aux États-Unis* (Paris, 1858); *La propriété intellectuelle*, etc. (Paris, 1858); *Histoire d'un inventeur au 19ème siècle* (Paris, 1860)—a life of Adolphe Sax, and defence of his claims; *Musique et musiciens* (Paris, 1862)—a collection of articles originally published in the *Siècle; Le Danemark tel qu'il est* (Paris, 1865); *La musique, les musiciens, et les instruments de musique chez les différents peuples du monde* (Paris, 1869)—an important work, written on the occasion of the Exhibition of 1867; *Les musiciens, les philosophes, et les gaîtés de la musique en chiffres* (Paris, 1870)—a polemical treatise; *François Planté* (1874). [He wrote a considerable amount of music, and died Jan. 24, 1898.] G. C.

COMIC OPERA. Opera has in recent times been cultivated more or less successfully by every people having any claim to be called musical. The particular branch of it which is the subject of this article, as it originated, so it has attained its highest development, among the French. In the dramas with music of the Trouvères of the 13th century we find at least the germ of 'opéra-comique'; and in one of them, 'Li Gieus de Robin et de Marion,' of Adam de la Hale, which has reached us intact, an example of its class of great interest, whether regarded from a literary or a musical point of view. The renascence of 'opéra-comique' in France dates from the latter part of the 17th century, and is attributable in great part to the decline in popularity of the style of Lully and his imitators. In his *Parallèle des Italiens et des Français, en ce qui regarde la musique et les opéras*,—the result of a visit to Naples, the school of which under Alessandro Scarlatti had already given earnest of its future supremacy—the Abbé François Raguenet first gave utterance to the extent of this decline in the year 1702. Some years prior to this publication d'Allard and Vanderberg, proprietors of 'marionette' or puppet theatres, had introduced music into their performances at the 'Foire St. Germain' with such success as to excite the jealousy of Lully, who obtained an order forbidding the performance of vocal music in the marionette theatre, and reducing the orchestra to four stringed instruments and an oboe. Moreover the entrepreneurs of the 'Comédie Française,' on whose domain the marionettes would seem considerably to have encroached, obtained another order forbidding even speech in their representations. At the instigation of two ingenious playwrights, Chaillot and Remy, the difficulty created by these orders was in some sort met by furnishing each performer with a placard on which were inscribed the words he would or should have uttered under other circumstances. These placards, of necessity large, being found to impede the action and even sight of the performers, their 'parts' were subsequently appended to the scene. The utterance, musical or other, of the songs of which these were largely made up, though forbidden to the actors were not unallowable for the audience, who, perfectly familiar with the airs to which (vaudeville-wise) they had been written, took on themselves this portion of the dumb actors' duties—doubtless with sufficient spirit and intensity. The popularity of these performances, which, in spite (or because) of the restrictions upon them, increased day by day, eventually brought about a treaty of peace between the would-be monopolists of speech and song and the 'marionettes.' In 1716 Catherine Vanderberg, then directress, obtained a licence for the presentation of dramatic pieces interspersed with singing and dancing, and accompanied by instruments, to which the name 'opéra-comique'[1] was given, and has since in France always been applied.

Meanwhile the numerous alumni of the Neapolitan school, of whose existence the Abbé Raguenet had first made his countrymen aware, had been continuing the important work, initiated by the Florentine Academy a century earlier, of cultivating and refining musical expression—the widest sphere for whose exercise is unquestionably the musical drama. As among the French 'opéra-comique,' so among the Italians 'opera buffa,' took root and flourished, though restricted for a long time to short pieces of one act only, which were given (as 'divertissements' continued to be till our own time) between the acts of 'opere serie.' One of the most successful of these (it still keeps the stage), the 'Serva Padrona' of Pergolesi, was produced in Paris by French performers in 1746—ten years after the untimely death of its composer—with favour but without any perceptible effect on the French taste. But its second production, in 1752, resulted in bringing the new Italian and the old French tastes into direct and fierce antagonism. Among the leaders in this war, of which that of the Gluckists and Piccinnists was but a continuation, one of the most

[1] Comic opera is the opera of comedy, not 'comic' in the vulgar English sense.

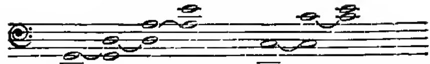
distinguished was Jean Jacques Rousseau, who indulged his love of paradox to the extent of endeavouring to prove that, the French language being incapable of association with music, French music was and always must be non-existent. Rousseau's practical commentary on this thesis was the subsequent and very successful production of 'Le Devin du Village.'

Since the beginning of the 18th century comic opera has everywhere divided with serious the attention and affection alike of composers and audiences. Among every people cultivating musical drama it has had its creators and admirers. The conditions of comic opera in Italy and France, where it has as yet taken the deepest root and branched out most luxuriantly, have remained unchanged since its first growth in either country. In the former the dialogue of opera is still uttered musically; in the latter it is for the most part spoken. A class of comedian has consequently been formed, and indeed brought to perfection, in France, which has no existence in Italy—a class formed of actors, and therefore on the French stage speakers, who are also not unfrequently singers of considerable, and indeed, very considerable, skill. On the Italian stage the singing actor never speaks. The progress, therefore, of comic opera in the direction it has taken in France has in Italy been impossible; and whether from this or some other cause productiveness in this delightful form of art on the part of Italian composers may be said to have come to an end. Some of the best modern works of this class, whether by Italian or other composers, have been formed on the French model and first produced on the French stage. 'Le Comte Ory' of Rossini, and 'La Fille du Régiment' of Donizetti, are to all intents and purposes French operas. J. H.

[Without referring to the all-important influence of French opéra-comique on the music of the nation, and with a passing mention of the brilliant 'Falstaff' of Verdi, it may be permitted to point out the influence of the comic operas of Gilbert and Sullivan on English art. They transformed the style of speech on the musical stage, assimilating it to that of the non-musical theatres; they encouraged a taste for refined music of a kind which all could understand; but the *genre* which was associated so long with the Savoy Theatre seems now to have given place to humour of a more boisterous type and in many cases untrammelled by any particular plot.]

COMMA. A comma is a very minute interval of sound, the difference resulting from the process of tuning up by several steps from one note to another in two different ways. There are two commas:—

1. The common comma is found by tuning up four perfect fifths from a fixed note, on the one hand, and two octaves and a major third on the other, which ostensibly produce the same note, thus—



or by multiplying the number of the vibrations of the lowest note by $\frac{3}{2}$ for each fifth, by 2 for each octave, and by $\frac{5}{4}$ for the perfect third. The result in each case will be found to be different, and the vibrations of the two sounds are found by the latter process to be in the ratio of 80 : 81. The difference between the two is a comma.

2. The comma maxima, or Pythagorean comma, is the difference resulting from the process of tuning up twelve perfect fifths on the one hand, and the corresponding number of octaves on the other; or, by multiplying the number of vibrations of the lowest note by $\frac{3}{2}$ for every fifth, and by 2 for every octave. The difference will appear in the vibration of the two notes thus obtained in the ratio of 524,288 : 531,441, or nearly 80 : 81·0915.

Other commas may be found by analogous processes, but the above two are the only ones usually taken account of. C. H. H. P.

COMMER, Franz, born Jan. 23, 1813, at Cologne, a pupil of Joseph and Bernhard Klein, and Leibl; organist in the Carmelite Church at Cologne in 1828, and a member of the Cathedral choir; in 1832 he went to Berlin, where he became a pupil of Rungenhagen, A. W. Bach, and A. B. Marx; librarian to the Königliche Musik-Institut, choirmaster at the Catholic church of St. Hedwig in Berlin (1846), member of the Akademie der Künste from 1845, and joint-founder in 1844 with Theodor Kullak of the Berlin Tonkünstlerverein. He took a prominent part in the foundation of the Gesellschaft für Musikforschung (1868). He is best known as the editor of the following important works:—*Collectio operum musicorum Batavorum sæculi XVI*, twelve vols.; *Musica sacra XVI, XVII, sæculorum*, twenty-six vols. (the earlier of which were edited by Commer), containing organ-pieces, masses, and motets for men's voices and full choir; *Collection de compositions pour l'orgue des XVI, XVII, XVIII siècles*, six parts; *Cantica sacra . . . aus den XVI–XVIII Jahr.*, two vols. Commer also composed some church music, Lieder, and dances for pianoforte, as well as music to 'The Frogs' of Aristophanes, and 'Electra' of Sophocles. He died August 17, 1887. A. M.

COMMODO, 'easily,' 'at a convenient pace'; a direction of rare occurrence by itself, but generally used with Allegro, as in the Rondo of Beethoven's pianoforte sonata in E, op. 14, No. 1. M.

COMMON TIME. The rhythm of two or four beats in a bar, also called Equal time. According to the method of teaching usually observed in England, common time is divided into two kinds, Simple and Compound, Simple common time including all rhythms of two or

four in a bar, except those in which the 'measure note,' or equivalent of a beat, is dotted; while a rhythm of two or four beats, each of which is dotted and therefore divisible into three, is called Compound common time. Thus 4–4 time or four crotchets in a bar, and 2–4 or two crotchets, are simple common times; while 6–4 or six crotchets, 6–8 or six quavers, and 12–8 or twelve quavers, are compound common, because though the number of beats in a bar is even, each beat is of the value of three crotchets or quavers respectively, and may be expressed by a dotted note. A better and more logical method is that taught in Germany, by which all rhythms are divided into Equal or Unequal, that is having two or three beats as a foundation, and each of these again into Simple and Compound; simple rhythms being such as have either two or three beats in a bar, the first alone accented, and compound rhythms those in which each bar is made up of two or more bars of simple time, and which have therefore two or more accents, the first being the strongest. It will be seen that according to this system, 4–4 time, which we call simple common time, will be considered as compound common, being made up of two bars of 2–4 time, just as 6–8 is compound common, being made up of two bars of 3–8 time. And this plan has the advantage that it allows for the secondary accent which properly belongs to the third beat of a bar of 4–4 time, but which is not accounted for by the theory that the time is simple.

Although the term common time is generally applied to all equal rhythms, it properly belongs only to that of four crotchets in a bar, the *tempo ordinario* of the Italians, denoted by the sign C, which is a modernised form of the semicircle C of the ancient 'measured music,' in which it signified the so-called 'tempus imperfectum' or division of a breve into two semibreves, in contradistinction to 'tempus perfectum,' in which the breve was worth three. Another relic of the ancient time-signatures which is of importance in modern music is the sign of the 'diminutio simplex,' which was a semicircle crossed by a vertical line ₵, and indicated a double rate of speed, breves being sung as semibreves, semibreves as minims, and so on. The modern form of this sign, ₵, has much the same signification, and indicates the time called 'alla breve,' or two minims in a bar in quick tempo. [See BREVE, COMPOUND TIME.] F. T.

COMMUNION SERVICE. The ancient counterpart of the English Communion Service, the Mass, has always been looked upon by those who have held music to be an important part of worship as a fit opportunity for displaying the grandest resources of musical effect. The magnificent works which have been produced by great masters for the use of the Roman Church are well known to musicians, but for a variety of reasons which this is not the place to discuss, the English Communion Service has not been so fortunate, though the words available for musical purposes are almost the same. [With the tendency towards a more ornate ritual, shown in the latter part of the 19th century, the practice of giving the Communion Service more musical prominence has increased in late years; happily the adaptations from foreign masses, formerly introduced, and entirely incongruous in style, have been superseded in most cases by original music of a more or less elaborate kind.] Most of those remarkable composers who wrote the music for the English services in the early days of the Reformation have been far less liberal of their attention to this than to the ordinary Morning and Evening Services, having been content to write music merely for the Creed and the Kyrie, and sometimes the Sanctus. This was evidently not the intention of the compilers of the service, nor was it the idea of Marbeck, who adapted the first music for it. In the first Prayer-Book of Edward VI. the Communion Service was ordered to be introduced by an 'Introit,' according to an ancient custom of the Western Church, which was sung to a chant. This injunction was omitted in later editions, but the custom of singing while the priest goes up to the altar still continues, though there is no rubrical direction for it. At one time it was customary to sing a Sanctus.

The Offertory sentences were ordered to be said or sung, and for them also there is music in Marbeck, but none in later composers of the early period, probably because the word 'sung' was afterwards struck out of the rubric, and the sentences ordered to be read by the priest—an order which does not now prevent their being sung by the choir in many churches after the manner of an anthem. The Kyrie which follows each commandment is almost universally sung wherever there is any music in the service at all, and the settings of it are fairly innumerable. Many attempts have been made to vary the monotony of the repetitions by setting each to different music, by varying the harmonies of a common melody, or by alternating harmony and unison of the voices. The latter probably best hits the desired mean between musical effect and comprehensibility.

The Creed has invited most composers who have written for the service at all. Marbeck's setting of it with the 'Gloria in excelsis' is the freest and most musical part of all his arrangement. [CREED.] With the Creed most frequently ends the musical part of the service, probably because there has been a very general prejudice against unconfirmed choir-boys being present at the celebration. Hence also there is not much music written for the latter part, though Marbeck's and Tallis's settings go throughout the service to the end. Marbeck's work embraces a good deal which is not sung now, such as the

versicles with which the Post-Communion used to begin, and the Lord's Prayer which used to follow them, and now begins the Post-Communion, the versicles having been removed. But though the Lord's Prayer is still retained, it is not customary to sing it as used to be done in the Roman and in the early days of the English Church. Marbeck's setting of it is to what is called a varied descant, and the chants for the versicles are most of them drawn from old Roman antiphonaria. The Sanctus has been more frequently set than the Gloria in excelsis, probably because it was, as before mentioned, used out of its proper place while the choir-boys were still in church.

In the primitive church it was customary to sing a psalm while the people were communicating. It was called 'communio.' The psalm 'O taste and see' was so sung in the churches of Jerusalem and Antioch in the 4th century. In the first edition of the English Prayer-Book this custom was ordered to be preserved, but the injunction was afterwards removed. C. H. H. P.

COMPASS, from the Latin *compassus*, 'a circle,' designates the range of notes of any voice or instrument as lying within the limits of the extreme sounds it is capable of producing.

The compass of the various instruments which are in use in modern music will be found under their respective names; but it may be said generally that it is limited in the direction of the bass, but often varies in the direction of the treble according to the skill of the player, except in instruments of fixed intonation.

The compass of a modern orchestra is generally from about the lowest note of the double basses to about E in altissimo (EE to e'''') which can be taken by the violin if properly led up to.

The compass of voices for chorus purposes is from E or F below the bass stave to a''. Solos are not often written above c''', except for special singers; as the part of Astrifiammante in 'Die Zauberflöte,' which was written for Josepha Hofer, Mozart's sister-in-law, and goes up to f'''. [See AGUJARI.]

The compass of voices varies much in different climates. In Russia there are basses of extraordinary depth, capable of taking the FF, an octave below the bass stave. Basses are not often heard in England who can go below C, which is a fifth above that. [See BASS, C.] C. H. H. P.

COMPÈRE, LOYSET, eminent contrapuntist of the 15th century, chorister, canon, and chancellor of the Cathedral of St. Quentin, where he died August 16, 1518. In Crespel's lament on the death of Okeghem he is mentioned among the distinguished pupils of the latter—

> Agricola, Verbonnet, Prioris,
> Josquin des Prês, Gaspard, Brumel, Compère,
> Ne parlez plus de joyeulx chants, ne ris,
> Mais composez un *ne ricorderis*,
> Pour lamenter nostre Maistre et bon père.

His reputation stood high with the contrapuntists of his own and the succeeding age, and it is amply sustained by the few compositions which are known to be his. These are, two motets in Petruccio di Fossombrone's 'Motetti XXXIII'; twenty-one compositions in Petruccio's 'Harmonice Musices Odhecaton'; two songs in Petruccio's collection of 'Frottole'; an 'Asperges' and a 'Credo,' both *a* 4, in Petruccio's 'Fragmenta Missarum'; a motet 'O bone Jesu,' signed simply Loyset, in Petruccio's 'Motetti della Corona'; some motets in the collection 'Trium vocum Cantiones' (Nuremberg, 1541), and, finally, a Magnificat *a* 4, six motets, and a curious five-part motet, in the Pope's Chapel, in which the tenor and second alto sing 'Fera pessima devoravit filium meum Joseph,' while the treble, first alto, and bass are recounting the injuries received by Pope Julius II. from Louis XII. of France. [See also the *Quellen-Lexikon*.] Compère has been confounded with Piéton, who had the same Christian name—Loyset, a diminutive of Louis. The confusion arises from the practice of the early masters, of signing their compositions with the Christian name alone. M. C. C.

COMPLINE (Lat. *Completorium*). The last of the 'Horæ Diurnæ,' or 'Day Hours,' of the Roman Ritual.

Compline is sung after Vespers, either with or without a pause between the two Offices. It begins with the Versicle, 'Jube domine benedicere'; the Benediction, 'Noctem quietam, etc.'; and the Lectio, 'Fratres, sobrii estote.' These are followed by the 'Confiteor,' and 'Absolutio,' with the usual alternations between the Officiant and the Choir; the Versicles and Responses, 'Converte nos, etc.'; and Psalms iv., xxx., xc., and cxxxiii. (Vulg. vers.) sung under the Antiphon 'Miserere mihi.' These Psalms never change; nor, except in the last verse, does the Hymn, 'Te lucis ante terminum,' which immediately succeeds them. The Officiant next sings the Capitulum, 'Tu autem'; followed by the Responsorium breve, 'In manus tuas'; the 'Gloria Patri,' and the Versicle and Response, 'Custode nos.' This part of the Office, which changes with the season, is followed by the Canticle, 'Nunc dimittis,' sung with the Antiphon, 'Salva nos.' On certain days, the Canticle is followed by the Preces, 'Kyrie eleison, etc.' sung kneeling. When these are omitted, the Officiant proceeds at once with the unchanging Prayer, 'Visita, quæsumus, Domine.' Then follows the Benediction, 'Benedicat et custodiat'; and the Office concludes with one of the four Antiphons, 'Alma Redemptoris Mater,' 'Ave, Regina,' 'Regina cœli,' or 'Salve, Regina,' which change with the season. W. S. R.

COMPOSITION means literally 'putting together,' and is now almost exclusively applied to the invention of music—a novelist or a poet being never spoken of as a composer except by

way of analogy, but a producer of music being almost invariably designated by that title. 'Gedichtet,' says Beethoven, 'oder wie man sagt, componirt' (*Briefe*, Nohl, No. 200). As far as the construction of a whole movement from the original ideas is concerned the word is perhaps not ill adapted, but for the ideas themselves nothing could be more inappropriate. For the mysterious process of originating them the word 'invention' seems more suitable, but even that does not at all describe it with certainty. It is the fruit sometimes of concentration and sometimes of accident; it can hardly be forced with success, though very ingenious imitations of other people's ideas to be made to look like new may be arrived at by practice and the habitual study of existing music. Nevertheless the title of composer, though only half applicable, is an honourable one, and those who do put together other people's ideas in the manner which should best justify the title are generally those who are most seldom called by it. C. H. H. P.

COMPOSITION PEDALS. As up to within the 18th century English organs were quite unprovided with pedals, the notes required to be played had to be lowered exclusively by the fingers of the two hands; and as a hand could rarely be spared for changing the combination of stops during the performance of a piece of music, the same stops that were prepared previously to its commencement had generally to be adhered to throughout. When the instrument had two manuals of full compass, as was the case with all the most complete examples, a change from *forte* to *piano*, and back, was practicable, and represented almost the full amount of contrast then available; and the departments which are now called the 'great' and 'choir' organs were then not unfrequently named from this circumstance the 'loud' and the 'soft' organs. When the organ possessed but one complete manual, the means for even this relief, either by change of row of keys or shifting of stops by the *hands*, were not readily presented; and this difficulty pointed to the necessity for some contrivance for obtaining it by the *foot*; and the invention of the 'shifting movement,' as it was called, was the result.

Father Smith's smaller organs, generally consisting of a Great manual of full compass and an echo to middle C, were usually supplied with an appliance of this kind. On depressing the controlling pedal all the stops smaller than the principal, including the reed, were silenced; and on letting it rise they again sounded, or at least so many of them as had in the first instance been drawn. The pedal was hitched down when in use, and when released the sliders were drawn back into position by strong springs.

Shifting movements remained in use for small organs up to the commencement of the 19th century, about which time they were superseded by Bishop's invention called 'Composition Pedals,' in which the contending springs were done away with, and the stops were left to remain as the pedal arranged them until another pedal, or a hand, made a readjustment. We can now say a 'hand,' because a few years before the invention of Bishop's appliances pedals for drawing down the lower notes of the manuals had been added to English organs, so that a hand could be spared for the above purpose.

Composition pedals were of two kinds—single-action and double action; but the latter only are now made. A 'single-action' would either throw out or draw in given stops, but would not do both. A 'double-action' composition pedal will not only draw out a given number of stops—we will suppose the first four—but will draw in all but the same four. [See ORGAN.] E. J. H.

COMPOUND TIME. A rhythm formed by the combination of two, three, or four bars of simple time. The compound times most used are as follows:—

Compound Common Times.

6–8	formed of two	bars of	3–8 time.
6–4	,,	,,	3–4 ,,
12–8	,, four	,,	3–8 ,,

Compound Triple Times.

9–8	formed of three	bars of	3–8 time.
9–4	,,	,,	3–4 ,,

To these may be added 4–4 time, which is made up of two bars of 2–4 time, and in Germany is always classed with the compound times. [See COMMON TIME.] F. T.

COMTE ORY, LE, an opera in two acts; libretto in French by Scribe and Delestre-Poirson, music by Rossini; produced at the Académie Royale, August 20, 1828. Neither libretto nor music was new; the former was an adaptation of a piece produced by the same authors twelve years before, and the greater part of the music had been written for 'Il viaggio à Reims,' an opera composed for the coronation of Charles X. 'Le Comte Ory' was first performed in England at the King's Theatre (in Italian), Feb. 28, 1829; and in the original French at the St. James's Theatre, June 20, 1849. G.

CONACHER & CO. established an organ factory at Huddersfield in 1854. Out of a list of upwards of 400 organs built or enlarged by them, we may quote those of the parish church, Huddersfield; St. Michael's, Hulme, near Manchester; Glasgow University; and the Catholic Cathedral, St. John's, New Brunswick. V. DE P.

CON ANIMA. See ANIMATO.

CON BRIO, 'With life and fire.' Allegro con brio was a favourite tempo with Beethoven; hardly one of his earlier works but has an example or two of it, and it is found in the overture op. 124, and in the last piano sonata. The most notable instances are the first move-

ments of the Eroica and the C minor, and the Finale of the No. 7 symphonies. Mendelssohn, on the other hand, rarely if ever employs it. His favourite quick tempo is Allegro molto or di molto. G.

CON SPIRITO. See SPIRITOSO.

CONCENTO, the sounding together of all the notes in a chord, and thus the exact opposite of Arpeggio. M.

CONCENTORES SODALES, established in June 1798, and to some extent the revival of an association (the 'Society of Musical Graduates') formed in 1790 by Dr. Callcott, Dr. Cooke, and others. [See *Musical Times*, 1892, p. 713.] For that society Dr. Callcott wrote his glee, 'Peace to the souls of the heroes,' and Robert Cooke, 'No riches from his scanty store.' After its dissolution the want of such an association was greatly felt, and in 1798 Mr. Horsley proposed to Dr. Callcott the formation of the 'Concentores Sodales.' The first meeting was held on June 9 at the Buffalo Tavern, Bloomsbury, and was attended by Dr. Callcott, R. Cooke, J. Pring, J. Horsfall, W. Horsley, and S. Webbe, jun. Among the early members were S. Webbe, sen., Linley, and Bartleman, Harrison, Greatorex, Spofforth, etc. Each member who was a composer contributed a new canon on the day of his presidency. In the British Museum, Add. MS. 27,693, is the programme of Thursday, Nov. 18, 1802. The society began to decline about 1812, and it was decided to dissolve it. In May 1817, at a meeting at the Freemasons' Tavern, at which Attwood, Elliott, Horsley, Linley, and Spofforth were present, it was resolved to reestablish it, with this difference—that no one should be a member who was not practising composition and did not, previous to his ballot, produce a work in at least four parts. The original members were soon joined by Evans, W. Hawes, T. F. Walmisley, and Smart, and later by Bishop, Goss, Jolly, and Attwood. The associates included King, Leete, Terrail, and Sale. The members took the chair by turns, and the chairman for the evening usually produced a new canon, which was followed by glees of his own composition, and a madrigal or some vocal work. As an illustration of the programmes may be cited that of Feb. 13, 1824, when Goss presided:—new canon, 4 in 2, 'Cantate Domino'; new glees, 'While the shepherds,' 'My days have been,' 'When happy love,' 'There is beauty on the mountain,' 'Kitty Fell,' 'Calm as yon stream,' 'List! for the breeze'; glee by Spofforth, 'Hail, smiling morn.' The society was dissolved in 1847, when it was resolved to present the books belonging to it to Gresham College, and the wine to the secretary, T. F. Walmisley; the money in hand was spent on a piece of plate for Horsley, the father of the society. C. M.

CONCERT. The word was originally 'consort'—as in Ecclus. xxxii. 5, or in Milton's lines, 'At a Solemn Musick'—and meant the union or *symphony* of various instruments playing in concert to one tune. A 'consort of viols' in the 15th and 16th centuries was a quartet, sestet, or other number of stringed instruments performing in concert—concerted music. From this to the accepted modern meaning of the term, a musical performance of a varied and miscellaneous programme—for an oratorio can hardly be accurately called a concert—the transition is easy. In German and French the word 'Concert' has two meanings—a concert and a concerto.

The first concerts in London at which there was a regular audience admitted by payment seem to have been those of John Banister, between 1672 and 1678. They were held at his house in Whitefriars, Fleet Street, daily at four in the afternoon, and the admission was 1s. After Banister's death, concerts were given by Thos. Britton, 'the small-coal man,' at his house in Clerkenwell, on Thursdays, subscription, 10s. per annum, and continued till his death in 1714.

By the latter part of the 18th century the concerts of London had greatly multiplied, and were given periodically during the season by the Academy of Antient Music (founded 1710), the Castle Society (1724), the Concert of Antient Music (1776), The Professional Concerts (1785), besides occasional concerts of individual artists, amongst which those of Salomon and Haydn were pre-eminent from 1791 to 1795. In 1813 the Philharmonic Society was founded, to give eight concerts a year, and has been followed in later times by many other enterprises, of which the Musical Society, the New Philharmonic Society, the Crystal Palace Saturday Concerts, and the British Orchestral Society, for orchestral music; the Musical Union, the Monday and Saturday Popular Concerts, and (Sir) Charles Hallé's Recitals, for chamber music; the Sacred Harmonic Society, Leslie's, Barnby's, and the Bach Choir for vocal music, have been most prominent in the metropolis. Hullah's four historical concerts (1847) must not be forgotten.

[Since the above was written all the concerts enumerated, except the Philharmonic, have been reorganised, and the majority given up. Their place has been taken by various enterprises, of which the Queen's Hall Orchestral Concerts (Symphony and Promenade Concerts) and the Richter Concerts are the most permanent among orchestral undertakings; and for chamber concerts, the Broadwood Concerts (started in 1902) seem the most important addition to concerts in regular series. For many years together the sets of concerts given by Mr. and Mrs. Henschel, and Messrs. Borwick and Plunket Greene, had great influence. To enumerate the various undertakings of English and foreign performers, whether in single concerts or in sets, would be impossible. During the last three years of the

19th century (1898-1900), the concerts given in the London 'season,' from March 1 to June 30, reached an average of 223, or considerably over 50 in a month.

In Manchester there are the Gentlemen's Concerts and those of the Manchester Orchestra, founded by Sir Charles Hallé, and now conducted by Dr. Richter. In Liverpool, the Philharmonic. In Edinburgh, the Reid Concert and the Choral Union; in Glasgow the Choral Union.

In New York the Philharmonic is on the model of our own; Mr. Thomas's orchestra gives periodical concerts of deserved reputation. In Boston the Handel and Haydn Society for Oratorios, and the Harvard Institute for chamber music, are the chief musical bodies. [See BOSTON, and SYMPHONY CONCERTS.]

In Vienna the concerts of the Tonkünstler-Societät appear to have been the earliest institution for periodical performances. They were founded in 1772, just a century after the first English concerts. The history of Concerts in Vienna has been thoroughly examined in Hanslick's *Concertwesen in Wien* (Vienna, 1869).

The first of the famous Gewandhaus Concerts of Leipzig, which through Mendelssohn's exertions reached so high a rank in the music of Europe, was held on Nov. 25, 1781. [They were the descendants of the 'Grand Concert,' founded in 1743, and conducted by J. F. Doles.]

In France (see next article) the Concerts Spirituels began as far back as 1725, and the concerts of the Conservatoire (Société des Concerts) in 1828; the Concerts Populaires (Pasdeloup), 1861, etc.

In Amsterdam the 'Felix Meritis' Concerts (1777) are celebrated all over the continent.

The programme of a miscellaneous concert is not less important than the execution of it. For fifty-nine seasons the programme of the Philharmonic Society included two symphonies and two overtures, besides a concerto, and often another piece of full sonata-form, with several vocal pieces and smaller instrumental compositions. In 1872, however, after the removal of the concerts to St. James's Hall, this rule was broken through, and the programmes are now of somewhat more reasonable length. A symphony, a concerto and two overtures, besides less important items, are surely as much as any musical appetite can properly digest. Mendelssohn somewhere proposes to compose an entire programme, in which all the pieces should have due relation to each other, but he never carried out his intention. G.

CONCERT INSTITUTIONS in Paris.

CONCERT SPIRITUEL. A great musical institution of France, dating from the reign of Louis XV. The Académie Royale de Musique (the Opera House) being closed on the great religious festivals, it occurred to Anne Danican Philidor to give concerts on these occasions in place of the prohibited performances. Having obtained the necessary permission, Philidor entered into an agreement with Francine, the Impresario of the Opera, by which he pledged himself to pay 1000 francs a year, and to perform neither French nor opera music. The first Concert Spirituel accordingly took place between 6 and 8 P.M. on Sunday in Passion Week, March 18, 1725. The programme included a Suite for violin and a Capriccio by Lalande, Corelli's 'Nuit de Noël' (Concerto 8, op. 6), and a 'Confitebor' and 'Cantate Domino' of Lalande, and the concert was most successful. The number of concerts in the year never exceeded twenty-four. They were held in the Salle des Suisses of the Tuileries, on Purification Day, Feb. 2; Lady Day, March 25; on certain days between Palm Sunday and Low Sunday (first Sunday after Easter); Whitsunday; Corpus Christi Sunday; on August 15, Sept. 8, Nov. 1, 8; Dec. 24, 25—those being the days on which the Opera was closed.

In 1728 Philidor, having previously acquired the right of introducing French and opera music into the programmes, transferred his privilege to Simard, on an annual payment of 3000 francs, and the musical direction of the concerts was confided to Mouret. On Dec. 25, 1734, Thuret, the then Impresario of the Opera, took the concerts into his own hands, and appointed Rebel leader of the orchestra. In 1741 he resigned it to Royer for six years, at an annual rent of 6000 francs; in 1749 Royer renewed the contract on the same terms, in partnership with Caperan. In 1752 the rent was raised to 7500 francs, and in 1755 to 9000 francs, at which it remained for eight years. On Royer's death in 1755, Mondonville took the direction of the concerts until 1762, when he was succeeded by D'Auvergne, who retained it for nine years in combination with Joliveau and Caperan. In 1771 D'Auvergne and Berton renewed the agreement; but the concerts had for some time been failing, and D'Auvergne—as we learn from a remark by Burney (*Present State*, etc., p. 23)—becoming very poor, cancelled the agreement after a short trial. Gaviniés, in 1773, took the direction with Le Duc and Gossec, and was more successful. Le Gros succeeded him in 1777, with Berthaume as his partner in 1789; but political events gave a fatal blow to the undertaking, and in 1791 the Concerts Spirituels ceased to exist.

We have given the names of the successive Impresarios because many among them are worthy of mention, not as mere speculators, but as true artists. Mouret, Rebel, D'Auvergne, and Berton are among the best composers and leaders of the orchestra that the Académie can show in the 18th century; while Gaviniés, Simon Leduc, Lahoussaye, Guénin, and Berthaume, who conducted the concerts during the last eighteen years of their existence, were all violin players of very great merit.

Whatever may be said of the vocal music and the French singers at the Concerts Spirituels, it must be admitted that foreign artists always met with the most courteous reception, and also that the concerts greatly assisted the progress of music in France, especially by developing a taste for the highest orchestral music. Among the celebrated artists who appeared, it will be sufficient to mention the famous brothers Besozzi, whose duets for oboe and bassoon made furore in 1735; the violinists Traversa, Jarnowick, François Lamotte, Viotti, and Frederic Eck; the horn players Punto and Rodolphe; Jérome Besozzi and Louis Lebrun (oboe); Etienne Ozi (bassoon); Michel Yost (clarinet), and many others of less repute. Among many illustrious singers we must content ourselves with mentioning Farinelli, Raff, Caffarelli, Davide, Mmes. Agujari, Danzi, Todi, and Mara.

Up to 1878 no history of the Concerts Spirituels had appeared, though ample materials exist in the monthly *Mercure de France*, which plainly testifies to the importance of the concert movement and the influence it exercised on musical art in France. To the brilliant success of the Concerts Spirituels must be attributed the creation of many rival societies which served the cause of good music in France, and also encouraged it abroad. [In 1900 was published *Le Concert Spirituel, 1725-1790, précédé d'un historique des Concerts publics à Paris*, par Constant Pierre.]

Thus in 1770 the important enterprise of the Concert des Amateurs was founded by d'Ogni and Delahaye at the Hôtel Soubise. It was conducted by Gossec, and its solo violin was the famous Chevalier de St. Georges. At these concerts the symphonies of J. B. Toeschi, Van Maldere, Vanhall, Stamitz, and Gossec, for wind instruments, were first produced. When the Amateurs removed to the Galerie de Henri III., in the Rue Coq Héron, they adopted the title of Concert de la Loge Olympique, and their orchestra contained the best players of the day. The change took place in 1780, a year after the introduction of Haydn's symphonies into France by the violinist Fonteski. So great was the success of these admirable compositions as to induce the directors to engage the great composer to write six symphonies specially for the society. They date from 1784 to 1789; are in C, G minor, E♭, B♭, D, and A; and were afterwards published in Paris as op. 51, under the special title of 'Répertoire de la Loge Olympique.'

Two similar institutions, the Concert de la Rue de Cléry (1789), and the Concert Feydeau (1794), may be considered as feeble imitations of the Loge Olympique. They had, however, their periods of success—according to Fétis in 1796 and 1802. Among the artists who chiefly contributed to the éclat of the performances we can only name the violinists R. Kreutzer and Rode, Fred. Duvernoy the horn player, and the singers Garat and Mme. Barbier-Valbonne.

[The Concerts Français, the first of which took place in 1786, had their origin in the public exercises of the pupils of the École Royale de Musique et de Déclamation; the 'exercices' were in danger of suppression, when the old pupils of the Conservatoire formed themselves into a society quite independent of the school. The first concert took place in the foyer of the Théâtre Olympique, Nov. 21, 1801, and from 1802 the series was continued in the hall of the Conservatoire, Rue Bergère. The concerts were directed successively by Marcel Duret, F. Habeneck (then aged twenty-two years, but already a conductor of remarkable ability), and by Gasse, all of whom had been violin pupils. Besides songs and instrumental solos a symphony of Haydn, Mozart, or Méhul, etc., was always played, as well as an overture. Some of the symphonies of Beethoven (which the professional orchestras had not then attempted) were heard there for the first time in Paris (the C major symphony on Feb. 22, 1807). This orchestra of students, many of them still in a state of pupilage, won general admiration by the excellence of its performances.]

In 1805 the Concerts Spirituels were re-established by the Impresario of the Italian Opera House, and the sacred concerts given during Holy Week in Paris at the Cirque d'Hiver, the Conservatoire, and other places, are still known by that name. In fact, in a historical point of view, the Concerts du Conservatoire must be considered as the successors of the Concerts Spirituels and of the Concerts de la Loge Olympique.

The Concerts du Conservatoire. The creation of the celebrated Société des Concerts du Conservatoire was due to Habeneck, and its first 'Matinée dominicale' took place on Sunday, March 9, 1828, at 2 P.M., in the theatre of the Conservatoire. The programme was as follows:—(1) Beethoven's Eroica Symphony; (2) Duet from 'Semiramide,' sung by Nélia and Caroline Maillard; (3) Solo for Horn, composed and executed by Meifred; (4) an air of Rossini's, sung by Mlle. Nélia Maillard; (5) Concerto by Rode, performed by Conductor Eugène Sauzay; (6) Chorus from 'Blanche de Provence'; (7) Overture to 'Les Abencérages'; and (8) the Kyrie and Gloria from the Coronation Mass—all by Cherubini. The effect of this programme was extraordinary.

The concerts are held on Sundays at 2 P.M. The season originally consisted of six concerts, but by degrees the number has been increased to nine. Since Jan. 7, 1866, the same programme has been always repeated on two consecutive Sundays in consequence of a division of the subscribers into 'old' and 'new.' The seats, which originally ranged from two to five francs, are now five, nine, ten, and twelve francs. The orchestra is composed of eighty-four musicians.

[The constitution of the orchestra is as follows:—(1) Sociétaires; (2) Aspirants; (3) Auxiliaires. The chorus is composed of (1) Sociétaires; (2) Sociétaires adjoints; (3) Externes; (4) Aspirants et Aspirants actifs; (5) Externes; (6) Auxiliaires actifs; (7) Aspirants en cas; (8) Auxiliaires en cas.] The following is the list of conductors:—

Conductor.	Sub-Conductor.	Date.
Habeneck	Tilmant ainé.	Mar. 9, 1828–Ap. 10, 1848
Narcisse Girard	,,	Jan 14, 1849–Jan. 1860
Tilmant	Deldevez	1860–1863
G. Hainl	,,	1864–March 17, 1872
Deldevez	Lamoureux	May 25, 1872–1877
,,	E. Altès	1877–1885
Jules Garcin	Jules Danbé	June 2, 1885–1892
Paul Taffanel	D. Thibault	Nov. 27, 1892–1901
Georges Marty	Gasser Ed. Nadaud	June 12, 1901

The choir contains 117 members. M. S. Rousseau leader, M. Alexandre Guilmant, organist.

The répertoire of this society comprises all the symphonies of the classical masters, overtures of every school, oratorios, selections from operas and religious music, choruses with and without accompaniment, pieces for the orchestra alone, ode-symphonies and instrumental solos. For some years the programmes have been more varied than was formerly the case, introducing the works of Schumann, Berlioz, and Wagner, and of the young masters of the modern French school. M. A. Elwart published in 1860 his *Histoire de la Société des Concerts du Conservatoire* [continued by Deldevez in 1885], and the author of this article has collected materials for a *Histoire du Conservatoire National de Musique*, which will contain a sketch of the work of that illustrious institution from its foundation by Habeneck to the present date [1878]. [A complete history of the concerts was published in 1897, *La Société des Concerts du Conservatoire de 1828 à 1897*, by A. Dandelot. During 1897-98 the Société des Concerts du Conservatoire gave its concerts provisionally at the Opéra, as the Commission supérieure des Théâtres ordered the hall in the Rue Bergère to be shut, after the disastrous fire at the charity bazaar. Fourteen concerts were given at the Opéra, for which the orchestra was augmented to ninety-eight performers. From the date of the resumption of the concerts in the original building (Nov. 27, 1898) the former number of performers was restored; and the Commission des Théâtres ordered a certain number of seats to be removed, so that the number of concerts had to be increased to make up for the diminution in the receipts.] G. C., additions by G. F.

L'ATHÉNÉE MUSICAL, was founded by Chelard in the early part of the 19th century, under the patronage of the préfet of the Seine. The concerts were given in the Hôtel de Ville, and were successively directed by Barbereau, Vidal, and Gérard; they ceased in 1832. In this year Fétis organised the CONCERTS HISTORIQUES, the first of which took place in the Conservatoire on April 8, 1832, with a programme in three parts, each of which was preceded by an explanatory discourse delivered by Fétis: it dealt with the history of the opera (i.) 1581-1650, (ii.) 1650-1750, (iii.) 1760-1830. The second concert included church and dance music, the third was confined to works of the 17th century, and the fourth and last was given April 2, 1833, in the old building of the Opéra Comique. Neither these nor another, given by Fétis in April 1855, after an interval of twenty-two years, had a great success. From 1832 onwards may be cited the CONCERTS MUSARD, the CONCERTS BESSELIÈVRE, and L'UNION MUSICALE, the last founded by Manera, a pupil of Habeneck. It was conducted by Félicien David and Berlioz until 1849, when Seghers reorganised the SOCIÉTÉ DE SAINTE-CÉCILE, at which many of the less familiar works of Gounod, Saint-Saëns, Reber, Gouvy, Weber, Mendelssohn, Schumann, and Schubert were brought forward. The GYMNASE MUSICAL, at which the works of Berlioz were frequently to be heard, was founded in 1854 by Tilmant *aîné*. But more important than all these, and the first enterprise worthy to be mentioned beside the Concert du Conservatoire, was that instituted by Pasdeloup, who for some years had made efforts to initiate the Parisian public into the beauties of the musical art, and who founded, in 1851, the SOCIÉTÉ DES JEUNES ARTISTES DU CONSERVATOIRE, at the concerts of which, given in the Salle Herz, were heard many interesting works of French and foreign origin. As the fame of the concert and the size of the audience increased, Pasdeloup migrated to the Cirque d'Hiver, where he established the CONCERTS POPULAIRES DE MUSIQUE CLASSIQUE, which he inaugurated on Oct. 27, 1861, and enjoyed a successful career until April 1884. [See PASDELOUP.] At these concerts the conductor brought forward not only the masterpieces of all countries, but many unpublished compositions of the younger French composers and foreign works of special interest. The enormous influence exercised by these concerts on the musical development of France, and the services Pasdeloup rendered to art for thirty years, can hardly be exaggerated.

In 1873 MM. Colonne and G. Hartmann founded, under the title of CONCERT NATIONAL, an enterprise destined to bring fame to the young French school, although only six concerts were given at the Odéon Theatre. The good work begun here was continued at the Châtelet by M. Colonne, under the title of L'ASSOCIATION ARTISTIQUE, for weekly concerts, beginning in Oct. 1874. The society, after some initial difficulties, won great favour, and the scheme, now widely known as the

CONCERTS COLONNE, has borne much fruit. The orchestra numbers 107, and the chorus 143. In 1897 M. Colonne organised a new series of concerts at the Nouveau Théâtre in order to bring forward symphonies, quartets, concertos, and cantatas by ancient and modern composers. The series runs concurrently with the other scheme. [See COLONNE.] In 1873 Lamoureux had organised and directed performances of many oratorios, etc., at the Cirque des Champs-Élysées, and in 1881 he founded the NOUVEAUX CONCERTS, afterwards known as the CONCERTS LAMOUREUX. They took place successively at the Théâtre du Château d'Eau, the Eden (from 1885), the Cirque d'Été (from 1887 to the present time, when they are directed by M. Chevillard). [See CHEVILLARD and LAMOUREUX.] The orchestra consists of ninety-five performers. While Lamoureux did no less than Pasdeloup and Colonne for musical education in France, he was the chief populariser there of the music of Wagner. Passing over some unfortunate speculations of MM. Ed. Broustet and Benjamin Godard, who tried to re-establish the CONCERTS POPULAIRES DU CIRQUE D'HIVER, we come to the CONCERTS ÉCLECTIQUES, founded by M. Eug. d'Harcourt in 1892 in a room built especially for them in Rue Rochechouart; they lasted about five years, and in that time brought to a hearing many works of large dimensions in their entirety, or approximately so; 'Fidelio,' 'Euryanthe,' Schumann's 'Genoveva,' and 'Die Meistersinger' were among the works given in concert-form, besides many symphonic works of the usual repertory.

Many attempts were made from time to time to establish concerts in the Opera-house. In Nov. 1869 Litolff gave two such concerts; between Nov. 1870 and March 1871 the artistes of the Opéra, formed into a society, gave some concerts which were not successful. In May 1880 two CONCERTS HISTORIQUES were given by the director, Vaucorbeil; and the last scheme was that of MM. Bertrand and Gailhard, the directors, in 1895, intended to encourage the young composers. The first of these CONCERTS DE L'OPÉRA, directed by G. Marty and P. Vidal, included works of Berlioz, Gluck, F. David, César Franck, and Vincent d'Indy, and a series of dances of the olden time was exhibited. These interesting concerts lasted, with a short interval, until March 1897, the encouragement of the public not being sufficient to warrant their continuance.

LA SOCIÉTÉ NATIONALE, founded in 1871 by Romain Bussine, still exists, with the excellent object of presenting the works of both orchestral and chamber music of the younger composers. The 305th concert took place on Jan. 10, 1903; many of the most noteworthy French composers have won their first laurels at these concerts.

The NOUVELLE SOCIÉTÉ PHILHARMONIQUE DE PARIS has taken a high place within the last few years among the institutions for chamber music in the widest sense; its first concert took place on Nov. 22, 1901.

For the SCHOLA CANTORUM, see BORDES and SCHOLA CANTORUM. G. F.

CONCERT-MEISTER, the German term for the leader, *i.e.* the first of the first violins in an orchestra, who sits next the conductor and transmits his wishes to the band. He is, as far as any one player can be, responsible for the attack, the tempo, the nuances of the playing. Ferdinand David, who was the head of the orchestra at the Gewandhaus concerts during Mendelssohn's reign, and till his own death, was the model concert-meister of his time. G.

CONCERT-PITCH. An expression now understood to imply a slightly higher pitch than the standard pitch accepted for an orchestra, due to the higher temperature of the concert-hall or room. For example, the French diapason normal is A=435 double vibrations per second. An average taken from the leading orchestras in Europe and America shows a performing, or concert-pitch, of A=439. A. J. H.

CONCERTANTE (Ital.). In the 18th century this name was given to a piece of music for orchestra in which there were parts for solo instruments, and also to compositions for several solo instruments without orchestra. The fine concerto by Handel in C major, for two violins and violoncello, accompanied by strings and two oboes (published in part 21 of the German Handel Society's edition) is in Arnold's old English edition entitled 'Concertante' (see CONCERTO GROSSO). In the present day the word is chiefly used as an adjective, prominent solo instrumental parts being spoken of as 'concertante parts' and a work being said to be 'in the concertante style' when it affords opportunities for the brilliant display of the powers of the performers. For example, those quartets of Spohr in which especial prominence is given to the part of the first violin are sometimes called 'concertante quartets.' His op. 48 is a 'Sinfonie concertante, pour deux Violons avec Orchestre'; his op. 88 a 'Concertante' for the same. See also his opp. 112-115, etc. E. P.

CONCERTINA, a portable instrument of the Seraphine family, patented by the late Sir Charles Wheatstone, June 19, 1829.

It is hexagonal, and has a keyboard at each end, with expansible bellows between the two. The sound is produced by the pressure of air from the bellows on free metallic reeds. The compass of the treble concertina is four octaves (*g* to *g''''*) through which it has a complete chromatic scale. This instrument is double action, and produces the same note both on drawing and pressing the bellows. Much variety of tone can be obtained by a skilful player, and it has the power of being played with great expression and complete sostenuto and staccato.

Violin, flute, and oboe music can be performed on it without alteration; but music written specially for the concertina cannot be played on any other instrument, except the organ or harmonium. Nothing but the last-named instruments can produce at once the extended harmonies, the sostenuto and staccato combined, of which the concertina is capable. There are also tenor, bass, and double bass concertinas, varying in size and shape. These instruments are single-action, producing the sound by pressure only, and are capable of taking tenor, bass, and double bass parts without alteration. The compass of the tenor concertina is from *c* to *c'''*, that of the bass from *C* to *c'''*, and that of the double bass from *CC* to *c''*, making the total range of the four instruments 6⅝ octaves. The late Signor Regondi was the first to make the instrument known, and was followed by George Case. Richard Blagrove was subsequently the principal performer and professor. Among the music written specially for the instrument are two Concertos in G and D for solo concertina and orchestra, by Molique; two ditto ditto in D and E♭, by G. Regondi; Sonata for piano and concertina in B♭, by Molique; Quintet for concertina and strings by G. A. Macfarren; Adagio for eight concertinas in E, by E. Silas; Quintet in D for piano, concertina, violin, viola, and cello, by the same; six Trios for piano, concertina, and violin, by the same. Much brilliant *salon* music has also been written for it. Messrs. Wheatstone & Co. are the best makers. G.

CONCERTINO (*i.e.* a little Concert).

I. A term applied to the little band of Solo Instruments employed in a CONCERTO GROSSO—which see. The title of Corelli's Concertos is, *Concerti grossi con duoi Violini e Violoncello di Concertino obligati, e duoi altri Violini, Viola e Basso di Concerto grosso ad arbitrio che si potranno radoppiare.* W. S. R.

II. A piece for one or more solo instruments with orchestral accompaniment, which differs from the CONCERTO in its much greater conciseness. The concertino is less restricted in form than the concerto; it may be in three short movements, which are usually connected; but it more often consists of one rather long movement, in which the time may be changed or a middle part in slower tempo be introduced episodically. As good examples may be cited Weber's 'Concertino' for clarinet, op. 26, and Schumann's 'Introduction and Allegro Appassionato,' op. 92, for piano and orchestra. For some not very obvious reason the form is much less frequently used for the piano than for the violin or other orchestral instruments. E. P.

CONCERTO (Ital.; Ger. and Fr. *Concert*). This name is now given to an instrumental composition designed to show the skill of an executant, and one which is almost invariably accompanied by orchestra—one exception being Liszt's 'Concert Pathétique' for two pianos, and another Schumann's Sonata op. 14, originally published as 'Concert sans orchestre.' The word was, however, at one time used differently. It was first employed by Ludovico Viadana, who in 1602-3 published a series of motets for voices and organ, which he entitled 'Concerti ecclesiastici.' In this sense the word was used as equivalent to the Latin 'concentus,' and such works were called 'Concerti da Chiesa' (Church Concertos). Soon other instruments were added to the organ; and ultimately single instrumental movements in the sacred style were written which also received the name of 'Concerti da Chiesa.' The real inventor of the modern concerto as a concert piece was Giuseppe Torelli, who in 1686 published a 'Concerto da Camera' for two violins and bass. The form was developed by Corelli, Geminiani, and Vivaldi. From the first it resembled that of the sonata; and as the latter grew out of the suite, the movements becoming larger in form and with more internal cohesion, so it was also with the concerto: there is as much difference between a concerto by Bach and one by Beethoven as there is between the 'Suites Anglaises' and the 'Waldstein' sonata. In the time of Bach and Handel the word 'Concerto,' though applied exclusively to instrumental music, had a less restricted signification than is given to it in the present day. Many of the specimens of this form in the works of the masters named more nearly resemble symphonies than concertos in the modern acceptation of the term. For instance, the first of Handel's so-called 'Oboe Concertos' is written for strings, two flutes, two oboes, and two bassoons, and excepting in occasional passages these are treated orchestrally rather than as solo instruments; while of Bach we have a concerto for violino piccolo, three oboes, one bassoon, and two horns, with string quartet, and another for three violins, three violas, three violoncellos, and double bass, neither of which possesses the characteristics of a modern concerto. The form, moreover, of the older concerto was much freer than now. With Bach we find a preference for the three-movement form at present in use. In the whole of his harpsichord concertos, as well as in those for one or two violins, we find an allegro, a slow movement, and a finale in quick time—generally 3-8. The two concertos named above are, exceptionally, the former in four and the latter in only two movements. With Handel, on the other hand, the three-movement form is the exception. As examples of the freedom of which he makes use, may be quoted the movements of two of his 'Twelve Grand Concertos' for two violins and violoncello *soli*, with accompaniment for stringed orchestra. These works are concertos in the modern sense, as regards the treatment of the solo instruments; but their form is as varied as possible. Thus the sixth consists of a Larghetto, Allegro ma non troppo, Musette,

and two Allegros, the second of which (though not so entitled) is a minuet; while the eighth contains an Allemande, Grave, Andante allegro, Adagio, Siciliana, and Allegro. It should be mentioned here that Handel was one of the first, if not the first, to introduce opportunities for extempore performance on the part of the soloist, thus anticipating the 'cadenza,' an important feature of the modern concerto, to be spoken of presently. In the second movement of his Organ Concerto in D minor (No. 4 of the second set) are to be found no less than six places marked *organo ad libitum*, and with a pause over the rests in the accompaniments, indicating that the player (that is to say, he himself) was to improvise.

The modern form of the concerto was finally settled by Mozart and though several modifications have been introduced during the last century, the general lines of construction remain the same as those fixed by him. Nearly fifty concertos of his composition for various instruments are in existence, and, while presenting slight differences of detail, closely resemble one another in the more important points. The concerto form is founded upon that of the SONATA (which see); there are however several variations which must be noted. In the first place, a concerto consists of only three movements, the scherzo, for some not very obvious reason, being excluded. For the sake of completeness it should be mentioned that Litolff's so-called Concerto-Symphonie in E flat, for piano and orchestra, has exceptionally a scherzo as the third of four movements.

The first movement in Mozart's concertos always begins with a tutti passage for the orchestra, in which the principal subjects are announced, much as in the first part of the first movement of a sonata. Sometimes the 'second subject' is omitted in this portion of the piece, but it is more frequently introduced. An important difference in form, however, is that this first tutti always ends in the original key, and not in the dominant, or the relative major (if the work be in a minor key), as would be the case in a sonata. The solo instrument then enters, sometimes at once with the principal subject, and sometimes with a brilliant introductory passage. A repetition, with considerable modification, of the first tutti, mostly follows, now divided between the principal instrument and the orchestra; the second subject is regularly introduced, as in a sonata, and the 'first solo' ends with a brilliant passage in the key of the dominant (or relative major, as the case may be). A shorter tutti then leads to the second solo, which corresponds to the 'Durchführungsatz' or 'working out' of a sonata, and which, after various modulations, leads back to the original key. The principal subject is then reintroduced by the orchestra, but in a compressed form, and is continued by the soloist with the 'third solo,' which corresponds in its form to the latter part of a sonata movement. A short final tutti brings the movement to a close. In most older concertos a pause is made, near the end of this last tutti, upon the 6–4 chord on the dominant for the introduction of a cadenza by the player. Though very general, this custom was by no means universal; in several of Dussek's concertos—notably in his fine one in G minor, op. 49—no such pause is indicated. The cadenza, when introduced, could be either improvised by the player, or previously composed, either by himself or by some other person. Mozart has left us thirty-five cadenzas written for various concertos of his own, which, though presenting in general no very great technical difficulties, are models of their kind. Beethoven has also written cadenzas for his own concertos, as well as for that by Mozart in D minor. In the cadenza the player was expected not merely to show off his execution, but to display his skill in dealing with the subjects of the movement in which it was introduced. A cadenza consisting entirely of extraneous matter would be altogether faulty and out of place, no matter what its technical brilliancy. It was the invariable custom to finish the cadenza with a long shake over the chord of the dominant seventh, after which a short passage for the orchestra alone concluded the movement. In older works the soloist was silent during these few bars; but in his concerto in C minor (Köchel's *Catalogue*, No. 491) Mozart for the first time tried the experiment of associating the piano with the orchestra after the cadenza; and his example was followed by Beethoven in his concertos in C minor, G major, and E♭.

Before proceeding to speak of the modifications introduced into the concerto by Beethoven and other more modern composers, it will be well to complete our description of the form as left by Mozart. The second movement, which might be an andante, a larghetto, an adagio, or any other slow tempo, resembled in its form the corresponding portion of a sonata. Sometimes the variation form was used, as in Mozart's two concertos in B♭ (Köchel, Nos. 450 and 456); but more frequently the ordinary andante or larghetto was introduced. Two charming examples of the Romance will be found in the slow movement of Mozart's concertos in D minor and D major (Köchel, Nos. 466 and 537), though the latter is not, like the first, expressly so entitled, but simply bears the inscription *larghetto*. The solo part in the slow movements is frequently of an extremely florid character, abounding in passages of ornamentation. Sometimes a cadenza is also introduced at the close of this movement—*e.g.* in Mozart's Concertos in A major (Köchel, 414), C major (Köchel, 415), and G major (Köchel, 453). In such cases, as is evident from the examples written by Mozart

himself for the works mentioned, the cadenza should be much shorter than in the first movement.

The finale of a concerto was mostly in rondo form, though examples are to be found in Mozart of the variation form being employed for this movement also; see concertos in C minor (Köchel, 491), and G major (Köchel, 453). Sometimes this rondo was interrupted by a complete change of tempo. Thus the rondo of the concerto in C major (Köchel, 415), which is in 6–8 time, is twice interrupted by an adagio in C minor, 2–4; in the middle of the rondo of the concerto in E♭ (Köchel, 482) is introduced an andantino cantabile; while another concerto in E♭ (Köchel, 271) has a minuet as the middle portion of the final presto. Short cadenzas were also frequently introduced in the finales; the concerto in E♭, just mentioned, has no less than three, all of which, instead of being left to the discretion of the player, are, exceptionally, written out in full. Similar short cadenzas will be found in the rondo of Beethoven's concerto in C minor, op. 37, while in the finale of the concerto in G, op. 58, a pause is made with the special direction 'La cadenza sia corta'—the cadenza to be short.

The innovations introduced by Beethoven in the form of the concerto were numerous and important. Foremost among these was the greater prominence given to the orchestra. In the concertos of Mozart, except in the tuttis, the orchestra has little to do beyond a simple accompaniment of the soloist, but with Beethoven, especially in his later concertos, the instrumental parts have really symphonic importance. Beethoven was also the first to connect the second and third movements (see concertos in G and E flat), an example which was imitated by Mendelssohn, in whose pianoforte concertos in G minor and D minor all the movements follow continuously. Beethoven, moreover, in his concertos in G and E flat, broke through the custom of beginning the work with a long tutti for the orchestra; in the former the piano begins alone, and in the latter it enters at the second bar. It is worthy of remark that the same experiment had been once, and only once, tried by Mozart, in his little-known concerto in E♭ (Köchel, 271), where the piano is introduced at the second bar. One more innovation of importance remains to be noticed. In his concerto in E♭, op. 73, Beethoven, instead of leaving a pause after the 6–4 chord for the customary cadenza, writes his own in full, with the note 'Non si fà una Cadenza, ma attacca subito il seguente'—'Do not make a cadenza, but go on at once to the following.' His cadenza has the further peculiarity of being accompanied from the nineteenth bar by the orchestra. Another curious example of an accompanied cadenza is to be found in that which Beethoven has written for his pianoforte arrangement of his violin concerto, op. 61, through a considerable part of which the piano is accompanied by the drums, which give the chief subject of the movement.

It is evident that the example of Beethoven in his E♭ concerto led the way to the disuse of the introduced cadenza in the first movement. Neither Mendelssohn nor Brahms has inserted one at all in pianoforte concertos; and where such is intended, composers mostly write out in full what they wish played, as for example Mendelssohn in his violin concerto, op. 64 (where, it may be remarked in passing, the cadenza is the middle of the first movement, and not at the end). Schumann (concerto in A minor, op. 54) and Raff (concerto in C minor, op. 185) have also both written their cadenzas in full.

The concertos written since those of Beethoven have been mostly constructed upon the lines he laid down. The introductory tutti has been shortened (as in Mendelssohn's, Schumann's, and Raff's concertos), though occasionally works are still written in the older form, the most striking example being Brahms's concerto in D minor, in which the piano does not enter till the ninety-first bar. Sometimes also a quickening of the tempo is introduced at the end of the first movement (Schumann, op. 54; Grieg, op. 16). Various other modifications have been made by different composers, of which it is not necessary to speak in detail, as they are merely isolated examples, and have not, at least as yet, become accepted as models of the form. The two concertos for piano and orchestra by Liszt are constructed upon a plan so different from that generally adopted that they should rather be described as fantasias or rhapsodies than as concertos in the ordinary meaning of the term.

Sometimes concertos are written for more than one solo instrument, and are then known as double, triple, etc., concertos as the case may be. The construction of the work is precisely the same as when composed for only one instrument. As examples may be named Bach's concertos for two violins, and for two, three, and four pianos; Mozart's Concerto in E♭ for two pianos, in F for three pianos, and in C for flute and harp; Beethoven's triple concerto, op. 56, for piano, violin, and violoncello; Brahms's concerto in C for violin and violoncello, op. 102; Maurer's for four violins and orchestra. Mendelssohn's autograph MSS., now in the Imperial Library at Berlin, contain two Concertos for two pianos and orchestra, and one for piano and violin, with strings. E. P.

CONCERTO GROSSO. I. An Orchestral Concerto; *i.e.* a succession of movements, played by two or more solo instruments; accompanied by a full, or stringed orchestra.

Handel's so-called 'Concertante' is a composition of this kind, written for two solo violins, and violoncello, accompanied by stringed instru-

ments and hautboys. Eleven out of the twelve well-known Grand Concertos, by the same composer, are written for a similar assemblage of solo instruments, accompanied by stringed instruments and continuo only; but No. VII. of this set is of an exceptional character, and contains no solo passages. Few of these compositions contain any bravura passages for the principal instruments, which are used, for the most part, like the wind instruments in works of later date, for the purpose of producing variety of instrumentation; but sometimes, and especially in the 'Concertante,' long passages of great constructional importance are assigned to them.

Handel's six 'Hautboy Concertos' are Concerti Grossi, written for a Concertino consisting of two solo violins, two violoncellos, two hautboys, two flutes, and two bassoons, with the addition, in No. I., of two tenors, and, in No. VI., of an obbligato harpsichord; accompanied, throughout the entire set, by the stringed orchestra and continuo. In some of these, the solo passages are much more brilliant than in the Grand Concertos above mentioned.

An exceptional example, of great interest, by the same composer, will be found in the double concerto, performed at the Handel Festival in 1885. Though unfortunately incomplete, the autograph copy of this work, in the Library at Buckingham Palace, contains nine movements, written for two Concertini, each consisting of two hautboys, one bassoon, and two horns in F, the whole accompanied by stringed orchestra, and continuo.

Corelli's Concerti Grossi are written for the same instruments as Handel's 'Grand Concertos.' Sebastian Bach uses instrumental combinations of greater variety, and more in accordance with his own peculiar views of orchestral contrast, as in his Concerto for violin, flute, and clavier, with the usual accompaniments.

In form, all these works bore a close analogy to the ordinary overture, and Suite, peculiar to the middle of the 18th century, the movements consisting of a series of Largos, Allegros, and Andantes, intermixed, occasionally, with Minuets, Gavottes, and even Gigas. After the invention of the Sonata-form, the Concerto Grosso died completely out; for it would be impossible to refer to this class of compositions works like Mozart's Concertone for two violins, his Concerto for flute and harp, or even his serenades.

II. A term applied to the orchestral accompaniments of a Grand Concerto, as distinguished from the Concertino, or assemblage of principal instruments. W. S. R.

CONCERTSTÜCK, *i.e.* Concert-piece. A term familiar to the English reader through Weber's well-known composition in F minor (op. 79), which is to all intents and purposes a concerto for piano and orchestra. Weber's intention was to make it more dramatic than usual, and to have given the movements expressive headings, and hence perhaps the variation in the title. In his biography of Weber, Sir Julius Benedict gives the dramatic interpretation authorised by the composer. (See WEBER.) Schumann has left a 'Concertstück' for four horns and orchestra (op. 82), which also is a concerto under another name.

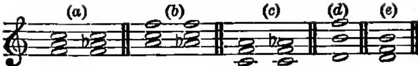
CONCONE, GIUSEPPE, born at Turin in 1810, was a professor of the pianoforte and singing. He lived for about ten years in Paris, where he gave lessons in both branches of music, and brought out several compositions for the piano, notably a set of studies published by Grus. Richault was the publisher of his vocal music, which is melodious and well written for the voice. But it is chiefly by his solfeggi and vocalizzi that Concone has made a world-wide reputation for usefulness, to which the republication of these works by Peters of Leipzig has greatly contributed. Those that are known consist of a book of fifty solfeggi for a medium compass of voice, fifteen vocalizzi for soprano, twenty-five for mezzo-soprano, and a book of twenty-five solfeggi and fifteen vocalizzi, forty in all, for bass or baritone. This coupling together of bass and baritone is as a rule a great mistake, but in the present case the alternative notes given in passages which run low enable baritone voices to make very profitable use of the vocalizzi, and as they do not run very high, ordinary bass voices can sing them with sufficient ease. There is also a set of thirty very good florid exercises for soprano.

The contents of these books are melodious and pleasing, and calculated to promote flexibility of voice. The accompaniments are good, and there is an absence of the monotony so often found in works of the kind. The book of fifty solfeggi has been republished by many houses, and latterly by Curwen, with the Tonic Sol-fa in addition to the ordinary notation.

After the French revolution of 1848, Concone returned to Turin, and became maestro di cappella and organist at the Chapel Royal. He died there, June 1, 1861. H. C. D.

CONCORD is a combination of notes which requires no further combination following it or preceding it to make it satisfactory to the ear. The concords are perfect fifths, perfect fourths, major and minor thirds, and major and minor sixths, and such combinations of them, with the octave and one another, as do not entail other intervals. Thus the combination of perfect fifth with major or minor third constitutes what is known as a common chord, as (*a*). And different dispositions of the same notes, which are called its inversions, give, first a bass note with its third and sixth, as (*b*); and, secondly, a bass note with its fourth and sixth, as (*c*).

Besides these a chord composed of the third and sixth on the second note of any scale is regarded as a concord, though there is a diminished fifth or augmented fourth in it according to the distribution of the notes, as (*d*) or (*e*)—



—since the naturally discordant quality of the diminished fifth and augmented fourth is considered to be modified by placing the concordant note below them, a modification not effected when it is placed above them. This combination was treated as a concord even by the theorists of the old strict diatonic style of counterpoint. [See HARMONY.] C. H. H. P.

CONDELL, HENRY, born 1757, was for many years a violinist in the orchestras at the Opera House and Drury Lane and Covent Garden Theatres. He wrote overtures to 'The House to be sold' (1802), Dimond's 'Hero of the North' (1803), 'Love laughs at Locksmiths'; incidental music to 'Aladdin,' and Reynolds's 'Bridal Ring' (1810). In 1811 he gained a prize at the Catch Club for his glee, 'Loud blowe the wyndes.' He also composed the music for the following dramatic pieces:—'The Enchanted Island,' ballet, 1804; 'Who wins?' musical farce, 1808; and 'Transformation,' musical farce, 1810; and was one of the six contributors to the comic opera, 'The Farmer's Wife,' 1814. He died at Battersea, June 24, 1824. W. H. H.

CONDUCTING. The art of directing the simultaneous performance of several players or singers by the use of gesture.

The conductor's duty is to concentrate the various purposes of individual players into one combined purpose, just as a pianist combines the various mechanisms of his instrument into one organism under his fingers. For this reason a conductor is often said to 'play on the orchestra'; indeed the power of á conductor over his players may be even greater than that of a player over his instrument, inasmuch as the mechanical element is entirely absent from the connection between the conductor and his performers.

Richard Wagner divides the duties of an orchestral conductor under two heads—(A) that of giving the *true tempo* to the orchestra; (B) that of finding where the melody lies.[1] The idea of true tempo covers the technical qualifications necessary to a conductor; the idea of the melody covers the ideal aspects of his art. Very few men possess both these qualifications, but both are necessary to great conducting. Technical accuracy is useless without an imaginative mind, and the most inspired imagination is powerless unless aided by a clear head and a clear beat.

A. The technical equipment and duties of the conductor may be summarised as follows:—

(i.) *Gesture.*—What a good touch is to a pianist, that expressive and alert gesture is to a conductor. Given the right rhythm and feeling in the conductor's mind he must be able to translate it quickly and exactly into gesture. The quicker the response of hand to brain the better thereby will be a man's qualifications as a conductor.

It is hardly necessary here to insist on the tremendous effect that expressive and appropriate gesture can have on orchestral playing, not only from a more ideal point of view, but also in such comparatively mechanical matters as keeping a steady rhythm—starting and finishing accurately. But to make such gestures expressive it is necessary for the conductor, like the instrumentalist, to attain certain qualities of arm and wrist. The wrist must be loose and supple, the baton should be held lightly, somewhat after the manner of a violin bow. The normal position of the baton should not be too low, otherwise it will not be seen, and not too high, otherwise it will be impossible to make that slight preliminary upward motion which is so necessary to secure a good attack on a down-beat. As a general rule no more strokes should be used than are absolutely necessary to mark the time; for instance no bar should be beaten in three strokes that can be beaten in one, no bar should be beaten in four strokes that can be beaten in two. And it is one of the signs of a great conductor that he is able to conduct a piece, for example, in slow 12-8 time, using four strokes only to the bar, without hurrying the tempo. It may almost be said that where there is no movement in the music there should be no movement of the baton. Thus a bar containing nothing but a fermata 𝄐 should never be beaten out, but the beats counted mentally. In the same way, when the orchestra holds on a chord during a recitative, the bars should not be beaten out, and even when beats are necessary they should be only just indicated, otherwise the orchestra will be unnecessarily hurried and excited. Again, when beating, the stroke should be made quickly and firmly, and the stick should then be held firm and motionless; it should not be gradually moved across the space to be traversed.

(ii.) *A knowledge of the code of signals by which the conductor indicates the time of a piece, commonly called 'beating time.'* The chief of these signs are as follows:—

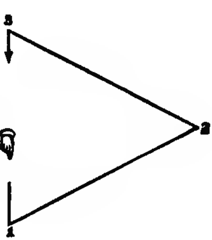
1. *Two beats in a bar:—*

1st stroke down, 2nd stroke up.

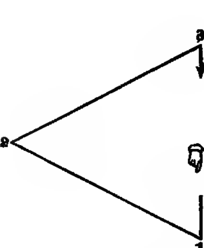
[1] 'The whole duty of a conductor is comprised in his ability to indicate the right tempo.' . . . 'The orchestra had learnt to look for Beethoven's *melody* in every bar . . . and the orchestra *sang* that melody. This was the secret.'—R. Wagner, *Ueber das Dirigiren*, translated by Dannreuther.

2. *Three beats in a bar* :—

1st stroke down, 2nd to right or left. 3rd up.



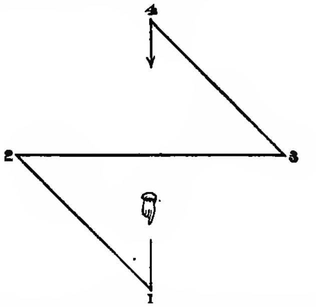
or



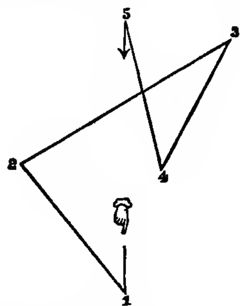
The 2nd stroke may be made to right or left as the conductor pleases, except in theatres and other places where some of the players are behind the conductor. Then it must always be made to the right in triple time, and some operatic conductors also make it to the right in common time. Notice also that the 3rd stroke must be slightly oblique, so as to bring the baton back to its original position. A time of three very quick beats in the bar (as in a valse) is marked by a single down-beat, the stick being rapidly moved back to its original position before the next bar.

3. *Four beats in a bar* :—

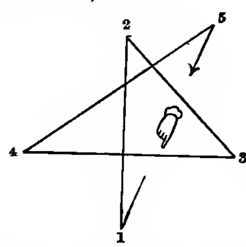
1st stroke down, 2nd stroke left, 3rd stroke right, 4th stroke up.



4. *Five beats in a bar.* For the purposes of conducting, a bar of five beats must always be divided into a bar of three beats followed by a bar of two or *vice versâ*. And the conductor must analyse each bar of a movement in five-time to find out whether it is better to beat it three and two thus :—

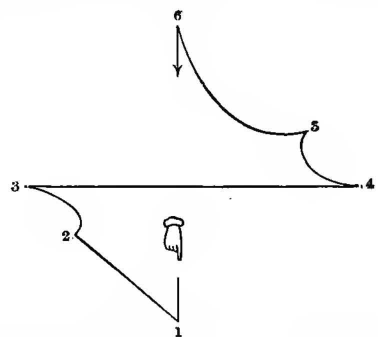


or as two and three, thus :—



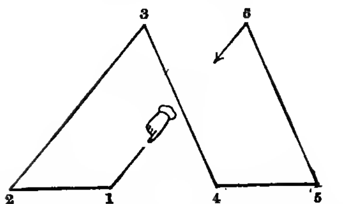
5. *Six beats in a bar.* This may be beaten in two ways for 6–8 or 6–4 time, in addition to the arrangement for slow 3–2 time, in which each of the beats shown in section 2 is duplicated after the manner shown in section 7 below.

(*a*) 1st beat a decided down-stroke. 2nd and 3rd, two slight strokes to the left, 4th beat a decided stroke to the right, 5th and 6th beats two slight strokes to the left, the last curving upward so as to bring the baton to its original position.



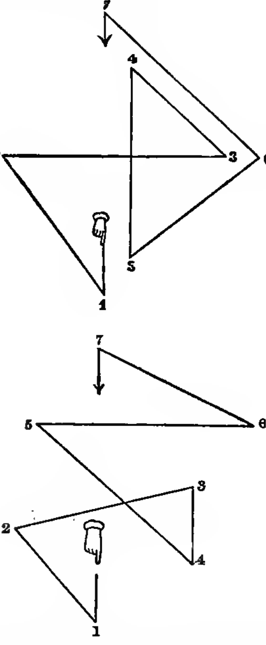
Some conductors prefer to make the fourth beat upwards, and so to make three beats down and three up.

(*b*) For six slow beats or 6–4 time, some conductors adopt the method of beating twice over as if for three-time, the 2nd beat going to the left, and the 5th beat to the right—



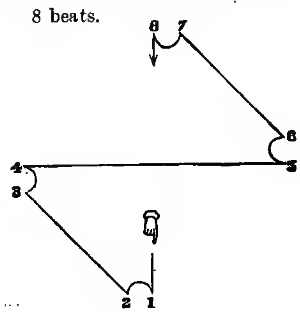
Care must be taken that the triangles 1, 2, 3, and 4, 5, 6, are equal to one another.

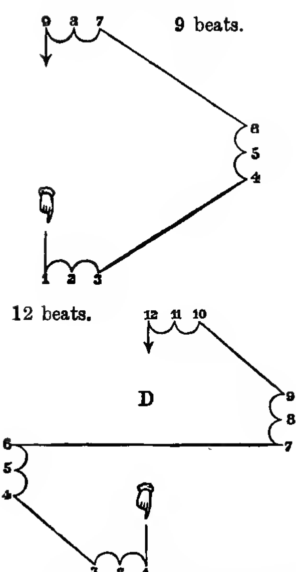
6. *Seven beats in a bar* must be analysed into bars of 4 and 3, as was described in the case of five-time, and may be beaten in either of these two ways.



7. *Eight, nine, and twelve beats in the bar* are beaten, as if they were respectively 4, 3, and 4 beats in the bar with short subsidiary strokes for the intermediate beats, thus :—

8 beats.





Of course, except in very slow time, it is better to beat 8, 9, and 12 beats as simple 4, 3, and 4 respectively.

8. Besides these normal times there occur many passages which require special treatment by the conductor. A typical instance is the ballroom scene in Mozart's 'Don Giovanni.' Of this passage Berlioz writes : 'The difficulty of keeping together the three orchestras written for in three different measures is less than might be thought. It is sufficient to mark downwards each beat of the *tempo di minuetto.* The combination once started, the little allegro in $\frac{3}{8}$, of which a whole bar represents · · · · · one beat of that of the minuet, and the other allegro, of which a whole bar represents · · · · · · two beats, correspond with each other and with the principal theme.'

A similar passage is the serenade from Spohr's symphony 'Die Weihe der Töne,' in which, according to the late W. S. Rockstro, Mendelssohn used to indicate a single down-beat for each semiquaver of the part written in 9–16 time.

Among more modern works, the following three examples from Wagner's later works present typical problems to the conductor.

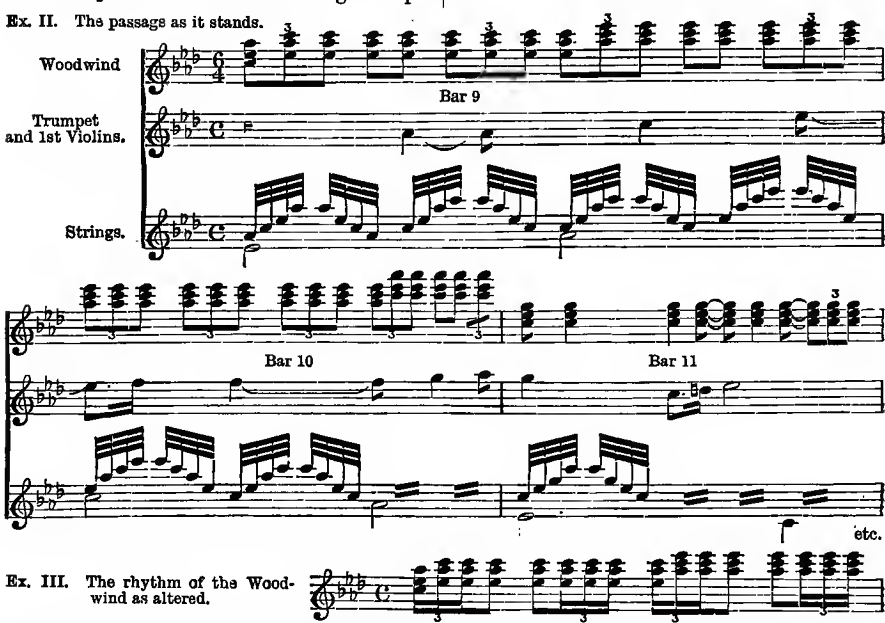
(*a*) *An example of a triplet extending over two bars of 4–4 time.* In cases where part of the orchestra has the normal four beats, these must be beaten as usual, the players who have the triplet being previously warned not to be misled by the conductor's accent which goes contrary to theirs. In cases, however, where the triplet is the only moving part in the bar, each note of the triplet should be given a beat, as in the following example from 'Tristan und Isolde' (last page of the full score) :—

Ex. I.

1 2 3 4 1 2 3 3 4

The last stroke of the triplet must not be too perpendicular, otherwise the players will be inclined to hurry on to the next bar.

(*b*) In cases where a rhythm of six beats and of four beats is simultaneous throughout a passage, the difficulty, if the movement is fairly quick, can be got over by beating two beats only in the bar or in rather slower time by beating four beats, the first and third of which will correspond with the first and third of the 6–4 time. But in one well-known instance even this is impossible. In the following example from the prelude to 'Parsifal,' it is absolutely necessary to beat eight beats to the bar, and it is therefore impossible to give any especial indication to the woodwind who are playing in 6–4 time; and without such indication, as players know well, it is nearly impossible to play the passage in time. Some conductors are content with this rhythmless pulsation, but other conductors boldly alter the 6–4 time in the following manner, except in the fifth bar where the two opposing forces are kept together by strongly marking the middle beat of the bar. The following extract from the passage will explain this:—



Ex. II. The passage as it stands.

Ex. III. The rhythm of the Woodwind as altered.

(*c*) In the following passage from the third act of 'Götterdämmerung,' it is necessary to beat slow 3–2 time with the right hand and quick 6–8 time simultaneously with the left hand thus:—

Ex. IV.

(iii.) *Conducting of recitative.* True recitative should seldom be beaten according to the above rules. When a chord is held on over several bars while the voice recites, or when the voice

recites without accompaniment, it is sufficient to indicate the beginning of each bar. If one part moves during the bar then the conductor should indicate the necessary beats to that part only, taking care not to disturb the rest of the players. In the case where the declamation of the voice is interspersed with chords on the orchestra a downward stroke should be given for each chord. A return to measured music must be prepared for by a return to the ordinary method of beating time.[1] The following extract from Mendelssohn's 'Elijah' (full score p. 254) is a good example of this.

Ex. V.

(iv.) *The starting and finishing of a piece.* Before attempting to conduct a piece of music the conductor must, of course, have settled what tempi he is going to adopt. He must know by personal experience or tradition what is the usual tempo, and if he chooses to depart from such tradition he must be prepared to justify his innovation by results. Having settled the tempi he must have the opening tempo firmly fixed in his mind before he starts the piece, and he must settle each change of tempo to himself a few bars before it actually takes place. If there is any uncertainty on the part of the conductor there will be more on the part of the players. The actual starting of a piece is brought about by a preliminary up-beat in the exact time of the movement: a good start largely depends on the firmness of this preliminary beat. The ending of a piece, the 'cutting off' of the final pause is as important to a good rendering as a firm start. A pause is held by keeping the baton poised in the air; it is cut off by a slight sideways motion to the right.

(v.) *'Rubato' conducting.* A conductor must have the tempo clearly in his head, and he must *be able* to keep to it with metronomic accuracy, otherwise he can have no sense of time. But it does not follow that he should always keep rigidly to the initial tempo. 'Tempo rubato' is as necessary in orchestral music as in any other. This is a comparatively new idea: Mendelssohn, we are told by W. S. Rockstro, 'held tempo rubato in abhorrence.' It was Wagner who by his practice and his theory contended that 'modifications of tempo' are necessary to a living rendering of orchestral music.[2]

Orchestral rubato can easily be overdone; a mechanical slackening and quickening of tempo is almost worse than metronomic rigidity. Perfect orchestral rubato should be like the playing of a single performer, holding back or pressing on almost imperceptibly as his emotional impulse directs. This perfection cannot be achieved except by a permanent orchestra, at one with itself and with its conductor, and then only after long and careful rehearsals. In England we cannot expect to approach this ideal, however intelligent our players, and however imaginative our conductors, until we arrive at a system of permanent orchestras and much greater opportunity for rehearsals.

(vi.) Next comes the question of what is known as 'drill sergeant' conducting. Should a conductor absolutely rule his players, or should he allow scope to individual judgment? In passages for full orchestra, or where there are difficult combinations of rhythms, etc., the conductor should probably be quite autocratic. But where one instrument stands out prominently the conductor should usually, for the moment, treat the work as a concerto, and accompany the soloist. For those conductors who esteem a full tone in the orchestra this is essential, even at the expense of clearness in the subordinate parts. Those who have heard the 'Tannhäuser' overture under Herr Mottl will remember the noble sonority of the trombones at the first fortissimo. Herr Mottl having once indicated the tempo, allowed the trombones to play as they pleased, and kept the whole orchestra waiting on them. The trombonists, released from cramping obedience to the conductor's stick, were able to give the passage with tremendous force without sacrificing beauty of tone. It was a splendid piece of orchestral impressionism, though not satisfactory to those who value clearness of

[1] Berlioz describes a different method of conducting recitative, but the above is the method adopted by most conductors.

[2] Wagner invented this 'new style' of conducting during his conductorship at Dresden 1843-49, and codified his ideas in the famous *Ueber das Dirigiren* (1869).

detail. This license to individuals must be subordinate to the conductor's conception of the work as a whole. A story of Herr Nikisch rehearsing in London illustrates the proper balance to be maintained. Whenever an instrument had a solo he would sing the passage over to the player, saying, 'That is my idea of it, now play it as you like.'

(vii.) *Efficient management of a rehearsal.* The conductor's object must be to employ the time for rehearsal as usefully as possible. A conductor must recognise at once what are the difficult parts of a composition; what will require much rehearsal and what little. Orchestral players are very sensitive and naturally resent having their time wasted. The conductor must realise which mistakes may be passed over lightly as mere slips, which are radical and must be insisted on. Economy of time is especially important in England where a conductor often has to direct a 'scratch' orchestra collected for the purpose with only one rehearsal to prepare for a long programme. In such cases the conductor must be ready to seize on the essential points and let the rest take care of itself.

(viii.) *Correcting and annotating orchestral parts.* It is a conductor's duty to see that the parts are correct, and that any 'cuts' or other special marks are duly indicated. Some conductors add special bowing and breathing marks to the orchestral parts to produce a more perfect unanimity of rendering, while other conductors prefer to give their players more freedom. Together with this duty goes the responsibility of making certain alterations in the score of well-known works, such as Wagner's famous emendations in the Ninth Symphony, Richter's alteration of two trumpet passages in the Eroica Symphony, the changing of to in the bassoon part near the beginning of the 'Tannhaüser' overture, or the almost universal substitution of a bass clarinet for a bassoon in a certain passage in Tchaikovsky's Sixth Symphony.

It would be out of place to discuss here how far such alterations are justifiable; they are only mentioned here because it is a conductor's duty to know of these alterations, and to settle whether he will adhere to the original score or not.

B. The more ideal qualities of a conductor include the power of grasping a composer's true meaning, that of impressing himself on the members of the orchestra, and that indefinable power of giving life to music which belongs to all great players and conductors. The powers of interpretation in conductors have increased much in modern times; this is doubtless largely owing to the increased virtuosity of orchestral players, but it is chiefly because modern conductors have usually made a special study of the art of 'playing on the orchestra.' Up to the middle of the 19th century a fairly correct performance was all that a conductor expected of his players: now correctness is the minimum from which he starts.

The modern art of orchestral interpretation exhibits itself in two main lines. There are those conductors whose aim is faithfully to represent the composer's intention, and those who mirror themselves in the work they are conducting. A conductor of the first type would wish his audience to say not 'this is wonderful' but 'this is right.' Most of his work is done at rehearsal; during the performance he is merely on the watch to see that his directions are carried out.

The other type of conductor makes his mark by some new and personal light thrown on an old work. To watch such a conductor is like watching a great actor—every action is expressive and every nuance is guided by the inspiration of the moment. This 'personal' method of conducting is liable to great abuses in the hands of an incompetent artist. Every pettifogging band-master must now have his 'reading' of the great master-pieces. This 'reading' usually consists of a strict disregard for the composer's intentions coupled with a gross exaggeration of nuance and a distortion of the true rhythm, which has the same relation to real 'rubato' playing that barn-storming has to good tragic acting. Such a conductor as this last had much better confine himself to merely beating time; then, at all events, the audience will hear the notes and will be able to draw their own conclusions.

History of conducting. We can trace the history of conducting as far back, at least, as the 15th century, by which time it had become customary to beat time to the 'Sistine choir' at Rome with a roll of paper called a sol-fa. Ornithoparcus, writing in 1516, describes 'Tact' as 'a certain motion made by the hand of the chief singer, according to the nature of the marks, which motion directs a song according to measure.'[1] This proves that by the beginning of the 16th century the practice was universal, as also does a passage from Galilei's *Dialogo* (1583) where he mentions that the ancient Greeks did not beat time 'as is customary now.' In Morley's *Introduction* (1608) we find the following dialogue:—

'*Philomathes.* What is a stroke?

'*Magister.* It is a successive motion of the hand, directing the quality of every note and rest in the song, with equal measure, according to the variety of signs and proportions.'

With the decline of polyphonic music and the advent of clear and definite rhythms the office of time-beater gradually became less necessary, and as the idea of the conductor as interpreter was not yet born, the practice of directing music with the conducting-stick fell into disuse. How and when the change came about is doubtful,

[1] This quotation is from John Dowland's translation (1609); see also Hawkins's *History of Music*.

but by 1738 it was customary to direct opera performances sitting at the harpsichord. This was at all events the case in Italy, and probably in Germany, though at the Paris opera Rousseau expressly says it was habitual to beat time audibly by striking the baton against the desk.[1] As regards Germany we have Gesner's famous description of Bach [2] to prove that he, at all events, was in the habit of directing music, while he himself played the organ.

According to Carl Junker's pamphlet of 1782 the pianoforte (or 'flügel') was still an integral part of the orchestra, though in one passage he certainly refers to the musical director as a 'time-beater' (takt-schläger). However by the beginning of the 19th century the practice of beating time seems to have been firmly established in Germany, and from that time the art of conducting grew in importance. (See BATON.) Mendelssohn, during his conductorship of the Gewandhaus concerts (1835-43) exercised a great influence over orchestral renderings, and founded the 'Mendelssohn tradition' or the 'elegant school' of conductors, as its enemies called it.[3] This was, in its turn, superseded by the modern school of conductors, which may be said to have been founded by Richard Wagner. The pioneers of the new school were Hans von Bülow, Hans Richter, and Hermann Levi. Among their immediate successors are Arthur Nikisch, Fritz Steinbach, Felix Mottl, and Felix Weingartner.

The last fifty years have witnessed the growth of 'virtuoso' conducting which has been already described, and of specialisation in conducting; one conductor making a special study of the classical masters, another of Brahms or Tchaikovsky. About 1880 Von Bülow made a tour round Germany with the famous Meiningen Court orchestra, which made a great effect on orchestral playing all over the continent. These journeys have been carried on by his successor Herr Steinbach, who gave a memorable series of concerts in London in 1902, before retiring from the post of conductor to direct the Cologne Conservatorium.

In France, as we have seen, the practice of conducting never entirely dropped out; but orchestral playing was evidently at a very low ebb in the lifetime of Berlioz, as his memoirs testify. However, the conductor Habeneck achieved the distinction of being the subject of great praise from Wagner.[4] Berlioz's famous *Chef d'Orchestre* was published in 1848. In 1874 M. Colonne instituted the 'Concerts du Châtelet,' and in 1881 M. Lamoureux formed his famous orchestra which has since his death been conducted by M. Chevillard. M. Lamoureux's conducting was noticeable for an extreme clearness and precision of detail, which is almost unique in the history of orchestral playing.

History of conducting in England. The practice of conducting was revived much later in England than on the continent. As late as 1820 the concerts of the Philharmonic Society were directed by the joint efforts of the first violin, and a musician seated at the pianoforte, who struck a few notes if anything went amiss. In this year Spohr visited England, and when called upon to direct a Philharmonic concert insisted on doing so with the baton. His own account of the innovation is very instructive, and is worth quoting.—'I took my stand . . . in front of the orchestra, drew my directing baton from my coat pocket, and gave the signal to begin. Quite alarmed at such a novel proceeding some of the directors protested against it. . . . The triumph of the baton as a time-giver was decisive, and no one was seen any more seated at the piano during the performance of symphonies and overtures.'[5]

In 1855 the Philharmonic orchestra was conducted for one season by Richard Wagner, but this inestimable privilege was not recognised at the time, and Wagner was not engaged again. Indeed, the *Times* of 1860 goes out of its way to say that the season during which Wagner conducted was 'one of the most disastrous on record.'

Mention must be made of two conductors who had a great reputation in England in their lifetime. One was Jullien, who conducted orchestral concerts of the popular kind from 1842 to 1859. Jullien was of course to some extent a charlatan; but he had genuine ability of a kind, and in some ways foreshadowed the 'virtuoso' conductor of later times: he also deserves commendation for helping to popularise much good orchestral music. Much more famous than Jullien is Michael Costa, who conducted in England from 1833 to 1884. Perhaps the exaggerated respect paid to Costa during his life has caused too violent a reaction since his death. There can be no doubt that he was a very fine band-master, whatever may have been his shortcomings as an interpreter.

Between 1855 and 1860 two more or less permanent orchestras were founded in England, one by August Manns at the Crystal Palace, the other by Charles Hallé in Manchester. It is not the place here to speak of the magnificent work done by Mr. (now Sir August) Manns in bringing out new and unknown compositions for the first time in England at the famous 'Saturday concerts,' or of his ardent championship of the younger English composers. As a conductor Manns belongs to the school of those who seek to sink themselves in the work they are conducting.[6] What he did for the south of

[6] The Crystal Palace Orchestra was disbanded in 1901.

England, Hallé did for the north. The Hallé orchestra is now more flourishing than ever under Dr. Hans Richter.

The first series of 'Richter' concerts (London, 1879) is an important landmark in the history of English conducting. Richter revolutionised English ideas as to how classical music should be rendered, and made Wagner intelligible to English audiences for the first time. The advent of Richter may be said to have killed the 'Mendelssohn tradition' in England.

In 1893 a series of orchestral concerts was given, at which Herr Mottl, Herr Levi, and others, were specially engaged to conduct. The musical public awoke to the fact that a conductor can play on his orchestra just as a pianist can play on his instrument. The cult of the 'virtuoso' conductor became as fashionable as that of the Prima Donna. It is very much to the credit of these conductors who have been so 'ignorantly worshipped' that they have never let this fashionable flattery affect their musical ideals.

The latest important event in the history of English conducting has been the formation in 1897 of the 'Queen's Hall Orchestra,' under the conductorship of Mr. Henry J. Wood. This orchestra is not yet (1904) permanent in the best sense—that is, its members are not exclusively engaged—nevertheless, it is a step in the right direction. The great reputation of the orchestra, apart from the individual excellence of its members, is due to the training it has received from its conductor; and while he has taught his orchestra Mr. Wood has taught himself, and may now be reckoned as a first-rate conductor, not of one style alone, but of all. He has conclusively proved that an Englishman can become a good conductor if he has the proper opportunities, and striking as Mr. Wood's abilities are, one cannot help believing that there are many young English musicians who would become very capable conductors if they only had means of learning the art. Conducting can only be learnt at the conductor's desk. On the continent there are many small posts at opera-houses and in concert-rooms through which a young man can gradually rise to the front rank, and obtain an important post as 'capellmeister.' In England there are no such means of learning the art, and hardly any appointments to be gained at the end.

There are, however, signs of improvement. The Scottish orchestra, for instance, is doing splendid work in the north under the conductorship of Dr. Cowen, who is also conductor to the Philharmonic Society in London; at Bournemouth Mr. Dan. Godfrey has developed the municipal 'Town-band' into a first-class concert orchestra, where, every year, all the well-known orchestral music is performed, as well as many new and little-known compositions by British and foreign composers. It is to be hoped that the example of Bournemouth will soon be followed, and that every large municipality will support a local orchestra presided over by a resident conductor.

It may be useful to add a short account of some of the chief books and pamphlets on conducting:—

(i.) Johann Mattheson, *Der Vollkommene Capellmeister* (1739)—not a treatise on conducting, but a course of instruction in music for any one who aspires to become a musical director. The following passage is worth notice as an instructive commentary on conducting as we understand it now: 'How is the tempo of a musical piece to be known? Such knowledge cannot be explained in words; it is the highest perfection of the tonal art' (cf. Wagner).

(ii.) Karl Junker, *Einige der Vornehmsten Pflichten eines Kapellmeisters* (1782). Deals with the tuning arrangements and management of an orchestra, questions of tempo, etc. The book contains a disquisition on 'Rubato' conducting.

(iii.) Hector Berlioz, (*a*) *Le Chef d'Orchestre* (1848). An exhaustive text-book on the art of directing an orchestra, including diagrams to illustrate the various beats; the arrangement of an orchestra; conducting in a theatre, etc.

(*b*) *Voyage Musical* (No. 3, Letter to Liszt, 1844). Contains an interesting account of an imaginary rehearsal—the gradual growth of order out of chaos. An interesting sentence in relation to the views of Mattheson and Wagner is the following (where Berlioz complains of having to rehearse his works at half-speed): 'Nothing is more terrible for him (the composer) than this slackening of the rhythm.'

(iv.) Richard Wagner, (*a*) *Ueber das Dirigiren* (1869). English translation by Dannreuther (1887). The 'New School' of conducting is here set forth for the first time. The works of Beethoven, Mozart, and Weber are chosen as models on which to exhibit the new readings. Also very instructive hints on the renderings of some of Wagner's own works. The book is too well known to need further description.

(*b*) Wagner's notes on 'Iphigenia in Aulis' (1854) and on the performance of 'Tannhäuser' (1852), contains interesting instructions to the conductor (on the other hand the pamphlet on 'The Flying Dutchman' [1853] is entirely concerned with the principal actors).

(v.) Felix Weingartner, *Ueber das Dirigiren* (1896—a pamphlet). Not a text-book; it deals with the abuses of 'Tempo rubato' conducting in the hands of incompetent conductors, especially among the would-be imitators of Von Bülow.

(vi.) M. Kufferath, *L'Art de diriger l'Orchestre* (1891). A pamphlet consisting chiefly of an account of a rehearsal at Brussels conducted by Hans Richter.

(vii.) Carl Schröder (court-conductor at Sondershausen), *A Handbook on Conducting* (English translation, Augener & Co., 1891). A useful text-book.

The writer wishes gratefully to acknowledge the help and information kindly given him in preparing this article by Mr. Henry J. Wood and others. R. V. W.

CONDUCTOR'S PART. A substitute for a full score, in which the parts are condensed into two staves, and the names of the various instruments are inscribed as they enter. Spohr's D minor Symphony was published in this shape only.

CONDUCTUS, a form of composition employed in the 13th century, the distinguishing feature of which was that the tenor or canto fermo was not derived from the plain-song of the church, but was an original theme, or in some cases a popular melody, in triple measure, to which one or more parts were added by way of discant. The earliest definition that has come down to us is that given in the Discantus Positio Vulgaris (Coussemaker, *Scriptores*, i. 96):—'Conductus est super unum metrum multiplex consonans cantus, qui etiam secundarias recipit consonantias.' The word 'multiplex' here does not necessarily imply a composition in more than two parts. The primary consonances are the unison, octave, 5th, 4th, and major and minor 3rd. The secondary consonances are the 15th, 12th, 11th, and major and minor 10th (see Coussemaker, i. 362*b*). At a later date the major and minor 6th and 13th and occasional passing discords were admitted (*ib.* iii. 361*b*, iv. 212, 278, 294*b*). Franco tells us that the *modus operandi* in the conductus differed from that in all other forms of discant (cantilena, rondellus, motetus, organum):—'quia in omnibus aliis primo accipitur cantus aliquis prius factus qui tenor dicitur, eo quod discantum tenet, et ab ipso ortum habet. In conductis vero non sic, sed fiunt ab eodem cantus et discantus' (Coussemaker, i. 130*b*), and again:—'Qui vult facere conductum primum cantum invenire debet pulchriorem quam potest deinde uti debet illo ut de tenore faciendo discantum' (*ib.* 132*b*).

Walter of Odington, after defining Rondellus as a form of discant in which 'quod unus cantat, omnes per ordinem recitent,' adds:—'Si vero non alter alterius recitat cantum, sed singuli procedunt per certos punctus, dicitur Conductus, quasi plures cantus decori *conducti:* and he subsequently tells us:—'Conducti sunt compositi ex plicabilibus canticis decoris *cognitis vel inventis* et in diversis modis ac punctis *iteratis* in eodem tono vel in diversis' (Coussemaker, i. 245*b*, 247*a*), which points to a repetition of the subject in varied form and with varied discant. From Franco and others we learn that words were not sung in all parts of the conductus, for this is probably the meaning of the somewhat ambiguous expression 'cum littera et sine.' The compositions recently identified as conductus in MS. Plutarch, 29, 1 of the Laurentian Library at Florence have words written below the tenor part only; the short example given by Odington has no text.

The author of the early anonymous treatise in the British Museum, printed at p. 327 of Coussemaker's first volume, speaks of conductus simplices, duplices, and triplices, and gives the titles of specimens of each sort composed by the great Perotin himself. In 1898 these compositions were identified by Dr. Wilhelm Meyer of Göttingen in the Laurentian manuscript mentioned above, and Professor Wooldridge has now transcribed and printed several of them in the first volume of the *Oxford History of Music.*

The conductus appears to have fallen into disuse by the middle of the 14th century, for we find Johannes de Muris soon afterwards complaining that only motets and cantilenæ are heard nowadays, and deploring the loss of the 'conductos cantus ita pulchros in quibus tanta delectatio est, qui sunt ita artificiales et delectabiles duplices, triplices, et quadruplices.'

For a fuller account of this interesting early musical form the reader is referred to the *Oxford History of Music*, vol. i. *The Polyphonic Period*, pp. 245-318. J. F. R. S.

CONFORTI, GIOVANNI LUCA, was a Calabrian, and born at Mileto about 1560. He was admitted into the Papal Choir, Nov. 4, 1591. He was doubtless a successful and accomplished singer according to the fashion of his time: but his chief title to notice seems to have been the publication of a volume (*Passaggi sopra tutti i salmi*), containing a series of vocal ornamentations of all kinds wherewith to overlay the Psalms in ordinary use in the church on Sundays and holidays throughout the year. Baini ascribes to him what he considers the restoration of the 'trillo.' [TREMOLO; TRILLO.] E. H. P.

CONRADI, AUGUST, born at Berlin, June 27, 1821, studied harmony and composition under Runngenhagen. In 1843 he was appointed organist of the Invalidenhaus at Berlin, and produced a symphony; in 1847 an opera, 'Rübezahl,' was given at Berlin. In 1849 he was chapel-master at Stettin, and conductor successively at the Königstadt Theatre in Berlin (1851), at Düsseldorf, Cologne, and from 1856 again in Berlin at various theatres, such as Kroll's, the Wallnertheater, and Victoriatheater. In 1855 his 'Musa der letzte Maurenfürst' was performed at Berlin. His other compositions include five symphonies, overtures, string quartets, dance music for pianoforte and orchestra, and a quantity of Lieder. He died at Berlin, May 26, 1873. M. C. C.

CONRADI, JOHANN GEORG, capellmeister at Oettingen in Bavaria towards the end of the 17th century, one of the earliest composers of German opera. He produced successfully at the Hamburg Theatre 'Ariane' (afterwards added to by Reinhard Keiser and reproduced in 1722 as 'Ariadne'), 'Diogenes,' and 'Numa Pompilius' in 1691; 'Karl der Grosse' and

'Jerusalem' (1692); 'Sigismund,' 'Gensericus,' and 'Pygmalion' (1693). M. C. C.

CONSECUTIVE, the term applied to intervals which recur between the same parts or voices, but more especially to such as are forbidden to do so, as consecutive fifths, which everybody perceives to be ugly; or consecutive octaves, which are only perceived to be objectionable in a combination of distinct parts.

It is held that consecutive fifths are objectionable because the parts move simultaneously in two different keys; hence when the effect of two keys is avoided they are admissible; as when the lower part progresses from tonic to dominant (*a*) (between the tenor and bass); or from tonic to subdominant (*b*) (between treble and alto). (See DAY.)

Consecutive octaves are held to be objectionable because in music in parts which are clearly defined the balance is suddenly disturbed. For if three voices are singing together, each with a well-defined part assigned to it, and two of them suddenly, without any ostensible reason, sing the same notes in two or three successive chords, not only is the harmony weakened by the loss of a part, but the succession of notes which they sing together is brought into unseasonable prominence. When it is intended to bring a melody or a phrase into prominence it is common to double it in octaves; but when this is done in music in definite parts it must be continued long enough for the intention to be perceived.

Some theorists add consecutive sevenths to the category of forbidden progressions, but there are so many to be found in the works of the greatest masters, and when they are harsh they are so obviously so, that the rule seems both doubtful and unnecessary.

The forbidden consecutives are most objectionable in vocal music, or music for solo instruments in combination, such as quartets and quintets of strings, when each part stands out distinctly, and the relations of the parts are easily perceived. In pianoforte music and orchestral music the objectionable effect would be often lost in the mass of sound.

Instances of violations of the rule against consecutive fifths are to be found in the works of almost all the greatest composers. Sometimes it may have been an oversight, at others it may have been done on principle. Ries's well-known anecdote (*Biog. Notizen*, p. 87) referring to a passage in one of Beethoven's quartets, op. 18, may show either one or the other. Elsewhere Beethoven seems to have considered that it was better to violate such a rule or incur a considerable harshness than to change the order of a thoroughly established idea, because the alteration of the idea not only produces a sense of weakness, but is also much more disturbing æsthetically than the violation of a rule of harmony. Thus in the finale of his Sonata in A, op. 101, rather than alter his established idea (*a*), he allows the part below to make consecutive fifths with it (* *).

[An even more remarkable breach of rule occurs in the violin sonata in G, op. 96, where, at bar 37 of the slow movement, the bass of the piano part moves in octaves with the melody of the violin part.] C. H. H. P.

CONSERVATOIRE DE MUSIQUE. A free school of music, established in Paris by the Convention Nationale, August 3, 1795. Its first suggestion was due to a horn player named Rodolphe, and the plan which he submitted to the minister Amelot in 1775 was carried into effect on Jan. 3, 1784, by Baron Breteuil, of Louis XVI.'s household, acting on the advice of Gossec. This École royale de Chant, under Gossec's direction, was opened on April 1, 1784, in the Hôtel des Menus-Plaisirs du Roi, then used by the Académie for its rehearsals. The first public concert was given April 18, 1786, and on the addition of a class for dramatic declamation in the following June it adopted the name of the École royale de Chant et de Déclamation. The municipality engaged a band under Sarrette in 1790, and instituted on June 9, 1792, the École gratuite de Musique de la Garde Nationale Parisienne, which did good service under Sarrette's skilful direction, and finally took the name of Institut National de Musique, Nov. 8, 1793. But the independent existence of both these schools came to an end on the formation, by Government, of the Conservatoire de Musique, August 3, 1795, in which they were incorporated. Sarrette was shortly afterwards appointed president of the institution, and in 1797 his charge extended to 125 professors and 600 pupils of both sexes, as well as to the printing-office and warehouse established at 15 Faubourg Poissonnière, where the 'Méthodes du Conservatoire,' prepared under the supervision of Catel, Méhul, Rode, Kreutzer, and other eminent professors, were published. The organisation of the Conservatoire was modified by Bonaparte in March 1800, after which the staff stood as follows:—A Director: Sarrette. Five Inspectors of Tuition: Gossec, Méhul, Lesueur, Cherubini, and Monsigny. Thirty first-class Professors: Louis Adam, Berton, Blasius, Catel, Devienne, Dugazon, Duvernoy, Garat, Gaviniés, Hugot, Kreutzer,

Persuis, Plantade, Rode, Rodolphe, Sallentin, etc. Forty second-class Professors: Adrien, Baillot, Boieldieu, Domnich, Eler, Jadin, etc. The Conservatoire was again reorganised Oct. 15, 1812, by the famous Décret de Moscou, under which eighteen pupils, nine of each sex, destined for the Théâtre Français, received an annual allowance of 1100 francs, on the same footing with the Pensionnaires—eighteen vocal students, twelve male and six female. This Pensionnat had been established in 1806; but the men alone lived at the Conservatoire.

On Dec. 28, 1814, Sarrette was abruptly dismissed from the post he had filled with so much zeal and talent, and though reinstated on May 26, 1815, was compelled to retire finally on the 17th of the following November. The studies were interrupted for the time, and the school remained closed until April 1816, when it reopened under its former title of École royale de Musique, with Perne as Inspector-General. Cherubini succeeded him April 1, 1822, and remained until Feb. 8, 1842, when he was replaced by Auber, who directed the Conservatoire until his death, May 12, 1871; Ambroise Thomas was appointed on the 6th of the following July. On his death in 1896, he was succeeded by Théodore Dubois, the present director.

Before speaking of the Conservatoire of our own day, its financial condition, staff, and musical importance, we must enumerate some of the most remarkable acts which marked its successive administrations.

The budget originally amounted to 240,000 francs, but this in 1802 was reduced to 100,000, a fact indicative of the grave money difficulties with which Sarrette had to contend through all his years of office, in addition to the systematic opposition of both artists and authorities. By the publication of the *Méthode du Conservatoire* however, to which each professor gave his adherence, he succeeded in uniting the various parties of the educational department on a common basis. Amongst the savants of the institution who assisted in this work were Ginguené, Lacépède, and Prony. Under Sarrette the pupils were stimulated by public practisings; to him is also due the building of the old library, begun in 1801, and the inauguration of the theatre in the Rue Bergère, 1812. In the same year he obtained an increase of 26,800 francs for the expenses of the Pensionnat; and the institution of the 'Prix de Rome' in 1803, which secured to the holders the advantage of residing in Italy at the expense of Government, was his doing.

Under Perne's administration an 'École primaire de Chant' was formed, April 23, 1817, in connection with the Conservatoire, and directed by Choron. The inspectorship of the École de Musique at Lille was given to Plantade. In 1810 it adopted the title of 'Conservatoire secondaire de Paris,' in which it was followed by the École at Douai, no longer in existence. The formation of special classes for lyrical declamation and the study of opera parts was also due to Perne.

Cherubini's strictness of rule and his profound knowledge made his direction very favourable for the progress of the Conservatoire. The men's pensionnat was reorganised under him, and the number of public practices, which all prize-holders were forced to attend, increased in 1823 from six to twelve. By his means the opera pitch, universally allowed to be too high, was lowered in 1826, and the École de Musique founded at Toulouse in 1821 was attached to the Conservatoire, as that of Lille had previously been. He opened new instrumental classes, and gave much encouragement to the productions of the 'Société des Concerts du Conservatoire.' By his means the library acquired the right to one of the two copies of every piece of music or book upon music which authors and composers are compelled to deposit with the Ministre de l'Intérieur (March 29, 1834). In 1841, through Cherubini's instrumentality, the Écoles of Marseilles and Metz became 'Succursales du Conservatoire'; in short, during his long administration he neglected no means of raising the tone of the studies of the Central Conservatoire, and extending its influence. The following were among his principal coadjutors:—Habeneck and Paer, inspectors of tuition; Lesueur, Berton, Reicha, Fétis, Halévy, Carafa, composition; Lainé, Lays, Garat, Plantade, Ponchard, Banderali, Bordogni, Panseron, Mme. Damoreau, singing: instrumental classes—Benoist, the organ; Louis Adam and Zimmerman, piano; Baillot, Kreutzer, Habeneck, violin; Baudiot, Norblin, Vaslin, violoncello; Guillou, Tulou, flute; Vogt, oboe; Lefèvre, Klosé, clarinet; Delcambre, Gebauer, bassoon; Dauprat, Meifred, horn; Dauverné, trumpet; Dieppo, trombone; Naderman, Prumier, harp; Adolphe Nourrit, the opera; Michelot, Samson, Provost and Beauvallet, professors of tragedy and comedy.

Amongst the professors appointed by Auber we may mention Adolphe Adam, Ambroise Thomas, Reber, composition; Elwart, Bazin, harmony; Battaille, Duprez, Faure, Garcia, Révial, Masset, singing; Madame Farrenc, Henri Herz, Marmontel, Le Couppey, piano; Alard, Girard, Massart, Ch. Dancla, violin; Franchomme and Chevillard, violoncello. Classes for wind instruments—Tulou, Dorus, flute; Verroust, oboe; Willent, Cokken, bassoon; Gallay, Meifred, horn; Forestier, Arban, cornet; Mlle. Brohan, MM. Regnier, Monrose, Bressant, professors of comedy. Auber also instituted lectures on the history and literature of music, to which he appointed Samson in 1855. The débuts under Auber's management were most brilliant, and he drew public attention to the Conservatoire by reviving the public practices. The façade of the establishment in the Faubourg Poissonnière was rebuilt in 1845, and in 1864

the building was considerably enlarged, and those in the Rue du Conservatoire inaugurated, including the hall and offices of the theatre, the museum, and library. The associate classes of military pupils, formed on the suppression of the Gymnase militaire in 1856, made these enlargements indispensable.

But notwithstanding the growing importance of the Conservatoire under Auber's strict and impartial direction, the last years of his life were embittered by the revival of the office of 'Administrateur' in the person of Lassabathie, and the appointment of a commission in 1870 to reorganise the studies—a step in which some members foresaw the ruin of the school. In 1859, at the beginning of this troubled period, the reform of the pitch took place which fixed the A at 870 vibrations. Lassabathie at the same time published his *Histoire du Conservatoire impérial de Musique et de Déclamation* (Paris, 1860), a hasty selection of documents, but containing ample details as to the professorial staff.

During the régime of Ambroise Thomas, the office of 'Administrateur' and the pensionnat were suppressed; lectures on the general history of music were instituted; an orchestral class directed by M. Deldevez, and compulsory vocal classes for reading at sight were founded, and the solfeggio teaching was completely reformed. Ambroise Thomas endeavoured to improve the tuition in all its branches, to raise the salaries of the professors, and increase the general budget, which now reaches 256,000 francs—a sum amply sufficient for the expenses of the Institution with its staff of 8 titularies, 77 professors, and 10 employés.

[At the present time (1904) the Chief Council of Instruction is formed of the following persons: the Minister of Public Instruction and Fine Arts, the Director of Fine Arts, the Director of the Conservatoire; the 'Chef du Bureau des Théâtres'; the Inspector-General for the subventioned theatres; the chief secretary; and of the following professors of the Conservatoire:—(for musical studies), E. Reyer, J. Massenet, C. Saint-Saëns, Paladilhe, Ch. Lenepveu, Joncières, E. Réty, Widor, Taffanel, Alph. Duvernoy, Crosti, and Lefort; (for dramatic studies), V. Sardou, L. Halévy, J. Lemaître, J. Claretie, Lavedan, Mounet-Sully, de Féraudy, and Silvain.

The chief secretary is F. Bourgeat, and the assistant secretary C. Pierre. Professors of composition, counterpoint, and fugue: Lenepveu, Widor, and Fauré. Musical History: Bourgault-Ducoudray. Harmony: Pessard, Taudou, Lavignac, Leroux, Chapuis, and Rousseau. Accompaniment: Vidal. Singing: Mme. Rose Caron, MM. Jean Lassalle, Warot, E. Duvernoy, Masson, Mansury, Dubulle, and de Martini. Vocal Ensemble: G. Marty. Besides these there are some sixteen professors and subprofessors of 'Solfège,' for vocal and instrumental pupils of each sex. Lyric declamation (Opéra), Melchissédec, Lhéric; (Opéra Comique) Isnardon, Bertin. Dramatic Declamation: Silvain, de Féraudy, Leloir, Le Bargy, Berr, P. Mounet. History and Dramatic Literature: Fouquier. Theatrical gesture, etc.: H. de Soria, Mlle. E. Parent. Fencing: Merignac. Instrumental Music: (Ensemble Class) Taffanel. Do. for Chamber Music: Lefebvre. Organ and Improvisation: Guilmant. Piano: Diémer, Philipp, for male pupils; Delaborde, Duvernoy, and Marmontel, for female pupils, besides elementary teachers. Harp: Hasselmans. Violin: Lefort, Berthelier, Rémy, Nadaud (and preparatory teachers). Viola: Laforge. Double-bass: Charpentier. Flute: Taffanel. Oboe: Gillet. Clarinet: Turban. Bassoon: Bourdeau. Horn: Brémond. Cornet-à-pistons: Mellet. Trumpet: Franquin. Trombone: Allard.]

The names of those seeking admission to the Conservatoire must be sent in to the committee of management at the beginning of October, and an examination before the Committee of Tuition must be successfully passed. The youngest pupils only are admitted into the preparatory solfeggio and piano classes; in the higher classes, for vocal music and declamation, the age is limited to twenty-two. The pupils have to pass two examinations in each academic year, and take part in one or more public practices; they are also admitted to the July competitions according to their ability. The competitions in singing, opera, opéra-comique, tragedy, comedy, and instrumental music, are held publicly in the large concert-room. The distribution of prizes follows, under the presidency of the Minister of Public Education and Fine Arts.

This important institution provides musical and dramatic instruction for upwards of 600 pupils and 'auditeurs,' who, besides their regular studies, have the advantage of an extensive library and a museum of musical instruments.

The Library, which dates from the foundation of the school itself, is open to the public daily from 10 to 4. The first librarian, Eler, was followed by Langé (1796-1807), the Abbé Roze (1807-1820), Perne (1820-1822), Fétis (1827-1831), Bottée de Toulmon (1831-1850), Berlioz (as conservateur 1839-1850, and as librarian 1852-1869), Félicien David (1869-1876). Since 1876 M. Weckerlin has acted as librarian.

The Library contains over 30,000 works, and the number is increased every year by means of a special grant. It also possesses a considerable number of manuscripts and autographs, to which those of the Prix de Rome were added in 1871, through the efforts of the writer. This collection contains the autographs of all the prize cantatas since the foundation of the Prix de Rome in 1803. Amongst the other important collections are those of Eler, composed of works of the 16th and 17th centuries put into score; of Bottée de

Toulmon, comprising 85 volumes of MS. copies of the chefs-d'œuvre of the 14th, 15th, and 16th centuries from Munich, Vienna, and Rome, including all Palestrina's masses. Unfortunately, most of these compositions are written in 'proportional notation,' and are still in separate parts. The departments of engraved opera scores and of vocal and instrumental *méthodes* are very complete. In 1872 the library was further enriched by Schœlcher's collection, containing every edition of Handel's works and a vast array of Handel-literature. The number of dramas is 6000 and increasing daily, and the department of works on the art and history of music contains many thousand French and foreign volumes. Amongst these are some extremely rare works, *El Melopeo* by Cerone; treatises by Agricola, Luscinius, Praetorius, Mersenne; several editions of Gafori; *Il Transilvano* by Diruta; original editions of most of the old clavecinists; *L'Orchésographie* of Thoinot Arbeau; the 'Ballet Comique de la Reine'; the *Flores musice* of 1488; old missals and treatises on plain-chant; besides other very rare and valuable books and *méthodes*.

The Museum, inaugurated 1864, is open to the public on Mondays and Thursdays from 12 to 4. At first it merely contained the 230 articles which the Government had purchased from Clapisson in 1861, and 123 musical instruments transferred from the Garde Meubles and other State institutions, or presented by private donors. On the appointment of Gustave Chouquet, Sept. 30, 1871, the number of objects did not exceed 380, but it now possesses 700 instruments and objects of art of the greatest interest. [He was succeeded as conservateur du musée by M. Léon Pillaut, who died in Dec. 1903.] A full historical catalogue was published by M. Chouquet, entitled *Le Musée du Conservatoire national de Musique* (Paris, F. Didot, 1875: 8vo). [The early history of the Conservatoire is to be found in Constant Pierre's *B. Sarrette et les origines du Conservatoire de musique et de déclamation* (Paris, 1895).]

The Conservatoire itself suffers from want of room. In the Faubourg Poissonnière, No. 15, are the offices of the administration, the entrance to the small theatre, where not only the examinations, but the classes for choral singing and dramatic declamation, lessons on the organ, and lectures on the history of music are held. Two smaller theatres serve for solfeggio and opera classes. In the large theatre the Société des Concerts du Conservatoire has held its concerts since its creation; it also serves for the public practices, the competitions, and the distribution of prizes. It was restored and decorated in the Pompeian style in 1864; and contains only a thousand seats. [See CONCERT INSTITUTIONS IN PARIS.]

[There are affiliated schools of music (Écoles succursales) at Dijon (dir. Lévèque), Lille (dir. Ratez), Lyons (dir. Savard), Nancy (dir. Guy Ropartz), Nantes (dir. Weingaertner), Perpignan (dir. Baille), Rennes, and Toulouse (dir. Croce-Spinelli). In 1871 Henri Reber succeeded Ambroise Thomas as inspector of these provincial schools, and at present M. Reyer is Inspector-General, with MM. Lenepveu, Joncières, H. Maréchal, Canoby, and G. Fauré, as assistant inspectors.] G. C.; with additions in square brackets by G. F.

CONSERVATORIO. The Conservatori in which the great schools of Italian music were formed were so called because they were intended to preserve (*conservare*) the science of music from corruption. Of these the most ancient were the four Neapolitan schools, Santa Maria di Loreto, San Onofrio, De' Poveri di Gesù Cristo, and Della Pietà de' Turchini, which all sprang from the first school of music founded at Naples before 1490 by Jean Tinctor, a Fleming, reconstituted by Gesualdo, Prince of Venosa, and Alessandro Scarlatti, and illustrated by a long roll of eminent musicians. [See NAPLES and TINCTORIS.]

The Conservatori of Venice arose out of the school founded by another Fleming, Willaert, at the same date with that of Naples, and were also four in number:—L' Ospedale della Pietà, Dei Mendicanti, Degl' Incurabili, L' Ospedaletto de' SS. Giovanni e Paolo. [See VENICE.] Nor does this list include the various 'chapel schools' of music for the choirs of the great cathedrals, after the pattern of the musical school founded in the 6th century by Gregory the Great for the Pontifical Chapel at Rome, the archives of which were destroyed in the sack of Rome by Charles V. 1527. [See ROME.]

The Venetian Conservatori have ceased to exist, those of Naples are now represented by a Royal Neapolitan College, and there is a 'Reale Conservatorio di Musica' extant and flourishing at Milan.

The Conservatoire of Paris is described in the preceding article. The other schools of importance will be found under the names of the cities to which they belong, excepting those of Berlin, for which see HOCHSCHULE, and of London, for which see GUILDHALL SCHOOL, ROYAL ACADEMY, ROYAL COLLEGE, and TRINITY COLLEGE. C. M. P.

CONSOLE. The manuals, drawstops, pedals, and accessories of the organ, taken as a whole, and as distinct from the actual pipes and bellows.

CONSONANCE is a combination of notes which can sound together without the harshness which is produced by beats disturbing the smooth flow of the sound.

The consonances which are within the limits of the octave, and the ratios of the vibrational numbers of their notes, are—

The octave	1:2	Minor third	5:6
Fifth	2:3	Major sixth	3:5
Fourth	3:4	Minor sixth	5:8
Major third	4:5		

C. H. H. P.

CONSTRUCTION is the writing of a piece of music according to an appreciable plan.

The element of construction is most important in instrumental music, where there is no accessory interest to keep the mind engaged. In all music connected with words the definiteness of construction must yield to the order of the language, and be dependent on what it expresses for the chief part of its effect; but in instrumental music it would be impossible for the mind to receive a satisfactory impression from a work which was purely continuous, and had no such connection between its parts as should enable the hearer to refer from one part to another, and thereby assist his attention. The only manner in which the sense of proportion and plan, which is so important in works of art, can be introduced into music is by repetition of parts which shall be distinctly recognised by the rhythm and order of succession of their notes, and are called the subjects. And the construction of a fine movement is like that of a grand building in which the main subjects are the great pillars upon which the whole edifice rests, and all the smaller details of ornamentation are not just an irregular medley of ill-assorted beauties, but being reintroduced here and there, either simply or disguised with graceful devices, give that unity and completeness to the general effect which the absence of plan can never produce. As instrumental music grows older new plans of construction are frequently invented, especially in small lyrical pieces, which imitate more or less the character of songs, or represent some fixed and definite idea or emotion, according to the supposed order or progress of which the piece is constructed. In small pieces for single instruments originality of plan is generally an advantage; but in large forms of instrumental composition it is most desirable for the general plan to be to a certain extent familiar, though it is on the other hand undesirable that it should be very obvious. The former strains the attention too heavily, the latter engages it too slightly. An account of the plans most generally used for such large instrumental works as symphonies, concertos, overtures, sonatas, etc., will be found in the article FORM. C. H. H. P.

CONTI, FRANCESCO BARTOLOMEO; eminent theorbist and dramatic composer, born at Florence, Jan. 20, 1681, appointed court-theorbist at Vienna in 1701. He resigned in 1705, but was reappointed theorbist in 1708, with the additional post in 1713 of court-composer. From this time he devoted himself with marked success to the composition of operas, especially the higher kind of comic operas. His best work was the tragicomic opera 'Don Chisciotte in Sierra Morena,' which is a model of its kind for the clear delineation of each separate character. It was performed first at the Carnival of 1719 in Vienna, and afterwards (1722) at Hamburg, in German. His first opera, 'Clotilde' (Vienna, 1706), was produced in London (1709), and the songs published separately by Walsh. Conti's cantatas and oratorios are solid and thoughtful. The catalogue in Eitner's *Quellen-Lexikon* comprises sixteen grand operas, thirteen serenades or 'Feste teatrali,' and nine oratorios, the scores of which are to be found almost entire in the Imperial Library and in the archives of the Gesellschaft der Musik-freunde at Vienna. Mattheson, in his *Vollkommene Kapellmeister* (1739, p. 40), casts a grave slur on Conti's character through a confusion between him and his son Ignaz. The mistake was corrected by Quantz in Marpurg's *Histoire-kritische Beiträge* (1754, vol. i. p. 219), and by Gerber in his *Neues Lexicon*, but Fétis maintained the authenticity of the anecdote in the *Revue musicale* (1827, No. 3), and even repeated it in his *Biographie Universelle* after the real facts had been made known by Molitor in the *Allg. musik. Zeitung* (1838, p. 153). Conti died in Vienna, July 20, 1732. The younger Conti, Ignaz, whom Fétis is uncertain whether to call the son or the brother of Francesco, was really his son, born in 1699. He held the post of 'Hof-scholar' from 1719 up to the time of his death, March 28, 1759, and composed several serenades and oratorios which bear no traces of his father's ability. C. F. P.

CONTI. See GIZZIELLO.

CONTINUO. The short for BASSO CONTINUO, which see.

CONTRA. A prefix of which the musical meaning is 'an octave below.'

CONTRABASSO, the Italian for DOUBLE BASS.

CONTRABASS POSAUNE. See TROMBONE.

CONTRABASS TUBA. See BOMBARDON.

CONTRA-FAGOTTO. See DOUBLE BASSOON.

CONTRALTO. The lowest of the three principal varieties of the female voice (the two others being soprano and mezzo-soprano), and that to which in choral music the part next above (*contra*, or counter to) the alto is assigned. [ALTO.] The culture and employment, as a solo instrument, of the female contralto voice, like that of its correlative the bass, is comparatively modern, and even yet not universal. By the opera composers of France and Germany it has been, and still continues to be, but rarely employed. In his adaptation for the French Theatre of his Italian 'Orfeo,' originally composed (1762) for a contralto, Gluck transposed and otherwise re-cast the music of the title-character for a tenor. It is to Rossini and his Italian contemporaries that this voice owes its present very important status. In few of their operas is it unemployed. In the choral music however of the composers of all nations it has now definitively taken its place—till lately monopolised, in England especially, by the male counter-tenor, a voice of somewhat dif-

ferent compass and altogether different quality. [ALTO.] In extent the contralto voice sometimes exceeds every other, male or female. Like the bass it has a third register, but far more frequently and successfully brought under control. A contralto has been known to possess an available compass of three octaves. Its most effective notes however, and those only which it is safe to employ in choral music, are the notes which can be placed on the stave (unfortunately obsolete) which has the C clef on the second line—from the G below middle C to the octave above the latter —incorrectly called the Mezzo-soprano stave. Though not so penetrating as the soprano, the contralto voice surpasses it in tenderness and in volume; and even, which is more remarkable, in flexibility, recent contralti have certainly equalled, perhaps surpassed, vocalists of every other class. As examples of singers in the full acceptation of the term the names of Grassini, Pisaroni, Brambilla, and Alboni, all contralti, have become historical. J. H.

CONTRAPUNTAL is properly that which is written according to the rules of strict Counterpoint. (See COUNTERPOINT and STRICT COUNTERPOINT.)

CONTRARY MOTION is the progression of parts in opposite directions, one or more ascending while the other or others descend, as—

In contrapuntal music it was considered preferable to similar or oblique motion, and it always has a stronger and more vigorous character than either of these. Many conspicuous examples of its use in modern music may be found, as for instance in the slow movement of Beethoven's Symphony in C minor—

Passing notes are allowed to progress continuously by contrary motion until they arrive at notes which form a part of some definite harmony (*), as—

from the first movement of Beethoven's Sonata in B♭, op. 106. C. H. H. P.

CONTREDANSE (Engl. *country-dance*, Ger. *contretanz*). A dance of English origin, which was introduced into France in the Regency, 1715-23, and has since become very popular. The music to the contredanse is of a lively character; it is written either in 2-4 or in 6-8 time, and consists uniformly of eight-bar phrases, each of which is usually repeated. [The name is a corruption of the English COUNTRY DANCE, which see.]

Beethoven has written twelve contredanses for orchestra, from one of which he developed the finale of his 'Eroica' symphony. Mozart has also left a large number of specimens of this class of composition. A series of five or six contredanses forms a QUADRILLE. E. P.

CONVERSI, GIROLAMO, was born at Correggio about the middle of the 16th century, and is known as the author of the following works:— Canzoni a 5 voci; Venice, G. Scotto, 1572; reprinted by the same publisher in 1573, 1575, 1578, 1580, 1585, and 1589; Madrigali, a 6 voci, lib. 1; Venice, 1584; *ibid.* in 4to. Conversi is familiar to English amateurs through his fine Madrigal, 'When all alone my pretty love was playing.' E. H. P.

COOKE, BENJAMIN, Mus.D., the son of Benjamin Cooke, a music publisher in New Street, Covent Garden, was born in London, 1734. In his ninth year he was placed under the instruction of Dr. Pepusch, and made such rapid progress as in three years' time to be able to act as deputy for John Robinson, organist of Westminster Abbey. In 1752 he was appointed successor to Dr. Pepusch as conductor at the Academy of Ancient Music. In September 1757, on the resignation of Bernard Gates, he obtained the appointment of master of the choristers of Westminster Abbey, and on Jan. 27, 1758, that of lay vicar there. On July 1, 1762, on the death of Robinson, Cooke was appointed organist of the Abbey. In 1775 he took the degree of Doctor of Music at Cambridge, and in 1782 was admitted to the same degree at Oxford. In the latter year he was elected organist of St. Martin-in-the-Fields. He was an assistant director at the Handel Commemoration in 1784. In 1789 he resigned the conductorship of the Academy of Ancient Music to Dr. Arnold. He died in London, Sept. 14, 1793, and was buried in the west cloister of Westminster Abbey, where a mural tablet, with a fine canon (see AUGMENTATION), records his skill and worth. Dr. Cooke's compositions, which are voluminous, are for the church, concert-room, and chamber. For the theatre he produced nothing except an ode for Dr. Delap's tragedy, 'The Captives,' 1786. His church music comprises the fine service in G [written for the reopening of the Abbey organ after the addition of the pedal organ (by Avery), West's *Cathedral Organists*], and one composed in 1787 at the request of Lord Heathfield for the use of the garrison in Gibraltar; two anthems composed in 1748 and 1749 for the Founder's day at the Charter House; an anthem with

orchestral accompaniments for the funeral of William, Duke of Cumberland, 1764; another of the same description, for the installation of the Bishop of Osnaburg, afterwards Duke of York, as Knight of the Bath, 1772; and fourteen others, besides several chants and psalm and hymn tunes. For the Academy of Ancient Music he added choruses and accompaniments to Pergolesi's 'Stabat Mater,' 1759, and to Galliard's 'Morning Hymn' (printed 1772); and composed an Ode for Christmas Day, 1763; 'The Syrens' Song to Ulysses'; Collins's Ode on the Passions (printed 1784); an Ode on Handel, 1785; Ode on the Genius of Chatterton, 1786; and Ode on the King's recovery, 1789. But the compositions by which he is best known, and which will convey his name to posterity, are his numerous and beautiful glees, canons, etc. For seven of these (five glees, a canon, and a catch) the Catch Club awarded him prizes. Dr. Cooke published in his lifetime a collection of his glees, and a second collection appeared in 1795 under the care of his son Robert. Twenty-nine glees, and eleven rounds, catches and canons by Dr. Cooke are printed in Warren's collections. His instrumental compositions consist of organ pieces, concertos for the orchestra, marches, and harpsichord lessons. Apart from his eminence as a composer and practical musician, Dr. Cooke was one of the best and most learned theorists of his time. W. H. H.

COOKE, HENRY—'Captain Cooke'—was born at Westminster at the beginning of the 17th century, and educated in the Chapel Royal of Charles I. On the breaking out of the Civil War he joined the King's army, and obtained, in 1642, a captain's commission. During the Commonwealth he subsisted by teaching music. On the re-establishment of the Chapel Royal in 1660, Cooke was appointed one of the gentlemen and master of the children. In 1663 he obtained a grant for himself and his successors of £30 per annum for the diet, lodging, washing, and teaching of each of the children of the chapel. In July 1664 he was appointed 'Composer of the King's private music for voices,' at a yearly salary of £40. He was Marshal of the Corporation of Musicians in 1670. Cooke died July 13, 1672, and was buried on July 17 in the east cloister of Westminster Abbey. Anthony Wood asserts that his death was hastened by chagrin at finding himself supplanted in favour by Pelham Humfrey, who had been his pupil. Cooke retained the title of 'captain' until his death. He composed several anthems, the words of which are contained in Clifford's collection, and a processional hymn which was performed at Windsor at the festival of the Knights of the Garter, April 17, 1661. He composed all the special music for the coronation of Charles II. April 23, 1661. He also contributed some of the music to Davenant's 'First Day's Entertainment at Rutland House' in 1656. W. H. H.

COOKE, NATHANIEL, born at Bosham, near Chichester, in 1773, was nephew of Matthew Cooke, organist of St. George, Bloomsbury, from whom he received the chief part of his musical education. He became organist of the parish church of Brighton, for the use of the choir of which he published a Collection of Psalm and Hymn tunes, including some of his own compositions, which long continued in favour. He also published some small pieces for the pianoforte, and died after 1820. W. H. H.

COOKE, ROBERT, born at Westminster in 1768, son of Dr. Benjamin Cooke, succeeded his father, on his death in 1793, as organist of St. Martin-in-the-Fields. On the death of Dr. Arnold, in 1802, he was appointed organist and master of the choristers of Westminster Abbey. In 1814 he unfortunately became deranged, and in a paroxysm of his disorder drowned himself in the Thames, August 13. He was buried in the west cloister of Westminster Abbey. Robert Cooke composed an Evening Service in C and an anthem, 'An Ode to Friendship,' and several songs and glees. Three of the latter obtained prizes at the Catch Club. A collection of eight of his glees was published by the author in 1805. W. H. H.

COOKE, THOMAS SIMPSON, familiarly known as Tom Cooke, was born in Dublin in 1782. Evincing early a taste for music he studied under his father [Bartlett Cooke, a famous oboe player in the band of the Smock Alley Theatre.—W. H. G. F.], and made such rapid progress as to perform in public a violin concerto when only seven years of age. He received instruction in composition from Giordani. When only fifteen he was appointed leader of the band at the theatre in Crow Street, Dublin, in which situation he continued several years, and composed several musical pieces. [At the same time he kept a music shop in Dublin, from 1806 to 1812.—W. H. G. F.] On one of his benefit nights he announced himself to sing the tenor part of the Seraskier, in Storace's opera 'The Siege of Belgrade,' an experiment which proved quite successful, and led to his removal to London, where he made his first appearance, in the same character, at the English Opera House, Lyceum, on July 13, 1813. On Sept. 14, 1815, he appeared as Don Carlos in 'The Duenna,' at Drury Lane Theatre, where he continued as a principal tenor singer for nearly twenty years. During this period, on one of his benefit nights, he exhibited the versatility of his talents by performing in succession on the violin, flute, oboe, clarinet, bassoon, horn, violoncello, double bass, and pianoforte. In 1821 he was called 'director of the music at Drury Lane Theatre' (*Quarterly Mus. Mag.*). About 1823 he undertook, alternately with his duty as tenor singer, the duty of leader of the band. In 1828-30 he was one of the musical managers of Vauxhall Gardens. Some years later he was engaged, at

Drury Lane and Covent Garden, as director of the music and conductor. He was a member of the Philharmonic Society, and occasionally led the band or conducted the concerts. For several years he held the post of principal tenor singer at the chapel of the Bavarian Embassy, a post he relinquished in 1838. In 1846 he succeeded John Loder as leader at the Concert of Antient Music. He died at his house in Great Portland Street, Feb. 26, 1848, and was buried at Kensal Green cemetery. Cooke's compositions were numerous and varied. He wrote much for the theatre, but his music of that description has mostly passed out of memory. As a glee composer he was more successful, and several of his compositions of that class obtained prizes from the Catch and Glee Clubs. As a singing-master he had a deserved reputation, and several of his pupils achieved distinction; amongst them Miss M. Tree, Mrs. Austin, Miss Povey, Miss Rainforth, the Misses A. and M. Williams, and Mr. Sims Reeves. He wrote a treatise on singing, which was much esteemed. Cooke's principal dramatic pieces were:—

Frederick the Great, 1814; The King's Proxy, 1815; The Count of Anjou, 1818; A Tale of Other Times (with Bochsa), 1822; The Wager, or, The Midnight Hour, 1825; Abu Hassan (adapted from Weber), Oberon, or, The Charmed Horn, 1826 (ditto); The White Lady (from Boieldieu), October 1826; Malvina, 1826; The Boy of Santillane, 1827; Isidore de Merida (from Storace), 1828; The Brigand, 1829, one song in which, 'Gentle Zitella,' attained great popularity; Peter the Great, 1829; The Dragon's Gift, 1830; The Ice Witch, 1831; Hyder Ali, 1831; St. Patrick's Eve, 1832; King Arthur and the Knights of the Round Table, 1835; additional songs for A Midsummer Night's Dream, 1840. He arranged Airs and Galatea for the stage in 1842, and produced The Follies of a Night in 1845.

His adaptations of foreign operas conformed to the fashion in vogue in his time, *i.e.* he omitted much that the composer wrote, and supplied its place by compositions of his own. He published 'Six Glees for three and four voices' in 1844, besides many singly. Among his glees which gained prizes were 'Hail! bounteous Nature,' 1829; 'Come, spirits of air,' 1830; 'Let us drain the nectared bowl,' 1830; 'Thou beauteous spark of heavenly birth,' 1832; 'O fair are thy flowerets,' 1836; he likewise obtained a prize for his catch, 'Let's have a catch and not a glee,' 1832. Cooke had considerable abilities as a wit and humorist. His eldest son, Henry Angelo Michael (commonly known as Grattan) Cooke, born 1809, was educated in the Royal Academy of Music, 1822-28, and for many years held the post of principal oboe in all the best orchestras, and was band-master of the second regiment of Life Guards, 1849-56. [He died at Harting, Sussex, Sept. 12, 1889. *Brit. Mus. Biog.*] W. H. H.

COOMBE, William Francis, son of a singing-master at Plymouth, was born there in 1786. Commencing his musical studies under his father, he subsequently prosecuted them under Churchill, and finally under Jackson of Exeter. In 1800 he obtained the appointment of organist of Chard, which he in two years resigned for that of Totnes, which he in turn gave up, after holding it for nine years, for the like place at Chelmsford, 1811-22. He published several pianoforte pieces of his composition, and died about 1850. W. H. H.

COOMBS, James Morris, was born at Salisbury in 1769. He was a chorister of the cathedral in 1776-84 under Dr. Stephens and Parry. In 1789 he was appointed organist at Chippenham, and retained that place until his death, March 7, 1820. His published works consist of a Te Deum and Jubilate, songs, glees, a set of canzonets, and a selection of psalm tunes. W. H. H.

COOPER, George, son of the assistant organist to St. Paul's; born in Lambeth, July 7, 1820. His quickness of ear, readiness of execution, and taste for good music, developed themselves very early, and his road to the organ was smoothed by an old harpsichord with pedals and two rows of keys, on which the lad practised at all available times. When eleven years old he often took the service at St. Paul's for his father, and at the Festivals of the Sons of the Clergy it was the delight of Attwood (then chief organist) to make him extemporise. On one such occasion Mendelssohn is said to have remarked and praised him. At thirteen and a half he was made organist of St. Benet, Paul's Wharf. On Attwood's death he became assistant organist of St. Paul's, *vice* his father resigned; in 1836 organist of St. Ann and St. Agnes; and on the death of his father, in 1843, succeeded him at St. Sepulchre's, and became singing-master and organist to Christ's Hospital as well. On the death of J. B. Sale, in 1856, he was appointed organist of the Chapel Royal, He died in London, Oct. 2, 1876, much regretted.

Cooper did much to familiarise his hearers with the works of Bach and other great composers, which he played in a noble style. His *Organ Arrangements*, *Organist's Manual*, and *Organist's Assistant*, are well known, and so is his *Introduction to the Organ*, long the only work of its kind in England. These were his only publications of any moment. He had a strong taste for natural science, and divided his time between the organ, his ferns, and photography.

COOPER, Richard. Notable as the first who engraved music in Scotland, his earliest work being the small oblong volume of music which Allan Ramsay, about 1725, issued as a companion to his *Tea-Table Miscellany*. This work is now so scarce that it is doubtful if more than one perfect copy exists; its title is 'Musick for Allan Ramsay's Collection of Scots Songs, set by Alexander Stuart . . . engraved by R. Cooper.' Other early Scottish collections engraved by Cooper are: Adam Craig's, 1730; Oswald's 'Minuets,' advertised in 1734; M'Gibbon's 'Six Sonatas,' 1740; and his 'Collections of Scots Tunes,' three books, 1742, 1746, and 1755. Besides music-engraving, Cooper did other work, including the fine

portrait of Allan Ramsay prefixed to an edition of his 'Poems' in 1728. The *Scots Magazine* records the death of Cooper, which occurred on Jan. 20, 1764. F. K.

COPERARIO, JOHN, was an Englishman named Cooper, who, having Italianised his name during a sojourn in Italy before 1604, continued the use of it after his return to England. He was a composer for and performer on the lute and viol da gamba, and the musical instructor of the children of James I. In 1606 he published 'Funeral Teares for the Death of the Right Honorable the Earle of Devonshire: figured in seaven songes, whereof sixe are so set forth that the wordes may be exprest by a treble voice alone to the Lute and Base Violl, or else that the meane part may be added, if any shall affect more fulnesse of parts. The seaventh is made in forme of a Dialogue and can not be sung without two voyces.' He composed the music to 'The Masque of the Inner Temple and Graye's Inn,' performed at Whitehall, Feb. 20, 1612-13. In 1613 he published 'Songs of Mourning bewailing the untimely death of Prince Henry. Worded by Tho. Campion and set forth to bee sung with one voyce to the Lute or Violl.' He contributed three of the songs to the masque performed at Whitehall on St. Stephen's Night, 1614, and supplied much of the music in 'The Masque of Flowers' presented in the same place on Twelfth Night in the same year, both masques being given in honour of the marriage of the Earl of Somerset and Lady Frances Howard. He composed a set of Fancies for the organ for Charles I., the manuscript of which is still extant in the Royal Library, and numerous Fancies for viols in the Royal College of Music library. He contributed two vocal pieces to 'The Teares or Lamentacions of a Sorrowfull Soule,' published by Sir William Leighton in 1614. Coperario was the master of Henry and William Lawes. He died in 1627. W. H. H.

COPPOLA, PIER ANTONIO, born Dec. 11, 1793, at Castrogiovanni in Sicily, son of a musician, studied at the Real Collegio di Musica at Naples. His first opera, 'Il Figlio bandito' (1816) was well received, and his 'Nina pazza per amore' (Rome, 1835), was performed in every town of Italy, in Vienna, Berlin, Lisbon, Spain, Mexico, and, as an opéra-comique with the title of 'Eva,' in Paris (1839). In 1836 he composed 'Enrichetta di Baienfeld' for Vienna, and this was followed by 'Gli Illinese' (Turin), one of his best works; and 'La bella Celeste degli Spadari' (Milan, 1837). At the Royal Theatre in Lisbon he produced 'Giovanna 1ma' (1841), and 'Inès de Castro' (1842). In 1843 he returned to Italy, and composed five more operas, which were less successful than his earlier works, and he finally returned to his post at Lisbon. Coppola might have taken a higher place had he not come into competition with Rossini. Some masses, litanies, and other church compositions are to be found in the libraries at Naples. He died Nov. 13, 1877. M. C. C.

COPULA, a species of discant, generally employed at the close of *organum purum* on the penultimate note of the unmeasured plain-song tenor. Franco defines it as 'velox discantus ad invicem copulatus' (Coussemaker, *Scriptores*, i. 133*a*), to which, at a later date (1351), the author of the *Quatuor Principalia* adds: 'sicuti est brevis partita sive fracta in semibrevibus, et semibrevis in minimis, quae copulari sive computari debent ad unam perfectionem' (*ib.* iv. 295*b*). The following example is given by Franco:—

and this, in three parts, by Walter of Odington (*ib.* i. 248*a*):—

The term was not confined to this practice of embellishing the *finis punctorum*, but was applied to any sort of flowery discant on one or more notes: 'Copula, id est floritura' (*ib.* iv. 278*a*), 'Copula est id ubicumque sit multitudo punctorum,' 'quae multum valet ad discantum, quia discantus nunquam perfecte scitur nisi mediante copula' (*ib.* i. 114*a*).

Theodoric de Campo (*ib.* iii. 189*a*) uses *copula* as a synonym for *ligatura*, *i.e.* a group of notes bound together in one figure; and Johannes de Garlandia in one passage (*ib.* i. 116*b*) tells us that the hocket (*q.v.*) was sometimes called *copula;* but no other writer supports either of these usages of the word. J. F. R. S.

COPYRIGHT IN MUSIC. Musical Copyright consists of two almost distinct elements, which, owing to the poverty of technical language, are embraced in a single expression. These elements are, in the first place, the right to copy or Copyright in the strict sense, and, in the second place, the right to perform or Performing Right. It will be necessary to preserve this distinction through the following divisions, under which the subject of musical copyright may be conveniently discussed.

I. The Acquisition of Copyright

A. *Domestic Copyright*

(i.) *Copyright in the strict sense.*—An unpublished musical work, of whatever kind it may be, is protected by the common law until the moment of its first authorised publication.

As to music when published, the Copyright Act, 1842 (5 & 6 Vict. c. 45) s. 3 provides that the copyright in every book (which by s. 2

includes a sheet of music) shall endure for the author's life and for seven years from his death, or for forty-two years from the first publication, whichever period is longest. If the music is published after the author's death, the copyright endures for forty-two years from publication. The publication must be British, but it would seem that there is no need for the composer to be a British subject or even to be resident in the British dominions at the date of publication. The music for which copyright is sought need not be separately published; it may be issued in one volume with other music which is not the subject of copyright or for which no copyright is sought. But it must be 'original.' 'Original music,' however, will include, *inter alia*, an adaptation of an old air or a pianoforte arrangement of an opera which is not the subject of copyright. 'Originality,' indeed, is, in every case, a question of fact, and depends on the amount of skill or intelligence which has been expended in producing the music for which copyright is sought. Handel for instance, might have found it hard to secure a valid copyright for his work in certain notorious cases, *e.g.* for the minuet in 'Samson,' though the Courts do not demand a very high standard of 'originality.'

The owners of the copyright will be the composer and his assigns (the assignment must be in writing), but where a person has commissioned a work on the terms that the copyright shall belong to him and has paid for it, the copyright will be in him (Copyright Act, 1842, s. 18).

(ii.) *Performing Right.*—This may, and often does, belong to persons other than those who own the right to print the music or the words (if any) of the composition. All questions concerning it must now be decided on four statutes:—Dramatic Copyright Act, 1833 (3 & 4 Will. IV. c. 15); Copyright Act, 1842 (5 & 6 Vict. c. 45); Copyright (Musical Compositions) Act, 1882 (45 & 46 Vict. c. 40); and Copyright (Musical Compositions) Act, 1888 (51 & 52 Vict. c. 17). The result of these enactments, though not free from doubt, appears to be as follows:—The composer of a musical work and his assigns, whether such musical work be a 'dramatic piece' or not, have the performing right in perpetuity if the composition has not been publicly performed; if it is publicly performed, then they have the performing right from the date of the first public performance for the same period as that set out in section (i.) above, and the performing right extends to all public performances or representations. An assignment of copyright will not assign the performing right, unless there be a written assignment, which either specifically or by sufficient general words passes the performing right. Where the proprietor of the copyright in any musical composition desires to retain the right of public performance, he must print a notice to that effect on the title-page of every copy. Where the copyright in the strict sense and the performing right have become vested in different owners before publication, or where they have become so vested after publication but the notice reserving the performing right has been duly printed on each copy before such vesting, then the proprietor of the performing right, if he desires to retain such right, must give notice to the owner of the copyright in the strict sense to print the aforesaid notice on each copy or on each future copy, as the case may be, under penalty of £40.

A reservation of performing right, which is partial only, applying, for instance, only to performance in music halls, was not disapproved of by the Courts, when it came before them, and may be regarded as valid.

Publication before performance does not deprive the composer or his assigns of their exclusive performing right.

B. *International and Colonial Copyright*

International Copyright is governed by the International Copyright Act 1886 (49 & 50 Vict. c. 33), the Berne Convention of 1886, the Additional Act of Paris of 1896, and Orders in Council dated respectively November 28, 1887, and March 7, 1898, as between Great Britain and her dependencies and the States who acceded to and have not seceded from the Convention and Act, viz.: Germany, Belgium, Spain, France, Italy, Luxemburg, Monaco, Switzerland, Tunis, Haiti, and Japan. Norway acceded to the Convention but not to the Act. A separate but similar convention exists between Great Britain and Austria-Hungary. The consequent position of these States as regards musical copyright is as follows:—Composers belonging to any of these States and their assigns enjoy in all the other States for their works, whether unpublished or published for the first time in one of the States, the same rights as the laws of such States grant to natives; and the same privilege belongs to composers who, though not citizens of any of these States, publish for the first time a work in one of them. To secure a copyright in Great Britain, the work must be such as would secure a copyright both in its country of origin and in Great Britain. In the case of unpublished works the country of the composer is regarded as the country of origin.

The protection covers, besides the making of copies, the public representation of dramatico-musical works (which expression embraces choregraphic works in the countries whose legislation impliedly includes them), whether published or not and whether translated or not, and also the public representation of unpublished musical works, and of published musical works which bear such a reservation of the performing right as has been described in section A. (ii.) above. But the public representation of translations is only prohibited as long as an exclusive right of translation exists, and the period of prohibition

will be cut down to ten years if the author has not exercised his right of translation within that time.

Great Britain gives a work the same rights and the same term of copyright as it would have enjoyed had it been first published or performed in Great Britain, so long as they are not greater than those enjoyed in the country of origin.

Special mention is made of the prohibition of colourable breaches of musical copyright by adaptations and arrangements, and authority is given to competent persons in each country to seize pirated copies in accordance with their domestic law. But it is declared that the manufacture and sale of instruments for the mechanical reproduction of copyright airs shall not be considered a breach of musical copyright.

The foreign composer (or the publisher in the case of anonymous or pseudonymous works) and their assigns may sue in this country in respect of an alleged breach of copyright committed here, but the British Courts will not entertain a suit brought by a British composer in respect of a breach of copyright alleged to have been committed in one of the other States.

As between Great Britain and the United States, by virtue of a declaration of the President made under an Act of Congress of March 3, 1891, an English composer may obtain copyright in the United States for a musical composition on delivering to the Librarian of Congress before publication the title and two copies of the composition. These copies need not, in the case of music, be printed in the United States. The copyright is given for twenty-eight years, but it can be extended for fourteen more years on a repetition of the original formalities, and covers the right to copy, the right to import, and the right to perform.

The Colonies are included in the application of the Copyright Acts by International Copyright Act 1886, s. 8 (1), subject to the terms of any Colonial statutes or ordinances. Thus, subject as above, music, if first published or performed in any part of the British Empire, is protected in every other part. Reference should also be made to Colonial Copyright Act 1847 (10 & 11 Vict. c. 95), whereby, on provision being made to protect the composers, foreign reprints of British copyright works may be imported into certain British possessions.

II. The Infringement of Copyright

Infringement may be committed either by direct piracy, that is to say, by publishing or performing a direct reproduction of the copyright work, or by what may be called lyric larceny—the improper embodiment of the ideas of another in a work which purports to be one's own. Whether there has been infringement or not is always a question of fact, but it may be said generally that there can only be infringement if the taking be substantial and such as to detract in a substantial degree from the monopoly which belongs to the work, the copyright of which is alleged to have been infringed, and if the work which is alleged to infringe it does not itself display so much intelligence and novelty as to take it out of the domain of infringement. Glazounov's use for symphonic purposes of a theme from 'Der Ring des Nibelungen,' for instance, could not be regarded as a breach of copyright, nor could the march in 'Tannhäuser' have been held to be an infringement of Agathe's great air in 'Der Freischütz.' But, if the above conditions are fulfilled, the manner in which the reproduction is made is immaterial, and so is the *bona* or *mala fides* of the reproducer and the fact that the unauthorised copies have not been sold but distributed gratis.

It has been held to be an infringement of Copyright in the strict sense to publish valses and quadrilles based upon airs or portions of airs from a copyright opera, or to make a pianoforte arrangement of the score of a copyright opera. And a person, who has adapted an old air, adding his own words and accompaniments, may sue as proprietor of the whole for a breach of copyright. But, on the other hand, it has been recently held that the reproduction of copyright music on perforated rolls for use in a mechanical organ was not a 'copy' within the meaning of the Copyright Acts, although the time and expression marks of the original were written on the rolls.

Performing Right has been held to have been infringed by the performance of an opera rescored from the copyright pianoforte and vocal scorea of an opera, the full score of which had not obtained copyright, and by the singing of isolated songs from an opera, the words of which were copyright.

It is a condition precedent to an action for the infringement of the copyright of a published work that the work should have been registered at Stationers' Hall; the register must contain the title of the work, the name and abode of the publisher and the proprietor, and the date of first publication. Where the work has been performed but not published, the register must contain the same particulars, with the substitution of the time and place of first performance for the date of first publication. Registration appears to be necessary for the protection of performing right as well as of copyright proper, and assignments of performing right should be entered on the register. But registration is not required in the case of foreign works which fall under the international arrangements. For the purpose of obtaining protection in colonies which have a registry of their own, entry must be made in such register.

The persons who are liable for infringement of performing right seem to be those who are actually responsible by themselves or their

agents for the unauthorised performance, or who take part therein. But it is expressly provided that in the case of musical compositions, other than operas and stage plays performed in a duly licensed place, the proprietor, tenant, or occupier of the place where the performance is given is not liable unless he wilfully causes or permits the performance, knowing it to be unauthorised.

The remedies obtainable are (i.) in the case of copyright in the strict sense, damages, account of profits, delivery up of copies, and an injunction to restrain unauthorised reproductions. (ii.) In the case of performing right, damages, viz. 40s. for each unauthorised performance, or the benefit arising from the representation, or the injury sustained by the proprietor of the right, whichever is greatest; but in the case of musical compositions, other than operas or stage plays performed in a duly licensed place, the damages and costs are in the absolute discretion of the Court. An injunction to restrain unauthorised performances may also be obtained. In either case the action must be brought within twelve months of the offence in respect of which it is instituted. (iii.) In the case of unpublished works, there may be a common law action for an injunction and damages.

By the Musical (Summary Proceedings) Copyright Act 1902 (2 Edw. VII. c. 15), a Court of summary jurisdiction may, if the owner of the copyright satisfies it by evidence that pirated copies of music are being carried about or offered for sale, authorise a constable to seize them without warrant, or a constable may seize any supposed pirated copies at the request in writing of the owner of the copyright or of his agent duly authorised in writing and at the owner's risk. The latter course is the more usual. In either case the copies are taken before the Court and forfeited, destroyed, or otherwise dealt with at the Court's discretion on proof that they are infringements of copyright. The effectiveness of the Act, which constitutes quite a new departure in English legislation, must largely depend on the character of each Court and its readiness, when dealing with such a difficult matter as infringement of musical copyright, to dispense with technicalities in the interests of substantial justice. But the owner of the copyright ought to be prepared with proper evidence of his copyright and of its infringement by any particular copies, and he ought to be careful to authorise his agent, if he employs one, in writing to take measures in respect of each particular musical work of which he wishes him to effect the seizure. The Musical Copyright Bill of 1904 proposes to remedy certain defects in the Act of 1902, as displayed by recent decisions, by imposing penalties for the printing, vending, importing, exporting, and possessing of copies or plates of pirated musical works, unless the accused shows he had no guilty knowledge; by conferring powers of apprehension and search; and by permitting the destruction of such copies and plates, where the person who has dealt with or possessed them cannot be found and does not necessarily claim them within twenty-eight days. G. S. R.

COQUARD, ARTHUR, French composer, born in Paris, May 26, 1846, of a family of Burgundian origin. Simultaneously with his legal studies, he began in 1865 to work at harmony with César Franck, but in the following year and for five years afterwards circumstances obliged him to discontinue his musical studies. Having taken the degree of 'Dr. jur.' in 1870 he accepted the post of secretary to a member of the Senate; but, supported by the encouragement of Franck, he devoted himself once more to composition, and in 1876 produced a ballade for baritone and orchestra, 'Le Chant des Épées.' After a second interval of musical inactivity, lasting till 1881, numerous works were written, most of which were lyric or dramatic scenes for voice and orchestra, such as 'Cassandre,' 'Héro et Léandre' (1881), 'Christophe Colomb,' 'Andromaque,' symphonic works on 'Ossian,' etc., a sacred trilogy, 'Jeanne d'Arc,' and choruses to Racine's 'Esther,' H. de Bornier's 'Agamemnon,' and Longhaye's 'Helvetia.' His works for the stage include 'L'Épée du Roi' (two acts, Angers, 1884); 'Le Mari d'un Jour' (three acts, Opéra Comique, 1886); 'La Jacquerie' (four acts, Monte Carlo, 1895), completed from a fragment left by Édouard Lalo; 'Jahel' (four acts, Lyons, 1900); 'La Troupe Jolicœur' (three acts and prologue, Opéra Comique, 1902). Coquard, as musical critic to *Le Monde*, published there an excellent sketch of César Franck. He received from the Académie des Beaux Arts the 'Prix Bordin' for his book *De la Musique en France depuis Rameau*. Since 1892 he has been lecturer at the national institution for the blind. Coquard's music is distinguished by clearness, charm, and exact dramatic sentiment, and it may be regarded as a continuation of the noble classical traditions, happily united to modern harmonic science. G. F.

COR ANGLAIS (Ital. *Corno Inglese*; Germ. *Englisches Horn*). A tenor oboe, standing in the key of F, and therefore speaking a fifth lower than the ordinary oboe. It has the same scale and compass as the latter instrument, from E or E♭ in the bass, to about A or B♭ above the treble clef. It bears the same relation to the oboe that the basset-horn does to the clarinet, hence frequent confusion between the two instruments. [The instrument is a refined development of the tenor pommer (see POMMER), and is in some respects similar to the 'oboe da caccia' (*q.v.*) found in Bach's scores, and possibly to the 'chalumeau' of Gluck's operas, but it is more probable that the latter was an instrument of cylindrical bore.]

Beethoven wrote a fine trio for two oboes and cor anglais, numbered as op. 29, but more

correctly as op. 87; also a set of variations on 'La ci darem,' which though performed at Vienna on Dec. 23, 1797, are still in MS. [A striking instance of the use of the cor anglais is in the opening of Act III. of 'Tristan'; and Meyerbeer, Halévy, Ambroise Thomas, and other modern composers use it frequently.] It has a peculiar wailing and melancholy tone, which is very effective, but it is difficult and somewhat treacherous in the orchestra. [A view has been recently advanced that the name 'Cor Anglais' should be 'Cor Anglé' (angled horn), the difficulty about the accepted name being that there is nothing distinctively English about the instrument, whereas many early specimens are bent at an angle in the middle of their length. The name is known to have been given, however, to instruments bent in a sweep rather than at an angle, and therefore the origin of the designation must at present remain uncertain.] W. H. S.; with additions in square brackets by D. J. B.

CORANTO. See COURANTE.

CORBETT, FRANCISQUE, whose real name was Francesco Corbetti or Corbetta, born at Pavia about 1620, died in Paris in March 1681; the best player of his time on the guitar. After travelling in Italy, Spain, and Germany, he settled for a time at the court of the Duke of Mantua, who sent him in 1656 to Louis XIV. He stayed for a few years in the French court, and then came to England, where Charles II. appointed him to an office in the Queen's household, with a large salary, and provided him with a wife. [He was in Paris again in 1669, and once more in London in 1677 (*Quellen-Lexikon*).] His best pupils were De Vabray, De Visé, and Médard, who wrote a curious epitaph on him. M. C. C.

CORBETT, WILLIAM, an eminent English violinist at the commencement of the 18th century, composed for the Lincoln's Inn Fields Theatre 1700-3, undertaking its direction in 1705-11. He was leader of the band at the Opera House in the Haymarket on its first opening in 1705. On the production of Handel's 'Rinaldo' in 1711 a new set of instrumentalists was introduced into the opera orchestra, and Corbett, quitting his position in the Queen's band, went to Italy, and resided for some years at Rome, returning and giving a concert in Hickford's Rooms in 1714 (April 28). He was appointed to the royal band of music, where his name appears from 1716 to 1747. But for some part of this time he travelled in Italy, making occasional visits to Venice, Milan, Florence, Cremona, Bologna, Naples, etc., amassing during the time a large collection of music, and a most valuable assemblage of Italian violins, etc. Those acquainted with his circumstances were at a loss to account for his ability to make these purchases except by the supposition that he was a Government spy, employed to watch the movements of the Pretender. Corbett returned to England in 1740, and seems to have resumed his position in the royal band. He died, at an advanced age, March 7, 1747-8. By his will he bequeathed his collection of instruments to Gresham College, providing also for the stipend of a person to show them, and for their care. The college authorities, however, rejected the gift on the ground that there was no room in the college for its reception, and the instruments were consequently sold by auction 'at the Great Room over against Beaufort Buildings, in the Strand, formerly the Hoop Tavern,' on Saturday, March 9, 1751. Corbett's collection of music was also sold by auction at his house in Silver Street, Golden Square. Before quitting England Corbett published several sets of sonatas for violins, flutes, oboes, etc.; some concertos for orchestra; and instrumental music for 'Henry IV,' 1700; 'As you find it,' 1703; and 'Love Betray'd, or, The Agreeable Disappointment,' 1703. About 1720 he published 'Concertos, or Universal Bizzaries composed on all the new Gustos in his travels through Italy,' containing thirty-six concertos in two books, the first in four parts, the second in seven, professing to exhibit the different styles of various countries and cities (*Dict. of Nat. Biog.* etc.). W. H. H.

CORDER, FREDERICK, born in London, Jan. 26, 1852, showed from infancy a strong aptitude for music, which he was, however, not allowed to indulge, being at the age of eighteen made to go into business. From his first situation he was unexpectedly released by the pecuniary embarrassments of his employers, and he then persuaded his parents to let him enter the Royal Academy of Music, where his talent for original composition was quickly recognised. He only remained there a year and a half, as, on being elected to the Mendelssohn Scholarship, he was sent to Cologne, where he studied hard for four years under Dr. Ferdinand Hiller. Shortly after his return to England he was appointed conductor at the Brighton Aquarium, where by his talents and energy he raised the musical entertainments from the very low level at which he found them, and brought the orchestra to a better condition of efficiency. Mr. Corder's gifts and culture are wide and varied. During the years when music proved unremunerative—as for years it must do to all young composers of high aim and uncompromising temper—he supported himself mainly by literary work, in much of which he had the co-operation and help of his accomplished wife. Several of

his orchestral works have been performed at the Crystal Palace, the Philharmonic concerts, and elsewhere. His romantic opera 'Nordisa,' written for the Carl Rosa Company, was produced on Jan. 26, 1887, at the Royal Court Theatre, Liverpool, with brilliant success. It has since been performed in several provincial towns, and was brought out at Drury Lane, May 4, 1887. After the death of Carl Rosa the chances of English opera became so faint that Mr. Corder found himself forced to devote himself to teaching. He accepted a post as professor of composition at the Royal Academy of Music, of which he has been curator since 1889. He has trained many of the younger English composers, among them his very promising son, Paul W. Corder. Subjoined is a complete list of Mr. Corder's compositions. The words of all the vocal works but the last four are his own. The works marked with an asterisk have been published.

1. Evening on the Sea-shore. Idyll for Orchestra. 1876.
2. Im Schwarzwald. Suite. 1876.
3. Morte d'Arthur. Grand Opera, 4 acts. 1877-78.
4. Philomel. Operatic Satire, 1 act. 1880.
5. A Storm in a Teacup. Operetta. 1880.
6. The Cyclops. Cantata. 1881.
*7. Biver Songs. Trios for Female voices. 1881.
8. Overture. Ossian (written for the Philharmonic Society). 1882.
9. Nocturne for Orchestra. 1882.
10. Dreamland. Ode for Chorus and Orchestra. 1883.
*11. Boumanian Dances, Violin and Piano. 1883.
12. The Nabob's Pickle. Operetta. 1883.
13. The Noble Savage. Do. 1885.
*14. Prospero. Overture. 1885.
15. Orchestral scenes for The Tempest. 1886.
*16. The Bridal of Triermain. Cantata (Wolverhampton Festival). 1886.
*17. Nordisa. Romantic Opera. 1886.
18. Roumanian Suite for Orchestra. 1887.
*19. The Minstrel's Curse. Ballad for declamation, with orchestral accompaniment. Crystal Palace, March 10, 1888.
*20. Song, 'O sun, that wakenest all' (Tennyson).
21. The Blind Girl of Castel Cuillé. Cantata for Female voices. 1888.
*22. The Sword of Argantyr. Cantata (Leeds Festival). 1889.
23. True Thomas. Musical Recitation. 1895.
24. Pippa passes. Orchestral Scena drammatica. 1897.
25. Overture, three Entr'actes, and accompaniments to Parker's play 'The Termagant.' 1898.
26. Overture and incidental music to 'The Black Tulip.' 1899.
27. The Witch's Song. Musical Recitation. 1902.

Mr. Corder is understood to have completed several other operas for his own gratification, as it is hardly likely, in existing conditions, that they will see the light. F. A. M.

CORDIER, JACQUES, better known under the name of BOCAN, born in Lorraine about 1580; dancing-master and performer on the violin and rebec in the reign of Louis XIII. He was unable to read music, but had great power of execution, and Mersennus mentions his gift of modulating the tones of the violin. He was dancing-master to Henrietta Maria, Queen of Charles I., and came with her to England. The King took great delight in hearing him play the violin. He returned to Paris when the Civil War broke out, and his tomb at St.-Germain l'Auxerrois was restored in 1843. Chancy's 'Tablature de Mandore' (Paris, 1629) contains a graceful 'branle' by Cordier. M. C. C.

CORELLI, ARCANGELO, a great violinist and composer, born at Fusignano, Imola, Feb. 12, or 13,[1] 1653. He learnt counterpoint from Matteo Simonelli, and the violin from G. B. Bassani. Of the earlier part of his life but little is known. He appears to have travelled in Germany, and to have stayed for some time at Munich, attached to the court of the Elector of Bavaria. It is also related that he went to Paris in 1672, but soon left it again, owing to Lulli's jealousy. This however, according to Fétis, is very doubtful. [Chrysander states that between 1680 and 1685 he spent some time in the society of Farinelli at Hanover.] Some time before 1685 he returned to Italy and settled at Rome, where he published his first work, a set of twelve sonatas. He soon made a great reputation as performer and composer, and became a favourite in the highest circles of Roman society. Cardinal Pietro Ottoboni, an enthusiastic lover of the arts in general and of music in particular, was his great friend and patron. Corelli lived in the Cardinal's palace with certain intermissions (see below) up to the day of his death, conducting the concerts, which took place every Monday, and which were considered the most important and interesting events in Roman musical life. He also lived on terms of intimate friendship with some of the most eminent painters of the time, Cignani, Maratti, and others, with whose assistance he formed a collection of valuable pictures. This collection, together with a not inconsiderable sum of money (about £60,000), he left in his will to his friend and benefactor the Cardinal, who, however, accepted the pictures only and handed over the money to Corelli's relations.

Corelli appears to have been of the most amiable disposition, and a model of truly artistic modesty. He was very simple and unpretentious in all his habits. Handel, though esteeming him highly, used to say of him: 'He likes nothing better than seeing pictures without paying for it, and saving money.' He dressed almost shabbily, and would on no account hire a carriage, but always went on foot. Hawkins, in his *History of Music*, gives an account of his meeting with Handel at Rome. Handel conducted some of his own cantatas, which were written in a more complicated style than the music with which Corelli and the other Italian musicians of that period were familiar. Handel tried in vain to explain to Corelli, who was leading the band, how a certain passage ought to be executed, and at last, losing his temper, snatched the violin from Corelli's hands and played it himself, whereupon Corelli remarked in the politest manner 'Ma, caro Sassone, questa musica è nel stilo francese, di ch' io non m' intendo' ('But, my dear Saxon, this music is in the French style, of which I have no experience'). It was the overture to 'Il trionfo del tempo,' which Handel, probably with special regard to Corelli, had written in the style of his concerti grossi with two solo-violins. It is a fiery impetuous piece, truly Handelian in character, and

[1] See note on p. 604b.

it is not difficult to understand how Corelli in his quiet elegant manner failed to attack with sufficient vigour those thundering passages. That Corelli, who in his own compositions never goes beyond the third position, might have been puzzled by this passage, which occurs in the same overture, is

also possible, but it is hardly likely to have caused the scene described above.

His fame was not limited to Rome and Italy. From all countries young talents came to benefit by his instruction; and his compositions were published in Amsterdam, Antwerp, Paris, and London, as well as in Italy. Among his numerous pupils the most eminent were Geminiani, Locatelli, Somis, Baptiste, and Castrucci.

Illustrious foreigners visiting Rome hardly ever failed to pay homage to Corelli. When Queen Christina of Sweden came there, he conducted in her palace the performances of an orchestra of 150 musicians. The King of Naples repeatedly tried to induce him to settle in his capital, and made him most favourable offers, which were however all declined by Corelli, who was not willing to give up his happy position at Rome, where he was universally loved and esteemed. [In 1689 and 1690 he was at the court of Modena.] It was not till about 1708 that he visited Naples, which town, with Alessandro Scarlatti as its leading musician and an excellent orchestra, was at that period by far the most important musical centre of Italy. Corelli was most anxious to ensure complete success in Naples, and, in order to be sure of effective accompaniment, took with him two violinists and a violoncello player. But he soon saw that this precaution had been superfluous. At the first rehearsal Scarlatti's band went through the introductory tutti of one of Corelli's concertos without a mistake, whereupon Corelli admiringly exclaimed: 'Si suona a Napoli!' ('They can play at Naples!') The king, however, did not appreciate his playing, and, pronouncing his adagio tedious, left the concert-room before Corelli had finished. But this was not all. Soon afterwards Corelli was leading the performance of a composition of Scarlatti's, when, in a passage that probably was not well written for the violin, he made a very conspicuous mistake, while Petrillo, the Neapolitan leader, who was familiar with the passage in question, executed it correctly. Then came a piece in the key of C minor. Corelli, already disconcerted, led it off in C major. 'Ricominciamo!' ('Let us begin again!') said Scarlatti, with his usual politeness, and poor Corelli started once more in major, so that Scarlatti was at last obliged to point out his mistake. Corelli felt this incident as a great humiliation, and left Naples immediately. Returned to Rome he found that a new violinist, Valentini, had won the general applause and admiration of the public, and considering himself slighted and superseded, took it so much to heart that his health began to fail. In 1712 he published his last work, dedicated to his admirer John William, Prince Palatine of the Rhine, and died Jan. 10,[1] 1713. He was buried in a princely style in the Pantheon, not far from Raphael's tomb, and Cardinal Ottoboni erected a marble monument over his grave, the inscription on which bears testimony of the high esteem and admiration in which Corelli was held. For many years a solemn musical service was held on the anniversary of his death, when some of the great master's compositions were performed, conducted by one of his pupils.

Corelli has a double claim to a prominent place in the history of musical art—as a great violinist who laid a firm foundation for all future development of technique and of a pure style of playing; and as a composer who materially advanced the progress of composition. Still there can be no doubt that above all he was a great violin player, and that all he wrote grew out of the very nature of his instrument; and as the violin is not only a solo instrument but at the same time the leading orchestral one, we owe to Corelli the typical treatment of it in two important branches of composition. In his chamber-sonatas and concerti grossi (opp. 1, 2, 3, 4, and 6) he must be considered the founder of the style of orchestral writing on which the future development in this direction is based, while in the sonatas (op. 5) which have merely an accompanying fundamental bass, he gives a model for the solo sonata, and thereby for all writing for the violin as a solo-instrument.

All his works are characterised by conciseness and lucidity of thought and form, and by a dignified, almost aristocratic bearing. The slow movements show genuine pathos as well as grace, bringing out in a striking manner the singing power of the violin. The quick movements are not on the whole of equal merit with the adagios,—at least in point of originality of thought and variety of character. They appear to our modern feeling somewhat dry, almost exercise-like.

Corelli's gavottes, sarabandes, and other pieces with the form and rhythm of dances, do not materially differ from similar productions of his immediate predecessors and contemporaries, although, like everything that he wrote, they are distinguished by great earnestness and dignity of style, and are especially well adapted to the instrument. He was not so much an innovator as a reformer; he did not introduce new or striking effects; it cannot even be denied that his technique was a limited one—he never goes

[1] As to the actual dates of birth and death, which depend on the translation of Corelli's epitaph as copied by Burney in his *History*, vol. iii. p. 554, see the *Quellen-Lexikon*.

PETER CORNELIUS

beyond the third position—but, by rigidly excluding everything that appeared to him contrary to the nature of the instrument, and by adopting and using in the best possible way everything in the existing technique which he considered conformable to the nature of the violin, he not only hindered a threatened development in the wrong direction, but also gave to this branch of the art a sound and solid basis, which his successors could and did build upon successfully.

The following are the titles of the original editions of his works:—

(1) XII Sonate a tre, due violini e violoncello, col basso per l'organo, op. 1; Roma, 1683. (2) XII Suonate da camera a tre, due violini, violoncello e violone o cembalo, op. 2; Roma, 1685. (3) XII Suonate a tre, due violini e arcliento col basso per l'organo, op. 3; Modena, 1689. (4) XII Suonate da camera a tre, due violini e violone o cembalo, op. 4; Bologna, 1694. (5) XII Suonate a violino e violone o cembalo, op. 5; Roma, 1700. The same arranged by Geminiani as Concerti grossi. (6) Concerti grossi con duoi violini e violoncello di concertino obligati, e duoi altri violini, viola, e basso di concerto grosso ad arbitrio che si potranno radoppiare, op. 6; Roma, 1712.

A number of spurious works were published under Corelli's name, but none are genuine except the above six. [Many modern editions of these works exist, but the best and most authoritative is that of Joachim and Chrysander, published originally as one of the *Denkmäler der Tonkunst* and afterwards in Augener's edition in two volumes.] P. D.

CORFE, JOSEPH, born in 1740 at Salisbury, was one of the choristers at the cathedral there under Dr. John Stephens, organist and master of the boys. In 1783 he was appointed a Gentleman of the Chapel Royal, and sang in the Handel Commemoration in the following year. In 1792 he succeeded Robert Parry as organist and master of the choristers of Salisbury Cathedral, which offices he held until 1804. Corfe composed and published a volume of Church Music, consisting of a service and eleven anthems, etc.; three sets of Glees, of twelve each; a Treatise on Singing; a Treatise on Thorough-Bass, a work still held in esteem; besides editing a Selection of Sacred Music made by James Harris, and other works. He died July 29, 1820, aged eighty.

His son ARTHUR THOMAS, was born at Salisbury, April 9, 1773. In 1783 he became a chorister of Westminster Abbey under Dr. Cooke. He subsequently studied the pianoforte under Muzio Clementi. In 1804, on the resignation of his father, he was appointed organist and master of the children of Salisbury Cathedral. He organised a successful festival at Salisbury on August 19-22, 1828. A. T. Corfe produced and published a service and some anthems, several pianoforte pieces, and 'The Principles of Harmony and Thorough-Bass.' He died, whilst kneeling in prayer, Jan. 28, 1863, in the ninetieth year of his age, and was buried in the cloisters of Salisbury Cathedral, where a tablet was erected to him by his thirteen surviving children, one of whom, CHARLES WILLIAM, Mus.D., born July 13, 1814, was organist of Christ Church, Oxford, from 1846; he took the degree of Mus.D. in 1852, and died at Oxford, Dec. 16, 1883. Another of A. T. Corfe's sons, JOHN DAVIS CORFE, born 1804, was organist of Bristol Cathedral from 1825, and died in Jan. 1876. (*Dict. of Nat. Biog.*) W. H. H.

CORKINE, WILLIAM, probably a lutenist, published in 1610 'Ayres to Sing and Play to the Lute and Basse Violl. With Pavins, Galliards, Almaines and Corantos for the Lyra Violl,' and in 1612 'The Second Booke of Ayres, some to sing and play to the Base Violl alone; others to be sung to the Lute and Base Violl, with new Corantoes, Pavins, Almaines; as also divers new Descants upon old Grounds, set to the Lyra Violl.' Nothing is known of his life. W. H. H.

CORNELIUS, PETER, a near relation of the painter of the same name, and as composer and author a prominent representative of the so-called New-German school, was born at Mayence, Dec. 24, 1824. He was originally intended for the stage, and it was not till after his first performance, which seems to have been unsuccessful, that he decided to adopt music as a profession. His musical education had been incomplete, but his dramatic studies had made him acquainted with literature, and were of considerable service in developing his poetic faculties. He worked hard, and acquired a vast amount of general information. After the death of his father (1844) he pursued music with energy and completeness, studying from 1845 to 1850 with Dehn of Berlin; but his tendencies were forwards towards the modern ideal, rather than backwards to the strict rules of counterpoint. In 1852 he went to Weimar and joined the young artists who, under Liszt's leadership, were striving to carry out the ideas of Richard Wagner. They eventually formed a separate school, to which the name 'New-German' became attached. It was here that Cornelius became acquainted with Wagner's works, while with Liszt he formed ties of the closest intimacy. His active and versatile pen was of great service to the young enterprise. He strove to elucidate the new principles in the *Neue Zeitschrift für Musik*, the organ of the party, both by original articles and by translating a series of lectures given in French by Liszt. As a practical embodiment of the new views he composed a comic opera, 'Der Barbier von Bagdad,' of which only a single performance took place (1858). [See BARBER OF BAGDAD.] Liszt resented the judgment of the public, and left Weimar, which ceased to be the centre of the school. In 1858 Cornelius went to Vienna, where Wagner was then living, and became intimate with him also. When King Ludwig II. invited Wagner to Munich, Cornelius followed him there (1865), first as reader to the king, and later as professor of harmony and rhetoric at the Conservatorium, after it had been transformed into the 'Königliche Musik-schule' with H. von Bülow as principal. Cornelius's grand opera the 'Cid,' produced at Weimar (1865), may be

considered as the fruit of his intercourse with Wagner. He was working at another, entitled 'Gunlöd'—of which, after Wagner's example, he had himself taken the subject from the legends of the Edda—when he died at Mayence, Oct. 26, 1874. 'Gunlöd' was orchestrated by C. Hoffbauer and Ed. Lassen, and produced in 1891 at Weimar and 1892 at Strasburg. A duet from it was sung at the Sheffield Festival of 1902. The effect of his dramatic works in furthering the Wagner movement cannot fairly be estimated, as the public have had so little opportunity of judging them. His published works, principally vocal, show him to have had much feeling. The following deserve mention:—'Duets for Soprano and Baritone,' op. 6; 'Lieder-cyclus,' op. 3; 'Trauerchöre' (for men's voices), op. 9; and above all, the 'Weihnachtslieder,' op. 8. Most of these are settings of his own poems. He published a volume called *Lyrische Poesien* in 1861, and an autobiography in 1874. The exquisite 'Vätergruft' for baritone solo and chorus *a cappella*, and the refined and expressive set of six 'Brautlieder,' were published after his death, the latter in 1878. Three more books of posthumous works, consisting of eleven songs and four duets, were edited by Max Hasse and published by Breitkopf & Härtel in 1898. A. M.

CORNELYS, Theresa, born at Venice in 1723, was the daughter of an actor named Imer. She was the mistress of a senator Malipiero at the age of seventeen, and in 1753 bore the same relation to the Margrave of Baireuth, being then married to a singer named Pompeati. About the same period she was nominated director of the theatres in the Austrian Netherlands. She came to England and sang as second woman on the first performance of Gluck's opera 'La caduta de' Giganti' at the Haymarket, Jan. 7, 1746. She sang at Amsterdam as Mme. Trenti, and took the name of Cornelys from that of a gentleman at Amsterdam, M. Cornelis de Rigerboos. Returning to England, she bought Carlisle House, Soho Square, in 1760, in order to give a series of public entertainments, to which a number of ladies and gentlemen subscribed under the name of 'The Society.' On Feb. 26, 1761, she sang as Mme. Pompeati in the Music Room in Dean Street for the benefit of a Signor Siprutini. Her eleventh entertainment was advertised to take place on May 5, 1763. The first 'grand concert of vocal and instrumental music' took place on Friday, Feb. 24, 1764, and the first 'morning subscription music' on April 6 of the same year. In spite of opposition and quarrels her rooms became very popular. Bach and Abel directed her concerts in 1765; they appear to have been connected with Carlisle House down to 1773, and perhaps later. In April 1768 Mrs. Cornelys was honoured with the presence of some of the Royal Family, and in August of the same year the King of Denmark visited her rooms. In 1769 she gave a festival and grand concert under the direction of Guadagni. Galas, concerts, and masked balls followed each other in rapid succession, but the proprietors of the Italian Opera House felt that the 'Harmonic meetings' were becoming dangerous rivals to their own attractions. Mrs. Cornelys and Guadagni were fined at Bow Street, and she was indicted before the Grand Jury, Feb. 24, 1771, for keeping 'a common disorderly house.' Goldsmith's 'Threnodia Augustalis' for the death of the Princess of Wales, with music by Vento, was given at the rooms Feb. 20, 1772. Her fashionable supporters began to leave her house for the Pantheon, and in the *London Gazette* for Nov. 1772 appeared the name of 'Teresa Cornelys, dealer.' In the following month Carlisle House and its contents were sold by auction. On several occasions between 1775 and 1777 Mrs. Cornelys is to be heard of as giving concerts and balls at Carlisle House, but after the latter date she remained in retirement under the name of Mrs. Smith, and was supported by a son, who predeceased her. A short time before her death she sold asses' milk at Knightsbridge and unsuccessfully tried to arrange some public breakfasts. She died in the Fleet Prison Aug. 19, 1797, at the age of seventy-four, leaving a daughter who called herself Miss Williams. The merits of Mrs. Cornelys as a singer were small, but the 'Circe of Soho Square,' as she was styled, organised during twelve years the most fashionable series of entertainments in London. She was an able woman of business and thoroughly understood the art of advertising. Carlisle House passed through various fortunes. In 1780 the ball-room was used by a debating society, and in 1785 the property was sold afresh. Carlisle House was pulled down about 1788 and the present houses, 21A and 21B, built on the site. St. Patrick's (Roman Catholic) Chapel in Sutton Street, consecrated in 1792, was the former banqueting- or ball-room. (See *Dict. of Nat. Biog.*) H. R. T.

CORNEMUSE. The Italian and French name for the Bagpipe.

CORNET (i.) (Ital. *Cornetto;* Fr. *Cornet-à-pistons*). For a description of the instruments known by this name before the introduction of the modern valve system, see Zinke. The name is now applied to a brass valve instrument, with cupped mouthpiece, intermediate in character and proportions between the trumpet and the bugle, and formerly called also Cornopean. It possesses the usual scale of open or harmonic notes, as follows:—

The real fundamental, which is rarely made use of, is the octave below the lowest here given. The last four notes are extremely difficult, and

are practically unused, the effective compass ending with C above the stave.

The relationship of the cornet to other brass instruments is treated under HORN, and the means by which its chromatic scale is obtained under VALVE, but a few special characteristics are noted here.

The instrument in C with harmonic scale agreeing in actual pitch with that written above is very little used. It is usually made with one shank for B♭ and another for A♮, and as it is treated as a transposing instrument, its actual pitch is a tone or a minor third lower than the written note, according to the shank in use. Extra crooks were formerly used down to F and even lower, but these have wisely been given up.

For military and brass band purposes, in addition to the cornet in B♭ a smaller cornet is made in E♭, the notes of which, therefore, sound a minor third higher than written.

The bell of the instrument is of about the same size as that of the trumpet, but the tubing towards the mouthpiece tapers considerably, and this tapering has the effect of making the lower notes better in tune than those on the trumpet. Although for brilliance and dignity of tone the cornet cannot equal the trumpet, yet in the hands of a good player it has a distinctly vocal quality, and it is to be regretted that it is so often vulgarised.

In military and brass bands, parts are written for solo cornet, as well as for 1st, 2nd, 3rd, and 4th. It has not yet been much employed in the scores of classical music, though it is used freely by Berlioz, Tchaikovsky, and many others, and it is occasionally used in orchestras instead of the trumpet. In opera an instance of its use which will be familiar is in the air 'When other lips' in Balfe's 'Bohemian Girl.' D. J. B.

CORNET. (ii.) This name is given to several kinds of organ stops; among others to pedal reed-stops of 4 and 2 feet length in numerous Dutch and German organs. A 'Cornette' of 4 feet occurs in the cathedral organ at Kronstadt; a 'Cornetin' of 2 feet in the 'Old Church' organ at Amsterdam; and a 'Cornettino,' 2 feet, in the music hall organ at Boston in America.

The great organ Solo Cornet comprised either 5, 4, or 3 ranks of pipes. When of the former it consisted of a stopped diapason, principal, twelfth, fifteenth, and tierce. When of 4 ranks the stopped diapason was omitted; when of 3, that and the principal were left out; so that the 'composition' on the middle C key stood thus—

and the one or two separate stops necessary were added or 'drawn' with the cornet when the series of 5 pipes was not complete. The pipes of the solo cornet were 4 or 5 'scales' wider or 'larger' than the corresponding pipes of the ordinary stops, to render the tone very powerful and broad; and very frequently, in order to make it still more prominent, the stop was placed on a sound-board of its own and raised a few feet above the surrounding pipes, in which case it was called a '*mounted* cornet.' Father Smith's solo cornet at the Temple (4 ranks) was not mounted.

The Echo Cornet, of soft tone, and shut up in a box, was of 3 ranks, or 4 at most, the composition being as above given. 'Cornet Voluntaries,' as they were called, were in great vogue for a very long time, and consisted of runs and twirls for the right hand, played in single notes, first on the louder stop and then repeated on the softer, the left hand meanwhile playing a soft bass. So fashionable were these peculiar display pieces that Dr. Dupuis states on the title-page of his volume of voluntaries, containing specimens of the kind, that they were 'Performed before their Majesties at the Chapel Royal, St. Paul's Cathedral, etc.'; while Russell, in his book printed in 1812, shows that the attachment for the old Echo still lingered exactly a century after it had been improved upon by the invention of the Swell (in 1712), by directing at the head of one of his pieces 'The Swell Pedal *not* to be used in this movement.' The name 'Echo Cornet' is still frequently applied to a compound stop of small scale and light tone in swell organs. In many of the continental organs the cornet stop extends down to tenor C; and in some places it is used, on account of its strong and travelling tone, as an accompaniment to the priest's voice at the far end of the church. This is, or was, the custom a few years ago in many of the churches of Cologne, including the cathedral.

As the cornet is a compound stop that can be carried through the usual compass of a manual without any 'break' in its composition, it is sometimes looked upon as a good stop for covering the repetitions which necessarily occur in all compound stops that rise to a greater altitude than itself above the unison. At such times it is made as a 'progressive' stop; that is to say, it has fewer pipes in the bass, with an increasing number up to the middle of the keyboard. Commencing with two pipes on the CC key, a third rank is added at tenor C, and a fourth at middle C; and the stop starts with a fifteenth and tierce, to which are added first a twelfth and then a principal, thus—

The 'large scale' is preserved, but the pipes

have only narrow mouths, and produce a pleasant and rather flute-like quality of tone. A stop somewhat of this kind occurs on the great manual of Schulze's fine organ in Doncaster parish church. E. J. H.

CORNETTE, VICTOR, son of an organist, born at Amiens, 1795, a musician of indefatigable activity. He entered the Paris Conservatoire in 1811, and studied composition under Lesueur. He served in the band of the 'Grenadiers tirailleurs de la Garde impériale' in 1813 and 1814, and was at Waterloo; was professor at the College of St. Acheul from 1817 to 1825; member of the orchestra at the Odéon (1825), Opéra Comique (1827); chorus master at the Opéra Comique (1831-1837); director of singing at the Gymnase de musique militaire (1839); conductor of the Strasburg theatre (1842); chorus master to the Opéra national (1847); and again chorus master at the Opéra Comique (1848); also trombonist in the band of the Garde Nationale, and deputy organist at St. Sulpice and the Invalides. Cornette composed an enormous mass of music for every variety of instrument, and published *méthodes* for trombone, ophicleide, cornet-à-pistons, bugle, saxhorn, saxophone, bassoon, oboe, horn, trumpet, harp, violoncello, viola, organ, and harmonium. M. C. C.

CORNETTO, or CORNET-À-BOUQUIN. See ZINKE.

CORNO, the Italian term for HORN.

CORNO DI BASSETTO. (i.) See BASSET-HORN. (ii.) Another name for the clarinet stop of the organ, especially of its suitable bass.

CORNO DI CACCIA, *i.e.* hunting-horn, the French horn. The name often occurs in J. S. Bach's scores.

CORNO FLUTE. A manual 8-ft. organ stop of very soft tone, invented by Herbert Norman.

CORNOPEAN, a name originally applied to the cornet-à-pistons, though now disused.

CORNU (Latin, *Horn*). As in modern music, Corno, the Italian form of this word, stands for the orchestral or French horn, the use of the word cornu is now practically confined to the instruments so named used by the Romans. These were short curved horns of the bugle character, corresponding to the mediæval bugle and oliphant. One in the British Museum is of bronze, curved to nearly a half-circle, and is about forty-five inches long. Its pitch is about D♭ or a minor third higher than that of the modern infantry bugle. The distinction between the cornu and the Buccina (*q.v.*) is not always clear, and the names may sometimes have been interchangeable. (See also LITUUS and TUBA.) D. J. B.

CORNYSHE, or CORNISH, WILLIAM, was master of the children of the Chapel Royal, in which office he succeeded William Newark in 1509. In the Privy Purse Expenses of Henry VII. under date Nov. 12, 1493, a payment is entered 'to one Cornyshe for a prophecy in rewarde, 13*s.* 4*d.*,' and in the Privy Purse Expenses of Henry's Queen, Elizabeth of York, under date Dec. 1502, a similar amount for 'setting of a carralle upon Christmas day.' When the children of the chapel under Cornyshe took part in the performance of a play at court they were rewarded with the sum of 6*l.* 13*s.* 4*d.* Cornyshe was a great favourite with Henry VIII. We find a payment, '8 Henry VIII. Nov. To Master Cornishe, gentylman of the King's Chapell, upon a warraunt, in rewarde, 200*l.*' But this large sum, no doubt, included gratuities to his brethren in the Chapel. In 1504 Cornyshe, being confined in the Fleet Prison, upon, as he informs us, some false information given by an enemy, wrote a poem entitled, 'A Treatise between Trouth and Informacion,' some extracts from which are given in Hawkins's *History of Music.* The real cause of his incarceration is unknown, but it has been conjectured that he had allowed his pen greater freedom than was agreeable to some persons. However, in 1508 we again find him taking part in a court play, as appears by a payment 'To Mr. Kite, Cornishe, and other of the Chapell that played affore the King at Richmonte, 6*l.* 13*s.* 4*d.*' He went with the king to the Field of the Cloth of Gold, 1520, and devised the pageants at the banquet. He died before Nov. 1524. He was succeeded by William Crane in 1526. (See *Dict. of Nat. Biog.*) W. H. H.

CORNYSHE, WILLIAM, junior, son of the preceding, was a composer in the early part of the 16th century. Three part-songs by him are contained in a manuscript volume compiled by Dr. Robert Fayrfax, and now in the library of the British Museum (Add. MS. 5465). Two of those songs were printed by Hawkins in his *History of Music.* [A 'Salve Regina,' *a* 5, is in the British Museum, Harl. MS. 1709, an 'Ave Maria,' *a* 5, in the library of the Royal College of Music, and a 'Gaude virgo,' *a* 4, as well as the other sacred pieces, in a MS. at Eton. Other vocal works are at Caius College, Cambridge, and Add. MS. 31,922. W. H. H.

CORONA. A synonym for Fermata or Pause, of somewhat rare occurrence; a familiar instance of its use is in the 'Virgo virginum' of Dvořák's 'Stabat Mater,' in which *Senza Corona* is placed over the last note of the movement in the vocal parts, to emphasise the fact that the instruments alone hold out the pause. M.

CORONACH (*Gaelic*, a funeral cry, from *Co*, 'together'—analogue of the Latin *con*—and *ranach*, 'a shrieking or weeping': root *rān*, 'a shriek or cry'). This was the dirge chanted in former times in Celtic Scotland by the Bard or Seannachie on the death of the chief or other great personage of a clan. In some degree it resembled the song of praise composed and led by special bards: the genealogy, the virtues, and the great deeds of the deceased were recounted

in pathetic verse to plaintive wild music, the bard giving vent to his own grief, while the sounds of the harp and the wailings of women excited that of the hearers. However rude, it appears to have been rhythmical, and was chanted in recitative. Although the great funeral ceremonial, of which the dirge was only a part, must have been confined to persons of distinction, yet in all cases the coronach was indispensable, as without it, according to popular belief, the spirit was condemned to wander forlorn, bewailing its miserable fate that this rite had been denied to it. These ceremonies had, however, no religious significance; the virtues, heroism, and achievements of the dead were alone their subject; and the rite continued thus to be observed in Ireland and the Highlands of Scotland long after the conversion of the people to Christianity. Dr. Stewart of Nether Lochaber—perhaps the highest living authority on such matters—writes:—

> Our oldest Gaelic Laments are to this day to be chanted rather than sung; and I can recollect an old seannachie in the Braes of Lochaber, some thirty-five years ago, chanting MacIntosh's Lament to me, in a style of recitative that impressed me greatly; his version of the well-known and beautiful air being in parts very different from that printed in our books; and if ruder and wilder, all the more striking because of its naturalness.

Sir Walter Scott mentions the coronach as a part of the funeral rite when the body of the chief of clan Quhele was borne to an island in Loch Tay (*Fair Maid of Perth*, chap. xxvii.); and again in 'The Lady of the Lake' (canto iii.) he introduces the coronach in the beautiful verses, beginning, 'He is gone on the mountain.' In a note he also gives a translation of a genuine Gaelic coronach. In ordinary cases of death this dirge was simply the expression of the grief of the women of the clan for the loss of a protector or breadwinner, intensified by the genius of a poetic and highly imaginative people.

These funeral customs must have prevailed in Scotland before the advent of the Romans, and been handed down from prehistoric times, for they were confined to the Gaelic-speaking districts north of the wall of Antoninus, and W. F. Skene has now proved beyond a doubt that the Picts, the inhabitants of that region, were a Celtic race, their language being Gaelic with traces of Cornish. In Scotland in modern times the rhapsody of the bard and the wail of the women are no longer heard: the name Coronach has been transferred to the Cumhadh or musical lament, a kind of pibroch now played by the pipers who lead the funeral procession. These pibroch laments are in a peculiarly weird, wild style, well suited for the bagpipe, but not capable of being reproduced on any other instrument. They begin with a simple *motivo*, and this is worked up, with ever-increasing intricacy and rapidity of notes, through a number of divisions or variations, till the same simple wild strain reappears as the close. Some of these laments have a high reputation, such as those of MacIntosh, MacLeod, MacRimmon (*Cha till mi tuille*—I return no more). The last is often played as the emigrant's farewell to his country.

In Ireland these funeral rites would seem to have been celebrated in early times on a much grander scale than in Scotland. Professor Sullivan, in his excellent *Introduction to O'Curry's Lectures on the Manners and Customs of the Ancient Irish*, quoting from the Book of Ballimote and other Irish MSS., shows that in many cases a funeral pyre was erected, the favourite dogs and horses of the deceased slain and burned with the body, and that, in one instance at least, there was an extraordinary addition to the ceremonial. This took place at the funeral of Fiachra, the son of Eochad Muidhmeadhan. He had won a great battle in Munster, and was returning home to Temar (Tara) with the spoil and hostages taken from the enemy:

> When he reached Ferud in Meath, Fiachra died of his wounds there. His *Leacht* (stones set up to protect the urn) was made; his *Fert* (mound of earth) was raised; his *Cluiche Caintech* (pyre) was ignited; his Ogham name was written; and the hostages which he had brought from the South were buried alive round the *Fert* of Fiachra, that it might be a reproach to the Momonians for ever, and that it might be a trophy over them.

The *Cluiche Caintech* here used for the pyre was properly the whole funeral rite, and included the burning of the body, the enclosing of the ashes in the urn, the recitation of dirges, and the performance of games. When in Christian times burial took the place of cremation, some of these observances survived, in particular the dirge or wail, while the lighted candles are supposed to represent the ignition of the pyre. Much information of the most interesting nature will be found in Professor Sullivan's work, and not altogether confined to matters of antiquity. [The Irish *Cumadh* or *Caoine* was somewhat similar to the *Ochone*, an example of which is in the *Fitzwilliam Virginal Book* (ed. Fuller Maitland and Squire, vol. i. p. 87).—W. H. G. F.]

These observances seem to be a survival of rites common to the Aryan nations of antiquity. The funerals of Patroclus and of Hector, as related in the *Iliad*, may be taken as descriptions of a traditionary custom, thousands of years older than Homer, practised by the progenitors of these nations before even the earliest swarm had left its fatherland.

Much interesting matter regarding Celtic customs will be found in O'Curry's *Lectures; Walker's Memorials of the Bards;* Logan's *Gael*, edited by Dr. Stewart, and an admirable chapter on the ethnology of the country in W. F. Skene's *Celtic Scotland.* The writer is also indebted to the late Dr. George MacDonald not only for the Gaelic etymology, but also for kind hints on the subject. J. M. W.

CORRI, DOMENICO, born in Rome, Oct. 4, 1746, studied under Porpora from 1763 to 1767; was invited to Edinburgh in 1771 to conduct

the concerts of the Musical Society, and settled there as a publisher and singing-master. His first publication was a small oblong quarto dated 1772, *Six Canzones dedicated to Scots Ladies.* He quickly made a reputation and became proprietor of some recreation and concert gardens near Edinburgh. He brought out his 'Alessandro nell' Indie' in London in 1774, and engaged in theatrical speculation in Edinburgh, taking the Theatre Royal, but the enterprise failed, and Corri was 'sequestrated' in 1779, shortly after which his business as publisher was carried on under the name of his son, John Corri (see CORRI & Co.). In 1787 Corri joined Mazzinghi and Storace in writing additions to Paisiello's 'Re Teodoro,' and he seems to have settled in London about 1790. He entered into partnership with Dussek, who married his daughter in 1792, and for a time success followed him. His opera 'The Travellers' was produced Jan. 22, 1806. He also wrote a large number of songs; sonatas, airs, and rondos; *The Art of Fingering*, 1799; *A Musical Dictionary*, 1798; *A Musical Grammar*, and *The Singer's Preceptor*, 1810. He died at Hampstead, May 22, 1825. For Natale Corri his brother, and Montague Corri his son, see CORRI & Co. Another son, Philip Antony Corri, was one of the original promoters of the Philharmonic Society, and finally settled in America; another, Haydn Corri, born in 1785, settled in Dublin as a pianoforte teacher in 1819, and from 1821 to 1848 was organist and choirmaster of the Roman Catholic Pro-Cathedral, Dublin. He died Feb. 12, 1860. [*Dict. of Nat. Biog.; Brit. Mus. Biog.; Quellen-Lexikon;* information from Frank Kidson and W. H. Grattan Flood.] M.

CORRI & Co. London and Edinburgh music publishers. As stated above [see CORRI, D.], Domenico Corri had, about 1780, commenced a small music business in Edinburgh, using his son's name, John Corri, probably on account of his own monetary difficulties. In 1780 he, or his son John, was in partnership with James Sutherland, and they opened a shop at 37 North Bridge St. in 1783. On the death of Sutherland in 1790 Domenico Corri removed to London and established himself as a musicseller and publisher at 67 Dean St., Soho. His daughter having, in 1792, married J. L. Dussek the composer, the latter went into partnership with his father-in-law, and as 'Corri, Dussek, & Co.' the firm made great advances, taking additional premises at 28 Haymarket. Meanwhile the Edinburgh business as 'Corri & Co.' had also opened another shop at 8 South St. Andrew St., still retaining the one in North Bridge St.

The London and Edinburgh firms were closely connected, the Scotch business being probably under the management of Natale Corri (1765-1822), younger brother of Domenico, and others of the family. The two firms issued quantities of all classes of music, including many Scottish dance and vocal pieces as well as the compositions of Dussek and of Corri, and some works by Haydn.

In 1801 the Corri-Dussek firm in London got into financial difficulties, and Dussek had fled to the continent in 1800 to avoid his creditors. In 1802, and for a couple of years afterwards, D. Corri kept on the Haymarket business alone, until his son Montague Corri (born at Edinburgh, 1784, died in London, 1849), took it over under the style 'M. P. Corri & Co.' In 1805 it stood 'M. P. Corri, Hall, & Co.' and became, in 1806, 'Corri & Pearce.' Corri entirely dropped out in 1807-8, while Pearce & Co., after having spent some little time at 28 Haymarket, removed to 70 Dean St., and ultimately to 24 Panton St., Haymarket. The Edinburgh CORRI & Co. came to grief at the same time as the London firm, and Natale Corri set up for himself at the head of Leith Walk, the business ceasing at his death in 1822. F. K.

CORRI-PALTONI, MME. FRANCES, daughter of Natale Corri, and niece of Domenico, born in Edinburgh, 1801, a dramatic singer of ability; studied under Catalani in 1815 and 1816. She sang in London (1820); in Germany; in Italy, where she married Paltoni, a singer; in Madrid (1827); and with Lablache in Milan (1828). In 1830 she returned to Germany. Her voice was a fine mezzo-soprano, with a brilliant shake. M. C. C.

CORSI, JACOPO, a Florentine nobleman whose house is to be regarded as the birthplace of opera. The history of the inception and development of the new form of art and of its first-fruits, the 'Dafne' of Peri, performed in 1597, is given under OPERA; it was in the house of Corsi that this, and Peri's 'Euridice,' were first performed, the latter in 1600, Corsi himself playing the harpsichord. (See Vogel, *Bibl. der weltl. Mus. Italiens, s.v.* Peri.) Corsi had also some part in the composition of 'Dafne,' and his setting of some of the songs is the only fragment that has been preserved of that work. They are in the library of the Paris Conservatoire (MS. 8450), and were published by Fritzsch in the *Musik. Wochenblatt* 1888, p. 347. (Eitner, *Quellen-Lexikon.*) Corsi died about 1604. M.

CORTECCIA, FRANCESCO DI BERNARDO, born early in the 16th century at Arezzo, died in Florence, June 7, 1571; in 1531 organist of S. Lorenzo in Florence, and in 1539 maestro di cappella to Cosimo I.; also a Canon of S. Lorenzo. His compositions include nine pieces for 4, 6, and 8 voices with various instruments, in a rare work called 'Musiche fatte nelle nozze, etc.' (Venice, Gardano, 1539) [a continuous series, part of a performance in honour of the marriage of his patron]; 'Madriali (*sic*) a quattro voci,' lib. 1 and 2 (*Ib.* 1544 and 1547); 'Primo libro de' Madriali a 5 e 6 voci' (*Ib.* 1547); 'Responsoria et lectiones hebdomadae anctae' (*Ib.*

1570); 'Residuum cantice Zachariae' *a* 4 (apparently forming part of the 'Responsoria') (*Ib.* 1570); and 'Canticorum liber primus' *a* 5 (*Ib.* 1571), published a few months after his death. A copy of the madrigale is in the Library of Christ Church, Oxford. The Library of S. Lorenzo also contains 32 hymns in 4-part counterpoint. Corteccia, with Striggio, composed music for Cini's intermezzo 'Psichè e l' Amorino,' for the marriage of Francesco de' Medici and Joanna of Austria in 1565. [Two four-part madrigals, and an extract from the 'Responsoria' are given in Torchi's *Arte Musicale in Italia*, vol. i.] M. C. C.

CORTELLINI, CAMILLO, a composer of church music, who lived at the commencement of the 17th century, and was in the service of the municipality of Bologna from about 1583. From his proficiency on the violin he went by the name of Il Violino. Vincenti of Venice published several volumes of his works, consisting of Psalms (1595, etc.), Litanies (1615), Masses (1609, 1617, 1626), and other sacred pieces [and other printers, at Ferrara and Bologna, issued three books of madrigals in 1583, 1584, and 1586. See *Quellen-Lexikon.*] The preface to one of these volumes, 'Messe concertate a otto voci' (1626), is interesting because it gives a hint of the manner in which in those early times the instrumental and vocal parts were combined in church music. The passage alluded to is as follows: 'La Messa *In Domino confido* ha la Gloria concertata; e dove saranno le lettere grandi, il cantore canterà solo; e dove saranno le linee, i tromboni e altri simili stromenti soneranno soli.' E. H. P.

CORYPHÆUS (κορυφαῖος, chorus-leader). An officer on Dr. Heather's foundation at Oxford, intended by the founder to take the lead in the musical exercises conducted by the CHORAGUS. The duties of the Coryphæus have long been imaginary: his salary was never more than nominal. C. A. F.

COSI FAN TUTTE, OSSIA LA SCUOLA DEGLI AMANTI. An opera buffa in two acts, commanded by the Emperor, libretto by Da Ponte, music by Mozart; produced at Vienna, Jan. 26, 1790; London, King's Theatre, May 9, 1811. The libretto is so bad and the music so good that various attempts have been made to fit the opera with new words, as 'Le Laboureur Chinois' (1807), 'Peines d'amour perdues' (Barbier & Carré, 1863). Otto Jahn possessed a MS. Mass made up from it. In England it was translated as 'Tit for Tat,' and produced at the English Opera House, July 29, 1828. It was also given at the Lyceum, as 'The Retaliation,' on April 14, 1841. The German version is entitled 'Weibertreue.'

COSSMANN, BERNHARD, an eminent violoncellist, son of a Jewish merchant; born at Dessau May 17, 1822. His first instructors were Espenhahn and Karl Drechsler at Dessau, Theodor Müller at Brunswick, and Kummer at Dresden. After completing his studies, Cossmann went to Paris in 1840, where he played in the orchestra of the Grand Opéra, and thence to London (1841), in the then palmy days of Italian opera. In 1843 he was an acknowledged master of his instrument in Germany. Mendelssohn secured him in 1847 for the Gewandhaus concerts, and he utilised his stay in Leipzig by studying under Hauptmann. His appointment as first violoncello under Liszt at Weimar, in 1850, exercised an important influence on his career. He had a considerable share with Joachim, and also with Bülow and Tausig, in the movement which took place under Liszt's leadership. In 1866 he became professor at the Conservatoire at Moscow, where he worked with Laub and Nicolaus Rubinstein until his return to Germany in 1870. He lived without any fixed appointment at Baden-Baden, from 1870 to 1878, when he became professor at the Hoch Conservatorium at Frankfort, a post he still holds (1904). Cossmann was a virtuoso of the first rank. He was remarkable alike for science, polished execution, and power of singing on the instrument. Furthermore he was a great soloist, and an excellent chamber musician, above all in quartets. This last quality he owed partly to his studies under Müller, and partly to the general cultivation he acquired at Weimar. He has brought forward many new concertos, as well as some unworthily neglected compositions. He wrote a concertstück for violoncello of slight importance. A. M.

COSTA, ANDREA, teacher of singing; born at Brescia, settled in London in 1825. His best pupils were Mme. Borgondio, and Mme. Albertazzi. He published a method called 'Analytical Considerations on the Art of Singing' (London 1838). M. C. C.

COSTA, MICHAEL ANDREW AGNUS,[1] son of Cavaliere Pasquale Costa, of an old Spanish family, was born at Naples, Feb. 4, 1808. Having a great inclination for music, the rudiments of which he learnt from his maternal grandfather Giacomo Tritto, he was placed at the Real Collegio di Musica in Naples, and at a public examination obtained a free scholarship from Ferdinand I., King of the Two Sicilies. At the age of fifteen, he composed a cantata, for the theatre in the college, entitled 'L' Immagine.' In 1826 he composed for the same theatre an opera called 'Il Delitto punito'; and in 1827 another, 'Il Sospetto funesto.' He composed

[1] These names are confirmed by a declaration as to the date of his birth, made in London at the Bow Street Police Court in June 1847, by his brother, Raphael Costa: also in the recommendation paper for admission into the Royal Society of Musicians, in July of the same year. The second document is signed Michael Andrew Agnus Costa, but with evident uncertainty as to the order of the second and third names. In both documents the date of his birth is given as Feb. 4, 1808. Both are quoted in *Mus. Times* for 1897, p. 306, where the third name is incorrectly given as 'Angus.' The date 1810, for the year of birth, given in the first edition of this Dictionary, rests upon the testimony of Costa himself, and is confirmed by the register of deaths at Somerset House. The earlier date is most probably the correct one, as it is confirmed by both the brothers, and occurs in both the official documents mentioned above; and most men would be less likely to err in such a date at the age of thirty-seven or thirty-nine, than at the age of sixty-seven or sixty-nine.

also at this period a Grand Mass for 4 voices, a 'Dixit Dominus,' three symphonies, and an oratorio, 'La Passione.' In 1828 Costa was engaged by the manager of the Teatro Nuovo to compose an opera semi-seria, called 'Il carcere d' Ildegonda.' In 1829 he composed 'Malvina,' an opera, for Barbaja, the famous impresario of San Carlo. In the autumn of that year, Zingarelli, his *maestro*, sent him to Birmingham, to direct a cantata of his composition, on Is. xii. On the young Costa's arrival, through some misunderstanding, he was obliged, having a fair tenor voice, to sing in the cantata instead of directing the music. In 1830 he was engaged by Laporte, as *maestro al piano* at the King's Theatre. In the next year he composed the music of the grand ballet, 'Kenilworth.' In 1832 Monck Mason, the then impresario, engaged him as director of the music; and in that capacity he wrote the ballet, 'Une heure à Naples,' and several other pieces for operas and concert-rooms. 'This was the year,' writes H. F. Chorley, 'when (happy event for England!) the Italian orchestra was placed under the direction of Signor Costa.' In 1833, engaged by Laporte as director and conductor, he composed the ballet 'Sir Huon' for Taglioni, and the favourite quartet, 'Ecco quel fiero istante.' At the invitation of Severini, the impresario of the Italian opera at Paris, he wrote the opera 'Malek Adhel,' which was performed there in Jan. 14, 1837, with moderate success, but with better fortune in London. The critic already quoted says on this point, 'Whether a great conductor can ever be a great composer, is a doubtful matter. . . . From the first evening when Signor Costa took up the baton,—a young man, from a country then despised by every musical pedant, a youth who came to England without flourish, announcement, or protection . . . it was felt that in him were combined the materials of a great conductor; nerve to enforce discipline, readiness to the second, and that certain influence which only a vigorous man could exercise over the disconnected folk who made up an orchestra in those days. His "Malek Adhel" is a thoroughly conscientious work, containing an amount of melody with which he has never been duly credited.' In 1842 Costa composed the ballet-music of 'Alma' for Cerito; and in 1844 the opera 'Don Carlos.' In 1844 three new operas were produced in London, of which 'the worthiest,' says Mr. Chorley, 'was Signor Costa's "Don Carlos," which had nevertheless not the good fortune to please the public. Yet it is full of good music: the orchestra is handled with a thorough knowledge of effect and colour. One trio for male voices is so solid and fine that it ought not to have been soon forgotten.' In 1846 he quitted the opera; and the orchestra, which he had brought to a point of perfection previously unknown in England, passed into other hands. In that year Costa undertook the direction of the Philharmonic orchestra; and that of the new Italian Opera, Covent Garden; and in 1848 that of the Sacred Harmonic Society. In 1849 he was engaged for the Birmingham Festival, which he conducted until 1882. With the season of 1854 he gave up the baton of the Philharmonic, and was succeeded (for one year) by Richard Wagner. In 1855 he composed his oratorio 'Eli' for the Birmingham Festival. He conducted the Bradford Festival in 1853, and the Leeds Festival in 1874; and as conductor of the Sacred Harmonic Society directed the Handel Festivals from 1857 to 1880. Beside other occasional compositions, his second oratorio, 'Naaman,' was also written for Birmingham, in 1864. He wrote additional accompaniments for 'Solomon,' 'Judas,' and others of Handel's oratorios for the Sacred Harmonic Society. In 1869 he received the honour of knighthood. He was also decorated with orders from the sovereigns of Germany, Turkey, the Netherlands, Würtemberg, Italy, etc., in recognition of his talent and position. He was appointed in 1871 'director of the music, composer, and conductor' at Her Majesty's Opera. His services in those capacities will not soon be forgotten in London. He died April 29, 1884, in London, and was buried in the catacombs of Kensal Green Cemetery. J. M.

COSTANTINI, Fabio, born in Rome about 1570, chapel-master to the confraternity of the Rosary at Ancona, and afterwards at the cathedral of Orvieto, where he was in 1614; in 1616 he was at the Basilica Sta Maria at Tivoli, and in 1618 again at Orvieto. His compositions include motets for 2, 3, and 4 voices (Rome, 1596). He also published 'Selectæ cantiones excellentissimorum auctorum' (Rome, 1614), a collection of 29 8-part motets by Palestrina, the Nanini, the Anerii, Marenzio, Lucatello, Giovanelli, and others besides himself; another set of motets by different authors in 1618, a collection of airs and madrigals called 'Ghirlandetta amorosa' (Orvieto, 1621) and another, 'L'Aurata Cintia,' in 1622. All these contain compositions of his own, and by his brother, Alessandro Costantini, who succeeded Frescobaldi at St. Peter's in Rome in 1643. M. C. C.

COSTANZI, Juan, or Giovanni Battista, known as Gioannino di Roma, because he was born there; was for some time in the household of Cardinal Ottoboni, and was appointed in 1754 chapel-master of St. Peter's, which he retained till his death, March 5, 1778. He composed an opera 'Carlo Magno' (Rome, 1729); an oratorio, 'S. Pietro Alessandrino,' a fine 'Miserere'; motets in 16 parts for 4 choirs, offertoriums, and other church music. [See list in the *Quellen-Lexikon.*] M. C. C.

COSTE, Gaspard, chorister in the cathedral of Avignon about 1530, composer of songs and madrigals, preserved in the following collections:

'Trente-cinq livres des chansons à quatre parties' (Paris, 1539-49); 'Le Parangon des chansons' (Lyons, 1540-43); 'Motetti del Fiore' (*Ib.* 1532-39); 'Sdegnosi ardori; Musica di diversi autori sopra un istesso soggetto di parole' (Munich, 1575); and 'Ghirlanda di Fioretti musicale' (Rome, 1589). M. C. C.

COSTELEY, WILLIAM, a Scotch musician, born 1531, settled in France, and was organist to Henri II. and Charles IX. Author of songs in the 'Chansons à 4 et 5 parties,' published by Le Roy and Ballard (Paris, 1567); [also of a set of 'Chansons' called 'Musique de Guillaume Costeley, Organiste ordinaire et vallet de chambre du . . . Roy.' These were republished in 1896, edited by M. Henry Expert.] Some pieces of his are in the library at Orleans. Costeley was one of the society established in 1571 or 1573 (see *Quellen-Lexikon*) in honour of Saint Cecilia, and its first president. The society established a musical contest, at which, in 1575, Orlando di Lasso carried off the first prize, a silver harp. He sometimes entertained the members at his own house in Evreux. He died there, Feb. 1, 1606. M. C. C.

COSYN, BENJAMIN, possibly a son of John Cosyn (fl. 1585), was organist of Dulwich College in 1622-24, and of the Charterhouse in 1626-44. He was the writer of a collection of Virginal Music now in the Royal Library at Buckingham Palace. See VIRGINAL MUSIC, iv.

COTILLON (*i.e.* 'a petticoat'). Originally a simple French dance of the age of Louis XIV., which, according to some authors, resembled the BRANLE, but, according to others, was a variety of quadrille. The modern cotillon is simply a species of quick waltz, of great length and elaborate contrivances, but with no special music: for the different varieties of it, waltzes, polkas, mazurkas, and galops are employed. E. P.

COTTA, JOHANNES, born at Ruhla in Thuringia, May 24, 1794; died at Willerstedt, March 18, 1868, is worthy of mention as composer of the spirited music for four male voices to Arndt's patriotic song, which electrified Germany at the time of the rising against Napoleon in 1813, commencing 'Was ist des Deutschen Vaterland.' The same song was skilfully set, but with undesirable complexity, by G. Reichardt in 1826. But Cotta's tune is the one wedded to the poem from the beginning, and during the period of enthusiasm for the new national idea; it enjoyed a second period of special popularity in the Franco-German war of 1870-71. R. M.

COTTAGE PIANO (Fr. *Piano droit;* Ital. and Ger. also Fr. *Pianino*). An upright pianoforte usually about four feet high, invented early in the 19th century, nearly at the same time as the Cabinet piano, but less thought of for some years, until the more convenient height and better action of the lower instrument, combined with cheaper construction, found appreciation, and brought about the displacement of the Cabinet and the once familiar Square. To Robert Wornum the younger, whose patent (No. 3419) for an upright, with diagonal strings, was taken out in 1811, is due the invention and earliest manufacture of oblique and vertical cottage pianofortes in England. In the year 1815 Ignace Pleyel, founder of the house of Pleyel, Wolff, et Cie., employed Henri Pape, an ingenious mechanician, to organise the introduction of the construction of these instruments in Paris (Pape, Sur les Inventions, etc.; Paris, 1845), from which beginning arose the important manufacture of French cottage pianos. In Germany and America upright pianos have not made much way. [See PIANOFORTE.] A. J. H.

COTTON, JOHN, the author of a treatise on music, dating from the latter part of the 11th or the beginning of the 12th century. There exist six copies in MS., at Leipzig, Paris, Antwerp, the Vatican Library, and two at Vienna. A seventh copy, used by Gerbert, who published the treatise in 1784, was destroyed in the fire at St. Blasien in 1768. In the Paris and Antwerp copies the authorship is ascribed to Cotton or Cottonius, two of the others bearing the title 'Joannis Musica.' Gerbert quotes an anonymous work (*De Script. Eccles.*), in which reference is made to a learned English musician known as Joannes; and the dedication of the book, which runs 'Domino et patri suo venerabili Anglorum antistiti Fulgentio,' bears out the assumption that its author was English. It has been variously proposed to ascribe its authorship to Pope John XXII., and to Joannes Scholasticus, a monk of the monastery of St. Matthias at Trèves, but the above theory is probably correct. The treatise is valuable as explaining the harmonic system of the period in which it was written. (*Dict. of Nat. Biog.*) W. B. S.

COTUMACCI, or CONTUMACCI, CARLO, born at Naples, 1698, died there 1775; pupil of A. Scarlatti, succeeded Durante at S. Onofrio; organist and composer of church music. The royal library in Naples contains the autograph of a requiem, *a* 5-8, 4 sacred songs, toccatas for harpsichord, and a set of 'Partimenti.' He wrote 'Regole dell' accompagnamento' and 'Trattato di contrapunto,' works which have remained in MS., excepting some 'Partimenti,' published by Choron in his *Principes de composition des écoles d'Italie* (Paris, 1808). M. C. C.

COUAC (French for 'quack'), a sudden horrible noise to which any clarinet is liable when the reed is out of order and the wind not quite under control. Called also 'the goose.' (See a good story in Spohr, *Selbstbiographie*, i. 167.)

COUCHED HARP. An obsolete name for SPINET, which see.

COUNTERPOINT (Lat. *contrapunctus*, Ital. *contrappunto*, Germ. *Kontrapunkt*, Fr. *contrepoint*). The name given to the art of combining melodies, or (more strictly) to the art of adding melody to melody. The term is also

often applied to the added melody itself, when a subject invented to accompany another subject is called its counterpoint. The latter meaning suggests more nearly the origin of the word. It is said that when notes were indicated by points, a counterpoint signified a note set against another note, hence a part set against another part. Such an origin is confirmed by the subsequent use of the like term *nota contra notam*, which is to be found in Zacconi's treatise (*circa* 1595), and is still to be heard as a definition of the simplest order of strict counterpoint—*note against note.* Zarlino enters into a long discussion of the term, adding: 'It would perhaps have been more reasonable to call it Countersound than Counterpoint, because one sound is to be opposed to the other. But not to depart from the common use, I would call it counterpoint, as it were a point placed counter a point, or a note counter a note.'

Speaking broadly, the term counterpoint is employed in two distinct senses. In its ideal sense as the art of combining melodies it is applicable to music, of any school, which shows marked melodic independence of parts, such as may be found, for example, in all fugal movements and in most choral works of any magnitude. Men praise the great contrapuntal skill of Mozart, Brahms, or Wagner, as well as the flowing counterpoint of Palestrina; and Bach is called the greatest of all contrapuntists. But in the study of music counterpoint is the term applied to a particular and restricted part-writing, in which attention is expressly directed to the melodiousness of every part, and for this purpose the available harmonies are specially and rigorously limited. Historically, the narrower use of the word is more significant; for the scholastic art of counterpoint, though taught in five conventional species, is the direct descendant of the pre-harmonic or first polyphonic schools of composition, which reached their perfection at the end of the 16th century. The laws of counterpoint in this sense are analogous to, if not exactly commensurate with, the laws of composition before 1600, before Monteverde's revolution and the consequent harmonic development. They are a wonderful survival of an old code of rules, once comprehending the whole art of the composer, but since used for scholastic purposes. Thus it came about that long after the death of the great author of the Chromatic Fantasia and Fugue, Albrechtsberger and Haydn took pains to teach Beethoven to write like Palestrina; and the same restrictions, with various modifications in the hands of successive theorists, have been preserved to the present day. This scholastic preservation of an old art resembles that of a dead language; in fact, strict counterpoint bears much the same historical and practical relationship to the language of modern music as Latin bears to English, and may almost as justly be called a dead language. From this it will be seen that while in one sense counterpoint is vitally existent in all music and continually progressive, in another, narrower, scholastic sense it is the reverently preserved art of a past age, that of the golden age of choral art.

It may readily be imagined that for purposes of tuition, counterpoint on this historic basis becomes gradually less adequate as music advances and the first polyphonic age grows more remote. This fact has given rise to many modifications of the rules from time to time. It cannot be denied that these modifications have often caused much confusion. But, while this may be deplored, it is clear that such a drawback could never justify a conservatism which would forbid the independent judgment of successive theorists.[1] And in reality the old counterpoint has not only survived its ordeal, but its passage from hand to hand has sifted and strengthened it so effectively that the surviving principles would doubtless form a more crystallised basis of 16th-century writings than any expounded at the time. Its preservation may be attributed primarily to the sheer force, beauty, and maturity of those writings themselves; it is obvious that as the art of music widens, that which is lovely in the composers of the golden age is none the less its basis; in fact, though the old order becomes practically less adequate it does not become less important. Much also must be attributed to the general faithfulness of theorists, and especially to the powerful work and influence of one man, Fux, who stood midway between the first polyphonic age and our own. With the slight modifications already referred to, it was handed down further through Haydn, Albrechtsberger, and Cherubini; and it is still preserved in England at our colleges, in our university examinations, by many individual teachers, in the primers of Ouseley, Rockstro, Bridge, and Pearce, and, to a more modified extent, in the important treatises of the late Sir George Macfarren and of Professor Prout. No man has done more in modern times for its reverent preservation than the late W. S.

[1] These modifications are obviously planned either to remove old restrictions which are considered needless or to impose new ones. It may be noted that the tendency has been to remove *melodic* restrictions and impose *harmonic* ones. Examples of increased latitude are (1) the freer use of such intervals as the major sixth and diminished fifth in melody which Haydn, Albrechtsberger, or Cherubini favoured; (2) the use by the latter two masters of ornamental quavers disjunctly approached and quitted—a manner opposed to the style of Palestrina; (3) the advocacy in more modern times of many melodic leaps, such as diminished fourths or sevenths. One subtle harmonic restriction removed is the old *ottava battuta*, which even Fux, after long and patient consideration, abandoned. Notable among restrictions imposed is Cherubini's condemnation of the changing note; but the chief are those which insist upon a harmonic basis of one chord in a bar—restrictions of which Macfarren was the great exponent. The practical advantages are clear, but they cost the sacrifice of many beauties of the older style. The conflict of principles involved may be well illustrated by the available two-part cadences of the second species:

Both are consonant, as is required by all teachers alike; but melodic considerations caused the older writers to adopt (*a*) and reject (*b*), while harmonic considerations caused Macfarren to adopt (*b*) and reject (*a*). Many authorities have accepted both, among whom is Albrechtsberger.

Rockstro, who took the strongest possible conservative position. He went so far as to urge the reservation of the term counterpoint for the first polyphony; and in spite of the many modifications for practical use advocated by his contemporaries, both here and abroad, he bravely asserted that no new rules ever have been or ever can be added to it. It must be taught, if taught at all, exactly as it was taught in the 16th century.[1] This was bold; but not, it would seem, too bold in face of the facts. For not only is the preservation of historic counterpoint due to the innate beauty of the old writings and the faithfulness of those who have transmitted it, but also to the following two significant facts: (1) In the acquisition of the power of combining melodies, all authorities unanimously regard *severe harmonic restrictions* to be absolutely necessary; a student cannot acquire contrapuntal skill with the responsibilities of the whole harmonic system upon him. (2) In historic counterpoint these harmonic restrictions are determined with unequivocal clearness by the course of the evolution of the art itself. The chords and methods allowed are seen to be such as formed the basis of all music; they are for ever clearly defined and divided from harmonic art by the greatest landmark in musical history. Thus they not only possess a dignity and authority which the most powerful individual teacher could never assume, but they serve to unify methods and instruct students at the same time in the history of their art, providing them with the comforting assurance that they are not subjected to the arbitrary restrictions of a kind of musical gymnastic exercise, but that they are learning to acquire their art from its basis.

The rules of counterpoint on this historic basis are fully described in the article STRICT COUNTERPOINT, together with some account of the line of writers through whom it has been handed down.[2] The present article will be devoted rather to indications of the evolution of counterpoint in its more general sense, as well as to a short account of various methods of teaching the subject—both those which led up to the formulation of strict counterpoint as it now stands, and those which have followed it.

Counterpoint and harmony contrasted.—In attempting to trace the evolution of counterpoint, it is necessary to differentiate between it and the sister art of harmony. The first polyphonic age is conveniently named *pre-harmonic.* But in truth harmony has not only existed as long as counterpoint, but in a crude form it necessarily came first. The art of melody naturally preceded both, and for centuries the melodies of the Christian Church and doubtless those of the people must have been sung unisonally. In this the art's infancy, the introduction of a note or notes foreign to the actual melody by way of accompaniment must have been unmeaning and unallowable.[3] The momentous step towards both harmony and counterpoint which is recorded in Hucbald's simple, crude, well-quoted *Diaphony* may have been taken in the first instance quite casually. As it never has been natural for tenors and basses to sing either in the same pitch or a whole octave apart, it seems likely that diaphony, which is practically the doubling of a tune at closer quarters than the octave, was invented by the monk who first dared to find and use an interval better suited to his voice, probably a fifth or fourth above or below the other singers.[4] That which seems (if one may judge from available examples) barely more than a less perfect kind of unisonal singing ought hardly to be called harmony, still less counterpoint. Yet it marks the advent of both. For with the first deliberate sounding of a strange note together with a plain-song, harmony was born; and with the first progression from the newly found interval back to the usual octave or unison, independent movement of parts was discovered and counterpoint was born. Both arts must have seemed utterly new on their first and apparently almost simultaneous arrival. Doubtless their latent possibilities were as unperceived as they were vast. It is easy for us to discern their essential difference in this early stage; and when it is clearly seen, there can be little surprise that the two were destined to be developed as separately as the union of their natures would allow. For it may be said that this incipient harmony required the cultivation of a new sense—the sense to enjoy two simultaneous sounds; while counterpoint required as well a new intellectual power—the power to appreciate two independent parts. The latter has kept its more intellectual nature and reputation throughout. The very name generally suggests erudition. It has even fallen at times into disrepute as the cold, heartless, mental side of music; and while melody has of course always been an easy first in popular esteem, harmony is as easily second, and counterpoint—exacting more effort though perhaps on this very account yielding greater reward—comes last. Had Hucbald's new art depended upon the people for its development, it is easy to imagine that harmony would have had first attention. But the more intellectual promise of the sister-art seems to have attracted church musicians, in whose hands the destiny of music then lay; and as history clearly shows, while harmony took good care of itself, counterpoint received

[1] See introduction to Rockstro's *Rules of Counterpoint*, p. 5.

[2] See also POLYPHONY.

[3] This is hard to realise now, when the most fugitive strain of melody is apt to suggest accompanying harmonies, when indeed many favourite tunes, both classical and popular, such as the first subject of Beethoven's 'Eroica' (see article MELODY), and such also as the wayward Swiss *yodel*, presuppose some simple harmonic conception on the part of the listener.

[4] Mr. Rockstro supposed that this was first done with or in imitation of the organ (introduced into churches at the end of the 7th century). This origin is strongly suggested by the name *Organum*, which was given to the added part. [But see DIAPHONIA and ORGANUM.]

almost sole attention for centuries, until it attained its first perfection in Palestrina's work upon a harmonic basis of great innocence and simplicity—as simple as composers in the process of adding melody to melody could even unconsciously have devised.

No just appreciation, however, of the essential difference between these two arts can be formed which overlooks their permanent union and interdependence. Though they have each had periods of special attention, they could not but grow together ; and each was developed in the development of its companion, even at the very time of its own greatest apparent neglect. Their coexistence has been so complete as to cause much confusion between them. It is hardly surprising that Zarlino should describe counterpoint as the concordance of several different parts and 'as the very same as that which he named proper harmony.' It is still less so to note, in passing, that Dr. Johnson defined it as 'the art of composing harmony.' But it is strange that Reicha (1770-1836), the famous theorist and friend of Beethoven, boldly states that the terms harmony and counterpoint are synonymous. In criticism of this statement, Sir Frederick Ouseley suggested the clever and now popular distinction that they are respectively the *vertical* and *horizontal* aspect of music (this of course refers to their appearance on paper).[1] It is perhaps more comprehensive to say that in part-music of every kind, simple or complex, ancient or modern, *when two or more parts conspire to convey one idea*, the result is harmony ; *when each part conveys its own idea*, the result is counterpoint. It is true that in the hands of great masters such a perfect union of the two is attainable, that the very parts which make the most brilliant counterpoint may together present imposing and elaborate harmonic invention. Indeed it is pleasant to imagine that they may each attain their highest end in serving the purposes of the other. Still it may safely be said that in practice the balance is rarely so exact that the attention of the listener is not directed more to one side than the other ; rarely can a composer be said to show impartial affection for and mastery of both. Further, it is doubtless better for the development of both that each has had its periods of special attention, to the temporary detriment of the other. And there seems ample practical as well as historical justification for the fact that great musical institutions still send their students into one room to study harmony and into another to study counterpoint.

Evolution of early counterpoint. — History shows that as soon as such primitive harmonic material as that of Hucbald had made independent conception of parts possible, men were led to set totally different melodies against one another experimentally. They could not long indulge in this premature contrapuntal art without attempts to frame laws for the choice and fitting together of their intervals. It seems paradoxical (quite sufficiently so to account for the frequent confusion of the two arts) that any attempt to combine melodies must at once centre the attention upon questions of harmony. As new serviceable intervals were discovered, classification would soon follow, the euphonious being preferred, the cacophonous rejected ; and by degrees the harmonic basis for the new art of combining melodies would become dogmatically determined.[2]

The most interesting feature in this process was the treatment of the fourth. An almost pathetic interest attaches to its dethronement from its first place among perfect concords to the servile position of a discord. It seems probable that as long as not more than two parts were sung simultaneously, no strong enough reason would occur to cause its banishment. But when three parts were tried, the superior adaptability of the interval of a third must soon have been apparent. It would combine with every other interval except the fourth, whereas the fourth itself was hopelessly at war as a concord with the fifth—the most satisfactory interval of all except the octave itself. At (*a*) in the following example all the available concords are set down (only one third and one sixth being given for the sake of simplicity):—

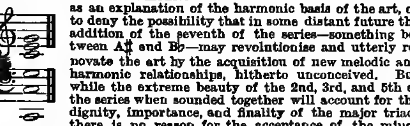
At (*b*) the combinations are shown which ultimately formed the foundation for the whole art of counterpoint. At (*c*) the fourth displays reason for its rejection in its failure to do what the third succeeds so well in doing.[3] Thus the fourth fell to its inferior position, and became merely a serviceable suspension or a passing note, assuming exactly the same subordinate relationship to the very interval which usurped its place as the ninth naturally assumed to the octave or the seventh to the sixth, as may be seen in the following example :—

When once this slender basis had been evolved, musicians found—simple as it was—

[1] It is possible that this distinction was made before Ouseley, though he appears to be the author of it.

[2] For a full account, see HARMONY.

[3] There is no intention here to undervalue the importance of the first six natural harmonics—



as an explanation of the harmonic basis of the art, or to deny the possibility that in some distant future the addition of the seventh of the series—something between A♯ and B♭—may revolutionise and utterly renovate the art by the acquisition of new melodic and harmonic relationships, hitherto unconceived. But while the extreme beauty of the 2nd, 3rd, and 5th of the series when sounded together will account for the dignity, importance, and finality of the major triad, there is no reason for the acceptance of the minor triad and chords of $^6_3$ which could not be advanced in favour of the rejected $^6_4$, for which beautiful and still despised concord it seems safe to prophesy a new era of prosperity.

that it supplied inexhaustible means for melodic combinations to which they turned affectionate attention. In Dowland's charming translation (1609) of Ornithoparcus (1513) we read :—

A song in our times hath not one voyce alone but five, six, eight, and sometimes more. For it is evident that Joannes Okeken did compose a Mot-tet of 36 Voyces. Now that part of Musick which effecteth this is called of the Musitians the *Counterpoint.*

That which follows is worth quoting, as it throws interesting light on the early use of the terms counterpoint and composition.

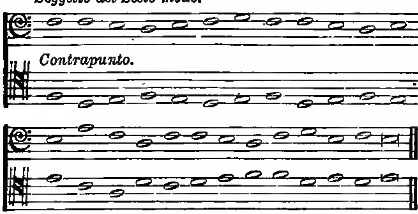
For a *Counterpoint*, generally, is nothing else than the knowledge of finding out of a song of many parts. Or it is the mother of *Modulation*, or (as Franchinus writes) it is the Art of bending sounds that may be sung, by proportionable Dimension, and measure of time. For, as the clay is in the hands of the Potter, so is the making of a song in the hands of the Musitian. Wherefore most men call this Art not the *Counterpoint*, but *Composition*, assigning this difference of names, and saying that *Composition* is the collection of divers parts of Harmony by divers *Concords*. For to compose is to gather together the divers parts of Harmony by divers Concords. But the *Counter-point* is the sodaine, and unexpected ordering of a plaine song by divers Melodies by chance. Now it is called *Counterpoint*, as it were a concordant *Concent* of Voyces set one against another, examined by Art.

This careful distinction, though not altogether perspicuous to the present writer, seems to indicate the tendency to identify *composition* with the vague, less-restricted feelings after harmonic invention (the art of the future), and *counterpoint* with the laws which showed how to combine divers melodies in a 'concordant *concent*.' It also clearly indicates how closely the two terms were allied, with just the bare suggestion that the former was superior to, and included, the latter.

A rather different account of the distinction between counterpoint and the rest of music is given by the later theorist, Zacconi, in his *Prattica di Musica*. It seems to have been usual from early times to use the *canto fermo* or fixed song for the cultivation of contrapuntal ingenuity. Its origin may be traced in Guido's *Discantus*, where a free part (*organum*) was added to the plain-song ; and, indeed, nothing seems more natural than that the learned musicians should find their greatest pleasure and exercise of skill in adorning the existing songs of the church. The plan was generally adopted in various ways up to Palestrina's time, but as an educational necessity it seems first to have been dogmatically fixed by Zacconi. In the two opening chapters of the second book of the *Prattica* he insists at length that counterpoint is composition *framed upon one part*, the integrity of which is to be continually kept ; and he excludes other musical compositions (including masses, motets, madrigals, songs, etc.) where the parts 'correspond with each other'—by which phrase he probably means, concede to each other's needs. By the vigour of his insistence, and the public manner of 'putting aside the various definitions given by Zerlino and by other former writers,' this may be judged to be the formal inauguration of the *canto fermo* for scholastic purposes, and it has been adopted ever since.

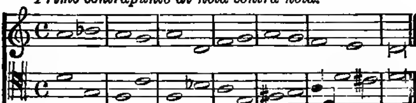
Early contrapuntal exercises.—Though STRICT COUNTERPOINT is fully described under its own title, some account may now be given of a few early exercises on *canti fermi* which afford interesting prototypes of the five species ultimately established by Fux.

In the first species (note against note) counterpoint and harmony are studied simultaneously, both being reduced to their simplest as well as to equal terms. This will always be the student's preliminary training-ground, where he may learn to choose apt harmonies without the sacrifice of melodic beauty. Many early examples may be found, called by various names—by Artusi, *contrapunti semplici ;* by Zacconi, *contrapunto di nota contra note ;* by Zarlino, *contrapunto piano.* Two instances may be quoted. The first is from Zarlino, to be found on p. 225 of his *Istitutioni :*—



It is in the Hypophrygian mode, which increases its vagueness to modern ears ; but though both vague and quaintly monotonous, striking independence of parts is shown, and a certain beauty of effect obtained in the latter half.

The second is a somewhat later example from Zacconi :—



A very early example of this kind of writing, but probably not a theorist's exercise, is quoted in the article POLYPHONIA. But plain species, though fundamental, forms the smallest part of the study of counterpoint, since the possibilities of melodic independence of parts are reduced to their lowest point. The two contrapuntal purposes—of cultivating variety of parts and of bending them to 'points of concent'—are both better served by the apt use of contrasted note-values in the different parts—one part being held back while the other proceeds in shorter notes, or one being ornamented while the other remains plain. On this account the chief methods of acquiring contrapuntal skill are those of other species, in which students are taught to write two, four, or more notes to one, or suspensions, or varied and ornamental

parts (florid species). The following further examples from Zacconi are of great interest; for, besides showing early uses of the second, third, fourth, and fifth species, they indicate two other important styles of counterpoint which, it may be regretted, have not survived:—

Other methods of two-part counterpoint even more elaborate are to be found in Morley's *Plaine and easie Introduction* (1597). It seems a pity that the study of some of these, notably the five-crotchet example, should not be revived. It is not convenient to quote the whole of each exercise; their styles are sufficiently indicated by the five or six opening bars of each:—

Of these varieties, more like music of the future than of the past, Morley tells his readers that the first is called *crotchet, minime and crotchet;* the second *minime and crotchet:*—

The third is a driving way in two crotchets and a minime but odded by a rest so that it never commeth even till the close. The fourth waie driveth the crotchet rest throughout a whole lesson all of minims, so that it never commeth even till the end. And in these waies you may make infinite varietie. . . . The fift waie is called *Tripla,* when for one note of the plainesong, they make three blacke minimes, though (as I tolde you before) this bee not the true tripla, yet have I set it downe unto you in this place, that you might know not only that which is right, but also that which others esteemed right. And therefore likewise have I set downe the proportions following, not according as it ought to bee in reason, but to content wranglers.

Later he adds:—

It hath been no small toyle for mee to seeke out the authorities of so manie famous and excellent men, for the confirmation of that, which some may thinke scarce worth the making mention of.

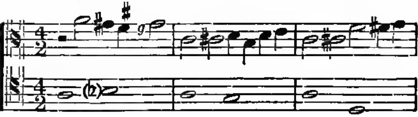
He names the examples 6 and 7 *quadrupla* and *quintupla,* and then says:—

And so foorth *sextupla, septupla,* and infinite more which it will be superfluous to sette downe in this place.

The examples 8 and 9 are respectively *sesquialtera* and *sesquitertia.* Many, if not all, of these examples are included by Morley rather for the sake of completeness, as the reader will already have perceived. He enumerates them between the practical study of counterpoint in two and three parts, in order to show his pupil 'those things which of olde were taught *before they came to sing two parts,*'—a refreshing suggestion that combinations of rhythms which outstrip the most complicated with which Brahms ever puzzled a pianist were after all outside the practical domain of music.

It will be well to add two instances of remarkable anticipations of modern methods, once more from Zacconi. The first is a very speculative, crude attempt at a chromatic example which is still more surprising if, as seems likely, the B in the *canto fermo* was intended to be flat:—

Zacconi, Prattica di Musica Lib. secondo, cap. 49.



The method of correcting the accidental in bars 1 and 7 is curious and interesting. The second is an extract from a set of short examples of the nature of variations, displaying not only a melodic freedom worthy of Handel, but an exceptional amount of that incipient feeling for key, which is so characteristic of 16th century music, and which made the Revolution of Monteverde natural and inevitable:—

It is noteworthy that this should have been published within two years of the death of Palestrina.

These interesting examples will serve to indicate the manner in which the five species of strict counterpoint were attained, as well as to foreshadow the freer art of subsequent periods. It will not for a moment be supposed that this strict style was stereotyped, perfected, and closed before the freer harmonic style was attempted. A comparison of Zacconi's masterly little sequence (quoted above) with the following fair example of three-part florid counterpoint published by Morley a year later will actually show less perfect workmanship in the old style than in the new:—

But it is not surprising if the perfection and severity of Palestrina should not be matched by a contemporary perfection of scholastic exercise. The ideal conservative can be in advance of his

time as well as the radical. Indeed the perusal of Zacconi and other writers makes it rather the matter for surprise that the writings of Palestrina and some of his compeers could be so pure, restrained, and serene as they were.

Incipient Harmony of the Polyphonic Age.—As has already been hinted, it is specially characteristic of the 16th century that while counterpoint was being so well nurtured itself, it was in reality fostering its then weaker companion, harmony, incidentally affording strong proof of the inseparable nature of the two arts. The incipient feeling for key has already been referred to as being displayed by the Zacconi sequence just quoted. But a glance at some of the other examples given may also serve to show how strong and general, though still undefined, the instinct for tonality had become. The constant use of B flat and F sharp, according to the acknowledged laws of the time (see MUSICA FICTA) often virtually transformed the Dorian mode into what we should now recognise as the key of D minor, the Lydian into F major, the Mixo-Lydian into G major. The habitual resort to these accidentals to rid music of the false tritone (that *diabolus in musica*), as well as to soften asperities in general, gradually induced the transformation of half the Modes into our major and the other half into our minor key. And a still more important factor in the quiet development of a system of harmony was the established practice of punctuating a composition of any length with true cadences, not only in the mode of the piece but in related modes, that is, on one of the so-called *regular or conceded* MODULATIONS (see that article). Thus it came about that many ostensibly modal works are so well defined harmonically as to establish rather than suggest a modern feeling for key. As a familiar instance Farrant's little anthem, 'Lord, for Thy tender mercies' sake,' may be cited, in which there is a swing from tonic to dominant and a cadence on the latter which an age of mature harmonic skill and enlightenment could not easily improve.[1] And further, the conceptions of what are called fundamental discords in the harmonic age were only made possible by the free use and development of essentially melodic devices—such as passing notes and suspensions—in the contrapuntal age, which the narrow harmonic basis itself naturally engendered. In the following extracts from Palestrina the four chords marked ✱ afford fleeting instances of modern chords which, being found serviceable, have since been stereotyped and classified in the purely harmonic system:—

[1] It is sometimes supposed that the rules of historic counterpoint advocated by Rockstro involve confusion if not opposition between the feelings of ancient modes and modern keys, requiring in some way the student's allegiance to an antiquated method and faithlessness to his subsequent harmonic heritage. The fact is clearly otherwise; for the old rules encourage and foster the latent feeling for key, only without forsaking the contrapuntal standpoint. This is not to say that the characteristics of the modes (notably the Phrygian) may not be studied separately to the modern student's advantage.

Thus it will be seen that, step by step, the instinctive love of *consonance* in progressions, inducing the free use of accidentals, led to a system of *concords* with definite key-relationships; the habitual use of true cadences,[2] not only on the final of the mode but on the dominant and other degrees, widened those key-relationships into a key system; and the passing and carefully-prepared *dissonances* of the old masters led to the naked, unprepared *discords* of Monteverde and his successors.

Post-harmonic Counterpoint.—The debts which harmony had contracted towards counterpoint in the 16th century were destined to be paid in the 18th. When, in the time of Bach, counterpoint in its ideal sense came into its own again, intervening development enabled harmony to confer return benefits; and an altogether new vitality is characteristic of the more elaborate counterpoint acquired through the wider scope which a full-grown harmonic system necessarily bestowed upon it.

It is here that we pass from counterpoint in its early restricted sense—that upon which the study of strict counterpoint is founded, and for which Rockstro desired to reserve the title—to that which in the ideal sense still bears the name. They can roughly be distinguished as the pre-harmonic and post-harmonic styles. The second style, it need hardly be said, is infinitely more complex in possibilities, and offers embarrassment to students—the embarrassment of riches. As Palestrina marked the highest point of the one, so Bach is the hero of the other. A comparison of any of Palestrina's works with the first chorus of the 'Matthew Passion' will give a striking idea of the contrast of styles. In the later art, to all the difficulties of setting good melodies to melodies are added the privileges and problems of harmony. A suggestion of the manner of development involved may further be gathered from the following examples, chosen from the strict and free style alternately, to illustrate contrasts: (1 and 1*a*) in chord passages; (2 and 2*a*) in suspensions; (3 and 3*a*) in the combination of various species:—

[2] Ornithoparcus as early as 1518 writes: 'Every song must be often adorned with formal closes.'

The most complicated passages in the second style have grown out of the first as naturally and as beautifully as a tree's foliage grows from its stem. But the great increase of scope can hardly be estimated. If it be remembered that the first polyphony involved a basis of but two chords, it will be recognised that even the addition of one new chord would have incalculably extended the possibilities. But Monteverde's revolution opened the gates not only to his own unprepared seventh, but to every chord and chord progression conceivable ; all may now be

used as bases for new contrapuntal device. Not only was Bach, therefore, an explorer into tracts never traversed, and even now barely grasped, but composers have ever since been discovering new harmonies for new counterpoints as yet unattempted; and the fields yet to be won are limitless.

Post-harmonic counterpoint has grown into many separate forms and appears under various titles. Its highest product is to be found in fugue.[1] This and the subsidiary arts of invertible counterpoint (double, triple, quadruple, etc.) which it involves, also the almost lost art of canon and various styles of imitation, are now studied separately. There are many other forms in which contrapuntal methods appear — in figured chorale (a form splendidly used by Bach and Brahms—see CHORALE ARRANGEMENTS), in ground-bass and other variation forms (see VARIATION), and notably in the development section of symphony and sonata form. These lie obviously beyond the scope of this article. In all of them the process of contrapuntal advance is the same. Counterpoint built upon past harmony makes new harmony possible. The new harmony in its turn becomes the basis for a more advanced counterpoint. Ingenious combinations of passing notes or suspensions bring new chords, and the chords themselves bring new contrapuntal responsibilities.

Methods of teaching Modern Counterpoint.— It remains to give some account of the attempts (already referred to) that apply the old methods of study for the acquisition of the new art— attempts, it would seem, too modest hitherto to meet the great needs of the case.

As already stated, Albrechtsberger appears to have been the first to use a *canto fermo* and the five orthodox species in what he calls *chorale and free counterpoint.* But it is noteworthy that he not only gives little space to the subject, but does not deem it worthy of a separate chapter, simply appending it to the last chapter (cxlvii.) on strict counterpoint. He chooses a chromatic subject and gives from forty to fifty examples upon it which are quite harmonic in character and slightly Bach-like in effect.

Macfarren devotes one long chapter of his book on counterpoint to the *modern free style.* Again the small space given is noticeable, barely twelve pages being devoted to it, as against a hundred or more to the strict style; and the treatment is more tentative than that of Albrechtsberger. The new freedoms of the student are indicated with hints how, in the author's judgment, such freedoms are to be used. No examples are given; the reader is referred for these to the 'Models dispersed through the works of great musicians.' The chapter ends rather abruptly with the fine assertion that 'here for the present the task of the pedagogue ceases, but that of the disciple is at its beginning.'

The German theorist, E. F. Richter, avowedly attempts in his treatise to bring the old counterpoint up to date. In the able *résumé* of the German methods of teaching counterpoint with which he prefaces his manual, he notes that Marx and Lobe avoided pure contrapuntal studies, providing rather for what he calls the purely musical side; while, by way of reaction, two more modern writers, Dehn and Bellermann, found their teachings on ancient methods, the latter indeed going back, he exclaims, 'so far as to follow the original method of Fux.' As to his own task, Richter adds:—

> The task of writing a practical text-book on counterpoint is the more difficult at the present day, since for its due performance it is necessary, if not to invent an entirely new method of teaching, yet to separate the essential in the old methods from the unimportant or merely traditional, and to select that which is suited to our present needs, and which will endure for all time.

Electing to follow on the lines of Cherubini and Albrechtsberger, he invents a new method of three species: note against note, combined treatment of minims and suspensions (second and fourth species of the old order), and four notes to one. Another feature of his own, which has since been followed to some extent by Professor Prout, is to start his readers on exercises in four parts, working back through three to two, deeming that it is easier to grasp the harmonic import of incomplete chords after having studied the complete four-part writing. As his harmonic basis he admits all common chords with their inversions and all the chords of the seventh. This is sufficiently revolutionary to be styled free counterpoint. It abandons the historic standpoint for the sake of a practical one, seeming to consider them incompatible.

A more recent attempt to modernise counterpoint, and one that has more immediate influence and importance in England, is that by Professor Prout. His treatise is called *Counterpoint Strict and Free.* In the preface he pleads for far more liberty in the matter of melodic progression than was permitted by the older theorists, and he admits modern intervals, such as the diminished seventh, into strict counterpoint. Free counterpoint occupies something less than one-third of the book, one chapter of which is devoted to free counterpoint on a *canto fermo*—imitative counterpoint—which is important as apparently the first systematic attempt in this country to pursue the old method of *canti fermi* in the new style. The examples given are, as may be supposed, only suggestive of the vast possibilities that lie at the student's disposal. Again, like Albrechtsberger and Macfarren, the writer rather seems to lead the student to the edge of a limitless field of possibilities and leaves him there. No true theorist will ever ven-

[1] The custom of referring to counterpoint and fugue as to separate arts is on this account misleading. The tendency to reserve the generic term in scholastic circles for its earlier and more limited significance, though general, has not yet precluded its comprehensive use.

ture into fields unripe for his harvest. But the time seems to have arrived when the counterpoint of Handel, Bach, and their many great contemporaries should be taught, apart from fugue with its attendant problems—often beyond the student's power—by methods like those of the earlier counterpoint. The principle of the *canto fermo* is founded less upon traditions than upon human conditions and limitations which do not change. It need not, indeed it cannot be set aside with its old associates. It is ancient but not antiquated; and it may be hoped that the efforts just enumerated, together with those of many nameless teachers who probably adopt the method without having written treatises upon it, are likely to lead to more systematic use of the short exercise on a *canto fermo* in free style, without violating the now sacred laws of the golden age. The recent frequent use of the figured chorale for teaching purposes points to the vitality of the *canto fermo* method. But the student, who ought to acquire the mastery not of form but of contrapuntal mode of expression, may find that the complete figured chorale, like fugue, involves him too deeply in other matters. Vaster possibilities increase his need of definite and detailed guidance; and as in the study of the first counterpoint he is spared the problems of harmony, so in the second he should be spared those of form. It seems probable that the power to write well in the free style will best—perhaps *only*—be acquired by methods which resemble those described in Strict Counterpoint, but in which the old *canti fermi* are represented by straightforward chord progressions, such as those to be found in Bach's renowned Chaconne in D minor and organ Passacaglia in C minor, upon which the most complicated combinations of suspensions, passing-notes or appoggiature,—all things in fact incidental to pure part-writing—may be evolved and acquired step by step.

To turn, in conclusion, from the scholastic aspect of this subject back to its vital position in musical affairs, it may be said that counterpoint in its wider, ideal sense has reached two great historic crises of perfection. The first was in Palestrina (d. 1594), the second in Bach (d. 1750). The harmonic innocence of the one was as wonderful as the harmonic complexity of the other. In one, contrapuntal achievements never since surpassed involved only the use of two chords (the triad and chord of the sixth), three suspensions, and a few stereotyped patterns of passing-notes; in the other Bach combined all that counterpoint had achieved with all that harmony had achieved and more, puzzling his contemporaries and anticipating his successors. After each of these perfections men turned to develop other things. After the first came Monteverde's revolution, and harmony was developed; after the second came Haydn, and instrumental forms were evolved. In each case the temporary contrapuntal decadence was remarkable. It is as inconceivable that Bach could have written the childlike harmonic iterations of Mozart's early sonatas as that Palestrina could have written a Scarlatti aria. But in each case the recovery of contrapuntal power was equally certain. Beethoven's mighty genius rather turned men's thoughts and affections away from counterpoint, but since his time it has been in the ascendant. Brahms has indicated the direction of development, and his 'Deutsches Requiem' seems, more than any other modern work, to combine the arts of Palestrina, Bach, and Beethoven. The counterpoint of the first of these masters, the harmony and counterpoint of the second, the harmony and form of the third await their consummation. Towards this musicians work, while their expectation is set upon another great leader. If we may judge from the past, he will not be fully understood when he comes, and he will certainly be a great master of counterpoint.

H. W. D.

COUNTER-SUBJECT. When the subject of a fugue has been proposed by one voice it is usual for the answer, which is taken up by another voice, to be accompanied by the former with a counterpoint sufficiently recognisable as a definite subject to take its part in the development of the fugue, and this is called the counter-subject; as in the chorus 'And with his stripes,' in Handel's 'Messiah':—

It should be capable of being treated with the original subject in double counterpoint—that is, either above or below it, as in the chorus just named, where it first appears in an upper part, but farther on in the tenor, with the original subject in the treble; thus:—

But it is allowable to alter it slightly when thus treated, so long as its character is distinctly marked. The principal subject of the above was a favourite with the composers of the 18th century; instances of it with different counter-subjects will be found in Bach's *Wohlt. Clavier*, bk. ii., No. 20, Handel's 'Joseph,' in Mozart's Requiem, and in a quartet of Haydn's in F minor; also in Corelli's Solos, op. 1, No. 3 [also in Buxtehude (see Spitta's *Bach*, Engl. tr., i. 276)].

When a second subject appears simultaneously with the first proposition of the principal subject

it is common to speak of it as the counter-subject, as in the following, by Handel (6 organ fugues No. 3) :—

But many theorists think that this tends to confusion, and wish it to be called a second subject. Cherubini held that a fugue could not have more than one principal subject, and that therefore the terms first, second, or third counter-subject should be used to designate any subjects which follow after the first; but the question does not seem to be of any very great importance.

For further treatment of this question see FUGUE. C. H. H. P.

COUNTER-TENOR. See ALTO.

COUNTRY DANCE. A dance popular in England from an early time to a comparatively recent period, when it was gradually displaced by the introduction of the quadrille, waltz, and polka.

The supposition that the dance is of French origin and that its title is merely a corruption of 'contre-danse' or 'contra-danse' (so named from the dancers being ranged opposite each other at the commencement of the figure) has been sufficiently exploded. There can now be but little doubt that the name 'country dance' correctly expresses what the dance really was when introduced into more refined society from the village green, the barn, or the country alehouse. Record of the English 'country dance' so named exists long before any reference to the pastime as popular on the Continent.

Much allusion to the dancing of 'country dances' and the names of them is found in 16th and 17th century literature, and the traditional melodies employed for the dances were used by such musicians as William Byrd and his contemporaries for elaboration into virginal pieces— 'Sellinger's Round' is one of these. 'Trenchmore,' 'Paul's Steeple,' 'Half Hannikin,' 'Greensleeves,' 'John, come kiss me now,' and others are melodies which employed the feet of Elizabethan dancers, and all, either as ballad airs or as dance tunes to which ballads were sung, appear to have had birth with the rustic and untutored musician. One peculiarity of the country dance, which has few parallels in other dances, is that it was not confined to any special figure or step, and its music was never limited by any special time-beat or accent. As the dance grew in favour in the ball-room and during various periods, the figures appear to have varied somewhat, and there seems to have been a good deal more regularity in them. After the 17th century the early round form of the dance became obsolete, only the long form being in favour. The 17th century figures of the country dance contained many eccentric movements. In 'The Cobbler's Jigg,' for instance, some of the performers are directed to 'act the cobbler,' and in 'Mall Peatly the new way,' you are to 'hit your right elbows together and then your left, and turn with your left hands behind and your right hands before, and turn twice round, and then your left elbows together, and turn as before, and so to the next.' The present writer remembers to have seen traditional survivals of these old country dances performed in a cottage on the remote Yorkshire moors, and in these such embellishments occurred.

The first collection of country dances was English, and was issued by John Playford, bearing the date 1651, but really printed at the latter end of the preceding year. This work, entitled *The English Dancing Master*, contains over a hundred tunes, without bass or even barring, having the dancing directions under each. Country dancing had sufficiently grown into favour even in Puritan times to demand a scientific work on the subject. Playford's *Dancing Master* forms a record of English melody invaluable to the student of the subject, and the history of our national ballad and song airs is so dependent on it that were the work non-existent, we should have no record of many of our once famous tunes. It is in this respect fortunate that country dances were so elastic as to permit the use of almost any air. The *Dancing Master* ran through eighteen editions, ranging in date down to 1728, each edition varying and getting larger, even in the later ones extending to two and three volumes. Following Playford's publication music publishers with scarcely a single exception issued yearly sets of country dances generally in books of twenty-four, which were frequently reprinted into volumes containing two hundred. They are nearly all in a small, long, oblong shape for the convenience of dancing masters' pockets—the kit being in one and the dance book in the other. This now obsolete type of country dance book expired about 1830, but the form was preserved in the present writer's *Old English Dances* (Reeves, 1890), in which an attempt is made towards a bibliography of dance collections. The early dance-books are rare and much sought after.

The music for the original country dances of the villages was supplied by a bagpipe, a fiddle, or very frequently by the pipe and tabor, a pair of instruments much used for the Morris dance; but from the frontispieces to the 18th century dance books, which generally depicted a country dance in progress, we can see that in the ball-room a more extended orchestra was in vogue.

Some of the pictures show the performance of a bass viol, two violins, and a hautboy, and in one instance there is a harpsichord in addition.

Besides the dance collections which gave both tunes and figures there were many elaborate

treatises on the dance, and its complicated figures certainly demanded some trustworthy guide.

John Weaver wrote several works on the subject, one dated 1720, and Thomas Wilson, a dancing master, a century later was the author of *The Complete System of English Country Dancing* (*circa* 1820) and other works in which this kind of dancing is attentively dealt with. As before stated, the quadrille, waltz, and polka quickly ousted the country dance, and a mere relic of it exists or did exist in old-fashioned circles where 'Sir Roger de Coverley' finishes up the evening. It is perhaps worthy of notice that the country dance never obtained any great degree of favour in Scotland, though, danced at the Edinburgh and other fashionable assemblies, the native reel has always held ground against newly introduced dances.

The strange titles found to country dances are due to the circumstance that where the airs are not those of songs or ballads, the composer or dancing masters named them from passing events, persons prominently before the public, patrons of assemblies, etc. 'The Rebell's Flight,' 'Jenny Cameron' (1745-46), 'Miss M'Donald's Delight,' 'Woodstock Park,' etc., are examples. The giving of fresh life to old tunes by new names was of course frequent.

The airs below are types of country dance tunes at different dates.

COUPART, ANTOINE MARIE, born in Paris, 1780, died there 1854, originator and editor of the *Almanach des Spectacles* (Paris, 1822-36). Coupart was for many years an employé in the 'Bureau des journaux et des théâtres' and had special opportunities for gaining his information. He also wrote vaudevilles and comedies, and edited several collections of songs. M. C. C.

COUPERIN, the name of a family of illustrious French musicians, which culminated in François, called 'Le Grand' (see below). The first musicians of the family were three brothers, sons of Charles Couperin and Marie Andry, his wife, of Chaume in La Brie. The eldest of the brothers, Louis (born about 1630, died 1665), was organist at St. Gervais, Paris, and played first violin in the royal band. He wrote three harpsichord suites, preserved in the Bibl. Nationale in MS. The second brother, François (I), (born about 1631, died from an accident in 1698), was a pupil of Chambonnières and was organist of St. Gervais from 1679 to 1698. The youngest of the brothers, Charles (born 1638), filled the same post from the death of the eldest, Louis, until his own death in 1669. He married Marie Guérin in 1662, and was the father of the François (II) who immortalised the name of Couperin. That composer had one daughter, Marguérite Antoinette, born Sept. 19, 1705, who acted as her father's substitute during the last three years of his life, and was appointed to succeed him as organist of the king's private chapel. She was succeeded in this office by Bernard Bury in 1741, but kept the title and emoluments of claveciniste until her death. The line of the second brother was carried on by his son Nicolas (1680-1748), who was at first in the service of the Count of Toulouse, and subsequently organist at St. Gervais; his son, Armand-Louis (1725-89), held the post at St. Gervais, and in addition was organist of the private chapel, of St. Barthélemy and Ste. Marguérite, and one of the four organists of Notre-Dame. He published a set of harpsichord

pieces, and some for harpsichord and violin. He had two sons: Pierre Louis, who acted as his father's deputy in some of his numerous posts, and died in the same year as he (1789); and François Gervais, who succeeded Armand-Louis in his appointments, and was the last of the Couperins to serve the church of St. Gervais. He was living in 1815. (*Quellen-Lexikon*, and Riemann's *Lexikon.*) M.

COUPERIN, FRANÇOIS, called, like Louis XIV., 'Le Grand,' was born at Paris, Nov. 10, 1668, and died there 1733. He was a pupil of Jacques Thomelin, the king's organist, and in 1693 competed successfully for the post of organist in the private chapel of Versailles. In 1696, like so many of his family, he became organist of St. Gervais. But though he is reported to have been a first-rate organist, his reputation rests upon his various suites of pieces for the 'clavecin' (harpsichord), his excellent Méthode for that instrument, and his proficiency as an executant upon it. It is of particular interest for historians of music, as well as for professed pianists, to note the unmistakable influence which Couperin's suites and Méthode had upon Sebastian Bach, both in his practice (mode of touch, fingering, execution of 'les agrémens'—shakes, turns, arpeggii, etc.) [AGRÉMENS] and in the shape and contents of some of his loveliest contributions to the literature of the instrument, such as his suites and partitas. The principal pieces in Bach's 'Suites françaises,' 'Suites anglaises,' 'Partitas,' and even in some of his solo works for violin and violoncello, as well as in his suites for stringed or mixed stringed and wind instruments—'Concerti Grossi,'—the allemandes, courantes, sarabandes, gavottes, gigues, etc., are frequently in close imitation of the French types of dance tunes then current, of which Couperin's suites furnished the best specimens. Bach here and there goes to the length of copying the curious rhythmical oddities which give to some of Couperin's pieces, particularly his courantes, an air of stiffness and angularity akin to ill-carved wooden puppets:—compare Bach's second courante, in the first of the Suites anglaises, particularly the first Double thereof, or the courante in the fourth Partita in D major, with Couperin's courantes in G minor and D minor, C minor, A major, and B minor, from the first, second, third, fifth, and eighth 'ordre' of his 'Pièces de clavecin.' A distinction should be made between Couperin's type of 'courante' and the Italian 'corrente,' as it is to be found in Corelli's works—of which latter type Bach also gives many specimens. [COURANTE.] Couperin's suites, in a word, are a sort of refined ballet music. He reset the dances played by the orchestra in Lully's operas for the clavecin, and the theatrical twang noticeable in the quaint titles of many of the pieces—for instance, 'La majestueuse,' 'L'enchanteresse,' 'La prude,' 'La flatteuse,' 'La voluptueuse,' 'Les enjouments bachiques,' 'Tendresses bachiques,' 'Fureurs bachiques,' etc.—has stood in the way of a thorough musical development.

Couperin's published works consist of [an early set of harpsichord pieces, dedicated to Mme. Victoire de France; some 'Versets de Motet' (1703, 1704, 1705)]; four sets of 'Pièces de clavecin' (1713, 1716, 1722, 1730); his 'Méthode, ou l'art de toucher le clavecin, y compris huit Préludes' (1716); 'Les goûts réunis, ou nouveaux concerts, augmentés d'une Sonade en Trio intitulée: Le Parnasse ou l'apothéose de Corelli' (1724); 'L'apothéose de l'incomparable Lully' (1725); 'Trios for two violins and bass' (1726); and 'Pièces de viole.' A careful reprint of his suites for the harpsichord (four volumes in two) was edited by Brahms, and the first volume appeared in the *Denkmäler der Tonkunst;* it is republished by Augener & Co. E. D.

COUPLER. All modern organs are provided with mechanical appliances called 'couplers.' These useful adjuncts are of two general kinds—'manual couplers' and 'pedal couplers.' (1) The former operate in one of three ways: either by taking down on one manual the key corresponding to that played on another, in which case it is a '*unison* coupler'; or by taking down the octave above the note pressed down, when it forms an '*octave* coupler,' sometimes incorrectly called a 'super-octave coupler'; or by operating on the octave below, forming a 'sub-octave coupler.' The octave and sub-octave couplers sometimes act on the manual on which the note is struck. The couplers are put in action by draw-stops inscribed according to circumstances—as 'Swell to Great,' 'Great to itself,'—or by pedals. Manual couplers date back at least as far as 1651, when Geissler's organ at Lucerne was completed; which, according to the account formerly existing over the keys, contained 'several registers, whereby one may make use of the three manuals together, or of one or two of them separately.' (2) A pedal coupler attaches a particular manual to the pedal-clavier; and by bringing the lower 2½ octaves of the compass of the manual under the control of the feet, produces the effect of a third hand on any manual required. (See ORGAN.) E. J. H.

COURANTE (Ital. *Corrente*). (1) A dance of French origin, the name of which is derived from *courir*, to run. It is in 3–2 time, of rather rapid movement, and begins with a short note (usually a quaver) at the end of the bar. It is distinguished by a predominance of dotted notes, as the following, from Bach's 'English Suites,' No. 4, and requires a staccato rather than a legato style of performance. Like most of the other old dances, it consists of two parts, each of which is repeated. A special peculiarity of the courante is that the last bar of each part, in

contradiction of the time signature, is in 6–4 time. This will be seen clearly by an extract from the movement quoted above :—

As a component of the suite, the Courante follows the ALLEMANDE, with which in its character it is strongly contrasted. In losing its connection with the dance, it underwent a slight modification : whereas in its earlier shape the 6–4 rhythm was only to be found in the concluding bar of each part, courantes are frequently to be met with in suites wherein the two rhythms are mixed up, and sometimes even where, in spite of the time-signature, the 6–4 rhythm predominates throughout. This is especially the case in many of those by Couperin. The endeavour to bring out these various features clearly and prominently, without injuring the flow of the whole, led to the adoption of the polyphonic style, by which the courante is so strongly contrasted with the allemande. Its chief points may be briefly summed up thus —triple time, prevalence of dotted rhythms, alternations of 3–2 and 6–4 times, and polyphonic treatment.

(2) The Italian courante (*Courante Italienne*), called also, like the preceding, simply *Corrente* or *Courante*, is a different form, quite independent of that just mentioned. It answers more nearly to the etymological meaning of its name, consisting chiefly of *running* passages. This courante is also in triple time—usually 3–8, but sometimes 3–4—and of rapid tempo, about allegro, or allegro assai. It is thus, like the French courante, contrasted with the allemande. As an example of this class may be taken the following from Bach's 'Partita' No. 5 :—

Other specimens of this kind of courante may be found in No. 5 of Handel's 'First Set of Lessons,' and in Nos. 5 and 6 of Bach's 'Suites Françaises,' these last being in 3–4 time. They are also frequent in Corelli's violin sonatas.

(3) One more species of courante remains to be noticed, which is founded upon, and attempts to combine the two preceding ones, but with the peculiarity that the special features of both —viz. the French change of rhythm, and the Italian runs—are not introduced. It is in fact a hybrid possessing little in common with the other varieties, except that it is in triple time, and consists of two parts, each repeated. Most of Handel's courantes belong to this class. The commencement of one, from his *Lessons*, bk. i. No. 8, will show at once the great difference between this and the French or Italian courante.

Bach, on the other hand, chiefly uses the first kind of courante, his movements more resembling those of Couperin. E. P.

COURTEVILLE, RAPHAEL (I), was one of the gentlemen of the Chapel Royal in the reign of Charles I. He lived through the interregnum, resumed his place in the chapel on its re-establishment in 1660, and died Dec. 28, 1675. His son, RALPH or RAPHAEL COURTEVILLE (II), also called Cortevil, Courtaville, and Courtivill, was brought up as a chorister in the Chapel Royal. Many of his songs appear in the collections published in the latter part of the 17th century and the beginning of the 18th. He published six Sonatas 'composed and purposley (*sic*) contriv'd for two flutes' about 1690 ; songs by him were introduced into Wright's 'Female Virtuosoes,' 'Duke and No Duke,' and 'Oroonoko,' and he was one of the composers who furnished the music for Part III. of D'Urfey's 'Don Quixote.' His best-known composition is the hymn-tune called 'St. James's.' Queen Mary had presented the organ from the Chapel Royal to the Church of St. James's, Westminster, and on Sept. 7, 1691, 'Ralph Courtaville' was appointed the first organist of that church at a salary of £20 per annum. It seems highly probable that he died about 1735, and was succeeded by his son, RAPHAEL COURTEVILLE (III) ; but in the vestry minutes of the parish, though they are very carefully kept, no record of this appointment, or of the death of Courteville (II) can be found, and it has been assumed that one individual held the post of organist for eighty years. (See *Dict. of Nat. Biog.*, *British Mus. Biog.*, etc.) The only direct evidence against this assumption is such as can be derived from the fact that there is a tablet in the church, recording the burial of the wife (Elizabeth Abbot) of 'Raphael

Courteville Junr. of this parish, Gent . . .' in May 1735; as he is not called organist, it is likely that Courteville (II) was alive at the time. In Sept. 1735, the widower married Miss Lucy Green, a lady of large fortune. (*Notes and Queries*, ser. II. x. 496.) This Courteville devoted himself mainly to political writing. He published *Memoirs of the Life and Administration of William Cecil, Baron Burleigh*, in 1738, signing it only with the initials 'R. C.' He was the reputed author of *The Gazetteer*, a paper written in support of Sir Robert Walpole's administration, and, probably from this, obtained the nickname of 'Court-Evil' from the opposition. A letter appeared over his signature in No. 50 of the *Westminster Journal*, probably as a joke on his own productions; in this he is styled 'Organ-blower, Essayist, and Historiographer.' He published a pamphlet *Arguments respecting Insolvency*, in 1761. For some years before this, entries in the minute-books of the church show that he had practically neglected his duties as organist; he is warned in 1752-53, and in 1754, and in 1764 his assistant, one Richardson, was consulted as to the repairs of the organ. In 1771 it was reported that Courteville was only giving his assistant one quarter of his salary, and was ordered to share it equally with him. Courteville died early in June 1772, and was buried on the 10th of the month. M.

COURTOIS, Jean, eminent composer, lived in the first half of the 16th century, was chapel-master to the Archbishop of Cambray in 1539 when Charles V. passed through that city on his way to Ghent, and composed a motet in four parts, 'Venite populi terrae,' which was performed in the Cathedral. He composed many motets, published in collections, for which the reader is referred to Eitner's *Bibl. d. Musiksammelwerke*. Masses and motets in MS. are in the Court Library at Munich, and some at Cambrai and Leyden. His French songs include a canon and two songs in five and six parts in 'Chansons à 4, 5, 6, et 8 parties, de divers auteurs' (Antwerp, 1543-50); 'Si par souffrir,' in 'Trente chansons . . . à 4 parties' (Paris); and two songs in 'Trente-cinq livres de Chansons nouvelles' (Paris, 1532-49). One of his chansons, edited by M. Henry Expert, is in the *Monatshefte f. Musikgesch.* 30, 9. M. C. C.

COUSSEMAKER, Charles Edmond Henri de, a distinguished French writer on the history of music, born at Bailleul (Nord), April 19, 1805. His family dates from the 15th century, and had for many generations held important magisterial posts in Bailleul; his father, a 'juge de paix,' destined him for the law; but his musical aptitude was such that at ten he could play any piece upon the piano at sight. He also learned the violin and violoncello. He was educated at the Douai 'Lycée,' and took lessons in harmony from Moreau, organist of St. Pierre. In 1825 he went to Paris, and studied composition, etc., under Reicha and others. The recent researches of Fétis had roused a general interest in the history of music, and Coussemaker's attention was turned in that direction. Having completed his legal studies he was appointed 'juge' successively at Douai [where he continued to study music with Victor Lefebvre], Bergues, Hazebrouck, Dunkerque, and Lille. He died Jan. 10, 1876. He was a member of the 'Institut' for twenty years, and belonged to several other learned societies, besides being a chevalier of the Legion of Honour, and of the order of Leopold of Belgium. His works are *Mémoire sur Hucbald*, etc. (1841); *Notices sur les collections musicales de la bibliothèque de Cambrai*, etc. (1843); *Histoire de l'harmonie au moyen-âge* (1852); *Trois chants historiques* (1854); *Essai sur les instruments de musique au moyen-âge* (1856); *Chants populaires des Flamands* (1856); *Chants liturgiques de Thomas à Kempis* (1856); *Notice sur un MS. musical de . . . S. Dié* (1859); *Drames liturgiques*, etc. (1860); *Messe du XIIIe siècle*, etc. (1861); *Scriptorum de musica medii ævi, nova series*[1] (1864-76, 4 vol.); *Les harmonistes des XIIe et XIIIe siècles* (1865); and *L'art harmonique au XIIe et XIIIe siècles* (1865); *Traités inédits sur la musique du moyen-âge* (1865, 1867, 1869). He also edited the works of Adam de la Halle (Paris, 1872), and Tinctor's treatise (1875). At the time of his death he was preparing a continuation of his *Art harmonique* to the 14th century. His legal writings are good, especially one on Flemish law. In early life he composed some masses and other church music and published a volume of songs. In spite of considerable errors his works form a most important contribution to the history of music. F. G.

COUSSER or KUSSER, Johann Sigismund, son of a musician at Presburg; born there about 1657, died in Dublin, 1727. He studied six years in Paris under Lully, and on his return to Germany lived at Stuttgart [where he played in the court band from 1682. From 1683 to 1685 he was in the service of the Bishop of Strasburg, and from about 1690 to 1693 was capellmeister at Brunswick.] He lived at Hamburg from 1693 to 1697, conducting the performances at the opera, and is said to have been one of the first to introduce the Italian method of singing into Germany. [In 1698 he was again at Stuttgart, where he was ober-capellmeister from 1700, resigning his appointment in 1704.] Between 1700 and 1705 he made two journeys to Italy for study. Soon after, he came to London, and in 1710 received an appointment in Christ Church Cathedral, Dublin, and 'Master of the musick attending his Majesty's state in Ireland.' His published works comprise six overtures and airs (Stuttgart, 1682); the operas 'Erindo'

[1] In continuation of Gerbert's *Scriptores ecclesiastici*.

(1693), 'Porus,' 'Pyramus and Thisbe' (1694), 'Scipio Africanus' (1694), and 'Jason' (1697), many of them, and others (for which see the *Quellen-Lexikon*) performed at Hamburg; 'Apollon enjoué,' six operatic overtures and airs published at Stuttgart, 1700; an opera, 'Ariadne'; and 'Heliconische Musenlust,' a collection of airs from 'Ariadne' (Stuttgart, 1700); an Ode on the death of Arabella Hunt; and a 'Serenade' for the King's birthday (1724) [additions from *Quellen-Lexikon*]. M. C. C.

COVENT GARDEN THEATRE, opened Dec. 7, 1732, under the management of Rich, who moved there with all his company from the theatre he had previously directed in Lincoln's Inn; burned on the night of Sept. 19, 1808; new theatre opened Sept. 18, 1809; converted into an opera-house 1847; burnt down 1856; reconstructed and opened again as an opera-house 1858. Though licensed for the performance of the higher class of dramatic works, to which the name of 'legitimate' is given, Covent Garden Theatre has been the scene of all kinds of theatrical representations; and two years after the first opening of the theatre, in 1734, we find the bill for March 11 announcing 'a comedy called The Way of the World, by the late Mr. Congreve, with entertainments of dancing, particularly the Scottish dance, by Mr. Glover and Mrs. Laguerre, Mr. Le Sac and Miss Boston, Mr. de la Garde and Mrs. Ogden; with a new dance called Pigmalion, performed by Mr. Malter and Mlle. Sallé.' 'No servants,' it is stated, in a notification at the end of the programme, 'will be permitted to keep places on the stage.' Mlle. Sallé is said on this occasion to have produced the first complete *ballet d'action* ever represented on the stage. She at the same time introduced important reforms in theatrical costume. [See BALLET.] The chief composer of eminence connected with the theatre was Sir Henry Bishop, who between 1810 and 1824 produced at Covent Garden no less than fifty musical works of various kinds, including 'Guy Mannering,' 'The Miller and his Men,' 'The Slave,' and 'Clari,' besides adaptations of Rossini's 'Barber of Seville,' Mozart's 'Marriage of Figaro,' and other celebrated operas. 'Der Freischütz,' soon after its production in Germany, was brought out in an English version both at Covent Garden and at Drury Lane (1824). So great was its success that Weber was requested to compose for Covent Garden an entirely new opera. 'Oberon,' the work in question, was brought out in 1826 (April 12), when, though much admired, it failed to achieve such popularity as 'Der Freischütz' had obtained. It has been said that Weber was much affected by the coolness with which 'Oberon' was received. Scudo, the eminent French critic, writing on this subject in the *Revue des Deux Mondes*, records the fact that 'Oberon' was very successful on its first production at Covent Garden, and adds that it was 'received with enthusiasm by those who were able to comprehend it.' An English musical journal, the *Harmonicon*, published a remarkable article on 'Oberon,' an extract from which will be found in the article WEBER.

Between 1826 and 1846 operas and musical dramas were from time to time played at Covent Garden. But it was not until 1846 that the theatre was turned permanently into an opera-house; when, with the interior reconstructed by Mr. Albano, it was opened, in the words of the prospectus, 'for a more perfect representation of the lyric drama than has yet been attained in this country.' The director was Mr. Frederick Beale (of the firm of Cramer, Beale, & Co.), with whom was associated Signor Persiani, husband of the eminent prima donna of that name, and others. The musical conductor was Costa. In the company were included Grisi and Mario, who with Costa and nearly all the members of his orchestra had suddenly left Her Majesty's Theatre for the new enterprise, in which they were joined by Persiani, Tamburini, Ronconi, and Alboni, who, on the opening night—April 6, 1847—sang (as Arsace in 'Semiramide') for the first time on this side of the Alps. The management of the Royal Italian Opera, as the new musical theatre was called, passed after a short time into the hands of Delafield, who was aided by Gye; and after Delafield's bankruptcy the establishment was carried on solely by Gye (1851), who, when the theatre was burned down in 1856, rebuilt it at his own expense from the design of Edward Barry, R.A. Madame Patti made her début at the Royal Italian Opera in 1861, when she sang for the first time on the boards of a European theatre. Lucca and Albani, Tamberlik and Graziani, may be mentioned among other artists of European fame who appeared at the Royal Italian Opera. For some dozen years (between 1840 and 1855) M. Jullien directed promenade concerts at this theatre; and from time to time, during the winter months, performances of English opera were given at Covent Garden. Thus Balfe's 'Rose of Castille,' 'Satanella,' and 'Armourer of Nantes,' Wallace's 'Lurline,' and Benedict's 'Lily of Killarney,' were produced here under the management of Miss Louisa Pyne and Mr. William Harrison. [The 'Royal Italian Opera' suffered financial collapse soon after the season of 1884; and between that date and the commencement of the prosperous régime of Sir Augustus Harris, a few seasons of opera were managed by an impresario named Lago. In 1888, Harris opened with a very large subscription, and with a company which he had formed at Drury Lane in the previous year. From that date until his death in June 1896, success followed all that he undertook, and the 'Royal Opera' once more drew all the world to Covent Garden. After his death the Royal Opera Syndicate became lessees of the theatre, and their tenure has been markedly successful. During the winter fancy dress balls are given

periodically, and the taste for masquerades has been revived in the London public.] H. S. E.

COWARD, HENRY, distinguished chorus-master, was born, of Sheffield parents, at Liverpool, Nov. 26, 1849. On the death of his father the family removed to Sheffield. At the age of nine the boy—who had not received six months' consecutive schooling—was put to the staple trade of the city, the manufacture of cutlery. He took several prizes as the result of his skilful craftsmanship. All his spare time was spent in improving himself educationally and in the pursuit of music. He joined a tonic-sol-fa singing class and soon conducted a choral society of his own. After serving at the bench for fourteen years, he started on a scholastic career—first as a pupil-teacher (aged twenty-two), then as an assistant-master, and subsequently as head-master, a position for which he had qualified himself by unwearied study. At the age of thirty-nine he decided to exchange the scholastic profession for that of music. In 1889 he took the degree of Mus.B., followed by that of Mus.D. five years later, both at the University of Oxford.

Dr. Coward has composed various cantatas, anthems, songs, etc.; but his fame rests on his remarkable gifts as a trainer of choirs, in which his magnetic personality, poetic insight, boundless enthusiasm, and original methods find full scope. It is no exaggeration to say that he has in the course of a very few years brought the Sheffield Musical Festival—one of the youngest institutions of its kind—into the front rank of English Festivals. For further particulars of Dr. Coward's career the reader is referred to a biographical sketch of him, compiled from authentic sources, which appeared in *The Musical Times* of Jan. 1902; see also the article FESTIVALS in this Dictionary. F. G. E.

COWARD, JAMES, born in London, Jan. 25, 1824, entered the choir of Westminster Abbey at an early age. He was given the appointment of organist at the parish church, Lambeth; and at the opening of the Crystal Palace at Sydenham in 1857, he received a similar appointment there, which he retained until his death. He held various church appointments in addition to this, being at one time or another organist of St. George's, Bloomsbury, and St. Magnus the Martyr, London Bridge. He was conductor of the Western Madrigal Society from 1864 to 1872, and directed also the Abbey and City Glee Clubs for some time before his death, which took place at his house in Lupus Street, Jan. 22, 1880. He was for some time organist to the Sacred Harmonic Society, and the Grand Lodge of Freemasons. Although best known by his brilliant transcriptions for the organ of operatic melodies, etc., his published works show him to have possessed considerable musical knowledge and artistic feeling. They include an anthem, 'O Lord, correct me'; 'Sing unto God,' a canon four in two; two other canons; Ten Glees, 1857; 'Ten Glees and a madrigal,' 1871; besides many pieces for pianoforte, organ, etc. He had a remarkable power of improvisation, which, however, was often turned to account in order to accompany the performances of acrobats and similar exhibitions. M.

COWEN, FREDERIC HYMEN (originally Hymen Frederick), was born at Kingston, Jamaica, Jan. 29, 1852. He was brought by his parents to England at the age of four, and even in earliest childhood exhibited an extraordinary love of music; he published a waltz at the age of six, and in 1860 composed an operetta, called 'Garibaldi; or the Rival Patriots,' to a libretto by his sister, aged seventeen. In November of the same year, he became a pupil of Goss and Benedict, and by 1863 was advanced enough to give a morning concert (or piano recital) in the concert-room of Her Majesty's Theatre, playing a number of pieces from memory. In 1864, he played Mendelssohn's D minor concerto at Dudley House, at a concert at which Joachim and Santley appeared. In 1865, also at Dudley House (the composer's father was private secretary to the Earl of Dudley), a trio in A, composed by Cowen, was played by himself, Joachim, and Pezze. In the same year he competed successfully for the Mendelssohn Scholarship, but the scholarship was relinquished, as his parents objected to give up the control of their son. They took him to Leipzig, where he entered the Conservatorium as a pupil of Plaidy, Moscheles, Reinecke, Richter, and Hauptmann. A string quartet was played at the Conservatorium in Jan. 1866, but his residence abroad was cut short by the war between Prussia and Austria, and he returned to England, appearing as a composer for the orchestra in an overture in D minor played at Mellon's promenade concerts at Covent Garden. He appeared elsewhere as a pianist a few times, and in Oct. 1867 entered the Stern Conservatorium at Berlin, where he studied under Kiel, and laid the foundation of his remarkable skill as a conductor. He stayed less than a year abroad, coming back to London in 1868, and playing at various concerts, such as the Philharmonic, the Monday Popular, and elsewhere. He made his most prominent appearance as a composer on Dec. 9, 1869, at a concert in St. James's Hall, where were produced his symphony in C minor, and pianoforte concerto in A minor. From that time he was recognised as primarily a composer, but as, even for a young man so highly gifted as he, composition was not yet a practical means of livelihood, he undertook to act as accompanist to Mapleson's concert-party and assistant-accompanist at Her Majesty's under Costa. This eminent conductor got Cowen his first festival commission, as a result of which 'The Corsair' was brought out at Birmingham in 1876. In the same year his first opera, 'Pauline,' was produced by the Carl Rosa Company at the Lyceum. It was the production of

his 'Scandinavian Symphony' at St. James's Hall on Dec. 18, 1880, that gave Cowen his place among the most prominent of English composers. The work rapidly made its way on the Continent and in America, and as the work of one who never had a lesson in orchestration it is a very remarkable feat. Local colour is used with admirable felicity, and there is little wonder that it soon became popular. In 1881, his 'St. Ursula' at Norwich enhanced his fame, and in 1884 he conducted five concerts for the Philharmonic Society. From 1888 to 1892 he was permanent conductor of the society, appointed on the resignation of Sullivan; and in 1888 he went to Melbourne, where he conducted the daily orchestral concerts at the Centennial Exhibition for six months, receiving the unprecedented sum of £5000 for the engagement. He conducted the Hallé Orchestra in Manchester from 1896 to 1899; and the Liverpool Philharmonic Society and Bradford Festival Choral Society and Subscription Concerts from 1896 to the present time. He conducted the Bradford Permanent Orchestra 1899-1902, and the Scarborough Festival of 1899. In 1900 he was again appointed, in succession to Sir A. C. Mackenzie, as conductor of the Philharmonic Society, and it is in this capacity that some of his best work has been done, for the players before this date had rested on the reputation gained in former years, and the performances were sadly perfunctory as compared with those of some younger orchestras. Cowen at once proved himself fully capable of reforming the state of things, and raised the society to a higher position than it had held since the death of Costa. The conductorship of the Scottish Orchestra was added to Cowen's other appointments in 1900, that of the Cardiff Festival in 1902, and that of the Handel Festival in 1903. In Nov. 1900, the honorary degree of Mus.D. was conferred upon him by the University of Cambridge.

Cowen's music is marked by a certain fantastic grace that is all his own; for this reason, he succeeds best in subjects that deal with fairy tales and the like. Here he is always in his element, and the variety of treatment which he has shown in a long succession of choral and orchestral works of this kind, is very remarkable. Some of his many songs are genuinely expressive, and in his operas there are things in which the deeper emotions are skilfully handled; but it is in the lighter moods that he is most successful. As he has never adopted the useful system of opus-numbers, it is difficult to be sure that the list of his compositions is complete. That given below is founded on the catalogue given in an article in the *Musical Times* for November 1898:—

ORCHESTRAL MUSIC

Symphonies.—No. 1, in C minor (1869); No. 2, in F minor (1872); No. 3, in C minor ('Scandinavian,' 1880); No. 4, in B flat minor ('Welsh,' Philharmonic, 1884); No. 5, in F (Cambridge, 1887); No. 6, in E ('Idyllic,' Richter, 1897).

Overtures.—In D minor (1866); Festival Overture (Norwich, 1872); Characteristic Overture, 'Niagara' (Crystal Palace, 1881); 'The Butterfly's Ball,' Queen's Hall Symphony Concerts, 1901.

Suites, Marches, etc.—'The Language of Flowers' (1880); 'In the Olden Time' (for strings, 1883); 'In Fairyland' (1896); 'Four English Dances in the Olden Style'; Sinfonietta in A (1881); 'A Phantasy of Life and Love' (Gloucester Festival, 1901). Various marches, among them the 'Coronation March' (1902); Indian Rhapsody (Hereford Festival, 1903). Two pieces for small orchestra, 'Childhood' and 'Girlhood' (1903).

Concertos.—In A minor, pf. and orch. (1869); Concertstück, for pf. and orch. (Philharmonic, 1900); Rêverie for vln. and orch., arranged from a piece for vln. and pf.

CHAMBER MUSIC

Trio in A, pf. and strings (1865); string quartet in C minor (1866); Rêverie, vln. and pf.; Suite, 'Flower Fairies,' sonata, fantasia, allegretto grazioso; 'Petite Scène de Ballet' (4 pieces), and many other pieces for piano solo.

DRAMATIC MUSIC

Operas.—'Pauline' (Lyceum, 1876); 'Thorgrim' (Drury Lane, 1890); 'Signa' (Milan, 1893, and Covent Garden, 1894); 'Harold' (Covent Garden, 1895).

Operettas, etc.—'Garibaldi' (1860); 'Maid of Orleans' (incidental music, 1871); 'One too many' (German Reeds, 1874).

CHORAL MUSIC

Oratorios.—'The Deluge' (Brighton, 1878); 'St. Ursula' (Norwich, 1881); 'Ruth' (Worcester, 1887); 'Song of Thanksgiving' (Melbourne, 1888); 'The Transfiguration' (Gloucester, 1895).

Cantatas, etc.—'The Rose Maiden' (1870); 'The Corsair' (Birmingham, 1876); 'The Sleeping Beauty' (Birmingham, 1865); 'St. John's Eve' (1889); 'The Water Lily' (Norwich, 1893); 'All hail the glorious reign' (Jubilee Ode, 1697); 'Ode to the Passions' (Collins's words) (Leeds, 1898); Coronation Ode (Norwich, 1902).

Cantatas for female voices.—'Summer on the River,' 'Christmas Scenes,' 'The Rose of Life,' 'A Daughter of the Sea,' 'Village Scenes,' 'The Fairies' Spring.' Anthems, etc. and part-songs.

VOCAL MUSIC

'The Dream of Endymion,' tenor solo and orch. (Philharmonic, 1887); 'Nights of Music,' duet with orch. (1900); Songs, nearly 300 in number.

M.

COX AND BOX, a 'triumviretta,' or musical farce, altered from Madison Morton's 'Box and Cox' by F. C. Burnand, music by A. Sullivan. First performed at Moray Lodge, Campden Hill, and given first in public at the Adelphi Theatre, May 11, 1867.

CRACOVIENNE. See Krakoviak.

CRAMER, a family of German musicians, of whom the head was Jacob Cramer, born at Sachau in Silesia 1705, violinist in the then celebrated band at Mannheim, where he died in 1770. Of his sons, Johann, born at Mannheim 1743, was drummer in the court band at Munich, and Wilhelm, born at Mannheim 1743 or 1745, made himself a considerable reputation as a violinist and leader. He was a pupil of Johann Stamitz, sen., and of Cannabich, and when still very young gave evidence of unusually brilliant abilities. His contemporaries declared that his playing united the facility of Lolli with the expression of Franz Benda. At sixteen he was admitted into the band at Mannheim, but left it after his father's death for London, where he was well received in 1772, and soon obtained a creditable position. His first appearance was March 22, 1773. He was appointed head of the king's band, and leader at the Opera and Pantheon, the Antient Concerts (1780-89) and the Professional Concerts. He was famous as the leader of the Handel Festivals at Westminster Abbey in 1784 and 1787. His last appearance was at the Gloucester Festival in 1799, and he died in London, Oct. 5 of that year, in Charles Street, Marylebone. As a solo player he was for a time considered to be without a rival in England till superseded by Salomon and Viotti. He published three concertos in

Paris, several solos and trios, but they are of no value. Of his sons are known, FRANZ or FRANÇOIS, born 1772, a violinist of repute in London, who was appointed master of the king's music in 1834, and died August 1, 1848; CARL, born 1780, a good pianist and valued teacher; and finally, JOHANN BAPTIST, the eldest son and the best known of the whole family, an eminent pianist, and one of the principal founders of the modern pianoforte school, born at Mannheim, Feb. 24, 1771. He was but a year old when his father settled in London, and it was there that he lived and worked for the greatest part of his life. To his father's instruction on the violin and in the elements of the theory of music, pianoforte playing was added, and for this the boy manifested the most decided preference and unmistakable talent. His teachers were a certain Benser, Schroeter, and above all, Muzio Clementi, under whom he studied for two years till Clementi's departure in 1784. His first appearance in public took place in 1781. His mind and taste were formed on Handel, Bach, Scarlatti, Haydn, and Mozart, and by this means he obtained that musical depth and solidity so conspicuous in his numerous works. Cramer was in the main self-educated in theory and composition. He had, it is true, a course of lessons in thorough-bass from C. F. Abel in 1785, but his knowledge was chiefly acquired through his own study of Kirnberger and Marpurg. From 1788 Cramer undertook professional tours on the Continent, and in the intervals lived in London, enjoying a world-wide reputation as pianist and teacher. In 1824 he established the firm of J. B. Cramer & Co., music-publishers (see below). After a residence of some years abroad, at first (from 1835) in Munich, and afterwards in Paris, he returned in 1845 to London, and passed the rest of his life in retirement. He lived to play a duet with Liszt in London, and died April 16, 1858. He was buried in Brompton Cemetery. There are references to him in Beethoven's letters of June 1, 1815, and March 5, 1818, and frequent notices in Moscheles's Life. Ries has left on record (*Notizen*, p. 99) that John Cramer was the only player of his time of whom Beethoven had any opinion—'all the rest went for nothing.' A. M.

J. B. Cramer's playing was distinguished by the astonishingly even cultivation of the two hands, which enabled him, while playing legato, to give an entirely distinct character to florid inner parts, and thus attain a remarkable perfection of execution. He was noted among his contemporaries for his expressive touch in adagio, and in this, and in facility for playing at sight, he was able when in Paris to hold his own against the younger and more advanced pianists. His improvisations were for the most part in a style too artistic and involved for general appreciation. Cramer's mechanism exhibits the development between Clementi and Hummel, and is distinguished from the period of Moscheles and Kalkbrenner which followed it, by the fact that it aimed more at the cultivation of music in general than at the display of the specific qualities of the instrument. All his works are distinguished by a certain musical solidity, which would place them in the same rank with those of Hummel, had his invention been greater and more fluent; but as it is, the artistic style, and the interesting harmony, are counterbalanced by a certain dryness and poverty of expression in the melody. It is true that among his many compositions for pianoforte there are several which undeniably possess musical vitality, and in particular his seven concertos deserve to be occasionally brought forward; but, speaking generally, his works (105 sonatas, 1 quartet for pianoforte, 1 quintet, and countless variations, rondos, fantasias, etc.) are now forgotten. In one sphere of composition alone Cramer has left a conspicuous and abiding memorial of his powers. His representative work '84 Studies in two parts of 42 each,' is of classical value for its intimate combination of significant musical ideas, with the most instructive mechanical passages. No similar work except Clementi's *Gradus ad Parnassum* has been so long or so widely used, and there are probably few pianists who have not studied it with profit. It forms the fifth part of Cramer's *Grosse praktische Pianoforte-Schule* (Schuberth, Leipzig), and has appeared in numerous separate editions. Of these the earliest is probably the lithograph edition of Breitkopf & Härtel, of which the second part appeared in 1810; next in importance ranks the last that was revised by Cramer himself, viz. the original English edition of Cramer & Co., which contained, as op. 81, '16 nouvelles Études,' making in all 100; and finally an edition without the additional numbers, revised by Coccius, and published a few years later than that last mentioned, by Breitkopf & Härtel. A selection of '50 Études,' edited by Von Bülow (Aibl, Munich), is specially useful to teachers from the excellent remarks appended to it, though, on the other hand, it contains a number of peculiarities which may or may not be justifiable, the editor having transposed one of the studies and modified the fingering of them all to meet the exigencies of the modern keyboard. The above edition in 100 numbers must be distinguished from the 'Schule der Geläufigkeit' (op. 100), also containing 100 daily studies, and which forms the second part of the *Grosse Pianoforte-Schule*, and should be used as a preparation for the great 'Études.' [A copy of the études, with comments by Beethoven, was discovered in 1893 in the Royal Library of Berlin, by Mr. J. S. Shedlock, who published a selection from the book, with a prefatory account and careful annotations in the same year (Augener & Co.)]

If it is asked, When did Cramer flourish, and what does he represent to us? the answer usually returned is that he was born after Clementi and died after Hummel, and that he forms the link between those two great players and writers for their instrument. But no pianist with his eyes open would commit himself to such a statement, which rests solely upon two dates of birth and death, and leaves out of sight every spiritual connection, every indication of mental paternity and relationship. The truth is that Cramer does not surpass Clementi as regards the technical treatment of the pianoforte, but stops considerably short of him: Cramer's best sonatas are as much more tame and timid than Clementi's best, as his most valuable études are technically easier and less daring than the chefs-d'œuvre of Clementi's *Gradus*. Spiritually, though not mechanically, Cramer occupies a field of his own, which all pianists respect. Many of his études are poems, like Mendelssohn's Songs without words. But in his sonatas, etc., he moves in a restricted groove of his own, near the highway of Mozart. The name 'J. B. Cramer' really signifies Cramer's Études—let us say some forty or fifty out of the hundred he published. These certainly are good music—a few, perhaps a dozen, even beautiful music, and always very good practice. But pitted against forty or fifty out of the hundred numbers of Clementi's *Gradus*, which are equally good music, and decidedly better practice, they sink irretrievably.

The treatment of the pianoforte as distinct from the harpsichord, if pursued along its plain and broad high-road does not necessarily touch upon Cramer. It stretches from Clementi to Beethoven on the one side, from Mozart to Hummel on the other; from Mozart *viâ* Hummel, and Clementi *viâ* Field, to Chopin; and from Hummel, *viâ* Chopin and Beethoven, to Liszt. Cramer, like Moscheles after him, though not of the first authority, must be considered one of the fathers of the church of pianoforte-playing, and worthy of consultation at all times. E. D.

CRAMER & CO. This eminent music publishing house was founded in the year 1824 [by J. B. Cramer in partnership with Robert Addison and T. Frederick Beale; the two latter had previously carried on a small business at 120 New Bond Street, and had moved to 201 Regent Street in 1822]. J. B. Cramer's popularity and influence soon drew around him a goodly proportion of the professors of the day, who with his own pupils created a large circulation for the pianoforte works of the firm. The catalogue of publications continued on the increase until, in the year 1830, the firm bought the whole of the music plates belonging to the Harmonic Institution, which contained a considerable portion of the works of Dussek, Clementi, Haydn, Herz, Hummel, Mozart, and Steibelt, besides a few of Beethoven and Moscheles, with Handel's choruses arranged as solos and duets, many of the popular songs of C. Horn, the operas 'Oberon' and 'Freischütz,' the oratorio of 'Palestine' by Dr. Crotch, and a large number of Italian songs and duets by Gabussi, Meyerbeer, Mozart, Pacini, Paer, Rossini, Vaccaj, and others, thus giving the house a very strong position in the music trade. Upon this followed the English operas of Balfe, Benedict, and Barnett, the glees of Horsley and Callcott, the songs of Neukomm, pianoforte works of Döhler, Moscheles, Thalberg, Leopold de Meyer, etc. Between 1835 and 1845 Cramer was much abroad, and in 1844-45 Addison retired from the business [becoming senior partner with Hodson at 210 Regent Street] and was succeeded by W. Chappell, when the firm became Cramer, Beale, and Chappell. In 1845 Vincent Wallace returned from America, and Cramer & Co. secured his 'Maritana,' publishing also, as years went on, his other successful works. [After the death of Cramer in 1858, and the retirement of Chappell in 1861, George Wood, one of a family of Edinburgh and Glasgow music publishers, became partner with Beale. In 1862 the firm took additional premises with a large gallery at 207 and 209 Regent Street, and about the same time devoted much attention to the manufacture of pianos.] On the death of Beale in 1863 the whole of the business fell into the hands of Wood, who carried it on with great success, giving, however, more attention to pianoforte manufacturing than to publishing, having introduced and very extensively carried out a novel mode of supplying pianofortes on a hiring system, which seems to have become very general. On the death of George Wood in 1893 the business passed to his two nephews, and the premises at 199 and 201 Regent Street were given up.

In 1897 the firm was turned into a limited company, and at the end of 1902 removed to their present premises 126 Oxford Street, with other establishments in Moorgate Street and at Notting Hill Gate. C. H. P.; with additions by F. K.

CRANG & HANCOCK, organ-builders. John Crang, a Devonshire man, settled in London and became a partner with Hancock, a good voicer of reeds. The latter added new reeds to many of Father Smith's organs. Crang altered the old echoes into swells in many organs, as at St. Paul's Cathedral, St. Peter's, Cornhill, etc. There appear to have been two Hancocks, John and James, probably brothers; both are mentioned in the contract for an organ at Chelmsford in 1772. John died in 1792, and James was living in 1820, and probably later. Crang appears to have given his name to Crang Hancock, a pianoforte-maker. V. DE P.

CREATION, THE. Haydn's first oratorio, written at the suggestion of Salomon. The book of words was selected—originally for Handel—from Genesis and *Paradise Lost* by Mr.

Lidley or Liddell, and translated into German, as 'Die Schöpfung,' with modifications, by Baron van Swieten. The music occupied Haydn from 1796 to April 1798, and was produced by a body of dilettanti at the Schwartzenberg Palace, Vienna, April 2, 1798. 500 ducats were subscribed for Haydn. In 1800 it was published in score at Vienna with German and English words, the latter re-translated by van Swieten; 510 copies were subscribed for, of which nearly half were for England. It was first performed in London at Covent Garden, under Ashley, March 28, 1800, and in Paris, Dec. 24, 1800, when Napoleon I. escaped the infernal machine in the Rue Nicaise. A great performance by the same society as before took place at the University Hall, Vienna, on March 27, 1808, in Haydn's presence, a year and two months before his death. (See *Musical Times*, 1891, p. 330; 1898, p. 236; and 1899, p. 160.)

CREDO is the first word of the Nicene Creed in Latin, and is the name by which it is well known to musicians by reason of the magnificent music to which it has been set by the greatest composers for the use of the Roman Church in the Service of the Mass. The traditional figure to which the first sentence or 'intonation' is given out by the priest is

and upon this Bach developed the stupendous contrapuntal chorus to those words in his B minor Mass. C. H. H. P.

CREED. There are three creeds in use in the services of the English Church—the Apostles' Creed, the Nicene, and that known by the name of St. Athanasius.

The first of these is the most ancient, and of unknown origin, and was probably used in early times. It is found in the ancient breviaries of the churches of England, such as those of Sarum and York, in much the same position as it now occupies. In the first Prayer-Book of Edward VI. it was ordered to be said or sung like the other creeds, but it has latterly become the custom only to intone it, and in some churches the intonation is supported by harmonies on the organ, but it has not been definitely set to music for English use.

The Nicene Creed is distinguished in the English Church by an extensive musical treatment. It cannot be ascertained when it came into use in the ancient English offices. It is in the breviaries of Sarum, York, and Hereford, for use on feasts and solemn occasions. It was looked upon to some extent as a hymn, whence its universal musical treatment. Marbeck's setting of it in the 'Book of Common Praier noted' of 1552 for the use of the English reformed church follows the Roman originals much less closely than most of the other parts of his setting of the service, and is consequently much more free and melodious. Tallis's setting of it is said to resemble the Gregorian Descants of the Creed in the Missa de Angelis. Further settings of it, both ancient and modern, are extremely numerous. Among the ancient ones may be mentioned settings by Byrd (in six parts), Farrant, Gibbons, Child, Aldrich, Blow, Purcell, Rogers, and Bevin. Attempts have been made with very fair success to adapt it to a kind of free chant form, which renders it more available for musical performance by parish choirs and general congregations.

The Athanasian Creed, as it is now called, was formerly known very generally as the Psalm 'Quicunque vult'—the first two words of its Latin form. It was sung at Prime after certain other psalms, and the custom of singing it as a psalm has continued in the Roman Church to the present day, it being pointed and divided into paragraphs after the manner of psalms, and answering in its construction to the principles of ancient Hebrew poetry. The chant most commonly used is a very simple one by Tallis (see CHANT, under 'Canterbury Tune'). There have been many others specially written for it both in ancient and modern times. It has never been customary to adapt it to more elaborate forms of composition. C. H. H. P.

CREMONA, a considerable town in Lombardy, on the river Po, was for the space of two centuries, from about 1550 to 1750, the seat of the famous Cremona school of violin-makers. The shape and construction of the violin, and the other instruments belonging to the tribe, having been finally settled by the great makers of Brescia, Gaspar di Salò and Paolo Maggini (see those names), it was at Cremona that the last step in the art of violin-making was made, which led to that point of perfection from which no further progress has yet been possible or perhaps desirable. The numerous makers of the Amati family (see that name) chronologically head the list of the masters of Cremona: Antonio Stradivari and Josef Guarnerius (see those names) are the greatest of all, and their instruments have never been rivalled. The names of Andreas, Petrus, and Josef Guarnerius (brother of Andreas), Carlo Bergonzi, Guadagnini, Montagnana, Ruggieri, Storione, and Testore (see all these names) make up the list of the masters of this school, whose violins are still highly valued. The term 'a Cremona,' or 'a Cremonese violin' is often incorrectly used for an old Italian instrument of any make.

'Cremona,' as applied to an organ stop of 8-ft. pitch and clarinet tone, is a mere ignorant corruption of 'Krummhorn.' P. D.

CREQUILLON or CRECQUILLON, THOMAS, one of the most distinguished musicians of the Netherland school in the period between that of Josquin des Prés and that of Lassus and Palestrina (1520-60). He was attached to the chapel of the Emperor Charles V. at Madrid

about 1547; he was living in 1557. His compositions are even more numerous than those of his contemporaries Clemens non Papa and Gombert. His masses, motets, and chansons appear in all the great collections printed at Louvain and Antwerp in the second half of the 16th century, and some of his works were printed in 1544 at Venice by Gardano. [See also the *Quellen-Lexikon.*] J. R. S. B.

CRESCENDO—increasing, *i.e.* in loudness. One of the most important effects in music. It is expressed by *cresc.* and by the sign <. Sometimes the word is expanded—*cres . . . cen . . . do*—to cover the whole space affected. As with so many other things now familiar, Beethoven was practically the inventor of the crescendo. In the works of his predecessors, even in such symphonies as the G minor and 'Jupiter' of Mozart, it is very rarely to be found. Among the most famous instances in Beethoven are that in the 'working out' (after the double bar) of the first movement of the Symphony in B♭ (No. 4). This immortal passage, which so excited the wrath of Weber, begins in the strings and drum *ppp*, and continues so for 13 bars; then a shade louder, *pp*, for 31 bars; and then a crescendo of 8 bars with the same instruments, ending in the reprise of the subject *fortissimo*, and with full orchestra.

Another instance, on a still more extended scale, is in the coda to the last movement of Schubert's Symphony in C (No. 9), where the operation is divided into distinct steps—first 8 bars *ppp*; then 24 bars *pp*; then 12 bars *p*; then 16 bars *crescendo* to *mf*; then 12 bars *crescendo* to *f*; then a *crescendo* of 8 bars to *ff fz*; and lastly a final advance of 36 more to *fff*.

In the overtures of Spontini and Rossini the crescendo is employed, with a repetition of the same figure, in a manner at once so effective, so characteristic, and so familiar, that it is only necessary to allude to it here. [The crescendo degenerated into a mere mannerism with Rossini, in whose works it is used with wearisome iteration.] G.

CRESCENDO PEDAL. A term sometimes used for the ordinary swell pedal of the organ, but more appropriately applied, in the form of 'Crescendo and Decrescendo Pedal' to a contrivance which throws out and takes in the stops in their proper order as to pitch and power. T. E.

CRESCENTINI, GIROLAMO, a very celebrated Italian sopranist, who was born Feb. 2, 1766, at Urbania, near Urbino. At the age of ten, he began the study of music, and was afterwards placed with Gibelli, to learn singing. Possessed of a beautiful mezzo-soprano voice, and a perfect method of vocalisation, he made his début at Rome in 1783. He then obtained an engagement as *primo uomo* at Leghorn, where he appeared in Cherubini's 'Artaserse.' In the spring of 1785 he sang at Padua in the 'Didone' of Sarti, and was engaged for Venice. In the following summer he was at Turin, where he sang Sarti's 'Ritorno di Bacco.' He now came to London, and remained sixteen months. He was here thought so moderate a performer that, before the season was half over, he was superseded by Tenducci, an old singer, who had never been first-rate, and had scarcely any voice left. 'It is but justice,' says Lord Mount-Edgcumbe, 'to add that, when he was here, Crescentini was very young, and had not attained that excellence which has since gained him the reputation of a first-rate singer. He never returned to this country.' In 1787 he was engaged for the carnival at Milan, and sang for two whole years, 1788 and 1789, at the San Carlo in Naples. In 1791 and 1793 he appeared at the Argentina at Rome, and in 1794 at Venice and Milan. In this last city he arrived at the highest degree of excellence in Zingarelli's 'Romeo e Giulietta.' In 1796 Cimarosa composed expressly for him 'Gli Orazii e Curiazii' at Venice. An amusing story is told, that on one occasion, fancying that the dress of the primo tenore (Curiazio) was more magnificent than his own (as Orazio), he insisted on its being given up to him. An exchange was therefore made, in spite of the remonstrances of the manager; and throughout the evening a Curiatius, six feet high, was seen wearing a little Roman costume, which looked as if it would burst at any moment, while a diminutive Horatius was attired in a long Alban tunic, with its skirt trailing on the ground. After singing at Vienna, he returned to Milan for the carnival of 1797, for the 'Meleagro' of Zingarelli. At the end of this season he engaged himself with the Opera at Lisbon, where he sang for the next four years. Returning to Italy, he reappeared at Milan in Mayr's 'Alonzo e Cora' and Federici's 'Ifigenia,' in 1803. He sang at Piacenza, at the opening of the new theatre, and went to Vienna in 1805, with the appointment of professor of singing to the Imperial family. Napoleon having heard him there, was so charmed that he determined to engage him permanently, and secured to him a handsome salary. He also gave him the decoration of the Iron Crown, which provoked almost as much discussion as Napoleon's distribution of thrones and sceptres had done. It is related that, in a salon at Paris, when a pompous orator was holding forth on the subject of the honour conferred on Crescentini, and inquired what right he could have to such a distinction,—the beautiful Mme. Grassini, who was present, rose majestically, and with theatrical tone and gesture exclaimed, '*Et sa blessure, monsieur!*' A storm of laughter and applause stopped the discussion. Crescentini sang at Paris from 1806 to 1812, when his voice showed signs of suffering from an uncongenial climate, and he with difficulty obtained permission to retire. He went to Bologna, and then to Rome, where he remained till 1816, when he settled at Naples as professor at the Real Collegio di Musica. He was the last great singer of his school. 'Nothing

could exceed,' says Fétis, 'the suavity of his tones, the force of his expression, the perfect taste of his ornaments, or the large style of his phrasing.' In Romeo he affected Napoleon and the whole of the audience to tears by his singing of the prayer, and the air 'Ombra adorata.' The prayer of Romeo was of his own composition, for this excellent singer was also a composer; he published at Vienna in 1797 several collections of *Ariette*, and some admirable exercises for the voice, with a treatise on vocalisation in French and Italian, at Paris. He died at Naples, April 24, 1846. J. M.

CRESER, William, Mus.D., born at York Sept. 9, 1844; the son of the choirmaster at St. John's Church there. He entered the choir of the Minster at eight years of age, and studied afterwards with Sir G. A. Macfarren. He took the Mus.B. degree at Oxford in 1869, and that of Mus.D. in 1880. In or about 1859 he was organist at Holy Trinity, Micklegate, York; and from 1863 to 1875, of St. Andrew's, Grinton. In the latter year he became organist of St. Martin's, Scarborough, and in 1881, of the Parish Church, Leeds. Some of his most important work as a choir-trainer was done during his tenure of the last appointment, and he organised notable performances of Bach's 'St. Matthew Passion,' and other important works. In 1891 he was appointed organist of the Chapel Royal, St. James's, and composer to Her Majesty's Chapels Royal. He held these posts until 1902. He conducted the Western Madrigal Society in 1896; has given many organ recitals in London and the provinces. Mrs. Creser, *née* Amelia Clarke, has attained considerable success as a mezzo-soprano singer. Dr. Creser's works include several oratorios and compositions of high aim: 'Micaiah'; 'Eudora,' a cantata, given at Leeds in 1882; 'The Golden Legend'; 'The Sacrifice of Freia' (performed at the Leeds Festival of 1889 with success); 'Tegner's Drapa' (Longfellow); a Mass; two Psalms; an operetta, 'Naxine,' etc., are examples of his industry and skill. An 'Old English Suite' for orchestra was played at the Queen's Hall in 1896, and his chamber music includes a quartet in A minor; a trio in A, pianoforte and strings; a violin sonata, and organ pieces. (*Brit. Mus. Biog.*)

CREYGHTON, Rev. Robert, D.D., born about 1639, was the son of the Rev. Dr. Robert Creyghton, Professor of Greek at Cambridge, afterwards Dean of Wells, and in 1670 Bishop of Bath and Wells. In 1662, he, like his father, held the Greek Professorship at Cambridge. In 1674 he was appointed canon residentiary and precentor of Wells Cathedral. Creyghton composed several services and anthems still extant in the library of Wells Cathedral. Two services in E♭ and B♭ are now printed. Tudway's MS. (Brit. Mus. Add. MSS. 7338, 7339) contains a third, in C, besides an anthem, 'Praise the Lord.' He is widely known by his beautiful little canon-anthem 'I will arise.' He died at Wells, Feb. 17, 1733-34, at the advanced age of ninety-four. W. H. H.

CRISTOFORI, Bartolommeo di Francesco—written Cristofali by Maffei—a harpsichord-maker of Padua, and subsequently of Florence, and the inventor of the pianoforte. Other claims to this discovery have great interest and will be noticed elsewhere (see Pianoforte and Schröter), but the priority and importance of Cristofori's invention have been so searchingly investigated and clearly proved by the late Cavaliere Leto Puliti,[1] that the Italian origin of the instrument, which its name would indicate, can be no longer disputed.

Cristofori was born May 4, 1665 (Fétis and Pietrucci in their respective memoirs erroneously state 1683). It may be surmised that he was the best harpsichord-maker in Padua, inasmuch as Prince Ferdinand, son of the Grand Duke Cosmo III., a skilled harpsichord player, who visited Padua in 1687, induced him then or very soon after to transfer himself from that city to Florence. We have evidence that in 1693 Cristofori wrote from Florence to engage a singer—the only time he appears in the Prince's voluminous correspondence. In 1709 Maffei visited Florence to seek the patronage of Prince Ferdinand for his *Giornale dei Letterati d'Italia* and in vol. v. of that work, published in 1711, Maffei states that Cristofori had made four 'gravicembali col piano e forte,' three distinctly specified as of the large or usual harpsichord form, the fourth differing in construction, and most likely in the clavichord or spinet form: there was among the Prince's musical instruments a 'cimbalo in forma quadra,' an Italian spinet which when altered to a pianoforte would be termed a square. In 1719, in his *Rime e Prose*, published at Venice, Maffei reproduced his description of Cristofori's invention without reference to the previous publication. As these pianofortes were in existence in 1711, it is just possible that Handel may have tried them, since he was called to Florence in 1708 by Prince Ferdinand to compose the music for a melodrama, remained there a year and brought out his first opera 'Rodrigo.'

The Prince died in 1713, and Cristofori continuing in the service of the Grand Duke, in 1716 received the charge of the eighty-four musical instruments left by the Prince. Of these nearly half were harpsichords and spinets—seven bearing the name of Cristofori himself. It is curious, however, that not one of them is described as 'col piano e forte,' and also interesting that in the receipt to this inventory we have Cristofori's own handwriting as authority for the spelling now adopted of his name.

The search for Cristofori's workshop proving unsuccessful, Puliti infers that the Prince had

[1] Cenni Storici della vita del serenissimo Ferdinando dei Medici, etc. Estratto dagli Atti dell' Accademia del R. Istituto Musicale di Firenze, 1874.

given him a room in the Uffizi, probably near the old theatre, in the vicinity of the foundry and workshops of the cabinet-makers. He imagines the Prince suggesting the idea of the pianoforte, and taking great interest in the gradual embodiment of the idea thus carried out under his own eyes.

Maffei gives an engraving of Cristofori's action or hammer mechanism of 1711. It shows the key with intermediate lever, and the hopper, the thrust of which against a notch in the butt of the hammer jerks the latter upwards to the string. The instant return of the hopper to its perpendicular position is secured by a spring; thus the escapement or controlled rebound of the hammer is without doubt the invention of Cristofori. The fall of the intermediate lever governs an under-damper, but there is no check to graduate the fall of the hammer in relation to the force exercised to raise it. For this, however, we have only to wait a very few years. There was in the possession of the Signora Ernesta Mocenni Martelli in Florence (now, by gift of Mrs. J. Crosby Brown, in the Metropolitan Museum, New York), a grand pianoforte made by Cristofori in 1720, the namepiece 'Bartholomæus de Christoforis Patavinus Inventor faciebat Florentiæ MDCCXX.' being the guarantee for its origin and age. Puliti had two exact drawings made of the action, one with the key at rest and the other when pressed down, and has described each detail with the greatest care. The hammer is heavier than that represented in 1711, the intermediate lever is differently poised, and the damper raised by the key when in movement now acts above instead of under the strings. Finally there is the check completing the machine.

What doubts have not found their solution by the discovery of this interesting instrument, which was exhibited at the Cristofori Festival at Florence in May 1876? The story of it begins about eighty years since, when Signor Fabio Mocenni, the father of the late owner, obtained it from a pianoforte-tuner at Siena in exchange for wine. Its anterior history is not known, but Puliti offers suggestive information in the fact of Violante Beatrice di Baviera—the widow of Cristofori's master and protector Prince Ferdinand—having lived at Siena at different times, particularly when her nephew was studying at the Sienese University in 1721.

But if it were only a harpsichord turned by the addition of hammers to a pianoforte? The careful examination of Puliti is the authority that all its parts were constructed at one time, and the word 'Inventor' appended to Cristofori's name would not have been applied to a simple harpsichord or spinet. It is a bichord instrument, compass from D to F, exceeding four octaves. Another grand pianoforte by Cristofori, a few years later in date, 1726, is in the famous museum at Florence belonging to Baron Kraus and his son the Commendatore Alessandro Kraus figlio. This instrument was shown by them in the Paris Exhibition of 1878, and was, at that time, in satisfactory playing order: the touch light and agreeable. Yet another instrument existing accredited to Cristofori is a harpsichord with three keyboards, dated A.D. 1702, and bearing the arms of Ferdinando de' Medici. It has been acquired in Italy by Mr. Frederick Stearns of Detroit, U.S.A., and presented by him to the University of Michigan.

Cristofori died Jan. 27, 1731. His reputation had already extended into Germany, for Mattheson had published the translation by König of Maffei's article in the second volume of his *Critica Musica* (Hamburg, 1722-25), (reproduced in Adlung's *Musica Mechanica Organœdi*, 1767) and Walther, in his *Musikalisches Lexikon* (Leipzig, 1732), article 'Pianoforte,' treating of the invention, attributes it exclusively to Cristofori.

On May 7, 1876, a stone was placed in the cloisters of Santa Croce at Florence bearing the following inscription—

A BARTOLOMEO CRISTOFORI
Cembalaro da Padova
che
in Firenze nel MDCCXI
INVENTÒ
IL CLAVICEMBALO COL PIANO E FORTE.

A. J. H.

CRIVELLI, GAETANO, an excellent tenor of the old school, born at Bergamo in 1774. He made his first appearance when very young; and married at the age of nineteen. In 1793 he was at Brescia, where he was admired for his fine voice and large manner of phrasing. He was engaged to sing at Naples in 1795, where he remained several years, profiting greatly by the opportunities of hearing the best singers, and by the advice of good masters, especially of Aprile. From thence he went to Rome, Venice, and at last to Milan, where he sang at La Scala with Banti, Marchesi, and Binaghi, in the carnival of 1805. In 1811 he succeeded Garcia at the Italian Opera in Paris, where he produced a great effect in the 'Pirro' of Paisiello, in which he first appeared. His superb voice, excellent method, and nobly expressive style of acting, combined to make him a most valuable acquisition to the stage. He remained there until Feb. 1817. He then came to London, and helped to make that a brilliant season at the opera. He had, according to Lord Mount-Edgcumbe, 'a sonorous mellow voice, and a really good method of singing, but he was reckoned dull, met with no applause, and staid only one year.' In 1819 and 1820 he sang with success at La Scala in Milan; but in the latter year signs of decay were apparent in his voice, which became more evident when he appeared in that town in Lent, 1823. In 1825, at Velluti's suggestion, Ebers sent for him to

take part in 'Teobaldo ed Isolina'; but the opera was not performed. For six years he presented the painful spectacle of a worn-out singer before the public of small provincial towns. [He published some canzonets and songs in London and Milan.] In 1829 he sang, perhaps for the last time, at Florence; and died at Brescia, July 10, 1836. J. M.

CRIVELLI, DOMENICO, son of the above, was born June 7, 1793, at Brescia, and died in London, Feb. 11, 1857; he was for some years teacher at the Real Collegio of Naples, and when called to London by his father brought out an opera buffa, 'La Fiera di Salerno'; he settled in London as a singing-master, and published *The Art of Singing*. (Riemann's and Baker's Dictionaries.)

CROCE, GIOVANNI, a learned and original composer, was born about 1557 or 1559 at Chioggia. He was a pupil of Zarlino, by whom he was placed in the choir of San Marco. [In 1568, and again in 1599, he is called 'Archimusico' of San Marco; in 1593 he taught at the Seminario.] In 1603 he succeeded Donati as maestro at that cathedral, and still held the post when he died, May 15, 1609. He was also in priest's orders, and in this capacity was attached to the church of Santa Maria Formosa. His publications chiefly consist of a long list of madrigals, motets, psalms, and other pieces in the ordinary musical forms of his epoch, and, with the exception of one curious volume, they are hardly worth enumeration. This is entitled 'Triaca Musicale, nella quale vi sono diversi capricci a 4, 5, 6, and 7 voci, nuovamente composta e data in luce' (Gi. Vincenti, Venice, 1595). The pieces in it are mostly comic, and are composed upon words written in the Venetian patois. A second edition of this was issued in 1596, a third in 1607, and a fourth in 1609. Two motets for eight voices are in Bodenschatz's 'Florilegium Portense' (Part 2, Nos. 111 and 150). A collection of church music by Croce, set to English words, under the title of 'Musica Sacra to Sixe Voyces,' was published in London in 1608. Several fine motets of his, full of expression and beauty, were published with English words by Hullah in his *Part Music*, and nine in the collection of the Motet Society; three of his madrigals are in Yonge's *Musica Transalpina;* of these 'Cynthia, thy song' is well known. [Two motets and a 'Giuoco dell' Oca' from the 'Triaca,' are in Torchi's *Arte musicale in Italia*, vol. ii.] E. H. P.

CROCIATO IN EGITTO, IL, heroic opera in two acts; words by Rossi; music by Meyerbeer; produced at the Fenice, Venice, in 1824, and at the King's Theatre, London, July 23, 1825. Velluti appeared in it, probably the last *castrato* heard in London.

CROFT (or, as he sometimes wrote his name, Crofts), WILLIAM,[1] Mus.Doc., born at Nether Ettington, Warwickshire, in 1678 (he was baptized on Dec. 30 of that year); he was one of the children of the Chapel Royal under Dr. Blow. On the erection of an organ in the church of St. Anne, Soho, 1700, Croft was appointed organist. [Earlier in the same year he had joined Blow, Piggott, Jeremiah Clarke, and John Barrett in publishing a 'Choice Collection of Ayres for the Harpsichord or Spinnet.'] On July 7, 1700, he was sworn in as a gentleman extraordinary of the Chapel Royal, with the reversion, jointly with Jeremiah Clarke, of the first vacant organist's place. On May 25, 1704, on the death of Francis Piggott, Croft and Clarke were sworn in as joint organists, and on Clarke's death in 1707, Croft was sworn in to the whole place. On the death of Dr. Blow in 1708 Croft was appointed his successor as organist of Westminster Abbey, and master of the children and composer to the Chapel Royal. It was in the discharge of the duties of the latter office that Croft produced, for the frequent public thanksgivings for victories, etc., many of those noble anthems which have gained him so distinguished a place among English Church composers. He had before written 'occasional' anthems, as, for example, after the victory of Blenheim in 1704 and 1705. In Jan. 1711-12 he resigned his appointment at St. Anne's in favour of John Isham, who had been his deputy for some years. In 1712 he edited for his friend, Mr. (afterwards Sir John) Dolben, sub-dean of the Chapel Royal, a collection of the words of anthems under the title of *Divine Harmony*, to which he prefixed a brief historical account of English church music. [But in H. Davey's *History of English Music*, pp. 370-74, it is stated that John Church was the editor.] On July 9, 1713, he took the degree of Doctor of Music in the University of Oxford, his exercise (performed on July 13) being two odes, one in English, the other in Latin, on the Peace of Utrecht; these were afterwards engraved and published under the title of *Musicus Apparatus Academicus*. In 1715 Croft received an addition of £80 per annum to his salary as master of the children of the Chapel Royal for teaching the children reading, writing, and arithmetic, as well as playing on the organ and composition. In 1724 Dr. Croft published in two folio volumes, with a portrait of himself, finely engraved by Vertue, prefixed, Thirty Anthems and a Burial Service of his composition, under the title of *Musica Sacra*. In the preface he states it to be the first essay in printing church music in that way, *i.e.* engraven in score on plates. [He was one of the original members of the Academy of Vocal Musick founded 1725.] Dr. Croft died at Bath, August 14, 1727, and was buried in the north aisle of Westminster Abbey, where a monument is erected to his memory. Croft in the earlier part of his career composed for the theatre, and produced overtures and act

[1] The records of St. Anne's, Soho, give his name as Philip.

tunes for 'Courtship à la mode,' 1700; 'The Funeral,' 1702; 'The Twin Rivals,' 1702; and 'The Lying Lover,' 1703. He also published sonatas for both violin and flute. Numerous songs by him are to be found in the collections of the period, and some odes and other pieces are still extant in MS. Two psalm tunes, attributed to him, St. Anne's and St. Matthew's, and a single chant in B minor, will long live in the Anglican Church, even after his fine anthems have become obsolete. [See an interesting article in *Musical Times*, 1900, p. 577, with a photograph from the portrait in the Music School, Oxford.] W. H. H.

CROMORNE, or CROM HORN, a corruption of KRUMMHORN, which see.

CROOK (Fr. *Corps de réchange;* Germ. *Ton; Bogen*). A name given to certain accessory pieces of tubing applied to the mouthpiece of brass instruments for the purpose of altering the length of the tube, and thus raising or lowering their pitch. Since natural horns and trumpets, without valves or slides, can only play one scale, the sole method of enabling them to play another is to transpose the fundamental note, and this is done by the crooks. The largest number of crooks is required by the French horn, which is occasionally written for in every key, from the treble B♮ down to A♭ in the bass octave.

The term is also applied to the S-shaped metal tube connecting the body of the bassoon with the reed (Fr. *bocale*), [and generally to any such removable bent tube at the mouthpiece end of any instrument, as in the saxophone, and the alto and bass clarinets]. W. H. S.

CROSDILL, JOHN, was born in London in 1751 or 1755. He is said to have been at Westminster School (but no trace of his name is to be found in the school registers, which, however, only begin in 1763); he received his early musical education in the choir of Westminster Abbey under John Robinson and Benjamin Cooke. Upon quitting the choir he became a performer on the violoncello, and soon attained to considerable proficiency. In 1768 he became a member of the Royal Society of Musicians, and in the following year appeared at Gloucester, as principal violoncello at the meeting of the Three Choirs, a position which he continued to occupy until his retirement from his profession, with the exception of the year 1778, when the younger Cervetto filled his place, at Gloucester. In 1776, on the establishment of the Concert of Ancient Music, Crosdill was appointed principal violoncello. On March 10, 1778, he succeeded Nares as violist of the Chapel Royal, an appointment which soon became a sinecure, but which he continued to hold until his death. He also became a member of the King's band of music, an office which he likewise retained until his death. In 1782 he was appointed chamber musician to Queen Charlotte, and about the same time taught the Prince of Wales, afterwards George IV., to play the violoncello. In 1784 he filled the post of principal violoncello at the Handel Commemoration. In 1788 or later, having married a lady of considerable fortune, he retired from the public exercise of his profession. In 1821 he resumed its duties for one day, to play, as a member of the King's band, at the coronation of George IV. Fétis says that about 1772 Crosdill visited Paris, where he took lessons of the elder Janson; that he resided in Paris for some years, and played in the orchestra of the 'Concerts des Amateurs' at the 'Loge Olympique'; and that he returned to London about 1780. But this account cannot be correct as respects the dates, as we have seen that Crosdill was engaged in England during the greater part of the time mentioned by Fétis. His visit was probably in 1778-79, and occupied months instead of years. Crosdill died in October 1825 at Eskrick, Yorkshire,[1] leaving all his property to his only son, Lieutenant-Colonel Crosdill, C.B., of the East India Company's service, who, by his father's desire, presented to the Royal Society of Musicians the munificent donation of £1000. W. H. H.

CROSS, THOMAS, an early music engraver, and practically the inventor of sheet music. By error he was treated in the former edition of this work as two persons—Cross senior and Cross junior; but evidence is conclusive enough that he merely signed himself as 'junior' in the very earliest part of his career (*i.e.* 1683 to about 1708-10) when it may be presumed that his father was alive. There is nothing to connect Cross senior with music engraving, although it is quite possible that if he had such connection he might have cut some of the music of the few delicately engraved books of instrumental works which were issued near the middle of the 17th century by the elder John Playford. It is also possible that Cross senior may have been the Thomas Cross who engraved portraits, 1646 to 1684 (see Walpole's *Anecdotes of Painting*).

The name of Thomas Cross the music engraver first appears in 1683 on Purcell's 'Sonnata's of III. Parts'; it is there given as 'Tho. Cross junior Sculp.' His latest dated work is D. Wright's 'Minuets and Rigadoons for the Year 1732.'

Between the above dates Cross appears to have had, certainly in the early part, nearly the whole of the music-engraving trade in his hands, working for composers as well as for publishers. Before the 17th century had closed he had engraved several important collections as:—Purcell's and Eccles' Songs, folio, a collection of Richard Leveridge's Songs in small folio *circa* 1698. 'Military Musick or the Art of playing the Haut-bois,' 1697, etc. Cross's early work was particularly neat, and clearly cut on copper. It

[1] *The Harmonicon*, vol. iii. p. 235, says that he died at his house in Berners Street, London.

was about this time that he began the engraving and issue of single songs. All vocal music prior to this period had to be purchased in collections, chiefly printed from type. Though instrumental music in small quantity had been engraved yet it is due to Cross that he was the first (in England at least) to engrave vocal music, and the first to issue single songs as separate publications.

Copper was expensive for ephemeral productions sold at a cheap rate, but examination will show that Cross had soon found a cheaper material, probably pewter. The single songs were printed on a half sheet of thin paper, and must have come forth in enormous numbers. At the foot of most the engraver's name appears frequently as 'Exactly engraved by T. Cross.'

The single song had, before 1700, become so popular that Dr. Blow's *Amphion Anglicus*, 1700, contains a tirade against them—

> Music of many parts hath now no force,
> Whole reams of single songs become our curse.
> . . . . .
> While at the shops we daily dangling view
> False concords by Tom Cross engraven true.

There is another allusion to 'honest Cross' in Purcell's *Orpheus Britannicus*.

About 1720 or a little later Cross had a serious rival in the publication of sheet songs. John Walsh commenced to issue them in similar form, but from plates produced by the notes and lettering being punched on the pewter as at the present day. This caused Cross to engrave on one of his sheets 'Beware of ye nonsensical puncht ones.—Cross Sculp.' Cross engraved boldly and freely, his lettering being very flowing. Hawkins states that he 'stamped the plates of Geminiani's solos and a few other publications, but in a very homely and illegible character, of which he was so little conscious that he set his name to everything he did, even to single songs.' Hawkins is frequently inaccurate in details; it is doubtful whether Cross ever did any stamped or punched work. His later engraving is not so fine and minute as his earlier, but it is quite clear and legible.

Cross kept a music shop, his first address being 'in Katharine Wheel Court near Snow Hill' [or 'near Holbourn Conduit']; afterwards he was 'near the Pound Clerkenwell.' F. K.

CROSSE, JOHN, born at Hull, July 7, 1786, published in 1825 a large quarto volume entitled 'An Account of the Grand Musical Festival held in September 1823, in the Cathedral Church of York, . . . to which is prefixed a Sketch of the rise and progress of Musical Festivals in Great Britain, with biographical and historical notes'—an admirably executed work, replete with valuable and useful information. He died at York, Oct. 20, 1833. W. H. H.

CROSS - FINGERING. See FINGERING (WIND INSTRUMENTS).

CROSSLEY, ADA, born March 3, 1874, at Farraville, Gippsland, Australia, studied at first with Mme. Fanny Simonsen, of Melbourne, and learnt the piano while carrying on her vocal studies. She sang in Australia for about two years, and won such appreciation in oratorio and concert-singing, that on her departure to continue her studies in Europe, municipal functions of a valedictory kind were held in her honour at Melbourne, Sydney, and Adelaide. After studying with Santley in London and Mme. (Mathilde) Marchesi in Paris, she gave a concert at the Queen's Hall in London on May 18, 1895, when she sang an air from Ambroise Thomas's 'Psyché' with such success as to make her future career a matter of certainty. She very soon attained a foremost rank among the contraltos of the time; and while musical people delight in her exquisitely pure and musicianly style in the classical works, the less cultivated audiences take equal pleasure in the beautiful quality of her sympathetic voice, and her delivery of ballads. It would be impossible to enumerate even the most prominent of her public appearances, but her performance of the 'Agnus Dei' from Bach's B minor mass, and of the solo part in Brahms's 'Rhapsody' are the highest of her achievements up to the present time. M.

CROTCH, WILLIAM, Mus.Doc., was born in Green's Lane, Norwich, July 5, 1775. His father, a master carpenter, who combined a taste for music and mechanics, had constructed for himself a small organ. When little more than two years old the child evinced a strong desire to get to this instrument, and being placed before it, contrived shortly to play something like the tune of 'God save the King,' which he soon was able to play with its bass. His ear was remarkably sensitive, and readily distinguished any note when struck, or detected faulty intonation. The Hon. Daines Barrington, a well-known amateur, published an interesting account of him, and Dr. Burney communicated to the Royal Society an account, which was printed in the *Philosophical Transactions*, vol. lxix. pt. 1. In October 1779 the child was brought to London, and performed in public on the organ, giving daily recitals (as they would now be called) at Mrs. Hart's, a milliner in Piccadilly. Besides his musical ability he displayed considerable skill in drawing, to which art he remained attached through life, and attained to much eminence in it. In 1786 Crotch went to Cambridge, and remained there about two years as assistant to Dr. Randall, the Professor of Music, and organist of Trinity and King's Colleges, and Great St. Mary's Church. At fourteen years of age he composed an oratorio, 'The Captivity of Judah,' which was performed at Trinity Hall, Cambridge, June 4, 1789. In 1788 he had removed to Oxford, where he studied, under the patronage of the Rev. A. C. Schomberg, of Magdalen College, with a view of entering the church. His patron's health having broken down he resumed the profession of music,

and in September 1790 was appointed, on the death of Thomas Norris, organist of Christ Church. On June 5, 1794, he graduated as Bachelor of Music. In March 1797 he succeeded Dr. Philip Hayes, deceased, as organist of St. John's College, and Professor of Music in the University. [About the same time he was organist of St. Mary's.] On Nov. 21, 1799, he proceeded Doctor of Music, composing as his exercise Dr. Joseph Warton's 'Ode to Fancy,' the score of which he afterwards published. From 1800 to 1804 he delivered lectures in the Music School, and in 1804, 1805, and 1807, lectured at the Royal Institution. [In 1810 he composed an Installation Ode for Lord Grenville.] In 1812 he produced his oratorio 'Palestine,' which was received with great favour, and also published a treatise on the *Elements of Musical Composition*. [In 1813 he became an associate of the Philharmonic Society, and was a member from 1814 to 1819.] From 1820 onwards he lectured at the Royal Institution, and on the establishment of the Royal Academy of Music in 1822 was placed at its head as principal. He resigned the post in June 1832. On June 10, 1834, he produced at Oxford, on the installation of the Duke of Wellington as Chancellor, an oratorio, 'The Captivity of Judah,' wholly different from his juvenile work bearing the same title.[1] On June 28 in the same year he made his last public appearance as a performer, by acting as organist for part of the third day's performance at the Royal Musical Festival in Westminster Abbey. Dr. Crotch died at Taunton, where he had for some time resided, on Dec. 29, 1847, while seated at dinner at the house of his son, the Rev. William Robert Crotch, then Head Master of the Grammar School there; he was interred in the churchyard of Bishop's Hull, near Taunton, where a monumental inscription is placed to his memory. Besides the works above specified, Dr. Crotch produced 'Ten Anthems,' some chants, a motet, 'Methinks I hear'; several glees; some fugues and concertos for the organ; several pianoforte pieces; an ode on the accession of George IV., performed at Oxford, 1820; Funeral Anthem for the Duke of York, 1827; 'The Lord is King,' anthem for voices and orchestra, 1843; and some works on Thorough-Bass and Harmony. He also published *Specimens of various styles of Music referred to in a course of Lectures on Music read at Oxford and London*, and in 1831 the *Substance of several courses of Lectures on Music read at Oxford and in the Metropolis*. As a teacher he enjoyed a high and deserved reputation. [A complete list of his compositions, compiled by John S. Bumpus, appeared in *Musical News*, April 17 and 24, 1897.] W. H. H.

CROTCHET, a note which is half the value of a minim, and twice that of a quaver, and is represented thus ♩. The name is derived from the French *croche;* but *croche* is a quaver, ♪, and is so called on account of the hook at the end of its tail, whereas a crotchet has no hook. [The *semiminima* of ancient music was an open note with a hook.] The French name for this note is *noire*, the Italian *semiminima*, and the German *Viertel*, 'a quarter'—*i.e.* of a semibreve. The last name is adopted by American musicians. The French call a crotchet rest, 𝄾 by the pretty name of *un soupir*. G.

CROUCH, Mrs. Anna Maria, born in London, April 20, 1763, was the daughter of Peregrine Phillips, a solicitor. Being gifted with a remarkably sweet voice, Miss Phillips was at an early age placed under the instruction of a music-master named Wafer, and some time afterwards was articled to Thomas Linley, under whose auspices she made her appearance on Nov. 11, 1780, at Drury Lane Theatre, as Mandane in Arne's 'Artaxerxes.' Her success was great, and for upwards of twenty years she held a high place in public esteem, both as actress and singer. Early in 1785 she married Mr. Crouch, a lieutenant in the navy, but after a union of about seven years the parties separated by mutual consent. She sang at Drury Lane in oratorios in 1787; later on she lived with Michael Kelly, and appeared for the last time at his benefit, May 14, 1801, as Celia in 'As You Like It.' After this, her health became impaired, she withdrew from public life, and died at Brighton, Oct. 2, 1805. [Two volumes of *Memoirs* by M. Young, were published in 1806, with a portrait. A sketch by Cosway belongs to Lord Tweedmouth, and a miniature by the same artist to Baroness Burdett-Coutts.] W. H. H.

CROUCH, Frederick Nicholls, born in Warren Street, Fitzroy Square, London, July 31, 1808, studied music with his father, an eminent violoncellist, and his grandfather, William Crouch, organist of St. Luke's E.C. Young Crouch played in the band of the Royal Coburg Theatre at the age of nine; after travelling in Yorkshire and Scotland, he was for two years a common seaman on coasting smacks between London and Leith. He next entered the orchestra of Drury Lane Theatre, and the choirs of Westminster Abbey and St. Paul's. From about 1822 he studied at the Royal Academy of Music under Crotch, Attwood, Lindley, and Crivelli, and played in the principal orchestras. He was in Queen Adelaide's private band until 1832, and taught singing at Plymouth. He is said to have invented the engraving process called zincography. About 1838 he gave lectures on the songs and legends of Ireland, and about the same time his 'Kathleen Mavourneen' was published as one of a series, 'Echoes of the Lakes.' In 1849 he went to America, and was first engaged as violoncellist at the Astor Place Opera House, New York; afterwards he went to Boston; to Portland (from 1850); to Philadelphia (1856) as conductor of

[1] The MS. is now at St. Michael's College, Tenbury.

a series of Saturday Concerts; and to Washington, where he founded an unsuccessful school of music. His next move was to Richmond, where he sang in a church choir; he joined the Confederate army, and served through the civil war. He settled in Baltimore as a singing-teacher, and died at Portland, Maine, August 18, 1896. Besides the song that has made his name famous, and many others, Crouch wrote two operas, 'Sir Roger de Coverley,' and 'The Fifth of November.' (*British Musical Biography*; Baker's *Dictionary*.) M.

CROWN DIAMONDS, THE. See DIAMANTS DE LA COURONNE.

CRÜGER, JOHANN, born April 9, 1598, at Gross-Breese near Guben in Prussia, educated chiefly at the Jesuit college of Olmütz, at the school of poetry at Regensburg, and the university of Wittenberg; in 1622 was appointed cantor at the church of St. Nicolaus at Berlin, a post which he retained till his death, Feb. 23, 1662. His reputation in his own day both as an author and composer was great, but he is now chiefly known as the composer of some of the most favourite chorales. The best-known of them are 'Nun danket alle Gott'; 'Jesu meine Zuversicht'; 'Jesu meine Freude'; and 'Schmücke dich, o liebe Seele.' [They were published under the title of 'Praxis pietatis melica,' the melodies with bass, in 1644. No copy is known to exist either of the first or second edition (1647), but the work ran through innumerable editions, the fortieth of which appeared in Berlin, 1724. His 'Geistliche Kirchen-Melodien über die von Herrn D. Luthero . . . auffgesetzte Gesänge und Psalmen' in which the tunes are for four voices and two instruments, appeared in Leipzig, 1649.] He also composed many concertos and motets which no longer exist. Other works have been preserved; they are *Meditationum musicarum Paradisus primus, oder Erstes musikalisches Lust Gärtlein*, in three and four parts (Frankfort, 1622); and *Med. mus. Parad. secundus* (Berlin, 1626); a collection of new Magnificats in German, in two and eight-part harmony, arranged in all the eight tones. Also *Recreationes musicæ, das ist neue poetische Amorösen* (Leipzig, 1651), containing thirty-three pieces. Among his theoretical works may be mentioned (1) *Synopsis musices*, a method for thorough-bass (Berlin, 1624)—the third edition (Berlin, 1634) has a different title; (2) *Preceptæ musicæ practicæ figuralis* (1625), also published in a German form as 'Rechter Weg zur Singekunst' (Berlin, 1660); (3) *Quæstiones musicæ practicæ* (Berlin, 1650). [Other works and editions are in the *Quellen-Lexikon*.] A. M.

CRUVELLI, JEANNE SOPHIE CHARLOTTE, whose family name was Crüwell, was born March 12, 1826, at Bielefeld in Westphalia. Her father was fond of music, and played the trombone tolerably. Her mother had a fine contralto voice, and sang with expression. She had a voice of admirable quality, compass, and truth, but did not receive the instruction which should have developed its advantages, and enabled her to avoid those faults and imperfections which are inevitable without it. She made her début at Venice in 1847, and the beauty of her voice ensured her a brilliant success, which was confirmed when she sang in Verdi's 'Attila' at the theatre of Udine on July 24, and in 'I Due Foscari.' Coming now to London, in the height of her fame, she Italianised her name, and became known as Cruvelli, on her appearance in 'Le Nozze di Figaro' (1848), and ever after. The rôle of the Countess was not suited to her fiery style, nor was the comparison between her and Jenny Lind, who played Susanna, to her advantage. After this partial failure, she returned to Italy, and continued to earn success by the mere beauty of her organ, and even by the exaggeration of her dramatic effects. In 1851 she went to Paris, where she had sung in concerts before her first appearance in Italy. She appeared with immense success in 'Ernani' at the Théâtre Italien, for Verdi's music seemed made for her. She sang again in London that year, and was very successful, in spite of many faults. Besides her splendid voice, she had a very fine face and figure, and enormous energy of accent and dramatic force: her performance in 'Fidelio' was especially admirable. In Jan. 1854 she was engaged at the Grand Opéra at Paris, and appeared as Valentine in 'Les Huguenots,' when the enthusiasm of the public knew no bounds. But a violent reaction soon succeeded, and the last opera in which she preserved some of her former popularity was the 'Vêpres Siciliennes' of Verdi. In this work she exercised the greatest control of voice and action; it was her last rôle. In 1856 she retired, and married the Comte Vigier. [Her eldest sister FRIEDERIKE MARIE, born August 29, 1824, appeared in London in 1851, taking her sister's place without great success; she died at Bielefeld, July 26, 1868. Riemann's *Lexikon*.] J. M.

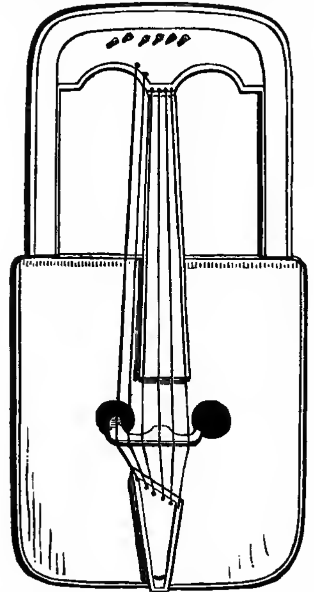
CRWTH (*i.e.* Crooth) or CROWD, as far as we know the oldest stringed instrument played with the bow; probably at home in India, but in its European use apparently limited to England, and especially to Wales. It is first mentioned in some elegiacs, written about 609, by Venantius Fortunatus, Bishop of Poitiers, running thus:

> Romanusque lyra plaudat tibi, Barbarus harpa,
> Graecus achilliaca, *chrotta* Brittanna canat.

[Its oldest form was probably that of the Irish cruit, originally a small harp or lyre, plucked with the fingers (as in the case of the Roman *fidicula*); it was subsequently played with a bow. It is mentioned by an Irish poet who is said to have flourished before the Christian era.—W. H. G. F.] As the 'crwth trithant,' or with three strings, pictures of it are found

CÉSAR ANTONOVICH CUI

in manuscripts of the 11th century. We first hear it mentioned again by the Hon. Daines Barrington, the eminent archæologist, who relates that he knew one John Morgan, born 1711 in the isle of Anglesey, who still played the crwth. Bingley also heard it played at Carnarvon as late as 1801; but it is now entirely out of use. In its later form it was mounted with six strings, four stretched over the finger-board and played with the bow, and two, lying at the side of the finger-board, pinched with the thumb of the left hand. The strings were tuned either as (*a*)—according to Edward Jones, the celebrated Welsh harp-player—



or as (*b*)—according to Bingley (*Musical Biography*, 1814). The sound-holes are perfectly circular, and have a diameter of 1¼ inch. The bridge does not stand straight, but inclines toward the right, and its left foot, which is 2½ inches in length (while the right foot measures only ¾ of an inch), passes through the sound-hole and rests on the back of the instrument, thus acting the part of the sound-post in the violin. The crwth is 22½ inches in length; its width near the tailpiece is 10½ inches, near the top 9 inches; the height of the sides is 2 inches. P. D.

CRYSTAL PALACE SATURDAY CONCERTS. See SYMPHONY CONCERTS.

CSARDAS. See MAGYAR MUSIC.

CUDMORE, RICHARD, was born at Chichester in 1787, and received his first instruction in music from James Forgett, an organist in that city. At a very early age he became a proficient on the violin, being placed under Reinagle in 1797, and at eleven years old was placed under Salomon. In 1799 he led the band at the Chichester Theatre, and was engaged in the orchestra at the Italian Opera, London. He next resided for nine years in Chichester, and then removed to London for the purpose of studying the pianoforte under Woelfl, and became a member of the Philharmonic Society's band. He afterwards settled in Manchester as leader of the Gentlemen's Concerts there. [On one occasion at Liverpool he played a violin concerto, a pianoforte concerto, and a violoncello concerto. *Dict. of Nat. Biog.*] He composed several concertos for the violin and others for the pianoforte, as also an oratorio, 'The Martyr of Antioch' (published), portions of which were performed in Birmingham, Manchester, and Liverpool. Cudmore died at Manchester, Dec. 29, 1840. W. H. H.

CUE, *i.e. queue*, the *tail* of the preceding passage. Where a player or singer is reading from a separate part, and not from the score, some help is advisable to aid him in coming in correctly after the long pauses. A few notes of some other part immediately preceding the entrance of his own are therefore printed small in the stave as a guide; and this is called a cue:—

CUI, CÉSAR ANTONOVICH, born at Vilna, Jan. 18, 1835, was the son of a French officer who, being unable to follow the retreat from Moscow in 1812, remained in Poland, where he subsequently married a Lithuanian lady, and settled as professor of French at the High School of Vilna. In this establishment César Cui received his early education. He showed a precocious talent for music, and was taught the piano at an early age. During his schooldays, he also received some irregular instruction in theory from the celebrated Polish composer Moniuszko. In 1850 Cui entered the School of Military Engineering, St. Petersburg, and, on passing out in 1857, was appointed to a sub-professorship. He was afterwards recognised as an authority on fortification, and lectured on this subject in the Artillery School and the Staff College. Among his pupils he reckons the present Emperor Nicholas II. Cui now holds the rank of Lieut.-General of Engineers, and is also President of the Imperial Russian Musical Society. While working for his examinations, Cui was compelled to lay aside his musical tastes; but when in 1857, being a full-fledged officer, he came in contact with Balakirev, his enthusiasm was at once rekindled. He was greatly attracted by the new and progressive

ideas which the latter discussed with him. Although Cui owes something to Balakirev's guidance and criticism, he must be regarded, on the whole, as a self-taught musician. He married in 1858 Mdlle. Bamberg, a gifted pupil of Dargomijsky, and his first opus number was a Scherzo for piano (4 hands) on her name and his own: B. A. B. E. G. and C. C. His earliest operatic work, 'The Mandarin's Son,' an operetta written for private performance in 1859, is quite in the style of Auber, and shows little individuality. 'The Captive in the Caucasus' (1859), an opera on the subject of Poushkin's romantic poem, is a work of more substance, to which he added a middle act in 1881-82. But Cui's reputation as an operatic composer became more firmly established with his third dramatic work: an opera in three acts, based on a romantic tragedy by Heine, 'William Ratcliff' (St. Petersburg, 1861). 'Angelo,' on a libretto from the play by Victor Hugo, was first performed at St. Petersburg in 1876. This work is usually regarded as the finest fruit of Cui's maturity; but it has never enjoyed anything like popular success. Cui has a natural predilection for French texts, and his opera 'Le Flibustier' (1889) was composed to a French libretto taken from a play by Jean Richepin. It was first performed at the Opéra Comique, Paris, in 1894, and attracted considerable attention at the time; but it has not kept its place either in the French or Russian repertories. 'The Saracen,' an opera in four acts, from an historical novel by the elder Dumas, was first heard in St. Petersburg in 1889 and again in Moscow in 1902. A short opera, or rather a dramatic scene, in one act, to Poushkin's text 'A Feast in Time of Plague,' appeared in 1900; while an eighth dramatic work, from Maupassant's novel 'Mam'zelle Fifi,' has not yet been published or performed.

Since 1864 Cui has been an industrious contributor to many leading Russian papers; while his articles in French and Belgian publications were some of the first to call attention to the remarkable activity of the New Russian school. Most of the leading characteristics of Cui's style are apparent in 'Ratcliff,' and it seems surprising that this opera, with all its poetic charm and pathos, should have been so coldly received by the public and critics in Russia. It is possible that the crude sensationalism of the libretto did not help to commend the opera to a nation whose dramatic traditions are derived from the realistic plays of Gogol and Ostrovsky rather than from the romanticism of Schiller's 'Robbers' and kindred dramas. 'William Ratcliff' tends more to lyrical than to declamatory opera. Cui's melody is refined, and exhales an almost feminine tenderness; but it is not strikingly original. It does not flow in a broad stream of *cantilena*, but takes the form of continuous *arioso*; a method which is often ineffective, because it blurs the clear edges of melody and recitative. In 'Angelo,' which is altogether constructed on broader lines than any other of his operas, Cui shows considerable power of expressive declamation. His harmony is interesting and original, in spite of certain recurrent tricks, such as the excessive use of pedal points, tonic and dominant, and the over-elaboration of the inner parts at the expense of effective melody. Cui is not so great a master of orchestration as some of his compatriots; nor is he in his element when dealing with massive choral effects. He is a miniature painter who works most effectively on a small scale. In solo, and above all in love-duets, we find him at his best. His lyrical vein is more tender than virile, consequently his heroines are more life-like than his heroes. Mary in 'Ratcliff,' Thisbe and Catharine in 'Angelo,' are sympathetic and convincing creations. After 'Angelo,' Cui's work takes a new tendency: that exclusive preoccupation with small forms and polished technique which is best exemplified in such exquisite trifles as his little suites and pieces for pianoforte.

Summing up Cui's position as a composer, it appears in some respects paradoxical. Although he was the first disciple of Balakirev, and one of the chief upholders of the National School, the Russian element is exceedingly attenuated in his own music. His natural gift is vocal rather than symphonic, if we may judge from the preponderance of vocal works in the list of his compositions. 'He needs a text to bring out his power of delicate psychological analysis.' But, while drawn to opera and song, Cui reflects most frequently the influence of such instrumental composers as Chopin, Liszt, and Schumann, none of whom are suitable models for the formation of a broad and effective opera style. Again, Cui's music has passion, grace, a delicate and refined lyricism, but not that note of tragic intensity which the subjects of his operas seem to demand. When dealing with such ultra-romantic libretti as those of 'William Ratcliff' and 'Angelo' he gives the impression of a Herrick posing as a John Webster. As a critic, Cui unites an elegant literary style to a keen satirical wit. He did good service in the cause of music at a time when Russia stood in need of enlightenment, and was almost entirely given up to idolatry of all things Italian; but, as regards Russian music, his views cannot be accepted as comprehensive.

The following is a list of Cui's compositions:—

A. Songs and Vocal Music

Songs:—Op. 3 (3), op. 5 (6), op. 7 (6), op. 9 (6), op. 10 (6), op. 11 (6), op. 13 (6), op. 15 (13 vignettes musicales).
Six Songs, op. 16; Bolero, op. 17.
Seven Songs and Duets, op. 19.
Six Melodies to French words (1885), op. 23.
Six Songs, op. 27; Seven Songs, op. 32.
Seven Songs to words by Poushkin and Lermontov (1886), op. 33.
'Ave Maria,' for one or two female voices and chorus, op. 34.
Three German Lieder, op. 37.
Les Deux Ménétriers, op. 42.
Twenty Poems by Jean Richepin (1890), op. 44.
Four Sonnets by Miçziewicz (Polish words), op. 48.
Seven Songs, op. 49; Five Songs, op. 54; Eight Songs, op. 55.

Twenty-five Songs to words by Poushkin (1899), op. 57.
Twenty-one Songs to words by Nekrassov (1902), op. 62.

B. Choral Works

Two Choruses for mixed voices, with orchestral accompaniment, op. 4 (Prize of the Imp. Russ. Mus. Society, 1860).
Mystic Chorus for female voices *a cappella* (1885), op. 28.
Five Choruses to words by K. R., op. 46.
Seven Choruses (*a cappella*), op. 28; Five Choruses, op. 46; Six Choruses, op. 53.
Two Choruses for male voices, op. 58.
Seven Vocal Quartets or Choruses (1902), op. 59.
Les Oiseaux d'Argenteau, for children's voices.

C. For Orchestra

1st Scherzo (1857), op. 1.
2nd Scherzo (1857), op. 2.
Tarantella (1859), op. 12.
Marche Solonnelle (1881), op. 18.
'Suite Miniature,' No. 1, op. 20 (from the Sixth Suite for PF., op. 20).
Suite No. 2 (1887), op. 38.
Suite No. 3, 'À Argenteau' (1887), op. 40.
Suite No. 4, 'In modo populari,' op. 43.

D. For Strings

String quartet in C minor, op. 45.
'Petite Suite' for violin, op. 14.
Twelve miniatures for violin, op. 20.
Two ditto (with orchestra), op. 24.
'Suite Concertante' for violin and orchestra (1883), op. 25.
Seven miniatures for violin (arranged from op. 39 for PF.)
'Kaleidoscope,' twenty-four pieces for violin, op. 50.
Six Bagatelles for violin, op. 51.
Five little duets for flute and violin, op. 56.
Two pieces for violoncello and orchestra, op. 36.
Tarantella for violin.

E. For PF.

Three pieces, op. 8 (1877)
Twelve miniatures, op. 20.
Suite (dedicated to Liszt), op. 21.
Four pieces, op. 22.
Valse-Caprice, op. 26.
Two 'Bluettes,' op. 29.
Two Polonaises, op. 30.
Three Valses, op. 31.
Three Impromptus, op. 35.
Six miniatures, op. 39.
Nine pieces (à Argenteau), op. 40 (1887).
The Valse-movemente, op. 41.
Five pieces, op. 52.
Four pieces, op. 60.
Theme and Variations, op. 61.
Six numbers of The Paraphrases (see Borodin).

Operatic Works

1. 'The Captive in the Caucasus.' 2. 'The Mandarin's Son.' 3. 'William Ratcliff.' 4. 'Angelo.' 5. 'Le Flibustier.' 6. 'The Saracen.' 7. 'A Feast in Time of Plague.' 8. 'Mam'zelle Fifi.'
R. N.

CULLEN, John. A London music publisher, who flourished from about 1705 to 1710, or a few years later. On the death of Henry Playford, he appears to have succeeded to the business and stock, possibly at the latter's shop (or at that of John Carr), for Cullen's address is 'At the Buck without Temple Barr,' or 'At the Buck between the two Temple Gates.' On Keller's *Thorough Bass*, 1707, which he published, he advertises many of the Playford publications. His own include an edition of Simpson's *Compendium of Practical Music*, 1706; the opera of 'Camilla' (*circa* 1706); Daniel Purcell's 'Six Sonatas,' and other works. F. K.

CUMBERLANDS, Royal Society of. This is an ancient society of change-ringers long established in London, and originally called the Society of London Scholars. But in the early part of the 18th century some members of the society rang the bells of Shoreditch Church in honour of the public entrance into London of the Duke of Cumberland, and to commemorate this event a medal was presented to the society bearing a likeness of the Royal Duke. It was on receipt of this that its members changed the name of their society to that of 'Cumberland Youths' or 'Royal Cumberlands.' C. A. W. T.

CUMMINGS, William Hayman, native of Sidbury, Devon, born August 22, 1831, placed at an early age in the choir of St. Paul's Cathedral, and afterwards in that of the Temple Church. He sang as an alto in the London performance of 'Elijah' in 1847. On leaving the Temple choir he was appointed in 1847 organist of Waltham Abbey, where he was the first to adapt Mendelssohn's theme from a secular cantata to 'Hark the herald angels sing.' After a time he was admitted as tenor singer in the Temple, Westminster Abbey, and the Chapels Royal, appointments which he subsequently resigned, when his success as a leading concert tenor was assured. His first important oratorio engagement was as a substitute for Sims Reeves, under G. W. Martin in 'Judas Maccabæus.' At the Birmingham Festival of 1864 he sang the tenor part in Sullivan's 'Kenilworth,' instead of Mario, for whom it was written. He sang in the United States in 1871 and subsequently. He was for years identified with the important tenor parts in Bach's Passion, and other works, where an accomplished musician is as necessary as a good singer. He was a professor of singing at the Royal Academy of Music from 1879 to 1896, and still belongs to the committee of management. In 1882 he was appointed chorus-master of the Sacred Harmonic Society, and subsequently conductor. He was precentor of St. Anne's, Soho, in 1886-88, and in 1896 was elected to succeed Barnby as Principal of the Guildhall School of Music. He was chiefly instrumental in founding the Purcell Society, and edited many volumes of its publications. He wrote a life of that master in the *Great Musicians* series. In addition to all his other avocations, he has filled important official posts in connection with the Philharmonic Society, the Musical Association, and the Incorporated Society of Musicians; and has devoted much time to the affairs of the Royal Society of Musicians. In 1900 he received the degree of Mus.D. from Dublin University. He is the possessor of a splendid musical library. His compositions include several prize glees, a Morning Service, an Anthem, various songs, and a Cantata, 'The Fairy Ring'; he has also written a biographical dictionary and a Primer of the Rudiments of Music (Novello). M.

CURIONI, a seconda donna, engaged at the King's Theatre about 1754. Among other parts, she sang that of Plistene, a male character in the 'Ipermestra' of Hasse and Lampugnani. She was, perhaps, the mother of Alberico Curioni, a distinguished tenor, born about 1790. After singing at the San Carlo at Naples, and other theatres, he went to Barcelona, and had great success. Benelli, catering for the London Opera, found him there and engaged him for the season of 1821 at £600. He had a very sweet and pleasing voice, was a very agreeable, if not yet a great, singer, and was one of the handsomest men that ever appeared on the Italian

stage. As time went on, his talent developed and he improved in dramatic force and value. His expression and taste were pure, and he sang with much intelligence. In 1821 he made his first appearance in London as Tito with Camporese. He then seemed the best tenor that had belonged to the theatre for some time, but he hardly gave the full promise of his future excellence. Curioni was re-engaged in 1822, at an increased salary, and appeared in 'Otello' with renewed éclat; and again in 'La Clemenza di Tito,' in 'La Donna del Lago,' and 'Ricciardo e Zoraide,' in 1823. In 1824 and 1825 he was again engaged. In the latter year he appeared as Orosmane in 'Pietro l' Eremita,' and in 'Otello,' 'Così fan tutte,' and 'Il Crociato.' In the latter opera he reappeared in 1826, as also in 'Medea,' where he was very effective in the part of Giasone. His portrait was drawn by Hayter in this character, and there is a good lithograph of it. He was re-engaged in 1827, at the increased salary of £1450, and played a principal part in Pacini's 'Schiava in Bagdad.' In 1828 he was again at the King's Theatre, where he was heard by Lord Mount-Edgcumbe in 1834, singing with undiminished powers. He was an honorary member of the Royal Academy of Music. J. M.

CURIOSO INDISCRETO, IL. An opera of Anfossi's, produced at Milan in 1778; of little interest for the present day, except for the fact that Mozart added three songs to it on the occasion of its performance at Vienna in 1783. Two of these, 'Vorrei spiegarvi' and 'Nò, nò, nò' (bravura), were for Madame Lange; the third, 'Per pietà non ricercate,' was for Adamberger, but owing to a trick of Salieri's was not sung (Köchel, 418, 419, 420).

CURSCHMANN, KARL FRIEDRICH, born at Berlin, June 21, 1804. As a child he showed considerable talent for music, and had a beautiful soprano voice, but having been intended for the law it was not till 1824 that he decided to adopt music as a profession. He studied for four years under Spohr and Hauptmann at Cassel, and in 1824 settled in Berlin, making occasional concert tours in Germany, France, and Italy. He died in the prime of life August 24, 1841, at Langfuhr near Danzig. Curschmann's fame rests on his 'Lieder.' He was the favourite song-writer before Schubert's songs were known, and when Schumann had scarcely attempted vocal composition. His songs are full of real melody, and if they do not possess the intensity of expression which characterises the creations of Schubert, Schumann, and Brahms, they are far superior to the shallow productions which deluged Germany at that and a later period. The fact that many of them are still sung speaks much for their inherent merit. Curschmann's collected 'Lieder' (2 vols., Berlin, 1871) comprise eighty-three solos, and nine songs in two and three parts. A few of them have Italian words. Among his other works may be mentioned a one-act opera, 'Abdul und Erinnieh,' written and performed at Cassel in 1828, and some church music now forgotten. In England he is best known by his song 'In every opening flower' and his trios 'Ti prego' and 'Addio,' the former a general favourite with amateurs. A. M.

CURTAL or CURTAIL, an obsolete wood-wind instrument, having a reed and being of the bassoon type. It was played as a bass to the hautboy.

It is mentioned by Grassineau (1740), and in a verse written in a volume of manuscript music in the handwriting of Dr. Robert Creyghton (*Taphouse Collection*).

I hear a Thunder rolling here beneath,
Where Curtals and Bassoons their murmurs breathe,
And Sackbuts their unfolded tubes of brass
Unsheathing, push and draw their counter Base;
While Clarions, Hautboys, and Chirrimas[1] mix
Here 7 with 5; there 4 and 2 with 6.
Loud Violin abruptly checks its bow
To listen to the Harmony below. R. C.

A curtal is mentioned in an inventory of musical instruments which belonged to Sir Thomas Kytson of Hengrove Hall, Suffolk, at the end of Elizabeth's reign. F. K.

CURWEN, JOHN, the founder of the 'Tonic Sol-Fa' method of teaching singing, was born Nov. 14, 1816, at Heckmondwike, Yorkshire. For an account of the main work of his life, see TONIC SOL-FA and TONIC SOL-FA COLLEGE. He came from an old Cumberland family, and was educated (at Wymondley College, and University College, London) for the profession of his father, a Nonconformist minister. [In 1838 he was appointed assistant minister at Basingstoke, and held similar appointments elsewhere until 1864.] It was at a conference of Sunday-school teachers held in Hull in 1841 that he was commissioned to make inquiry as to the best and simplest way of teaching to sing by note, and this led to the practical adoption of Miss Glover's system; the investigations thus begun led him to make the spreading of music among the people the great object of his life. In 1843 his *Grammar of Vocal Music* appeared. In 1853 he founded the 'Tonic Sol-fa Association,' and in 1879 the 'Tonic Sol-fa College' was opened; [it had been incorporated in 1875; and owed its origin in great part to the opposition of the Education Department, and the appointment of John Hullah (an acknowledged enemy of the Sol-Fa movement) as inspector of music in training colleges]. In 1864 he gave up ministerial work, and devoted his whole time 'to the direction of the large organisation' which had grown up under his care. He died at Manchester, May 26, 1880. A biography published in 1882 by his son JOHN SPENCER CURWEN (born Sept. 30, 1847, Principal of the Tonic Sol-fa College), under the title of *Memorials of John Curwen*, gives a picture of a very full and useful life, as well as of a signally fine character.

[1] 'Chirrimia' or Chirima (from the Spanish) is a kind of oboe.

The following is a list of Mr. Curwen's educational works, omitting the large number of smaller instruction-books, etc., prepared for the use of classes of different kinds :—

The Standard Course of Lessons and Exercises on the Tonic Sol-fa Method. [First edition, 1861; issued in a new form, 1872, as the *New Standard Course*, the most complete class book of the method for general use, includes Harmony, Musical Form, Composition, etc.]
How to observe Harmony. First edition 1861; reissued in a new form 1872.
Musical Statics: an attempt to show the bearing of the recent discoveries in Acoustics on Chords, Discords, Transitions, Modulations, and Tuning, as used by modern musicians, 1874.
The Teacher's Manual of the Art of Teaching in General, and especially as applied to Music, 1875. A book designed for the teaching of teachers, which superseded an earlier book of a similar character—*Singing for Schools and Congregations*, 1843.
A Tonic Sol-fa Primer (No. 18 of the series of Primers edited by Dr. Stainer, and published by Messrs. Novello). Written 'to explain the T.S.F. notation and method of teaching to those already familiar with the established mode of writing music by means of the Staff.'
Musical Theory, 1879. Curwen's latest work.
Tonic Sol-fa Reporter. Published monthly (1d.). Begun 1851; successfully carried on until 1889, when it became *The Musical Herald*, a monthly journal with a large circulation.
Various Hymn and Tune Books, Collections of Part Music, School Songs, etc., including 'Modern Part Songs' in 96 numbers.

Mr. Curwen also edited in Sol-fa a large number of classical works (oratorios and other compositions by Handel, Haydn, Mozart, Rossini, etc.), and works by later composers (Macfarren, Mendelssohn, and others). R. B. L.

CURZON, EMMANUEL HENRI PARENT DE, French writer on music, was born at Havre, July 6, 1861; has the degree of 'Dr. ès lettres,' and is archiviste of the Archives Nationales in Paris. Since 1889 he has been musical critic to the *Gazette de France*, and writes very frequently for the *Guide Musical*, the *Vie Théâtrale*, etc. Among his various works of musical history and criticism may be mentioned: translations of Mozart's letters (1888), followed by *Nouvelles lettres des dernières années de la vie de Mozart*, 1898; of Robert Schumann's writings on music (1894, 1898); and of Hoffmann's *Fantasiestücke in Callot's Manier* (1891). An essay on the 'Sigurd' legend in the Edda, àpropos of Reyer's opera, was published in 1890; and some interesting *Croquis d'Artistes*, biographical sketches of contemporary singers, in 1898. G. F.

CUSANINO. See CARESTINI.

CUSHION DANCE. An old English action dance, also bearing the title 'Joan Sanderson.' The dance was common among all classes in the 16th and 17th centuries, even at Court. At the present day a survival of it exists among children in the game of 'The Shy Widow.' The cushion dance is alluded to in many 17th century books; a very full reference to these, and complete description of the dance, are given in Wm. Chappell's 'Popular Music of the Olden Time.'

Briefly, the dance or game is performed thus: A single person, male or female, dances about the room with a cushion, which, after some dialogue, is laid before a favoured one of the opposite sex, who, kneeling on it, kisses the one who has so placed it. The one who has knelt and kissed now takes up the cushion and continues the dance in the same manner. The dialogue begins :—

'This dance it will no further go.'
'I pray you, good sir, why say you so?'
'Because Joan [or John] Sanderson will not come to, etc.'

In Wilson's *Companion to the Ball Room*, *circa* 1818, the dance is mentioned as being then danced; but the author, a fashionable dancing-master, makes an indignant protest against it. The original air and quaint directions are to be found in Playford's *Dancing Master* (1686, and later editions). The title and melody are as follows :—

JOAN SANDERSON, OR THE CUSHION DANCE: AN OLD ROUND DANCE

F. K.

CUSINS, SIR WILLIAM GEORGE, was born in London, Oct. 14, 1833, and in his tenth year entered the Chapel Royal. In 1844 he entered the Brussels Conservatoire under Fétis for the study of the piano, violin, and harmony. In 1847 he gained the King's Scholarship at the R.A.M. of London, where his Professors were Potter, Sterndale Bennett, Lucas, and Sainton. In 1849 his scholarship was prolonged for two years, and he made his first appearance in public as a piano player in Mendelssohn's D minor Concerto, and as composer with a MS. overture. In the same year he was appointed organist to the Queen's Private Chapel, and entered the orchestras of the Royal Italian Opera and of the principal concerts of London, in which he played the violin for about five years. In 1851 he was appointed Assistant Professor at the R.A.M. and afterwards Professor. From 1867 to 1883 he was conductor of the Philharmonic Society, *vice* Sir W. Sterndale Bennett resigned. [In 1867 he conducted Bennett's 'Woman of Samaria' at the Birmingham Festival.] In 1870 he was appointed Master of the Music to the Queen; in 1875 succeeded Bennett as examining Professor at Queen's College; and in 1876 became joint examiner, with Hullah and Otto Goldschmidt, of scholarships for the National Training School of Music. Besides holding these posts Cusins came often before the public as a player and concert-giver, having amongst other places performed at the Gewandhaus, Leipzig, and at Berlin, as well as the Philharmonic and Crystal Palace. [In 1885 he became a professor in the Guildhall School of Music, and conductor of the London Select Choir. He received the honour of knighthood, August 5, 1892, and the cross of Isabella the Catholic in 1893. He died of

influenza at Remonchamps, in the Ardennes, August 31, 1893, and was buried at Kensal Green Cemetery. *Brit. Mus. Biog.*] His works, if not numerous, are all on an important scale: —'Royal Wedding Serenata' (1863); 'Gideon,' an oratorio (Gloucester, 1871); two Concert overtures, 'Les Travailleurs de la Mer' (1869), 'Love's Labour's Lost' (1875); Piano Concerto in A minor; besides marches, songs, etc.

CUTELL, RICHARD, an English musician of the 15th century, was the author of a treatise on counterpoint, a fragment of which is preserved among the manuscripts in the Bodleian Library, Oxford. W. H. H.

CUTLER, WILLIAM HENRY, Mus.Bac., was born in London in 1792. Having manifested a precocious musical ability, he was instructed in pianoforte-playing by Little and Griffin, and in singing by Dr. Arnold. [He made his début as a pianist in 1800. *Brit. Mus. Biog.*] In 1803 he became a chorister of St. Paul's Cathedral, on quitting which he studied under William Russell, Mus.Bac. In 1812 he took the degree of Bachelor of Music at Oxford, his exercise for which (an anthem for voices and orchestra) he afterwards published. In 1818 he was appointed organist of St. Helen's, Bishopsgate, and about the same time opened an academy for teaching music on Logier's system, which he gave up after about three years' trial. In 1821 he appeared as a singer at the oratorios at Drury Lane Theatre, but failed from nervousness. In 1823 he resigned the organistship of St. Helen's for that of Quebec Chapel, Portman Square. Cutler's compositions comprise a service, anthems, songs, and numerous pianoforte pieces. He is last heard of as giving a grand concert at the Opera House on July 5, 1824. The date of his death is uncertain. W. H. H.

CUZZONI, FRANCESCA, born at Parma,[1] or Modena,[2] about 1700,[3] received her first instruction from Lanzi, a noted master, and became one of the most famous singers of the 18th century. She made her début at Venice with Faustina, 1719, in M. A. Gasparini's 'Lamano,' being described as 'Virtuosa di Camera' of the Grand Duchess of Tuscany; and she appeared again with Faustina and Bernacchi in the 'Pentimento Generoso,' in the same year and at the same place. After singing on most of the principal stages of Italy she came to England. On her first arrival here she married Sandoni, a harpsichord-master and composer of some eminence.[1] Her first appearance in London was on Jan. 12, 1722, as Teofane in Handel's 'Otho.' Her singing of her first air, a slow one, 'Falsa immagine,' fixed her reputation. A story is told about this song which illustrates her character as well as that of Handel. At rehearsal she took a dislike to the air, and refused to sing it; whereupon Handel seized her by the waist, and swore he would throw her out of the window if she persisted.

[1] Burney. [2] Hawkins. [3] Fétis.

She gave way, and in that very song achieved one of her greatest triumphs. Success followed her in 'Coriolano,' in 'Flavio,' and in 'Farnace'; and she became a popular favourite.

In the following year she sang in 'Vespasiano' and 'Giulio Cesare.' Meanwhile Cuzzoni's popularity had diminished that of Durastanti, who left England, and had eclipsed that of poor Anastasia Robinson, who soon after retired. Cuzzoni continued her triumphal career in 'Calfurnia,' 'Tamerlane,' and 'Artaserse'; and in 'Rodelinda' (1725) she created one of her most successful parts, gaining great reputation by her tender singing of the song 'Ho perduto il caro sposo.' Fresh applause met her in 'Dario,' 'Elpidia,' 'Elisa,' 'Scipio,' and finally in 'Alessandro' (Handel), when she first encountered, on the English stage, the redoubtable Faustina. In this opera her style and that of her rival were skilfully contrasted by the composer; but the contest was the first of a series which did the Italian Opera much harm.

In 1727 she created a great effect in the song 'Sen vola' ('Admeto'), which displayed her warbling style; and an enthusiast in the gallery was so far carried away by the charm that he exclaimed, 'D— her! she has a nest of nightingales in her belly!' Her next part was in 'Astyanax.' The violence of party feeling had now become so great that, when the admirers of Cuzzoni applauded, those of Faustina hissed; and *vice versâ*. This culminated during the performance of 'Astyanax,' when shrill and discordant noises were added to the uproar, in spite of the presence of the Princess Caroline. Lady Pembroke headed the Cuzzonists, and was lampooned in the following epigram[4]

UPON LADY PEMBROKE'S PROMOTING THE CAT-CALLS OF FAUSTINA.

Old poets sing that beasts did dance
Whenever Orpheus play'd,
So to Faustina's charming voice
Wise Pembroke's asses bray'd.

Cuzzoni's chief supporters, among the men, are commemorated in the following[4]

EPIGRAM ON THE MIRACLES WROUGHT BY CUZZONI.

Boast not how Orpheus charm'd the rocks,
And set a-dancing stones and stocks,
And tygers rage appeas'd;
All this Cuzzoni has surpass'd,
Sir Wilfred[5] seems to have a taste,
And Smith[6] and Gage[7] are pleas'd.

In 1728 Cuzzoni appeared in 'Siroe' and 'Tolomeo' with unabated success, in spite of the 'Beggar's Opera' and all these heart-burnings. At the close of the season, however,[8] the directors, troubled by the endless disputes of the rivals, decided to offer Faustina one guinea a year more than the salary of Cuzzoni. The latter had been persuaded to take a solemn oath that she would not accept less than her enemy, and so found herself unengaged. About this time[9]

[4] Harl. MSS. 7316, pp. 394, 319. [5] Sir W. Lawson.
[6] Simon Smith, Esq. [7] Sir William Gage.
[8] Hawkins. [9] Fétis.

she yielded to the invitation of Count Kinsky, and went to Vienna. She sang at court with great éclat; but her arrogant demands prevented her from getting an engagement at the theatre.

At Venice she next sang at one theatre, while Faustina performed at another. In London again, a few years later (1734), she appeared in Porpora's 'Ariadne'; and, with Farinelli, Senesino, and Montagnana, in 'Artaserse' as Mandane, and also in other operas.

Hawkins says that she returned again in 1748, and sang in 'Mitridate'; but this is not recorded by Burney, who puts her third visit in 1750, when she had a benefit concert (May 18). She was now old, poor, and almost voiceless. The concert was a failure, and she disappeared again. She then passed some time in Holland, where she soon fell into debt, and was thrown into prison. Gradually she paid her debts by occasional performances given by the permission of the governor of the prison, and returned to Bologna, where she was obliged to support herself by making buttons. She died there in extreme poverty and squalor in 1770.[1]

It was difficult to decide whether she excelled more in slow or in rapid airs. A 'native warble' enabled her to execute divisions with such facility as to conceal their difficulty. So grateful and touching was her natural tone that she rendered pathetic whatever she sang, when she had the opportunity to unfold the whole volume of her voice. Her power of conducting, sustaining, increasing, and diminishing her notes by minute degrees acquired for her, among professors, the credit of being a complete mistress of her art. Her shake was perfect: she had a creative fancy, and a command of *tempo rubato*. Her high notes were unrivalled in clearness and sweetness, and her intonation was so absolutely true that she seemed incapable of singing out of tune.[2] She had a compass of two octaves, c' to c'''. Her style was unaffected, simple, and sympathetic. As an actress she was cold, dressed badly, and her figure was short and ungraceful. Yet the fine ladies imitated the costume (brown silk, embroidered with silver) which she wore in 'Rodelinda,' and it became the rage! She was silly, fantastical, capricious, ungrateful, and extravagant: with all her charms she had many faults, by which she herself was the greatest sufferer, as is usual.

Her face was 'doughy and cross, but her complexion fine.'[3] There are no good portraits of her; but she figures in several of the caricatures of the time, and notably in Hogarth's *Masquerades and Operas*, where she is the singer to whom the Earl of Peterborough is presenting £1000. Her portrait in Hawkins's *History* is taken from a print by Vander Gucht after Seeman. J. M.

CYCLE OF SONGS, CYCLUS. See LIEDERKREIS.

[1] Fétis. [2] Mancini, *Pensieri*, 1774. [3] Walpole.

CYMBALS (Ital. *Piatti* or *Cinelli*, Germ. *Becken*) are two thin round metal plates, with a leather strap through the centre of each, by which the performer holds one in each hand. The metal is an alloy of 80 parts of copper to 20 of tin. To produce a good tone they should not be struck so as to coincide together, but should rather be rubbed against each other in a single sliding motion (French *froisser*). From motives of economy, the part for the cymbals is often played by the bass-drummer; one cymbal is then tied to the drum, and the other held in his left hand, while his right hand uses the drum-stick. [It may be pointed out that this expedient diminishes the tone and effect of the cymbals. In scores in which the parts for the cymbals and bass-drums are written on one line, the words 'senza piatti' indicate that the bass-drum plays alone in the passage so headed. The peculiar effect to be obtained by striking a cymbal with a drumstick does not seem to have been used at all prominently by any composer before Wagner, who uses it in single notes, and introduces a roll for 'Becken (mit Paukenschlägeln)' in the second act of 'Die Walküre,' at the point where Wotan utters his mysterious blessing of Alberich, in the words 'So nimm meinen Segen, Niblungen Sohn!'] V. DE P.

CZAAR UND ZIMMERMANN. Opera in three acts, by Lortzing; produced in Leipzig, Dec. 22, 1837, and at the Gaiety Theatre, London, translated, as 'Peter the Shipwright,' April 15, 1871. Among other operatic versions of the story of Peter the Great, may be mentioned Donizetti's 'Borgomastro di Saardam' (Naples, 1827), 'Peter the Great,' by T. S. Cooke (London, 1829), and L. A. Jullien's 'Pietro il Grande' (Covent Garden, August 17, 1852).

CZAKAN, or STOCKFLÖTE, a Bohemian or Transylvanian instrument of the flageolet family, usually standing in the key of A, though made to other pitches. It is said to have been lost for many years after its original invention, and to have been rediscovered in a Transylvanian monastery in 1825. However this may be, it rose to great popularity at Vienna about 1830, and received many additions and improvements. It consisted of a large flageolet mouthpiece, with a long slender body, bored with an inverted conical tube like that of the old flute, at right angles to the mouthpiece. It thus resembled an ordinary handled walking-stick, and indeed was commonly put to that use. It had the octave scale of the old concert flute, with fingering intermediate between that and the oboe. There was also a small vent-hole for the thumb at the back, as in the flageolet. It possessed about two octaves compass, starting from *b* of the flute. There exists a *Method* for this almost forgotten instrument by Krämer dated 1830. Its music appears to have been written in the key of C. W. H. S.

CZERNOHORSKY, BOHUSLAV, born about

1690 at Niemburg in Bohemia, deserves mention as having taught Gluck and Tartini. He was a monk of the Minorite order, and was for a time Regens Chori at the Santo in Padua, and about 1715 organist in the convent church at Assisi, where Tartini was his pupil. About 1735 he was director of the music at St. Jacob's Church in Prague, where Gluck learnt from him. He was an excellent composer, but very few of his works are extant, the chief part of them having been destroyed by a fire in his convent. A few of his works are in the church archives at Prague and in private hands. He died in 1740 while on his way to Italy. A biographical notice by Laurencin was published in the *Neue Zeitschrift für Musik*, 60, No. 13 (Riemann's *Lexikon*, etc.). M.

CZERNY, Karl, excellent pianoforte teacher and prolific composer, born at Vienna, Feb. 20, 1791. His father, a cultivated musician, taught him the pianoforte when quite a child, and at the age of ten he could play by heart the principal compositions of all the best masters. He gained much from his intercourse with Wenzel Krumpholz the violinist, a great friend of his parents, and a passionate admirer of Beethoven. Having inspired him with his own sentiments, Krumpholz took his small friend to see Beethoven, who heard him play and at once offered to teach him. From 1800 to 1803 Czerny made rapid progress, and devoted himself especially to the study of the works of his master, whose friendship for him became quite paternal. Czerny also profited much by his acquaintance with Prince Lichnowsky, Beethoven's patron; with Hummel, whose playing opened a new world to him; and with Clementi, whose method of teaching he studied. He was soon besieged by pupils, to whom he communicated the instruction he himself eagerly imbibed. In the meantime he studied composition with equal ardour. Czerny was always reluctant to perform in public, and early in life resolved never to appear again, at the same time withdrawing entirely from society. In 1804 he made preparations for a professional tour, for which Beethoven wrote him a flattering testimonial, but the troubled state of the continent obliged him to give up the idea. Three times only did he allow himself to travel for pleasure, to Leipzig in 1836, to Paris and London in April 1837, and to Lombardy in 1846. He took no pupils but those who showed special talent; the rest of his time he devoted to self-culture, and to composition and the arrangement of classical works. His first published work, '20 Variations concertantes' for pianoforte and violin on a theme by Krumpholz, appeared in 1805. It was not till after his acquaintance with the publishers Cappi and Diabelli that his second work, a 'Rondo Brillante' for four hands, followed (1818). From that time he had difficulty in keeping pace with the demands of the publishers, and was often compelled to write at night after giving ten or twelve lessons in the day. From 1816 to 1823 Czerny had musical performances by his best pupils at his parents' house every Sunday. At these entertainments Beethoven was often present, and was so charmed with the peaceful family life he witnessed, as to propose living there entirely; the project, however, fell through owing to the illness of the parents. One of Czerny's most brilliant pupils was Ninette von Belleville, then eight years old, who in 1816 lived in the house, and afterwards spread the fame of her master through the many countries in which she performed. She married Oury the violinist, and settled in London. [See Oury.] She was followed by Franz Liszt, then ten years old, whose father placed him in Czerny's hands. The boy's extraordinary talent astonished his master, who says of him in his autobiography 'it was evident at once that Nature had intended him for a pianist.' Theodor Döhler and a host of other distinguished pupils belong to a later period. About 1850 Czerny's strength visibly declined; his health gave way under his never-ceasing activity, and he was compelled to lay aside his indefatigable pen. His active life closed on July 15, 1857, shortly after he had, with the help of his friend Dr. Leopold von Sonnleithner, disposed of his considerable fortune in a princely manner. Czerny was never married, and had neither brothers, sisters, nor other near relations. He was modest and simple in his manner of life, courteous and friendly in his behaviour, just and kindly in his judgment on matters of art, and helpful to all young artists who came in his way. His disposition was so gentle that he shrank from a harsh or coarse word even spoken in jest, which was partly the cause of his living so much in retirement. His industry was truly astounding. Besides his numerous printed works, which embrace compositions of every species for pianoforte, he left an enormous mass of MS., now in the archives of the Gesellschaft der Musikfreunde at Vienna. These compositions comprise 24 masses, 4 requiems, 300 graduales and offertoires, symphonies, overtures, concertos, string-trios and quartets, choruses, songs for one or more voices, and even pieces for the stage. His book *Umriss der ganzen Musikgeschichte* was published (1851) by Schott of Mayence, and in Italian by Ricordi of Milan. His arrangements of operas, oratorios, symphonies, and overtures for two and four hands, and for eight hands on two pianofortes, are innumerable. As a special commission he arranged the overtures to 'Semiramide' and 'Guillaume Tell' for eight pianofortes, four hands each. An arrangement for pianoforte of Beethoven's 'Leonora,' which he made in 1805, was of great service in training Czerny for this kind of work. He says in his Autobiography, 'It is to Beethoven's remarks on this work that I owe the facility in

arranging which has been so useful to me in later life.' His printed compositions amount to nearly 1000, of which many consist of 50 numbers or even more. A catalogue containing opp. 1-798, with the arrangements and the MS. works, is given in his *School of Practical Composition* (op. 600, 3 vols. Cocks & Co.). Czerny's pianoforte compositions may be divided into three classes, scholastic, solid, and brilliant. The best of all, especially if we include the earlier works, are undoubtedly the scholastic, opp. 299, 300, 335, 355, 399, 400, and 500, published under the title *Complete Theoretical and Practical Pianoforte School* (3 vols. Cocks). However worthy of admiration Czerny's industry may be, there is no doubt that he weakened his creative powers by over-production, and the effect has been that the host of lesser works have involved the really good ones in undeserved forgetfulness. C. F. P.

CZERWENKA, JOSEPH, born at Benadek in Bohemia, 1759, died at Vienna, 1835, one of the finest oboists of his time. In 1789 entered the private band of Count Schafgotsche at Johannisberg in Silesia. In the following year played in Prince Esterhazy's band, under Haydn, where his uncle played the bassoon. In 1794 he settled in Vienna as solo oboist in the Imperial band, and the Court Theatre, and professor at the Conservatorium. He retired in 1820. M. C. C.

CZIBULKA, ALPHONS, born May 14, 1842, at Szepes-Várallya, in Hungary, died Oct. 27, 1894, in Vienna, where he held an important post as military bandmaster, was a prolific composer of dance-music, and his compositions include six operettas. (Riemann's *Lexikon.*)

D

D. The second note of the natural scale. In solfaing it is called Re. The scale of D major contains F♯ and C♯, and its relative minor is B; that of D minor contains B♭, and its relative major is F. A D clef is in existence. See CLEF.

Among the most important compositions in D major are the Missa Solennis and Second Symphony of Beethoven; Mozart's Parisian Symphony; Brahms's Second Symphony. In D minor there are the Choral Symphony, Schumann's No. 4, Pianoforte Concertos by Mendelssohn and Brahms, etc.

DA CAPO, or D.C.—'from the beginning'—is placed at the end of the second part of an air, or chorus ('O the pleasure'), or scherzo and trio, or other movement in two portions, to show that the first portion is to be played over again as a conclusion. The direction is often Dal Segno—'from the sign'—the sign being a 𝄋 at or near the beginning of the first portion. In scherzos and minuets, with trios, the direction at the end of the trio is usually 'Scherzo, or Minuetto, D.C. senza repetizione.' Among the earliest instances of its use are those in Cavalli's opera of 'Giasone' (1655), and in Tenaglia's opera of 'Clearco' (1661).

DACHSTEIN, WOLFGANG, Roman Catholic priest at Strasburg [where he was organist at the Minster about 1520], adopted the Reformed principles in 1524, married, and became vicar and organist of St. Thomas's Church there. [He died in 1561.] He is known chiefly as a composer of chorales, especially 'An Wasserflüssen Babylon.' M. C. C.

DACTYL, a metrical 'foot' (—◡◡), exactly expressed by the original word δάκτυλος, a finger—one long joint and two short ones. A fine example of dactyls in instrumental music is in the slow movement of Beethoven's Seventh Symphony, alternately with spondees, or alone:—

DAL SEGNO—'from the sign'—a direction used instead of DA CAPO (which see) when the repetition is not from the beginning, but from some point indicated by the sign, for which some form of the capital S, such as 𝄋, is generally used.

DALAYRAC, NICOLAS, a celebrated French composer, was born at Muret (Languedoc), June 13, 1753. His father occupied a high civil appointment in his province, and in spite of his son's early passion for music destined him for the bar. His studies of the violin were put a stop to, and it is said that the young enthusiast, in order to play without interruption, used every night to ascend the roof of the house. This, however, interfered with the nocturnal exercises of a neighbouring nunnery. But the complaints of the pious damsels addressed to his father ultimately led to the fulfilment of young Dalayrac's dearest wish. His aversion to the law was considered conclusive, and he was sent in 1774 to Paris, where a commission in the guards of the Count of Artois had been obtained for him. But the love of his art was proof against the attraction of a military career. Immediately on his arrival in the capital he took lessons in harmony from Langlé, and soon made his début as a dramatic composer with a comic opera called 'Le petit Souper,' first performed at the French court in 1781. Encouraged by this success, he produced in the following year an opera, 'L'Éclipse totale,' at the Opéra Comique. This also was successful, and secured Dalayrac's position amongst the best and most fertile composers of his time. He continued for the remainder of his life producing operas at the rate of one or two a year. Not even the Reign of Terror interrupted or in any way influenced the inexhaustible productiveness of his pen. Two of his most charming operas, 'La Famille Américaine' and 'Ambroise, ou Voilà ma journée,' bear the terrible date of 1793. In 1790 he lost much of his property, but in spite of this misfortune he refused to avail himself of his father's will, which excluded his younger brother from a share in the family property. At the beginning of the century he was made a chevalier of the Legion of Honour by Napoleon, and he died Nov. 27, 1809, at Paris. Of the numerous works of Dalayrac none have remained in the repertory. The titles of the more important ones may be cited:—'Le Corsaire' (1783), 'L'Amant Statue' (1785), 'Nina' (1786), 'Azémia' (one of his best works, first performed on Oct. 17, 1786), 'Fanchette' (1788), 'Raoul de Créqui' (1789), 'Adèle et Dorsan' (1795), 'Adolphe et Clara' (1799), 'Maison à vendre' (1800), 'Une Heure de Mariage' (1804), 'Le Poète et le Musicien' (first performed in 1811, two years after the composer's death), and many others. [A catalogue of fifty-six in all is given in the *Quellen-Lexikon.*]

Amongst the earlier composers of the modern French school of dramatic music Dalayrac takes a high position. To us his means of expression appear primitive, but considering the date of his earlier works, his skill in orchestral treatment, and his keen perception of dramatic effects and proprieties, are by no means of a despicable order. The opéra-comique, consisting of simple airs and short ensembles, was his favourite mode of production. Such a work as the one-act operetta 'Maison à vendre' is not deprived of a certain archaic charm even at the present day. Lise's song 'Fiez-vous,'

with which it opens, a piece of music much affected by our great-grandmothers, is a charming specimen of the French romance, and the finale of the same work is remarkable for the skilful and fluent treatment of the vocal parts. The same feature is noticeable in his more elaborate compositions, as for instance in the finale of 'Azémia,' which winds up with a charming bit of choral writing. It may briefly be said that Dalayrac's style contains, although in a somewhat embryonic stage, all the qualities which have made the French school justly popular in Europe. He is a unit amongst a galaxy of brilliant stars. His claim to remembrance lies perhaps less in his individual merits than in the fact that without him and other composers of his type and epoch there would have been no Grétry, no Auber, and no Boieldieu. A Life of Dalayrac, by R. C. G. P[ixérécourt], was published in 1810. F. H.

DALBERG, JOHANN FRIEDRICH HUGO, FREIHERR VON, born at Aschaffenburg, May 17, 1752, studied theology at Göttingen, and held various high ecclesiastical appointments at Treves, Worms, and Coblenz. Although technically an amateur, he composed a great deal of music, and played the pianoforte excellently; his piano works were regarded as remarkably difficult. He died at Aschaffenburg, July 26, 1812. His most important works were cantatas, such as 'Jesus auf Golgotha,' 'Eva's Klagen,' a German version of Pope's 'Dying Christian to his Soul,' and Schiller's ode, 'An die Freude.' A quartet for piano and wind instruments is op. 25. A number of sonatas for piano, with and without violin, and several books of songs, some to English words, published in London, are mentioned in the *Quellen-Lexikon.* Among his literary works are the anonymous *Blick eines Tonkünstlers in die Musik der Geister* (1787), *Fantasien aus dem Reiche der Töne* (1806), *Vom Erfinden und Bilden* (1791), *Untersuchungen über den Ursprung der Harmonie* (1800), *Die Aeolsharfe* (1801), and a translation of Sir William Jones's treatise on Indian Music, *Über die Musik der Indier* (1802). (*Quellen-Lexikon* and Riemann's *Lexikon.*) M.

DALCROZE, ÉMILE JAQUES-, Swiss composer, born at Vienna of Swiss parents, July 6, 1865; has lived at Geneva since 1873, where he pursued his literary and musical studies simultaneously. He was afterwards a pupil of R. Fuchs and Anton Bruckner at Vienna, and of Delibes in Paris, the latter for orchestration. On his return to Geneva he entered upon a career of remarkable activity as a lecturer, critic, professor of harmony and 'solfège supérieur' at the Conservatoire of Geneva, and as a composer of music of all descriptions. The most important of his works are the following:—'La Veillée,' for soli, chorus, and orchestra; fragments of an opera, 'Le Violon maudit' (1893); 'Janie,' a lyric comedy (performed at Geneva 1893, and at Stuttgart and Frankfort 1895); 'Poème Alpestre' (for soli, chorus, and orchestra), Geneva Exhibition, 1896, and in London, 1897): 'Sancho Panza,' lyric comedy in four acts (Geneva, 1897, Strasburg, 1902); 'Festival Vandois,' soli, chorus, and orchestra (Lausanne, 1903). A violin concerto played by Henri Marteau in Switzerland, Germany, Belgium, and in Paris, provoked hot discussions on account of its bold tendencies, and its persistent ignoring of all the usual rules of form. His string quartet is often played by quartet parties led by Schörg, Geloso, Marteau, and others. M. Jaques-Dalcroze's bold and sincere talent perhaps nowhere more completely exhibits the mixture of poetry and humour which is characteristic of him, than in various collections of songs ('Chansons romandes,' 'Chez nous,' 'Enfantines,' 'Chansons de l'Alpe,' etc.); these have become quickly popular in Switzerland, and have won a like success in Germany and Holland. In them the composer has created a genuinely Swiss musical literature of a class in which his country was hitherto very poor. G. F.

DALE, JOSEPH, a very prominent music publisher who founded a business which extended from before 1778 to nearly the middle of the 19th century. In 1778 he was established at a private house, 19 Chancery Lane, from whence he issued many musical publications, including a number of operas, as 'Rosina,' 'Flitch of Bacon,' 'Maid of the Mill,' and others, the copyright of which he had purchased from Napier and Welcker. Between 1783 and 1786 he had opened extensive premises at 132 Oxford Street (at the corner of Holles Street), having taken over the business of S. Babb. In 1791 he had, in addition, another shop at 19 Cornhill, and in 1803 a third at 151 New Bond Street. Before 1806 his son William was in partnership, and the business was one of the best in the trade in London.

In 1812, however, there are appearances of a break up. Joseph Dale, possibly a son of the original, remained at 19 Cornhill, and William was in the Poultry, succeeded in 1828 by E. Dale, who remained until after 1835. The original Joseph Dale was to some extent a musician. He composed sonatas, and arranged vocal airs with variations for the harpsichord or pianoforte. Another contemporary with him (perhaps his brother), James Dale, did the same.

The Dale firm in its best days issued so many and such various publications as to defy classification. The standard operas of the day, collections of English and Scottish songs, country dance music, and sheet music of all kinds, bear their imprint. F. K.

DALLAM (spelt also DALHAM, DALLUM, and DALLANS), the name of a family of English organ-builders in the 17th century. The eldest was employed in 1605-6 to build an organ for King's College, Cambridge, for which purpose he

closed his workshop in London and removed his whole establishment to Cambridge. He and his men were lodged in the town, but boarded in the College Hall. Dr. Rimbault (*History of the Organ*) gives a very curious account of every item paid for building this organ. It was destroyed in the time of the Long Parliament, but the case, with some alterations, remains to this day. This Dallam's Christian name does not appear in the college books, but he is most probably identical with Thomas Dallam, who built an organ for Worcester Cathedral in 1613. [He came to London from Dallam in Lancashire, and was apprenticed to a member of the Blacksmiths' Company, of which he afterwards became a liveryman. The organs which he built for King's College, Cambridge, and for Worcester Cathedral were taken down at the time of the Civil War; parts of the former are said to be contained in the existing instrument. He was in all probability the same Dallam who in 1615, 1632, and 1637 was employed to repair the organ of Magdalen College, Oxford. In 1599-1600 he made a journey to Constantinople with a mechanical clock-organ for the Grand Turk. His diary was printed by the Hakluyt Society in 1898]. The three following were probably his sons:—

ROBERT, born 1602, died 1665, and buried in the cloisters of New College, Oxford, for which college he built the organ; but his principal work was that of York Minster, since destroyed by fire. He also built a similar organ for St. Paul's Cathedral. [He was, like his father, a member of the Blacksmiths' Company. Between 1624 and 1627 he built the organ of Durham Cathedral, which remained till 1687, when Father Smith, after putting in four new stops, sold the Choir Organ for £100 to St. Michael's-le-Belfry, York. It remained there until 1885, when it was sold for £4 to an organ-builder of York. It is said that Dallam received £1000 for the original organ, but there is no foundation for the statement. In 1634 he built an organ for Jesus College, Cambridge, in the agreement for which he is called 'Robert Dallam of Westminster.' He added pedals in 1635; the organ, after being taken down at the time of the Civil War, was replaced at the Restoration. In 1635 he built an organ for Canterbury Cathedral. The Calendar of State Papers for the same year contains a bill of Robert Dallam's, dated Nov. 12, for work done to Laud's organ at Lambeth. An organ which he built for St. Mary Woolnoth's was so much injured in the fire of London that it was replaced by a new instrument built by Father Smith, who, however, used some of Dallam's stops. (*Dict. of Nat. Biog.*; Hopkins and Rimbault, *The Organ*, 3rd ed.)]

RALPH built the organ for St. George's Chapel, Windsor, at the Restoration, as well as those at Rugby, Hackney, and Lynn Regis. The Windsor organ is still preserved at St. Peter's-in-the-East, St. Albans. He died while making the organ at Greenwich Church, begun by him in Feb. 1672. [His will, dated August 2, 1673, proved Sept. 19, 1673, gives evidence of his death between those dates, and shows that he had two brothers, George and Thomas, and two sisters, May and Katherine (the wife of Thomas Harrison of London, organ-maker)]. James White, his partner, finished the Greenwich organ in 1673.

GEORGE lived in Purple Lane in 1672, and in 1686 added a 'chaire organ' to Harris's instrument in Hereford Cathedral. V. DE P.; additions by W. B. S.

DALLERY. The eldest of these organ-builders was CHARLES, born at Amiens about 1710, and originally a cooper. His nephew PIERRE, born 1735, after working with his uncle, was for a few years in partnership with CLICQUOT. To the union of these two clever men are due the organs of Notre-Dame and the Sainte Chapelle in Paris, that of the Palace of Versailles, and many others now destroyed or mutilated by ignorant workmen.

PIERRE-FRANÇOIS, son of Pierre, born in Paris 1764, worked with his father from 1801 to 1807, when the latter retired from business, and Pierre-François remained alone. He never had an opportunity of undertaking a large work, but was entirely occupied in repairing instruments. He was clever in certain points, but had not studied his art profoundly, and being a needy man, often used inferior materials. He died in Paris in 1833, leaving nothing but his name to his son LOUIS PAUL, who was born in 1797 and continued the business. V. DE P.

DAMAN, or DAMON, WILLIAM, one of the musicians to Queen Elizabeth, harmonised for the use of a friend the psalm tunes then in common use, to the number of about forty. His friend, in 1579, published them under the following title:—'¶ The Psalmes of David in English Meter with Notes of foure partes set unto them by Guilielmo Damon, for John Bull [who is called in the preface, 'Citezen and Goldsmith of London'], to the use of the godly Christians for recreatyng themselves in stede of fond and unseemly Ballades. At London, Printed by John Daye. Cum privilegio.' This work seems to have been but ill received, and Daman set himself to work to reharmonise the tunes. The new work was published in 1591 with the title of '¶ The former Booke of the Musicke of M. William Damon, late[1] one of her Majesties Musitions, containing all the tunes of David's Psalms, as they are ordinarily soung in the Church: most excellently by him composed into 4 partes. In which sett the Tenor singeth the Church tune. Published for the recreation of such as delight in Musicke by W. Swayne, Gent. Printed by T. Este, the assignè of W. Byrd, 1591.' The work is in two parts, the second being entitled '¶ The second Booke of

[1] [This may indicate that Daman was already dead.]

the Musicke of M. William Damon, containing all the Tunes of David's Psalms, differing from the former in respect that the highest part singeth the Church tune.' [Daman was certainly dead before March 23, 1593, as is proved by a document in Rymer's *Fœdera*, vol. iii. p. 117 (quoted in *The Musician*, June 30, 1897). In the Christ Church Library are a 'Confitebor' and a piece without words by Daman; also two motets by 'W. Demande,' who is probably the same. In the British Museum are the following:—'O heavenly God' *a* 5, in Add. MSS. 29,372-7, and two pieces for lute, in Add. MSS. 29,246 and 31,992. A five-part 'Miserere' is printed in No. xxi. of Arkwright's *Old English Edition.*] W. H. H.; additions by G. E. P. A.

DAMASCENE, ALEXANDER, a foreigner, of probably Italian extraction, but French birth, who, on July 22, 1682, obtained letters of denization in England (see Pat. Roll, 34 Chas. II. pt. 6, No. 4, where he is described as a French Protestant), was an alto singer. On Dec. 6, 1690, Damascene was sworn in as a gentleman extraordinary of the Chapel Royal, and on the death of Henry Purcell in 1695 was advanced to a full place. He died July 14, 1719. Damascene was a prolific song writer, and many of his compositions may be found in the following collections, viz. 'Choice Ayres and Songs,' 1676-84; 'The Theatre of Musick,' 1685-87; 'Vinculum Societatis,' 1687-91; 'The Banquet of Musick,' 1688-92; 'Comes Amoris,' 1687-94; 'The Gentleman's Journal,' 1692-94. W. H. H.

DAME BLANCHE, LA. Opéra-comique in three acts, founded on Scott's *Monastery;* libretto by Scribe, music by Boieldieu; produced at the Opéra Comique, Dec. 10, 1825; played at the same theatre for the 1000th time on Dec. 16, 1862. Produced in English as 'The White Maid' at Covent Garden, Jan. 2, 1827.

DAMNATION DE FAUST. See FAUST.

DAMOREAU, LAURE CINTHIE MONTALANT, born at Paris, Feb. 6, 1801, was admitted into a vocal class at the Conservatoire, Nov. 28, 1808. She made quick progress, and soon began to study the piano. In 1814 she left the piano-class to enter that of vocalisation. She began her career by giving some concerts which were not successful. Engaged at the Théâtre Italien in second parts at the age of eighteen, Mlle. Cinti, as she now called herself, made her first appearance as Cherubino. She played the part with great charm and grace, but her time was not yet come. It was not till 1821 that she attempted principal parts. In 1822 she was engaged by Ebers for the London opera, at a salary of £500. She was young and pretty, her manners pleasing and elegant, and her acting correct and unaffected, if not forcible; but her voice was not strong enough for the size of the theatre, and she created little sensation. She returned to Paris, where she soon began to take a higher place; her salary was raised, and the arrival of Rossini was a fortunate event for her. She made her début at the Grand Opéra, Feb. 24, 1826, in 'Fernand Cortez,' and her success was complete. Rossini wrote for her the principal female parts in the 'Siège de Corinthe' and 'Moïse,' which contributed to her reputation. In consequence, however, of some misunderstanding with the management, Cinti quitted the theatre abruptly in 1827, and went to Brussels, where she excited the greatest enthusiasm. Concessions having been made she returned to Paris; but, before leaving Brussels, was married to Damoreau, an unsuccessful actor. This union was not happy. Returned to Paris she resumed her career, singing in 'La Muette de Portici,' 'Le Comte Ory,' 'Robert le Diable,' and 'Le Serment,' in each more excellently than before. In 1829 she took part, with Sontag and Malibran, in the 'Matrimonio Segreto.' Never was there a more brilliant combination; nor did Cinti suffer by comparison. Fétis boldly declares that she now became one of the best singers the world has known. In 1832 she came over with a French company, and sang at Covent Garden in Meyerbeer's 'Robert le Diable.' Her engagement was not renewed in 1835, and she was gladly welcomed at the Opéra Comique, where Auber wrote for her such works as the 'Domino noir,' 'L'Ambassadrice,' and 'Zanetta.' Cinti retired from the stage in 1843, sang again in London in that year, and made a tour with the violinist Artôt in the United States, also in 1843, then at the Hague, at Ghent in 1845, at St. Petersburg, and at Brussels in 1846. In 1834 she had been appointed professor of singing at the Conservatoire in Paris; this place she resigned in 1856, and retired to Chantilly, and died in Paris, Feb. 25, 1863.

Mme. Cinti published an 'Album de romances,' and a few separate pieces. She wrote also a 'Méthode de chant,' dedicated to her pupils. Her son died at an early age after distinguishing himself by some vocal compositions; and her daughter, a singer, married M. Weckerlin. J. M.

DAMPER (Fr. *L'Étouffoir;* Ital. *Saltarello, Spegnitoio*, or *Smorzo;* Ger. *Dämpfer*, but that word also means the *sordino*), that part of the action of a pianoforte contrived to stop the vibration of the strings belonging to a note when the finger is raised from the key. It comprises folds or thicknesses of cloth or soft felt, elevated upon a wire upright, which rest upon or press upwards against the strings when the key is not touched, but quit the strings when the key is pressed down. The pedal movement connected with the dampers removes them collectively from the strings, and so long as the pedal is pressed down the instrument has virtually no dampers, the strings continuing to sound until their vibrations cease. There are no dampers to the treble notes, as the duration of vibration in this part of the scale is too short to need arresting. [See PIANOFORTE, SORDINI.] A. J. H.

DAMROSCH, LEOPOLD, composer, conductor, and violinist, born at Posen, Prussia, Oct. 22, 1832; died at New York, Feb. 15, 1885. After a preliminary education at the gymnasium in his native town he was graduated at Berlin University in 1854, with the degree of Doctor of Medicine. Having shown marked musical tastes in early life, he decided then, against his parents' wishes, to abandon medicine and devote himself to the study of music. He became a pupil of Ries, S. W. Dehn, and Böhmer, and made such progress that he appeared the next year as solo violinist in Magdeburg. After giving concerts in the principal German cities he was appointed (1857) leading violinist in the court orchestra at Weimar by Liszt, who was then the director. While here Damrosch became intimate with Liszt and many of his most distinguished pupils, and also won Wagner's lifelong friendship. Here too he married the singer Helene von Heimburg. In 1859-60 Dr. Damrosch was conductor of the Breslau Philharmonic Society, where he manifested his admiration for Wagner's music and theories, and for the new school of musical art in Germany. His programmes presented, together with the compositions of the older masters, works by Wagner, Liszt, and Berlioz—music not then widely admired or appreciated. In 1860 his increasing engagements compelled him to give up this post, and he made concert tours with Von Bülow and Tausig.

In 1862 he organised the Orchester-verein of Breslau, with an orchestra of eighty players, of which he remained director till 1871.

In that year Dr. Damrosch was called to New York to become conductor of the Männergesang-verein Arion, a leading German male chorus. He made his début there on May 6, as conductor, violinist, and composer. Dr. Damrosch's active personality and strong musical temperament soon made themselves influential in the musical life of New York. There resulted from them, and his marked ability as an organiser, the foundation in 1874 of the Oratorio Society, mixed chorus devoted to the performance of oratorios and other works. In 1878 a further result of Dr. Damrosch's labours was seen in the foundation of the Symphony Society, for the giving of orchestral concerts. Of both of these Dr. Damrosch was elected conductor, and occupied that place until his death. In the season of 1876-77 he officiated as conductor of the Philharmonic Society's concerts.

Dr. Damrosch was also mainly instrumental in the establishment of German Opera at the Metropolitan Opera House in New York. This opera house had been opened the previous year with Italian opera, under the management of Henry E. Abbey; the outcome was disastrous failure financially. Dr. Damrosch presented to the directors a plan for German Opera of which he would assume the management. He gathered a company of German singers, and organised his campaign with a sagacity that led to a brilliant success. The season opened on Nov. 17, 1884, and ended on Feb. 11, 1885. Dr. Damrosch conducted all the representations but the last. The previous day he had contracted a cold, and five days later, while all the city was rejoicing at his achievement, he died. He had put German opera on such a foothold that under Anton Seidl's direction it was continued at the Metropolitan Opera House for six years longer; and the effects of his works have been plainly seen ever since in New York.

In 1880 Columbia College conferred upon him the degree of Mus.Doc. In 1881 he conducted the first great musical festival held in New York, with an orchestra of 250 and a chorus of 1200. In 1883 he made a successful tour through the western States with his orchestra. Dr. Damrosch's son, Walter Damrosch, succeeded him in the direction of the Oratorio and Symphony Societies, and was continued in the services of the opera company as assistant conductor.

The following compositions of Dr. Damrosch have been published in Germany:—

Op.
1. Idylle and Mazurka; Vln. and PF.
2. Stimmungen; 3 pieces, Vln. and PF.
3. Improvisation on theme by Schumann; Vln.
4. Two Romanzas; Vln. and PF.
5. Five Songs.
6. Three Songs.
7. Three Songs.
8. Twelve Songs.
9. Concertstück, in form of serenade, four movements; Vln. and Orch. or PF.

Op.
10*a*. Romanza; Vln. and PF.
b. Six Songs.
11. Twelve Spanish Songs.
12. Romanza; Vln. and Orch. or PF.
13. Three Songs.
14. Three Songs.
15. Festival Overture; Orch.
16. Five Songs.
17. Five Songs.
18. Six Choruses; male voices.
19. Patriotic Songs.

Without opus number:—

Concerto; Vln. and Orch. or PF.
Nachtgesang; Vln. and Orch. or PF.
Capricietto; Vln. and Orch. or PF.
Brautgesang (Uhland); Tenor and Baritone Solos, Male Chorus, Orchestra.

Published in the United States, without opus number:—

Ruth and Naomi; Oratorio.
Saint Cecilia; collection of Anthems and other Church Music.
'Tell me where is Fancy bred'; Glee, Male voices.
Siegfried's Sword; Tenor Solo and Orchestra or PF.
'Thou, Who art God alone'; Masonic Song, Baritone Solo, Male Chorus and Orchestra.
Lexington Battle-Hymn; mixed chorus.
Two duets; Tenor and Baritone.
The Fisher-Boy (Schiller); Song, Soprano.
Four duets for Soprano and Mezzo-soprano.
'Cherry Ripe,' part-song for mixed voices.
Twelve Children's Songs (published in 1885 in 'St. Nicholas Songs').
'Sulamith,' sacred cantata for two solo voices (soprano and tenor), chorus and orchestra.

His son, FRANK HEINO DAMROSCH, was born in Breslau, June 22, 1859. He came with his father to New York in 1871, but had already studied the pianoforte under Pruckner and Jean Vogt; and continued it in New York under Von Inten, and composition under his father and Moszkowski. He at first went into business in Denver, Colorado, but soon devoted himself to music. He was conductor of the Denver Chorus Club in 1884-85, supervisor of music in the public schools of that city, and also organist at various churches there. During the German régime at the Metropolitan Opera House, after his father's death, from 1885 to 1891, he

was chorus-master there. He also conducted the Newark Harmonic Society, from 1885 to 1887. In 1892 Mr. Damrosch organised the People's Singing Classes for the instruction of wage-earners in sight-reading and choral-singing, which meet in the hall of Cooper Union every Sunday afternoon in the winter, with many branches in other parts of the city. These are entirely self-supporting. From these classes has developed the People's Choral Union, a chorus with a membership of 1200, composed chiefly of wage-earners. Mr. Damrosch was also instrumental in founding the Musical Art Society of New York, of which he has been conductor; it is a small chorus of about fifty professional singers who are paid for their services and devoted to the performance of *a cappella* choral works of the 15th and 16th centuries, the works of Bach, and the higher class of modern choral music.

In 1897 he was made supervisor of music in the public schools of the city of New York. In 1898 he succeeded his brother, Walter, as conductor of the Oratorio Society founded by their father. At various times he was also conductor of the Musurgia of New York, the Oratorio Society of Bridgeport, Conn., the Orpheus and the Eurydice Societies of Philadelphia. He has published a few songs and choruses, and in 1894 issued a 'Popular Method of Sight Singing.'

Another son of Leopold Damrosch, WALTER JOHANNES DAMROSCH, conductor and composer, was born at Breslau, Prussia, Jan. 30, 1862. He was devoted to music from his childhood, and studied harmony with his father, and with Rischbieter and Draeseke at Dresden; and the pianoforte with Ferdinand Von Inten, Bernardus Boekelman, and Max Pinner, after he had been brought to New York by his father in 1871. When Dr. Damrosch began his season of German Opera at the Metropolitan Opera House in 1884, Walter was engaged as assistant conductor; and after his father's death he continued in that post under Anton Seidl. He succeeded his father as conductor of the Oratorio and Symphony Societies; he was active in the former till he was succeeded by his brother in 1898, and in the latter till its discontinuance. In 1894 he organised the Damrosch Opera Company with German singers with which he gave performances in New York and in many cities throughout the country, for five years. In 1899 he retired from his work as a conductor to devote himself for a year to composing. He took it up again the following year, however, as conductor of the German operas in the company directed by Mr. Maurice Grau at the Metropolitan Opera House, and occupied the post for the seasons of 1900-1 and 1901-2. He was elected conductor of the New York Philharmonic Society for the season of 1902-3. On May 17, 1890, Mr. Damrosch married Miss Margaret Blaine, daughter of James Gillespie Blaine, Secretary of State of the United States in 1881 and in 1889-92.

Mr. Damrosch's compositions include two operas: 'The Scarlet Letter,' based on Hawthorne's romance, the text by George Parsons Lathrop (produced in Boston, Feb. 11, 1896); 'Cyrano,' text by William J. Henderson, after Rostand's play, published in 1904; 'Manila' Te Deum, 1898; a violin sonata, and several songs. R. A.

DANBY, JOHN, born 1757, one of the most distinguished glee composers. Between 1781 and 1794 he obtained ten prizes from the Catch Club for eight glees and two canons. He published three books of his compositions, and a fourth was issued after his decease. In 1787 he published an elementary work entitled *La Guida alla Musica Vocale*. He held the appointment of organist at the chapel of the Spanish Embassy, near Manchester Square, for the service of which he composed some masses and motets. He died May 16, 1798, during the performance of a concert which his friends had got up for his benefit, he having long lost the use of his limbs by sleeping in a damp bed at an inn. He was buried in Old St. Pancras Churchyard, where an altar tomb was raised to his memory. His fine glee, 'Awake, Æolian lyre!' will not soon be forgotten. W. H. H.

DANCE RHYTHM and dance gestures have exerted the most powerful influence on music from prehistoric times till the present day. The analogy of a similar state of things among uncivilised races still existing confirms the inherent probability of the view that definiteness of any kind in music, whether of figure or phrase, was first arrived at through connection with dancing. The beating of some kind of noisy instrument as an accompaniment to gestures in the excitement of actual war or victory, or other such exciting cause, was the first type of rhythmic music, and the telling of national or tribal stories and deeds of heroes, in the indefinite chant consisting of a monotone slightly varied with occasional cadences, which is met with among so many barbarous peoples, was the first type of vocal music. This vague approach to musical recitation must have received its first rhythmic arrangement when it came to be accompanied by rhythmic gestures, and the two processes were thereby combined, while song and dance went on together, as in mediæval times in Europe.

The process in the development of modern music has been similar. The connection between popular songs and dancing led to a state of definiteness in the rhythm and periods of secular music long before the times which are commonly regarded as the dawn of modern music; and in course of time the tunes so produced were not only actually used by the serious composers of choral music, as the inner thread of their works, but they also exerted a modifying influence upon their style, and led them by degrees to change the unrhythmic vagueness of the early state of

things to a regular definite rhythmic system. The fact that serious music was more carefully recorded than secular makes the state of the art in the time of Dunstable, Tinctor, De Muris, and the Francos to appear more theoretical than effective. Serious musicians were for the most part very shy of the element of rhythm, as if it was not good enough company for their artistic purposes. Consequently the progress of serious art till the 16th century was confined to the development of good part-writing and good progressions of harmony. The result is a finely continuous mass of tone, and expressive effects of harmony, in the works of these old masters up to the early years of the 16th century, but a conspicuous absence of definiteness in both the rhythms and phrases; as may be observed in the 'Chansons mondaines' of Okeghem, Josquin des Prés, and Hobrecht, as well as in their sacred music. But while these composers were proceeding on their dignified way, others whose names are lost to fame were busy with dance tunes which were both sung and played, and may be studied in the *Orchésographie* of Thoinot Arbeau, and Stafford Smith's *Musica Antiqua*, the *Berliner Liederbuch*, the *Walther'sches Liederbuch*, and elsewhere. And quite suddenly, within the space of less than a generation, the rhythmic impulse of this choral dance music passed into serious music, and transformed the vague old-fashioned 'Chanson mondaine' into a lively rhythmic tune; and at the same time gave the development of the art in the direction of modern harmony a lift such as it never could have got by continuing in its old path. In fact, the first change of the Chanson mondaine into the typical madrigal seems to have been greatly helped by the progress in artistic merit of the forms of the dance tunes, such as were sung in parts by voices, and by the closely allied Frottole and Villanelle. As early as Arcadelt and Festa rhythmic definition of a dance kind is found in works which are universally recognised as madrigals; and as it is possible that composers did not keep steadily in view the particular class to which after ages would refer their works, they wrote things which they intended to be madrigals, but which were in reality pervaded by a dance impulse almost from beginning to end, inasmuch as the harmonies move often together, and form rhythmic groups. But, on the other hand, the most serious masters of the great period of madrigal art evidently resisted the influence of regular dance rhythms, and in the richest and maturest specimens of Marenzio, Palestrina, Vecchi, and our greatest English masters, it would be difficult to point to the distinct rhythmic grouping which implies a connection with dance motions. But nevertheless even these great masters owed something to dance influence. For it was the independence from artistic responsibility of the early dance writers which enabled them to find out the elementary principles of chord management, by modifying the conventional modes as their instincts led them; while their more serious and cautious brethren were being incessantly thwarted in their efforts by their respect for the traditions of these modes. And hence dance music reacted upon serious music in a secondary as well as direct manner, since its composers led the way in finding out the method of balancing and grouping chords in the manner which in modern music is familiar in the inevitable treatment of Tonic and Dominant harmonies, and in the simpler branches of modulation of the modern kind. This secondary influence the great madrigal writers were not directly conscious of, however much they profited by it; and the growth and popularity of the independent forms of Frottola, Villanella, Balletto, and so forth, helped to keep their art form free from the more obvious features of dance music. When the madrigal art came to an end, it was not through its submitting openly to the seductive simplicity of dance rhythm, but by passing into part-songs with a definite tune, such as were early typified in the best days by Dowland's lovely and finished works; or into the English glee; or through its being corrupted by the introduction of an alien dramatic element, as by Monteverde.

All such music, however, was deposed from the position it occupied prior to the year 1600 by the growth of new influences. Opera, Oratorio, and many other kinds of accompanied song, and above all, instrumental music, began to occupy most of the attention of composers.

In the first beginnings of Opera and Oratorio the importance of dance rhythm is shown by negative as well as positive evidence. In the parts in which composers aimed at pure declamatory music the result, though often expressive, is hopelessly and inextricably indefinite in form. But in most cases they submitted either openly or covertly to dance rhythm in some part or other of their works. In Cavaliere's one oratorio the connection of the chorus 'Fate festa al Signore' with the 'Laudi spirituali' is as obvious as the connection of the said Laudi with popular dance songs. For in the Italian movement, fostered by Neri, as in the German movement in favour of the Chorale, to which Luther gave the impetus, the dance principle was only two generations off. Both Chorales and Laudi Spirituali, and the similar rhythmic attempts of the early French Protestants, were either adaptations of popular songs, or avowedly modelled on them; and, as has been already pointed out, the popular songs attained their definite contour through connection with the dance. But besides this implication, in Cavaliere's work distinct instructions are given for dancing, and the same is the case with Peri's opera 'Euridice,' which came out in the same year (1600). As a matter of fact, Peri seems to have been less susceptible to

the fascination of clear dance rhythm than his fellow composers, but the instructions he gives are clear and positive. The last chorus is headed 'Ballo *a* 3,' 'Tutto il coro insieme cantano *e ballano.*' Similarly Gagliano's 'Dafne' (printed at Florence in 1608) ends with a 'Ballo.' Monteverde's 'Orfeo' (1609) contains a chorus headed 'Questo *balletto* fu cantato al suono di cinque Viole,' etc., and the whole ends with a 'Moresca' which is preceded by a chorus that is to the utmost degree rhythmic in a dance sense. To refer to the works of Lulli for examples of the influence is almost superfluous, as they are so full of dances and gesticulation that the sum total of his operas is more terpsichorean than dramatic, and this does not only apply to the actual dances so called, but also to vocal pieces. Handel, Rameau, and Gluck used their dance effects with more discretion and refinement, and in the later development of Opera the traces of dance and rhythm fade away in the dramatic portions of the work; though it cannot be said that the influence has ceased even in modern times, and positive independent dance movements persist in making their appearance, with complete irrelevance in many cases, as much to the annoyance of people of sense as to the delight of the fashionable triflers to whom opera-houses are dear because it has been the fashion for a century or so for similar triflers to frequent them.

In Oratorio the dance influence maintained its place, though of course not so prominently as in Opera. Next after Cavaliere, Carissimi submitted to its influence. He was, in fact, one of the first Italians who frequently showed the power of a definite rhythmic figure, derived from the dance, in giving go and incisiveness to both choruses and solos. As instances may be quoted the song of Jephthah's daughter when she comes out to meet him—'Cum tympanis et Choris'—after his victory, and the solo and chorus describing the king's feast at the beginning of 'Balthazar'—'Inter epulas canori, exultantes sonent chori.' In Handel's oratorios the introduction of artistic dance music was common, and the influence of it is to be traced elsewhere as well. But in modern times the traditional connection of dance and religion has ceased, except in the dances on Corpus Christi day and some other festivals in the Cathedral of Seville, and oratorios no longer afford examples of minuets and jigs. But the influence is still apparent. In the first Baal Chorus in 'Elijah' Mendelssohn allowed a rhythm of a solemn dance order to appear, and the same quality is to be discerned in the Pagan Chorus in 'St. Paul,' 'O be gracious, ye immortals'; while he permitted himself to drift into a dancing mood, with less obvious reason, in the middle movement of the symphony to the 'Lobgesang,' and in the chorus 'How lovely are the messengers' in 'St. Paul.'

The obligations of instrumental music to dance rhythm are far greater than that of any respectable form of choral music. Almost all modern instrumental music till the present time may be divided into that in which the *cantabile* or singing element predominates, and that in which the rhythmic dance principle is paramount. In fact, dance rhythm may be securely asserted to have been the immediate origin of all instrumental music. The earliest definite instrumental pieces to be found are naturally short dances. A step in the direction of artistic effect was made when two or more dances, such as a Pavan and a Galliard, were played one after another for the sake of the contrast and balance which was thereby obtained. The result of such experiments was the Suite-form, and in the article on that subject the question of the direct connection of the form of art with the Dance is discussed at length.

When the more mature form of the Sonata began to develop, other forms of art were maturing also, and had been imitated in instrumental music. Madrigals having been 'apt for voices or viols' were imitated for instruments alone. Movements for solo voices with accompaniment were also being imitated in the shape of movements for instruments, and were rapidly developing into a distinct art form; and again the movement, consisting of a succession of chords interspersed with *fioriture,* such as singers used, had been developed by organists such as Claudio Merulo, partly by instinct and partly by imitation. Most of these forms were combined with dance forms in the early stages of the SONATA; and in the articles on that subject, and on FORM and SYMPHONY, the question is discussed in detail. Here it is not necessary to discuss more than the general aspect of the matter. Composers early came to the point of trying to balance movements of a singing order with dance movements. In the early Violin Sonatas, such as those of Biber and Corelli, dance principles predominated, as was natural, since the type of the movements which were sung was not as yet sufficiently developed. But the special fitness of the violin for singing speedily complicated this order of things, and the later representatives of the great Italian violin school modified the types of dance forms with cantabile and highly expressive passages.

The Clavier Sonata, on the other hand, inclined for a time towards a rhythmic style. The harpsichord was not fitted for *cantabile,* and the best composers for the instrument fell back upon a clear rhythmic principle as their surest means of effect. When the harpsichord was displaced by the pianoforte a change naturally followed. The first movement came to occupy a midway position, sometimes tending towards dance rhythms, and sometimes to *cantabile,* and sometimes combining the two. The central slow movement was developed on the principle of the slow operatic aria, and adopted its form and style.

The last movement continued for a long time to be a dance movement, often actually a gigue, or a movement based on similarly definite rhythms; and when there were four movements the third was always decisively a dance movement. In the old style of Operatic Overture, also known as a Symphony, there was at least one distinct dance movement. This kind of work developed into the modern Orchestral Symphony, in which at least one decided dance movement has maintained its position till the present day, first as the familiar minuet and trio, and then in the scherzo, which is its offspring, and always implies a dance rhythm. But the fitness of a dance movement to end with is palpable, and composers have constantly recognised the fact. Haydn has given a strong example in the last movement of the fine Symphony in D minor, No. 7 of the Salomon set; and many others of his Rondos are absolute dance movements. Among Mozart's the last movement of the E♭ Symphony may be pointed to; among Beethoven's the wild frenzy of the last movement of the Symphony in A minor, No. 7. In modern times the influence of dance music upon the musical character of composers has become very marked. The dance which has had the greatest influence of all is undoubtedly the Waltz, and its ancestor the Ländler. Beethoven, Weber, Schubert, Schumann, and Brahms have not only written dance movements of this kind, but show its influence in movements which are not acknowledged as dance movements. Even Wagner has written one dance of this kind in 'Die Meistersinger.'

Many modern composers have introduced *bona fide* national dance-tunes into their instrumental works, as Beethoven did with Russian tunes in the Rasoumowsky Quartets. Some go farther, as may be seen by the example of Schubert, Brahms, and Dvořák, and others of note. For they accept, as invaluable accessories to their art, rhythmic and characteristic traits drawn from the dances of Hungarians, Scandinavians, Bohemians, Slavs, and Celts of various nationalities; and subjects which appear in movements of sonatas and symphonies by famous composers are sometimes little more than figures taken from national dance-tunes slightly disguised to adapt them to the style of the composer.

The connection of music with gesture is a question too special and intricate to be entered on in detail. But it may be pointed out that a considerable quantity of the expressive material of music is manifestly representative of, or corresponding to, expressive gestures. The branch of dancing which consisted of such expressive gestures was one of the greatest importance, but it has almost entirely ceased to hold place among modern civilised nations. In music the traces of it are still to be met with, both in the finest examples of Sarabandes, and also, more subtly, in some of the most expressive passages of the greatest masters. C. H. H. P.

DANCE, William. An English musician whose name deserves preservation as one of the founders of the Philharmonic Society. He was born in London in 1755, was [a violinist at Drury Lane, 1771-74,] in the orchestra of the Opera from 1775 to 1793, and led the band at the Handel Commemoration of 1790 in the absence of Cramer. He died full of years and credit June 5, 1840. The circular proposing the meeting which led to the formation of the Philharmonic, was issued by 'Messrs. Cramer, Corri, & Dance,' from Mr. Dance's house, 17 Manchester Street, on Sunday, Jan. 17, 1813. He was afterwards one of the Directors, and Treasurer. His son Henry was secretary to the society for the first year, 1813.

DANCLA, Jean Baptiste Charles, violinist, teacher, and composer, born at Bagnères de Bigorre in 1818, is the last surviving representative of the old French school of violin-playing. He received instruction from Baillot at the Paris Conservatoire (1828) and ultimately became himself a professor at that institution (1857). He was successful as a soloist in the 'Société des Concerts' and elsewhere, and his Quartet Soirées, in which he was assisted by his younger brothers Leopold (violinist) and Arnaud (violoncellist), enjoyed considerable vogue. As a composer he was equally successful, gaining many prizes, among them the Prix Chartier, shared with Madame Farrenc, and given for the composition of a piece of chamber music which should the 'nearest approach to classic masterpieces.' Yet it cannot be said that the more ambitious among the 130 works (*circa*) which he has published are of enduring value. His gift has rather been that of writing bright and graceful music and of writing it well for his instrument, his minor compositions for violin being very popular. His Études are of considerable value to teachers, especially those bearing the title 'Accentuation et ponctuation de l'archet.' M. Achille Rivarde, professor at the Royal College of Music, is one of his pupils. W. W. C.

DANDO, Joseph Haydon Bourne, was born in Somers Town, May 11, 1806. At an early age he commenced the study of the violin under his uncle, Gaetano Brandi. In 1819 he became a pupil of Mori, with whom he continued about seven years. In 1831 he was admitted a member of the Philharmonic orchestra. For many years he filled the post of leader of the bands of the Classical Harmonists and Choral Harmonists Societies (both now extinct), whose concerts were given in the City. Dando was the first to introduce public performances of instrumental quartets. It is true that in the earlier days of the Philharmonic Society a quartet occasionally formed part of the programme, but no concerts consisting exclusively of quartets had before been given. The occasion on which the experiment was first tried was a benefit concert got up

by Dando at the Horns Tavern, Doctors' Commons, on Sept. 23, 1835. The programme was entirely composed of quartets, trios, etc. The experiment proved so successful that two more similar concerts were given in October, each proving more attractive than its precursor. Dando then formed a party consisting of Henry Blagrove, Henry Gattie, Charles Lucas, and himself, to give regular series of Quartet Concerts, and they commenced their enterprise on March 17, 1836, at the Hanover Square Rooms. They continued their performances annually until 1842, when Blagrove seceded from the party, upon which Dando assumed the first violin, the viola being placed in the hands of John Loder. Thus constituted they removed to Crosby Hall, where they continued until the deaths of Gattie and Loder in 1853 broke up the party. Dando occupied a prominent position in all the best orchestras until 1875, when the fingers of his left hand becoming crippled he was compelled to desist from performing. [He held the post of music master to the Charterhouse School from 1875 until within a short time of his death, which took place at Godalming, May 9, 1894, two days before his eighty-eighth birthday. He was buried in Highgate Cemetery. A full biography is published in the *Musical Herald* for July 1892.] W. H. H.

DANICAN. See PHILIDOR.

DANIEL, HERMANN ADALBERT, a German theologian, born 1812 at Cöthen near Dessau, professor in the University of Halle. His *Thesaurus Hymnologicus* (5 vols. Löschke, Leipzig) is a valuable work on the history of early church music and collection of hymns. M. C. C.

DANKERTS, GHISELIN, a native of Tholen in Zeeland, and a singer in the Papal Chapel from 1538 to 1565, when he was pensioned. An eight-part motet of his composition, 'Lætamini in Domino,' is included in Uhlard's 'Concentus octo . . . vocum' (Augsburg, 1545), and a six-part motet 'Tua est potentia' in the 'Selectissimæ cantiones ultra centum' (Augsburg, 1540). Also two books of madrigals for four, five, and six voices, are said to have been published by Gardano (Venice, 1559), [and two madrigals, 'Fedel quel sempre fui,' and 'Scarpella si vedra' are contained in the collection first published in 1555 by Barrè of Rome. See Vogel, *Bibl. der ged. weltl. Vocalmusik Italiens.*]

Notwithstanding the new school of composers, already well established in Rome, with Costanzo Festa, Arcadelt, etc., at its head, there were still many conservative musicians in that city, and Dankerts was one of them, who adhered strictly to the old Netherland school, and remained uninfluenced by the new art that had grown up around them. He gained great celebrity as judge in the dispute between two ecclesiastical musicians, Vicentino and Lusitano, upon the nature of the scales on which the music of their time was constructed. Dankerts was obliged to defend his verdict against Vicentino, in a learned and exhaustive treatise on the matter in dispute, the original MS. of which is preserved in the Vallicellan library at Rome. A full account of this controversy is given by Hawkins. J. R. S. B.

DANNELEY, JOHN FELTHAM, born at Oakingham, Berkshire, in 1786, was the second son of a lay-clerk of St. George's Chapel, Windsor. At fifteen years of age he studied thorough-bass under Samuel Webbe, and the pianoforte, first under Charles Knyvett and afterwards under Woelfl and Charles Neate. He resided with his mother at Odiham until he reached his twenty-sixth year, when he established himself at Ipswich as a teacher of music, and in a few years became organist of the church of St. Mary of the Tower in that town. In 1816 he visited Paris, and studied under Antoine Reicha. Danneley published in 1820, *Elementary Principles of Thorough-bass*, etc.; in 1825, *An Encyclopædia or Dictionary of Music;* and in 1826, *A Musical Grammar.* He died in London in 1836. W. H. H.

DANNREUTHER, EDWARD GEORGE, born Nov. 4, 1844, at Strasburg. When five years old was taken to Cincinnati, U.S., where he learned music from F. L. Ritter. In 1859 entered the Conservatorium at Leipzig, and remained there till 1863, under Moscheles, Hauptmann, and Richter. From Leipzig he removed to London, where he has since resided (excepting two professional visits to the United States), and is one of the most prominent musicians of the metropolis, well known as a pianoforte player and teacher, littérateur and lecturer, and a strong supporter of progress in music. He is especially known as the friend and champion of Wagner. His first public appearance in England was at the Crystal Palace, April 11, 1863, when he played Chopin's F minor concerto (for the first time in its entirety in England). He founded the Wagner Society in 1872, and conducted its two series of concerts in 1873 and 1874. He was also a warm promoter of the Wagner Festival in 1877, translated his *Music of the Future* (Schott, 1872) and others of the prose works, such as *On Conducting*, *Beethoven*, etc., and received Wagner in his house during his stay in London. An interesting set of papers in the *Monthly Musical Record* of 1872 was republished in 1904, on *Wagner and the Reform of the Opera.* He was the first to play the concertos of Grieg in A minor, Liszt in A, and Tchaïkovsky in B flat minor (Crystal Palace, 1874 and 1876). He was appointed professor of the pianoforte in the Royal College of Music in 1895.

But while Mr. Dannreuther is an earnest apostle of the new school, he is no less zealous for the old, as the range of the programmes of his well-known chamber concerts, given at his house in Orme Square, Bayswater, from 1874 to 1893, his own able interpretations of Bach

and Beethoven, his lectures on Bach, Mozart, Beethoven, Chopin, Schumann, and Wagner at the Royal Institution, his article on Beethoven in *Macmillan's Magazine* (July 1876), abundantly prove. His treatise on *Musical Ornamentation* (one of Novello's Primers) is the standard work on the subject. Dannreuther's published compositions consist of two sets of songs and one of duets.

DANZI, FRANCESCA. See LEBRUN, MADAME.

DANZI, FRANZ, composer and violoncellist, born at Mannheim, May 15, 1763, studied chiefly under his father, first violoncellist to the Elector Palatine, and in composition under the Abbé Vogler. At fifteen he was admitted into the Elector's band. In 1778 the band was transferred to Munich, and there Danzi produced his first opera 'Die Mitternachtsstunde,' which was followed by 'Der Kuss,' 'Cleopatra,' 'Iphigenia,' and others. In 1790 he married Marguerite Marchand, a distinguished singer, and in the following year started with her on a professional tour which lasted six years. At Prague and Leipzig he conducted the performances by Guardassoni's Italian company, and his wife was especially successful in the parts of Susanna in 'Le Nozze di Figaro,' and Caroline, and Nina, in 'Il Matrimonio Segreto.' They were also favourably received in Italy, especially at Venice and Florence. In 1797 they returned to Munich, where Mme. Danzi died in 1799. Her husband soon after resigned his post of vice-capellmeister to the Elector, to which he was appointed in 1798. In 1807 he was appointed capellmeister to the King of Würtemberg, but was soon compelled to leave Stuttgart on account of the political changes in that part of Germany. He then became capellmeister at Carlsruhe, where he remained till his death, April 13, 1826. He composed eleven operas, besides a mass of orchestral, chamber, and church music. For list see the *Quellen-Lexikon*. None of it has survived. He was a sound musician, but strained too much after orchestral effects. He was an excellent teacher of singing, and his 'Singing Exercises' were used for long after his death and form his most permanent work. M. C. C.

DAQUIN, LOUIS-CLAUDE, born in Paris, July 4, 1694, died there June 15, 1772; was a pupil of Marchand; was organist of St. Antoine at the age of twelve years, and of St. Paul from about 1727 until his death. His first book of harpsichord pieces, which contains the famous 'Coucou,' was published in 1735; it was reprinted in vol. ix. of the *Trésor des Pianistes*. Two books, on music and poetry respectively, appeared in 1752 and 1753; they are *Lettres sur les hommes célèbres dans les sciences*, etc., and *Siècle littéraire de Louis XV.*, etc.; but it is doubtful if they are by L.-C. Daquin, or his son, Pierre-Louis. The father also composed a 'Nouveau livre de Noëls' consisting of harpsichord pieces, of which the greater part could be performed on violins, flutes, oboes, etc. M.

DARGOMIJSKY, ALEXANDER SERGEIVICH, was born Feb. 14, 1813, on a country property in the government of Toula, whither his parents had fled from their own home near Smolensk, during the French invasion of 1812. It is a remarkable fact that this future master of declamation only began to articulate at five years of age. Dargomijsky was educated in St. Petersburg. At six he received his first instruction on the piano, and two years later began the violin. At eleven he had already made some attempts at composition. His education completed, he entered, in 1831, the Control Department, but retired altogether from the Government service four years later. Dargomijsky was of good family, and mixed in fashionable society, where he became well known as an amateur pianist and as the composer of pleasing drawing-room songs. In 1833 a chance meeting with Glinka gave a more serious impulse to his musical talents. Dargomijsky was nine years younger than the composer of 'A Life for the Tsar,' yet for a time these two stood side by side, isolated figures on the horizon of the Russian musical world. Taken together they make up the sum-total of the national character. Glinka had the versatility and spontaneity we are accustomed to associate with the Slav temperament; Dargomijsky had not less imagination, but was more reflective. Glinka's music is idealistic and lyrical; Dargomijsky's realistic and dramatic. Glinka was not devoid of wit; but Dargomijsky's humour is full-flavoured and racy of the soil. Glinka lent Dargomijsky the famous note-books containing the exercises in harmony which he had worked out with Professor Dehn in Berlin. This was all the theoretical training Dargomijsky ever received, but it so far strengthened his technical knowledge that he set to work on an opera 'Esmeralda,' the French libretto of which was taken from Victor Hugo's 'Notre Dame de Paris.' Completed and translated into Russian in 1839, this work was not accepted by the directors of the Imperial Opera until 1847. Although these eight years of suspense undoubtedly discouraged Dargomijsky and retarded his development, he still had courage to devote himself entirely to music. 'Esmeralda' is light opera in the style of Auber or Halévy, but in the dramatic scenes there is already some evidence of that 'language of truth and force' which he afterwards developed in his *magnum opus* 'The Stone Guest.' A cantata on Poushkin's dramatic poem 'The Triumph of Bacchus,' begun in 1842, and transformed into a ballet-opera in 1848, was never given in its entirety. Dargomijsky's letters, highly interesting and full of thought, written during a short visit to Paris in 1844-45, show that his views of music were greatly in advance of his time,

and free from the influence of popular decree. 'The Roussalka' (The Water-Sprite), libretto from Poushkin's dramatic national legend, was a far stronger work than 'Esmeralda.' It was first performed at the Mariinsky Theatre, St. Petersburg, in 1856, but proved too novel in form and treatment to please a public infatuated with Italian opera. Besides adding the element of humour to national opera, Dargomijsky made a special feature in 'The Roussalka' of melodic recitative, in which he altogether surpassed Glinka as regards emotional expression. The comparative failure of 'The Roussalka' discouraged the composer from undertaking any new operatic work between 1856 and 1860; but this period was devoted chiefly to song-writing, a form of art in which he excelled all his Russian predecessors. His songs are extraordinarily varied in style and contents. He has left a long series of graceful and elegiac songs, and some inimitably humorous ones, in which he satirises the follies and vanities of the *tchinovnik*, or Russian official. In his oriental songs he is not content with mere local colour and tricks of style, but breathes the very spirit and passion of the East ('An Eastern Song,' 'I think that thou wert born for this,' and 'O Maid my Rose'). Wonderful laconic force and stirring emotion characterise his great dramatic ballads ('Knight-Errant' and 'The Old Corporal') and it is not too much to compare them with the ballads of Schubert and Schumann. In 1864 Dargomijsky went abroad, taking with him the scores of 'The Roussalka' and of three highly original orchestral fantasias: the Little-Russian 'Kazachok,' a 'Russian Legend' and the 'Dance of Mummers.' In France and Germany he was unable to obtain a hearing; but in Belgium, then—as later—hospitably disposed towards the Russian School, his music was enthusiastically received. During this journey the composer spent a few days in London, and was favourably impressed by the capital. On his return to Russia, Dargomijsky became closely associated with Balakirev and his disciples, and took a leading part in the formation of a national and progressive school. Under the more liberal *régime* of Alexander II., the period between 1860 and 1870 was characterised by new ideals, new standards, and freer modes of expression, alike in literature and in art. In Russia, at least, the desire for artistic reform was the logical accompaniment of a similar impulse in the political and social world. The programme of the New School, which was its formal protest against an exaggerated respect for tradition, is set forth in detail in Cui's pamphlet 'La musique en Russie.' A similar dissatisfaction with the accepted forms of opera was also being expressed by Wagner. But the Wagnerian programme was in many respects contrary to the Russian taste and temperament. The New School did not hold with the primary importance which the German master gave to the orchestra. For them, too, there existed a special means of salvation from all that had become jejune and staled by convention: Glinka, out of the primitive elements of the folk-music, had created a new and polished musical idiom, which every Russian could understand. Each member of the New School endeavoured to work out the principle of reformation for himself, guided, however, by the dominant idea that the human voice should remain the interpreter of the composer's intention, while the orchestra should be regarded as a means of supplementing and enhancing the vocal music. Guided by these principles, Dargomijsky created his last opera 'The Stone Guest' (Don Juan), sometimes called 'The Gospel of the New School.' This work represents the final stage of his development, when he had come to use with great power and facility the realistic language of 'The Roussalka' and of his finest songs. But in following out his own dictum that 'the sound must express, or echo, the word,' he evolved a new operatic form which necessitated the abandonment of the traditional divisions. Lenz described this opera as 'a recitative in three acts.' It would be truer to say that the characters repress themselves in that 'melos' or 'mezzo-recitative' which is neither song nor speech, but the connecting link between the two. Dargomijsky's respect for 'the word,' and his passion for realistic expression had led him, by completely independent methods, to a reformation as radical as that of Wagner himself. The story of Don Juan, as told by Poushkin, agrees only in its broad outline with Mozart's libretto; but it gains in dramatic force in the hands of a great poet. Dargomijsky has set the text precisely as it originally stood, and although this tends to a lack of scenic variety, there is a compensating intensity of emotional interest, while the psychological delineation is subtle and profound. Dargomijsky died in Jan. 1869, and on his deathbed entrusted the instrumentation of his opera to Rimsky-Korsakov, who carried it out in strict accordance with his directions. The composer had fixed 3000 roubles (about £330) as the price of his work, but an obsolete law made it illegal for a native composer to receive more than £160 for an opera. At the suggestion of Vladimir Stassov, the sum was raised by public subscription, and 'The Stone Guest' was performed in 1872. It did not appeal to a public accustomed only to Italian *cantilena*. The ideals which it embodied have exercised considerable influence upon the subsequent development of national opera, but time has not assured the popularity of 'The Stone Guest.' In spite of its sobriquet, this 'Gospel' has never been accepted in its entirety. Borodin and Moussorgsky revered it, but neither conformed strictly to its principles; while Cui, Rimsky-Korsakov,

Glazounov, and Liadov have gradually drawn away from this work which once seemed destined to be the rallying-point of the entire Russian School. Yet the faithful adherents of 'The Stone Guest' still believe that the 20th century may witness its vindication and triumph.

The following is a list of Dargomijsky's chief works, to which no opus-numbers are attached :—

A. OPERATIC WORKS

'Esmeralda,' libretto from Victor Hugo's *Notre Dame de Paris.*
'The Triumph of Bacchus.' Text by Poushkin. An opera-ballet in one act and two tableaux.
'The Roussalka,' libretto from a dramatic ballad by Poushkin.
'Rogdane,' an unfinished fairy opera.
Duet for Orlik and Kochubey from the unfinished opera 'Mazeppa.'
'Kamennoï Gôst,' 'The Stone Guest,' in three acts. Libretto by Poushkin.

B. VOCAL WORKS, SONGS, ETC.

Fifteen Duets.
Three Trios.
Two Quartets.
Twelve Trios or Choruses (The 'Petersburg Serenades').
About ninety songs for voice and pianoforte accompaniment.

C. FOR PIANOFORTE

'Tarantelle Slave,' for four hands.

D. ORCHESTRAL WORKS

The Little-Russian 'Kazachok,'
'Baba-Yaga,' an orchestral fantasia.
'The Dance of Mummers.' R. N.

DASH. The sign of *staccato*, written thus (ˈ), and placed under or over a note to indicate that the duration of the sound is to be as short as possible, the value of the note being completed by an interval of silence ; for example—

A round dot (·) is also used for a similar purpose, but with this difference, that notes marked with dots should be less *staccato* than those with dashes, being shortened about one half, thus—

This distinction, which is enforced by all the most celebrated teachers of modern times, such as Clementi, Czerny, and others, is, strange to say, often ignored by modern editors of classical compositions, and it is remarkable that in such valuable and conscientious editions of Beethoven's works as those of Von Bülow ('Instructive Ausgabe'; Cotta, Stuttgart), Pauer (Augener & Co., London), and others, only one sign should have been employed for the two effects. That Beethoven himself considered the distinction of importance is proved by various corrections by his hand of the orchestral parts of the Seventh Symphony, still extant, and also by a letter written in 1825 to Carl Holz, in which he expressly insists that ' and is not a matter of indifference.' See Nottebohm's *Beethoviana*, No. xxv. in which extracts are given from several of Beethoven's works, with the signs of staccato as originally marked by himself. And there can be no doubt that every effort ought to be made, at any rate in the case of Beethoven, to ascertain what were the intentions of the composer on a point so essential to correct phrasing. F. T.

DAUBLAINE ET CALLINET. Organ-builders established in Paris in 1838 as Daublaine & Cie. In 1839 the firm was joined by Louis Callinet (b. 1797) member of an old Alsatian family of organ-builders. But he brought bad fortune to the house, for in 1843 or 1844, in a fit of rage, excited by some dispute, Callinet destroyed all the work which he and his partners had just added to the organ at St. Sulpice. After this feat he retired to Cavaillé's factory as a mere journeyman. BARKER then took the lead at Daublaine's and under him the S. Eustache organ was built, to be destroyed by fire in 1845. The same year the firm became Ducroquet & Cie ; they built a new organ at S. Eustache, and exhibited at Hyde Park in 1851, obtaining a council medal and the decoration of the Legion of Honour. In 1855 Ducroquet was succeeded by a Société anonyme, and that again by Merklin, Schütze, et Cie. The business is now carried on by Merklin alone, whose principal factory is at Lyons, with a branch in Paris. V. DE P.

DAUGHTER OF ST. MARK, THE. An opera in three acts, founded on 'La reine de Chypre,' words by Bunn, music by Balfe ; produced at Drury Lane, Nov. 27, 1844.

DAUNEY, WILLIAM, son of William Dauney of Falmouth, Jamaica, was born at Aberdeen, Oct. 27, 1800. He commenced his education at Dulwich, and completed it at the University of Edinburgh. On June 13, 1823, he was called to the Scottish Bar. He found in the Advocates' Library at Edinburgh a MS. collection of music, written between 1614 and 1620, and known as the Skene Manuscript. It consists of 114 English and Scottish ballad, song, and dance tunes, written in tablature. This manuscript Dauney deciphered and published in 1838 in a 4to vol. under the title of 'Ancient Scottish Melodies from a manuscript of the reign of James VI.' He accompanied it with a long and ably written 'Dissertation illustrative of the history of the music of Scotland,' and some interesting documents. The work is valuable as showing the (probably) earliest versions of such tunes as 'The Flowers of the Forest,' 'John Anderson my jo,' 'Adieu, Dundee,' etc. Shortly after 1838 Dauney quitted Scotland for Demerara, where he became Solicitor-General for British Guiana. He died at Georgetown, Demerara, July 28, 1843. W. H. H.

DAUVERGNE, ANTOINE, violin player and composer, born at Clermont-Ferrand, Oct. 4, 1713. He was a pupil of his father, leader of the band at Clermont. In 1739 he went to Paris to complete his studies, and very soon played with success at the Concert Spirituel and entered the band of the King and of the Opera. It is, however, more as a composer of operas than as a violin player that Dauvergne claims our attention. Up to his time an opéra-

comique meant merely a vaudeville, a comic play interspersed with couplets. In his first opera, 'Les Troqueurs' (1753), Dauvergne adopted the forms of the Italian intermezzi, retaining, however, spoken dialogue in place of recitative, and thereby introduced that class of dramatic works, in which French composers have ever since been so eminently successful. Dauvergne wrote fifteen operas in all, nine of which and a ballet 'Les Amours de Tempé' are extant (see *Quellen-Lexikon*). Fétis also enumerates fifteen motets of his composition, sonatas for the violin (1739), trios for two violins and bass (1740), and two sets of symphonies in four parts (1750).

In 1755 Dauvergne bought the appointment of composer to the King and the next presentation as master of the band. From 1751 he conducted the Opera, from 1762 the Concert Spirituel, and from 1769 to 1776 was Surintendant de musique; and finally, with some interruptions, became manager of the Opera. He retired to Lyons in 1790, and died there Feb. 12, 1797. P. D.

DAVENPORT, FRANCIS WILLIAM, born 1847 at Wilderslowe, near Derby, was educated at University College, Oxford. He studied music under Sir George Macfarren, whose only daughter he married; was appointed a Professor at the Royal Academy of Music in 1879, and subsequently Examiner for the Local Examinations in connection therewith. In 1882 he was appointed a Professor at the Guildhall School of Music. Mr. Davenport's compositions include Symphonies, No. 1 in D minor (1st prize at the Alexandra Palace Competition, 1876), No. 2 in C; Overture 'Twelfth Night,' Viard-Louis Concerts, 1879; Prelude and Fugue for Orchestra, Crystal Palace, Nov. 1, 1879; six pieces for piano and violoncello, some of which were given at the Popular Concert, Nov. 24, 1879; four pieces for same; a Trio in B♭, Popular Concerts, Jan. 31, 1881, and again in 1882; two Part Songs—'Phyllis is my only joy,' and 'Sweet day, so cool'; a Christmas carol, 'Hark, hear you not'; three songs and many works in MS. He has written several books on music, viz. *Elements of Music* (1884), *Elements of Harmony and Counterpoint* (1886), and *Guide for Pianoforte Students* (with Percy Baker, 1891). A. C.

DAVID, FÉLICIEN CÉSAR, one of the most prominent of French composers, was born April 13, 1810, at Cadenet (Vaucluse), in the south of France. His father was an accomplished musical amateur, and it is said that Félicien at the age of two evinced his musical taste by shouts of applause at his father's performances on the fiddle. At the age of four the boy was able to catch a tune. Two years later Garnier, first oboe at the Paris Opera, happened to hear the child sing, and strongly advised his mother to cultivate Félicien's talent. Soon afterwards the family removed to Aix, where David attended the Maîtrise (school) du Saint Sauveur, and became a chorister at the cathedral. He is said to have composed hymns, motets, and other works at this early period, and a quartet for strings, written at the age of thirteen, is still preserved at the Maîtrise. In 1825 he went to the Jesuit college at Aix to complete his studies. Here he continued his music, and acquired some skill on the violin. He also developed an astonishing memory for music, which enabled him to retain many pieces by Mozart, Haydn, Cherubini, and Lesueur, by heart. When he left the college, at the age of eighteen, want of means compelled him to enter the office of his sister's husband, a lawyer, but he soon afterwards accepted the appointment of second conductor at the Aix theatre, which he occupied till 1829, when the position of maître de chapelle at St. Sauveur was offered to him. During the one year he occupied this place he wrote several compositions for the choir of the church; one of these, a 'Beatus Vir,' afterwards excited the admiration of Cherubini.

In 1830 David went to Paris to finish his musical education. He had a small allowance from his uncle, but his wants were moderate and his enthusiasm great. Cherubini received him kindly, and under his auspices David entered the Conservatoire, and studied harmony under Millot. He also took private lessons from Réber, and thus accomplished his course of harmony within six months. He then entered the class of Fétis for counterpoint and fugue. An 'Ave verum' composed at this time proves his successful advance. On the withdrawal of his allowance David had to support himself by giving lessons. At the same period he narrowly escaped the conscription.

In 1831 we have to date an important event in our composer's life, viz. his joining the St. Simoniens. David lived for some time in the kind of convent presided over by the Père Enfantin, and to his music were sung the hymns which preceded and accompanied the religious and domestic occupations of the brethren. When, in 1833, the brotherhood was dissolved, David joined a small group of the dispersed members, who travelled south, and were received with enthusiasm by their co-religionists at Lyons and Marseilles. The music fell to our composer's share, and several of his choruses were received with great applause.

At Marseilles David embarked for the East, where he remained for several years, at Constantinople, Smyrna, Egypt, and the Holy Land. The impressions thus received were of lasting influence on his talent. He managed wherever he went to take with him a piano, the gift of an admiring manufacturer at Lyons. Soon after his return, in 1835, he published a collection of 'Mélodies orientales' for piano. In spite of the melodious charm and exquisite workmanship of these pieces they met with total neglect, and the disappointed composer left Paris for several years, and lived in the

neighbourhood of Igny, rarely visiting the capital. Two symphonies, twenty-four quintets for strings, two nonets for wind, and numerous songs (one of which latter, 'Les Hirondelles,' was at one time very popular in England) belong to this period. One of his symphonies, in F, was in 1838 performed at the Valentino concerts, but without success. In 1841 David again settled in Paris, and his name began to become more familiar to the public, owing to the rendering of some of his songs by Walter, the tenor. But his chief fame is founded on a work of very different import and dimensions—his 'Ode-symphonie' 'Le Désert'—in which he embodied the impressions of his life in the East, and which was produced Dec. 8, 1844. The form of this composition is difficult to define. Berlioz might have called it a 'mélologue.' It consists of three parts subdivided into several vocal and orchestral movements, each introduced by some lines of descriptive recitation. The subject is the mighty desert itself, with all its gloom and grandeur. On this background is depicted a caravan in various situations, singing a hymn of fanatic devotion to Allah, battling with the simoom, and resting in the evening by the fountain of the oasis. Whatever one's abstract opinion of programme-music may be, one cannot help recognising in the 'Désert' a highly remarkable work of its kind. The vast monotony of the sandy plain, indicated by the reiterated C in the introduction, the opening prayer to Allah, the 'Danse des Almées,' the chant of the Muezzin, founded on a genuine Arabic melody—are rendered with a vividness of descriptive power rarely equalled by much greater musicians. David, indeed, is almost the only composer of his country who can lay claim to genuine local colour. His Arabs are Arabs, not Frenchmen in disguise.

The 'Désert' was written in three months. It was the product of spontaneous inspiration, and to this circumstance its enormous success is mainly due. None of David's subsequent works have approached it in popularity. 'Le Désert' was followed, in 1846, by 'Moïse au Sinaï,' an oratorio written in Germany, where David had gone on a concert-tour, and where he met with much enthusiasm not unmixed with adverse criticism. 'Moïse,' originally destined for Vienna, was performed in Paris, its success compared with that of its predecessor being a decided anti-climax. The next work is a second descriptive symphony, 'Christophe Colomb' (1847), and its success again was anything but brilliant. 'Eden, a Mystery,' was first performed at the Opéra in 1848, but failed to attract attention during that stormy political epoch. His first genuine success since 1844 David achieved with an opéra comique, 'La Perle du Brésil' (1851). His remaining dramatic works are 'La Fin du Monde' (in four acts, never performed), 'Herculanum' (serious opera in four acts; 1859 at the Opéra[1]), 'Lalla Roukh' (two acts; 1862), and 'Le Saphir' (in three acts; 1865, both at the Opéra Comique). Another dramatic work, 'La Captive,' was in rehearsal, but was withdrawn by the composer for reasons unknown.

David's power as an operatic writer seems to lie more in happy delineation of character than in dramatic force. Hence his greater success with comedy than with tragedy. 'Lalla Roukh' particularly is an excellent specimen of felicitous expression, and easy but never trivial melodiousness. Here again his power of rendering musically the national type and the local surroundings of his characters becomes noticeable. This power alone is sufficient to justify the distinguished position he holds. As to his final place in the history of his art it would be rash to hazard a definite opinion. Félicien David died at St.-Germain-en-Laye on August 29, 1876. For the last seven years of his life he had been librarian to the Conservatoire, and in 1869 succeeded to the chair of the Académie vacant by the death of Berlioz. Since his death several of his works—'Le Désert' and 'Lalla Roukh' amongst the number—have been revived with much success in Paris, and his quartets were occasionally played.

An essay on David's life and works up to 1854 is found in the collection called Mirecourt's *Contemporains*. For the earlier part of his life a brochure (*Biographie de F. David*, Marseilles, 1845, out of print), by M. Saint-Étienne, is a valuable source. F. H.

DAVID, Ferdinand, one of the best and most influential violin players and teachers of Germany; born at Hamburg, June 19, 1810. His musical talent showed itself very early, and after two years' study at Cassel in 1823 and 1824 under Spohr and Hauptmann, he entered, when still a mere boy, on that artistic career which was destined to be so eminently successful.

His first appearance at the Gewandhaus at Leipzig, with which he was afterwards so closely identified, was in 1825, in company with his sister Louise—ultimately famous as Mme. Dulcken. He passed the years 1827 and 1828 as a member of the band of the Königstadt Theatre, Berlin, where he first became acquainted with Mendelssohn. In 1829 he accepted an engagement as leader of a quartet in the house of a noble and influential amateur at Dorpat, whose daughter he subsequently married. He remained in Russia till 1835, making frequent and successful tours to St. Petersburg, Moscow, Riga, etc. In 1836 Mendelssohn, on becoming conductor of the Gewandhaus concerts, obtained for him the post of leader of the band (Concertmeister), which he filled with distinction and success until his death. [On the foundation of the Conservatorium in 1843, David was

[1] It is said that in 'Herculanum' a great many pieces from the 'Fin du Monde' have been embodied.

appointed violin professor, also by Mendelssohn's influence.] Of the intimate nature of their connection a good instance is afforded by the history of Mendelssohn's Violin Concerto. It is first mentioned in a letter from Mendelssohn to David, dated July 30, 1838. Constant letters on the subject of the work passed between them during the process of composition; hardly a passage in it but was referred to David's taste and practical knowledge, and canvassed and altered by the two friends; and he reaped his reward by first performing it in public at the Gewandhaus concert of March 13, 1845.[1] The autograph is now in the possession of David's family. In like manner 'Antigone' (letter of Oct. 21, 1841), and probably many another of Mendelssohn's works, was referred to him; and he was one of the three trustees to whom the publication of the MS. works of his illustrious friend was confided after his death.

As a virtuoso David combined the sterling qualities of Spohr's style with the greater facility and piquancy of the modern school; as a leader he had a rare power of holding together and animating the band; while as a quartet player his intelligence and tact enabled him to do justice to the masterpieces of the most different periods and schools. Among numerous compositions of the most various kinds his solo-pieces for the violin are most pleasing and effective, and are so founded on the nature and character of the instrument as to be indispensable to the student. As a teacher his influence was probably greater than that of any preceding master, and to him the German orchestras owe many of their most valuable members. He took a warm personal interest in his pupils, amongst whom the most eminent are Joachim and Wilhelmj. Within the sphere of his influence he was always ready to help a friend or to further the true interests of musical art and artists.

It is one of David's special merits that he revived the works of the eminent violin players of the old Italian, German, and French schools, which he edited and published with accompaniments, marks of expression, etc. He also edited nearly the whole classical repertory of the violin for purposes of study, and took a prominent part in the critical editions of the works of Beethoven, Haydn, and other great masters. His unremitting activity was as earnest as it was quick. He was particularly fond of intellectual pursuits, was eminently well read, full of manifold knowledge and experience. His conversation abounded in traits of wit and humour, he was a pleasant companion, a faithful friend, and an exemplary husband and father.

In 1861 the twenty-fifth anniversary of his appointment as leader was celebrated at Leipzig. He died very suddenly, July 18, 1873, while on a mountain excursion with his children, near Klosters in the Grisons. He was buried at Leipzig, where he was highly honoured, and where a street was named after him.

[1] See details in the programme of the Crystal Palace Saturday Concert, Dec. 9, 1871.

Among his numerous compositions the five violin concertos, a number of variations, and other concert pieces for the violin hold the first rank. He also published for piano and violin 'Bunte Reihe,' 'Kammerstücke,' etc. Besides these, two symphonies, an opera 'Hans Wacht,' a sextet and a quartet for strings, a number of songs and concert pieces for trombone and other wind instruments, deserve to be mentioned. His 'Violin School' is certainly one of the best works of the kind, and the publication of the 'Hohe Schule des Violinspiels' (a collection of standard works of old violinists) marks an epoch in the development of modern violin-playing. H.

[His son, PETER PAUL DAVID, born Dec. 1, 1840, in Leipzig, was leader of the orchestra at Carlsruhe from 1862 to 1865; he came to England about the latter year, and has been for many years master of the music at Uppingham School.]

DAVIDDE PENITENTE. A 'cantata' for three solo voices, chorus, and orchestra, to Italian words by an unknown author, adapted by Mozart in 1785 from his unfinished mass in C minor (K. 427), with the addition of a fresh soprano and fresh tenor air, for the widows' fund of the Society of Musicians (Tonkünstler-Societät); and performed on March 13 and 15, 1785, in the Burgtheatre at Vienna.

DAVIDE, GIACOMO, a very great Italian tenor, better known as 'David le père,' born at Presezzo, near Bergamo, in 1750. Possessing a naturally beautiful voice, he made the best use of it by long and careful study. To a pure and perfect intonation he joined good taste in the choice of style and ornament. Having studied composition under Sala, he was able to suit his *fioriture* to the harmony of the passage he wished to embroider; but he was even more distinguished in serious and pathetic music, and that of the church, than in bravura. Lord Mount-Edgcumbe heard him at Naples in 1785, and thought him excellent in opera. In that year he went to Paris, sang at the Concert Spirituel, and made a great sensation in the 'Stabat' of Pergolesi. Returning to Italy, he sang during two seasons at the Scala. In 1790 he was at Naples again, and in 1791 he came to London. Owing, however, to the Pantheon having been licensed as the King's Theatre, it was impossible to obtain a licence for the Haymarket Theatre, at which Davide was engaged, except for concerts and ballets. This, and the want of good singers to support him, prevented him from becoming as well known here as he deserved. 'He was undoubtedly the first tenor of his time,' says Lord Mount-Edgcumbe, 'possessing a powerful and well-toned voice, great execution as well as knowledge of music, and an excellent style of singing. He learned to

pronounce English with tolerable correctness, and one of his last performances was in Westminster Abbey, at the last of the Handel festivals.' In 1802 he was at Florence; and, although fifty-two years of age, had still all his old power, and was able to sing every morning in some church, and at the opera every evening. He returned in 1812 to Bergamo, where he was appointed to sing at the church of Santa Maria Maggiore. It is said that he sang at Lodi in 1820; but he was then no more than the shadow of his former self. He formed two pupils, one of whom was his son, and the other Nozzari. Davide died at Bergamo, December 31, 1830.

2. His son, GIOVANNI, was born in 1789, and long enjoyed the reputation in Italy of a great singer, though his method of producing his voice was defective, and he frequently showed want of taste, abusing his magnificent voice, with its prodigious compass of three octaves comprised within four B flats. He had, however, a great deal of energy and spirit, and his style was undoubtedly original. He made his début at Brescia in 1810, and sang with success at Venice, Naples, and Milan. He was engaged at the Scala for the whole of 1814. In the autumn of that year he was first employed by Rossini in his 'Turco in Italia.' Rossini then wrote rôles for him in 'Otello' (1816), 'Ricciardo e Zoraide' (1818), 'Ermione' and 'La Donna del Lago' (1819). In 1818 he sang at Rome, Vienna, and London. Ebers had made overtures to him in 1822, and his engagement was on the point of completion, when he was engaged for seven years by Barbaja, who at that time directed the operas of Naples, Milan, Bologna, and Vienna. Davide appeared in London in 1829, singing, among other operas, with Mrs. Wood in Pacini's 'L'Ultimo Giorno di Pompei'; but he was *passé*, and his voice so unsteady that he was obliged to conceal its defects by superfluity of ornament. He arrived in Paris in the same year. His voice had now become nasal, and his faults of taste and judgment more apparent. Yet, with all these faults, he was able occasionally to rise to a point that was almost sublime. Édouard Bertin, a French critic, said of him, 'It is impossible for another singer to carry away an audience as he does, and when he will only be simple, he is admirable; he is the Rossini of song. He is a great singer; the greatest I ever heard.' After his return into Italy, Davide sang at Milan and Bergamo in 1831, at Genoa and Florence in 1832, at Naples in 1832, 1834, and 1840, at Cremona and Modena in 1835, at Verona in 1838, and at Vienna in 1839. He retired in 1841 to Naples, where he founded a school of singing, which was not much frequented. A few years later he accepted the post of manager at the Opera of St. Petersburg, and is said to have died there about 1851. J. M.

DAVIDOV, CHARLES, eminent violoncellist and composer, born at Goldingen in Courland, March 17, 1838, took his mathematical degree at the Moscow University in 1858. Shortly afterwards he chose the musical profession and studied the violoncello under Schmidt in Moscow, and Schuberth in St. Petersburg. Composition he studied under Hauptmann in Leipzig. His first appearance in public was at the Gewandhaus Dec. 15, 1859, after which he became leading violoncellist in that orchestra and professor at the Conservatorium *vice* Grützmacher. In 1862 he was appointed first violoncello to the St. Petersburg Opera, and shortly afterwards to a professorship at the Conservatoire. From 1876 to 1886 Davidov was director of this institution, and his reign was marked by most benevolent measures in favour of poor students. The number of scholarships was greatly increased, and free quarters found for the impecunious. Davidov died at Moscow, Feb. 15, 1889, of angina pectoris. He made his first appearance in London at the Philharmonic, May 19, 1862, in a concerto of his own. In the first edition of this Dictionary the following criticism of his playing occurs:—'His tone was expressive, his intonation certain, especially in the higher registers, his execution extraordinary, and there is great individuality in his style.' His compositions are distinguished by an elegiac grace and melancholy and occasionally by glowing passion. His works include: Symphonic Sketch for Orchestra (op. 27) and Orchestral Suite (op. 37). For violoncello: four Concertos (opp. 5, 14, 18, 31), the Russian Fantasia (op. 7), and numerous small pieces of which the best known are 'Adieu,' 'Solitude,' and 'Am Springbrunnen'; Pf. Quintet (op. 40), String Quartet (op. 38), and Sextet (op. 35). His songs (op. 26) are exceedingly popular. He has also written an admirable *School for the Violoncello*. R. N.

DAVIDSBÜNDLER. An imaginary association of Schumann and his friends, banded together against old-fashioned pedantry and stupidity in music, like David and his men against the Philistines. The personages of this association rejoiced in the names of Florestan, Eusebius, Raro, Chiara, Serpentinus, Jonathan, Jeanquirit, etc., and their displays took place in the pages of the *Neue Zeitschrift für Musik*, Schumann's periodical. It was Schumann's half-humorous, half-melancholy way of expressing his opinions. He himself, in the preface to his *Gesammelte Schriften* (Leipzig, 1854), speaks of it as 'an alliance which was more than secret, since it existed only in the brain of its founder.' The Davidsbündler did not confine themselves to literary feats; their names are to be found in Schumann's compositions also. Florestan and Eusebius not only figure in the Carneval (op. 9), but the Grande Sonate, No. 1 (op. 11), was originally published with their names, and so was the set of pieces entitled 'Davidsbündler' (op. 6). The most humorous of all these utter-

ances is the 'Marche des Davidsbündler contre les Philistins,' which winds up the Carneval, and in which the antiquated 'Grossvatertanz' is gradually surrounded and crushed by the strains of the new allies. G.

DAVIDSON, G. H., a name notable in modern days as one of the pioneers of cheap music publishing. His early introduction to the public was his collection of Charles Dibdin's songs, the first attempt towards a complete gathering up to that time. This had the music to the principal songs, and was prefaced by a memoir by George Hogarth. It was issued in an octavo volume by How & Parsons in 1842. Before 1847 Davidson had turned publisher of both literary and musical works, his address being Water Street, Bridge Street, London. In 1847 he had published his first volume of 'The Universal Melodist,' an interesting work in two volumes, the second bearing the date 1848. This had appeared in parts along with a re-issue of the Dibdin Collection. In 1848 he had changed his place of business to 19 Peter's Hill, Doctors' Commons, and from here did an immense business in the issue of cheap and popular music. He purchased the copyright of most of Henry Russell's songs, and published sheet music under the title 'The Musical Treasury.' About 1856 his principal publications, including the above and his Russell's songs, appear to be transferred, and are issued with the imprint 'The Musical Bouquet Office, 192 Holborn.' So late as 1859 some few publications bear the name 'Davidson' or the old address 19 Peter's Hill. F. K.

DAVIES, BENJAMIN GREY, known as BEN DAVIES, was born Jan. 6, 1858, at Pontardawe, near Swansea, and was the son of an engineer, who died when his eldest son was only seven years old. Having learnt on the Tonic Sol-Fa system, the boy had already become a member of a choir that competed at an Eisteddfod at Carmarthen. His is a curious instance of a boyish alto voice passing into a tenor. He kept his alto voice until he was fifteen years old, when he sang in Caradog's choir at the Crystal Palace; soon afterwards his voice broke, and for five years he earned his living in a store at Swansea, until he was twenty, when, having won a prize at the Swansea Eisteddfod on Good Friday, 1877, he was enabled to enter the Royal Academy of Music, where he remained from 1878 to 1880, studying with Signor Fiori, and getting much valuable advice from Mr. Randegger. A performance of the 'Hymn of Praise' by the Academy students in 1879 led to his obtaining an engagement to sing the tenor solos in 'St. Paul' in Dublin; and at another Academy performance, where he enacted the garden scene from 'Faust,' Carl Rosa offered him an engagement to sing regularly in opera. His début on the stage took place at Birmingham in 'The Bohemian Girl' on Oct. 11, 1881, in which opera he appeared for the first time in London at Her Majesty's Theatre, Jan. 25, 1882. On the production of Goring Thomas's 'Esmeralda,' and Mackenzie's 'Colomba,' he sang small parts, and filled a more important part in Stanford's 'Canterbury Pilgrims' in 1884, in which he appeared with Miss Clara Perry, who became his wife in 1885, when both artists left the Company. For a few months, until the end of 1886, Davies was a member of J. W. Turner's Opera Company; and in February 1887 he joined the company that was playing Cellier's 'Dorothy' at the Prince of Wales's Theatre, in which he played the part of Geoffrey Wilder for more than two years. He also appeared in 'The Red Hussar,' and other light operas; but as time went on his energies were more and more constantly turned towards concert-singing, and ever since his first festival appearance at Norwich in 1890 he has been in almost constant request for meetings of the kind. In 1891 he undertook another operatic engagement, with D'Oyly Carte at the English Opera House, where he appeared as Ivanhoe in Sullivan's opera, and as Clément Marot in Messager's 'Basoche.' Since his first visit to the United States in 1893, when he sang at the World's Fair at Chicago, he has crossed the Atlantic almost every year, and his success in America is as great as in England. Since the retirement of Edward Lloyd, Davies has taken the chief position among English tenors, and his artistic way of singing, his fine voice, and the geniality of his disposition, which is entirely free from the effeminacies and affectations to which many tenors are prone, have made him an universal favourite. An interesting article on him, from which much of the above information is taken, appeared in the *Musical Times* for August 1899. M.

DAVIES, DAVID THOMAS FFRANGCON-, was born Dec. 11, 1860, at Bethesda, Carnarvon; educated at Friar's School, Bangor, and at Jesus College, Oxford, where he gained a classical exhibition, and graduated B.A. and M.A. in due course. Shortly after taking his degree he took Holy Orders, which he subsequently relinquished on a point of doctrine; and finally, sometime after leaving the church, he became a professional singer, having a baritone voice of limited compass. He had sung tenor as an amateur for years, but the true character of his voice was discovered by Mr. Edwin Holland during his undergraduate days. His first musical education was received entirely from his father, an amateur musician. He received vocal instruction at the Guildhall School of Music from Mr. Richard Latter, and later from Messrs. Shakespeare and Randegger. His compass extended to over two octaves, from E to *b′* flat, of pure baritone quality. On Jan. 6, 1890, he made his first appearance in public at a 'De Jong' concert, Manchester. On April 26

he made his début on the stage as the Herald in 'Lohengrin' at Drury Lane with the Carl Rosa Company—'A pure baritone voice, his enunciation perfect' (*Athenæum*). In the autumn he appeared at the Hovingham Festival, and on Nov. 3 sang with success at the Popular Concerts, the 'Belle Dame sans Merci' and other songs of Stanford. On Jan. 31, 1891, he was the original Cedric on the production of Sullivan's 'Ivanhoe' at the English Opera House. Since this Mr. Ffrangcon-Davies has almost entirely confined himself to concerts, his engagements comprising in 1893 the Hanley Festival; in 1895 the Cardiff Festival; and in 1896 again at Hanley, where on Oct. 30 he sang at the first performance of Elgar's 'Saga of King Olaf'; 1896 at the Henschel Concerts, etc. Between 1896 and 1898 he sang at all the principal concerts and festivals in America and Canada. From 1898 to 1901 he resided at Berlin, and sang with great success in the various cities of Germany and Switzerland. On March 10, 1900, on a visit to England, he sang at the Symphony Concerts, Queen's Hall, and showed strong dramatic feeling in Loewe's fine ballad, 'Edward.' In 1901 he returned permanently, and made a very great success in the part of Elijah at the Queen's Hall; and his rendering of that music may be said to be the turning-point in his career. He repeated the part in Oct. 1 and 8, 1902, at the Sheffield and Cardiff festivals. On May 2, 1903, he sang Somerville's 'Ballad of Thyra Lee,' at the Philharmonic Concert; he took part in the Richard Strauss festival in the same year, and on June 6, he sang at the Roman Catholic Cathedral, Westminster, at the first performance in London of Elgar's 'Gerontius'; and on Oct. 14, at the Birmingham Festival, in the production of the same composer's 'Apostles.' His more recent engagements comprise the Royal Choral Society in Coleridge Taylor's 'Hiawatha,' the Richter Concerts in Wagner and the Elgar Festival at Covent Garden, March 1904. He has also earned celebrity for his fine lieder singing.

At the end of 1903 Mr. Ffrangcon-Davies was appointed a teacher of singing at the Royal Academy of Music. He has written a work on vocal training, not yet published. A. C.

DAVIES, FANNY, a distinguished pianist, comes of a musical stock, her mother's father, John Woodhill, of Birmingham, having been well known in his day as a violoncello player. She was born in Guernsey, June 27, 1861. Her early instruction on the piano was given her by Miss Welchman and Charles Flavell, both of Birmingham. Harmony and counterpoint she studied there with A. R. Gaul. In 1882 she went to Leipzig for a year, and took lessons on the piano with Reinecke and Oscar Paul, and in fugue and counterpoint with Jadassohn. In Sept. 1883 she removed to the Hoch Conservatorium at Frankfort, where she studied for two years in close intercourse with Madame Schumann, and where she acquired the accurate technique, the full tone, fine style, and power of phrasing, which have raised her to a leading position among Madame Schumann's successors. At Frankfort she added to her musical knowledge by a year's study in fugue and composition under Dr. B. Scholz. Her first appearance in England was at the Crystal Palace, Oct. 17, 1885, in Beethoven's G major Concerto; on Nov. 16 she played at the Monday Popular Concerts (Bach's Chromatic Fantasia and in Schumann's Quartet in E♭), and on April 15, 1886, Bennett's C minor Concerto at the Philharmonic. These were the beginnings of a series of constant engagements at all the leading concerts in town and country. In Berlin she first played with Joachim, Nov. 15, 1887, and at the Gewandhaus, Leipzig, Jan. 5, 1888. [Although her playing of Schumann and Brahms is what chiefly distinguishes her from her contemporaries, her musical tastes are of the widest, and she has brought forward new works too numerous to mention, interpreting them with very remarkable skill, sympathy, and insight.] G.

DAVIES, HENRY WALFORD, Mus.D., the son of an enthusiastic amateur musician, was born at Oswestry, Sept. 6, 1869. In early childhood he displayed rare musical gifts of a high order; his appointment as a chorister of St. George's Chapel, Windsor, in Jan. 1882, brought him into the best musical surroundings of the day, for, soon after his appointment, Sir Walter Parratt became organist of the chapel, and from 1885 to 1890 Davies was his pupil and assistant, holding at the same time the post of organist at Park Chapel, Windsor. In 1890 he gained a composition scholarship at the Royal College of Music, where his studies went on under Parry, Stanford, and Rockstro. In the year in which he entered the College, he was appointed organist of St. Anne's, Soho, but ill-health compelled him to give up the post after a year. In 1891 he was appointed organist of Christ Church, Hampstead; he took the degree of Mus.B. at Cambridge in 1892, and that of Doctor in 1898. From 1895 to 1903 he was professor of counterpoint in the Royal College, and in 1898 was appointed organist of the Temple Church, in succession to Dr. E. J. Hopkins who retired in that year. He has worthily preserved the best musical traditions of the church, and his remarkable skill as a choir-trainer has borne excellent fruit there. At the beginning of 1903 he was appointed conductor of the Bach Choir. He has won success in many forms of composition, but it is perhaps in concerted chamber music that his most remarkable achievements have been made. His first composition, the quartet in E flat for piano and strings, was played at Mr. Dannreuther's concerts in 1893 (repeated at the Royal College and elsewhere); two of his

sonatas for piano and violin have attained to the rare distinction of being published in London, and have been played there with success; he has made several interesting experiments in using solo instruments and solo voices in combination, as in a setting of Browning's 'Prospice' for bass voice and string quartet (1895, given by Bispham in 1896), a 'Nonet' for vocal quartet, string quartet, and pianoforte (Broadwood Concerts, Jan. 1904); and the original form of his Ps. xxiii. was for voice, string quartet, and harp. Of his choral works, the cantata 'Hervé Riel' attracted a good deal of attention when performed at the Royal College in 1895, and a setting of an arrangement of the mystery-play 'Everyman' is announced for the Leeds Festival of 1904. The complete list of Dr. Davies's published works is as follows:—

Op. 1. Madrigal, 'Weep you no more.'
,, 2. 'Hervé Riel,' baritone solo, chorus, and orchestra.
,, 3. Six Songs.
,, 4. Four Songs of Innocence. Part-songs for female choir.
,, 5. Sonata, pianoforte, and violin, in E minor.
,, 6. 'Prospice' (Browning), baritone solo, and string quartet.
,, 7. Sonata, pianoforte and violin, in D minor.
,, 8. Ps. xxiii., tenor voice, violin, and pianoforte.
,, 9. Anthem, 'God created man.'
,, 10. Two love-songs, by Burns, for tenor voice.
,, 11. 'The Three Jovial Huntsmen,' cantata, choir and orchestra.
,, 12. Morning and Evening Service in G.
,, 13. The Clown's Songs in 'Twelfth Night.'
,, 14. 'The Temple,' oratorio (Worcester Festival, 1902).
,, 15. Six Pastorals (nonet for four voices, string quartet, and piano.
,, 18. Cathedral Service, Morning, Evening, and Communion.
,, 17. 'Everyman,' cantata.

Without opus numbers.

Five anthems, Evening Service in C. Three carols. Glee, 'The Sturdy Rock,' 'Hymn before Action' arranged for male choir from op. 3, 'Song of Rest' for choir. Sacred Cradle Song.

Besides the above many important works have been brought forward, which are still unpublished.

Odes by Milton and Swinburne, for chorus and orchestra. 'Dedication Overture,' 1893; Symphony in D (Crystal Palace, 1895); Orchestral Variations.

Chamber Music.

Three quartets for piano and strings (E flat, 1893, D, 1894, and C, 1896.) Two string quartets, D and C. Two sonatas for piano and violin, in A and E flat. Three pieces for pianoforte and violin. Sonata for horn and piano. Pianoforte pieces and songs. M.

DAVIES, the MISSES MARIANNE and CECILIA. Marianne was born in 1744, and first appeared at Hickford's rooms on April 30, 1751, when she played a concerto for the German flute, and a concerto by Handel on the harpsichord, besides singing some songs. About 1762 she achieved much more repute for her skill on the harmonica, or musical glasses, then recently much improved by Franklin. Cecilia, born about 1750, won considerable renown as a vocalist. She appeared at the Theatre Royal, Dublin, in November 1763, and in 1764 (*Dublin Journal*, 3811). She seems to have made her first public appearance in London, on August 10, 1767, in 'some favourite songs from the operas of "Artaxerxes" and "Caractacus."' In 1768 the sisters quitted England and went to Paris, and Vienna. Whilst there the sisters lodged in the same house as Hasse, and soon became great favourites at court; they taught the Archduchesses, Maria Theresa's daughters, to sing and act. Metastasio wrote and Hasse composed an ode, performed June 27, 1769, which was sung by Cecilia, accompanied by Marianne on the harmonica. Metastasio, in a letter dated Jan. 16, 1772, describes the beautiful tone of the instrument, and the admirable manner in which Cecilia assimilated her voice to it, so as to render it difficult to distinguish the one from the other. From Vienna the sisters went to Milan, where Cecilia appeared in 1771, with great success, in the opera of 'Ruggiero,' written by Metastasio and composed by Hasse, being the first Englishwoman accepted in Italy as *prima donna*. The Italians bestowed on her the sobriquet of 'L' Inglesina,' and confessed her to be superior to any Italian singer but Gabrielli. She afterwards sang at Florence. In 1773 the two ladies returned to London, where Cecilia appeared at the Italian Opera in October with the greatest success. She is described as having no great power or volume of voice, but a remarkably neat and facile execution. She sang in Sacchini's 'Lucio Vero,' on Nov. 20. In the following year she sang at the Hereford Festival. She subsequently revisited Florence, and performed there until about 1784, when she returned to England in poor circumstances. She sang after her return from Florence at the Professional Concert on Feb. 3, 1787, and made her first appearance in oratorio in 1791 at Drury Lane, soon after which she fell into great poverty. Marianne's nerves had become so seriously affected by her performance on the harmonica (a so frequent result of continued performance on the instrument as to have occasioned official prohibition of its use in many continental towns), that she was compelled to retire from her profession. She died in 1792, and Cecilia shortly afterwards also ceased to perform. About 1817 she published a collection of six songs by Hasse, Jommelli, Galuppi, etc. During the last years of her life she was assisted by the National Fund, the Royal Society of Musicians, etc. She survived until July 3, 1836, having for years suffered from the accumulated miseries of old age, disease, and poverty. See *Dict. of Nat. Biog.* W. H. H.; with additions and corrections by W. B. S.

DAVIES, MARY, born Feb. 27, 1855, in London of Welsh parents. She was taught music and singing by her father, an amateur, for over fifty years precentor at his chapel, where she made her first appearance as a singer at the age of eight. On June 12, 1873, she made her début in public at Brinley Richards's Concert, Hanover Square Rooms. In the same year she gained the Welsh Choral Union Scholarship at the Royal Academy of Music, where she studied singing under Randegger, and in 1876 gained the Parepa-Rosa Gold Medal, and in 1877 the Nilsson prize. While a student, on April 8, 1875, she sang in the 'Woman of Samaria,' at a concert of Sterndale Bennett's works, given by the Academy at St. James's Hall, and at the Welsh Choral Union Concerts;

on Oct. 28, 1876, she made her début at the Crystal Palace; on Feb. 24, 1877, sang the part of Elsie on the production of Smart's Cantata 'The Fisher-maidens'; on March 24, sang in Beethoven's 'Elegische Gesang,' etc., at the Crystal Palace Centenary Concert of the composer's birth, and on March 29, at the Philharmonic, on the production in London of the third part of Schumann's 'Faust.' On Jan. 5, 1878, she made her first appearance at the London Ballad Concerts, at which concerts she afterwards sang for many years as principal soprano vocalist; on Jan. 19, at the Popular Concerts, and in the autumn at the Worcester Festival. On Feb. 5 and March 11, 1880, she sang with the greatest success the part of Margaret on the production in England, in its entirety, under Hallé at Manchester, of Berlioz's 'Faust,' and on May 21 and 22, repeated the part under the same conductor at St. James's Hall, and for many years under him in London, Manchester, and elsewhere. In 1881 she sang the part at the Norwich and Huddersfield Festivals, and in 1888 at the Richter Concerts, between which years she sang in 1882 and 1883 at the Chester, Gloucester, and Wolverhampton Festivals, and on Nov. 20, 1886, she sang the part of Mary on the production at the Crystal Palace of Berlioz's 'Childhood of Christ.' She sang frequently in the provinces in oratorio, in which it was always her ambition to excel, principally in the works of her predilection, the 'Messiah,' 'St. Paul' and 'Hymn of Praise,' but in London it was as a ballad and 'lieder' singer she achieved her greatest measure of success at the concerts already mentioned, and elsewhere. She was the possessor of a mezzo-soprano voice of two octaves and a note from *b* to *c'''*, of limited power but very sweet, always perfectly produced and of great charm. In 1888 she married Mr. William Cadwaladr Davies of the Inner Temple and North Wales Circuit. In 1900 she finally retired from public, and now (1904) lives at Worthing. A. C.

DAVIS, THOMAS. An English composer of some degree of merit, who about the middle of the 18th century worked for Henry Waylett, a publisher, of Exeter Change. Of his compositions, Waylett issued two sets of 'VI Solos for a German Flute or Violin with Bass for the Harpsichord,' 'Twenty English and Scotch airs,' and some sets of country dance tunes, one being for the year 1751. F. K.

DAVISON, JAMES WILLIAM, was born in London, Oct. 5, 1813.[1] He was educated with a view to the Bar, but forsook that career for music, and studied the pianoforte with W. H. Holmes, and composition with G. A. Macfarren. His early friends were W. S. Bennett, H. Smart, T. M. Mudie, E. J. Loder, and other musicians. He composed a great deal for orchestra, piano, and the voice, and will be remembered by some elegant and thoughtful settings of poetry by Keats, Shelley, and others. He made the acquaintance of Mendelssohn during one of his early visits to England, and deepened it in 1836, when, in company with Sterndale Bennett, he attended the production of 'St. Paul' at Düsseldorf. He gradually forsook composition for criticism.[2] In 1842 he started the *Musical Examiner*, a weekly magazine which lasted two years; and in 1844 succeeded G. A. Macfarren, sen., as editor of the *Musical World*, which continued in his hands down to his death. Mr. Davison contributed to the *Saturday Review* for ten years, and for long to the *Pall Mall Gazette*, and *Graphic*. But it was as musical critic of the *Times* that his influence on music was most widely exercised. He joined the staff of that paper in 1846, and his first articles were those on the production of 'Elijah' at the Birmingham Festival of that year. But Mr. Davison's activity in the cause of good music was not confined to newspaper columns. He induced Jullien in 1844 to give classical pieces in his Promenade Concerts. The Monday Popular Concerts, in their present form (see POPULAR CONCERTS), were his suggestion; and the important analyses contained in the programme-books were written by him down to his death. So were those for Hallé's recitals, and it is unnecessary to call attention to the vast range of works which these covered. All these efforts were in support of the best and most classical taste; so was his connection with Arabella Goddard, whose studies he directed from 1850, and who under his advice first made the English public acquainted with Beethoven's Sonatas, opp. 101 to 111 (excepting op. 106, which had been played by Billet), and many another masterpiece. He married Miss Goddard in the spring of 1859, and they had two sons, Henry and Charles.

While adhering, as we have described, to the classical school up to Mendelssohn and Bennett, his attitude to those who came later was full of suspicion and resistance. Of Schumann, Gounod, Liszt, Wagner, and Brahms, he was an uncompromising opponent. In regard to some of them his hostility greatly changed in time, but he was never cordial to any. This arose partly from dislike to their principles of composition, and partly from jealousy for his early favourites. He even resisted the advent of Schubert to the English public on the latter of these grounds, though he was more than reconciled to his music afterwards. Certainly his opposition did not proceed from ignorance, for his knowledge of new music was large and intimate. Whether it be a good trait in a critic or not, it is a fact that a nature

[1] His mother, *née* Duncan, was an eminent actress, and was chosen by Byron to deliver his monody on Sheridan at Drury Lane Theatre.

[2] This was humorously embodied in an epigram by his friend Charles Kenney in the *Musical World* for March 28, 1863, p. 203:—

There was a J. W. D.
Who thought a composer to be:
But his muse wouldn't budge,
So he set up as judge
Over better composers than he.

more affectionate and loyal to his friends never breathed than Davison's. His increasing age and infirmities at length made him give up the *Times*, and his last articles appeared Sept. 9-13, 1879. His knowledge and his extraordinary memory were as much at the service of his friends as the keen wit and grotesque humour—often Rabelaisian enough—with which he poured them forth. He was very much of a Bohemian. An autobiography from his pen would have been invaluable, but he could never be induced to undertake it. His musical publications include some songs and pianoforte pieces; he edited some old harpsichord music for the piano, and wrote 'An Essay on the works of Chopin.' He died at Margate, March 24, 1885, and was buried in Kensal Green Cemetery. G.

DAVY, JOHN, was born in the parish of Upton Helions near Exeter, Dec. 23, 1763. From his earliest infancy he discovered a remarkable propensity for music. By the advice of the Rev. Mr. Eastcott, he was articled to Jackson of Exeter in 1777. Some years afterwards Davy came to London, and obtained employment in the orchestra of Covent Garden Theatre and as a teacher. [After the publication of his vocal quartets, madrigals, and sonatas,] his ability for composition soon became known, and he was engaged to supply music for several dramatic pieces. After upwards of twenty years of such employment his frame gave way under the pressure of infirmities rather than of age, and he gradually sank until he died, in May's Buildings, St. Martin's Lane, Feb. 22, 1824. He was buried in St. Martin's churchyard on Feb. 28 following, and there is reason to believe that his remains were reinterred at Camden Town. Davy composed the music for the following dramatic pieces:—'What a Blunder!' 1800; 'Perouse' (with J. Moorehead), 1801; 'The Brazen Mask' (with Mountain), 1802; 'The Cabinet' (with Braham and others), 1802; 'The Caffres' (with others), 1802; 'Rob Roy,' 1803; 'The Miller's Maid,' 1804; 'Harlequin Quicksilver,' 1804; 'Thirty Thousand' (with Braham and Reeve), 1805; 'Spanish Dollars,' 1805; 'Harlequin's Magnet,' 1805; 'The Blind Boy,' 1808; 'The Farmer's Wife' (with others), 1814; 'Rob Roy Macgregor,' 1818; 'Woman's Will, a Riddle,' 1820. Also an overture and other music for Shakespeare's 'Tempest' performed in conjunction with the songs of Purcell, Arne, and Linley.

Many of Davy's songs gained great popularity, 'Just like love,' 'May we ne'er want a friend,' and 'The Death of the Smuggler,' have perhaps passed out of remembrance, but 'The Bay of Biscay' retains, and in all probability will long retain, its place in the public favour. W. H. H.

DAVY or DAVYS, RICHARD, a composer of some repute, was choirman, organist, and *informator choristarum* at Magdalen College, Oxford, from 1490 to 1492. MS. 178 of the library of Eton College still contains six five-part motets by him, but four other pieces, including a 'Gaude flore virginali' in six parts, and a 'Passio Domini' in four parts, which were formerly included in the same manuscript, have now disappeared either wholly or in part. [See *Archæologia*, vol. lvi. pp. 89-102, in which is an account of the Eton MS. by Mr. W. Barclay Squire, F.S.A.] Of Davy's secular compositions we have an example in three three-part songs with English words, preserved in the Fayrfax manuscript in the British Museum (Add. MS. 5465); and single parts of music by Davy are contained in Harl. MS. 1709, the Cambridge University Library, and St. John's College. J. F. R. S.

DAY, ALFRED, M.D., the author of an important theory of harmony,[1] was born in London in January 1810. In accordance with the wishes of his father he studied in London and Paris for the medical profession, and, after taking a degree at Heidelberg, practised in London as a homœopathist. His father's want of sympathy for his musical inclinations in his earlier years having prevented him from attaining a sufficient degree of practical skill in the art, he turned his attention to the study of its principles, and formed the idea of making a consistent and complete theory of harmony, to replace the chaos of isolated rules and exceptions, founded chiefly on irregular observation of the practice of great composers, which till comparatively lately was all that in reality supplied the place of system. He took some years in maturing his theory, and published it finally in 1845, three years only before his death in London, Feb. 11, 1849.

In this work there was hardly any department in which he did not propose reforms. For instance, in view of the fact that the figures used in thorough-bass did not distinguish the nature of the chord they indicated—since the same figures stood for entirely different chords, and the same chords in different positions would be indicated by different figures—he proposed that the same chord should always be indicated by the same figures, and that its inversions should be indicated by capital letters A, B, C, etc., placed under the bass, so that the chord of the seventh in its various positions would be indicated as follows:—

as under the old system. And whenever a chord had also a secondary root, as the chord of the augmented sixth, it would be indicated by a capital letter with a line drawn through it, and lines also drawn through the figures which indicated the intervals derived from that secondary root.

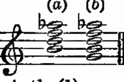
[1] *Treatise on Harmony*, by Alfred Day. Royal 8vo. Harrison & Co.

With respect to the differences of opinion about the minor scale, he insisted with determined consistency that the principles of its construction precluded the possibility of its containing a major sixth or a minor seventh, and that the only true minor scale is that with a minor sixth and major seventh, the same ascending and descending; and his concluding remarks are worth quoting as characteristic:—'This scale may not be so easy to some instruments and to voices as the old minor scale, therefore let all those who like it practise that form of passage, but let them not call it the minor scale. Even as a point of practice I deny the old minor scale to be the better; as practice is for the purpose of overcoming difficulties, and not of evading them.' The principle which throughout characterises his system is to get behind the mere shallow statement of rules and exceptions to the underlying basis from which the exceptions and rules will alike follow. Thus, in dealing with the theory of false relations, he points out that the objectionable nature of contradictory accidentals, such as C♮ and C♯ occurring in the same chord, or in succeeding chords or alternate chords, arises from the obscurity of tonality which thereby results, and which must always result when accidentals imply change of key: but since accidentals under particular circumstances do not imply change of key, contradictory accidentals are not necessarily a false relation; and he gives as an extreme instance, among others, the succession of the chords of the subdominant and supertonic in the key of C, in which F and F♯ follow one another in different parts in successive chords.

Proceeding after the same manner in his discussion of forbidden progressions of parts, he points out that as the objectionable effect of consecutive fifths is caused by the two parts seeming to move simultaneously in two different keys, there are cases in which the progression of the bass on which they are founded would prevent that effect and render them admissible; as, for instance, when the bass moves from Tonic to dominant, as in the Pastoral Symphony of Beethoven,

The most important part of his theory, and that which most distinguishes it, is its division of styles into Strict or Diatonic, and Free or Chromatic, and the discussion of the fundamental discords which can be used without preparation. His explanation of the 'Chromatic system' was quite new, and his prefatory remarks so well explain his principles that they may be fitly quoted. After pointing out that the laws of diatonic harmony had been so stretched to apply them to modern styles that they seemed 'utterly opposed to practice,' he proceeds—'Diatonic discords require preparation because they are unnatural; chromatic do not because they may be said to be already prepared by nature'—since the harmonics of a root note give the notes which form with it the combinations he calls fundamental discords. 'The harmonics from any given note are a major third, perfect fifth, minor seventh, minor or major ninth, eleventh, and minor or major thirteenth.' And this series gives the complete category of the fundamental chords of Day's chromatic system. Moreover, with the view of simplifying the tonal development of music, and giving a larger scope to the basis of a single key—and thereby avoiding the consideration of innumerable short transitions—he gives a number of chromatic chords as belonging essentially to every key, though their signatures may not be sufficient to supply them, and with the same object builds his fundamental discords on the basis of the supertonic and tonic as well as on the dominant. In respect of this he says—'The reason why the tonic, dominant, and supertonic are chosen for roots, is because the harmonics in nature rise in the same manner; first the harmonics of any given note, then those of its fifth or dominant, then those of the fifth of that dominant, being the second or supertonic of the original note. The reason why the harmonics of the next fifth are not used, is because that note itself is not a note of the diatonic scale, being a little too sharp, as the fifth of the supertonic, and can only be used as part of a chromatic chord.' The advantages of this system of taking a number of chromatic chords under the head of one key will be obvious to any one who wishes for a complete theory to analyse the progressions of keys in modern music as well as their harmonic structure. For instance, even in the early 'Sonate Pathétique' of Beethoven, under a less comprehensive system, it would be held that in the first bar there was a transition from the original key of C minor to G; whereas under this system the first modulation would be held to take place in the 4th bar, to E♭, which is far more logical and systematic.

The detailed examination of the series of chords which have been summarised above is very elaborate. In most cases his views of the resolutions, even of well-known chords, are more varied and comprehensive than is usual with works on harmony, and point to the great patience and care bestowed on the elaboration of the theory. The most salient points of this part of the work are the reduction of well-known chords and their recognised and possible resolutions under the author's system of fundamental discords. The chord of the diminished seventh (*a*) he points out to be the first inversion of that of the minor ninth (*b*); and though this inversion, in which



the root is omitted, is decidedly more common than the original chord (*b*), yet the latter is to be found complete—as is also the major ninth, without omission of the root—in the works of the great masters; and that on tonic and supertonic as well as dominant roots. The chord of the dominant eleventh, when complete (as *c*), is hardly likely to be found unabridged; and it is even doubtful whether any examples of its first position exist, even with some notes omitted, which can be pointed to with certainty as an essential chord. But in this scheme the chord is important as giving in its fourth inversion the chord known as the added sixth (*d*), in which case, the fifth of the original chord is at the top and the root and third are omitted, and the free treatment which has generally characterised this formerly isolated chord fully agrees with the rest of the principles of the system. This chord of the eleventh, unlike the others in the series, can only be used on the dominant, because if used on either the tonic or supertonic it would resolve out of the key. The last chord of the series is that of the major or minor thirteenth on either of the before-mentioned roots; of which the whole chord on the dominant of C (for example) would stand as (*e*). It is not suggested that all these notes occur at once, but that the discordant ones have their own proper resolutions, which they will follow in whatever positions they may be combined; their resolutions being liable to modification by the omission of any notes with which they form dissonances. The commonest and smoothest form of the chord is which will be readily recognised; and there are various resolutions given of the interval which makes the thirteenth with the root in this combination. One of the resolutions of the minor thirteenth deserves special consideration, namely, that in which it rises a semitone while the rest of the chord moves to tonic harmony. This makes the chord appear to be the same as that which was and is commonly known as that of the sharp fifth, as (*f*). To the whole doctrine of a sharpened fifth Dr. Day strongly opposed himself, and maintained that the two chords marked (*g*) and (*h*) in the example were identical; and brought to bear both mathematics and practical experiment to prove it. The combinations and resolutions which result from his views of the nature of this chord are some of them very curious and original, and would probably be impossible if the chord were not a minor thirteenth but a sharp fifth. Still, the case against the sharp fifth cannot be said to be thoroughly substantiated, and the singular results of his views in this special case are not to be found in great numbers in the works of composers.

The chord of the augmented sixth he derives from the primary harmonics arising from a primary root, and the secondary harmonics arising from a secondary root. Thus in the following chord in the key of C, the lower note A♭ he explains to be the minor ninth of the dominant root, and the remaining three notes to be the seventh, ninth, and third of the supertonic or secondary root; both these notes being already recognised as capable of being taken as roots in any key. The progressions of the component notes of the chord are the same as they would be in their positions in the respective fundamental discords of tonic and supertonic of which they form a part. His views of the capacity of the interval of the augmented sixth for being inverted as a diminished third are opposed to the practice of the greatest composers, who though they use the inversion rarely use it with great effect. He says: 'This interval should not be inverted, because the upper note being a secondary harmonic and capable of belonging only to the secondary root, should not be beneath the lower, which can only belong to the primary root.' As in his views with respect to the sharp fifth and the minor thirteenth, the question cannot be said to be definitely settled. Thus the musical feeling of people of cultivated taste may still count for something, and it seems probable that if the inversion were vicious Bach and Beethoven would not have used it.

This is not the place to point out in what respects Dr. Day's hypothesis is vulnerable; theorists of very high standing repudiate the chords of the eleventh and thirteenth, and even cast doubts on the essential nature of the ninths; but whatever may be said of its hypothetical and as yet incompletely substantiated views it must be confessed that no other theory yet proposed can rival it in consistency and comprehensiveness. The strong adhesion given to it by one of our most distinguished musicians, the late Sir G. A. Macfarren, should be sufficient to recommend it; and the study of it, even if it lead to dissent on some points, can hardly fail to be profitable. C. H. H. P.

DAY, Major Charles Russell, the great authority on Indian music, was the only son of the Rev. Russell Day, rector of Horstead, Norwich, and was born in 1860. He was educated at Cheam and Eton, and in 1880 joined the 3rd Royal Lancashire Militia. In 1882 he was gazetted to the first battalion of the Oxfordshire Light Infantry, and soon afterwards was ordered to India, where he remained for five years, and was severely wounded in

Malabar, in 1885. During the period of his service in India he became profoundly learned in Oriental music, being instructed entirely by native musicians. The result of his studies was the splendid book, *The Music and Musical Instruments of Southern India and the Deccan.* The book was published in 1891 by Novello & Co. He had been promoted to be captain in 1889, he served as adjutant to the second volunteer battalion, Middlesex Regiment, from 1892 (in which year he married) till 1897. He drew up the very valuable catalogue of the musical instruments exhibited at the Military Exhibition in Chelsea, in 1890 (published by Eyre & Spottiswoode). He took an active part in founding and promoting the cause of the short-lived Wind Instrument Chamber Music Society, he served on the English committee of the musical exhibition in Vienna (1892), and was invited to form one of a committee of advice for the Paris Exhibition of 1900. He was gazetted major in 1899. He was mortally wounded in the South African war, in the attack upon Cronje at Paardeberg, Feb. 18, 1900, while helping a wounded man. An interesting obituary notice, by the late A. J. Hipkins, appeared in the *Musical Times* of April 1900, from which the above particulars are taken. M.

DAY, JOHN, one of the earliest of English musical typographers, began printing about 1547 in Holborn, a little above the Conduit. He afterwards dwelt 'over Aldersgate beneath Saint Martyns' (*i.e.* in the upper room over the gate itself), and subsequently had a shop in St. Paul's Churchyard. He used the motto 'Arise, for it is Day,' which was probably intended as a reference to the introduction of the Reformed religion, as well as a punning allusion to his own name. On March 25, 1553, he obtained a licence to print 'A Catechism in English with an A B C thereunto annexed,' and also the works of John Poynet, Bishop of Winchester, and Thomas Beacon, Professor of Divinity. He subsequently procured a patent to be granted to him and his son Richard for printing the Psalms, etc. He was the printer of Foxe's *Acts and Monuments.* In 1582 he was Master of the Stationers' Company. He died July 23, 1584. The musical works printed by Day were 'Certaine Notes set forth in foure and three partes to be sung at the Morning, Communion and Evening Prayer,' 1560;[1] 'The whole Booke of Psalmes in foure partes which may be sung to all Musicall Instruments,' 1563, reprinted in 1565; 'Songes of three, fower and five voyces composed and made by Thomas Whythorne,' 1571. 'The Psalmes of David' by William Damon, 1579. [DAMAN.] W. H. H.

DEANE, THOMAS, Mus.Doc., born in the latter half of the 17th century, was organist at Warwick and Coventry. He composed a service and other church music, and in 1703 the instrumental music for Oldmixon's tragedy 'The Governor of Cyprus.' He is said to have been the first to perform a sonata of Corelli in England in 1709. Compositions by him for the violin are contained in 'The Division Violin.' He graduated as Doctor of Music at Oxford, July 9, 1731. W. H. H.

DEBAIN, ALEXANDRE FRANÇOIS, keyed instrument maker, born in Paris, 1809. Originally foreman in a pianoforte factory, but in 1834 established a factory of his own. Distinguished himself by the invention of several musical instruments, amongst others the Harmonium, or Orgue expressif, patented 1840. He died in Paris, Dec. 3, 1877.

DEBORAH. An oratorio of Handel's, the words by Humphreys; completed Feb. 21, 1733; first performed at the King's Theatre, Haymarket, March 17, 1733. No less than 14 of the airs and choruses are adapted, or transferred, from other works of Handel's—Dixit Dominus (1707); the Passion (1716); the ode on Queen Anne's birthday (1715); the Coronation Anthems (1727). 'Deborah' was revived by the Sacred Harmonic Society, Nov. 15, 1843.

DEBUSSY, CLAUDE ACHILLE, French composer, was born at St.-Germain-en-Laye, August 22, 1862, was educated at the Paris Conservatoire, and, on quitting the class of E. Guiraud, obtained the grand prix de Rome in 1884 with a cantata, 'L'Enfant Prodigue,' a work considered as one of the most remarkable of modern student-exercises. From Rome Debussy sent a setting of Rossetti's *Blessed Damosel*—'La Damoiselle Élue,' for solo, female choir, and orchestra; one is reminded of the experience of Berlioz with his 'Mort de Cléopâtre,' in the fact that the Section des Beaux-Arts of the Institut refused the work on account of its excessive modernity of style. Since that rebuff, the composer has remained true to his convictions, and has occasionally, it must be confessed, perpetrated things likely to offend musicians' prejudices unnecessarily. A series of works, most interesting in their refinement and depth of expression, in the handling of unexpected harmonic and melodic ideas, has appeared since that time. Debussy has written an orchestral suite, a string quartet, a 'prélude symphonique' to Mallarmé's *Après-midi d'un Faune*, and six 'ariettes' to words of Verlaine, a poet who has never been so well translated into music as by Debussy and Gabriel Fauré. Five 'Poèmes de Baudelaire,' four 'Proses lyriques,' the 'Chansons de Bilitis' (P. Loüys), many songs, two orchestral pieces, 'Nuages' and 'Fêtes,' a suite of pieces for piano, 'Images,' etc., preceded his *chef-d'œuvre*, the lyric drama, on Maeterlinck's 'Pelléas et Mélisande' (Opéra Comique, Paris, April 30, 1902). The originality and independence of the conception, the way in which the 'remoteness' of the play is

[1] A copy of the Bassus part is in the Bodleian (Douce, B. 248). A copy was sold at Sotbeby's (imprint in Tenor) in the Strood Park Library Sale, July 9-15, 1886, as No. 1363.

reflected in the unusual harmonic progressions, etc., excited much discussion, and the many conflicting opinions made the opera the most important of recent musical events in Paris. 'Chimène' (on a poem of Catulle Mendès), another opera, is as yet incomplete. G. F.

DECANI. See CANTORIS.

DECLAMATION, DECLAMATORY. Both these words imply a condition of things in which the words are of primary, the music of secondary, importance. They are used in several special senses. (i.) 'Declamatory' music, whether in opera or not, is always more or less dramatic; in moments of excitement, of anger, or even of rapture, it is the custom to allow the voice to approach near the confines of speech as distinguished from song, and to abandon the pure vocalisation which is generally associated with lyrical utterance. Thus the 'declamatory' and 'lyrical' styles are often opposed to each other in ordinary parlance. The contralto part in 'Elijah,' for example, requires both styles, the former for the air, 'Woe unto them,' and the scene of Jezebel, the latter for 'O rest in the Lord.' (ii.) 'Declamation' is often used as the equivalent of the German 'Melodram' (see MELODRAMA); in which the speaking voice is accompanied with music, as in the grave-digging scene in 'Fidelio,' and many other operas, among which may be mentioned the greater part of Humperdinck's 'Königskinder.' But 'Declamation' is more strictly confined to certain works of art of smaller calibre than operas, or 'Melodramas,' viz. to ballads such as Schubert's 'Abschied von der Erde,' Schumann's 'Schön Hedwig' (Hebbel), op. 106; 'Vom Haideknabe' (Hebbel), and Shelley's 'Fugitives,' op. 122. Hiller's 'Vom Pagen und der Königstochter' (Geibel) is a slighter specimen. In these 'ballads for declamation,' the accompaniment is always for pianoforte, and as a kind of impromptu adjunct to recitations, the same instrument came into use some years ago in connection with the recitals of the late Clifford Harrison. A long series of 'Recitation Music,' *i.e.* compositions for piano intended to accompany the declamation of various well-known poems, was written by Mr. Stanley Hawley, and a shorter series by Sir A. C. Mackenzie came out about the same time. A more important work was the musical accompaniment to Tennyson's *Enoch Arden* by Richard Strauss (1902). (iii.) The word 'Declamation' is often used, with rather doubtful propriety, as the equivalent of 'accentuation' when it is desired to say that a vocal piece of music has been written with such careful regard to the natural accent of the words, that the accented notes of the melody coincide with the accented syllables of the words, and that the musical curve of the song, so to speak, describes the same pattern as that of the poem. In this case the declamation is said to be good. Probably no composer has ever surpassed or equalled Wagner in this particular; constantly the musical phrase seems to have been suggested by the natural rise and fall of the voice in speaking the words; and all through his later works music and words are so closely united that both seem to have sprung simultaneously from his brain. It is no doubt this same quality which Milton praised so highly in the famous sonnet to Henry Lawes, and which has been exhibited by so very few of the English composers between the days of Lawes and those of Parry, a composer who has always been remarkable for the excellent 'declamation' of his phrases. M.

DECRESCENDO, decreasing—the opposite of crescendo—consists in gradually lessening the tone from loud to soft. It is also expressed by *dec.*, *decresc.*, and by the sign >. Whether there was originally any difference between decrescendo and diminuendo or not, at present the two terms appear to be convertible. There is a splendid instance of the thing, where both words are used, at the end of the first section of the Finale of Schubert's Symphony in C, No. 9, in a decrescendo of 48 bars from *fff*, the bass at the same time going down and down to the low G.

DEDEKIND, CONSTANTIN CHRISTIAN (1628-1697). Probably born April 2, 1628, at Reinsdorf (Anhalt-Cöthen), where his father Stephan (d. 1636) was pastor. He was a pupil of Christoph Bernhard (vice-capellmeister in Dresden, appointed cantor in Hamburg, 1664). From 1654 he was a member of the Dresden Hofcapelle; in a 1663 list of the 'Choralisten' his name appears among the basses. From 1666 to about 1676, he was concertmeister, which meant at first that he was to direct the 'kleine deutsche Musik' in the Schlosskirche, but later on the capelle was divided, the Italian singers were placed under the capellmeister, the German singers, cantor, and organist under the concertmeister. He was a member of the Elbischen Schwanen-Orden, and took the pseudonym of *Concord*, usually written Con Cor D or Con Cor Den, as in the volume of poems '1681 Jahres ausgegäben von Con Cor Den.' He held the position of Steuer-Einnehmer (collector of taxes) in Meissen and the Erzgebirge. He died in 1697 at Dresden. Judged by the number of his works, he was very popular both as poet and composer at the Dresden Court. He was said to be particularly successful at arranging the words for sacred musical dramas, such as: *Neue geistliche Schauspiele, bequemt zur Musik.* Dresden, 1670 and 1676, 8vo; *Freuden- und Trauerspiel über die Geburt Jesu.* Dresden, 1670, 8vo; *Heilige Arbeit über Freud und Leid der alten und neuen Zeit,* in *Musik bequemten Schauspielen angewendet.* Dresden, 1676, 8vo; *Altes und neues in geistlichen Singspielen vorgestellt.* Dresden, 1681, 8vo. The letters K. g. P. and K. S. C. after his name mean 'Kurfürstlicher gekrönter Poet' and 'Kurf. Sächsischer Concertmeister,' they occur in the title-page—'Des

Durchleuchtig Hochgebohrnen Fürsten, Herrn Friedrich Wilhelms, des jungern Herzogs zu Sachsen eilften Gebuhrts-Tag, 1667, mit einem Singe-Spiele . . . von C. C. Dedekinden, K. g. P. und K. S. C. Dresden, 4to.

List of works :—

1. J. Katzens Aeltern-Spiegel aus desselben Holländischem gehoochdeutschet durch C. C. D., 1854. Dresden, 8vo.—'Zusingen nach ihrer eigenen Zustimmunge,' with the music. In one volume with 'J. Katzens Masanissa u. Sofonisba' and 'Holländischer Ehe-Betrog' gehoochdeutschet durch C. C. D. Later editions in 1658 and 1665.

2. C. C. D. Churf. Sächs. Hofmusici Aelbianische Musen-Lust in 160 unterschiedlicher berühmter Poeten auserlesener, mit anmuthigen Melodien beseelten Lust- Ehren- Zucht- und Tugend-Liedern bestehend. Dresden, Wolfgang Seyferten, 1657, obl. 4to. Four parts in one volume, the melodies by C. C. D. At the beginning a letter was printed from Heinrich Schütz (Kurfürstl. Kapellmeister in Weissenfels), to C. C. D. 'gekrönter Poet,' stating that he considered both poetry and music well worthy of publication; dated Sept. 2, 1657. Another edition 'Darinnen 175 der besten Dicht-Meistern anmuthige Zucht- und Tugend-Lieder unter anständige Arien gelegt.' Leipsig, Georg Hein. Froman, 1665.

3. Geistliche Erstlinge in einstimmigen Concerten gesetzt. Dresden, Seyfert, 1662.

4. Die doppelte Sangzälle worinnen XXIV. Davidische Psalmsprüche in einstimmiger Partitur nach allen Sachtmannischen und heutiger Capell-Manier enthalten. Leipzig, Christian Kirchuer, 1663, fol.

5. Davidische geheime Musik-Kammer, darinnen XXX. Psalmsprüche enthalten. Dresden, Seyfert, 1663, fol. Another edition. Frankfurt, Caspar Wächter, 1665, fol.

6. Süsser Mandel-Kärnen erstes und zweites Pfund von ausgekärneten Salomonischen Liebes-Worten in XV Gesängen mit Vohr-Zwischen- und Nach-Spielen auf Violinen zubereitet. Dresden, Seyfert, 1664, fol., 2 vols. Another edition:—Erstes und anderes Pfund süsser von Jesus Liebe, wie auch erstes und anderes Pfund bittere von Jesus Leiden handelnder Mandel-Kärnen, diese mit 3 Violen, jene mit 2 Violinen und einem Fagotto, zu den auserlesensten poetischen Liedern vierstimmig gesetzt, mit vor- zwischen- und nach-Spielen. Frankfurt. Caspar Wächter, 1665, fol. and 4to. (Göhler).

7. Aelbanians wertester Hirtenknabe Filareto. Dresden, 1665, fol.

8. Davidisches Harfen-Spiel d. i. der ganse Psalter, in neue Lieder, nach denen evangelischen Kirchenmelodien abgefasst, und mit eigenen wohlklingenden Gesangweisen versehen. Frankfurt, Caspar Wächter, 1665.

9. Belebte oder ruchbare Myrrhen-Blätter das sind zweistimmig beseelte heilige Leidens-Lieder. Dresden, Seyfert, 1666, fol., pp. 52, C. C. D. described these duets as 'nicht so gahr gemeine, sondern mit Kunst-ahrtigen, und Wort-mässigen Melodien versehene Lieder' ('not ordinary songs, but provided with artistic melodies suitable to the words').

10. Davidischer Harfenschall mit schönen Melodeien gezieret. Frankfurt, B. C. Wust, 1670, 12 mo.

11. C. C. D.'s Kuhrfürstl. Sächs. bestallten deutschen Concert-Meisters sonderbahrer Seelen-Freude, oder kleinerer geistlichen Concerten, Erster Theil. Dresden, Seyfert, 1672, 4to, 6 part-books. Published in two parts.

12. C. C. D.'s Musikalischer Jahrgang und Vesper-Gesang von dreien Theilen darinnen CXX, auf Sonn- Fest- und Apostel-Taage, geschiklich auserlesene, zur Sänger-Uebung, nach rechter Capell-Manier gesetzte Deutsche Concerten durchgehends mit zweien Discanten befindlich. Dresden, Paul August Hamann, 1673, 4to, 3 part-books. These Concerten are so arranged, that 'ein Componist . . . solche mit ein paar Violinen zur mehreren Anmuth, auch mit einem singenden Basso ausschmukken kann' ('a composer can give them much charm by the addition of some violins or a singing Basso'). Later editions 'in zwei Singstimmen und der Orgel' in 1678 and 1694.

13. Königs Davids Göldnes Kleinod, oder hundert und neunzehender Psalm, nach eigener Abteilung, in zwei und zwanzig Stukken, mit dreien Concertirenden Singe- dreien Instrumental- und vier ausvöllenden Capell-Stimmen, componiret von C. C. D. der Zeit Kurf. Sächs. bestelltem deutschen Concertmeister. Dresden, Hamann, 1674-1675, 4to, 11 part-books.

14. C. C. D.'s Singende Sonn- und Fest-Tage Ahndachten. Dresden, Michael Günther, 1683, 4to.

15. J. Frentzel, A. et O Jesus! Zehen andächtige Buss-Gesänge . . . nicht nur wie zuvor mit bekannten sondern auch mit Herrn Const. Christ. Dedekindens . . . neu beigefügten Melodeyen herfür gegeben. Leipzig, 1655, 8vo.

16. Geschwinder und seliger Abschied, der . . . Frauen Annen Margareth . . Metzner am 8 Wintermonats, 1670 . . . am 15 beerdigt. Dresden, Seyfert. 'Herr Jesu wer dir lebt,' 8 Strophes in 4 parts with Basso Continuo, fol.

17. Gottes stäte Liebe . . . wegen der . . . Fru Annen Sibyllen . . des Herrn Paul Hofmanns . . Ehe-Liebsten . . . 1664. Dresden, Seyfert, fol. 'Was ihr jetzt vertraut der Erden,' 8 Strophes in 4 parts, with Basso Continuo.

In the dedication to a book of poems 'wegen allgemeiner Pest- Noht-gepflogen und entworfne Buss- und Dank- Bäht- und Lob-Ahndachten ausgegäben,' Dresden, Christoph Baumann, 1681, 12mo, addressed to Johann Georg III. of Saxony, C. C. D. says 'sie werden nicht verschmähen das graue Alter des Unverdrossensten welcher die hohe Kuhr.-Fürstl. Gnade nun 35 Jahre genossen' (asks him not to despise the grey old age of C. C. D. who had enjoyed the court favour for thirty-five years); dated Sept. 7, 1681.

Dedekind, Euricius (1585-1619), born at Neustadt (Sachsen-Weimar); was a brother of Henning Dedekind; was a scholar in Lüneburg, and later cantor of the Johanniskirche there (*circa* 1585 to 1592). He died in 1619.

List of works :—

1. Newe Teutsche Liedlein, aus den zwölff ersten Psalmen Davidis und andern Sprüchen dar Schrift genomen, und mit dreyen Stimmen gemacht durch Euricium Dedekindum Cantorem zu Lüneburg zu S. Joh. *Discantus*. Gedruckt zu Ulssen bey Michel Kröner, 1565, obl. 4to. In the British Museum.

2. Antidota, adversus vite hominum Passiones, 4 voc. Ulyssae, Michel Kröner, 1589. (Eitner.)

3. Evangeliorum, quae diebus Dominicis et Festis praecipuis in Eccl. Dei quotannis usitate proponi solent, periochae breves ab Adventu Dom. usque ad Festum Paschatis 4 et 5 vocibus compositae ab Euricio Dedekind Neostadino. Scholae Lüneburg ad D. Joannem Cantorē. Ulyssae, 1592, 8vo. (Göhler.)

Dedekind, Henning (1585-1630), a son of Friedrich Dedekind (author of *Grobianus*; pastor of St. Michael's, Lüneburg). He was probably born at Neustadt. In 1588 was cantor at the School in Langensalza, Thuringia; in 1614 was Prediger there; and in 1622 was Pfarrer at Gebsee, Thuringia. He probably died about 1630.

List of works :—

1. ΔΩΔΕΚΑΤΟΝΟΝ Musicum Triciniorum novis iisdemque lepedissimis exemplis illustratum. Neue auserlesene Tricinia, auf treflich lustige Texte gesetzet, aus etlichen guten, doch bisher nicht publicirten Autoribus zusammen gelesen und jetzt erstmals den Liebhabern der Music zu gefallen in den Druck verfertiget, von Henningo Dedekindo, Musicae Studioso. Erfurt, Georg Baumann, 1588, obl. 4to. In the dedication to Ernst and August, Fürsten of Braunschweig and Lüneburg, Henning Dedekind expresses gratitude both for the favour shown to him, and for that shown by their father Wilhelm to his father 'Friderico Dedekindo, deren ich auch, als ein Erbe, nicht wenig genossen haben . . . datum in der Churf. Sächs. Stadt Langensalz am Sontag Palmarum . . . anno 1588. Henningus Dedekindus, Cantor daselbe.' Three part-books, in the Berlin Königl. Bibl.

2. Eine Kinder-Musik, für die jetzt allererst anfangenden Knaben in richtige Fragen und grundliche Antworten gebracht. Erfurt, Georg Baumann, 1589, 8vo.

3. Praecursor metricus musicae artis . . . non tam in usum discipulorum quam in gratiam praeceptorum, conscriptus . . . ad nundinas Lipsicas vernes anni hujus 1590. Erfurt, Georg Baumann, 1590, 8vo.

4. Studentenleben, darinn allerlei akademische Studenten-Händel mit deutsch poetischen Farben entworfen, in fünf Stimmen gesetzt von Musophilus Dedekind. Erfurt, Joh. Birckner (1627).

5. Jägerleben, darinn die Jägergesellschaft beneben allerlei in Wald und Feld gewöhnlichen Wildjagden mit deutsch poetischen Farben entworfen und repraesentirt; mit fünf Stimmen auf allerlei Instrumente zu gebrauchen, componirt von Musophilus Dedekind. Erfurt, Fried. Melchior Dedekind (1628.)

6. ΔΩΔΕΚΑΣ musicarum deliciarum Soldaten-Leben darinnen allerlei martialische Kriegshändel und der ganze Soldatenstand auch was in Feldlagern und Kriegszügen vorleufft, mit deutsch poetischen Farben eigentlich abgerissen und mit fünf Stimmen zum Gebrauch für allerlei Instrumente vorgesetzt von Musophilus Dedekind. Erfurt, bei Fried. Melchior Dedekinden, 1628, 4to.

Zahn gives a melody by Musophilus Dedekind, 'Gott Vater aller Gütigkeit,' from the 'Gothaer Cantional' II., 1648, p. 324; he suggests that Musophilus may be Henning Dedekind. The MS. of a Kyrie and Gloria from a 6-part mass, 'In excelso throno,' by Henning Dedekind, is in the Breslau Stadtbibl. (MS. 100. Six folio part-books.) The title-page of a non-musical work by Henning Dedekind is of interest as it includes the names of father and son: 'Metamorphosis truculenta et subita, quae accidit anno 1585, irbente Apolline descripta und publicata per Henningum Dedekindum, neostadianum Saxonem, accesserunt epigrammata tria M. Friderici

Dedekindi senioris, Pastoris ad D. Michaelum, Lüneberg.' C. S.

DEFESCH, WILLIAM, a Fleming by birth, was organist of the church of Notre Dame at Antwerp, and in 1725 succeeded Alfonso D'Eve as chapel-master there, but was in 1731 dismissed on account of his ill-treatment of some of the choir-boys under his charge. He then came to England, and established himself in London, where, in 1733, he produced an oratorio entitled 'Judith,' which enjoyed some degree of popularity, and in 1745 another called 'Joseph.' Whilst at Antwerp he composed a mass for voices and orchestra. His published works comprise several sets of sonatas and concertos for stringed and other instruments, some solos for the violoncello, and a collection of canzonets and airs, and some single songs. [See list in *Quellen-Lexikon.*] He was an able violinist. An engraved portrait of him was published in London in 1757. He died about 1758. W. H. H.

DEGREE. The word 'degree' is used to express the intervals of notes from one another on the stave. When they are on the same line or space they are in the same degree. The interval of a second is one degree, the interval of a third two degrees, and so on, irrespective of the steps being tones or semitones, so long as they represent a further line or space in the stave. Hence also notes are in the same degree when they are natural, flat, or sharp of the same note, as C and C♯, E and E♭; and they are in different degrees when, though the same note on an instrument of fixed intonation, they are called by different names, as F♯ and G♭, C and D♭♭. C. H. H. P.

DEGREES IN MUSIC. The ordinary degrees in music are those of Bachelor (B.Mus. or Mus.Bac.), and Doctor (D.Mus. or Mus.Doc.); but the University of Cambridge, under its recent regulations, grants three degrees—Bachelor, Master, and Doctor—the 'Mastership in Music' having, it would seem, been unknown since the 13th century, when some Spanish universities granted that degree. The degree of D.Mus. *honoris causâ* has been occasionally given to distinguished musicians, both British and foreign, by various universities, the custom dating from 1871 at Cambridge, and from 1878 at Oxford (there were however earlier instances at Durham). It has also been given by special Decree of Convocation at Oxford to Sir Hubert Parry, and by special Grace of the Senate at Cambridge to Sir C. V. Stanford. In their ordinary forms, musical degrees are unknown beyond Great Britain and Ireland, certain British colonies, and the United States of America (the first of these classes being alone treated in this article); but there have been a few examples of foreign honorary doctorates in music, Spontini and Franz having received that distinction from the University of Halle, and Andreas Romberg from the University of Kiel—one or two other cases are also known. Generally, however, foreign universities, when honouring musicians, have conferred honorary doctorates in Philosophy, as on Mendelssohn, Schumann, Brahms, and others; as in this country the honorary D.C.L. and LL.D. are given to persons entirely unconnected with law, among whom have been several musicians, who have thus sometimes received two honorary degrees from the same university, and frequently the same honorary degree from several—a custom apparently unusual abroad, at any rate with respect to musicians.

UNIVERSITY OF OXFORD.—The history of musical degrees at both the old English universities is consistently anomalous and obscure. Their holders never seem to have been recognised as on the same level as the ordinary graduates; they were never required to reside, and the 'disputation' necessary in early times for all other degrees was never, it would appear, exacted from them. Until past the middle of the 19th century no formal examinations were instituted, and very little regularity of procedure existed, though the Laudian statutes of 1636 made certain provisions which are still in force. Sometimes the degrees, especially the Doctorate, seem to have been of a vaguely honorary character, as in the cases of Haydn's D.Mus. and the degree declined by Handel; though they never, except perhaps in the earliest times, were honorary in the strict modern sense, Haydn, for example, having, though the degree was offered, to submit some kind of an exercise. And in the more ordinary cases where the candidate had to support his application by some evidence of work, it took the form of a composition or exercise of no very fixed character, which seems not infrequently to have been considered a more or less formal matter, though we hear of some applicants being rejected, and in the absence of much really definite record it is very difficult to dogmatise. The first Oxford B.Mus. of whom we have knowledge was Robert Wydow (? 1499), the first Oxford D.Mus. Robert Fayrfax (1511); but there is little doubt that the degrees were of considerably older standing. It seems on the whole probable that they originated in the custom of giving degrees in the single arts of the Trivium and Quadrivium, and that they were in some respects similar to the long extinct degrees in grammar, though probably of greater dignity, grammar ranking as one of the arts of the Trivium, and music as one of the higher Quadrivium. The B.Mus. degree conferred at Oxford the right of reading and lecturing on the books of Boethius; the holders of the D.Mus. degree do not seem to have been in any way expected, even formally, to be teachers. As far as can be gathered, the 'exercise' seems, at first at any rate, to have been regarded not so much as a test of the candidates' qualifications as an element in the music that formed part of the ceremonies at the University 'Act,' and on other public occasions.

The 'Music Act,' however, existed to some extent independently of degree exercises; the most important one on record took place in 1733, when Handel was specially invited to conduct several of his oratorios, including 'Athalia,' which was written for the occasion. When the 'Acts' fell into disuse, the performances of candidates' exercises continued as a mere matter of form independently of public ceremonies, till their abolition in recent years. The 'Music Lecture' or 'Speech' was a survival of the mediæval custom which required all newly appointed Masters of Arts to lecture on each portion of the Quadrivium, and had no original connection with the musical degrees. It seems in very early times to have been unsatisfactory, and was very often excused; later on it came to be given once a year, at the time of the Music Act, the lecturer being, as before, a freshly-created M.A. The first regular Lectureship in Music was founded in 1626 by William Heather; but after the tenure of John Allibond, a Master of Arts of Magdalen, no one could be found to take it, and the stipend was given to the deliverer of the music speech at the Act. Heather, however, also founded weekly practices of music under a Choragus; the practices were soon dropped, and the Choragus (afterwards, it is uncertain when, called Professor) seems, apart from perhaps examining the candidates' exercises, to have had no particular duties to perform till 1856, when lectures were required from him (Crotch had, however, previously given some of his own accord). In 1848 the offices of Professor and Choragus were divided (the latter being practically nominal, and still remaining so); and in 1856 a further office of Coryphæus or Precentor was instituted, but has since been abolished.

In 1862 the faculty was entirely reformed by Ouseley, who instituted formal examinations for both degrees, and regularised the hitherto very vague 'exercise.' There has been no material change in the nature of the examinations since that date: but several alterations in other matters have been made. In 1870 candidates were required to matriculate, and in 1877 were further required to pass Responsions or a recognised equivalent: in 1890, however, the University took a regrettably backward step in instituting a special 'Preliminary Examination for Students in Music' as a 'soft option' to Responsions. In 1890 the public performance of the Doctorate exercise was abolished (that of the exercise for the lower degree having been long since excused): and at the same time Sir John Stainer instituted various lectures and courses of instruction, given by resident graduates as deputies of the professor—a custom continued by the present professor, Sir Hubert Parry. In the early part of 1903 some useful legislation was passed, systematising the examinations with respect to fees and some other matters. The present regulations are as follows:—Candidates must pass Responsions, or an equivalent examination, or the 'Preliminary Examination for Students in Music,' which comprises two out of the five languages, Latin, Greek, French, German, and Italian. *Regulations for the B.Mus. degree.*—(1) First examination, consisting of Four-part Harmony and Counterpoint. (2) An exercise, being a vocal composition in five parts with accompaniments for a string band. (3) Final examination, including Five-part Harmony and Counterpoint, Fugue, the History of the Art of Music, Instrumentation and Musical Form, with a critical knowledge, tested *viva voce*, of certain prescribed scores. (The custom hitherto has been to set four papers, Harmony, Counterpoint, Fugue and Canon, and History.) *Regulations for the D.Mus. degree.*—(1) An exercise, being a secular or sacred cantata scored for a full orchestra. (2) Final examination, including Eight-part Harmony and Counterpoint, Original Composition, Instrumentation, and the History of the Art of Music. (The custom hitherto has been to set five papers, Harmony, Counterpoint, Fugue and Canon, Instrumentation, and History.) Fees (excluding college fees): for the preliminary examination, £1 : 1s.; for the B.Mus. degree, £16 : 6s.; for the D.Mus. degree, £32 : 2s. Women are examined, and certificates are granted to them.

The position of musical degrees at Oxford is at present (1904) one of curiously anomalous character. Alone of all degrees, they are absolutely non-residential: outside the examination-room the University takes practically no cognisance of their holders, who are indeed its members only in a very limited sense. In academical rights both Doctors and Bachelors of Music rank only just above undergraduates, and below Bachelors of Arts: and it is more than doubtful if they could have entrance to a ceremony announced as for 'graduates.' Holders of musical degrees may in a purely technical sense be members of the University (what the candidates are before the degree is taken it is very difficult to know), but the ordinary custom is undoubtedly to consider them as, in the absence of other standing, outside the academical pale. Matriculation is no doubt necessary before entrance to the first B.Mus. examination, but, except in the very rarest instances, the name is taken off the college books nearly as soon as it is on them: and the two or three societies (Queen's College, New College, and the Non-Collegiate Body), who divide among themselves practically all the non-resident musical candidates, waive, with a complaisance not altogether complimentary, the whole of their ordinary matriculation examinations. Consequently, apart from the distinctly unsatisfactory 'Preliminary Examination for Students in Music,' the University exacts no intellectual test (and nothing in the way of residence) from musical candidates—an anomaly which places the degrees in a position

of uniquely inferior character. In 1898 it was proposed to make the degree of B.A. a necessary precursor to that of B.Mus. (thus making residence compulsory), in order to secure for graduates in Music university rights similar to those held by graduates in Law and Medicine. This proposal, warmly supported by some of the most eminent among British musicians, was open to the constitutional objection that the university statutes recognise no distinct Faculty of Music, and was rejected by the Hebdomadal Council. But the general trend of feeling, as shown in the requirements of at any rate nominal matriculation, and at any rate some sort of arts test—both unknown a generation ago—has been in the direction of altering an extraordinary state of things which is really indefensible. A glaring anomaly is none the better for having lasted a considerable time—many other old traditions of far wider importance have been swept away in modern Oxford; and if it be urged that the requirement of residence would be a hardship to young musicians, the University could quite fitly reply that the professional interests of organists do not come within its purview. There are now other universities in which all degrees alike are non-residential. Surely the only rational solution of the whole question is that all universities should grant their degrees solely to their own recognised and fully acknowledged members; and the Royal College of Music could, if it liked, exercise its rights under its charter (the Royal Academy could no doubt easily obtain a similar privilege) and grant degrees to those musicians who do not happen to be also university men. It is very hard to see why Oxford should continue to tolerate an indefensible anomaly, merely in order that a few individuals, entirely unconnected with the place, may derive professional benefit from the use of its name.

University of Cambridge. In all essential respects the early history of musical degrees at Cambridge is similar to that at Oxford, and requires no separate notice: the Music Lecture and Music Act were customs at both universities, and the status of the degrees and the general qualifications for them were the same, though the Bachelors were admitted to lecture on 'scientia musicalis' in general, not specifically on Boethius as at Oxford. The first Cambridge Bachelor of Music of whom we have record was Henry Habyngton (1463), the first Doctor, Thomas Saintwix (1463 or earlier). The professorship dates from 1684, when one Nicholas Staggins, master of the King's Band, was appointed, apparently merely by Court influence: no salary was, however, attached to the office till 1868. In 1857 Sterndale Bennett instituted formal examinations; and in 1875 the professor was required to lecture, a regulation subsequently expanded by the institution of a university lecturer in Harmony and Counterpoint, and the formation of a regular board of musical studies. The public performance of the B.Mus. exercise was abolished in 1868, that of the D.Mus. exercise in 1878. In 1878 candidates were requested to pass the university 'Previous Examination,' and in 1881 matriculation was made compulsory—these steps being taken some years later than at Oxford, and in a different order. In 1878 music (up to the standard of the first B.Mus. examination) was made an avenue to the ordinary B.A. degree for undergraduates of nine terms' residence, who had passed the 'Previous' and 'General' University examinations. In 1893 the University adopted the report of a Special Board of Music, and the necessary alterations in the University Statutes received the assent of the Privy Council shortly afterwards: the old regulations were concurrently in force for seven years subsequently in the case of the B.Mus. degree, and for five years in the case of the D.Mus. degree. The Board's report stated that 'they have had under careful consideration the exceptional position of the B.Mus. degree, involved in the fact that it is conferred upon persons who are not required to reside in the University. The various changes with regard to musical degrees which the Senate has sanctioned during the last fifteen years seem all to have tended in the direction of assimilating the procedure to that which obtains in other faculties. . . . It seems advisable that candidates of degrees in Music should have enjoyed no less advantages of general education than those who graduate in other faculties. The Board are of opinion that the time has now arrived when the degree of B.Mus. should be brought completely into line with the other degrees of the University, and conferred only after residence. . . As it is important that Bachelors of Music should have a degree to look forward to which should enable them to obtain the membership of the Senate, for which their residence and examinations shall have qualified them, the Board suggest the creation of the degree of Master of Music. . . The Board are of opinion that the present system of conferring the Doctorate in Music is unsatisfactory, as presenting a test which goes unnecessarily far in the technical direction, and gives insufficient encouragement to originality. They purpose, therefore, to assimilate the procedure of the degree of D.Mus. to that for the degrees of D.Sc. and D.Litt.' The present regulations are as follows: *For the B.Mus. degree.*—Candidates for the first examinations must be undergraduates in at least the second term of residence, who have passed Parts I. and II. of the University 'Previous Examination,' or a recognised equivalent; nine terms of residence are necessary for the degree itself. The first examination includes: (*a*) Acoustics; (*b*) Three-part counterpoint and double counterpoint in the octave; (*c*) Four-part harmony. The second examination includes: (*a*) Composition, instrumental and vocal—a substitute for the old 'exercise'; (*b*) Five-part

Counterpoint and Double Counterpoint; (*c*) Harmony; (*d*) Two-part Canon; (*e*) Two-part Fugue; (*f*) Sonata-form; (*g*) The pitch and quality of the stops of the organ; (*h*) Such knowledge of orchestral instruments as is necessary for reading from score; (*i*) The analysis of some classical composition announced six weeks before the examination; (*j*) Playing at sight from figured bass and from vocal and orchestral score; (*k*) General musical history; (*l*) A general knowledge of the standard classical compositions. *Regulations for the M.Mus. degree.*—(1) An examination including (*a*) Eight-part Counterpoint; (*b*) The highest branches of Harmony; (*c*) Four-part canon; (*d*) Four-part Fugue and Double Fugue; (*e*) Form in Practical Composition; (*f*) Instrumentation and scoring in Chamber and Orchestral Music; (*g*) The analysis of some classical composition announced six weeks before the examination; (*h*) The Art of Music historically and critically considered. (2) An exercise, with full orchestral accompaniment, containing portions of solo voices and for five-part chorus, and specimens of canon and fugue: there is also an oral examination for those whose exercises have been provisionally approved. *Regulations for the D.Mus. degree.*—A candidate must be a graduate in some faculty of the University (not necessarily in music), and must be not less than thirty years of age; he must send in not more than three (printed or manuscript) works, upon which his claim to a degree is based, such works to include either an oratorio, an opera, a cantata, an orchestral symphony, a concerto, or an extended piece of chamber music. Fees: for the B.Mus. degree, £14 : 3s. (if a B.A. £10 : 3s.); for the M.Mus. degree, £18 : 6s.; for the D.Mus. degree, £30 : 5s. Women are examined for the B.Mus. and M.Mus. degrees, and equivalent certificates are granted to them.

University of Dublin. Founded in 1591, but very few degrees in Music (the first of which was granted in 1612 to Thomas Bateson, the madrigal composer) were conferred till recent times. No Professorship in Music existed till 1845, except from 1764 to 1774, when Lord Mornington, father of the Duke of Wellington, held the position. In 1861 Sir R. P. Stewart was elected, and established a preliminary literary qualification for musical candidates, a principle peculiar to Dublin for sixteen years subsequently, but since accepted in one form or another by all British Universities. Candidates for degrees in music must matriculate in Arts, the examination including Latin and English Composition, Arithmetic, elementary Algebra and Euclid, English History, Modern Geography, and any two Greek and any two Latin authors. For Greek, music candidates may substitute French, German, or Italian: Acoustics is a special compulsory subject for all. *Regulations for the B.Mus. degree.*—(1) Preliminary examination: (*a*) Harmony in four parts; (*b*) Counterpoint in four parts, excluding combined kinds; (*c*) A general knowledge of Beethoven's pianoforte sonatas; (*d*) The history of English church music from Tallis to Purcell. (2) An exercise, vocal or instrumental, in not less than four movements, containing specimens of canon and fugue. (3) Final Examination; (*a*) Harmony in five parts; (*b*) Counterpoint in five parts; (*c*) Double Counterpoint and Canon in two parts; (*d*) Fugal Construction; (*e*) A knowledge of Bach's 'Wohltemperirtes Klavier'; (*f*) The history of the Oratorio, as treated by Handel, Haydn, and Mendelssohn. *Regulations for the D.Mus. degree.*—(Holders of the Oxford or Cambridge B.Mus. degree are admitted.) (1) An Exercise for voices and orchestra comprising an overture, at least one eight-part chorus, at least one solo with orchestra, and specimens of canon and fugue. (2) An examination including (*a*) Eight-part Harmony and Counterpoint; (*b*) Double and Triple Counterpoint; (*c*) Canon and Fugue in four parts; (*d*) Instrumentation; (*e*) A general acquaintance with the great masters' lives and works, the latter being tested by the identification of phrases from various masterpieces. Fees: for Matriculation, £15; for the B.Mus. degree, £10 (£5 to a B.A.); for the D.Mus. degree, £20. Degrees are conferred on women as well as on men.

University of London.—The first degree in music was granted in 1879; the Professorship dates from 1902. Candidates for degrees in music must pass the Matriculation examination, the subjects of which are: (*a*) English; (*b*) Elementary Mathematics; (*c*) Latin or Elementary Mechanics, Physics, Chemistry, or Botany; (*d*) two of the following, one of which must be a language if Latin is not taken under (*c*): Latin, Greek, French, German, Italian, Spanish, Portuguese, Sanscrit, Arabic, Hebrew, Ancient or Modern History, Geography, Logic, Drawing, Advanced Mathematics, Elementary Mechanics, Physics, Chemistry, or Biology. *Regulations for the B.Mus. degree.*—(1) Intermediate examination, comprising Acoustics, Melody, Time, Rhythm, Chord-construction, History of Music, so far as it relates to the growth of musical forms and rules, Harmony and Counterpoint in four parts. (2) An exercise 'which must be a good composition from a musical point of view,' for voices with string-orchestra accompaniment, containing five-part vocal counterpoint and specimens of imitation, canon, and fugue. (3) Final examination: (*a*) Practical Harmony and Thorough-Bass; (*b*) Five-part Counterpoint, with Canon and Fugue; (*c*) Form in musical composition; (*d*) Instrumentation, so far as is necessary for understanding and reading a full score; (*e*) Arranging for the pianoforte from an instrumental score; (*f*) A critical knowledge of the full scores of standard classical works, previously selected. A candidate may offer to be examined in playing at sight from a five-part vocal score, and

from a figured bass. *Regulations for the D.Mus. degree.*—(1) An exercise 'which must be a good composition from a musical point of view,' for chorus and orchestra, containing eight-part harmony and eight-part fugal counterpoint, portions for one or more solo voices, and an instrumental overture in sonata form. (2) An examination including: (*a*) Practical Harmony up to the most advanced standard; (*b*) Eight-part counterpoint, with canon, fugue, etc.; (*c*) Form in composition, treatment of voices in composition, and instrumentation; (*d*) History of Music; (*e*) A detailed critical knowledge of the great classical masterpieces. A candidate may offer to be examined in playing at sight from a full orchestral score, and in extempore composition on a given subject. Fees: for matriculation, £2; for the B.Mus. degree, £10; for the D.Mus. degree, £10. Degrees are conferred on women.

University of Durham.—Founded in 1831; until of late years only honorary musical degrees were given. The Professorship dates from 1897. Candidates for degrees in music must (unless they are graduates in Arts of a British University) pass the 'examination for the Testamur qualifying for admission as a student in music.' Subjects, *either* any three of the following twelve, English, Geography, Arithmetic, English History, Religious Knowledge, Euclid, Algebra, Logic, Latin, Greek, French, German, *or* any two of the last four languages. *Regulations for the B.Mus. degree.*—(1) First examination, comprising Harmony and Counterpoint in four parts; (2) An exercise, for five-part chorus and string orchestra; (3) Final Examination: (*a*) Five-part Harmony; (*b*) Five-part Counterpoint; (*c*) Four-part Fugue, and Canon; (*d*) Form, and History of Music; (*e*) The full scores of certain selected works announced beforehand. *Regulations for the D.Mus. degree.*—(1) An exercise, for eight-part chorus and full orchestra, including an instrumental overture. (2) An examination, comprising: (*a*) Eight-part Harmony; (*b*) Eight-part Counterpoint; (*c*) Imitation, Canon, and Fugue; (*d*) Form; (*e*) Instrumentation; (*f*) History of Music; (*g*) Elementary Acoustics; (*h*) Knowledge of the standard classical works. Fees: for the preliminary examination, £1 : 10s.; for the B.Mus. degree, £14 : 10s.; for the D.Mus. degree, £16. Degrees are conferred on women.

Victoria University.—The first musical degrees were conferred in 1894. Residence is necessary for degrees in music; as yet, however, Owens College, Manchester, is the only one of the constituent colleges which has provided the necessary schemes of lectures under the regulations. Candidates for musical degrees must pass the Preliminary Examination, comprising: (*a*) English Language and History; (*b*) Mathematics, and three of the following, of which one must be a language: (*c*) Greek; (*d*) Latin; (*e*) French; (*f*) German; (*g*) Another modern language; (*h*) Elementary Mechanics; (*i*) Chemistry; (*j*) Geography or Natural History. *Regulations for the B.Mus. degree.*—(1) First Examination: (*a*) Four-part Harmony; (*b*) General History of Music; (*c*) Elementary Acoustics. (2) Second Examination: (*a*) Five-part Harmony; (*b*) Four-part Counterpoint, ancient and modern; (*c*) History of Music, some special period; (*d*) Musical Forms; (*e*) Playing of a prepared and approved piece, and playing at sight. (3) Third Examination: (*a*) Five-part Counterpoint and Fugue; (*b*) Composition in various forms; (*c*) Orchestration. (4) An exercise for five-part chorus with accompaniment for a band of strings and wood-wind, with or without organ, including some portion for a solo voice, and specimens of Canon and Fugue. Candidates for the second and third examinations must produce certificates of attendance upon the approved courses of instruction. *Regulations for the D.Mus. degree.*—(1) Two Exercises: (*a*) The first movement of a symphony for full orchestra; (*b*) An Eight-part Contrapuntal Vocal Movement. (2) An Examination, including Eight-part Harmony and Counterpoint, and Composition for full orchestra and for various combinations of selected instruments. Fees: for Preliminary Examination, £2; for the B.Mus. degree, £8; for the D.Mus. degree, £10. The College fee for each year's course of lectures is £2 : 12 : 6. Degrees are conferred on women.

Royal University of Ireland.—Founded in 1880. Candidates for degrees in music must have passed both the Matriculation and the First University Examinations, the subjects for which are the same, a more advanced knowledge being required at the latter. (*a*) Latin; (*b*) one of the following: Greek, French, German, Italian, Spanish, Celtic, Sanscrit, Hebrew, Arabic; (*c*) English Language and Literature; (*d*) Elementary Mechanics; (*e*) Natural Philosophy. *Regulations for the B.Mus. degree.*—(1) First Examination: (*a*) Elements of Acoustics; (*b*) Elements of Music; (*c*) History of Modern music; (*d*) Playing prescribed pieces, and also at sight, on two of the following: organ, pianoforte, violin. To obtain honours, more minute knowledge of the pass subjects must be shown, together with (*a*) Four-part Counterpoint in first species; (*b*) Temperament; (*c*) Musical Forms; more difficult pieces must also be played. (2) An exercise for four-part chorus with string orchestra or organ. (3) Final Examination: (*a*) Harmony and Counterpoint in five parts, Canon and Fugue; (*b*) History of Music and Musical Instruments; (*c*) Instrumentation; (*d*) Analysis of prescribed works; (*e*) Playing prescribed pieces, and also at sight, on two of the following: organ, pianoforte, violin. To obtain honours the extra subjects are (*a*) Double Counterpoint; (*b*) The physical reasons for differences of *timbre*; (*c*) Further works to be analysed; more difficult pieces have also to be played. *Regula-*

tions for the D. Mus. degree.—(1) An exercise, for eight-part chorus and orchestra, including an instrumental overture and portions for solo voices. (2) An examination including (*a*) Acoustics; (*b*) Eight-part Harmony and Counterpoint; (*c*) History of music from the earliest time; (*d*) Temperament; (*e*) Four-part double Fugue; (*f*) History of Harmony and Counterpoint; (*g*) Analysis of prescribed works; (*h*) Playing prescribed pieces, and also at sight, on two of the following: organ, pianoforte, violin. Fees: for Matriculation and First University Examinations, £1 each; for the B. Mus. degree, £3; for the D. Mus. degree, £5. Degrees are conferred on women.

University of Edinburgh.—The Reid Professorship of Music dates from 1839, but owing to various causes no regulations for degrees in music were made before 1893. The Preliminary Examination, compulsory for all music candidates except holders of degrees in Arts in recognised universities, includes (*a*) English, including Geography and British History; (*b*) Elementary Mathematics or Elementary Physics or Logic; (*c*) any two of the following: Latin, Greek, French, German, and Italian, one at least being a modern language. *Regulations for the B. Mus. degree.*—Candidates must attend a course or courses of instruction extending in all to not less than eighty lectures. (1) The 'First Professional Examination' includes (*a*) Singing or performing on some instrument; (*b*) Reading at sight (*c*) Elements of Music; (*d*) Four-part Harmony; (*e*) Elementary Counterpoint; (*f*) Form; (*g*) Outlines of the History of Music; (*h*) Ear tests. (2) The 'Second Professional Examination in Music and Literature' includes (*a*) one of the modern languages not taken in the preliminary examination; (*b*) Rhetoric and English Literature; (*c*) Five-part Harmony; (*d*) Advanced Counterpoint; (*e*) Two-part Canon and Four-part Imitation and Fugue; (*f*) Form (more advanced); (*g*) Elements of Instrumentation; (*h*) Critical Knowledge of certain prescribed scores; (*i*) Playing at sight from easy vocal and instrumental scores and from figured bass; (*j*) History of Music; (*k*) Acoustics and Physiology of the vocal organs. Each candidate will also be required to submit the following exercises: (*a*) A solo song with pianoforte accompaniment; (*b*) A four-part vocal composition; (*c*) An instrumental composition (other than a dance) for pianoforte or organ, or other instrument with accompaniment. *Regulations for the D. Mus. degree.*—The degree is granted in three departments: all candidates must be not less than twenty-five years of age. (1) Candidates as *Composers* must submit a prescribed number of vocal and instrumental compositions in the larger forms, and will be examined in (*a*) Advanced Counterpoint and Fugue; (*b*) Instrumentation; (*c*) The works of the great composers from Palestrina onwards. (2) Candidates as *Executants* will be required to perform solo and ensemble works in different styles, selected partly by themselves and partly by the examiners: they will be examined in sight-reading, playing from orchestral score, modulating, the history and literature of their special instrument, and the method of teaching it. (3) Candidates as *Theorists or Historians* must submit one or more treatises, the result of research and original thought, and will be examined in both the theory and the history of music, the examination being on a higher standard in the subject which the candidate selects as his specialty. Fees: for the Preliminary Examination, 10s. 6d.; for the B. Mus. degree, £10 : 10s.; for the D. Mus. degree they are not yet specified. Degrees are conferred on women.

University of Wales.—Constituted in 1894. Candidates for musical degrees must (unless holding an equivalent certificate) pass the Matriculation Examination in (*a*) English; (*b*) History of England and Wales; (*c*) Latin; (*d*) Mathematics and two of the following; (*e*) Greek; (*f*) Welsh, French, or German; (*g*) Dynamics; (*h*) Chemistry or Botany. *Regulations for the B. Mus. degree.*—Candidates must study in a constituent college of the university for three years, but the third year may be spent in an approved School of Music. Examinations are held at the close of each academic year. The 'Intermediate' qualifying courses include (*a*) Greek, Latin, English, Welsh, French, or German—as for the B. A. degree; (*b*) Acoustics; (*c*) History of Music before the 18th century; (*d*) Theory of Music, including 'Laws of Harmony,' Three-part Counterpoint, elementary Orchestration, and Form; (*e*) Composition in various vocal and instrumental forms. The 'Final' courses include (*a*) History of Music from the 18th century; (*b*) Theory of Music, including Harmony, Counterpoint, Canon, Fugue, Orchestration (strings only), and Form; (*c*) Composition—choral with string accompaniment, an overture, a sonata for piano or violin, and a string quartet. At the end of the third year, an exercise must be presented; no special regulations are yet issued with regard to this, nor with regard to any course of study or examination for the D. Mus. degree. Fees: for the Matriculation examination, £2; for an intermediate examination, 12s. 6d.; for a final examination, £1 : 5s. Degrees are conferred on women.

Except at Cambridge, candidates for the doctorate must already hold the B. Mus. degree; but this regulation was not in force at Oxford till 1626, nor at Cambridge (under the old regulations) till 1889. *Ad eundem* degrees are, however, occasionally conferred. Some other British universities than those above mentioned have the power to grant musical degrees, but have not yet issued any regulations on the subject; the University of St. Andrews has granted honorary degrees, but no others. The Archbishop of Canterbury possesses, and occasionally exercises, the privilege of creating Doctors of Music (as well as Doctors in other

faculties, and, after specified examinations, Masters of Arts). All the doctorates are conferred at the Archbishop's discretion, and no rules are laid down with regard to them; but in all cases the Archbishop takes skilled advice as to the applicant's qualifications. The D.Mus. fees are not mentioned in the regulations, but they have been estimated at £63; and the fees for the M.A. degree, which may be taken as a general guide, 'must not be expected to be less than £55.' This is a vestige of the ancient rights of the occupant of the See as Legate of the Pope—rights which have however been, at various times from the 13th century downwards, strongly contested by representatives of the regular universities; it is highly probable that, sooner or later, this very eccentric relic of antiquity will be quietly allowed to lapse.

The 'Union of Graduates in Music' is a body including (with a very few exceptions) all the holders of the above-mentioned British degrees, both ordinary and honorary, as well as the women to whom equivalent certificates have been granted. It was founded in 1893, principally by the efforts of Sir John Stainer, 'for the protection of the value and dignity of the Degrees in Music regularly conferred in Great Britain and Ireland'; the immediate cause of its existence being an attempt made by a colonial university to grant degrees *in absentia* through an English agency. It publishes an annual 'Roll and Kalendar' containing particulars of its members' careers and qualifications and other matter of musical interest, and holds an annual general meeting, followed by a dinner. The chief part of its official work hitherto has consisted in the detection and exposure of those who have traded, in ways not altogether irreproachable, on the strange passion for ornamental letters which consumes a large section of the British public; but it has also dealt with other matters, such as the registration of teachers. It has done in many ways excellent work, and its energetic methods have been of much service to British music; but it might be wished that some of its prominent spokesmen would refrain from glorifying it as, practically, only another name for the exclusive salt of the profession—an attitude which appears very curious to those who, whether members of the Union or not, judge musicianship by living results, and decline to accept examinations as the last word of Art.

(Principal authorities consulted; Abdy-Williams, *Degrees in Music;* official regulations of the various Universities; the *Roll and Kalendar of the Union of Graduates in Music*, and the reports of its proceedings in *Musical News.*) E. W.

DEHN, Siegfried Wilhelm, musical writer, born at Altona, Feb. 25, 1799, died at Berlin, April 12, 1858. His studies at the University of Leipzig were interrupted in 1813 by his having to join the army against the French. On the restoration of peace he went to Plön and Leipzig, and in 1823 to Berlin, where he studied under Bernhard Klein in harmony and composition. He possessed strong literary tastes, and being a good linguist, made diligent researches on various subjects connected with music both in Germany and Italy, which he utilised in Marx's *Berliner Musikzeitung* and other periodicals. In 1842, on the recommendation of Meyerbeer, he was appointed librarian of the musical portion of the Royal Library at Berlin, a choice he amply justified. He was given the title of Königl. Professor in 1849. He catalogued the entire musical library, and added to it a number of valuable works scattered throughout Prussia, especially Pölchau's collection, containing, besides many interesting theoretical and historical works, an invaluable series of original MSS. of the Bach family. Dehn scored no fewer than 500 motets of Orlando Lasso, and copied for the press an enormous number of works by J. S. Bach. He it was who first published Bach's six concertos for various instruments (Peters, 1850); the concertos for one, two, and three claviers; and the two comic cantatas. At his instigation Griepenkerl undertook his edition of Bach's complete works for clavier and organ (Peters, Leipzig). Dehn also published a collection of vocal compositions in 4, 5, 6, 8, and 10 parts, called 'Sammlung älterer Musik aus dem XVI und XVII Jahrh.' (Crantz, Berlin). He succeeded Gottfried Weber in the editorship of the musical periodical *Cæcilia* (Schott), (1842-48). He had re-edited Marpurg's treatise on Fugue (Leipzig, 1858), had translated Delmotte's work on Orlando Lasso, under the title *Biographische Notiz über Roland de Lattre*, and was preparing a larger work on the same subject, from valuable materials collected with great labour, when he died. In addition to these and similar labours he conducted a large correspondence on musical subjects and formed many distinguished pupils, among whom may be mentioned Glinka, Kullak, A. Rubinstein, and F. Kiel. Among his friends were Kiesewetter and Fétis, for the latter of whom he collected materials equal to two volumes of his *Biographie universelle.* His theoretical works were *Theoretische-praktische Harmonielehre* (Berlin, 1840; 2nd edition Leipzig, 1858); *Analyse dreier Fugen . . . J. S. Bach's . . . und Bononcini's*, etc. (Leipzig, 1858), and *Lehre vom Kontrapunkt* (Schneider, 1859). The latter, published after his death by his pupil Scholz (2nd edition, 1883) contains examples and analyses of canon and fugue by Orlando Lasso, Marcello, Palestrina, etc. Dehn was a good practical musician and violoncellist. M. C. C.

DEISS, Michael, musician to the Emperor Ferdinand I. of Germany, for whose obsequies in 1564 he composed a motet for four voices, and eight other pieces, published by Joannelli in his *Thesaurus Musicus.* Other motets of his are contained in Schad's *Promptuarium Musicum.*

Deiss's part-writing was fluent and natural for his time, as is shown in his motet 'Misit Herodes rex.' M. C. C.

DEITERS, HERMANN, born June 27, 1833, at Bonn, studied at first law and philology, taking the degree of Doctor in both faculties in 1858. He has held various scholastic appointments, successively at Bonn, Düren, Konitz, Posen, and Coblenz, and has a place in the Cultusministerium at Berlin. After some early contributions to Bagge's *Deutsche Musikzeitung*, and other musical papers, he wrote various important articles in the *Allgem. Mus. Zeitung*, such as 'Beethovens dramatische Compositionen,' 'R. Schumann als Schriftsteller,' 'Max Bruchs Odysseus,' etc. He published the first authoritative biography of Brahms, in 1880 (English translation by Mrs. Newmarch in 1888), completed after the master's death by a new edition, 1898. Deiters's most important work has been in the revising and editing of A. W. Thayer's monumental life of Beethoven. The German translation from Thayer's original English (MS.) in the three volumes published during the author's lifetime (in 1866, 1872, and 1879) were his work. Since Thayer's death, Dr. Deiters has undertaken to revise and complete the work; vol. i. of the new edition appeared in 1901. M.

DELABORDE, E. M., an eminent French pianist and composer, was born in Paris, Feb. 7, 1839; he was a pupil of Alkan and Moscheles, and on completing his studies, made successful tours in England, Germany, and Russia. In 1873 he was appointed professor at the Paris Conservatoire, and has since devoted himself to teaching with the greatest success. He wrote an overture, 'Attila'; an opéra-comique, 'La Reine dort'; twelve preludes, études, and fantasias, for piano, a quintet for piano and strings, and songs. G. F.

DELDEVEZ, ÉDOUARD MARIE ERNEST, born in Paris, May 31, 1817, died there Nov. 6, 1897; entered the Conservatoire in 1825, where he was pupil of Habeneck, Halévy, and Berton. [He obtained the first prize in 1833, the second prize for fugue in 1837, and the second 'prix de Rome' in 1838 for his cantata 'La Vendetta,' which he subsequently revised and printed (op. 16). That he was not only a talented violinist and leader, but also a sound and melodious composer, is shown in his published works. These consist of songs, sacred choruses, two trios (opp. 9 and 23), quartets (op. 10), a quintet (op. 22), concert-overtures (opp. 1 and 3), symphonies (opp. 2, 8, 15), besides some still unpublished; a 'Requiem' (op. 7), and dramatic works. Among his ballets performed at the Opéra we may mention 'Lady Henriette' (third act), 'Eucharis' (1844), 'Paquita' (1846), and 'Vertvert' (1851), which contain much pleasing and brilliant music. This learned and conscientious musician also published an Anthology of Violinists, 4 vols. (op. 19)—a selection of pieces by various composers, from Corelli to Viotti; a work *Des Principes de la formation des intervalles et des accords* (1868); the *Cours complet d'harmonie et de haute composition* of Fenaroli; *Transcriptions et Réalisations d'œuvres anciennes*;] *Curiosités Musicales* (1873, a dissertation on some doubtful passages in the classical masters' works); *La notation de la musique classique comparée à la notation de la musique moderne; De l'exécution d'ensemble; L'Art du Chef d'orchestre* (1878); *La Société des Concerts* (1887). He was appointed second conductor at the Opéra in 1859, and had the same post at the Concerts du Conservatoire; in 1872 he became chief conductor of these concerts, and in 1873 succeeded Hainl as chief conductor at the Opéra. In October of the same year he was chosen to direct the class for instrumental performance, then newly instituted at the Conservatoire. Deldevez retired from the conductorship of the Opéra in 1877, and from his duties at the Conservatoire in 1885. [See ALTÈS for the various changes of posts.] G. F. Additions in square brackets from M. Gustave Chouquet's article in the first edition of the Dictionary.

DELIBES, CLÉMENT PHILIBERT LÉO, born at St. Germain du Val (Sarthe), on Feb. 21,[1] 1836, came to Paris in 1848, and was admitted into the Solfège class at the Conservatoire, and at the same time sang in the choirs of the Madeleine and other churches. Having obtained a first prize for solfège in 1850, he studied pianoforte, organ, harmony, and advanced composition under Le Couppey, Benoist, Bazin, and Adolphe Adam respectively. Through the influence of the last-named, he became accompanist at the Théâtre Lyrique in 1853, and also organist in the church of St. Pierre de Chaillot, and elsewhere, before his final appointment at St. Jean St. François, which he held from 1862 to 1871. He devoted himself from an early period to dramatic composition, and [after his first essay, 'Deux Sous de Charbon' (Folies Nouvelles, 1855)] wrote several short comic operas for the Théâtre Lyrique—'Maître Griffard' (1857), 'Le Jardinier et son Seigneur' (1863); and a number of operettas for the Folies Nouvelles, the Bouffes Parisiens, and the Variétés, of which some were very successful—'Deux vieilles Gardes' (1856), 'L'Omelette à la Follembûche' (1859), 'Le Serpent à plumes' (1864), 'L'Écossais de Chatou' (1869), etc. He also wrote a number of choruses for male voices, a mass and some choruses for the school children of St. Denis and Sceaux, where he was inspector. In 1863 Delibes became accompanist at the Opéra, and in 1865 second chorus master (under Victor Massé): he kept this appointment until 1872, when he gave it up on the occasion of his marriage with the daughter of Mlle. Denain, a former actress at the Comédie Française. [In

[1] Date verified by register of birth.

1865 a cantata, 'Alger,' was performed.] By his appointment at the Opéra a new career was opened out to him. Having been commissioned to compose the ballet of 'La Source' (Nov. 12, 1866) in collaboration with the Polish musician Minkous, he displayed such a wealth of melody as a composer of ballet music, and so completely eclipsed the composer with whom he had as a favour been associated, that he was at once asked to write a divertissement called 'Le Pas de Fleurs' to be introduced into the ballet of his old master, Adolphe Adam, 'Le Corsaire,' for its revival (Oct. 21, 1867). He was finally entrusted with the setting of an entire ballet, on the pretty comedy 'Coppélia' (May 25, 1870), which is rightly considered his most charming production, and which has gained for him a full recognition. He did not wish, however, to confine himself to the composition of ballets; in 1872 he published a collection of charming melodies, 'Myrto,' 'Les Filles de Cadiz,' 'Bonjour, Suzon,' etc., and on May 24, 1873, he produced at the Opéra Comique a work in three acts, 'Le Roi l'a dit,' which, in spite of the charm and grace of the first act, has not had a lasting success, in Paris at least, though it has met with considerable favour in Germany. [It was given by the pupils of the Royal College of Music, at the Prince of Wales' Theatre, Dec. 13, 1894.] After this Delibes returned to the Opéra, where he produced a grand mythological ballet, 'Sylvia' (June 14, 1876), which confirmed his superiority in dance music. In spite of this fresh success Delibes was still anxious to write a serious vocal work, and produced a grand scena, 'La Mort d'Orphée,' at the Trocadéro Concerts in 1878. He then composed two dramatic works for the Opéra Comique, 'Jean de Nivelle' (March 8, 1880) and 'Lakmé' (April 14, 1883). [A five-act opera, 'Kassya' (completed by E. Guiraud after the composer's death), was given at the Opéra Comique, March 21, 1893. Some other dramatic pieces ('Le Don Juan suisse,' and 'La princesse Ravigotte') remain in MS.] His ambition was certainly laudable, but though his musical ability secured him a partial success, these more serious works have not such lasting charm as his lighter productions. In spite of this reservation, Delibes was, nevertheless, one of the most meritorious composers of the modern French school. In addition to the above works he composed incidental music for 'Le Roi s'amuse,' on its revival at the Comédie Française, Nov. 22, 1882, and has published several songs, almost all intended for representations at the last-named theatre. Among them are 'Ruy Blas,' 'A quoi rêvent les jeunes filles,' and 'Barberine.' In 1877 Delibes was made Chevalier of the Legion of Honour; in Jan. 1881 he succeeded Reber, who had just died, as professor of advanced composition at the Conservatoire; and in Dec. 1884 he was elected a member of the Institut in the places of Victor Massé. [He died in Paris, Jan. 16, 1891. A memoir of Delibes by E. Guiraud was published in Paris, 1892.] A. J.

DELLE SEDIE, Enrico, eminent singing-teacher, was born at Leghorn, June 17, 1826. When a student, under the tuition of Galeffi, Persanola, and Domeniconi, he was imprisoned as a revolutionary; his début took place as a baritone in Verdi's 'Nabucodonosor,' at Florence in 1851. He sang in many parts of Italy, and in 1861 appeared at the Théâtre Italien in Paris, and was soon afterwards appointed professor of singing at the Conservatoire. He has enjoyed a high reputation for many years, and has published various books, *L'Arte e fisiologia del canto* (Milan, 1876), and *L' estetica del canto e dell' arte melodrammatica* (Milan, 1886). Both works were published in English translations in New York, and were later combined in one *Complete Method of Singing*. (Baker's *Biog. Dict. of Musicians.*)

DELMOTTE, Henri Florent, born at Mons, 1799, died there, March 9, 1836, librarian of the public library at Mons, and author of *Notice biographique sur Roland Delattre*, etc. (Valenciennes, 1836). This work was translated into German by Dehn. The authenticity of the chronicler Vinchant, from whom Delmotte took the chief part of his facts, has been contested since his death. (See Lasso.) At the time of his death Delmotte was collecting materials for the life of Philippe de Mons. M. C. C.

DEMANTIUS, Johann Christoph, composer, born at Reichenberg, Dec. 15, 1567; lived in Leipzig in 1594-95, was cantor at Zittau in 1597, and in 1607 at Freyberg in Saxony, where he died April 20, 1643. His works (for list see the *Quellen-Lexikon*) comprise songs sacred and secular, dances, and threnodies, or funeral laments, besides two elementary works, *Isagoge artis musicæ*, etc. (Nuremberg, 1607, 10th edition, Freyberg, 1671) and *Forma musices, gründlicher . . . Bericht der Singekunst* (Budissin, 1592). Four 8-part motets are printed in the Florilegium Portense, and a short 'Domine ad adjuvandum,' *a* 4, in Proske's *Musica Divina*—Lib. Vesperarum. M. C. C.

DEMEUR, Anne Arsène, *née* Charton, was born March 5, 1827, at Saujon (Charente), was taught music by Bizot of Bordeaux, and in 1842 made her début there as Lucia. She sang next at Toulouse, and in 1846 at Brussels. On July 18 in the same year she made a successful début at Drury Lane as Madeleine in 'Le Postillon,' and also played both Isabelle and Alice ('Robert'), Eudoxie, on production of 'La Juive' in England, July 19, and with great success as Angèle ('Domino Noir') with Couderc, the original Horace. On Sept. 4, 1847, she married M. Demeur the flautist.[1] In 1849-50 she was first female

[1] Demeur, Jules Antoine, born Sept. 23, 1814, at Hodimont-lez Verviers—studied the flute at the Brussels Conservatoire from Lahore—subsequently learnt the Boehm flute from Dorus at Paris; from 1842 to 1847 was first flautist at the Brussels Opera, and as such

singer of Mitchell's French Company at St. James's Theatre, and became highly popular in various light parts, many of which were then new to England, viz. Angèle, Henriette ('L'Ambassadrice'), Isabelle ('Pré aux Clercs'), Zanetta, Feb. 12, 1849; Laurette ('Cœur de Lion'), and Adèle (Auber's 'Concert à la Cour'), both on Feb. 26, 1849; Lucrezia ('Actéon') March 4, 1849; the Queen of Léon (Boisselot's 'Ne touchez pas à la Reine'), May 21, 1849; Countess ('Comte Ory'), June 20, 1849; Anna ('Dame Blanche'), Camille ('Zampa'), Jan. 4, 1850; Rose de Mai ('Val d'Andorre'), Jan. 17; Virginie ('Le Caid'), Feb. 11; Catarina ('Les Diamans'), etc. She sang at the Philharmonic Concert of March 18, 1850; in 1852 she appeared in Italian at Her Majesty's on July 27, as Amina; and on August 5, in the Duke of Saxe-Coburg-Gotha's 'Casilda.' 'She made an impression when singing in French comic opera by her pleasing voice and appearance and by a certain cosiness of manner which was very charming' (Chorley). Mme. Charton-Demeur having sung with little success in 1849 and 1853 at the Opéra Comique, adopted the Italian stage, and won both fame and fortune in St. Petersburg, Vienna, in North and South America, and in Paris at the Italiens as Desdemona in 1862. On August 9 of that year she played the heroine on the production of Berlioz's 'Béatrice et Bénédict' so much to the composer's satisfaction that he requested her to play Dido in 'Les Troyens à Carthage,' produced at the Lyrique, Nov. 4, 1863. Berlioz has commemorated in his Memoirs her great beauty, her passionate acting and singing as Dido, although she had not sufficient voice wholly to realise his ideal heroine, and last, not least, her generosity in accepting the engagement at a pecuniary loss to herself, a more lucrative offer having been made her for Madrid. On the conclusion of the run of the opera she sang at Madrid, but afterwards returned to the Lyrique, where, on May 1, 1866, she played Donna Anna with Nilsson (Elvira) and Carvalho (Zerlina). For many years Mme. Charton lived in retirement, but occasionally appeared at concerts, viz. at the Berlioz Festival at the Paris Opéra, with Nilsson in the 'duo-nocturne' from 'Béatrice et Bénédict,' March 22, 1870; at the Pasdeloup concerts with Monjauze in the finale to the second act of Reyer's 'Sigurd,' performed for the first time, March 30, 1873; and made her last appearances at the same concert as Cassandra in the first production of Berlioz's 'Prise de Troie,' Nov. 23 and 30, and Dec. 7, 1879. She died in Paris, Nov. 30, 1892. A. C.

DEMI-SEMI-QUAVER, the half of a semiquaver; in other words, a note the value or duration of which is the quarter of a quaver and the eighth part of a crotchet. In French 'triple croche'; in Italian 'semi-bis-croma'; in German 'zweiunddreissigstel,' whence the American 'thirty-second note.' It is shown, when single, in this form, , and, when joined, thus, ; its rest is .

played at Drury Lane in 1846; relinquished that post to accompany his wife on all her engagements.

DEMONIO, IL. Opera in three acts; the words by Wiskowatov, after Lermontov's poem, music by Anton Rubinstein. Produced at St. Petersburg, Jan. 25, 1875, and at Covent Garden, June 21, 1881. M.

DÉMOPHON, tragédie lyrique, in three acts; words by Marmontel; music by Cherubini, his first opera in Paris; produced at the Académie Royale, Dec. 5, 1788.

DEMUNCK or DE MUNCK. See MUNCK, DE.

DENEFVE, JULES, violoncellist and composer, born at Chimay, 1814, entered the Brussels Conservatoire in 1833. He studied the violoncello under Platel and Demunck; became professor of the violoncello at the École de Musique, and first violoncello at the theatre, and at the Société des Concerts at Mons. Within a few years he became director of the École, conductor of the Société des Concerts, and founder and conductor (1841) of the Roland de Lattre choral society. He composed three operas for the Mons theatre; a number of choruses for men's voices; several cantatas (one for the erection of a statue to Orlando Lasso in 1858); a Requiem, and various orchestral pieces. Denefve was a member of the 'Société des beaux arts et de littérature' of Ghent, and honorary member of the most important choral societies in Belgium and the north of France. [He died August 19, 1877.] M. C. C.

DENGREMONT, MAURICE, a violinist of Franco-Brazilian origin, was born at Rio, March 19, 1866. As a youth he made public appearances on the continent with extraordinary success, but ultimately gave way to habits of dissipation, and died prematurely at the age of twenty-seven, in August 1893. W. W. C.

DENKMÄLER DER TONKUNST. The title of a publication of ancient music, inaugurated by Dr. Chrysander with a reprint of Palestrina's four-part motets. After five volumes, the series was merged in other publications, the first volume of Corelli and Couperin being completed by a second volume of each. (See those names.) The contents were as follows:—

i. Palestrina's four-part motets, book i. ed. Bellermann.
ii. Carissimi's Oratorios (Jephte, Judicium Salomonis, Baltasar, Jonas).
iii. Corelli's works, ed. Joachim, book i.
iv. Couperin's suites, ed. Brahms, vol. i.
v. Urio's Te Deum (afterwards withdrawn, and issued as one of the 'Supplemente' to Chrysander's edition of Handel).

DENKMÄLER DEUTSCHER TONKUNST. In May 1892, a committee of musicians, including Brahms, Joachim, Chrysander, Herzogenberg, Spitta, and Helmholtz, undertook the publication of a series of musical reprints under this title, and with financial help or subvention from the Government. After the first two volumes, a long interval elapsed, during which

the Austrian musicians had followed the good example, and had started their own set of 'monuments' with Government support. (See below, DENKMÄLER DER TONKUNST IN OESTERREICH.) On the resumption of the scheme in 1900, the German series was divided into two sections, one for Germany and one for Bavaria, the latter being called 'Second series,' in a somewhat confusing way. The following is a list of the volumes already published:—

I. 1892. Samuel Scheidt's 'Tabulatura nova' for organ, etc., ed. Max Seiffert.
II. 1894. H. L. Hassler's 'Cantiones Sacræ,' ed. H. Gehrmann.
III. 1900. F. Tunder's solo cantatas and choral works, ed. Max Seiffert.
IV. 1901. J. Kuhnau's Clavier works, ed. K. Päsler.
V. 1901. J. R. Ahle's selected vocal works, ed. Joh. Wolff.
VI. 1901. Matthias Weckmann and Chr. Bernhard, selected vocal works, ed. M. Seiffert.
VII. 1902. H. L. Hassler's Masses, ed. Jos. Auer.
VIII. 1902. Ignaz Holzbauer, 'Günther von Schwarzburg,' opera in three acts, ed. J. H. Kretzschmar, part i.
IX. 1902. Do. Part ii.
X. 1902. Joh. Caspar F. Fischer's 'Journal du Printemps,' and D. A. S.'s 'Zodiacus,' ed. E. von Werra.
XI. 1903. D. Buxtehude, Sonatas, vln. vcello. and harpsichord, ed. C. Stiehl.
XII. 1903. Heinrich Albert's 'Arien,' part i. ed. Eduard Bernoulli.

ZWEITE FOLGE. BAYERN.

I. 1900. E. F. dall' Abaco, selected works, part i. ed. A. Sandberger.
II. 1901. (i.) Joh. and W. H. Pachelbel's clavier works, ed. M. Seiffert. (ii.) J. K. Kerll's selected works, part i. ed. A. Sandberger.
III. 1902. (i.) Symphonies of the Mannheim School (J. Stamitz, F. X. Richter, and A. Filtz), ed. H. Reimann. (ii.) 1903, L. Senfl's works, vol. i. ed. Th. Kroyer.
IV. 1903. (i.) Organ works of Joh. Pachelbel, with some by Hieronymus Pachelbel, ed. M. Seiffert.

DENKMÄLER DER TONKUNST IN OESTERREICH.

I. 1894. (i.) J. J. Fux's Masses, ed. J. E. Habert and G. A. Glossner. (ii.) George Muffat's 'Florilegium Primum' for strings, ed. H. Rietsch.
II. 1895. (i.) J. J. Fux's Motets, part i. ed. J. E. Habert. (ii.) Muffat's 'Florilegium secundum,' ed. Rietsch.
III. 1896. (i.) Joh. Stadlmayer's Hymns, ed. J. E. Habert. (ii.) Marcantonio Cesti's 'Pomo d' Oro' part i. ed. Guido Adler. (iii.) Gottlieb Muffat's 'Componimenti musicali,' ed. Guido Adler.
IV. 1897. (i.) J. J. Froberger's clavier works, part i. ed. Guido Adler. (ii.) Cesti's 'Pomo d' Oro,' part ii. ed. Guido Adler.
V. 1898. (i.) Heinrich Isaac's 'Choralis Constantinus' book i. ed. E. Bezecny and W. Rabl. (ii.) Heinrich Biber's violin sonatas, ed. Guido Adler.
VI. 1899. (i.) Handl's 'Opus musicum,' motets, part i. ed. E. Bezecny and J. Mantuani. (ii.) Froberger's clavier works, part ii. ed. Guido Adler.
VII. 1900. Six Trent Codices, MSS. of vocal works of the 15th century, ed. Guido Adler and O. Koller.
VIII. 1901. (i.) And. Hammerschmidt's 'Dialogi,' part i. ed. A. A. W. Schmidt. (ii.) Joh. Pachelbel's 94 compositions for organ, ed. H. Botstiber and M. Seiffert.
IX. 1902. (i.) O. von Wolkenstein's Lieder, ed. J. Schatz and O. Koller. (ii.) J. J. Fux's Church sonatas and overtures (instrum. music, part i.) ed. Guido Adler.
X. 1903. (i.) Orazio Benevoli's Festmesse and Hymnus, ed. Guido Adler. (ii.) J. J. Froberger's organ and clavier works, part iii. ed. Guido Adler.

DENZA, LUIGI, born in 1846 at Castellammare di Stabia, Italy, entered the Conservatoire at Naples at the age of sixteen, and studied composition under Mercadante and Serrao. Although in 1876 an opera from his pen on the subject of Wallenstein was produced at Naples, his activity as a composer has been almost entirely limited to songs, of which he has written over five hundred to Italian, French, and English texts. Residing in London since 1879, he has published a series of drawing-room successes, but he will always be best known as the composer of the Neapolitan ditty, 'Funiculì Funiculà,' which, written in 1880, had the most remarkable run of any modern song, considerably more than half a million copies having been sold, and translated versions issued in almost every civilised language. An unconscious compliment was paid to it by Herr Richard Strauss, who, under the impression that it was a genuine folk-song, put it into his orchestral suite, 'Aus Italien.' Denza is one of the directors of the London Academy of Music. Since 1898 he has been professor of singing at the Royal Academy of Music. E. E.

DÉPART, CHANT DU. This national air was composed by Méhul to some fine lines by Marie Joseph Chénier, for the concert celebrating the fourth anniversary of the taking of the Bastille (July 14, 1794). Chénier was in hiding at the house of Sarrette when he wrote the words, and the original edition, by order of the National Convention, states merely 'Paroles de . . . . ; musique de Méhul.' Of all the French patriotic songs this is the only one actually written during the Terror. The first verse is as follows:—

[Braham used the opening phrase, perhaps unintentionally, in 'The Death of Nelson.'] G. C.

DEPPE, LUDWIG, a distinguished pianoforte teacher, was born at Alverdissen, Lippe, Nov. 7, 1828; studied with Marxsen at Hamburg, subsequently with Lobe at Leipzig, and settled in Hamburg in 1857, where he founded a musical society, and was its conductor till 1868. From 1874 to 1886 he was Hofcapellmeister in Berlin, and in 1876 he conducted the Silesian Musical Festival founded by Count Hochberg. He died at Bad Pyrmont, Sept. 5, 1890. (Riemann's

Lexikon.) The special object of his system of technique, a minute description of which is given in Amy Fay's *Music Study in Germany* (Chicago, 1880, soon translated into German, and finally published in London, by Macmillan in 1886), was the acquirement of an absolutely even touch by the adoption of a very soft tone and a slow pace in practising, a seat much lower than most teachers recommend, and minute attention to the details of muscular movement. It undoubtedly did much to restore a pure style of piano-playing after the exaggerations in the direction of force, into which many of the followers of Liszt had been led. Emil Sauer and Donald F. Tovey are among the most distinguished of the advocates of the Depps system. M.

DERING or DEERING, Richard, Mus.Bac., [an illegitimate son of Henry Dering of Liss near Petworth], was educated in Italy. He returned to England with a great reputation as a musician, and for some time practised his profession in London. In 1610 he took the degree of Bachelor of Music at Oxford. Being strongly importuned thereto he became organist to the convent of English nuns at Brussels in 1617. Upon the marriage of Charles I. in 1625, Dering was appointed organist to the Queen, Henrietta Maria, and was also one of the King's musicians. He died in the Roman communion early in 1630. Dering's published works are wholly of a sacred kind. They consist of 'Cantiones Sacræ sex vocum cum basso continuo ad Organum,' Antwerp, 1597; 'Cantiones Sacræ quinque vocum,' 1617; 'Cantica Sacra ad melodium madrigalium elaborata senis Vocibus,' Antwerp, 1618; 'Cantiones Sacræ quinque vocum,' 1619; 'Canzonette' for three and four voices respectively, two books, 1620 (the author's name is here, as often elsewhere, given as 'Richardo Diringo Inglese'); 'Cantica Sacra ad Duos & Tres Voces, composita cum Basso-continuo ad Organum,' London, 1662. On the title-page of this work, which is dedicated to the Queen-Dowager, Henrietta Maria, Dering is styled 'Regiæ Majestatis quondam Organista.' In 1674 Playford published a second set of Cantica Sacra by various composers, in which are eight motets attributed to Dering, but which Playford, in his preface, candidly admits were 'by some believed not to be his.' In the library of the Royal College of Music are preserved in manuscript imperfect sets of parts of the following compositions by Dering: anthem, 'Unto Thee, O Lord'; madrigal, 'The Country Cry'; some motets, and several fancies for viols. [In the Christ Church library, Oxford, are several MS. motets, etc., and others are in the Music School, Oxford; Peterhouse, Cambridge, the British Museum, etc. His compositions are said in Mace's *Musick's Monument* to have enjoyed great favour at Cambridge before the introduction of the 'scoulding violins.' Additions and corrections from *Dict. of Nat. Biog.*; C. F. A. Williams's *Degrees in Music*; Eitner's *Quellen-Lexikon*, etc. The author of the last-named book doubts the statement often made, that Dering was one of the first to use figured basses in his 'Cantiones Sacræ' of 1597, as no copy of that book seems to be in existence now, and it is possible that it has been confused with the collection of twenty years later.] W. H. H.

DES. The German name for D flat.

DÉSERTEUR, LE, a musical drama in three acts, words by Sedaine, music by Monsigny—his best; produced at the Théâtre des Italiens, March 6, 1769, and revived at the Opéra Comique, Oct. 30, 1843.

DESMARETS, Henri, born in Paris, 1662, and brought up at the court of Louis XIV. His first compositions were sacred, and were made public under the name of Goupillier. His first opera, 'Didon,' in five acts, was performed Sept. 11, 1693. It was followed by 'Circé' (1694), 'Théagène et Chariclée' and 'Les Amours de Momus' (1695), 'Vénus et Adonis' (1697), 'Les Fêtes Galantes' (1698), and additions to 'L'Europe Galante' (1699). About this time he got into trouble in consequence of a secret marriage with the daughter of a dignitary at Senlis, and had to escape to Spain, where he became, in 1700, maître de musique to Philip V. In 1704 his 'Iphigénie en Tauride,' with sundry additions by Campra, was given in Paris, but he does not appear to have returned from Spain until 1714, when he took up his residence at Lunéville, under the patronage of the Duke of Lorraine, with whose help he obtained, in 1722, the ratification of his marriage. In that year his 'Renaud, ou la Suite d'Armide' was performed in Paris, and on Sept. 7, 1741, the composer died, in prosperous circumstances, at Lunéville. M.

DESPRÉS. See Josquin.

DESSAUER, Josef, born in May 1798 at Prague, was a pupil of Tomaczek and Dionys Weber, became a successful and prolific writer of songs, string quartets, pianoforte pieces, etc., and wrote the operas 'Lidwina' (1836), 'Ein Besuch in St. Cyr' (1838), 'Paquita' (1851), 'Domingo' (1860), and 'Oberon' (not performed). His song, 'Lockung' was for many years a favourite in England. Dessauer died at Mödling near Vienna, July 8, 1876. (Riemann's *Lexikon.*)

DESSOFF, Felix Otto, born Jan. 14, 1835, at Leipzig, was a pupil of the Conservatorium there, studying with Moscheles, Hauptmann and Rietz; was conductor in the theatres of various small towns between 1854 and 1860, was appointed in the latter year conductor of the court opera in Vienna, and had a position there in the Conservatorium of the Gesellschaft der Musikfreunde, and as director of the Philharmonic concerts. In 1875 he became conductor at Carlsruhe, being succeeded in Vienna by Richter. In 1881 he was appointed first conductor at the opera at Frankfort. He

published some chamber music, etc., and died at Frankfort, Oct. 28, 1891. (Riemann's *Lexikon.*)

DESTOUCHES, ANDRÉ-CARDINAL, born in Paris about 1672, was one of the 'mousquetaires du roi,' and at the age of twenty-five leapt into fame with his first opera, 'Issé' (1697); he held the offices of 'inspecteur général de l'Académie royale de musique,' and of 'surintendant de musique du roi.' His other works for the French stage are as follows:—

Amadis de Grèce (1699); Marthésie (1699); Omphale (1701); Le Carnaval et la Folie, comédie-ballet (1704); Le professeur de Folie (1711); Callirboé (1712); Télémaque et Calypso (1714); Sémiramis (1718); Les Éléments, an elaborate ballet in which Louis XV. danced (1721), Destouches's best work, to which Lalande contributed two numbers. It has been edited by M. Vincent d'Indy in recent years. Les Stratagèmes de l'Amour, in three acts and prologue (1726).

The last-named work, unlike all the other operas, which have five acts and a prologue, has only three acts and prologue. Besides these dramatic works, some of which contain passages of considerable dignity and beauty, Destouches wrote two cantatas, 'Œnone' (1716), and 'Sémélé' (1719). Some other things are ascribed to him in the *Quellen-Lexikon.* He died about 1749. M.

DESTRANGES, LOUIS AUGUSTIN ÉTIENNE ROUILLÉ, French musical critic, born at Nantes, March 29, 1863, has done much for the advancement of Wagner's cause in France, and has edited since 1890, *L'Ouest-Artiste,* an important French musical review. He is a contributor to the *Guide musical,* and to the *Monde Artiste,* in the latter of which he gave an account of an interview with Verdi at Genoa in 1890, when that composer expressed his opinions of certain French musicians in a way that made a sensation in French musical circles. Destranges has published many critical works; *Les Interprètes musicaux du Faust de Goethe, Les œuvres lyriques de César Franck, L'Œuvre théâtral de Meyerbeer, Fervaal de d'Indy, Les Femmes de Wagner, Tannhäuser, Le Rêve de Bruneau* (and other works of the same master) *Samson et Dalila de Saint-Saëns, Souvenirs de Bayreuth,* etc. G. F.

DESWERT. See SWERT, DE.

DETTINGEN TE DEUM, THE, written by Handel to celebrate the victory of Dettingen (June 26, 1743). 'Begun July 1743'; first performed (not at the thanksgiving service, July 28, but) at the Chapel Royal, St. James's, Nov. 27, 1743. Many of the themes and passages are from URIO.

DEUS MISEREATUR is the psalm (lxvii.) used in the evening service of the Anglican Church after the lessons, alternatively with the Nunc Dimittis. It is considered as a 'responsory psalm' in conformity with the 17th canon of the Council of Laodicea, which appointed lessons and psalms to be read alternately.

In the ancient church the psalm was used at Lauds, and in the Sarum use it was coupled with the bidding prayer on Sundays. Nevertheless it is not in Cranmer's Prayer-Book of 1549, and consequently has no special chant given for it in Marbeck's *Book of Common Prayer Noted,* of 1550. It was appointed as an alternative to the Nunc Dimittis in the revised edition of the Prayer-Book, 1552. Like its fellow, the 98th Psalm, it is not so often used as the Nunc Dimittis, partly because it seems less appropriate than that canticle, and partly because it is longer.

Settings of it are comparatively rare. To take, for example, the most famous ancient collections of services; there is only one setting in Barnard's collection, viz. that by Strogers; there are three in Boyce's, and only two in Arnold's. With regard to the setting in Barnard's collection, it is worth remarking that there is a quaint note at the end of the index suggesting that it should be sometimes used as an anthem. C. H. H. P.

DEUX JOURNÉES, LES. Comédie lyrique in three acts, words by Bouilly, music by Cherubini; produced at the Théâtre Feydeau, Jan. 16, 1800. Translated into German, at various times, as 'Der Wasserträger,' 'Die Tage der Gefahr,' and 'Graf Armand, oder die Zwei unvergesslichen Tage,' and into English as 'The Escapes; or, the Water Carrier'; produced, in a very mutilated state, in London 1801, and at Covent Garden, Nov. 12, 1824, with the 'overture and all the music.' In Italian, produced at Drury Lane, June 20, 1872, as 'Le due Giornate,' for one night only. Beethoven thought the book of this opera the best in existence. It was again revived at the Princess's Theatre, by the Carl Rosa Company, with Santley as Mikheli, Oct. 27, 1875. G.

DEVELOPMENT. A word used in two somewhat different senses; on the one hand of a whole movement, in a sense analogous to its use with reference to an organism; and on the other of a subject or phrase, with reference to the manner in which its conspicuous features of rhythm or melody are employed by reiteration, variation, or any other devices which the genius or ingenuity of the composer suggests, with the object of showing the various elements of interest it contains.

The term is very apt and legitimate when used in the above senses, which are in reality no more than the converse of one another; for the development of a movement is rightly the development of the ideas contained in its subjects; otherwise in instrumental music neither purpose nor unity of design could be perceived. It must, however, be borne in mind that the mere statement of a transformed version of a subject is not development. A thing is not necessarily developed when it is merely changed, but it is so generally when the progressive steps between the original and its final condition can be clearly followed.

The most perfect types of development are to be found in Beethoven's works, with whom not seldom the greater part of a movement is the

constant unfolding and opening out of all the latent possibilities of some simple rhythmic figure. It is impossible to give examples, owing to the space they would require; but reference may be made to the first movement of the Symphony in C minor; the Scherzo of the Ninth Symphony; the Allegro con brio of the Sonata in C minor, opus 111; the last movement of the Sonata in F, opus 10, No. 2; and the last movement of the Sonata in A, opus 101. [Development is the quality which differentiates two important schools of composition in modern music. Brahms's skill in development, for example, is one of his most striking merits, while in Dvořák, Tchaikovsky, and many other admired composers, there is little or nothing that can be called real development, but only reiterations, more or less wearisome as the case may be, of the thematic material, with new tonal effects.] C. H. H. P.

DEVIL'S OPERA, THE, in two acts, words by G. Macfarren, music by G. A. Macfarren; produced at the English Opera House, August 13, 1838.

DEVIN DU VILLAGE, LE (The Village Sorcerer), an Intermède, in one act; words and music by J. J. Rousseau; played for the first time at Fontainebleau, Oct. 18, 1752, and at the Académie Royale, March 1, 1753. Last played in 1829, after more than 400 representations; some one threw a perruque on the stage, which decided its fate. It was translated and adapted as 'The Cunning Man' by Dr. Burney in 1766. [The popular hymn-tune formerly known as 'Rousseau's Dream' is adapted from the divertissement in the 'Devin du Village.'] G.

DEVRIENT, WILHELMINE SCHRÖDER. See SCHRÖDER.

DIABELLI, ANTON or ANTONIO, head of the firm of Diabelli & Co., music publishers in Vienna, and composer of pianoforte and church music, born Sept. 6, 1781, at Mattsee near Salzburg. He was at first a chorister, and afterwards studied at the Lateinschule at Munich. Being intended for the priesthood he received a good general education in the convent of Raichenhaslach, and profited much from association with Michael Haydn, who superintended his musical studies. When the Bavarian convents were secularised in 1803, he gave up the idea of taking orders, went to Vienna, and was warmly received by Joseph Haydn. His piano pieces are well written, at once graceful and good practice, and both these and his numerous arrangements had an immense popularity. His masses, especially the 'Landmessen' (for country churches), are widely spread in Austria, being for the most part easy to execute, and interesting, if not particularly solid. He also composed songs for one and more voices, and an operetta, 'Adam in der Klemme.' He soon became a popular teacher of the pianoforte and guitar, made money enough to become partner with Peter Cappi the music-publisher in 1818, and in 1824 the firm became Diabelli & Co. The latter half of his life is much more interesting than the former, as it brings us into contact with one of the first music-publishing establishments in Vienna, where Czerny was for many years a daily visitor, and where all the leaders of the musical world went in and out. In 1852 the firm became C. A. Spina, and in July 1872 F. Schreiber, under which name it still continues, though the business was purchased in May 1876 by A. Cranz of Hamburg. Its publications amounted to over 25,000 in 1880. In Diabelli's time it acquired the publications of the extinct firms of M. Artaria, L. Kozeluch, Th. Weigl, Berka, Leidesdorf, Pennauer, and Traeg, and in 1855 those of Carlo Mecchetti. The firm published specially for Schubert, Czerny, Strauss, and Lanner; also Marpurg's *Abhandlung von der Fuge*, revised by Sechter, and Reicha's *Lehrbuch*; and, under the title *Ecclesiasticon*, a collection of church music. In 1874 a fresh catalogue of publications was issued, and a thematic catalogue of Schubert's published works, compiled with his usual exhaustive accuracy by Nottebohm. Diabelli died in Vienna, April 8, 1858. His quiet and unassuming life made him many friends, some of whom in 1871 erected a tablet to his memory on the house at Mattsee in which he was born. Beethoven wrote his thirty-three Variations (op. 120) on a waltz of Diabelli's, and this alone will preserve his name to posterity should it disappear in other ways. C. F. P.

DIADESTE. A buffo Italian opera, words by Fitzball, music by Balfe; produced at Drury Lane, May 17, 1838.

DIAMANTS DE LA COURONNE, LES. Opéra-comique in three acts, words by Scribe and St. George, music by Auber; produced at the Opéra Comique, March 6, 1841; at the Princess's Theatre, London, May 2, 1844, as 'Crown Diamonds' with Mme. Anna Thillon in the part of Catarina.

DIAPASON originally meant the interval of an octave, because it was διὰ πασῶν χορδῶν συμφωνία, the consonance arrived at by going 'through all the strings of the lyre' from first to last. In this sense it is used by Dryden:—

> Through all the compass of the notes it ran,
> The diapason closing full in man.

In French it came to mean a tuning-fork, and hence also the pitch which was as it were registered by it; the 'Diapason normal' being the standard of pitch supposed to be generally accepted in France, which gave 435 vibrations for the *a'* above middle C at a temperature of 59° Fahr. which is equivalent in equal temperament to A = 439 at 68° Fahr. (See PITCH.) C. H. H. P.

The Diapasons are the glory of the organ, and may be said to consist of the bold and dignified flue-pipe work of foundation tone and pitch, which forms the backbone of the tonal

department of the organ or manual to which it belongs.

In a narrower sense the subject may be divided under two heads—the Open Diapason and the Stopped Diapason. The Open Diapason—the more important of the two—is literally the ground work of the tone of the organ, and as a Great organ stop consists of cylindrical open metal pipes of true speaking length, the CC pipe approaching 8 feet in length, and being about 6 inches in diameter.

The lower portion of this stop is generally made use of to form the front, or show pipes, when, if necessary, the pipes are made overlength, *i.e.* the pipes are longer than the speaking length; the back part of the pipe is cut away to give the pitch desired, a portion of the metal at the upper end of the speaking length being so cut as to form a tongue or tongues for tuning purposes.

In the Pedal department the pipes are of true 16 feet speaking length, and are usually,—but not always,—made of wood; they are square, or rather rectangular, in section.

The Stopped Diapason is of wood (or of metal in the Treble), and although the pitch is of 8 feet *tone*, the pipe itself is of only half its true speaking length, the upper end being closed by a stopper or tompion, which causes it to sound an octave below the true open speaking length.

In the Treble portion the stoppers are pierced, which imparts a reedier quality to the tone.

The tone of stopped pipes is soft, full, smooth and mellow, blending and contrasting well with other qualities of tone. Lieblich Gedacts, Clarionet Flutes and Rohr Flutes are varieties of the Stopped Diapason. (See BOURDON.)

Very delicate Fancy Stops or Reeds do not come under the heading of Diapason work. T. E.

DIAPENTE was the ancient Greek name for the consonance of the fifth. By the musicians of the 17th and 18th centuries a canon in the fifth was called in Epidiapente or Subdiapente, as it answered above or below.

DIAPHONIA. (1) Dissonance as opposed to Symphonia or consonance. 'Dissonantia et Diaphonia idem sunt: nam, ut dicit Isidorus, diaphoniæ sunt voces discrepantes sive dissonæ, in quibus non est jocundus sed asperus sonus.' (Marchettus of Padua *ap.* Gerbert, *Scriptores*, iii. 80*b*.)

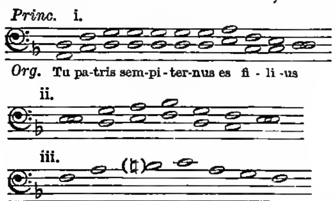
(2) A primitive form of discant, also known by the name of Organum, described by Hucbald[1] and Guido, in which the melody of the vox principalis was accompanied by the vox organalis at the fourth below, subject only to certain rules for the avoidance of the dissonant tritone

and .

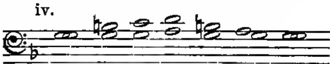
[1] The *Musica Enchiriadis*, which contains the fullest account of Diaphonia, is by some attributed not to Hucbald, but to Odo of Cluny. (See ODO.)

Hucbald's scale was laid out in tetrachords thus:—

the four notes of the second tetrachord being the four finals of the church modes. The golden rule of Diaphony for the avoidance of the tritone, or dissonance between the second note of one tetrachord and the third note of the tetrachord below, is that the vox organalis must never descend below the fourth note of a tetrachord, though it may move from one tetrachord to another according to the movement of the vox principalis. Hucbald illustrates this, in his own peculiar notation, by examples of the same melody in each of the four authentic modes, thus:—



This transposition, we are told, is not apt for organal response, because the B is generally sung natural.



In the first of these examples Gerbert prints B♭ and A as the last two notes of the organum, but the author's comment: 'You will notice that the vox organalis can begin here with a consonance at the fourth below, but that it does not afterwards pass below C on account of the tritone between B♭ and E,' shows that C and D are the notes intended.

Hucbald assures us that diaphony, if sung slowly and with the gravity which befits it—'quod suum est hujus meli,' cannot fail to produce a pleasing effect. (Gerbert, i. 166, 188; Coussemaker, ii. 75.)

Guido gives us the additional information that the intervals of a whole tone, major third and perfect fourth are admissible, but not that of a semitone, and rarely that of a minor third. It follows that the fifth, sixth, and seventh modes, which have a whole tone, major third and perfect fourth above F, C, and G respectively, are best adapted for diaphony, and that the third and fourth modes, which have a semitone and minor third above B♮ and E respectively, are the least suitable.

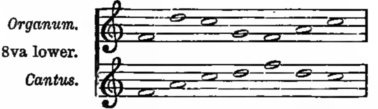
The vox organalis, he tells us, should not, as a rule, descend below C, or, in the higher registers, below F. If a B♮ occur in the vox principalis, the organum must take G. The close may be either at the fourth below or at the unison. In the latter case the vox organalis should rise to

the unison by a whole tone or major third, not by a semitone or minor third.

Both writers appear to apply the term diaphony to a still cruder form of discant, in which the melody was accompanied *throughout* at the fourth below, or sometimes at the fifth below. In this case the vox organalis might be doubled at the octave above, or the vox principalis at the octave below; or four, or even six parts could be obtained by doubling or trebling both principal and organum. If we may judge by the disposition of the tones and semitones in one of Hucbald's examples, as printed by Gerbert, i. 166, the tritone and imperfect fifth were avoided in this form of discant by the use of B♮ and F♯.

In the first volume of the *Oxford History of Music*, Mr. Wooldridge has devoted a chapter to the diaphony of Hucbald and Guido, to which the reader is referred for more precise information on a subject that is not free from difficulty.

(3) The term *diaphonia* is also applied by John Cotton and other writers to the next stage in the development of discant, in which contrary motion is employed, and the vox organalis moves freely both above and below the canto fermo. The following example is from the anonymous treatise printed at p. 225 of Coussemaker's *Histoire de l'Harmonie au Moyen Âge*:—



By the 13th century the term *diaphonia* for polyphony had generally given place to *discantus*, though even so late a writer as Johannes de Muris speaks of 'diaphonia sive discantus' (Coussemaker, *Scriptores*, ii. 395*a*). J. F. R. S.

DIARMID. Grand Opera in four acts, founded on Celtic Legends. Written by the Marquis of Lorne (now Duke of Argyll), K.T., and composed by Hamish MacCunn (op. 34). Produced at Covent Garden (by the Royal Carl Rosa Company), Oct. 23, 1897.

DIATESSARON was the ancient Greek name for the consonance of the fourth—*διὰ τεσσάρων χορδῶν συμφωνία*.

DIATONIC is the name given to music which is confined to notes proper to the signature of the key in which they occur—such as the white notes only, in the key of C major. The different forms of the minor scale are considered diatonic. Therefore the major seventh and major sixth, which often occur instead of the minor seventh and minor sixth in the signature of a minor scale, can be used without the passage ceasing to be diatonic. The theme of the Finale of the Choral Symphony is a splendid example of a diatonic melody. C. H. H. P.

DIBDIN, Charles, was the son of a parish-clerk at Southampton, where he was born on or before March 4, 1745, his mother being in her fiftieth year and he being her eighteenth child. [The statements that his father was a silversmith, and with regard to his mother's age, etc., rest on Dibdin's own assertions and are considered as 'most improbable' by the writer of the article in the *Dict. of Nat. Biog.*] His grandfather was a considerable merchant, who founded the village near Southampton which bears his name. Dibdin's eldest brother, who was twenty-nine years his senior, was captain of an Indiaman and father of the Rev. Dr. Thomas Frognall Dibdin, the well-known bibliographer. [Charles Dibdin was admitted a chorister of Winchester Cathedral in June 1756, and remained in the choir till November 1759. The records of Winchester College give no support to the statement that he was at school there. F. G. E.] He had a good voice and a quickness in learning, which induced Kent to compose anthems for him and teach him to sing them, and Fussell, who afterwards succeeded Kent as organist, taught him the rudiments of music and a few common tunes. All musical knowledge beyond that he acquired for himself, studying chiefly the concertos of Corelli and the theoretical works of Rameau. The place of organist at Bishop's Waltham becoming vacant, Dibdin offered himself for it, but was rejected on account of his youth. When fifteen years old his eldest brother brought him to London and placed him in the music warehouse of Johnson in Cheapside, where however he did not remain long, a friend having advised him to try the stage. He obtained an engagement at Covent Garden Theatre as a singing actor. About the same time he began to write verses as well as music, in which he was encouraged by Beard, then become manager of the theatre, who advised him to try his hand at something for the stage, promising to bring it out at Dibdin's benefit. He accordingly set to work and wrote and composed 'The Shepherd's Artifice,' a pastoral, which was performed at his benefit on May 21, 1762, and repeated in the following season, the author-composer performing the character of Strephon. He had performed in the summer of 1762 at the Richmond theatre on the hill; and he now obtained an engagement at Birmingham, where he not only played at the theatre but sang at Vauxhall. In the beginning of 1765 the opera of 'The Maid of the Mill' was about to be produced at Covent Garden, and some difficulty arising with Dunstall, who was to have played Ralph, Dibdin was requested by Beard to undertake the part. He made a decided hit, and at once established himself firmly in the public favour. In 1767 he composed part of the music for 'Love in the City,' and in the next year two-thirds of that of 'Lionel and Clarissa.' In 1768 Dibdin transferred his services from Covent Garden to Drury Lane, where he signalised himself by his composition of the music of 'The Padlock,' and his admirable performance of Mungo in it. In the

following year he was engaged to compose for Ranelagh, where he produced 'The Maid the Mistress,' 'The Recruiting Sergeant,' and 'The Ephesian Matron.' He likewise composed some of the music for the Shakespeare Jubilee at Stratford-on-Avon in 1769. In 1772 Thomas King, having become proprietor of Sadler's Wells, engaged Dibdin to write and compose some little musical pieces to be brought out there. In 1774 Dibdin produced 'The Waterman,' and in 1775 'The Quaker,' pieces which kept uninterrupted possession of the stage for many years. At the end of the latter season he quitted Drury Lane owing to differences that had arisen between him and Garrick, and exhibited at Exeter Change a piece called 'The Comic Mirror,' in which well-known characters of the day were personated by puppets. In 1776 he took a journey into France, where he remained some time. On his return in June 1778 he was engaged as composer to Covent Garden Theatre at a salary of £10 a week, but he held the appointment for two or three seasons only. In 1782 he projected the erection of the Royal Circus (afterwards the Surrey Theatre), which was opened Nov. 7, 1782, Dibdin undertaking the general management, Hughes the equestrian department, and Grimaldi (father of the afterwards famous clown) the stage direction. For this theatre the ever-active pen of Dibdin was employed in the production of numerous little musical pieces and pantomimes. The first season was remarkably successful. In the second, dissensions broke out amongst the managers, in consequence of which he retired from the theatre. He then made an attempt to regain his position at the patent theatres, and succeeded in getting his opera, 'Liberty Hall' (containing the popular songs of 'Jack Ratlin,' 'The High-mettled Racer,' and 'The Bells of Aberdovey'), brought out at Drury Lane on Feb. 8, 1785. Soon afterwards he listened to a proposal to erect a theatre at Pentonville, where he purposed representing spectacles in which hydraulic effects should be introduced. He proceeded to some extent with the building, which he intended to call 'Helicon,' but his application for a licence was refused, and shortly afterwards a gale of wind destroyed the edifice and put an end to the project. Dibdin next meditated a visit to India, and, to raise funds for the purpose, in 1787-88 made a tour through a large part of England and gave entertainments. He published an account of this tour in 1788, in a quarto volume, under the title of *The Musical Tour of Mr. Dibdin.* In the summer of 1788 he sailed for India, but the vessel being driven to take shelter in Torbay, he finally abandoned his intention and returned to London. Dibdin next resolved to rely on his own unaided exertions, and in 1789 produced at Hutchins's Auction Room, King Street, Covent Garden, the first of a series of 'table entertainments' of which he was author, composer, narrator, singer, and accompanist, under the title of 'The Whim of the Moment.' On the first evening there was an attendance of only sixteen persons. Dibdin, however, persevered; he engaged the Lyceum and brought out 'The Oddities,' the success of which was at once decisive; and no wonder, for it contained, amongst others, the songs, 'To Bachelors' Hall,' ''Twas in the good ship Rover,' 'The Flowing Can,' 'Saturday night at sea,' 'Ben Backstay,' 'I sailed from the Downs in the Nancy,' 'The Lamplighter,' and 'Tom Bowling'; the last written on the death of his eldest brother, Captain Thomas Dibdin. And here it may be observed that nearly the whole of those sea-songs that contributed so largely during the war to cheer and inspire the hearts of our seamen, and gained for their author the appellation of the Tyrtæus of the British Navy, were written by Dibdin for his entertainments. In 1790 'The Oddities' was revised, and ran seventy-nine nights, when it was succeeded by 'The Wags,' which was performed for 108 nights. The great sale of 'Poor Jack,' the copyright of which with eleven other songs he had sold for £60, and which in a short time had brought its purchaser a profit of £500, induced Dibdin about this time to become his own publisher. In 1791 he removed from the Lyceum to a room in the Strand, opposite Beaufort Buildings, which he opened under the name of Sans Souci, and where he remained for four years. He then built for himself a small theatre on the east side of Leicester Place, which he opened under the same name in 1796. In 1795 Dibdin published a *History of the Stage,* in five volumes, and in 1803 his *Professional Life,* in four volumes. [He had published several novels previously, such as *The Devil,* 1785; *Hannah Hewitt,* 1792; *The Younger Brother,* 1793; and a periodical *The Bystander,* 1787.] In 1805 he sold his theatre and retired from public life. In 1803 Government granted him a pension of £200 per annum, but this being withdrawn on a change of ministry he was led to open a music shop in the Strand as a means of subsistence. The speculation, however, failed, and he became bankrupt. A subscription for his relief was opened in 1810, with part of which an annuity of £30 was purchased for himself, his wife and daughter successively. Subsequently his pension was restored to him. [He brought out another play 'The Round Robin' at the Haymarket in 1811, and composed songs for Dr. Kitchener's 'Belle Assemblée.'] Towards the end of the year 1813 Dibdin was attacked by paralysis, and on July 25, 1814, he died at his residence in Arlington Street, Camden Town. He was buried in the cemetery belonging to the parish of St. Martin-in-the-Fields, in Pratt Street, Camden Town, where there is a monument to his memory. Dibdin's two sons, Charles and Thomas, were well-known dramatists.

The following is a list of Dibdin's operas and

other dramatic pieces. Of those marked thus * he was author as well as composer:—

*The Shepherd's Artifice, 1763; Love in the City (part of the music), 1767; Damon and Phillida, Lionel and Clarissa (part of the music), and The Padlock, 1768; The Maid the Mistress, The Recruiting Sergeant, The Ephesian Matron, The Jubilee, Doctor Ballardo, Queen Mab, and The Captive, 1769; Pigmy Revels, 1770; The Wedding Ring, and The Institution of the Garter, 1771; *The Ladle, *The Mischance, The Brickdust Man, *The Widow of Abingdon, and The Palace of Mirth, 1772; The Trip to Portsmouth, The Deserter (partly selected from Monsigny and Philidor), and *The Grenadier, 1773; *The Waterman, A Christmas Tale, and *The Cobler, 1774; *The Quaker, and The Two Misers, 1775; *The Seraglio, The Blackamoor, *The Metamorphoses, *The Razor Grinder, *Yo, Yea, or, The Friendly Tars, *The Old Woman of Eighty, *The Mad Doctor, *She is mad for a Husband, *England against Italy, *The Fortune Hunter, and *All's not Gold that Glitters, 1776; *Poor Vulcan, *Rose and Colin, *The Wives Revenged, *Annette and Lubin, and *The Milkmaid, 1778; Plymouth in an Uproar, *The Chelsea Pensioner, *The Mirror, and *The Touchstone, 1779, *The Shepherdess of the Alps, *Harlequin Freemason, and *The Islanders, 1780; *Jupiter and Alcmena, 1781; *None so blind as those who won't see, 1782; *The Barrier of Parnassus, *The Graces, *The Saloon, *Mandarina, or, The Refusal of Harlequin, *The Land of Simplicity, *The Passions, *The Statue, *Clump and Cudden, *The Benevolent Tar, *The Regions of Accomplishment, *The Lancashire Witches, *The Cestus, *Pandora, *The Long Odds, Tom Thumb, and Harlequin the Phantom of a Day (all for the Royal Circus), 1782-84; *Liberty Hall, 1785; Harvest Home, 1787; *A Loyal Effusion, 1797; and *Hannah Hewitt, 1798.

His table entertainments were—

The Whim of the Moment, and The Oddities, 1789; The Wags, 1790; Private Theatricals, 1791; The Quizzes, 1792; Coalition, 1792; Castles in the Air, 1793; Nature in Nubibus, and Great News, 1794; Will of the Wisp, and Christmas Gambols, 1795; Datchet Mead, and The General Election, 1796; The Sphinx, and Valentine's Day, 1797; King and Queen, 1798; A Tour to the Land's End, and The Goose and the Gridiron, 1798; Tom Wilkins, 1799; The Cake House, 1800; A Frisk, 1801; Most Votes, 1802; New Year's Gifts, Britons, strike home, Heads and Tails, Valentine's Day, The Election, A Trip to the Coast, The Frolic, 1804; The Professional Volunteers, Rent Day, Commodore Pennant, Heads or Tails, and Cecilia, 1805.

Besides these Dibdin was author of 'The Gipsies,' a comic opera for which Dr. Arnold composed the music, *The Harmonic Preceptor*, a didactic poem, 1804, *The Musical Mentor*, *Music Epitomised*, and a few novels and miscellaneous works. [Corrections and additions from *Dict. of Nat. Biog.* See also *Musical Times* for 1886, p. 68. A bibliography of Dibdin's works, by a descendant, appeared intermittently in *Musical News* during 1902.] W. H. H.

DIBDIN, Henry Edward, the youngest son of Charles Dibdin the younger, was born at Sadler's Wells, Sept. 8, 1813. He acquired his first knowledge of music from his eldest sister, Mary Anne, afterwards Mrs. Tonna, an excellent harpist, pupil of Challoner and Bochsa. He subsequently studied the harp under Bochsa, and also became proficient on the organ and violin. [He appeared as a harpist at Covent Garden, August 3, 1832, at Paganini's last appearance.] Early in 1833 Dibdin went to Edinburgh, where he [held the honorary post of organist of Trinity Chapel, and] established himself as a teacher. He died there May 6, 1866. Dibdin composed a few psalm tunes and some pieces for the organ and pianoforte, but he is best known as the compiler of *The Standard Psalm Tune Book* (1857), the largest and most authentic collection of psalm tunes ever published, the contents being mainly derived from ancient psalters; also of *The Praise Book* (1865). Besides his attainments as a musician Dibdin possessed considerable skill as a painter and illuminator. Additions from *Dict. of Nat. Biog.* W. H. H.

DICKONS, Mrs., daughter of a gentleman named Poole, was born in London about 1770, or possibly rather later. Her musical talent was early developed. [At six years old she played Handel's concertos.] She became a pupil of Rauzzini, and in 1787 appeared at Vauxhall Gardens as a singer. Her progress was rapid, and she became engaged at the Concert of Ancient Music and other concerts. On Oct. 9, 1793, she made her appearance at Covent Garden Theatre as Ophelia in 'Hamlet' [and shortly afterwards as Polly in the 'Beggar's Opera']. She next sang in several of the principal towns of England, Scotland, and Ireland with great success. [She married in 1800, and retired for a time, but resumed her career, and reappeared at Covent Garden in 1807 as Mandane in 'Artaxerxes.' She joined the Drury Lane company in 1811.] She was subsequently engaged at the King's Theatre, where on June 18, 1812, she performed the Countess in Mozart's 'Nozze di Figaro' to the Susanna of Mme. Catalani. In 1816 she was engaged at the Italian opera at Paris. From thence she went to Italy. On her return to England she was again engaged at Covent Garden, where she appeared Oct. 13, 1818, as Rosina in Bishop's adaptation of Rossini's 'Barber of Seville.' In 1822 she was compelled by ill-health to relinquish her profession. [See the *Dict. of Nat. Biog.*, from which the additions above are taken.] She died May 4, 1833. W. H. H.

DICTIONARIES OF MUSIC. The oldest known work of the kind is that of the learned Flemish musician Jean Tinctor, entitled 'Terminorum musicæ Diffinitorium,' 15 sheets, 4to, undated, but in all probability printed with the type of Gérard de Flandre, and published at Naples, 1474. The original is extremely rare, but Forkel has reprinted it in his *Allgemeine Litteratur der Musik*, and thus placed it within the reach of students. (See Tinctoris.) The *Glossarium* of Du Cange also includes many musical terms and explanations useful to historians of music. Musical archæologists will further do well to consult Ménage—whose *Dictionnaire étymologique de la langue Françoise* appeared in 1650—and the *Dictionnaire Universel* (Rotterdam, 1690) of Furetière, afterwards remodelled by Basnage (The Hague, 1701). These works are often overlooked, and the credit of having written the two oldest dictionaries of music is generally assigned to Janowka and the Abbé Sébastien de Brossard. The Bohemian organist wrote in Latin, and his *Clavis ad thesaurum magnæ artis musicæ* (Prague, 1701) was unknown to Brossard when he published his *Dictionnaire de Musique* (Ballard: Paris, 1703). See Brossard. Taking into account the enormous difficulties under which they laboured, both authors are deserving of great praise for works so eminently useful to students of musical terminology. Amongst their imitators may be named Walthern, Grassineau, and J. J. Rousseau. Walthern's work, *Alte und neue musikalische*

Bibliothek, oder musikalisches Lexicon, was originally published at Weimar, but the second edition (Leipzig, 1732) is the important one. In it he so far adopted the plan suggested by Brossard at the end of his dictionary, that his work forms a kind of complement to that. In his *Musical Dictionary* (London, 1740, 1 vol. 8vo; 2nd ed. 1769) James Grassineau made ample use of Brossard's definitions and examples; but his work is much more complete, and his remarks on the music of the ancients and on musical instruments evince much reading, and may still be consulted with advantage. J. J. Rousseau in his *Dictionnaire de Musique* (Geneva, 1767) also utilised the labours of Brossard, especially with regard to ancient music; but it is to his literary ability rather than to his elevated views on æsthetics that the enormous success of his dictionary is due. Not only was it translated into several languages, but it was imitated by Meude-Monpas (Paris, 1788) and by Reynvaan (Amsterdam, 1795), only half of whose *Musikaal Kunst Woorden-book* was ever published. Rousseau's influence may be traced also in the *Dictionnaire de Musique* contained in the *Encyclopédie Méthodique*. That enormous mass of undigested material forms two huge 4to volumes, of which the first (1791) was compiled under the superintendence of Framery and Ginguené, with the assistance of the Abbé Feyjou and of Surremain de Missery, and is far superior to the second (1818) edited by Momigny, whose theories were not only erroneous but at variance with those of the first volume. In spite, however, of its contradictions and errors, both scientific and chronological, a judicious historian may still find useful materials in this dictionary.

Whilst Rousseau's writings were exciting endless discussions among French musicians, the labours of Gerber and Forkel in Germany were marking a new era in the literature of music. By his History (*Allg. Geschichte der Musik*, Leipzig, 1788-1801) Forkel did as much for the musicians of Europe as Burney and Hawkins had in all probability done for him. His influence may be recognised in Koch's *Musikalisches Lexicon* (Frankfort, 1802), a work in all respects superior to that of G. F. Wolf (Halle, 1787). Koch also published his *Kurzgefasstes Handwörterbuch der Musik* (Leipzig, 1807), a work distinct from his Lexicon, but quite as useful and meritorious. But the happy influence of Forkel is more especially evident in the biographical work of Gerber, *Neues historisch-biographisches Lexicon der Tonkünstler* (Leipzig, 1812-14, 4 vols.) a work in every way a great improvement on his first edition (Leipzig, 1790-1792, 2 vols.), although incomplete without it, owing to his habit of referring back. Gerber was the model for the *Dictionnaire historique des musiciens* of Choron and Fayolle (Paris, 1810-11), the first book of the kind published in France, and preceded by an excellent Introduction, by Choron, of which Fétis in his turn has made good use.

In Italy the Abbé Gianelli was the author of the first dictionary of music printed in Italian (Venice, 1801, 2nd ed. 1820); but his book has been entirely superseded by the *Dizionario e Bibliografia della Musica* of Dr. Lichtenthal, the first two volumes of which are devoted to music proper, while the last two contain an historical and critical catalogue, which has been largely utilised by Fétis. Lichtenthal doubtless took many of his materials from Forkel and Gerber, but his work shows a marked advance upon those of Koch and Rousseau in the definitions of words, the descriptions of instruments, and the historical articles. It was translated into French by Mondo (Paris, 1821, 2 vols. 8vo). The *Dictionnaire de Musique moderne* of Castil Blaze (Paris, 1821, 2nd ed. 1825, 2 vols.), in part copied from that of Rousseau, attained a certain amount of success from the position of its author and its animated style; but it is by no means equal either in extent or accuracy to Lichtenthal's work. Partly founded on a similar model is the *Dictionnaire de Musique d'après les théoriciens, historiens, et critiques les plus célèbres* (1844; 5th ed. 1872) by MM. Marie et Léon Escudier, a compilation, as its title indicates, but containing much useful information in a small space, especially on ancient musical instruments and on contemporaneous matters. Jos. d'Ortigue, on the other hand, opened up a new line in his *Dictionnaire liturgique, historique, et théorique de Plain-chant et de Musique d'église* . . . (Paris, 1854 and 1860), an interesting and valuable work written from the point of view of an orthodox Roman Catholic. It has the merit of quoting distinctly all the sources from which the author derived his information, and of mentioning by name all those who assisted him; and for the special branch of which it treats this dictionary is hitherto without a rival.

The *Biographie universelle des Musiciens*, by F. J. Fétis, was in its own time equally unrivalled. The first edition (Paris and Brussels, 1835-1844), in 8 vols. 8vo, double columns, contains a long and admirable introduction, not republished in the second edition. That edition (Paris, 1860-1865), also in 8 vols. 8vo, though a great advance on the former one, is still very imperfect. It swarms with inaccurate dates; its blunders, especially in regard to English musicians, are often ludicrous; it contains many biographies evidently written to order; and its author, while severely criticising his victims, has an ugly knack of borrowing from them at the same time: but his labour and spirit were prodigious, he is always readable and often impartial, and while he develops a shrewd and even philosophic critical faculty, he has the art of expressing his judgment with great clearness. (The necessary supplement to Fétis's book was edited by Arthur Pougin and published in 1878 in two volumes.)

Whilst the French authors were writing their dictionaries, either on Rousseau's plan or were following the lead of Choron, Fétis, and d'Ortigue, by enlarging their sphere beyond that of musical terminology, the tendency in Germany was to include in dictionaries not only all that concerns the technical part of music, but the biography of musicians, and the philosophy, literature, and bibliography of the art. Gustav Schilling therefore justly entitles his dictionary *Encyclopädie der gesammten musikalischen Wissenschaften, oder universal Lexikon der Tonkunst* (Stuttgart, 1835-38, 7 vols. 8vo). In this work biography holds an important place, but the other departments are treated with equal skill and research, so that the whole forms a precious depository of information, and is a notable advance on all previous works of the kind in other countries. Gassner, in his *Universal Lexikon der Tonkunst* (Stuttgart, 1849, 1 vol.), and Bernsdorf, in his *Neues universal Lexikon der Tonkunst*, in continuation of Schladebach (Dresden and Offenbach, 1856-61, 3 vols.), have obviously made considerable use of Schilling, and both works have a well-merited reputation. Koch's *Lexikon* has been re-edited by Dommer (Heidelberg, 1865), and Oscar Paul has published a useful *Handlexikon der Tonkunst* (Leipzig, 1873), in which condensation is carried to its utmost limit. But of all the German works which have followed Schilling the most important and deserving of mention is the *Musikalisches Conversations-Lexikon*, edited by Mendel, and since his unfortunate death by August Reissmann (Berlin, 1870 etc.), the second edition of which was published in 11 vols. in 1883. There is a want of proportion in some of the articles, a cumbrousness of style and an occasional appearance of bias, but the staff of writers is unequalled for eminence and number, and there is much in their essays which has never been collected before, and which is highly valuable. In dictionaries, however, one work can never supersede another, and perfect information is only to be got by consulting all. [The handiest of musical dictionaries is the *Musik-Lexikon* of Dr. Hugo Riemann, of which the first edition appeared at Leipzig in 1882, and the fifth in 1900. It was translated into English by J. S. Shedlock, with a good many additions in articles dealing with English musicians (no date). A French translation by Georges Humbert, professor of history at the Conservatoire of Geneva, appeared after the fourth edition. In 1900 Dr. Robert Eitner, whose *Verzeichniss neuer Ausgaben alter Musikwerke* appeared in 1870, and his *Bibliographie der Musik-Sammelwerke* (with F. X. Haberl) in 1877, began the publication of his monumental *Quellen-Lexikon*, the most trustworthy book of the kind, in which authority is quoted for almost every statement made. Dr. Emil Vogel's *Bibliothek der gedruckten weltlichen Vocalmusik Italiens* (2 vols. 1892) is in alphabetical order of composers' names, and may therefore be counted among dictionaries.]

Space compels us to confine ourselves to a mere mention of such works as the Swedish dictionary of Envalson (Stockholm, 1802); the illustrated dictionary of Soullier (Paris, 1855); and the Spanish dictionaries of Melcior (Lerida, 1859); Parada (Madrid, 1868) and B. Sandoni (5 vols.). Besides musical lexicons properly so called there are a certain number of Encyclopedias and Dictionaries of the Fine Arts, which contain important articles on music and musical terms. Amongst these may be cited the *Encyclopédie* of Diderot and D'Alembert (Paris, 1751-80, 35 vols.); the *Allgemeine Theorie der schönen Künste* (Leipzig, 1773), by Sulzer, of which Millin has made great use in his *Dictionnaire des Beaux-Arts* (Paris, 1806); the *Allgemeine Encyclopädie der Wissenschaften und Kunste* (Leipzig, 1818-47), by Ersch and Gruber, an enormous collection, containing many remarkable articles on music; and the *Dictionnaire de l'Académie des Beaux-Arts*, begun in 1858, of which the fifth vol. (1887-96) concludes with the words 'Exercices' and 'Exposition.' It contains new and striking articles by Halévy, Henri Réber, and other eminent musicians.

In England, among cyclopædias, the earliest place is held by that of Rees (1819), the musical articles in which were written by the eminent Dr. Burney. In the ninth edition of the *Encyclopædia Britannica* (begun 1875) the musical articles—restricted in number—were at first written by Dr. Franz Hueffer, and subsequently by W. S. Rockstro. [The supplementary volumes of that edition devote much more space to music, and the articles are by various authors. The musical articles in the *Dictionary of National Biography* (1885-1903) are full and generally accurate.] Chambers's *Cyclopædia* (1741-53 or 1778-91) on a smaller, and Brande's Dictionary (1842; 3rd ed. 1853) on a still smaller scale, contain good articles on musical topics, the former including the leading biographies. The Dictionaries are few and unimportant:—*A Short Explication of such Foreign Words as are made use of in Musick Books* (1724), Grassineau (1740), Busby (1786), Danneley (1825), Jousse (1829), Wilson, or Hamilton's and Hiles's *Dictionaries of Musical Terms*—each a small 8vo volume—are specimens of the manner in which this department has been too long filled in England. As regards biography, the *Dictionary of Musicians* (2 vols. 8vo, 1822 and 1827), though good in intention, is imperfectly carried out. A great advance was made in the *Dictionary of Musical Terms*, edited by Dr. Stainer and Mr. W. A. Barrett (1 vol. 8vo, Novello, 1876, 2nd ed. 1898), and in a condensed version as one of Novello's *Music Primers*. [The same series contains a not very trustworthy *Biographical Dictionary of Musicians* by Dr. W. H. Cummings, and a *Dictionary of Violin Makers* by C. Stainer.

A useful little *Dictionary of Fiddlers*, by A. Mason Clarke, was published by W. Reeves in 1895, and a curious work in dictionary form, on *The Organ*, written and published by John Watson Warman, was begun in 1898. It is only fitting that brief mention should be made of the first edition of Sir George Grove's *Dictionary of Music and Musicians*, of which the first part appeared in 1878, and the last, with the appendix, in 1889. The *Biographical Dictionary of Musicians* by James D. Brown (Paisley, 1886) was the forerunner of his excellent *British Musical Biography*, written in collaboration with Stephen S. Stratton and published in 1897. David Baptie's *Musicians of all Times*, 1889, is less trustworthy.]

An excellent work for its date and its intention is the *Complete Encyclopædia of Music* by John W. Moore (Boston, U.S.A., 1852), a large 8vo volume of 1000 pages, constructed on a popular basis, which would be more valuable if it were corrected and modified to date. [The *Cyclopædia of Music and Musicians*, edited by John Denison Champlin, Junior, and William F. Apthorp, (New York, 1889-91) is contained in three handsome volumes, and is well arranged; the *Biographical Dictionary of Musicians* by Theodore Baker, Ph.D. (New York, 1900) is of distinct value in regard to American musicians, but the author's reliance on Riemann's *Lexikon* is perhaps rather too complete.] G. C.

DIDO AND ÆNEAS. Opera in three acts, written by Nahum Tate, music by Henry Purcell. The actual date of the first performance of the work, at the boarding-school of one Josias Priest at Chelsea, has not yet been established: Hawkins takes it to have been written and played when Purcell was only nineteen years of age, *i.e.* in 1677; Dr. Cummings, in his edition of the work for the Purcell Society, prefers the date 1680, as that was the first year of Priest's occupation of the Chelsea premises. Mr. W. Barclay Squire has lately shown that the date must be between 1688 and 1690. (See PURCELL.) The music was occasionally performed at the Ancient Concerts, and elsewhere; a stage-revival of it was given by the pupils of the Royal College of Music, at the Lyceum Theatre, Nov. 21, 1895, in connection with the Purcell bicentenary celebrations. The Purcell Operatic Society celebrated its inauguration by a revival of the opera at the Hampstead Conservatoire on May 18, 1900, and subsequently produced it at the Coronet Theatre, March 25, 1901. M.

DIÉMER, LOUIS, French pianist, born in Paris, Feb. 14, 1843, studied at the Conservatoire under Marmontel, Bazin, and Ambroise Thomas, winning the first piano prize at the age of thirteen and that for fugue three years afterwards. In 1888 he succeeded Marmontel as professor of one of the higher pianoforte classes at the same institution. He was well known in France and elsewhere as a pianist of rare accomplishment before the Paris Exhibition of 1889, at which he won especial fame in the compositions of the harpsichord masters of the past. A consequence of this was the creation of the 'Société des instruments anciens' which, with his help, has appeared often in London with great success. He established also a triennial competition for those among the male piano students of the Conservatoire who have obtained the first prize during the previous ten years. Diémer has published a number of compositions, of which the following are the most important:—a 'Concertstück' op. 31, and a concerto in C minor op. 32, for piano and orchestra; a 'Concertstück' op. 33, for violin and orchestra; besides some interesting chamber works, songs, and very numerous pianoforte solos, as well as a collection of 'Clavecinistes français.' G. F.

DIES IRÆ (*Prosa de Mortuis. Prosa de Die Judicii. Sequentia in Commemoratione Defunctorum.* Ὦ ὀργῆς ἐκεῖν' ἡμέρα). The Sequence, or Prose, appointed, in the Roman Missal to be sung, between the Epistle and Gospel—that is to say, immediately after the Gradual and Tractus—in Masses for the Dead.

The truth of the tradition which ascribes the poetry to Thomas de Celano, the friend, disciple, and biographer, of S. Francis of Assisi, seems to be established beyond all controversy. Thomas was admitted to the Order of the Friars Minor soon after its formation; enjoyed the privilege of the closest intimacy with its saintly founder; and is proved, by clear internal evidence, to have written his 'Vita Sancti Francisci' between Oct. 4, 1226, on which day the death of the Saint took place, and May 25, 1230—the date of the translation of his relics. This well-established fact materially strengthens the tradition that the 'Dies iræ' was written not very many years after the beginning of the 13th century; and effectually disposes of the date given by some modern hymnologists, who, though attributing the sequence to Thomas de Celano, assert that it was composed *circa* 1150. Bartholomæus Pisanus (ob. 1401) says that it was written by Frater Thomas, who came from Celanum; and that it was sung in Masses for the Dead. But, many years seem to have elapsed before its use became general. It is very rarely found, in early MS. Missals, either in England, France, or Germany; and is wanting in many dating as late as the close of the 15th century, or the beginning of the 16th. It is doubtful, indeed, whether its use was recognised in all countries, until its insertion in the Missale Romanum rendered it a matter of obligation.

As an example of the grandest form of mediæval Latin poetry—the rhymed prose[1] which here attains its highest point of perfection—the 'Dies iræ' stands unrivalled. Not even the 'Stabat Mater' of Jacobus de Benedictis, written

[1] See SEQUENCE.

nearly a century later, can be fairly said to equal it. For, in that, the verses are pervaded, throughout, by one unchanging sentiment of overwhelming sorrow; whereas, in the 'Dies iræ,' wrath, terror, hope, devotion, are each, in turn, used as a natural preparation for the concluding prayer for 'Eternal rest.' The tenderness of expression which has rendered some of its stanzas so deservedly famous, is contrasted, in other verses, with a power of diction, which, whether clothed in epic or dramatic form, is forcible enough to invest its awful subject with an all-absorbing interest, a terrible reality, which the hearer finds it impossible to resist. A great variety of unfamiliar 'readings' is to be found in early copies [for information as to these Julian's *Dictionary of Hymnology* should be consulted].

Sir Walter Scott's rendering of the opening stanzas, at the end of 'The Lay of the Last Minstrel, is known to every one. A very fine English paraphrase, by the Rev. W. I. Irons, B.D., beginning, 'Day of wrath, O day of mourning!' is inserted, in company with the old plain-song melody, in the Rev. T. Helmore's 'Hymnal Noted.' Innumerable German translations are extant, of which the best known is that beginning, 'Tag des Zorns, du Tag der Fülle.'

The old ecclesiastical melody is a remarkably fine one, in Modes i. and ii. (Mixed Dorian) ranging throughout the entire extent of the combined scale, with the exception of the octave to the final. No record of its origin, or authorship, has been preserved; but we can scarcely doubt, that, if not composed by Thomas de Celano himself, it was adapted to his verses at the time of their completion. The melody is not proper sequence melody, but its structure is essentially different since it only extends over part of the prose, and is then repeated with a certain difference for the closing lines. (See SEQUENCE.) The idea of it is evidently taken from the verse of the Respond 'Libera me Domine' used in the office of the dead, which runs thus:—

Fine as this melody is, it has not been a favourite with the greatest of the polyphonic masters; partly, no doubt, on account of the limited number of dioceses in which the sequence was sung, prior to its incorporation in the Roman Missal; and, partly because it has been a widespread custom, from time immemorial, to dispense with the employment of polyphonic harmony, in masses for the Dead. The 'Dies iræ' is wanting in Palestrina's 'Missa pro Defunctis,' for five voices, printed at the end of the third edition of his First Book of Masses (Rome, 1591); and, in that by Vittoria, sung in 1603 at the funeral of the Empress Maria, wife of Maximilian II., and printed at Madrid in 1605. It is found, however, in not a few masses by composers of somewhat lower rank; as, for instance, in a Missa pro Defunctis, for four voices, by Giovanni Matteo Asola (Venice, 1586); in one for eight voices, by Orazio Vecchi (Antwerp, 1612); in one for four voices, by Francesco Anerio; and in one for four voices, by Pitoni. In all these masses, the old ecclesiastical melody is employed as the basis of the composition; but Pitoni has marred the design of an otherwise great work, by the introduction of alternate verses, written in a style quite unsuited to the solemnity of the text.

With modern composers the 'Dies iræ' has always been a popular subject; and more than one great master has adapted its verses to music of a broadly imaginative, if not a distinctly dramatic character. Among the most important settings of this class, we may enumerate those by Colonna and Bassani, copies of which are to be found in the library of the Royal College of Music; that in Mozart's 'Requiem,' of which, whether Mozart composed it or not, we may safely say that it was written by the greatest composer of church music that the school of Vienna ever produced: the two great settings by Cherubini; the first, in his Requiem in C Minor, and the second, in that in D Minor; the extraordinarily realistic settings in the Requiems of Berlioz, Verdi, and Bruneau; as well as a not very interesting setting in Gounod's 'Mors et Vita.' For further information concerning the poem and other musical compositions on the words, the reader is referred to a series of articles in *The Musical Review* (Novello) for June 1883.

W. S. R.; additions by W. H. F.

DIESIS, from the Greek δίεσις, which means division, and was the name given to quarter tones in their system. Aristotle takes it as the unit of musical tones, the last subdivision of intervals. In modern acoustics it means the interval which results from the two sounds which are arrived at by tuning up three perfect thirds and an octave, which is the same as the difference between a major or diatonic semitone, and a minor or chromatic semitone, the ratio of their vibrations being 125 : 128. It is commonly called the Enharmonic Diesis, enharmonic being the word which is applied to intervals less than a semitone. *Dièse* has been adopted by the French as their term for sharp. C. H. H. P.

DIETRICH, ALBERT HERMANN, born August 28, 1829, at Golk near Meissen, and educated at the Gymnasium at Dresden, from 1842 onwards. While here he determined to devote himself to music, but in spite of this resolution, he went, not to the Conservatorium, but to the University of Leipzig, in 1847, having previously studied music with Julius Otto. At Leipzig his musical tuition from 1847 to 1851 was in the hands of Rietz, Hauptmann, and Moscheles.

From 1851 he had the advantage of studying under Schumann at Düsseldorf until 1854, when the master's mental condition made further instruction impossible. During this time, in the autumn of 1853, an incident occurred which brought Dietrich into collaboration with his master and Johannes Brahms. Joachim was coming to Düsseldorf to play at a concert on Oct. 27, and Schumann formed the plan of writing a joint violin-sonata with the other two, by way of greeting. Dietrich's share was the opening allegro in A minor. [See SCHUMANN.] In 1854 his first symphony was given at Leipzig, and a year later he was appointed conductor of the subscription concerts at Bonn, becoming town Musikdirector in 1859. In 1861 he became Hofkapellmeister at Oldenburg. On his frequent visits to Leipzig, Cologne, and elsewhere, he has proved himself an excellent conductor, and an earnest musician. He became a member of the Kgl. Akademie der Künste and in 1899 Kgl. Professor. He retired in 1890 and settled in Berlin. Among his works may be mentioned an opera in three acts, 'Robin Hood,' performed with success at Frankfort in 1879; pieces for pianoforte, op. 2; songs, op. 10; a trio for piano and strings, op. 9; a symphony in D minor, op. 20; a concert overture, 'Normannenfahrt'; 'Morgenhymne'; 'Rheinmorgen'; and 'Altchristlicher Bittgesang'; works for choir and orchestra; concertstück for horn (op. 27) concertos for horn (op. 29), violin (op. 30), and violoncello (op. 32); a pianoforte sonata for four hands; etc. His incidental music to 'Cymbeline' was played in the Lyceum revival in 1896. In 1899 he published, in conjunction with J. V. Widmann, an interesting series of *Recollections of Brahms*. M.

DIETRICH, SIXT, an excellent German composer, born between 1490 and 1492 at Augsburg, died at St. Gall, Oct. 21, 1548. He was at the Freiburg University, and went in 1517 to Strasburg, becoming a schoolmaster in Constance in 1518. About 1535 he seems to have inherited some money, and to have renewed his own studies in music and other things, entering the university of Wittenberg in 1540. He returned to Constance, quitting it at the time of the attack of the Emperor Charles V., and dying two months afterwards. He published *Epicedion Thomae Sporeri* in five parts in 1534; a first book of Magnificats in 1535; thirty-six Antiphons, Witt. 1541; and 'Novum opus musicum,' Witt. 1545. Five of his compositions are in the *Dodecachordon*. (*Quellen-Lexikon.*)

DIETSCH, PIERRE LOUIS PHILIPPE, a French composer and conductor, was born at Dijon, March 17, 1808, was educated by Choron and at the Paris Conservatoire, was maître de chapelle at S. Eustache and in 1860 became chief conductor of the Grand Opéra; was dismissed by Perrin, the director in 1863, and died Feb. 20, 1865. He wrote much church music and organ works, and acquired an unenviable notoriety as the purchaser of Wagner's 'Flying Dutchman' libretto, at a time when Wagner was in straitened circumstances in Paris. Dietsch's composition was produced at the Grand Opéra, Nov. 9, 1842. M.

DIEUPART, CHARLES, a native of France, who came to England in the latter part of the 17th century, was a fine performer on the violin and harpsichord. In 1707 he was associated with Clayton and Haym in introducing translations of Italian operas at Drury Lane Theatre. [CLAYTON.] After the discontinuance of those operas and the failure of their subsequent concert speculation, Dieupart devoted himself entirely to teaching the harpsichord, and for some time taught, and gave concerts (1711-12) with considerable success, but towards the latter part of his life he acquired low habits, and frequented alehouses, where he entertained the company by his fine performance of Corelli's violin solos. He died in necessitous circumstances, and at an advanced age, about the year 1740. He published 'Six Suittes de Clavessin, divisées en Ouvertures, Allemandes, Courantes, Sarabandes, Gavottes, Menuets, Rondeaux, et Gigues, composées et mises en Concert pour un Violon et Flute, avec une Basse de Viole et un Archilut.' (Roger, Amsterdam.) [A reprint of a portion of them was published by Walsh in London as 'Select lessons for the harpsichord or spinet.' In Dannreuther's *Musical Ornamentation*, part i., it is clearly proved that Dieupart's suites were well known to Bach, who based the prelude of his 'Suite Anglaise' in A, No. 1, on the gigue from Dieupart's first suite in the same key. In a lecture at the Royal Institution, April 30, 1892, the author suggested that the name 'Suites Anglaises' may have been a term in use in Bach's family for the suites which Bach had based upon the works of a composer whose vogue was greatest in England.] W. H. H.

DIGNUM, CHARLES, son of a master tailor, was born at Rotherhithe about 1765. His father, being a Roman Catholic, placed him when a boy in the choir of the Sardinian ambassador's chapel in Duke Street, Lincoln's Inn Fields, where his fine voice attracted the attention of Samuel Webbe, the glee composer, then organist there, who undertook to instruct him. On leaving the choir he had no idea of pursuing music as a profession, but was rather solicitous of being sent to Douay to be educated for the priesthood. His father's pecuniary embarrassments, however, and other circumstances prevented it. He decided on adopting the profession of music, and articled himself to Thomas Linley for seven years. Linley bestowed the utmost attention on his pupil, and would not allow him to sing in public until his powers were sufficiently matured. In 1784 Dignum made his first appearance at Drury Lane Theatre as Young Meadows in 'Love in a Village,' and,

although his figure was somewhat unsuited to the part, the beauty of his voice and his judicious singing secured him a favourable reception. He next appeared as the hero in Michael Arne's 'Cymon,' and fully established himself in public favour. In 1787, on the removal of Charles Bannister to the Royalty Theatre, Dignum succeeded to a cast of characters better suited to his person and voice. In 1790 he gained much credit by his performance of Crop the miller, in Storace's 'No Song no Supper,' of which he was the original representative. After singing at the theatres, at Vauxhall Gardens, and at concerts for several years, he retired in easy circumstances. He died in London, March 29, 1827. Dignum composed several ballads. He published, in 1810, a volume of songs, duets, and glees, composed and adapted by himself, to which an engraved portrait of him is prefixed. W. H. H.

DIMINISHED INTERVALS are such as are either less than perfect or less than minor by one semitone. Thus (*a*) being a perfect fifth, (*b*) is a diminished fifth; and (*c*) being a perfect fourth, (*d*) is a diminished fourth:—

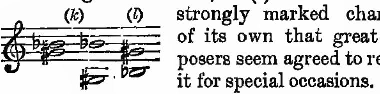
(*a*) (*b*) (*c*) (*d*)

These are both of discordant nature, the diminished fourth always so; but if a major sixth be added below the bass note of the diminished fifth it is considered to modify the discordance so far as to admit of its being used as a concord. This rule is of old standing, especially in regard to the occurrence of the chord diatonically, as (*e*) in the key of C, which was admitted in the strict old style where discords were excluded. Of intervals which are changeable into major or minor the diminished seventh is the commonest (*f*), which is a semitone less than the ordinary minor seventh (*g*), according to the rule above given. The complete chord, which is commonly known as that of the 'diminished seventh' (*h*), is, properly speaking, an inversion of a chord of the minor ninth (*i*). It occurs

with remarkable frequency in modern music, part of its popularity no doubt arising from the singular facilities for modulation which it affords. For the notes of which it is composed being at equal distances from one another, any one of them can be chosen at will to stand as minor ninth to the root which is understood. Thus the above chord might be written in either of the following ways—

in which D♭, F♭, and G are respectively the minor ninths to C, E♭, and F♯, the absent root notes, and could pass into as many different keys as those root notes could serve, either as dominant, tonic, or supertonic. [See CHANGE, MODULATION.]

The chord of the diminished third, as (*k*), occurs in music as the inversion of the chord of the augmented sixth, as (*l*). It has such a strongly marked character of its own that great composers seem agreed to reserve it for special occasions. Bach uses it with powerful effect at the end of the 'Crucifixus' in his B minor Mass, and Beethoven in the chorus to the same words in his 'Missa Solennis.' C. H. H. P.



DIMINUENDO. Lessening the tone from loud to soft; employed indiscriminately with decrescendo. Expressed by *dim.* or *dimin.*, and by the sign ⟩.

DIMINUTION, in Counterpoint, is the repetition of a subject or figure in notes of smaller value than in its original statement, as—

It is a device almost confined to music of a contrapuntal character, such as fugues and canons, and is not of as frequent occurrence as augmentation, which is its converse. There is an example in Handel's chorus 'Let all the angels of God' in the 'Messiah'; in Bach's well-known fugue in E, No. 33 in the *Wohltemperirtes Clavier;* and in the Overture to Wagner's 'Meistersinger.' [In this last, and in the final scene of Saint-Saëns' 'Samson et Dalila,' where Dalila mocks the blinded Samson, the device of diminution seems to convey a suggestion of derision.] C. H. H. P.

DINORAH. The original and Italian title of Meyerbeer's opera which was brought out in Paris (Opéra Comique, April 4, 1859) as 'Le Pardon de Ploërmel'—Cabel as Dinorah. 'Dinorah' was produced, with recitatives by Meyerbeer, and under his own direction, at Covent Garden, July 26, 1859, in three acts, with Miolan Carvalho as the heroine; and in English in the autumn of the same year at Drury Lane by Pyne and Harrison.

DIRECT. A mark (𝆖) to be found in music up to the 19th century at the end of a page, and even of a line, to warn the performer of the note at the beginning of the next page or line, like the catchword at the foot of a page, formerly universal, and still retained in the *Quarterly Review* and elsewhere; here it indicates that the first note of the next line will be G, thus—

DIRECT MOTION is the progression of parts or voices in a similar direction, as—

As a matter of contrapuntal effect it is weaker and less effective than CONTRARY MOTION, which see. C. H. H. P.

DIRUTA, AGOSTINO, born at Perugia; belonged to the Order of S. Augustine. From the title-page of his first work, published 1617, we gather that he was related to Girolamo Diruta, and a pupil of his. The reference to 'D. Stephani Venetiarum organistae' might mean either that he, or that Girolamo, was the organist in question. If Girolamo, it would be before 1593, when he left Venice. In the dedication of his 'Messe concertate,' 1622, Agostino says that he has been maestro di cappella and organist in Asolo for two years (1620-22). He was organist and maestro di cappella of Sant' Agostino in Rome 1630-47.

List of works, taken from Parisini's *Cat. della Bibl. del Liceo musicale di Bologna*, 11.66, etc.:—

1. Sacrae Cantiones 1, 2, 3, & 4 vocibus concinendae, una cum suo Basso continuo pro organo Fratris Augustini Diruta Perusini Ordinis Eremitarum Divi Augustini, Sacrae Theologiae Cursoris, nepotis ac olim discipuli R.P.F. Hieronymi Diruta, in Ecclesia D. Stephani Venetiarum organistae. Venetiis. Jacobum Vincentium. 1617. 4to. Five partbooks containing 29 concerti.

2. Davidie exultantis cantica. 1 & 3 voc. Opus 2. Venetia. Vincenti. 1618. 4to. Four partbooks containing 25 numbers. (Eitner.)

3. Messe concertate a 5 voci del P. Agost. Diruta Perugino, maestro di capella & organista della magnifica communità di Asolo. Con il Basso per sonar nell' organo. Novamente composte & date in luce. Venetia. Aless. Vincenti. 1622. 4to. Six partbooks in the Bibl. Comunale of Cesena, containing: Missa primi toni, & Missa secondi toni, a 5 voci, concertata.

4. Sacri motetti a gloria di Giesu et ad honore di Maria a 1 & 2 voci. In musica riportati dal P. Baccelliere Frat' Agost. Diruta Perugino, Agostiniano nella Chiesa di Santo Agostino di Roma, organista e maestro di capella. Lib. 1, opera VI. Prima parte. Venetia. Aless. Vincenti. 1630. 4to.

5. Sacrae modulationes Eremitici ordinis divorum, a R.P. Fr. August. Diruta Perusino, ejusdem ordinis Alumno, in Aede August. Urbis Organorum Musicesque Praefecto. 2, 3, 4, 5, 6, 7, 8 vocibus decantatae. Opus X. Romae. P. Masottum. 1630. 4to. In the Bibl. comunale of Cesena.

6. Messe concertate a 5 voci con il Basso continuo per l' organo in musica riportate da Rev. P. Bacc. Agost. Diruta Perugino Agost. nella chiesa di Sant' Agost. di Roma, maestro di capella e organista. Lib. ii. Opera XIII. Roma, J. B. Robletti. 1631. 4to. Six partbooks.

7. Viridarium Marianum in quo Deiparae Virginis Letaniae, et Hymni 4, 5, 6 vocibus: una cum Basso ad organum decantur. A.R.P. Bacc. F. August. Diruta Perusini in aede August. Urbis Musices, et organorum praefecto dispositum. Opus XV. Romae, J. B. Robletti. 1631. 4to. (In the Santini Catalogue.)

8. Psalmi vespertini 3 vocibus qui in omnibus Ecclesiae Solennitatibus decantari solent, Auctore F. Agost. Dirute Perusino, Sac. Theol. Bacc. Heremita August. & in Eccl. ejusdem ordinis in Urbe Musices praefecto. Lib. 2. Opus XVI. Romae, P. Masottum. 1633. 4to. Cantus secundus in the British Museum.

9. Poesie heroiche morali e sacre poste in musica a 1, 2, 3, 4 & 5 voci dal R.P. Agostino Diruta Perugino, Agostiniano, Bacc. in Sac., Teol., maestro di Capella in Sant' Agustino di Roma. Opera XX. (Dedication dated Roma, Nov. 15, 1646) fol. pp. 111.

10. Il secondo libro de' Salmi che si cantano ne' Vesperi di tutto l'anno concertati a 4 voci da P. Agost. Diruta Perugino Agost. Bacc. in Sac. Teol. e maestro di Capella nella chiesa di S. Agost. di Roma. Opus XXI. Roma, Lud. Grignani, 1647. 4to. Five partbooks containing 23 numbers.

11. Davidicae modulationes et Litaniae B. Mariae Virginis 3 vocibus concinendae, una cum Basso ad organum. Auctore P. August. Diruta Perusino August. Sac. Teol. Bacc. in Eccl. Divi August. de Urbe Musices Praefecto. Opus XVIII. Roma, Giac. Fei., 1668. 4to. Four partbooks. This edition was probably issued after Agostino's death; it first appeared in 1641, Venezia. Vincenti. 4to. C. S.

DIRUTA, GIROLAMO (1574-1639). Born in Perugia between 1554 and 1564. His family probably came from the little village of Diruta near Perugia. Diruta, who became a member of the Frati Minori Conventuali, entered the Franciscan monastery at Correggio on Jan. 19, 1574, at the same time as Batista Capuani, who is said to have given him his first instruction in music (Colleoni, *Notizia degli scrittori di Correggio*, 1775). That the pupil's opinion of his master's teaching was not very favourable is shown by Diruta's references in *Il Transilvano* i. p. 62, to the deficiencies in his early musical education, which led to his going to Venice for further study. He remained in Venice from about 1582 to 1593; he was a pupil of Gioseffo Zarlino (died 1590), the great authority of the time on counterpoint and theory; of Constanza Porta then at Ravenna; and of the celebrated organist Claudio Merulo, who was in Venice from 1557 to 1584. (*Il Trans.* ii. lib. 3, and Parisini, who quotes a note in a Codex in the *Bologna Liceo Musicale.*) Franchini in his *Bibliosofia*, Modena, 1693, p. 346, says that among the pupils of Merulo 'fù principale il Diruta.' In 1597 he was organist of Chioggia Cathedral, and in 1609 and 1612 is known to have been organist of Agobbio (Gubbio) Cathedral, for it is recorded in *Il Trans.* (1609 and 1612), and is corroborated by Andrea Banchieri, *Conclusioni del suono dell' organo*, Bologna, 1609, p. 12, who refers to Ugobbio Cathedral with its 'organo stupendissimo suonato da Girolamo Diruta.' Banchieri, in his *Lettere armoniche*, Bologna, 1628, leads one to suppose that although organist at Gubbio, Diruta was still living in Chioggia, for he addresses one letter to Sig. Girolamo Diruta, organista nel Duomo d'Ugobbio (p. 33); and another to P. Girolamo Diruta, Francescano, Chioggia (p. 86), (Parisini, i. 4). Diruta is again styled organist of Chioggia on the title-page of the 1625 edition of *Il Trans.* i., but it is probably merely a reproduction of the title-page in the earlier edition (1597); for Chioggia Cathedral was burnt down in Dec. 1623, and the rebuilt Cathedral was not opened till August 15, 1647 (C. Krebs, *Vierteljahrsschrift*, Jahrg. 8, Leipzig, 1892). Diruta is known not only as a celebrated organ player at a time when famous organists flourished (in *Il Trans.* i. 62 is related how he heard Claudio Merulo and Andrea Gabrieli play in San Marco 'un duello di due organi' soon after he went to Venice), but as the author of a remarkable treatise on organ-playing, which was far in advance of any contemporary publication. It was the first attempt to treat of the organ separately as an instrument that required a distinct method of treatment and of finger technique from that used for the clavier. It was written in two parts, which were published at an interval of twelve years. The first was entitled:—

Il Transilvano. Dialogo sopra il vero modo di sonar Organi, & istromenti da penna. Del R. P. Girolamo Diruta, Perugino, dell' ordine de' Frati Minori Conv. di S. Francesco. Organista del Duomo di Chioggia. Nel quale facilmente, & presto s' impara di conoscere sopra la Tastatura il luogo di ciascuna parte, & come nel Diminuire si deveno portar le mani, & il modo d' intendere la Intavolatura; provando la verità & necessità delle sue Regole, con le Toccate di diversi eccellenti Organisti, poste nel fino del Libro. Opera nuovamente ritrovata, utilissima & necessaria a Professori d'Organo. Al sereniasimo Prencipe di Transilvania. Con Privilegio. In Venetia appresso Giacomo Vincenti, 1597, folio, pp. 64.

This is the earliest extant edition and is very rare; two copies are known, one in the British Museum, the other in the Bologna Liceo Musicale.

Fétis mentions a 1593 edition; Herr Carl Krebs, who has gone very thoroughly into the whole question, thinks its existence, though problematical, is slightly favoured by the following facts. In his introductory letter to *Il Trans.* 1597, Claudio Merulo mentions his *Canzoni alla francese* as having just been published: 'Però essendomi venuta occasione di mandare alla stampa il Primo Libro delle mie *Canzoni alla francese* da me poste di nuovo in Intavolatura.' And the Prince Transilvano, on his travels in Italy, wishing to obtain the newest musical works, acquires 'quella novella Compositione delle Canzoni alla francese intavolate dall' eccellentissimo Signor Claudio Merulo da Correggio' (p. 5). The only known copy of this book is in the Basle Universitäts-Bibliothek, and is dated 1592 (Canzoni d'intavolatura d'organo di Claudio Merulo da Correggio a 4 voci fatte alle Francese. Nuovamente da lui date in luce e con ogni diligentia corrette. Lib. i. Venetia. Ant. Gardano, 1592). Again, in the second edition of *Il Trans.* (1612), the dedication, 'Al Serenissimo Principe di Transilvania, il Sig. Sigismondo Battoni,' is dated, Di Venetia, April 10, 1593. This would seem to point to the dedication having been simply reprinted from a 1593 edition.

Other editions besides those of 1597 and 1612, just mentioned, both printed by Giacomo Vincenti, were published in 1615, 1625, and possibly again in 1626, all by Alessandro Vincenti in Venice. The Bologna Liceo Musicale has copies of the 1612 and 1625 editions; the contents are identical with those of the 1597 edition.

In 1609 appeared:—

Seconda parte del Transilvano. Dialogo diviso in quattro libri del R. P. Girolamo Diruta, Perugino, Minore Conventuale di S. Francesco. Organista del Duomo d' Agobbio. Nel quale si contiene il vero Modo & la vera Regola d' intavolare ciascun canto, semplice & diminuito con ogni sorti di diminutioni: & nel fin dell' ultimo libro v' è la Regola, la qual scopre con brevità e facilità il modo d' imparar presto à Cantare. Opera nuovamente dall' istesso composto, utilissima & necessaria a' Professori d' Organi. Con Privilegio. In Venetia appresso Giacomo Vincenti, 1609, folio.

The dedication, 'All' Illustrissima Signora la Signora Duchessa Leonora Ursina Sforza,' is dated 'Da Gubbio il dì 25 Marzo, 1610.' The second edition, published in Venice by Alessandra Vincenti in 1622, reprints the same dedication, signed in the same way. Copies of both the 1609 and 1622 editions are in the Bologna Liceo Musicale and elsewhere. A 1639 edition mentioned by one authority does not appear to be known.

The contents of the two parts of *Il Transilvano* may be briefly sketched: in *Il Trans.* i. the preface is written almost entirely in praise of the organ; the fine instruments in Trento, Ugobbio, and Cagli Cathedrals are mentioned; and as no one has written on their characteristic qualities and the proper way to play them, rules are promised for the right use of the fingers, necessary to be observed in organ-playing. The introductory letter written by Claudio Merulo follows in which he highly commends Diruta's talent: 'Ed io infinitamente mi glorio, ch' egli sia stato mia creatura, perche in questa dottrina ha fatto a lui ed a me insieme, qual singolar honore, che da persona di molto ingegno si deve aspettare.' Then the instruction begins in the form of a dialogue between Transilvano and Diruta. The musical scale and the characters used in Cantus mensurabilis are explained; the rendering of music is considered from an artistic as well as from a technical point of view.

The position of the hand and fingers while playing, and the distinction to be drawn between organ and clavier playing is discussed. Musical examples are given in the form of Toccatas or 'Lessons' on the ecclesiastical tones. Those composed by Diruta are:—Toccate di grado del primo tuono; di salto buono del secondo Tuono; di salto cattivo del sesto Tuono; del undecimo e duodecimo Tuono. The other examples were contributed by Claudio Merulo, Andrea and Giovanni Gabrieli, Luzzasco Luzzaschi, Antonio Romanini, Paolo Quagliati, Vincenzo Bell' Haver, and Gioseffo Guami, all well-known names in Italy at that time. The music follows the usual custom in being written on a five-line stave for the right hand and an eight-line stave for the left hand.

Il Trans. ii. contains four books. Bk. 1 explains how to write down music in 2, 3, or 4 parts for the organ, with musical examples by Giov. Gabrieli and Ant. Mortaro. How to add the five different kinds of Diminutioni (Minuta, Groppi, Tremoli, Accenti, and Clamationi) to a melody without unduly interfering with it; two musical examples by Giov. Gabrieli and Ant. Mortaro follow. Bk. 2 teaches the rules of counterpoint, and the way to compose Ricercari; with examples by Luzzasco Luzzaschi, Gabriel Fatorini, Andrea Banchieri, and Diruta himself (those on the 7th, 8th, 11th and 12th tones). Bk. 3 gives the twelve ecclesiastical tones and the way to transpose them into different keys, with other matters which every organist ought to know. Bk. 4 gives the intonations, in different keys, of hymns, masses, etc., with a discourse on using combinations of the organ registers (*i.e.* stops); and a short introduction to the learning of singing. The musical examples by Diruta are genuine organ compositions; two of them, 'Ut queant laxis (1mo tuono)' and 'Magnificat (5to tuono) nelli tasti naturali,' were reprinted by Ritter (*Zur Gesch. des Orgelspiels.* 1884, ii. Nos. 11 and 12).

In Zacconi's *Prattica di musica*, Parte II. lib. 3, Venetia, 1622, p. 240 (in British Museum) are also to be found musical examples taken from *Il Trans.* ii. lib. 2 and 3. C. Krebs reprints 3 Toccate and one Ricercare (*Vierteljahrssch.* Jahrg. 8, p. 383), and mentions the two Toccate, 'di salto buono' and 'di salto cattivo,' as being in Bernhard Schmid's *Tabulaturbuch.* The following references to Diruta may also be found

of interest: Bononcini of Modena (*Musicò prattico*, Bologna, 1673, p. 153), mentions 'li già dimostrati dodici Tuoni il che si conferma ancora con l' autorità del . . . Diruta nel Transilvano'; Costanzo Antegnati of Brescia (*L'arte organica*, Brescia, 1608), 'Lodo l' opera del Reverendo P. Diruta, nomate il Transilvano, che insegna à portar bene la mano nel suonare,' etc. (Parisini, pp. 328-29); Andrea Banchieri (*L' organo suonarino*, Venetia, 1605), in which he says his object is not to teach organists to play brilliantly, for that is already done in *Il Trans.* 'del sufficientissimo Diruta' (Ambros, iv. 436). Diruta's system of ornamentation is carefully analysed in Dannreuther's treatise on *Ornamentation;* a Ricercare and two Toccatas for the organ are in vol. iii. of Torchi's *Arte Musicale in Italia.* C. S.

DIS. The German term for D♯, and also, according to a curious former Viennese custom, for E♭. The Eroica Symphony was announced at Clement's concert in Vienna, April 7, 1805 (its first performance), and at Meier's concert, 1808, as 'in Dis.' DES is the term for D♭.

DISCANT. (1.) The general term used from the 12th century onwards to cover every species of polyphony. 'Est autem discantus diversus consonus cantus,' writes the author of the *Discantus Positio Vulgaris* (Coussemaker, *Scriptores*, i. 94*b*).

(2.) In a more restricted sense *discant* is applied to any polyphonic composition which is subject to the rules of mensurable music in all its parts, as opposed to *organum purum*, in which the plain-song tenor is 'ultra mensuram.' Thus Franco (Coussemaker, i. 118*a*) writes: 'Dividitur mensurabilis musica in mensurabilem simpliciter et partim. Mensurabilis simpliciter est discantus, eo qnod in omni parte sua tempore mensuratur. Partim mensurabilis dicitur organum, pro tanto quod non in qualibet parte sua mensuratur.' ('Mensurable music is either wholly or partly mensurable. Discant is wholly mensurable because strict time is observed in all its parts. Organum is partly mensurable, inasmuch as one of its parts is not measured.')

Franco's definition of discant, which is repeated with slight variations by nearly every theorist of the 13th and 14th centuries, is as follows: 'Discantus est aliquorum diversorum cantuum consonantia in qua illi diversi cantus per voces longas, breves vel semibreves proportionaliter adaequantur, et in scripto per debitas figuras proportionari ad invicem designantur.' ('Discant is the simultaneous and harmonious sounding of two or more diverse melodies, which are made equal to one another proportionately by the use of sounds of three degrees of length, represented in writing by the figures of the long, breve, and semibreve.') He then divides discant into three classes: (1) 'Discantus simpliciter prolatus' ('id est sine fractionibus,' explains the author of the *Quatuor Principalia*, Coussemaker, iv. 278*a*); (2) 'Discantus truncatus qui ochetus dicitur' (see HOCKET); (3) 'Discantus copulatus qui copula nuncupatur' (see COPULA). 'Discantus simpliciter prolatus' is further subdivided into (*a*) 'Discantus cum eadem littera,' *i.e.* with the same words in all the parts,—'ut in cantilenis, rondellis et cantu aliquo ecclesiastico'; (*b*) 'Discantus cum diversis litteris,' *i.e.* with two or more different sets of words, 'ut in motetis qui habent triplum vel tenorem, quia tenor cuidam litterae equipollet'; (*c*) 'Discantus cum littera et sine,' *i.e.* with words in one part, but not in others, 'ut in conductis et discantu aliquo ecclesiastico qui improprie organum appellatur.'

Discant, we are told, must always be written or sung in one of the six rhythmical modes (trochaic, iambic, etc.). A great part of the mediæval theory of music was concerned with these modes, their perfections and imperfections, the form of the ligatures and the length of the rests proper to each, the manner in which they could be combined or varied, and so forth. Mr. Wooldridge has dealt with the subject in the first volume of the *Oxford History of Music*, but it is little more than a highly elaborated theory of rhythm, much of which is scarcely intelligible at the present day.

Of more general interest are the rules of composition relating to the intervals that might be employed and to the movement of the counterpoint in relation to the canto fermo. Among the earliest are those contained in the *Discantus Positio Vulgaris*, which is thought to have been written about 1150 A.D. The author is speaking of *organum purum*, but it is clear that his rules are applicable to discant generally. He tells us that where the voices meet, *i.e.* on the strong beats, the unison, fifth, or octave should be taken. For the intervening or passing notes the third, fifth, and seventh are preferable to the second, fourth, or sixth. He illustrates this by giving directions for the movement of the counterpoint over any possible progression of the canto fermo within the compass of an octave, but unfortunately, except in a few instances, ignores the passing notes. The progressions authorised are as follows:—

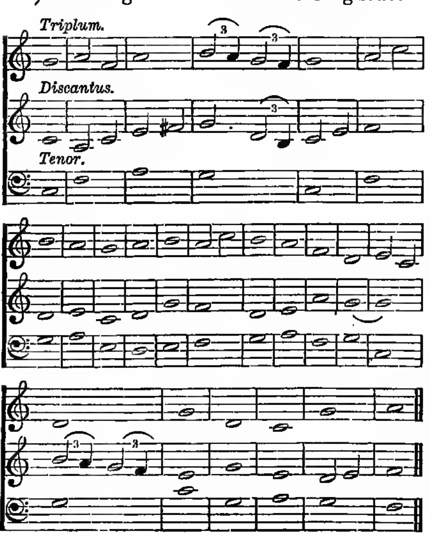
'Quibus visis,' adds the author, 'et memoriae commendatis totam discantandi artem habere poteris, arte usui applicata.' ('Commit these

rules to memory, and apply them in practice, and you will have mastered the whole art of discant.')

At a later date Franco, whose authority was universally recognised, gives the following classification of chords (Coussemaker, i. 129*a*):—

1. Perfect Concords, the unison and octave.
2. Less Perfect Concords, the perfect fourth and fifth.
3. Imperfect Concords, the major and minor third.
4. Imperfect Discords, the whole tone, major sixth and minor seventh.
5. Perfect Discords, the semitone, augmented fourth, diminished fifth, minor sixth, and major seventh.

The discant, he tells us, may begin at the fourth or major or minor third, as well as at the unison, fifth or octave, and should proceed by consonances 'commiscendo quandoque discordantias in locis debitis' ('with occasional discords in their proper place'). A concord should always be taken 'in principio perfectionis' or, as we should say, on the first beat of the bar, and an imperfect discord is always admissible immediately before a concord. Contrary motion should be employed as a rule, though similar motion is at times to be preferred 'propter pulchritudinem cantus.' Strict time must be observed until the penultimate note of the canto fermo is reached, 'ubi non attenditur talis mensura, sed magis est organicus ibi punctus' ('where there is generally an organ point in which time is disregarded,') (see ORGANUM). If a third part ('triplum') is added, care should be taken that any note that is a discord to the tenor or canto fermo, should be a concord to the discant or second part, and *vice versâ*. The following example is given in the Oxford text (MS. Bodl. 842). The original is in 6–2 time throughout:—



Philip de Vitry, a writer of the early part of the 14th century, who is credited with the invention of the minim, still regards the minor sixth as a discord (Coussemaker, iii. 36*b*). He forbids consecutive unisons, fifths and octaves, and allows not more than four consecutive thirds or sixths:—

This last example, in which the C would doubtless have been sharpened in performance, serves to remind us that all the rules of discant were subject to modification by the application of *musica ficta* or *falsa*, *i.e.* the sharpening or flattening of a note, 'propter consonantiam bonam inveniendam' (Coussemaker, i. 258*a*). The use of *musica ficta* was necessary to avoid the discord of *mi* against *fa* or *fa* against *mi*, *i.e.* of F against B♮ either above or below. It was also frequently employed to provide a leading note in the cadence from sixth to octave (which may possibly account for the minor sixth being regarded as a discord by the theorists), and generally to bring intervals and progressions into harmony with the prevailing tonality. Franco leaves its application entirely to the discretion of the singer:—'Quando per rectam musicam consonantias utiles habere non poterit discantor, falsam fingat, sicut placeat' ('when a discanter cannot find a suitable consonance among the notes of the Gamut, let him introduce accidentals at his pleasure') (Coussemaker, i. 156*b*), and even in the early form of discant known as *organum purum*, he tells us that if the vox organalis should strike a discord on a long note, the tenor must either remain silent 'vel se in concordantiam fingat' (Coussemaker, i. 135*a*). (See MUSICA FICTA.)

(3.) The term 'discant' is applied not only to the art of counterpoint, *i.e.* of adding one or more parts to a canto fermo, but also to the part, or the first of the parts, so added. 'Cantus vel tenor est primus cantus primo procreatus vel factus. Discantus est secundo procreatus vel factus, supra tenorem concordatus.' ('The canto fermo or tenor is the first melody to be constructed. Discant is the second melody constructed above the tenor and in harmony with it.') (Coussemaker, i. 356*b*.)

(4.) A special form of discant noticed in the *Quatuor Principalia* (Coussemaker, iv. 294*a*) deserves mention. It is described as 'quaedam ars in qua plures homines discantare apparent, cum in rei veritate unus tantum discantabit' ('a device by which several singers appear to be discanting, when in fact only one is doing so'). Two or three voices double the canto fermo at the fifth, eighth and twelfth, disguising the bare diaphony by 'frangendo et florendo notas, prout magis decet,' while a single skilled discanter completes the deception by filling in thirds and sixths, and avoiding concords. This

is probably the 'pure discant' referred to in the *Discantus Positio Vulgaris*, and by the pseudo-Aristotle (Coussemaker, i. 96*a*, 269*a*).

For other special forms of discant, see FAUXBOURDON, GIMEL. J. F. R. S.

DISCORD is a combination of notes which produces a certain restless craving in the mind for some further combination upon which it can rest with satisfaction.

Discords comprise such chords as contain notes which are next to each other in alphabetical order, and such as have augmented or diminished intervals, with the exception in the latter case of the chord of the sixth and third on the second note of any key. The changed combination which must follow them in order to relieve the sense of pain they produce is called the resolution. For the various kinds of discords and their resolutions see HARMONY. C. H. H. P.

DISSOLUTO PUNITO, IL, OSSIA IL DON GIOVANNI. The full title of Mozart's opera, so well known by the latter half of its name. [See DON GIOVANNI.]

DISSONANCE is any combination of notes which on being sounded together produces BEATS; that is, an alternate strengthening and weakening of the sound, arising from the opposition of the vibrations of either their prime tones, or their harmonics or their combination tones, which causes a painful sensation to the ear. C. H. H. P.

DITSON, OLIVER, & Co. The oldest music-publishing house in the United States now engaged in business, as well as the largest. Its headquarters are at Boston, where the senior partner Oliver Ditson (born Oct. 30, 1811; died Dec. 21, 1888) followed the business from 1823, when, at the age of twelve, he entered the employ of Samuel H. Parker, a book and music seller. On reaching his majority in 1832, Ditson was taken into partnership by his employer, and the firm, Parker & Ditson, continued until 1845, when, on the retirement of Parker, the business was carried on by Ditson in his own name until 1857, when John C. Haynes was admitted a partner, and the style, Oliver Ditson & Co., was adopted. Ditson's eldest son, Charles H., was admitted in 1867, and was placed in charge of the New York branch, Charles H. Ditson & Co. In 1875 another son, J. Edward, became a member of the firm, and the head of the Philadelphia branch, J. Edward Ditson & Co. In 1860 a branch was established in Boston for the importation and sale of band and orchestral instruments and other musical merchandise, under the name of John C. Haynes & Co. A further branch has existed in Chicago since 1864, styled Lyon & Healy, who transact a general business in music and musical merchandise with the growing country that lies to the westward. The catalogue of sheet music published by the house and its four branches embraces over 51,000 titles. Some 2000 other titles — instruction books, operas, oratorios, masses, collections of psalmody and of secular choral music, in fact every variety of music and text-book known to the trade—are also included in the list of publications bearing the imprint of the firm. [A monthly periodical *The Musician*, begun in 1896, has a good position, and the handsome volumes of the *Musician's Library*, as well as the *Cyclopædia of Music and Musicians*, are a testimony to the good taste of the firm.] F. H. J.

DITTERSDORF, KARL DITTERS VON—whose original name was DITTERS—distinguished violinist, and prolific composer in all branches of music, but specially esteemed for his German national operas; born at Vienna, Nov. 2, 1739. He soon outstripped his early teachers on the violin, König and Ziegler (not Zügler, as he calls him in his biography). Ziegler worked his pupil in the orchestra at St. Stephen's, and also in that of the Schottenkirche. Here Ditters was noticed by his chiefs, and on their recommendation was received into the private band of the Prince von Hildburghausen, who, being himself a man of high cultivation, looked after the general education of his young page (a lad of eleven), and had him instructed in composition by Bonno, the court-composer, in the violin by Trani, and in foreign languages, fencing, dancing, and riding. The formation of his taste was much assisted by hearing Vittoria Tesi, who sang regularly at the Prince's concerts, and he soon formed an intimacy with Gluck and Haydn. When the Prince dismissed his band in 1759 he procured a place for Ditters in the Empress's opera, but wishing to see the world he started in 1761 with Gluck on a professional tour in Italy, where his playing was much admired. Meantime the famous Lolli had been performing in Vienna with great success, but Dittersdorf on his return vanquished him; the general verdict was 'Each has marvellous execution, but Ditters also speaks to the heart.' His intimacy with Haydn was of service to them both. 'Whenever we heard,' says he, 'a new piece, we went through it carefully together, doing justice to all that was good, and criticising what was bad in it'—an impartial course seldom pursued by young composers. In the early part of 1764 he went with Gluck and Guadagni to Frankfort for the election and coronation (April 3) of the Archduke Joseph as King of the Romans. He played twice at court with brilliant success, but his expectations were not otherwise fulfilled, and on his return to Vienna the rudeness of Count Wenzel Spork, the then manager of the theatre, made him gladly accept the post of capellmeister to the Bishop of Grosswardein at Pressburg, *vice* Michael Haydn departed to Salzburg. For his new master he composed symphonies, violin-concertos, string-quartets, and his first oratorio, 'Isacco figura del Redentore,' to a Latin adaptation of Metastasio by the Bishop himself. He also started a small theatre in the castle, for which he wrote several pieces, including his first comic opera,

'Amore in Musica.' But in 1769 the Bishop received a rebuke from the Empress on the laxity of his life, and dismissed his whole band. At Troppau Dittersdorf made the acquaintance of Count Schafgotsch, Prince Bishop of Breslau, who invited him to his estate at Johannisberg, where he was living in retirement and disgrace. The versatile musician found means to cheer his master's solitude. He got together a band, engaged singers and musicians, set up a theatre, wrote operas and oratorios, and went out hunting, all with equal zest. In return for his services he was made, through the Bishop's influence (in 1770), Knight of the Golden Spur (a distinction enjoyed by Gluck and Mozart), and Amtshauptmann of Freiwaldau (1773), and received a title of nobility—'Ditters von Dittersdorf.' The oratorio 'Davide' and the comic opera 'Il viaggiatore Americano' belong to this period, and it was while rehearsing them that he fell in love with Fräulein Nicolini, whom he had engaged from Vienna, and married her. During a visit to Vienna he composed 'Ester,' words by the Abbé Pintus, for the concerts (Dec. 19 and 21, 1773) in aid of the widows' fund of the Tonkünstler Societät. Between the parts he played a concerto of his own, and so pleased the Emperor, that on Gassmann's death (Jan. 22, 1774), he wished to appoint him court-capellmeister, but Dittersdorf was too proud to apply for the post, and the Emperor was not inclined to offer it unsolicited. 'Ester' was repeated before the court in 1785; 'Isacco' was performed in Vienna (1776); and 'Giobbe,' also written for the Tonkünstler Societät, on April 8 and 9, 1786, one part each night, Dittersdorf himself conducting. In 1789 it was produced in Berlin with marked success. On another visit to Vienna, in 1786, he produced a symphony on Ovid's *Metamorphoses* at the morning concerts in the Augarten, and it was on this occasion that the often-quoted conversation with the Emperor Joseph II. took place. 'Doctor und Apotheker' (July 11) a lively, sound, though somewhat rough operetta, which has kept the stage to the present day; 'Betrug durch Aberglauben' (Oct. 3, 1786); 'Democrito corretto' (Jan. 24, 1787); 'Die Liebe im Narrenhause' (April 12), and 'Hieronymous Knicker' (1787), all at Vienna, were brilliant successes, with the exception of 'Democrito.' In the meantime things had changed at Johannisberg. The Bishop's band, dismissed during the war, had reassembled after the Peace of Teschen, 1779. About 1790 Dittersdorf was obliged to attend to his duties at Freiwaldau, and during his absence his enemies slandered him to the Bishop. Dittersdorf nursed him devotedly during his long illness, but on his death (1795) was dismissed with 500 gulden, a sum soon exhausted in visiting the baths with a view to restore his health, shattered by his irregularities. His next asylum was at the house of Count von Stillfried at Rothlhotta near Neuhaus in Bohemia, and here, in spite of constant suffering, he composed operas, symphonies, and innumerable pianoforte pieces, for which he in vain sought a purchaser. On his death-bed he dictated his autobiography to his son, and died two days after it was completed, Oct. 24, 1799. [For the doubts as to the place of death, and evidence as to its date, see *Quellen-Lexikon.*] Dittersdorf was a thoroughly popular composer. He possessed a real vein of comedy, vivacity, and quick invention, bright spontaneous melody, original instrumentation, and breadth in the ensembles and finales, qualities which, exercised on pleasing librettos, made him the darling of his contemporaries. He held the same position in Germany that Grétry did in France, though inferior to Grétry in delicacy, spirituality, and depth of sentiment. [For a criticism of his operas see the *Monatshefte für Musikgeschichte*, 24, 55.] His oratorios, much valued in their time; his symphonies, in the style of Haydn, though inferior to Haydn in grace and liveliness; his violin-concertos, string-quartets (of which twelve were published in 1866), duos, 'divertimenti,' many concertos, one with eleven instruments obbligato, masses, motets, and songs—all contributed to his fame, and if they did not survive him, were of moment in their day. Besides the operas already named he composed 'L'Amore disprezzato'; 'Der Gutsherr'; 'Der reisende Schulmeister'; 'Der Schiffspatron'; 'Lo sposo burlato' (1775); 'La Contadina fedele' (1785); 'Orpheus der zweite' (1787); 'Das rothe Käppchen' (1788); 'Hocus Pocus' (1790); 'Das Gespenst mit der Trommel' (1794); 'Gott Mars oder der eiserne Mann'; 'Don Quixotte' (all 1795); 'Ugolino,' grand 'opera seria'; 'Der Durchmarsch'; 'Der schöne Herbsttag' (all 1796); 'Der Ternengewinnst'; 'Der Mädchenmarkt'; 'Die lustigen Weiber von Windsor'; 'Der Schach von Schiras' (1797); 'Don Coribaldi' (1798); 'Il Tribunale di Giove,' serenata (1788); and 'Das Mädchen von Cola,' a song from Ossian with pianoforte (1795). Of his symphonies, 'Six Simphonies à 8 parties'; 'Trois Simphonies à 4 parties obl., etc.'; and 'Simphonie dans le genre de cinq nations,' etc.,' were published in Paris in 1770. On the title-page of the first set he is called 'first violin and maître de musique to Prince Esterhazy.' [The three symphonies on subjects from Ovid's *Metamorphoses* were published in 1785 by Artaria of Vienna.] His autobiography (Leipzig, 1801, translated into English by A. D. Coleridge, and published 1896) forms the foundation of Arnold's 'Karl von Dittersdorf,' etc., *Bildungsbuch für junge Tonkünstler* (Erfurt, 1810). [An interesting article on him, by Professor Kling of Geneva, is in the *Rivista Musicale*, vi. 727.] C. F. P.

DIVERTIMENTO, a term employed for various pieces of music.

1. In Mozart it designates a piece closely

akin to a SERENADE or CASSATION, usually in six or seven movements—though sometimes only four, and once as many as ten; indifferently for trio or quartet of strings, wind alone, or wind and strings mixed. Köchel's *Catalogue* contains no less than twenty-two of such Divertimenti. The following is the order of the movements in one of them (No. 287):—(1) Allegro; (2) Andante grazioso (six variations); (3) Minuet; (4) Adagio; (5) Minuet; (6) Andante and Allegro molto. The changes of key are slight; in some there is no change at all.

2. A Pot-pourri or arrangement of the airs of an opera or other piece for orchestra or piano.

DIVERTISSEMENT. A kind of short ballet, such as Taglioni's 'Divertissement Silésien,' sometimes mixed with songs. Also a pot-pourri or piece on given *motifs*, such as Schubert's 'Divertissement à la Hongroise.' Also a French term for an entr'acte.

DIVIDED STOPS. Organ Stops arranged to draw in two portions, as Stopped Diapason Treble, and Stopped Diapason Bass, the latter having a compass of about an octave from the lowest note, which octave frequently has to do duty as the bass of another stop of short compass, as for a Dulciana down to tenor C only. T. E.

DIVISI (*Ital.*, 'Divided'). An expression often met with in the string parts of orchestral scores, meaning that the body of players hitherto playing in unison is to be divided into two or more parts, the number of parts being specified if more than two, or else the parts are written on separate staves, it being obvious that the use of the term is a space-saving device. The abbreviation 'unis,' is often used to show where the division ceases. The German equivalent for 'divisi' is 'getheilt.' The modern practice of subdividing the strings into many parts is productive of beautiful effects, instances being found in Wagner's Prelude to 'Lohengrin,' in the second Act of 'Tristan,' etc. (See A DUE.) N. G.

DIVISION VIOLIN, THE. See SYMPSON, CHRISTOPHER.

DIVISIONS, in the musical nomenclature of the 17th and 18th centuries, were rapid passages—slow notes *divided* into quick ones—as naturally takes place in variations on a theme or ground. Hence the word can be applied to quick consecutive passages like the long semiquaver runs in Handel's bravura songs, such as 'Rejoice greatly,' 'Let the bright Seraphim,' etc.

DIVITIS, ANTONIUS, or ANTOINE LE RICHE, a French or Flemish composer, [whose name occurs in the account-books of the college of St. Donatius in Bruge in 1501; he went to Zeeland in 1504, and apparently entered the service of Philippe le Bel, entering his chapel in 1505. Later on he was a] colleague of Mouton as singer in the chapel of Louis XII., who died in 1515. The following is a list of his works at present known:—(1) A 4-part mass, 'Gaude Barbara' (MS.), in the library at Cambray. (2) A 6-part Credo (MS.) and a Salve Regina *a* 5 in the Royal Library at Munich. (3) A mass, 'Quem dicunt homines' (of which Ambros gives a description in his *History of Music*), in MS. in the Sistine Chapel, and in the 15th book of the collection by Pierre Attaignant of Paris. (4) A motet, 'Gloria laus,' in the 10th book of the collection of ancient motets by Pierre Attaignant (Paris, 1530), who has also, in his collection of Magnificats (Paris, 1534), included one by Divitis. (5) A motet, 'Desolatorum consolator,' in four parts, in the 1st book of the 'Motetti della corona' (Petrucci, Venice, 1514). (6) Many motets for three voices in the collection 'Trium vocum cantiones centum D' published by Petreius (Nuremberg, 1540). (7) A setting of the words 'Ista est speciosa,' in the collection 'Bicina Gallica, Latina, Germanica, etc.,' published by Rhaw (Wittenberg). (8) Two chansons, under the name Le Riche, in the collection 'des plus excellentes chansons' published by Nicolas Duchemin in 1551. [(9) A motet and a chanson are at Bologna in a MS. dated 1518, and (10) a vocal work in the Brit. Mus. Add. MS. 19,583. See *Quellen-Lexikon*.] J. R. S. B.

DJAMILEH. Opéra-comique in one act; words by Louis Gallet, music by George Bizet. Produced at the Opéra Comique in Paris, May 22, 1872; at Covent Garden, June 13, 1893.

DLABACZ, GOTTFRIED JOHANN, librarian and choir-master of the Premonstratensian convent of Strahov, Prague; born July 17, 1758, died Jan. 4, 1820. Author of *Allgem. historisches Künstlerlexikon für Böhmen*, etc. (Prague 1815-1818, 3 vols.); *Versuch eines Verzeichnisses der vorzüglicheren Tonkünstler*, etc. (in Rigger's *Statistik von Böhmen*)—two exact and valuable works.

DO. The syllable used in Italy and England in solfaing instead of UT. It is said by Fétis to have been the invention of G. B. Doni, a learned Della Cruscan and writer on the music of the ancients, who died 1669. It is mentioned in the *Musico prattico* of Bononcini (1673), where it is said to be employed 'per essere più resonante.'

DODECACHORDON (original Greek title, ΔΩΔΕΚΑΧΟΡΔΟΝ, from δώδεκα, 'twelve,' and χορδή, 'a string'). A work, published at Basle, in September 1547, by the famous mediæval theorist, now best known by his assumed name, Glareanus, though his true patronymic was Heinrich Loris, Latinised Henricus Loritus. [See GLAREANUS.]

The *Dodecachordon* owes its existence to a dispute which, at the time of its publication, involved considerations of great importance to composers of the polyphonic school; and the clearness and logical consistency of the line of argument it brings to bear upon the subject render it the most valuable treatise on the later developments of the Ecclesiastical Modes that has ever been given to the world.

[According to the earlier mediæval theory four Modes only were formally acknowledged: at a later date the custom began of counting the plagal modes as distinct from the authentic, and so reckoning eight modes. At a much later date, in the Polyphonic period, and when musicians were accustomed to think more continually in terms of the octave, it was natural to think theoretically of fourteen modes, and even to wish to reckon so: some, regarding the modes which have B for their final as unsatisfactory, for want of a perfect fifth in their scale, rejected these two and maintained twelve modes: while the most conservative party, pointing out that the higher four of the twelve were, so far as melody is concerned, mere transpositions of the lower ones, maintained still the old numbering of eight modes. The ardent upholders of the twelve claimed Charlemagne as their authority, while the maintainers of the eight could base their contention on far more solid history. Unfortunately, however, they combated the position of the 9th-12th modes by untenable arguments.] Neglecting the distinction between Plagal and Authentic, they imagined that certain modes were essentially identical, because they corresponded in compass and in the position of their semitones. It is quite true that every authentic mode corresponds, in compass, and in the position of its semitones, with a certain mode taken from the plagal series; just as, in the modern system, every major scale corresponds, in signature, with a certain minor scale. But the intervals in the two modes are referable to, and entirely dependent upon a different final; just as, in the relative major and minor scales, they are referable to a different tonic. For instance, the Authentic Mixolydian Mode corresponds, exactly, in its compass and the position of its semitones with the Plagal Hypoionian Mode. The range of both lies between G and G; and the semitones, in both, fall between the third and fourth, and the sixth and seventh degrees. But the Final of the Mixolydian Mode is G, and that of the Hypoionian, C; and, though Palestrina's Missa Papæ Marcelli, written in the Hypoionian Mode, ends every one of its greater sections with a full close on the chord of C, and bases every one of its most important cadences on that chord, there are critics at the present day who gravely tell us that it is in the Mixolydian Mode, simply because the range of its two tenors lies between *g* and *g'*. Glareanus devotes pages 73, 74 of the *Dodecachordon* to an unanswerable demonstration of the fallacy of this reasoning; and all the great theorists of the 16th century are in agreement with him, in so far as the main facts of the argument are concerned, though they differ in the numerical arrangement of their 'Tables.' To prevent confusion on this point it is necessary to consider the system upon which these 'Tables' are constructed.

The most comprehensive and reasonable system of classification is that which presents the complete series of fourteen possible Modes, in their natural order, inserting the impure Locrian and Hypolocrian forms in their normal position, though rejecting them in practice. The complete arrangement is shown in the following scheme:—

I. Dorian.	IX. Æolian.
II. Hypodorian.	X. Hypoæolian.
III. Phrygian.	*XI. Locrian (or Hyperæolian).*
IV. Hypophrygian.	*XII. Hypolocrian (or Hyperphrygian).*
V. Lydian (or Hyperphrygian).	XIII. Ionian (or Iastian).
VI. Hypolydian.	XIV. Hypoionian (or Hypoiastian).
VII. Mixolydian (or Hyperlydian).	
VIII. Hypomixolydian.	

The system most widely opposed to this recognises the existence of eight Modes only—Nos. I.-VIII. in the foregoing series; and represents the Æolian, Hypoæolian, Ionian, and Hypoionian forms, as identical with Modes II., III., VI., and VII.—or, still less reasonably, Modes I., II., V., and VI.—with the substitution of different finals.

In all essential points Glareanus follows the first-named system, though he describes the Ionian and Hypoionian forms as Modes XI. and XII., and simply mentions the rejected Locrian and Hypolocrian scales by name, without assigning them any definite numbers.

Zacconi's table agrees with that of Glareanus. Fux generally describes the modes by name, and takes but little notice of their numerical order. In later times the editors of the Mechlin office-books have endeavoured to reconcile the two conflicting systems by appending double numbers to the disputed modes. Dr. Proske, in his *Musica Divina*, follows the first-mentioned system, describing the Ionian and Hypoionian Modes as Nos. XIII. and XIV.; and the same plan has been uniformly adopted in the present Dictionary in dealing with the later modal systems. The want of an unvarying method of nomenclature is much to be regretted[1]; but it no way affects the essence of the question, for, since the publication of the *Dodecachordon*, no one has ever seriously attempted to dispute the dictum of Glareanus, that twelve Modes, and twelve only, are available for practical purposes; and these twelve have found pretty nearly equal favour among the great masters of the Polyphonic school.[2] [For practical reasons it is to be regretted that Professor Wooldridge, in his admirable *Polyphonic Period* (*Oxford Hist. of Music*, vol. i.) has confined himself exclusively to the earlier system of nomenclature, calling the modes by number, or else by their names according to the arrangement of the Greek system. M.]

[1] It will be noticed that the variations affect the later Modes only. The first eight Modes—the only Modes that can consistently be called 'Gregorian'—are distinguished by the same numbers in all systems but one. This exception is to be found in the Table given by Zarlino, who numbers the Modes thus:—I. Ionian; II. Hypoionian; III. Dorian; IV. Hypodorian; V. Phrygian; VI. Hypophrygian; VII. Lydian; VIII. Hypolydian; IX. Mixolydian; X. Hypomixolydian; XI. Æolian; XII. Hypoæolian. This method is exceptionally confusing, since not one of its numbers corresponds with those of any other system.

[2] Consult, on this point, Baini's 'Life of Palestrina' (*Memorie*, etc.) tom. ii. p. 81.

The *Dodecachordon* enters minutely into the peculiar characteristics of each of the twelve modes, and gives examples of the treatment of each, selected from the works of the best masters of the early Polyphonic School. The amount of information it contains is so valuable and exhaustive, that it is doubtful whether a student of the present day could ever succeed in thoroughly mastering the subject without its assistance.

The text, comprised in 470 closely printed folio pages, is illustrated by 89 compositions, for two, three, and four voices, with and without words, printed in separate parts, and accompanied by directions for deciphering the Enigmatical Canons, etc., by the following composers:—Antonio Brumel (4 compositions); Nicolaus Craen (1); Sixt Dietrich (5); Antonius Fevin (1); Adam de Fulda (1); Damianus à Goes, Lusitanus (1); Heinrich Isaac (5); Josquinus Pratensis [Josquin des Prés] (25); Listenius (1); Adam Luyr Aquisgranensis (1); Gregor Meyer (10); Joannes Mouton (4); Jac. Obrechth (3); Johannes Okenheim (3); De Orto (1); Petrus Platensis [Pierre de la Rue] (3); Richafort (1); Gerardus à Salice Flandri (1); Lutvichus Senflins (3); Andr. Sylvanus (1); Thomas Tzamen (1); Jo. Vannius [Wannenmacher] (1); Vaqueras (1); Antonius à Vinea (1); Paulus Wuest (1); Anonymous (9).

The first edition of the ΔΩΔΕΚΑΧΟΡΔΟΝ was printed at Basle in 1547. A second edition, entitled *De Musices divisione ac definitione*, but with the same headings to the chapters, is believed to have been printed at the same place in 1549.[1] A small volume, entitled *Musicae Epitome, sive Compendium, ex Glareani Dodecachordo*, by J. Wonnegger, was published at Basle in 1557, and reprinted in 1559. The original work is now very scarce and costly, though, happily, less so than the *Syntagma* of Praetorius, or the *Musica getuscht und auszgezogen* of Sebastian Virdung. Copies of the edition of 1547 will be found at the British Museum and the Royal College of Music; and the British Museum also possesses the first edition of Wonnegger's *Epitome*. W. S. R.; additions by W. H. F.

DÖHLER, THEODOR, of a Jewish family, born April 20, 1814, at Naples; died Feb. 21, 1856, at Florence; an accomplished pianist, and composer of 'salon' music—a vendor of the sort of ware for which the epithet 'elegant' seems to have been invented. His Fantasias, *i.e.* operatic tunes embroidered with arpeggios; his 'Variations de concert,' or 'de salon'—similar tunes not necessarily operatic, but bedizened with the same cheap embroidery; his 'Transcriptions'—nondescript tunes bespangled after the selfsame fashion; his 'Nocturnes'—sentimental *eau sucrée*, made up of a tearful tune for the right hand propped upon undulating platitudes for the left, in D flat; his 'Études,' also 'de salon' or 'de concert'—some small piece of digital gymnastics with little sound and less sense,—are one and all of the same calibre, reprehensible from an artistic point of view, and lacking even that quaintness or eccentricity which might ultimately claim a nook in some collection of musical *bric-à-brac*. Döhler was an infant phenomenon, and as such the pupil of Benedict, then resident at Naples. In 1829 he was sent to Vienna, and became Carl Czerny's pupil. From Vienna, where he remained till 1834, he went to Naples, Paris, and London—then travelled in Holland, Denmark, Poland, and Russia—as a successful fashionable virtuoso. [He was raised to noble rank by the influence of his patron, the Duke of Lucca, and enabled to marry a Russian princess in 1846; he gave up public playing about that time, and lived successively in Moscow, Paris, and (from 1848) Florence. An opera by him, 'Tancreda,' was performed at Florence in 1880. (Riemann's *Lexikon*).] He died of a disease of the spinal marrow which troubled him for the last nine years of his life. His works, if works they can be called, reach as far as opus 75. E. D.

[1] See GLAREANUS.

DÖRFFEL, ALFRED, born Jan. 24, 1821, at Waldenburg in Saxony, received his first musical education from the organist Joh. Trube. In 1835 he entered the Leipzig Conservatorium, where he received instruction from Karl Kloss, G. W. Fink, C. G. Müller, Mendelssohn, and Schumann. In 1837 he made a successful appearance as a pianist, and soon afterwards attained to a high position as a musical critic. In the *Neue Zeitschrift für Musik* he wrote some reviews of Schumann's works, which anticipated the verdict of posterity, although they did not correspond with contemporary opinion concerning that master's greatness. His criticism of 'Genoveva' gave the composer great pleasure. From 1865 to 1881 he contributed to the *Leipzige Nachrichten*, and in 1860 was appointed custodian of the musical department of the town library. In the following year he established a music lending library together with a music-selling business, in both of which he was succeeded in 1885 by his son, Balduin Dörffel. This business afterwards became the basis of the lending library of the Peters firm. He has undertaken much work for the firm of Breitkopf & Härtel, whose critical editions of the classics, and especially that of Beethoven, have been chiefly corrected by him. For the edition of Peters he has edited the pianoforte works of Schumann, and other compositions, and several of the Bach-Gesellschaft volumes have been issued under his direction. In 1887 he edited the *St. Luke Passion* for the first-named firm. To the literature of music he has contributed an edition of Berlioz's treatise on Instrumentation, the second edition of Schumann's *Gesammelte Schriften*, and has published an invaluable history of the Gewandhaus

concerts from 1781 to 1881 (*Festschrift zur hunderjährigen Jubelfeier*, etc. Leipzig, 1884), in recognition of which the University of Leipzig conferred upon him the honorary degree of Doctor in 1885. H. B.

DOHNÁNYI, Ernst von, born July 27, 1877, at Pressburg in Hungary, was at first taught music by his father, the professor of Mathematics in the Gymnasium there, where his general education was completed; in 1885 he began pianoforte lessons with Carl Forstner, organist of the Cathedral of Pressburg, and later on studied harmony with him, remaining under his musical supervision until 1894, when he entered the Royal Hungarian Academy of Music, in Budapest, as a pupil of Stephan Thomán for piano, and of Hans Koessler for composition. While he was still at Pressburg he made several experiments in the larger forms of composition, writing a string sextet, and three string quartets, besides pianoforte sonatas, songs, etc. At Budapest a symphony in F was rewarded with the King's prize, and performed in 1897. In July and August of that year he had some lessons from Eugen d'Albert, being already a pianist of high attainment; on his first appearances, in Berlin, Oct. 1, 1897, and at Vienna a little later, he was recognised as an artist of the highest rank. Not only is his technical accomplishment extraordinarily complete, but the breadth of his phrasing, his command of tone-gradation, and the exquisite beauty of his tone, are such as to satisfy the most exacting lover of classical and modern music, and in both an intensely poetical nature is revealed. He played in the principal cities of Germany, Austria, and Hungary, before his first appearance in England, which took place at a Richter concert in the Queen's Hall in Beethoven's G major concerto, on Oct. 24, 1898. He made a rapid and permanent success within a very short time, and visited the United States in 1899 and 1900. In recent years he has devoted himself so much to composition that his appearances in England as a pianist have not been as frequent as his many admirers could have wished. His compositions show a strong feeling for classical forms, great originality of ideas, and treatment that is always interesting and very often felicitous in the extreme; the ingenious and beautiful variations in G, on a theme by a pupil of his, 'E. G.,' the scherzo in C sharp minor, and three lovely intermezzi, by which his work as a composer was first represented in England, give evidence of rare genius. His quintet for piano and strings, in C minor, op. 1, first performed at Budapest in 1895, was the next work by which his powers were gauged in England; it is a work of sterling value, showing thorough knowledge of the art of writing well for instruments.

The list of his compositions is as follows (those already published are marked with an asterisk):—

Op.
1. Quintet for piano and strings in C minor.*
2. Overture, 'Zrinyi' (won the King's prize in Budapest and was performed there in 1897).
3. Five Clavierstücke, including the intermezzi and scherzo mentioned above.
4. Variations for pianoforte, in G.*
5. Pianoforte Concerto in E minor.
6. Passacaglia, for pianoforte solo.*
7. String Quartet in A minor, first performed in London, 1899.*
8. Sonata in B flat minor for violoncello and piano.*
9. Symphony in D minor.*
10. Serenade in C for violin, viola, and violoncello (first performed in Vienna, 1900).
11. Four Rhapsodies for pianoforte solo.

An interesting article on Dohnányi appeared in the *Musical Times* for January 1899. M.

DOLBY, Charlotte. See Sainton, Madame.

DOLCE, *i.e.* sweetly; a sign usually accompanied by piano, softly—*p. dol.*, and implying that a sweet melodious feeling is to be put into the phrase. Beethoven (string quartet, Op. 59, No. 1) has *mf e dolce;* and Schumann begins the Finale of his E♭ Symphony with *f dolce.*

DOLCIAN or DULCIAN (sweet-toned). A modification of the fagotto or fagottino (see Bassoon) having the bell-mouth covered by a perforated cap, by which the open and harsh character of the lower notes was subdued. D. J. B.

DOLES, Johann Friedrich, born April 23, 1715, at Steinbach in Saxe-Meiningen, was educated at the Schleusingen Gymnasium, where he availed himself of instruction in singing and in playing on the violin, clavier, and organ. In 1739 he went to Leipzig for a course of theology at the University, and while there pursued his musical studies under J. S. Bach. His compositions, however, bear little trace of Bach's influence; though fluent and correct, they have none of that great master's depth and grandeur. Doles would seem to have been more affected by the Italian Opera, with which he became familiar by constant attendance at performances given for the Saxon court at Hubertsburg. His light, pleasing, and melodious compositions, together with the charm of his manners, rapidly brought him popularity at Leipzig. In 1743 the Gewandhaus Concerts were founded;[1] and on March 9, 1744, he conducted the first performance of his Festival Cantata in celebration of the anniversary of their foundation. In that same year he was appointed Cantor at Freiberg, where he wrote, in 1748, on the occasion of the hundredth anniversary of the Peace of Westphalia, the Singspiel, out of which arose the famous dispute between Biedermann, Mattheson, and Bach.[2] In Jan. 1756 he succeeded Gottlob Hasser as Cantor of the Thomasschule and also as director of the two principal churches, which posts he held until 1789, when old age and failing health compelled him to resign them. In the spring of 1789 Mozart visited Leipzig, and on April 22 he played on the organ at St. Thomas's Church, and made his well-known remark to Doles about Bach's music. [See Mozart.] It was

[1] They were then called 'das grosse Concert' and were held in a private house; but almost immediately after their commencement they were interrupted by the outbreak of the Seven Years' War.

[2] See Bitter's *J. S. Bach*, iii. 229, and Spitta's *J. S. Bach*, iii. 255 f. (Engl. transl.).

probably on the same occasion that J. C. Barthel played before Mozart at Doles's house. [See BARTHEL, J. C.] And in the following year Doles published his cantata to Gellert's words (performed in 1789), 'Ich komme vor dein Angesicht' (Leipzig, 1790), dedicated to his friends Mozart and Naumann. Special interest attaches to this work, because its preface records Doles's opinions as to the way in which sacred music should be treated, and those opinions have little in common with the traditions of J. S. Bach. It is plain, indeed, that although Doles was proud of having been Bach's pupil, and therefore unwilling to depreciate him openly, he took no pains whatever, during his directorship at Leipzig, to encourage and extend the taste for his great master's works. Bach's church-music was almost entirely neglected both by him and his successor, J. A. Hiller. Doles died at Leipzig on Feb. 8, 1797.

His compositions consist principally of cantatas, motets, psalms, sacred odes and songs, and chorales, many of which have been printed, including some sonatas for the clavicembalo. His *Elementary Instruction in Singing* had, in its day, considerable reputation as a useful practical method. Among his many works (for list see *Quellen-Lexikon*) may be mentioned three settings of the Passion-music, according to St. Matthew, St. Mark, and St. John, two Te Deums, two masses, a Kyrie, a Gloria, a Salve, and a German Magnificat. A. H. W.

DOMINANT is the name now given to the 5th note of the scale of any key counting upwards. Thus G is the dominant in the key of C, F in that of B♭, and F♯ in that of B. It is so called because the key of a passage cannot be distinguished for certain unless some chord in it has this note for root; for which reason also it is called in German 'Der herrschende Ton.' The dominant plays a most important part in cadences, in which it is indispensable that the key should be strongly marked; and it is therefore the point of rest in the imperfect cadence or half close, and the point of departure to the tonic in the perfect cadence or full close. (See CADENCE, (*b*) I. and II.)

It also marks the division of the scale into two parts; as in fugues, in which if a subject commences with the tonic its answer commences with the dominant, and *vice versâ*. In the sonata form it used to be almost invariable for the second subject to be in the key of the dominant, except when the movement was in a minor key, in which case it was optional for that part of the movement to be in the relative major. In lighter and simpler kinds of composition the harmonic basis of the music often alternates chiefly between tonic and dominant, and even in the most elaborate and deeply thought works the same tendency is apparent, though the ideas may be on so extended a scale as to make the alternation less obvious. [Under the ancient modal system the dominant was not always upon the same degree of the scale. For its history and position, see MODES.] C. H. H. P.

DOMINO NOIR, LE. Opéra-comique in three acts, words by Scribe, music by Auber; produced Dec. 2, 1837. Translated by Chorley and produced in English (an earlier attempt had failed) Feb. 20, 1861, at Covent Garden.

DOMMER, ARREY VON, born Feb. 9, 1828, at Danzig, was brought up to theology, but in 1851 went to Leipzig and learnt composition from Richter and Lobe. After some time passed as a teacher of music, he forsook Leipzig in 1863 for Hamburg, where he spent seven years as a musical critic and correspondent, and in 1873 was made secretary to the Hamburg city library, a post which he held until 1889, when he retired and went to live at Marburg. In 1862 his *Elemente der Musik* appeared; in 1865 he published an enlarged edition of H. C. Koch's *Musikalisches Lexicon* of 1802, which is a sterling work, perhaps a little too sternly condensed. Besides this his *Handbuch der Musikgeschichte* (1868, 2nd ed. 1878) is highly spoken of by Riemann, from whom the above is chiefly obtained. G.

DON CARLOS. (1) An opera seria in three acts, words by Tarantini, music by Costa; produced at Her Majesty's Theatre, London, June 20, 1844. (2) Grand opera in five acts, words by Méry and Du Locle, music by Verdi; produced at the Grand Opéra, Paris, March 11, 1867, and in London, at Covent Garden, June 4 of the same year.

DON GIOVANNI—or, full title, IL DISSOLUTO PUNITO, OSSIA IL DON GIOVANNI—opera buffa in two acts; words by Da Ponte; music by Mozart. Produced at Prague, Oct. 29, 1787 (the overture written the night before); at Vienna, May 7, 1788, with three extra pieces, 'In quali,' 'Mi tradi,' 'Dalla sua pace'; in London, King's Theatre, April 12, 1817. Autograph formerly in the possession of Mme. Viardot Garcia, who presented it to the Paris Conservatoire.

DON PASQUALE. Opera buffa in three acts; music by Donizetti. Produced Jan. 4, 1843, at the Italiens, Paris; in London, Her Majesty's Theatre, June 30, 1843.

DON QUIXOTE. The theme of Cervantes's novel attracted the attention of playwrights soon after the English translation was issued, and there are one or two 17th century dramas bearing the title. The most famous of these is Thomas D'Urfey's 'Comical History of Don Quixote,' acted at the theatre in Dorset Gardens in 1694. A second part followed in the same year, and a third in 1696.

There are musical settings in each, and some of the songs attained a considerable degree of popularity. Henry Purcell and John Eccles were the principal composers, and the music was published by Samuel Briscoe in three small folio volumes having the above dates.

Other musical plays with Cervantes's hero as a title might be quoted, one among them being 'Don Quixote in England,' 1733, by Henry Fielding; in this first appears the famous song 'The Roast Beef of Old England.' F. K.

No fewer than twenty-nine operatic settings of the subject, or of libretti taken from some part of the book, are enumerated in Riemann's *Opern-Handbuch*. The earliest seems to be that by Förtsch at Hamburg, 1690; among others may be mentioned settings by Caldara (1727), Padre Martini (*c.* 1730), Salieri (1771), and Paesiello (*c.* 1775). G. A. Macfarren's setting of a libretto by his father was in two acts, and was produced at Drury Lane, Feb. 3, 1846; Frederic Clay's operatic version was of slighter texture, but fine quality; it was brought out in 1875. Richard Strauss's symphonic poem on the subject of Don Quixote is called 'Fantastische Variationen,' and was first played in London, June 5, 1903. M.

DONATI, BALDASSARE (1548-1603), was connected with San Marco of Venice all his life. In 1550 he was Musico e Cantor there, and on Oct. 14, 1562, was appointed Maestro di cappella piccola. This 'cappella piccola' was formed with the idea of supplying with well-trained voices the 'grande cappella,' of which Adriano Willaert was maestro. Willaert died Dec. 7, 1562. Cypriano de Rore succeeded him till Dec. 1564, and Zarlino was appointed, July 5, 1565. The latter, not requiring the assistance of the 'cappella piccola,' demanded and obtained its suppression, Donati retaining his former position as singer. Donati probably felt some resentment at this treatment, which may account for his taking part in a curious demonstration against Zarlino a few years later. In 1569, on a great festival day at San Marco, Zarlino wished the service to be sung with double choir. He was strongly opposed by the singers (among them Donati), who urged the traditional custom of the 'vespro semplice.' The result was, that to the great scandal of the congregation, those who should have sung with the 'voci d' angeli,' sang instead with the 'voci di dimonii,' creating such an uproar, that a formal inquiry was held by the Procuratori, who dealt out varying penalties, Donati escaping with a fine of twelve ducati.

On August 7, 1580, he was appointed maestro di canto to the newly founded Seminario Gregoriano di San Marco. Zarlino died in 1590, and on March 9, 1590, Donati was nominated to the coveted position of maestro di cappella in San Marco. It was a five years' appointment, and he was expected to continue teaching canto figurato, contrappunto, and canto fermo at the Seminario, and was not allowed to sing except in San Marco ('proibizione di andar più a cantar in loco altro fuori della detta cappella'). His appointment was renewed on March 16, 1596, but he was then no longer required to teach in the Seminario. Donati died in 1603. He was a member of the Nuova Accademia Veneziano. He was a good organist as well as a singer of some note. He composed many graceful madrigals and villotte, distinguished by their vivacity and well-marked rhythm. List of works :—

1. Baldissara Donato musico e cantor in Santo Marco, Le Napolitano et alcune Madrigali a 4 voci. Da lui novamente composte, corrette e misse in luce. Venetiis apud Hieronymum Scotum. 1550. 4to. Four partbooks in Vienna Hofbibl.
2. Di B. D. Il primo libro di canzon Villanesche alla Napolitana a 4 voci, novamente da lui composte, . . . aggiuntovi anchora alcune Villotte di Perissone a 4, con la canzon della Gallina a 4 voci. Venetia. Ant. Gardano. 1550. Obl. 4to. Tenor partbook in Turin Bibl. Nazionale.
3. The same. Novamente ristampate. Con la giunte d' alcune Villotte di Perissone, etc. Obl. 4to. No date, but about 1550. Four partbooks in Bologna Liceo Musicale.
4. The same. Insieme con alcuni Madrigali novamente ristampate. Aggiuntovi anchora alcune Villotte, etc. Venetiis apud Hieron. Scotum. 1551. Obl. 4to. Four partbooks in the Munich Hofbibl.
5. The same. Novamente ristampate. Aggiuntovi anchora alcune Villotte, etc. Venetia. Ant. Gardano. 1552. Obl. 4to. Four partbooks in Wolfenbüttel Herzogl. Bibl.
6. Di B. D. Il primo libro di madregali a 5 e a 6 voci. Con tre dialoghi a sette. Novamente dati in luce. Venetia. Ant. Gardano. 1553. Obl. 4to. Two of the partbooks (Quinto, Sesto) are in the Verona Teatro filarmonico Bibl.
7. A new edition of No. 3. Venetiis. Hieron. Scotum. 1556. Obl. 4to. Basso in Berlin Königl. Bibl.
8. Il primo libro di madrigali a 5 e a 6 voci. Con tre dialoghi a sette. Di nuovo riveduti, e con somma diligentia corretti. Venetia. Plinio Pietrasanta. 1557. Obl. 4to. Six partbooks in Modena Bibl. Estense.
9. A new edition of No. 6. 1558. Four partbooks in the British Museum.
10. A new edition of No. 6. 1559. An Alto partbook entered in the Catalogue of the Venice Bibl. is no longer to be found.
11. The same. Novamente per Antonio Gardano ristampate a 5 voci. Venetia. Ant. Gardano. 1560. Obl. 4to. Six partbooks in the Munich Hofbibl., etc.
12. A new edition of No. 6. 1560.
13. Di Baldassare Donati. Madrigali a 6 e 7 voci. Venetia. 1567. 4to.
14. Di B. D. Il secondo libro de Madrigali a 4 voci. Novamente da lui composti. Venetia. Ant. Gardano. 1668. Obl. 4to. Four partbooks in Bologna Liceo Musicale, etc. The Cantus partbook of an edition published 'Venegia, Girolamo Scotto, 1568,' is in the Stockholm Mus. Acad. Bibl.
15. Di B. D. Maestro di capella della serenissima signoria di Venetia in San Marco. Il primo libro de' motetti a 5, 6, e 6 voci. Novamente composti e dati in luce. Venetia. Angelo Gardano. 1599. 4to. Eight partbooks in the Augsburg Bibl.

MSS. One Villanella alla napoletana. Partitura e parti. Folio. In Bologna Liceo Musicale. (Parisini.)
'Fiama amoroso e bella' for 6 voices. (From the Madrigali, Lib. i., 1660.) In the Munich Hofbibl. (Maier.)
'Tratto fuoro del mar' for 6 voices, also 4 madrigals and 3 canzoni for 4 voices. In the Berlin Königl. Bibl. (Eitner.)
Two Psalms for 12 voices (MS. 16,708, incomplete) and 'L' amoroso giudizio' (MS. 19,242. Drama musicum). In the Vienna Hofbibl. (Mantuani.) Some madrigals (in score) in the Brussels Bibl. royale. MS. 2289. (Fétis.)
Madrigal for 4 voices, 'O grief, if yet my grief' (Add. MSS. 17,792-6), and two canzoni for 4 voices, 'Chi la gagliarda' and 'Te parlo, tu me ridi' (Add. MS. 11,584). In the British Museum.

In Collections (published at Venice) :—

1548. S' una fede amorosa: S' haver altrui più. Lib. iii. di Madrigali a 5 voci di C. de Rore.
1549. O felice colui. Fantasie ed ricerchari a 3 voci da Giul. Tiburtino da Tievole. Also in the 1551-55-59-61-69-97 editions of Madrigali a 3 voci de div. eccell. autori. In Musica Libro primo a 3 voci di Adr. Wiglar. 1566. In the 1670-78-86 editions of Lib. i., delle Justiniane a 3 voci. (Scotto.)
Motet. Lib. i., de' motetti a 6 voci da div. eccell. musici. (Scotto.)
1551. See 1549.
1655. See 1549.
1557. Amor io son si lieto. Lib. iv. Madrigali a 5 voci di C. de Rore, and in 1563 edition.
1559. See 1549.
1561. See 1549.
1561. Pensier dicea. Lib. iii. delle muse a 5 voci composto da div. eccell. musici. (Gardano.) And in 1569 edition.
1563. See 1557.
1566. See 1549.
1569. See 1549 and 1561.
1569. O dolce servitù; Anchor ch' io possa dire; S' io veggio in altra. La Eletta di tutta la musica intitolata corone de' diversi, a 4 voci. Lib. i.
1570. See 1549.
1570. Questo si ch' è. Antonelli's I dolci frutti. Lib. i. Madrigali di div. eccell. autori a 5 voci.
Quando madonna. Lib. vi. delle Villotte alla Napoletana a 3 voci. (Gardano.)
1572. E voio criar, tanto criar. Lib. i. delle Justiniane a 3 voci.
1576. Che val peregrinar. Musica di XIII. autori illustri a 5 voci per Angelo Gardano reccolte. And in 1569 edition.
Seven motets from B. D.'s Lib. i.: Adesse nuptiales; O Jhesu Christe; Quem diros hydrops; Quid haesitas rogare; Rumpe somnium; Turba de Christo; Unde judicibus datur. In Cantiones suavissime quatuor vocum. (Erfurt, Baumann.)
1578. See 1549.
1679. Tratto fuori del mar. Trionfo di musica di diversi a 6 voci.

Lib. i. Also in Melodia olympica di div. eccell. musici, raccolta da Pietro Philippi. 1591, 1594, and 1611 editions. Anversa.
1582. One song in lute tablature. Novae tabulae musicae. J. C. Barbetti (Strasburg).
1584. Da quei bei crini (a 5); Deh! lascia l'antro (a 4); Dolor, se'l mio dolore (a 5). Fronimo, in notazione di liuto. Vinc. Galilei.
Cantiamo dunque (a 8); Quando nascesti (a 12). Musica di diversi autori illustri. Lib. i. (Vincenti and Amadino.)
1585 Wann uns die Henn; Zu dir allein Herr steht. Schöner Lieder . . . mit 4 Stimmen gesetzt, durch Joh. Pühlerum Schvuandorffemesm. (Munich.)
1586. See 1549.
1588. O grief, if yet my grief (Dolor se'l mio dolor); As in the night (Come la notte). Yonge's Musica Transalpina, a 4 voci. Nos. 5 and 8, reprinted by Budd, 1859.
1589. See 1576.
1589. Che val essa nudrita. Musicale essercitio di Ludovico Balbi, a 5 voci.
1588-89-90. Chi dirà mai; O dolce vita; Tu mi farai. Gemma musicalis. Frederici Lindner. (Norlbergae.) Lib. i., ii., iii. A 4 voci.
1591. See 1579.
1593. Da quei bei crini (a 5). Nuova spoglia amorosa (Vincenti).
1594. See 1579.

1636. See 1597.
in 1837, 'All ye who music love' was included in Thos. Oliphant's 'Favourite Madrigals arranged from the original partbooks.' The graceful 'Chi la gagliarda' from the first book of Canzoni has often been reprinted—in Burney, iii. 216; Busby, ii. 108; Kiesswetter, no. 23; Reissmann, ii. no. 19; Wüllner, no. 92; and at more recent date edited by W. B. Squire, with 'Viva sempre,' villotte for four voices (Novello, 1895). These two, together with three madrigals, are in the first volume of Torchi's *Arte Musicale in Italia*. C. S.

DONATI, IGNATIO (1612-1638), was born at Casalmaggiore near Cremona. In 1612 he was organist of Urbino Cathedral, in 1616 and 1619 maestro di cappella della Archiconfraternità e Accademia dello Spirito Santo di Ferrara, in 1622 and 1626 maestro di cappella della Terra di Casalmaggiore. In Lomazzo's 'Flores praestantissimorum virorum,' Milan, 1626, Ignatio Donati is termed 'maestro di cappella of Novara Cathedral' (Parisini, ii. 67). In 1629 and 1630 he was organist of Lodi Cathedral, and from 1631 till 1638 maestro di cappella of Milan Cathedral. Donati was probably organist of Pesaro Cathedral before 1612; at any rate it was there, as well as at other places, that he tried his plan of making the different voices sing at a distance from each other (Parisini, ii. 144).

List of works:—

1. Ignatii Donati Ecclesiae Metropolitanae Urbini Musicae Praefecti. Sacri Concentus 1, 2, 3, 4, & 5 vocibus, unà cum parte Organica. Venetia. Giacomo Vincenti. 1612. 4to. Contains fifty-four compositions. Five partbooks in the Breslau Stadtbibl.

2. Motetti a 5 voci in Concerto con due Sorti di Letanie della Beata Vergine & nel fine alcuni Canoni. D' Ign. D. maestro di capella dell' Archiconfraternità & Accademia dello Spirito Santo di Ferrara. Venetia. Giac. Vincenti. 1616. 4to. Opera completa. Six partbooks. Tenore e Quinto in Berlin Königl. Bibl.

3. Concerti ecclesiastici a 2, 3, 4, & 5 voci. Con il Basso per sonar nell' organo. D' Ign. D. maestro di capella dello Spirito Santo di Ferrara. Opera IV. Venetia. Giac. Vincenti. 1618. 4to. Contains twenty-one compositions. Five partbooks in Bologna Liceo Musicale.

4. Concerti ecclesiastici a 1, 2, 3, & 4. Con il Basso per l'organo. D'Ign. D. maestro di capella dello Spirito Santo in Ferrara. Opera V. Venetia. Giac. Vincanti. 1618. 4to. Four partbooks. Cantos I. and II. in Bologna Liceo Musicale.

5. Motetti concertati a 5 & 8 voci con Dialoghi, Salmi e Letanie della B.V. e con il Basso continuo per l'organo. D' Ign. D. maestro di capella della Archiconfraternità & Accademia dello Spirito Santo di Ferrara. Opera VI. Venetia. Giac. Vincenti. 1818. 4to. Contains fifteen compositions. Seven partbooks in Königsberg Bibl.

6. Concerti ecclesiastici . . . Opera IV. Novamente con ogni diligentia corrette e ristampate. Venetia. Aless. Vincenti. 1619. 4to. Six partbooks in the Brussels Bibl. royale.

7. Concerti ecclesiastici . . . D' Ign. D. maestro di capella della Terra di Casal Maggiore. Opera V. Novamente con ogni diligentia corretta e ristampate. Venetia. Aless. Vincenti. 1622. 4to. Canto II., Terza e Quarta parte in Bologna Liceo Musicale.

8. Motetti a 5 voci in concerto. . . . Novamente ristampate & con diligentia corrette. Venetia. Aless. Vincenti. 1622. 4to. Tenor, Basso, Quinto, e Basso per l' org. in Bologna Liceo Musicale.

9. Messe a 4, 5, & 6 voci, parte da Capella e da Concerto con il Basso per l' organo. D' Ign. D. maestro di capella della Terra di Casal Maggiore. Venetie. Aless. Vincenti. 1622. 4to. Contains four Masses. Seven partbooks. Tenor, Quinto e Sesto in Bologna Liceo Musicale.

10. Salmi boscarecci concertati a sei voci, con aggiunta, se piace, di altre sei voci, che servono per concerto, e per Ripieno doppio, per cantare a più chori; con una Messa similmente concertata, & con il Ripieno, d' un altra simile a sei, già stampata: & con il Basso principale per sonar nell' organo. D' Ign. D. maestro di capella nella Terra di Casalmaggiore; L' Auriga nella Academia de Filomeni. Opera IX. Venetia. Aless. Vincenti. 1623. 4to. Contains sixteen compositions. Thirteen partbooks in Ferrara Bibl.

11. Concerti ecclesiastici. . . . Opera V. Novamente in questa Terza impressione con ogni, etc. Venetia. A. Vincenti. 1625. 4to. It includes one motet by A. Serra, a pupil of Donati's, to whom he dedicated No. 18. Four partbooks in Bologna Liceo Musicale.

12. Concerti ecclesiastici . . . D' Ign. D. maestro di capella della Terra di Casal Maggiore. Opera IV. Novamente in questa Terza impressione corretti & ristampati. Venetia. A. Vincenti. 1626. 4to. Five partbooks in the Breslau Stadtbibl.

13. Motetti a 5 voci in concerto. . . . Novamente in questa Terza impressione ristampati e corretti. Venetia. A. Vincenti. 1628. 4to. Six partbooks in Bologna Liceo Musicale.

14. Messe a 4, 5, & 6 voci. . . . Novamente in questa Terza impressione ristampati. Venetia. A. Vincenti. 1626. 4to. Seven partbooks in Bologna Liceo Musicale.

15. Motetti concertati a 5 & 6 voci. . . . Opera VI. Novamente ristampate e corretta. Venetia. A. Vincenti. 1627. 4to. Seven partbooks in the Breslau Stadtbibl.

16. Madre de Quatordeci Figli. Nihil difficile volenti. Il secondo libro de' motetti a 5 voci in concerto. D' Ign. D. maestro di capella del Domo di Lodi. Fatta sopra il Basso Generale di Perfecta sunt in te. Venetia. Aless. Vincenti. 1629. 4to. Contains seventeen motets. Six partbooks in Bologna Liceo Musicale.

In the Dedication Donati says that he has taken the Basso continuo of 'Perfecta sunt in te,' already published in his Concerti a 5 voci, and has written fourteen more motets on it, these making, with 'Perfecta sunt,' the number fifteen 'consonanza perfecta.' Two more motets follow, not on the same Bass.

17. Concerti ecclesiastici. . . . Opera IV. Novamente ristampate. Venetia. A. Vincenti. 1630. Five partbooks in the Brussels Bibl.

18. Concerti ecclesiastici. . . . D' Ign. D. maestro di capella del Duomo di Lodi. Opera V. Novamente impressa in questa Quarta impressione con ogni diligenza corretta & ristampata. Venetia. A. Vincenti. 1630. 4to. Four partbooks in the Bologna Liceo Musicale.

19. Le Fanfalughe a 2, 3, 4, & 5 voci del Signor Ign. D. maestro di capella del Domo di Lodi. Raccolte da me Alessandro Vincenti. Venetia. Aless. Vincenti. 1630. 4to. Contains twenty-eight compositions. Six partbooks in Breslau Stadtbibl.

20. Il secondo libro delle Messe da capella a 4 et a 5. D' Ign. D. maestro di capella del Duomo di Milano. Opera XII. Messe 1 & 2, a quarta; messe 3 & 4, breve a quattro a voce piena, & a voce para; messa 5, a quinta; messa 6, pro defunctis a quattro, a voce piena, & a voce para con la quinta parte, si placet. Venetia. A. Vincenti. 1633. 4to. Six partbooks in the Breslau Stadtbibl.

21. Il primo libro de' motetti a voce sola di Ign. D. maestro di capella nel Duomo di Milano. Da quali quei che desiderano imparare à portar la Voce con gratia, et asquistar dispositione potranno agevolmente da sa prendere la maniera di cantar gratiosamente, far scherzi, passaggi, et altri leggiadri effetti. Opera VII. Novamente corretta & ristampata. Venetia. A. Vincenti. 1634. Fol. score, pp. 35. In Bologna Liceo Musicale. Fétis mentions an edition of 1628. This may have been the second edition. The first edition must have been before 1623.

22. Li vecchiarelli e perregrini concerti a 2, 3, & 4 voci, con una messa a 3 & a 4 concertata d' Ign. D. maestro di capella del Domo di Milano. Raccolta da me Aless. Vincenti. Opera XIII. Venetia. A. Vincenti. 1636. 4to. Five partbooks in Breslau Stadtbibl.

23. Il secondo libro de' Motetti a Voce sola d' Ign. D. maestro di capella del Duomo di Milano. Per educatione de figlioli et figliole dedicati a. . . . Opera XIV. Venetia. A. Vincenti. 1636. Fol. Two partbooks, 'parte per cantare' and 'parte per sonare,' in the Bologna Liceo Musicale.

24. Messe a 4, 5, & 6 voci. Parte da Capella e da Concerto. D' Ign. D. Maestro di capella della Terra di Casal Maggiore. Novamente in questa Quarta impressione ristampate. Venetia. A. Vincenti. 1645. 4to. Seven partbooks in Breslau Stadtbibl. In Königsberg Bibl. MSS. 48, some Cantiones, and 69, 'Perfecta sunt in te' a 5 (both incomplete); MS. 71, 'Motetti a 5 voci in concerto.'

Eitner (*Quellen-Lexikon*) gives the following MSS.:—
MS. W. 49, Berlin Königl. Bibl. 'Languet anima,' 5 voc.
MSS. in Kremmünster Bibl. Nos. 3 and 4 contain Psalms, Litanies, and Motets.
MS. 988, Bibl. Proske. 6 Psalms.
In printed Collections:—
1819. Quae est ista (a 2); O Maria, dilecta mea (a 3). Sacrae et divinae Cantiones, 2 & 3 voc., ad organum decantandae. Raccolta da Zac. Zanetti. (Parisini, II. 369.)
1621. Benedicat nos Deus (a 3); Exultovit cor meum (a 2); Filiae Sion exultate (a 2); Oandebunt labia mea (a 2); Hodie spiritus sanctus (a 3); O dulcissime Domine (a 3); Quando natus es (a 2). Symbolae diversorum musicorum 2, 3, 4, and 5 voc. cantandae. Ab admodum Rev. D. Laurentio Calvo editae. (Israel, Mus. Schätze, p. 3.)
1826. Litanie a 5, 6, 7 e 8, se piace, de Sig. D. Ignatio Donati.

Rosarium Litaniarum B.V. raccolta di D. Lorenzo Calvo. (Parisini, II. 171.)
1641. Dulcis amor Jesu (a 5). Erster Theil Geistlicher Concerten, durch Ambrosium Profium. Leipzig.
Paratum cor meum (a 5). Ander Theil Geistlicher Concerten.
1646. Languet anima mea (a 5). Vierdter u. letzter Theil. (Jos. Müller.)
1653. Coloraturae taken from Ign. D.'s 'Concerten voce sola': O admirabile commercium; O Filii Dei suavissime, for Canto or Tenore. Musica moderna prattica. J. A. Herbst. Frankfurt. (In British Museum.)

The 'Messe breve (a 4, a voce piena et a voce para) d'Ignatio Donati' (1633) was included in Composizioni per canto. Publicata della Caleografia musica sacra. Milano. 1891. 8vo. C. S.

DONI, Giovanni Battista, born at Florence about 1593, studied Greek, rhetoric, poetry, and philosophy at Bologna and Rome. He received the degree of doctor from the university of Pisa, and was chosen to accompany Cardinal Corsini to Paris in 1621, where he became acquainted with Mersenne and other literary persons. On returning to Florence in 1622, he entered the service of Cardinal Barberini, and went with him to Rome, where he became secretary to the papal college, afterwards accompanying the cardinal to Paris, Madrid, and back to Rome. Doni made good use of the opportunities that came in his way on these journeys, to acquire an exhaustive knowledge of ancient music; among other things he invented, or reconstructed, a double lyre, which, in honour of his patron, he called 'Lyra Barberina,' or 'Amphichord.' After the death of his brother he returned to Florence about 1640, when he married and settled down as professor in the university there. He died in 1647. In 1635 his valuable treatise on the ancient Greek music, *Compendio del trattato de' generi e de' modi della musica*, was published at Rome; and, as it was an abstract of a larger work, it was completed by the publication of *Annotazioni sopra il compendio*, etc., in 1640. Another book, *De praestantia musicae veteris*, appeared at Florence in 1647, and as late as 1763 his description of the 'Lyra Barberina' was published at Florence. Some other treatises are still in existence in a MS. in the library of Sta. Cecilia in Rome, and a few fragmentary works are mentioned in the *Quellen-Lexikon*. M.

DONIZETTI, Gaetano, was born at Bergamo, Nov. 25, 1797 (Riemann gives the 29th as the date); and though he began his career at a very early age, he never achieved any important success until after Rossini had ceased to compose. Having begun his studies at the Conservatorio of Naples, under Mayr, he completed them at the Liceo Filarmonico at Bologna. His father, originally a weaver by trade, wished him to be a teacher, but to avoid this he entered the army, and while quartered at Venice produced, in 1818, his first opera, 'Enrico di Borgogna,' which was rapidly followed by 'Il Falegname di Livonia' (Mantua, 1819). His 'Nozze in villa' failed in 1820, but 'Zoraïde di Granata,' given at Rome in 1822, procured for the young imitator of Rossini exemption from military service, and the honour of being carried in triumph and crowned at the Capitol. A long series of operas, (see below) was given in Rome, Naples, and other cities, but the first which crossed the mountains and the seas and gained the ear of all Europe was 'Anna Bolena,' given for the first time at Milan in 1830. This opera, which was long regarded as its composer's masterpiece, was written for Pasta and Rubini. It was in 'Anna Bolena' too, as the impersonator of Henry VIII., that Lablache made his first great success at the King's Theatre in London. The graceful and melodious 'Elisir d' Amore' was composed for Milan in 1832. 'Lucia di Lammermoor,' perhaps the most popular of all Donizetti's works, was written for Naples in 1835, the part of Edgardo having been composed expressly for Duprez, that of Lucia for Persiani. Among other results of its success was the appointment of Donizetti as professor of counterpoint at the Real Collegio di Musica at Naples. The lively little operetta called 'Il Campanello di Notte' was produced in 1836 under very interesting circumstances, to save a Neapolitan manager and his company from ruin. 'If you would only give us something new our fortunes would be made,' said one of the singers. Donizetti declared they should have an operetta from his pen within a week. But where was he to get a libretto? He determined himself to supply that first necessity of the operatic composer; and, recollecting a vaudeville which he had seen in Paris, called 'La Sonnette de Nuit,' took that for his subject, rearranged the little piece in operatic form, and forthwith set it to music. It is said that in nine days 'the libretto was written, the music composed, the parts learned, the opera performed, and the theatre saved.' Donizetti seems to have possessed considerable literary facility. He designed and wrote the last acts both of the 'Lucia' and of 'La Favorita'; and he himself translated into Italian the libretti of 'Betly' and 'La Fille du Régiment.' Donizetti had visited Paris in 1835, when he produced, at the Théâtre des Italiens, his 'Marino Faliero.' In May 1837 he was made director of the Collegio di Musica in succession to Zingarelli. On the refusal of the Neapolitan censorship to allow the production of his 'Poliuto,' he went to Paris and undertook the direction of the Salle Ventadour, in 1839 bringing out many of his best works at one or other of the lyric theatres of Paris. 'Lucrezia Borgia' had been composed for Milan in 1833. On its revival in Paris in 1840, the 'run' was cut short by Victor Hugo, who, as author of the tragedy on which the libretto is founded, forbade the representations. 'Lucrezia Borgia' became, at the Italian Opera of Paris, 'La Rinegata'—the Italians of Alexander the Sixth's Court being changed into Turks. 'Lucrezia' may be ranked with 'Lucia' and 'La Favorita' among the most successful of Donizetti's operas. 'Lucia' contains some of the most beautiful melodies in the sentimental style that its composer ever produced; it contains, too, a concerted finale which is well designed and admirably dramatic. The

GAETANO DONIZETTI

favour with which 'Lucrezia Borgia' used to be everywhere received may be explained partly by the merit of the music, which, if not of a very high order, is always singable and tuneful—partly by the interest of the story, partly also by the manner in which the interest is divided between four principal characters, so that the cast must always include four leading singers, each of whom is well provided for by the composer. But of the great dramatic situation, in which a voluptuous drinking-song is contrasted with a funeral chant, not so much has been made as might have been expected. The musical effect, however, would naturally be more striking in the drama than in the opera; since in the former singing is heard only in this one scene, whereas in the latter it is heard throughout the opera. 'Lucrezia Borgia' may be said to mark the distance halfway between the style of Rossini, imitated by Donizetti for so many years, and that of Verdi, which he in some measure anticipated: thus portions of 'Maria di Rohan' (1843) might almost have been written by the composer of 'Rigoletto.' [Not only 'Poliuto' (under the name of 'Les Martyrs'), but 'La Fille du Régiment' and 'La Favorite,' were all brought out in the same year, 1840.] Jenny Lind, Sontag, Patti, Albani, all appeared with great success in 'La Figlia del Reggimento.' But when 'La Fille du Régiment' was first brought out, with Madame Thillon in the chief part, it produced comparatively but little effect. 'La Favorite,' on the other hand, met from the first with the most decided success. It is based on a very dramatic subject (borrowed from a French drama, 'Le Comte de Commingues'), and many of the scenes have been treated by the composer in a highly dramatic spirit. For a long time, however, it failed to please Italian audiences. In London its success dates from the time at which Grisi and Mario undertook the two principal parts. The fourth and concluding act of this opera is worth all the rest, and is probably the most dramatic act Donizetti ever wrote. With the exception of the cavatina 'Ange si pur,' taken from an unproduced work, 'Le Duc d'Albe,' and the slow movement of the duet, which was added at the rehearsals, the whole of this fine act was composed in from three to four hours. Leaving Paris, Donizetti visited Rome, Milan, and Vienna, at which last city he brought out 'Linda di Chamouni,' and contributed a Miserere and Ave Maria to the Hofkapelle, written in strict style, and much relished by the German critics. [He received the titles of Hofcompositeur and Capellmeister.] Then, coming back to Paris, he wrote (1843) 'Don Pasquale' for the Théâtre Italien, and 'Dom Sébastien' for the Académie. 'Dom Sébastien' has been described as 'a funeral in five acts,' and the mournful drama to which the music of this work is wedded rendered its success all but impossible. As a matter of fact it did not succeed. The brilliant gaiety, on the other hand, of 'Don Pasquale' charmed all who heard it, as did also the delightful acting and singing of Grisi, Mario, Tamburini, and Lablache, for whom the four leading parts were composed. For many years after its first production 'Don Pasquale' was always played as a piece of the present day; but the singers and their audience considered that there was a little absurdity in prima donna, baritone, and basso wearing the dress of everyday life; and it was usual, for the sake of picturesqueness in costume, to put back the time of the incidents to the 18th century.[1] 'Don Pasquale' and 'Maria di Rohan' (Vienna) belong to the same year; and in this last opera the composer shows much of that earnestness and vigour for which Verdi has often been praised. Donizetti's last opera, 'Catarina Cornaro,' was produced at Naples in 1844, and apparently made no mark. This was his sixty-third work, without counting two operas which were never played in his lifetime. One of these is the 'Duc d' Albe,' composed to a libretto originally meant by Scribe, its author, for Rossini, but which Rossini returned when, after 'William Tell,' he resolved to write no more for the operatic atage: it was produced in 1882 in Rome. Of Donizetti's operas, at least two-thirds are quite unknown in England. Donizetti, during the last years of his life, was subject to fits of melancholy and abstraction which became more and more intense, until in 1845 he was attacked with paralysis, and in 1847 was able to return to his native place, Bergamo, where he expired, April 8, 1848. Buried some little distance outside the town, he was disinterred on April 26, and reburied on Sept. 12, 1875, in Santa Maria Maggiore, Bergamo, where a monument by Vincenzo Vela was erected in 1855.

The following list of Donizetti's operas is probably not far from complete; the dates are not quite certain:—

Enrico di Borgogna, 1818.
Il Falegname di Livonia, 1819.
Le Nozze in Villa, 1820.
Zoraide di Granata, 1822.
La Zingara.
La lettera anonima.
Chiara e Serafina.
Il Fortunato Inganno, 1823.
Aristea. Alfredo il Grande.
Una Follia.
L' ajo nell' imbarazzo, 1824.
Emilia di Liverpool.
Alahor in Granata, 1826.
Il Castello degli Invalidi.
Elvida.
Olivo e Pasquale, 1827.
Il Borgomestro di Saardam.
Le Convenienzi teatrali.
Otto mese in due ore.
Elisabetta a Kenilworth, 1826.
La Regina di Golconda.
Gianni di Calais.
Il Giovedi grasso.
L' esule de Roma.
Il Paria, 1829.
Il Castello de Kenilworth.
Il Diluvio universale, 1830.
I pazzi per progetto.
Francesca di Foix.
Isnelda di Lambertazzi.
La Romanziera.
Anna Bolena.
Fausta, 1832.
Ugo Conte di Parigi.
L' Elisir d' Amore.
Sancia di Castiglia.
Il nuovo Pourceaugnac.
Il Furioso, 1833.
Parisina.
Torquato Tasso.
Lucrezia Borgia.
Rosamonda d' Inghilterra, 1834.
Maria Stuarda.
Gemma di Vergy.
Marino Faliero, 1835.
Lucia di Lammermoor.
Belisario, 1836.
Il Campenello di Notte.
Betly.
Roberto Devereux, 1837.
Pia di Tolomei.
Maria di Rudenz, 1838.
Poliuto.
Gianni di Parigi, 1839.
Gabriella di Vergy.
La Fille du Régimant, 1840.
La Favorite.
Adelasia, 1841.
Maria Padilla.
Linda di Chamounix, 1842.
Maria di Rohan, 1843.
Don Pasquale.
Dom Sébastien.
Catarina Cornaro, 1844.

[1] In more modern times a reaction has taken place in favour of representing operas in the proper costume, even when the action takes place in the present day: the popularity of the younger Italian school, of Bruneau and Charpentier, and many others, has not been lessened by the everyday costume of their characters.

Posthumously performed :—
Rita, ou le mari battu, Paris, 1860.
Il Duca d' Alba, Rome, 1882.

Many biographies of Donizetti exist, such as F. Cicconetti's (1864), Alborghetti and Galli's *Donizetti, Mayr* (1875); essays published at the time of the centenary of the composer's birth at Bergamo, 1897 (among these an interesting set of articles in the *Revista Musicale*, vii. 518), etc. H. S. E.

DONNA DEL LAGO, LA. Opera in two acts, founded on 'The Lady of the Lake'; libretto by Tottola, music by Rossini. Produced at San Carlo, Naples, Oct. 4, 1819; in London, King's Theatre, Feb. 18, 1823.

DONT, JACOB, violinist, son of Joseph Valentine Dont, a violoncellist well known and esteemed in his time, was born at Vienna, March 2, 1815. Thoroughly grounded at the Vienna Conservatorium by Böhm (one of the teachers of Joachim) and Hellmesberger senior, he became a very capable player, though his career as a soloist does not appear to have been one of especial brilliancy. He obtained positions in the orchestra of the Burgtheater (1831) and in the Imperial chapel (1834), but was more famous as pedagogue than performer, teaching at various Viennese institutions with great success. His best work was done at the Vienna Conservatorium, though he was not appointed professor till 1873, his pupils including Auer and Gregorowitsch. He published some 50 works, amongst them 'Studies for the Violin,' which rank, in the opinion of Spohr and many other authorities, among the best written for the instrument. Died in Vienna, Nov. 17, 1888. W. W. C.

DONZELLI, DOMENICO, was born at Bergamo about 1790, and studied in his native place. In 1816 he was singing at the Valle Theatre in Rome. Rossini wrote for him the part of Torvaldo, in which he distinguished himself. At the carnival of the next year he sang at the Scala in Milan, and was engaged for two seasons. From thence he went to Venice and Naples, returning to Milan, where 'Elisa e Claudio' was written for him by Mercadante. He was very successful in 1822 at Vienna, and obtained an engagement at Paris for 1824. There he remained, at the Théâtre Italien, until the spring of 1831. As early as 1822 efforts had been made, unsuccessfully, to get him engaged at the King's Theatre in London. At length, in 1828, he was announced; but did not actually come until 1829—making his first visit to England at the same time with Mendelssohn. When he did appear, Lord Mount-Edgcumbe thought him 'a tenor, with a powerful voice, which he did not modulate well.' Another critic, in 1830, says of him, 'He had one of the most mellifluous, robust, low tenor voices ever heard, a voice which had never by practice been made sufficiently flexible to execute Rossini's operas as they are written, but even in this respect he was accomplished and finished, if compared with the violent persons who have succeeded him in Italy. The volume of his rich and sonorous voice was real, not forced. He had an open countenance and a manly bearing on the stage, but no great dramatic power.' He was re-engaged in 1832 and 1833. In 1834 his place was taken by Rubini. Returning to Italy, he sang at various theatres, and in 1841 at Verona and Vienna. About the end of that year he retired to Bologna. He was an associate member of the Accademia Filarmonica at Bologna, and of that of Santa Cecilia at Rome. He published a set of 'Esercizi giornalieri, basati sull' esperienza di molti anni' (Ricordi, Milan). He died at Bologna, March 31, 1873. J. M.

DOPPEL FLÖTE. An open organ-stop of 8-foot pitch, the pipes of which have two mouths; also a stop having two rank of pipes.

DOPPIO, Ital. 'double.' *Canone doppio*, 'double canon.' *Doppio movimento*, 'double the speed of the preceding.' *Pedale doppio*, 'two parts in the pedals' (organ music), etc.

DOPPLER, ALBERT FRANZ, a distinguished flutist and dramatic composer, was born at Lemberg on Oct. 16, 1821. His first teacher was his father, who later on went as oboist to Warsaw and then to Vienna. He made his début at Vienna, and, after several concert tours with his younger brother Karl, joined the orchestra of the Pesth theatre as first flute; here, in 1847, his first opera 'Benjowski' was given, and had a considerable success. In 1858 he left Pesth for Vienna, where he became first flute and assistant conductor of the ballet at the Court Opera, afterwards rising to the position of chief conductor; in 1865 he was appointed professor of the flute in the Conservatorium, and he died at Baden (near Vienna) on July 27, 1883. His works include the operas 'Benjowski,' 'Ilka,' 'Afanasia,' 'Wanda,' 'Salvator Rosa,' 'Die beiden Husaren,' 'Judith' and (in conjunction with his brother and Erkel) 'Erzébeth,' the comic ballet 'Margot,' produced at Berlin in 1891, and several overtures, concertos for the flute, etc.

His brother, KARL, was born at Lemberg in 1826. He early acquired remarkable proficiency on the flute under his father and brother. Whilst still quite young, he undertook long concert tours, often with his brother, and appeared with great success in Brussels, Paris, and London. He then became conductor at the National Theatre in Pesth; and from 1865 to 1898 was Hofkapellmeister in Stuttgart. He has written several Hungarian operas, of which 'The Grenadiers' Camp' and 'The Son of the Desert' are the best known, and also ballets and flute music.

Karl's son, ARPAD, was born at Pesth, June 5, 1857. He studied at the Stuttgart Conservatorium, where he for some time gave piano-lessons until he went to New York in 1880 to be piano teacher in the Grand Conservatorium. In 1883

he returned to his old position in Stuttgart, and since 1889 has been chorus-master at the Court Theatre. Besides piano-music, songs, etc., he has composed an opera, 'Viel Lärm um Nichts,' and a Fest-Ouvertüre, Suite in B♭, Scherzo, and a Theme and Variations, all for full orchestra. H. B.

DORIAN, or DORIC, the first of the 'authentic' church modes or tones, from D to D, with its dominant A—

It resembles D minor, but with B♮ and no C♯. Many of the old German chorales were written in this mode, such as 'Vater unser'; 'Wir glauben all'; 'Christ unser Herr zum Jordan kam'; 'Christ lag in Todesbanden.' For longer compositions see Orlando Lasso's 5-part motet 'Animam meam,' in Commer's *Musica Sacra*, viii. No. 20, and the fugue in Bach's well-known Toccata (B.-G. xv. p. 142). See MODES.

DORN, HEINRICH LUDWIG EGMONT, a very considerable musician of modern Germany, born at Königsberg, Prussia, Nov. 14, 1804. His turn for music showed itself early, and was duly encouraged and assisted, but not so as to interfere with his general education. He went through the curriculum of the Königsberg University, and after visiting Dresden (where he made Weber's acquaintance) and other towns of Germany, fixed himself at Berlin in 1824 or 1825, and set seriously to work at music under Zelter, Klein, and L. Berger, mixing in the abundant intellectual and musical life which at that time distinguished Berlin, when Rahel, Heine, Mendelssohn, Klingemann, Marx, Spontini, Devrient, Moscheles, Reissiger, and many more, were among the elements of society. With Spontini and Marx he was very intimate, and lost no opportunity of defending the former with his pen. At Berlin he brought out an opera, 'Die Rolandsknappen' (1826), with success. He was successively teacher at Frankfort, and Königsberg; in 1829 he went to Leipzig in the same capacity, and remained there till 1832, when he took Krebs's place at Hamburg. During this time he had the honour of giving instruction in counterpoint to Schumann. After leaving Leipzig, his next engagements were at the theatres of Hamburg and Riga, in the latter place succeeding Wagner. During the whole of this time he added much teaching to his regular duties, and exercised an excellent influence on the musical life of the places in which he lived. At Riga he remained till 1843, when he was called to succeed C. Kreutzer at Cologne. During the five years of his residence there he was fully occupied, directing the Festivals of 1844 and 1847, founding the Rheinische Musikschule (1845), and busying himself much about music, in addition to the duties of his post and much teaching. In 1849 he succeeded O. Nicolai as conductor of the Royal Opera in Berlin, in conjunction with Taubert. This post he retained till the end of 1868, when he was pensioned off in favour of Eckert, and became a 'Königlicher Professor.' He subsequently occupied himself in teaching and writing, in both which capacities he had a great reputation in Berlin. Dorn was of the Conservative party, and a bitter opponent of Wagner. He was musical editor of the *Post*, and wrote also in the *Gartenlaube* and the *Hausfreund*. His account of his career, *Aus meinem Leben* (Berlin, 1870, 2 vols.) and *Ostracismus* (*ib.* 1874), are both valuable books. A paper of his on Mendelssohn appeared in *Temple Bar* for February 1872. His compositions embrace ten operas, the names of which are as follows:—

Die Rolandsknappen, Berlin, 1826; Die Bettlerin, Königsberg, 1828; Abu Kara, Leipzig, 1831; Der Schöffe von Paris, Riga, 1838; Das Barmen von England, Riga, 1842; Die Nibelungen, Berlin, 1854; Ein Tag in Russland, 1856; Der Botenläufer von Pirna, 1865; Gewitter bei Sonnenschein, 1869; Amors Macht (ballet), Leipzig, 1830.

There are also many cantatas, a requiem (1851), symphonies and other orchestral works, among which the most important is 'Siegesfestklänge'; many pianoforte pieces, songs, etc.

As a conductor he was one of the first of his day, with every quality of intelligence, energy, tact, and industry, to fill that difficult position. He died in Berlin, Jan. 10, 1892. F. G.

DORSET GARDEN THEATRE. This house was erected upon the garden of a mansion belonging to the Earl of Dorset, situate upon the bank of the Thames at the bottom of Salisbury Court, Fleet Street. Sir William (then Mr.) Davenant had obtained a patent for its erection in 1639 and another in 1662, but from various causes the building was not erected in his lifetime. His widow, however, built the theatre from the designs of Sir Christopher Wren; and the Duke's company, removing from Lincoln's Inn Fields, opened it Nov. 19, 1671. It became celebrated for the production of pieces of which music and spectacle were the most prominent features, amongst which the most conspicuous were Davenant's adaptation of Shakespeare's 'Macbeth,' with Lock's music, 1672; Shadwell's adaptation of Shakespeare's 'Tempest,' with music by Lock, Humfrey, and others, 1673; Shadwell's 'Psyche,' with music by Lock and Draghi, Feb. 1673-74; Dr. Davenant's 'Circe,' with Banister's music, 1677; and Lee's 'Theodosius,' with Purcell's music, in 1680. In 1682 the King's and Duke's companies were united, and generally performed at Drury Lane; but operas and other pieces requiring a large space for stage effects were still occasionally brought out at Dorset Garden, amongst them Dryden's 'Albion and Albanius,' with Grabu's music, 1685; ['The Fool's Preferment,' with Purcell's music, 1688; 'Dioclesian,' with Purcell's music, 1690; 'King Arthur,' with Purcell's music, 1691; 'The Fairy Queen,' with Purcell's music, 1692; 'Epsom Wells,' and 'The Female Virtuosoes,' with Purcell's music, 1693; 'Don Quixote,' parts 1 and 2, 1694]; and Powell and Verbruggen's 'Brutus and Alba,' with Daniel Purcell's music, in 1697. In 1699 the house was

let to William Joy, a strong Kentish man styled 'The English Samson,' and for exhibitions of conjuring, fencing, and even prize-fighting. It was again opened for the performance of plays in 1703, and finally closed in Oct. 1706. After the demolition of the theatre the site was successively occupied as a timber yard, by the New River Company's offices, and the City Gas Works. An engraving showing the river front of the theatre was prefixed to Elkanah Settle's *Empress of Morocco*, 1673, another, by Sutton Nicholls, was published in 1710, and a third in the *Gentleman's Magazine*, July 1814. W. H. H.

DORUS-GRAS, JULIE AIMÉE. See GRAS.

DOT (Fr. *Point;* Ger. *Punkt;* Ital. *Punto*). A point placed after a note to indicate that its length is to be increased one half; a semibreve with the addition of a dot being thus equal to three minims, a minim with a dot to three crotchets, and so on.

So far as regards rhythm, this is at the present time the only use of the dot, and it is necessitated by the fact that modern notation has no form of note equal to three of the next lower denomination, so that without the dot the only way of expressing notes of threefold value would be by means of the bind, thus 𝅗𝅥⁀♩ instead of 𝅗𝅥., ♩⁀♪ instead of ♩., which method would greatly add to the difficulty of reading. The sign itself is, however, derived from the ancient system of 'measured music' (*musica mensuralis*, about A.D. 1300), in which it exercised various functions, and where it is met with in four forms, called respectively 'point of perfection,' 'point of alteration,' 'point of division,' and 'point of addition.' (See POINT.)

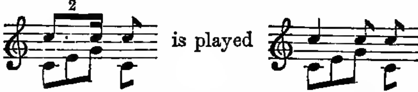
In modern music the dot is frequently met with doubled; the effect of a double dot is to lengthen the note by three-fourths, a minim with double dot (𝅗𝅥..) being equal to seven quavers, a doubly dotted crotchet (♩..) to seven semiquavers, and so on. The double dot was the invention of Leopold Mozart, who introduced it with the view of regulating the rhythm of certain adagio movements, in which it was at that time customary to prolong a dotted note slightly, for the sake of effect. Leopold Mozart disapproved of the vagueness of this method, and therefore wrote in his *Violinschule* (2nd edition, Augsburg, 1769), 'It would be well if this prolongation of the dot were to be made very definite and exact; I for my part have often made it so, and have expressed my intention by means of two dots, with a proportional shortening of the next following note.' His son, Wolfgang Mozart, not only made frequent use of the double dot invented by his father, but in at least one instance, namely at the beginning of the symphony in D written for Hafner, employed a triple dot, adding seven-eighths to the value of the note which preceded it. The triple dot is also employed by Mendelssohn in the Overture to Camacho's wedding, bar 2.

Dots following rests lengthen them to the same extent as when applied to notes.

In old music a dot was sometimes placed at the beginning of a bar, having reference to the last note of the preceding bar (Ex. 1); this method of writing was not convenient, as the dot might easily escape notice, and it is now superseded by the use of the bind in similar cases (Ex. 2).

The older way of representing this was occasionally revived by Brahms (see BIND).

[Handel and Bach, and other composers of the early part of the 18th century, were accustomed to use a convention which often misleads modern students. In 6–8 or 12–8 time, where groups of dotted quavers followed by semiquavers occur in combination with triplets, they are to be regarded as equivalent to crotchets and quavers. Thus the passage



not with the semiquaver sounded after the third note of the triplet, as it would be if the phrase occurred in more modern music.]

When a passage consists of alternate dotted notes and short notes, and is marked *staccato*, the dot is treated as a rest, and the longer notes are thus made *less* staccato than the shorter ones. Thus Ex. 3 (from the third movement of Beethoven's Pianoforte Sonata, op. 22) should be played as in Ex. 4, and not as in Ex. 5.

In all other cases the value of the dotted note should be scrupulously observed, except—in the opinion of some teachers—in the case of a dotted note followed by a group of short notes in moderate tempo; here it is sometimes considered allowable to increase the length of the dotted note and to shorten the others in proportion, for the sake of effect. (See Koch, *Musikalisches Lexikon*, art. 'Punkt'; Lichtenthal, *Dizionario della Musica*, art. 'Punto.') Thus Ex. 6 would be rendered as in Ex. 7.

In view, however, of the fact that there are a variety of means, such as double dots, binds, etc. by which a composer can express with perfect accuracy the rhythmic proportions which he requires, it certainly seems advisable to employ the utmost caution in making use of such licences as the foregoing, and in particular never to introduce them into movements the rhythmical character of which is dependent on such progressions of dotted notes as the above example, such for instance as the fourteenth of Beethoven's thirty-three Variations, op. 120, or the coda of the Fantasia, op. 77.

2. Besides the employment of the dot as a sign of augmentation of value, it is used to indicate *staccato*, being placed above or below the note, and written as a round dot if the staccato is not intended to be very marked, and as a pointed dash if the notes are to be extremely short. [DASH.] As an extension of this practice dots are used to denote the repetition of a single note; and they are also placed before or after a double bar as a sign of the repetition of a passage or section. In old music for the clavichord they are used as an indication of the *Bebung*. [ABBREVIATIONS; BEBUNG.] F. T.

DOTZAUER, JUSTUS JOHANN FRIEDRICH, one of the greatest composers, players, and teachers of the violoncello; born at Hildburghausen, June 20, 1783. His teachers were Henschkel, Gleichmann, and Rüttinger—a pupil of Kittl's, and therefore only two removes from J. S. Bach. For the violoncello he had Kriegck of Meiningen, a famous virtuoso and teacher. He began his career in the Meiningen court band, in 1801, and remained there till 1805. He then went by way of Leipzig to Berlin, where he found and profited by B. Romberg. In 1811 he entered the King's band at Dresden, and remained there till his retirement in 1852; until his death, March 6, 1860, he was occupied in playing, composing, editing, and, above all, teaching. His principal pupils were Kummer, Drechsler, C. Schuberth, and his own son, C. Ludwig. His works comprise an opera ('Graziosa,' 1841), masses, a symphony, several overtures, nine quartets, twelve concertos for violoncello and orchestra, sonatas, variations, and exercises for the violoncello. He edited Bach's six sonatas for violoncello solo, and left an excellent Method for his instrument.

DOUBLE (Fr.). The old name for 'Variation,' especially in harpsichord music. The doubles consisted of mere embellishments of the original melody, and were never accompanied by any change in the harmonies. Examples are numerous in the works of the older masters. Handel's variations on the so-called 'Harmonious Blacksmith' are called 'Doubles' in the old editions. In Couperin's 'Pièces de Clavecin,' Book 1, No. 2, may be seen a dance 'Les Canaries' followed by a variation entitled 'Double des Canaries,' and two instances will also be found in Bach's English Suites, the first of which contains a 'Courante avec deux Doubles' and the sixth a sarabande with a double. The term is now entirely obsolete. (2) In combination the word 'double' is used to indicate the octave below; thus the 'double-bass' plays an octave below the ordinary bass, or violoncello; a 'double' stop on the organ is a stop of the pitch known as 16-foot pitch (see ORGAN), an octave below the 'unison' stops. ['The notes below Gam-ut are called double Notes, as Double F, fa, ut, Double E, la, mi, and as being Eights or Diapasons to those above Gam-ut.' Playford's *Introd. to the Skill of Musick*, p. 3.] (3) The notes in the bass octave from [music] to [music] are often spoken of by organ-builders as double G, double F, etc. (4) The word is applied to singers who under-study a part in a vocal work, so as to replace the regular performer in case of need; and those who undertake two parts in the same play and said to 'double' one with the other. E. P.

DOUBLE BARS divide a piece or a movement into main sections, and when accompanied by dots indicates that the section on the same side with the dots is to be repeated.

The double bar is a prominent feature in the older examples of the symphony or sonata. In the first movement it occurs at the end of the first section, which is then repeated, and is followed by the working out, or *Durchführung*. In the symphonies before Beethoven, and in Beethoven's own earlier sonatas, the second section was often repeated as well as the first. In the minuet, or scherzo, with trio, both sections of each are repeated, and then after the trio the minuet is given again without the repetitions. [It may be pointed out that a double bar may be placed anywhere in the measure, without affecting its value.]

DOUBLE BASS (Ital. *Contrabasso* or *Violone*) is the largest of the stringed instruments played with a bow. [It was almost certainly in use before the days of Michele Todini, for whom the honour of its invention, in the year 1670, is sometimes claimed.] In its forms it has some of the characteristics of the older gamba, or viol, tribe, viz. the flat instead of the arched back, and the slanting shoulder; while, on the other hand, it has the four corners, the *f*-holes, and in every respect the belly of the violin, thus

appearing to be a combination of the gamba and the violin, and therefore probably of a date posterior to both.

The double bass was originally mounted with three strings only, tuned thus (*a*). At the present time, however, basses with four strings, tuned thus (*b*), are used by all, except the

Italian and some English players, who still prefer the three-stringed instrument on account of its greater sonority. For orchestral playing, however, the fourth string has become an absolute necessity, since modern composers very frequently use the contra E and F in obbligato passages. In England, up to a recent period, a phrase like that which opens Mendelssohn's 'Meeresstille' (*c*), owing to the absence of the fourth string and the consequent impossibility of producing the low F, had to be altered to the octave (*d*). This and other similar musical

barbarities were committed, until at the Crystal Palace the sensible plan was adopted of having half the number of the basses with four, and the other half with three strings, thus avoiding the mutilation of phrases like the above, without sacrificing the greater richness of tone which is claimed for the three-stringed instrument.

If the violin is the leader of the orchestra, the double bass is its foundation. To it is given the lowest part, on which both harmony and melody rest. The English term 'double bass' has probably been applied to the instrument because it often doubles in the lower octave the bass of the harmony, given to the bass voice, the violoncello, the bassoon, or some other instrument. In a similar way the 32-foot stop of the organ is termed double diapason because it doubles a 16-foot diapason in the lower octave.

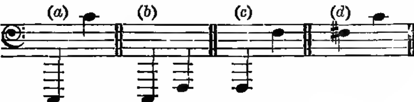
This doubling of the bass part was for a long time, with rare exceptions, the sole function of the double bass, and it is only since the beginning of the 19th century that we meet, in the scores of Haydn, and more frequently in those of Beethoven, with independent double-bass passages. The double bass from its very nature —its tone, when heard alone, being somewhat rough, and its treatment, owing to its large dimensions, very difficult — is essentially an orchestral rather than a solo instrument, and as such it is with the violin the most important and indispensable one. The solo performances of Bottesini and a few other celebrated double-bass players, are exceptions which prove the rule for any one who has heard them. In fact these virtuosi did not play on full-sized double basses, but used the basso di camera, an instrument of considerably smaller dimensions.

As double-bass players Dragonetti, Müller, and Bottesini, had the greatest reputation. Most of the great Italian violin-makers, from Gaspar di Salò downwards, have made double basses of various sizes, a fair number of which are still extant. P. D.

DOUBLE BASSOON (It. *Contrafagotto;* Fr. *Contrebasson;* Ger. *Contrafagott, Doppelfagott*). The contrafagotto or double bassoon, in pitch an octave below the ordinary bassoon, is not by any means a new instrument; but the older instruments were of feeble rattling tone, rendered unwieldy by unsuccessful attempts to obtain the B♭ of the 32-foot octave. It has been considerably improved by Herr Haseneier of Coblenz, and subsequently by the writer, who has introduced it into English orchestras.

The double bassoon as made on the writer's design by Haseneier consists of a tube 16 feet 4 inches long, truly conical in its bore, enlarging from $\frac{1}{4}$ inch diameter at the reed to 4 inches at the bell. It is curved four times on itself for convenience of manipulation, so that the length of the instrument is about equal to that of the ordinary bassoon. Its extreme compass is three octaves, from C, upwards to *c′* — see example (*a*). Its ordinary range, however, should be limited to the tenor *g*, the notes above this being rather difficult to produce.

It possesses every semitone of the diatonic scale throughout its compass, and is therefore able to play in any key with moderate facility. The scale is founded on the octave harmonic, and continued by means of the twelfth. From C, to F, (*b*), only a single sound is obtained by each key. Between the latter note and its double octave (*c*), the same fingering produces two sounds of an octave, simply by change of *embouchure* and greater pressure of wind. With the *f*♯ a new harmonic sound begins, using the fingering of the B,♮, and again increasing the wind-pressure. Seven semitones thus procured carry the tone up to the *c′* above (*d*), which is the fourth C inclusive from the foundation note. It must be remembered that the orchestral part for this instrument, like that of the double bass, is always written an octave higher than the real sound, to avoid ledger-lines; the following example gives the actual notes:—



The holes from which the sound issues are of graduated size, increasing downwards with the size of the bore. They are placed as a rule in their correct positions, so as to cut off the proper portion of tube corresponding to the elevation of the note. Mechanism is adapted to them, to bring them within reach of the fingers. To enable the player to distinguish what are called 'open' from closed holes, a different shape is

given to the terminations of the levers. The first three fingers of each hand, which have to keep closed the six open notes of the ordinary bassoon, fall into saddle-shaped recesses worked in the brass of the key; whereas the two little fingers and the thumbs touch the cushion-shaped surface of keys similar to those used on other wind instruments. It is, in consequence, very easy for any person accustomed to the ordinary bassoon to adapt his playing to this. The saddle-shape of the key also serves to support the upper joints of the finger, and to throw the labour of closing the hole more on the powerful muscles of the fore-arm than on the weaker fabric of the hand itself.

[The instrument corresponding to the foregoing description and illustration is of the type resulting from the work of Herr Haseneier and Dr. Stone. The older instruments were both unwieldy and ill-proportioned, the finger-holes, although spaced as far apart as possible, being too close for acoustical requirements. These defects probably account for the instrument having gone so much out of use, as referred to below. A few of this type are still in use, but the tone of the different notes is unequal compared with those on Dr. Stone's model. The objection has been made against the latter, however, that its tone is too 'open,' lacking something of the characteristic 'closeness' of the bassoon quality, and that it is difficult to obtain on it a good piano. There has now come into use a model brought out by Heckel, of Biebrich-am-Rhein, in which the advantages of modern key-mechanism are combined with the general bore and proportions of the old double-bassoon. The notes are equal in character, but, the calibre being less than on Dr. Stone's instrument, the tone is less broad. The compass downwards extends to the B♭ of the 32-foot octave.

A demi-contra-fagotto is also made, standing in F, and therefore intermediate in pitch between the ordinary bassoon and the double-bassoon.

A double-bassoon in E♭ of brass, is also made. It is especially suitable for large military bands, and by its use the reed tone is carried down to D of the 16-foot octave.—D. J. B.]

Although this instrument was formerly used in military bands, and was played at the first Handel commemoration in Westminster Abbey, it had gone completely out of use until the Handel Festival of 1871. It is, however, abundantly written for by the great masters. Haydn gives it an important part in the 'Creation,' the Passion music, and other of his works. Mozart uses it in a nonet for wind instruments (already mentioned under CLARINET), as also does Spohr in a similar combination. Beethoven employs it largely in his greatest works. It reinforces the March in the finale of the C minor symphony, takes a leading part in the choral symphony, and in the Grand Mass in D. It also appears in the overture to 'King Stephen,' and has obbligato passages in the grave-digging scene of 'Fidelio'—àpropos of which see a characteristic anecdote in Thayer's *Beethoven*, ii. 288. Mendelssohn introduces it in his overture 'The Hebrides,' in his re-orchestration of Handel's Dettingen Te Deum, in the Reformation symphony, and elsewhere. In all cases it forms a grand bass to the reed band, completing the 16-foot octave with the six lowest notes wanting on three-stringed double basses. [A characteristic instance of its use is in Brahms's variations on a theme of Haydn.] W. H. S.

DOUBLE CHANT, a chant equal in length to two single chants, and covering two verses; peculiar to the English Church, and not introduced till after the Restoration. [CHANT, p. 502.]

DOUBLE CONCERTO, a concerto for two solo instruments and orchestra, as Bach's for two harpsichords, for two violins, Mozart's for violin and viola (Köchel, 364); Mendelssohn's (MS.) for piano and violin; and Brahms's (op. 102) for violin and violoncello.

DOUBLE COUNTERPOINT is the accompaniment of a subject or melody by another melody, so contrived as to be capable of use either below or above the original subject. See INVERTIBLE COUNTERPOINT.

DOUBLE FLAT. If the flat lowers a note by a semitone, the double flat lowers it by two. The sign for the double sharp is abbreviated, but that for the double flat remains simply ♭♭, the corrective to which is either ♮♭ or ♭ at pleasure. On keyed instruments the double flat of a note is treated as identical with a note a whole tone lower than the unflattened note:—thus A♭♭ = G♮, C♭♭ = B♭. The French term is *double bémol;* the German one *doppel-B*. The German nomenclature for the notes is Eses, Asas, Deses, etc. In order to obtain a single sign for the double flat, Mr. Ross, of Messrs. Novello's, devised two new signs, one of which was adopted by the firm; it resembles two flats placed so closely together that they overlap, and whether it be convenient for the printers or not, it is a very doubtful

advantage for those who have to read the music. See *Mus. Assoc. Proceedings*, 1890, p. 101.

DOUBLE FUGUE, a common term for a fugue on two subjects, in which the two start together, as in the following for organ by Sebastian Bach (B.-G. xxxviii. p. 19).

or in D. Scarlatti's harpsichord fugue in D minor: or Handel's organ fugue, quoted under COUNTER-SUBJECT, p. 624*a*. G.

DOUBLE SHARP raises a note by two semitones, and is denoted by a × probably in abbreviation of ♯♯. It is singular that the sign should be a less complicated one than that for the single sharp. On instruments tuned in equal temperament C× = D♮, E× = F♯, etc. The French call it *double dièse*, and the Germans *doppelkreuz*. The Germans call the notes Cisis, Fisis, Gisis, etc.

DOUBLE STOPPING is sounding on the violin or other instrument of that tribe two notes simultaneously. Such notes are termed 'double stops.' An 'open note' is produced by merely striking the string with the bow without touching it with the fingers of the left hand—so that the string vibrates in its whole length. A 'stopped note' is a note produced by putting a finger of the left hand on the string, so that the vibration of the string is 'stopped' at a certain point.

Strictly speaking, the term 'double-stopping' ought only to be applied to the simultaneous sounding of two 'stopped' notes; it is, however, indiscriminately used for any double sounds, whether produced with or without the aid of the open strings. The playing of double stops is one of the most difficult parts of the technique of the violin. P. D.

DOUBLE TONGUEING, a method of articulation applicable to the flute, the cornet-à-pistons, and some other brass instruments. The oboe, bassoon, and clarinet, are susceptible only of single tongueing, which signifies the starting of the reed-vibrations by a sharp touch from the tip of the tongue similar to the percussion action in harmoniums. It requires long practice to give the necessary rapidity to the tongue muscles co-operating for this end. Single tongueing is phonetically represented by a succession of the lingual letter T, as in the word 'rat-tat-tat.' Double tongueing aims at alternating the linguo-dental explosive T with another explosive consonant produced differently, such as the linguo-palatals D or K, thus relieving the muscles by alternate instead of repeated action. The introduction of the mouthpiece into the cavity of the mouth itself prevents such an alternation in the three instruments above named, but it is possible in the flute and cornet. Any intermediate vowel sound may be employed. The words commonly recommended for double tongueing are 'tucker' or 'ticker.' Triple tongueing is also possible; and even four blows of the tongue against the teeth and palate have been achieved and termed quadruple tongueing. Indeed the system may be farther extended by employing words such as 'Tikatakataka,' in which dental and palatal explosives are judiciously alternated.

[The term 'double-tongued' is applied to certain reed stops on the organ which have two tongues instead of one.] W. H. S.

DOUBLE TOUCH. See ORGAN.

DOUBLES. The name given by change-ringers to changes on five bells, from the fact that *two* pairs of bells change places in each successive change. C. A. W. T.

DOWLAND, JOHN (1563-1626), lutenist and composer, is said by Fuller, on hearsay evidence, to have been a native of Westminster.[1] He has been claimed as an Irishman, on the strength of the dedication of a song in his 'Pilgrimes Solace' (1612) 'to my loving countreyman, Mr. John Forster the younger, merchant of Dublin in Ireland,' but the evidence is decidedly inconclusive. His birth must have taken place in 1563, for in his 'Observations belonging to Lute-playing,' which appeared in his son Robert's 'Varietie of Lute-Lessons' (1610) he refers to Hans Gerle's 'Booke of Tableture,' printed 1533, and adds 'myselfe was borne but thirty yeares after Hans Gerles Booke was printed,' while in his 'Pilgrimes Solace,' which appeared in 1612, he says: 'I am now entered into the fiftieth yeare of mine age.' Nothing is known as to his education, but before he was twenty he was in the service of Sir Henry Cobham, who in 1579 succeeded Sir Amyas Paulet as English Ambassador at Paris. In a remarkable letter written from Nuremberg on Nov. 10, 1595, to Sir Robert Cecil (printed in vol. v. of the *Calendar of the Marquis of Salisbury's Papers at Hatfield*, and again with elucidations in the *Musical Times* for Dec. 1896 and Feb. 1897) Dowland says that in 1580 he was in Paris with Sir Henry Cobham, where he fell in with a Roman Catholic priest named Smith, with Richard Verstigan, the poet and author of the *Restitution of Decayed Intelligence*, Richard or Thomas Morris or Morrice, a member of the Chapel Royal who fled to Douay in 1582 and afterwards went to Rome, and one Morgan, by whom he was persuaded to become a Roman Catholic. He seems to have returned to England with Sir Henry Cobham (who was recalled in 1583) and probably shortly after this married. On July 5, 1588, he was admitted (from Christ Church, Oxford) Mus.Bac. and some time before 1597 he received the same degree at

[1] The statements in Eitner's *Quellen-Lexikon* (iii. 239) as to his being a son of John Johnson, and in the service of Sir George Carey, are inaccurate, and have been made from a misreading of the articles on Dowland in the *Musical Times* for Dec. 1896 and Feb. 1897.

Cambridge, though there is no record of the degree at the latter University. On the death of John Johnson, one of Queen Elizabeth's musicians, which probably took place about 1594, Dowland 'became an humble suitor for his place,' but unsuccessfully, for (as he says) 'my religion was my hindrance; whereupon my mind being troubled, I desired to get beyond the seas.' He was invited to Germany by the Duke of Brunswick, and obtained the necessary licence to travel through the instrumentality of the Earl of Essex and Sir Robert Cecil. His wanderings may be told in his own words: 'When I came to the Duke of Brunswick he used me kindly and gave me a rich chain of gold, £23 in money, with velvet and satin and gold lace to make me apparell, with promise that if I would serve him he would give me as much as any prince in the world. From thence I went to the Lantgrave of Hessen, who gave me the greatest welcome that might be for one of my quality, who sent a ring into England to my wife, valued at £20 sterling, and gave me a great standing cup with a cover gilt, full of dollars, with many great offers for my service. From thence I had great desire to see Italy and came to Venice and from thence to Florence, where I played before the Duke and got great favours.' At the Court of Brunswick he became acquainted with Gregory Howet of Antwerp, and at that of the Landgrave with Alessandro Orologio; at Venice he made friends with Giovanni Croce. Dowland's aim in going to Italy was to study with Luca Marenzio, who wrote to him a letter dated Rome, July 13, 1595, which is printed in Dowland's 'First Booke of Songes' (1597). But the journey to Rome seems to have been interrupted at Florence, where he fell in with a number of English recusants, the chief of whom was a son of Sir John Scudamore, of Kentchurch, who was at one time in Spain in the company of Father Parsons. In spite of a promise that he 'should have a large pension of the Pope, and that his Holiness and all the Cardinals would make wonderful much of' him, Dowland appears to have taken alarm at finding himself in the company of men whose methods were treasonable to Elizabeth and her Government. He longed to see his wife and children 'and got me by myself and wept heartily to see my fortune so hard that I should become servant to the greatest enemy of my prince, country, wife, children, and friends, for want. And to make me like themselves, God knoweth I never loved treason nor treachery, nor never knew of any, nor never heard any mass in England, which I find is great abuse of the people, for, on my soul, I understand it not.' By way of Bologna and Venice, Dowland returned to Nuremberg, whence he wrote (on Nov. 10, 1595) the letter to Cecil from which the above quotations are taken. In this document he gives much information as to 'the villany of these most wicked priests and Jesuits' and thanks God that he has 'both forsaken them and their religion, which tendeth to nothing but destruction.' Whether the letter had any immediate result on Dowland's fortunes it is impossible to say. The news he gave of the movements of the English Catholics in Italy was probably of small value, but the writer's protestations as to his religious views may have smoothed the way for his return. In 1596 some lute pieces by him appeared in Barley's 'New Booke of Tableture,' apparently without his authority, for in his 'First Booke of Songes or Ayres of Foure Partes with Tableture for the Lute,' which was published by Peter Short in 1597, he alludes to 'divers lute lessons of mine lately printed without my knowledge, false and unperfect.' The 'First Booke of Songes' achieved immediate success, and a second edition appeared in 1600, a third in 1606, a fourth in 1608, and a fifth in 1613. In 1598 Dowland contributed some eulogistic verses to Giles Farnaby's 'Canzonets,' and in the same year his fame was celebrated in Richard Barnfield's sonnet (sometimes attributed to Shakespeare) 'To his friend Maister R. L., in praise of Musique and Poetrie':

If Musique and sweet Poetrie agree,
As they must needes (the Sister and the Brother),
Then must the Love be great, twixt thee and mee,
Because thou lov'st the one, and I the other.
Dowland to thee is deare; whose heavenly tuch
Upon the Lute, doeth ravish humaine sense:
Spenser to mee; whose deepe Conceit is such,
As, passing all Conceit, needs no defence.
Thou lov'st to heare the sweete melodious sound,
That *Phœbus* Lute (the Queen of Musique) makes:
And I in deepe Delight am chiefly drownd,
When as himselfe to singing he betakes.
One God is God of Both (as Poets faigne),
One Knight loves Both, and Both in thee remaine.

On Nov. 11, 1598, Dowland was appointed lutenist to Christian IV. of Denmark at the very large salary of 500 dalers per annum—a sum that rivalled the salaries of the high officers of the state. In 1599 a sonnet by him appeared in Richard Alison's *Psalms*. In the following year he published his 'Second Booke of Songes or Ayres, of 2. 4. and 5. parts,' dedicated to Lucy, Countess of Bedford, and with a preface dated 'From Helsingnoure in Denmarke, the first of June.' In the same year he received an extra payment of 600 dalers from Christian, the autograph receipt for which is preserved in the Copenhagen Archives, and has been printed in A. Hammerich-Elling's *Musiken ved Christian den Fjerdes Hof* (Copenhagen, 1892). In 1601 he was decorated and presented with the King's portrait, and in the same year he came to England to buy musical instruments of the value of 300 dalers. In 1603 appeared his 'Third and Last Booke of Songs or Aires,' in the dedication of which he alludes to his being still abroad. In 1605 he was again in England, where he published his 'Lachrymae, or Seven Teares, figured in seaven passionate Pavans,' for instruments, dedicated to Anne of Denmark. It seems

from the preface to this work that he had been driven back by storms on his return to Denmark, and forced to winter in England. But the Danish Archives show that his conduct at Copenhagen had not been satisfactory. In spite of frequent advances of money and an attempt to help him by giving him the charge and education of one of the choristers 'to teach and instruct upon the lute,' he was finally, on Feb. 24, 1606, when Christian was absent at Brunswick, dismissed from the King's service, and at his departure there was a long account to be settled for salary, advances, etc. In 1606 Dowland was living in Fetter Lane, whence he issued a translation of the *Micrologus* of Andreas Ornithoparcus, dedicated to the Earl of Salisbury. In his address to the reader he promises a work on the lute, to which reference is also made by his son Robert in the preface to the latter's 'Varietie of Lute Lessons' (1610). To this work John Dowland appended a 'Short Treatise on Lute-Playing,' a German translation of which with a valuable commentary, by Dr. Willibald Nagel, appeared in the *Monatshefte für Musik-Geschichte* for September 1901. In 1612 he published his last work, 'A Pilgrimes Solace. Wherein is contained Musicall Harmonie of 3. 4. and 5. parts, to be sung and plaid with the Lute and Viols,' in which he is described as lutenist to Lord Walden (eldest son of the Earl of Suffolk). In the preface to this work he says:—'I have been long obscured from your sight, because I received a kingly entertainment in a forraine climate, which could not attaine to any (though never so meane) place at home.' This neglect with which he was treated in England is referred to by Henry Peacham, in his *Minerva Britanna* (1612). He compares Dowland to a nightingale sitting on a briar in the depth of winter:—

So since (old frend,) thy yeares have made thee white,
And thou for others, hath consum'd thy spring,
How few regard thee, whome thou didst delight,
And farre, and neere, came once to heare thee sing:
Ingratefull times, and worthles age of ours,
That let's us pine, when it hath cropt our flowers.

But recognition came to Dowland in his old age, and on Oct. 28, 1612, he was appointed one of the King's Musicians for the Lutes, in the place of Richard Pyke, deceased, at 20d. a day for wages, and £16 : 2 : 6 yearly for livery. (*Audit Office Declared Accounts. Bundle 389, Roll 49*. See also *Bundle 389, Roll 50*, by which his appointment seems to have been made to date from Sept. 29, 1612.) In 1614 Dowland contributed a few compositions to Sir William Leighton's 'Teares.' Of his late years not much is known. In 1618 his name still appears in the *Audit Office Accounts* (*Bundle 390, Roll 55*), as second musician for the Lutes, after that of Robert Johnson, and in the Accounts for 1623 (*Bundle 392, Roll 61*) he is styled 'Doctor Dowland,' though there is no record of his having taken a Doctor's degree either at Oxford, Cambridge, or Dublin. In the accounts for the year ending Michaelmas, 1624, his name precedes that of Johnson. His death must have taken place in January 1625-26, for the accounts for Michaelmas, 1626 (*Bundle 392, Roll 65*), record the payment to him for 'one quarter of a years ended at Christmas 1625 and xxvi daies in parte of other Lady Day quarter 1626,' while his son Robert 'in the place of Doctor Dowland his father deceased' was paid at Michaelmas, 1626, 'from the death of his said father.' To the list of his printed music already given must be added some harmonised Psalm Tunes in Este's Psalter (1592), and Lute Pieces in Rude's 'Flores Musicae' (1600); Füllsack's 'Auserlesener Paduanen . . . Erster Theil (1607); T. Simpson's 'Opusculum' (1610); Robert Dowland's 'Musical Banquet' (1610); Van den Hove's 'Delitiae Musicae' (1612); Fuhrmann's 'Testudo Gallo-Germanica' (1615); Besardus's 'Novus Partus' (1617), and T. Simpson's 'Taffel-Consort' (1621). Manuscript music by him is to be found in many of the large English and German libraries. His 'First Booke of Songes' was reprinted in score by the Musical Antiquarian Society in 1844, and there are numerous modern editions of single part-songs. Fuller (*Worthies*, ed. Nicholas, ii. 113) says that John Dowland was 'a chearful person . . . passing his days in lawful meriment,' but this character may have been given him because of a well-known anagram on his name:

Iohannes Doulandus.
Annos ludendo hausi,

which Fuller attributes to one Ralph Sadler, of Standon, who was at Copenhagen with Dowland, though its authorship is claimed by Henry Peacham in his *Minerva Britanna*. An autograph of Dowland's is preserved in the *Album Amicorum* of Johann Cellarius of Nuremberg (1580-1619), written towards the end of the 16th century, and now in the British Museum (Add. MS. 27,579). In this his name is spelt 'Doland.'

His son ROBERT DOWLAND, lutenist, was born before 1598, when his father left England to settle in Denmark. His godfather was Sir Robert Sidney, and during his father's absence he was educated at the partial cost of Sir Thomas Mounson, to whom he dedicated his first work 'Varietie of Lute Lessons,' which appeared in 1610. In the same year he edited 'A Musicall Banquet: Furnished with varietie of delicious Ayres, collected out of the best Authors in English, French, Spanish, and Italian,' dedicated to his godfather. On April 26, 1626, he was appointed one of the lutenists to Charles I., in the place of his father, with 20d. a day wages, and £16 : 2 : 6 for livery, payment to begin from the death of his said father' (*Audit Office Declared Accounts, Bundle 392, Roll 65*). On Oct. 11 of the same year he obtained a license to be married at St. Faith's to Jane Smalley; at this time he was living in the parish of

St. Anne's, Blackfriars. His name is said to occur in a list of *Musicians for the Waytes* in 1641, but nothing further is known as to his biography. A lute-piece by him was printed in Fuhrmann's 'Testudo Gallo-Germanica' (Nuremberg, 1615). W. B. S.

DRAESEKE, Felix, August Bernhard, a gifted and highly cultivated, though somewhat eccentric, composer and writer upon musical subjects, disciple of Liszt's at Weimar, and one of that small but formidable circle of musicians, who were known as 'die neudeutsche Schule,' and amongst whom were Hans von Bülow, Peter Cornelius, Carl Klindworth, and Carl Tausig, was born Oct. 7, 1835, at Coburg. He was at first a pupil of the Leipzig Conservatorium, and on leaving Weimar, Draeseke settled at Dresden, and subsequently at Lausanne, as teacher of the pianoforte and harmony, from 1864 to 1874, with one year's intermission, when, in 1868, Von Bülow called him to Munich as a master of the new Conservatorium. [After residing some time at Geneva, he settled in Dresden in 1876, and in 1884 succeeded Wüllner as teacher of composition in the Conservatorium. He received the title of professor in 1892 and of Hofrath in 1898.] Draeseke has published a number of pianoforte pieces, remarkable for harmonic and rhythmic subtleties; 'Fantasiestücke in Walzerform,' op. 3; 'Deux valses de concert,' op. 4; a fine Sonata in E major, op. 6; several pieces for piano and violoncello; some vocal compositions. He wrote the libretto for his first opera. Of his literary labours, the elaborate analysis of Liszt's 'Poèmes symphoniques' in Brendel's *Anregungen*, and the essay on Peter Cornelius, in *Die neue Zeitschrift für Musik*, as well as the treatises, *Anweisung zum kunstgerechten Modulieren* (1876), *Beseitigung des Tritonus*, and *Der gebundene Styl* (1903) are valuable. [His later compositions have shown a gradual abandonment of the revolutionary principles he at first supported, and a return to something more like the classical style. Three symphonies, opp. 12, 25, and 48, a serenade, op. 49, overtures 'Das Leben ein Traum,' 'Penthesilea' and 'Jubelouvertüre,' concertos for violin, violoncello, and piano; three string-quartets, a string-quintet, a Requiem, Adventlied, and the Easter-scene from *Faust*, may be mentioned, as well as the operas 'Gudrun' (1884) and 'Herrat' (1892).] E. D.

DRAGHI, Antonio, capellmeister to the court of Vienna, born at Ferrara 1635. In 1674 he was invited to Vienna as Hoftheater Intendant to the Emperor Leopold I., and chapelmaster to the Empress Eleonore, and in 1682 took up his abode there for life. He was a gifted dramatic composer, and most prolific, as may be seen by the list of his works performed at the court during thirty-eight years, amounting to no less than 67 operas, 116 feste teatrali and serenades, and 37 oratorios, besides hymns and cantatas, etc. (See Köchel's *Life of Fux.*) Some of his carnival operas have been several times revived. The scores of most of his works are in the imperial library, and some in the archives of the Gesellschaft der Musikfreunde. His librettos, some of them illustrated, were printed in the imperial press by Cosmerow, and have nearly all been preserved. Occasionally he wrote librettos, which were set by other composers, Ziani, Bertali, and even the Emperor Leopold, who composed the complete opera 'Apollo deluso' (1669), and airs for others. Various mistakes have been made about the year of his death. Walther's *Lexicon* speaks of him as alive in 1703, and Fétis, followed by most modern biographers, says he went back to Ferrara and died there in 1707; but all doubts are set at rest by the register of deaths in Vienna, from which it appears he died there, Jan. 18, 1700, aged sixty-five. A son of his, Carlo, was Hof-scholar in 1688, Hof-organist in 1698, and died May 2, 1711. C. F. P.

DRAGHI, Giovanni Baptista, was an Italian musician who settled in London in the middle of the 17th century, and who, during his long residence in this country, so completely adopted the English style of composition that he must be regarded as in effect an English composer. It has been conjectured that he was a brother of Antonio Draghi. The earliest notice of him is found in Pepys's *Diary*, under date of Feb. 12, 1667. The diarist there mentions having heard him (at Lord Brouncker's house) sing through an act of an Italian opera which he had written and composed at the instance of Thomas Killigrew, who had an intention of occasionally introducing such entertainments at his theatre. Pepys expresses in strong terms his admiration of the composition. It is extremely doubtful whether this opera was ever produced. Draghi, however, lived to witness the introduction into this country of the Italian opera at the commencement of the following century. He excelled as a player on the harpsichord, for which instrument he composed and published in England many lessons. He was music-master to Queen Anne, and probably also to her elder sister, Queen Mary. In 1675 he published the act-tunes and some other instrumental music for Shadwell's opera 'Psyche,' performed 1673, the remainder, including the whole of the vocal part, being composed by Matthew Locke. On the death of Locke in 1677 Draghi succeeded him as organist to Catherine of Braganza, wife of Charles II. In 1687, for the celebration of St. Cecilia's Day, he composed music for Dryden's fine ode commencing 'From Harmony, from heavenly Harmony.' In 1706 he contributed part of the music to D'Urfey's comic opera, 'Wonders in the Sun; or, the Kingdom of the Birds,' produced at the Queen's Theatre in the Haymarket. Many songs by him are found in the collections of the period. W. H. H.

DRAGONETTI, Domenico, one of the

greatest known players on the double-bass, born at Venice, April 7, 1763. As a boy he showed remarkable talent for music, teaching himself the guitar and violin, which however he soon exchanged for his own special instrument. On this he quickly outstripped his master Berini, and was admitted to the orchestra of the 'Opera buffa' at thirteen, and a year later to the 'Opera seria' at San Benedetto, and to all performances of importance. In his eighteenth year he was appointed to the post in the choir of St. Mark's, hitherto occupied by his master, who himself persuaded him to accept it. He had now attained to such perfection that nothing was too hard for him; he composed sonatas, concertos, and capriccios for his instrument, and frequently played upon it the violoncello part in string-quartets. At Vicenza he played in the opera orchestra, and while there was fortunate enough to discover the marvellous double-bass, with which he never again parted, although often tempted by large offers of money. This instrument belonged to the convent of S. Pietro, and was made by Gasparo di Salò, master of the Amati. He tested its powers on the monks of S. Giustina at Padua, by imitating a thunderstorm and bringing them out of their cells in the dead of night. Meantime his fame had spread beyond Italy, and he was offered an engagement at the Imperial Opera in St. Petersburg, upon which the Procurators of St. Mark's immediately raised his salary. Shortly after, however, he obtained a year's leave of absence, having been persuaded by Banti and Pacchierotti to accept an invitation to London, where he arrived in 1794, and was immediately engaged for the opera, and for the concerts at the King's Theatre. He made his first appearance on Dec. 20, and gave a benefit-concert on May 8, 1795, when he was assisted by Banti, Viotti, the harpist Le Fourneur, Harrington, Monzani, Holmes, and the brothers Leander, French-horn players. The force and expression of his playing and his power of reading at sight excited universal astonishment, and he was at once invited to take part in all the great provincial performances. Henceforth he became the inseparable companion of the violoncellist Lindley; for fifty-two years they played at the same desk at the opera, the Antient Concerts, the Philharmonic, the Provincial Festivals, etc., and their execution of Corelli's sonatas in particular was an unfailing attraction. Great as was Dragonetti's power of overcoming difficulties, it was his extraordinary tone, and the taste, judgment, and steadiness of his performance, that characterised him, and made him so indispensable to the orchestra.

Soon after Dragonetti's arrival in London he met Haydn, with whom he became intimate. On his way to Italy in 1798 Dragonetti visited the great master in Vienna, and was much delighted with the score of the 'Creation,' just completed. In 1808 and 1809 he was again in Vienna, but from caprice would play before no one but the family of Prince Starhemberg, in whose palace he lived, and whose wife often accompanied him on the piano. Here he made the acquaintance of Beethoven, and also that of Sechter, afterwards court-organist, a sound musician, who was teaching the porter's children, and whom Dragonetti requested to put a pianoforte accompaniment to his concertos. To him he played unasked, though he locked up his instrument because the Starhembergs invited some of the nobility to their soirées. His silence was perhaps partly caused by his fear of Napoleon, who was then in occupation of Vienna, and who wished to take him by force to Paris. With Sechter he corresponded all his life, and remembered him in his will. In August 1845, when eighty-two years old, he headed the double-basses (13 in number) at the Beethoven Festival at Bonn; and Berlioz, in his 'Soirées de l'orchestre,' writes that he had seldom heard the scherzo in the C minor Symphony played with so much vigour and finish. Thus, in his old age, he rendered homage to the great master, of whose friendship he was reminded on his death-bed. Shortly before his end, when surrounded by Count Pepoli, Pigott, Tolbecque, and V. Novello, he received a visit from Stumpff, the well-known harp-maker, who, as Dragonetti held out his great hand covered with callosities and unnaturally spread from constant playing, said with emotion, 'This is the hand which Beethoven our great friend, whose spirit now dwells in purer regions, bade me press.' He died in his own house in Leicester Square, April 16, 1846, and was buried on the 24th in the Catholic chapel at Moorfields. [His remains were reinterred in the Catholic cemetery, Wembley Park, in 1899 after the demolition of the chapel at Moorfields. Many solos for double-bass are in MSS. in the British Museum; and a curious arrangement of the pedal-parts of Bach's organ fugues is in the possession of Mr. F. G. Edwards.] It is not generally known that he wrote for the voice, but three canzonets with Italian words, written during his stay in Vienna, still exist in a collection of 'XXXIV Canzonette e Romanze,' by various composers, and dedicated to the Archduke Rudolph, Beethoven's friend and pupil. He was a great collector of pictures, engravings, musical instruments, and music; and left to the British Museum alone 182 volumes of scores of classical operas. [Many music books, given or left by him to Vincent Novello, were presented by the latter to the Fitzwilliam Museum, Cambridge.] His eccentricities were many and curious. He was an inveterate snuff-taker, and had a perfect gallery of snuff-boxes. Among his treasures were found a quantity of curiously-dressed dolls, with which he used to play like a child, taking a selection of them with him to the musical festivals, especially a black one which he called

his wife. His dog Carlo always accompanied him in the orchestra. The most curious thing about him was his speech, a mixture of his native Bergamese dialect with bad French, and worse English. He was a man of kindly temper and a warm friend, though in money matters very close. His picture as 'Il Patriarca dei Contrabassi' was published by Thierry, after a half-length taken in crayons by Salabert, of London. His precious instrument, his companion for nearly sixty years, he bequeathed to the 'Vestry of the Patriarchal Church of St. Mark at Venice.' C. F. P.

DREAM OF GERONTIUS, THE, an oratorio in two parts, set to a great part of Cardinal Newman's poem, by Edward Elgar (op. 38). First performed at the Birmingham Festival, Oct. 3, 1900. Translated into German by Julius Buths, and performed at the Niederrheinische Fest at Düsseldorf in May 1902. Although only partially successful at its first performance, its reception in Germany was so favourable that the attention of English managers was again turned to it, and it was given at the Worcester and Sheffield Festivals in the autumn of 1902, and at the Westminster (Roman Catholic) Cathedral, June 7, 1903. It seems to have definitely taken its place as an English classic. M.

DRECHSLER, JOSEF, a remarkable composer and teacher, born May 26, 1782, at Vlachovo Brezí in Bohemia; received his first instruction from his father, schoolmaster in his native place. After various alternations of place and pursuit, he studied music, and law at Prague; in 1807 found himself at Vienna, but it was not till 1810 that he obtained employment as chorus-master at the Court Opera. This was followed in 1812 by a place as 'Capellmeister adjunct,' then by an organist's post at the Servite Church; in 1815 he opened a music school, and gradually won his way upwards, till in 1822 he was chief Capellmeister at the theatre in the Leopoldstadt. On Gänsbacher's death in 1844 he became Capellmeister at S. Stephen's, a post which he retained till his death, Feb. 27, 1852. His industry during this chequered life was truly extraordinary. He left behind him books of instruction for the Organ, Harmony, Thorough-Bass, and the art of Preluding, with a new edition of Pleyel's Clavier-school; sixteen Masses, and a Requiem; twenty-four smaller pieces of choral music; six Operas; twenty-five shorter dramatic pieces (Singspiele) and pantomimes; three Cantatas, and a host of Airs, Sonatas, Fugues, Quartets, etc. To say that none of these have survived is to detract nothing from the activity and devotion of Josef Drechsler. G.

DRECHSLER, KARL, a great violoncello player, born May 27, 1800, at Kamenz, in Saxony. Entered the Court band at Dessau, in 1820, and in 1824 put himself under Dotzauer at Dresden. In 1826 he received a permanent appointment as leader of the band at Dessau. Before then he had visited England, and played with much success. He shone equally in quartets, solos, and the orchestra, with a full tone, good intonation, and excellent taste. Drechsler was the master of Cossmann, Grützmacher, and A. Lindner. He retired in 1871, and died at Dresden, Dec. 1, 1873. G.

DREHER. A name given in Austria and Bavaria to a dance very similar to the LÄNDLER. The name, which is descriptive of the dance, is derived from the verb *drehen*, 'to twirl.' Suites of Drehers are said to be in existence, but dance, music, and name are now alike obsolete. E. P.

DREHLEIER. The German name for HURDY-GURDY, which see.

DREI PINTOS, DIE. Operatic fragment by Weber (written about 1821), the libretto rearranged by the composer's grandson, Carl von Weber, the music completed by Gustav Mahler from Weber's sketches. Produced at Leipzig, Jan. 20, 1888.

DREYSCHOCK, ALEXANDER, born Oct. 15, 1818, at Zack in Bohemia, died April 1, 1869, at Venice; a pianist of great executive attainment, and a well-trained musician to boot. J. B. Cramer, who in his old days heard him at Paris, exclaimed: 'The man has no left hand! here are two *right* hands!' Dreyschock was the hero of octaves, sixths, and thirds, his execution the *non plus ultra* of mechanical training. He played his own pieces principally, though his repertoire included many classical works, which latter he gave with faultless precision, but in a manner cold and essentially prosaic. In very early youth, already a brilliant performer, he became the pupil of Tomaschek at Prague. He began his travels in 1838, and continued them with little interruption for twenty years. Up to 1848, from which year the golden time for itinerant virtuosi began to decline, Dreyschock gathered applause, reputation, orders, decorations, and money in plenty, from one end of Europe to the other. In 1862 he was called to the professorship of the pianoforte at the Conservatorium of St. Petersburg, and was at the same time chosen director of the Imperial school for theatrical music, and appointed court pianist; but his health failed, and he was sent to Italy in 1868, and died in Venice, April 1, 1869. The body was buried at Prague in accordance with the desires of his family. Dreyschock's publications for his instrument have not met with much success. They are 'salon music' of a correct but cold and sterile sort. He also brought forth a sonata, a rondo with orchestra, a string-quartet and an overture for orchestra, all still-born, spite of their solid and respectable musical parentage. E. D.

DRONE. A name given to the three lower pipes of the bagpipe, which each emit only a single tone. They are distinguished from the CHAUNTER, which has the power of pro-

ducing a melodious succession of notes. [See BAGPIPE.]

The term has hence been transferred to a continuous or pedal bass in a composition, usually of a pastoral kind, as in the 'Hirten-melodie' in Schubert's 'Rosamunde,'

the 'Leyermann' in Schubert's 'Winterreise,' and many dances with oriental characteristics in operas, etc. See also the 'Hirtengesang' at the beginning of the Finale to Beethoven's Pastoral Symphony. W. H. S.

DROUET, LOUIS FRANÇOIS PHILIPPE, one of the most eminent of flute players, born at Amsterdam, 1792. At seven years old he played at the Conservatoire and the Opera-house, Paris. From 1807 to 1810 he was teacher to King Louis of Holland, and claims to have put 'Partant pour la Syrie' into shape for Queen Hortense. His serious study of the flute began in 1807, after an extraordinary success which he achieved at a concert of Rode's in Amsterdam. In 1811 he was appointed solo flute to Napoleon I., a post which he retained after the Restoration. He settled in London and established a flute factory which existed from 1815 to 1819. He appeared at the Philharmonic March 25, 1816, and this was probably the commencement of a lengthened tour, during which he resided for some time at Naples and the Hague. He played again at the Philharmonic May 17, 1830. From 1836 to 1854 he was Court-capellmeister at Coburg, after which he visited America. After his return he lived at Gotha and Frankfort. Drouet was eminently a flute player, not remarkable for tone, but with extraordinary skill in rapid passages and in double-tongueing. He left some 150 works of all kinds, admirably written for the flute, and greatly esteemed by players, but of little account as music. He died at Berne, Sept. 30, 1873.

DRUM. Some instrument of this kind has been known in almost every age and country, except perhaps in Europe, where it appears to have been introduced at a comparatively late period from the East.

A drum may be defined to be a skin or skins stretched on a frame or vessel of wood, metal, or earthenware, and may be of three different kinds :—

1. A single skin on a frame or vessel open at bottom, as the Tambourine, Egyptian Drum, etc.
2. A single skin on a closed vessel, as the Kettledrum.
3. Two skins, one at each end of a cylinder, as the Side-drum, etc.

1. The first sort is represented by the modern tambourine, and its varieties will be described under that head. [TAMBOURINE.]

2. The second kind is represented by the modern KETTLEDRUM—the only really artistically musical instrument of this class. It consists of a metallic kettle or shell, more or less hemispherical, and a head of vellum which, being first wetted, is lapped over an iron ring fitting closely outside the kettle. Screws working on this ring serve to tighten or slacken the head, and thus to tune the instrument to any note within its compass. The shell is generally made of brass in France and of copper in

England. In the cavalry two drums are used, one on each side of the horse's neck. Two are likewise required in orchestras. The larger of the two drums should be able to go down to F, and the smaller up to the *f* above (*a*), giving a range of an octave to the two. Each drum should have a compass of a fifth, viz. F to *c* for the larger (*b*), and B♭ to *f* for the smaller (*c*).

In the key of F, the tonic and dominant may be obtained in two ways (*d*), and likewise in B♭ (*e*), but in all other keys in only one way.

Thus in F♯, G, A♭, and A, the dominant must be *above* the tonic,

while in B♮, C, C♯, D, E♭, and E, the dominant must be *below* the tonic,

Drums are generally tuned to tonic and dominant; but modern composers have found out that they may advantageously stand in a different relation to each other. Thus Beethoven, in his Eighth and Ninth Symphonies, has them occasionally in octaves (*f*), and Mendelssohn, in his Rondo Brillante, most ingeniously puts them in D and E (*g*); thereby making them available in the

keys of B minor and D major, as notes of the common chord, and of the dominant seventh, in both keys. By this contrivance the performer

has not to change the key of his instruments all through the rondo—an operation requiring, as we shall see, considerable time. Berlioz says that it took seventy years to discover that it was possible to have three kettledrums in an orchestra. But Auber's overture to 'Masaniello' cannot be played properly with less, as it requires the notes G, D, and A; and there is not time to change the G drum into A. In Spohr's 'Historical Symphony' three drums are required all at once in the following passage:—

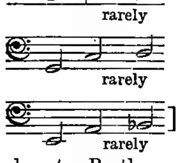
And in 'Robert le Diable' (No. 17 of the score) Meyerbeer uses four drums, G, C, D, and E. The actual solo begins thus, and is probably a unique example of its kind:—

The printed score has only three drums, G, C, and D, to facilitate the performance in ordinary orchestras, the E being then played by the contrabasso. [A common practice in the modern orchestra is to use a minimum number of three drums, whose compass is as follows:—

High drum (diameter, 24 inches) — rarely

Middledrum (diameter, 27½ inches) — rarely

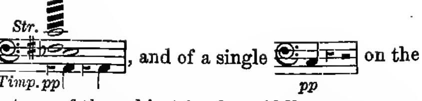
Low drum (diameter, 31 inches) — rarely]



Another innovation is due to Beethoven, namely, striking both drums at once. This occurs in his Ninth Symphony, where, in the slow movement, the kettledrums have

Gounod has a similar chord in the ballet music of 'La Reine de Saba.' But Berlioz, in his 'Requiem,' besides fifty brass instruments, has eight pairs of kettledrums, played by ten drummers, two of the pairs having two drummers each. The drum parts have these chords— most of the notes being doubled.

Besides their obvious use in forte passages, the drums are capable of beautiful piano effects. Observe a passage several times repeated in Mozart's overture to 'Die Zauberflöte,' beginning at the forty-first bar from the end: also the mysterious effect of the thirteenth bar in the introduction to Beethoven's 'Mount of Olives'; that of the A♮ against a tremolo of the strings in the first movement of Weber's overture to 'Der Freischütz,'



, and of a single (pp) on the return of the subject in the middle movement.

When musicians talk of 'drums' they mean kettledrums, in contradistinction to the side drum or bass drum, of which hereafter. The two latter can only mark the rhythm, not being musical notes; but kettledrums give musical sounds as definitely as the double bass, and can only be used when forming part of the harmony played by the other instruments. Composers have usually treated them thus; but Beethoven was probably the first to see that they might also be treated as *solo* instruments. Thus in the Andante of his Symphony No. 1 the drum repeats this bar several times as a bass to a melody in the violins and flutes. In Symphony No. 4 it takes its turn with other instruments in playing this passage—

In the wonderful transition from the scherzo to the finale of the Fifth Symphony, the soft pulsations of the drum give the only signs of life in the deep prevailing gloom. Of the drums in octaves in Beethoven's Eighth and Ninth Symphonies, we have already spoken. And in reviewing his Violin Concerto, which begins with four beats of the drum, literally *solo*, an English critic observes that 'until Beethoven's time the drum had, with rare exceptions, been used as a mere means of producing noise—of increasing the din of the *fortes;* but Beethoven, with that feeling of affection which he had for the humblest member of the orchestra, has here raised it to the rank of a solo instrument.'

George Hogarth says that 'to play it well is no easy matter. A single stroke of the drum may determine the character of a whole movement; and the slightest embarrassment, hesitation, or misapprehension of the requisite degree of force, may ruin the design of the composer.'

There are many sorts of sticks. The best are of whalebone with a small wooden button at the end, covered with a thin piece of very fine sponge. With these every effect, loud or soft, can be produced. A small knob, not exceeding 1¼ inch in diameter, entirely made of felt on a flexible stick, answers very well. India-rubber discs are not so good. Worst of all are large clumsy knobs of cork, covered with leather, as they obscure the clear ring of the kettledrum, so different from the tone of a bass drum.

Very large drums, going below F, have not a good musical tone, but mere thunder. Thin transparent skins have a better tone than the opaque white ones. The right place to strike a kettledrum is at about one-fourth of its diameter.

A roll is written in either of the following ways,

and is performed by alternate single strokes of the sticks. We shall see presently that the side-drum roll is produced in quite a different manner.

Drum parts were formerly always written, like horn and trumpet parts, in the key of C, with an indication at the beginning as to how they were to be tuned, as 'Timp. in E♭, B♭,' or 'Timp. in G, D,' etc.; but it is now usual to write the real notes.

To tune drums of the ordinary construction, a key is very generally applied successively to each of the several screws that serve to tighten or loosen the head. In recent practice, however, in both English and French drums there is a fixed T-shaped key-head to each screw. But even then it takes some time to effect a change, whence several attempts have been made to enable the performer to tune each drum by a single motion instead of turning seven or eight screws.

Cornelius Ward took out a patent in 1837 for this object. The head is drawn by an endless cord passing over pulleys from the outside to the inside of the drum, where it goes over two nuts, having each two pulleys. These nuts approach and recede from each other by means of a horizontal screw, nearly as long as the diameter of the drum, the handle of which comes just outside the shell, and is turned by the performer whenever he requires to tune the drum. A spring indicator shows the degree of tension of the cord, and consequently the note which the drum will give, so that the performer may tune his instrument by the eye instead of the ear.

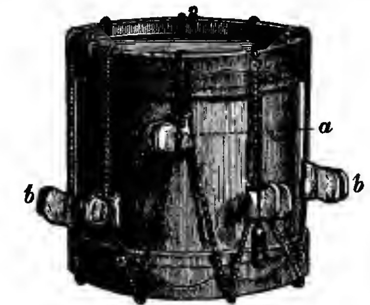
There will always be some objection to these schemes from the fact of the head being an animal membrane, and consequently not perfectly homogeneous, but requiring a little more or less tension in some part of its circumference, unless, as in the drums made by Einbigler of Frankfort, there are small screws with fly-nuts all round the upper hoop, for the purpose of correcting any local inequality of tension. Writers on acoustics seem to have been disheartened by this inequality from extending their experiments on the vibration of membranes. Even Chladni does not pursue the subject very far. We must, therefore, be content with some empirical formula for determining the proportion which two drums should bear to each other, so that the compass of the larger should be a fourth above that of the smaller. We have already said that the lowest notes of the two drums should be respectively

Now the numbers of the vibrations due to these two notes are in the proportion of three to four. Assuming that the surfaces, or the squares of the diameters, of the membranes are in the inverse ratio of the number of vibrations they give, the tension being equal (which is true of metal plates of equal thickness), and calling the larger diameter D and the smaller d, we should have this proportion $D^2 : d^2 :: 4 : 3$, whence $D : d :: 2 : \sqrt{3}$, or as 2 : 1·732, or very nearly as 30 : 26. Practically this is found to be a very suitable proportion, the drums at the French Opera being 29 and 25¼ inches diameter, and those lately at the Crystal Palace 28 and 24½. [See, however, the modern dimensions, as given on p. 731.

Occasionally, especially in the works of the older masters, the kettledrums are directed to be muffled or covered. The direction 'timpani coperti' occurs in the finale of the first act of 'Die Zauberflöte.' It signifies that the parchment of the drum is to be covered with a piece of cloth. See Berlioz, *Instrumentation* (Engl. trans. p. 219).]

Kettledrums in German are called *Pauken;* in Italian, *timpani;* in Spanish, *atabales;* in French, *timbales:* the two latter evidently from the Arabic *tabl* and the Persian *tambal.* There are two very complete *Methods* for the kettledrums, viz. *Metodo teorico pratico per Timpani,* by P. Pieranzovini, who wrote a concerto for the drums, published at Milan by Ricordi; and a *Méthode complète et raisonnée de Timbales,* by Geo. Kastner, published in Paris by Brandus (late Schlesinger).

3. The third kind of drum consists of a wooden or brass cylinder with a skin or head at each end. The skins are lapped round a small hoop, a larger hoop pressing this down. The two large hoops are connected by an endless cord, passing zigzag from hoop to hoop. This cord is tightened by means of leather braces *a*, *b*, *b*. It is slackest when they are all as at *a*, and tightest when as at *b*, *b*. This is called



a Side-drum, and is struck in the centre of the upper head by two sticks of hard wood, ending in a small elongated knob. Across the lower head several cords of catgut, called *snares*, are stretched, which rattle against it at every stroke. The roll (nicknamed 'daddy-mammy') is made by alternately striking two blows with the left hand and two with the right, very regularly

and rapidly, so as to produce one continuous *tremolo*. It is not easy to do, and must be learned at an early age.

Some side-drums are made much flatter, and are tightened by rods and screws instead of cords.

In orchestras the side-drum is frequently used (and abused) by modern composers. But in the overtures to 'La Gazza Ladra' and 'Fra Diavolo,' the subjects of both being of a semi-military nature, the effect is characteristic and good.

[The impressive effect produced by the muffling of the side-drum in such things as funeral marches, etc., is produced by loosening the snares and wrapping a handkerchief or piece of cloth round them. Or a kindred effect may be got by making the snares very slack, or by twisting around them the spare rope which forms the drum carriage when it is slung over the shoulder. The braces ought not to be loosened. The continuous roll on the muffled side-drum usually played during the whole of the Dead March in 'Saul,' in the arrangement for military band, is a permissible and most impressive addition to the effect.]

Side-drums are used in the army for keeping time in marching and for various calls, both in barracks and in action. In action, however, bugle-calls are now usually substituted :—

The above are examples of drum calls used in the British army; the next is 'La Retraite,' beaten every evening in French garrison towns.

The effect of this is very good when, as may be heard in Paris, it is beaten by twenty-eight drummers. For Berlioz has well observed that a sound, insignificant when heard singly, such as the clink of one or two muskets at 'shoulder arms' or the thud as the butt-end comes to the ground at 'ground arms,' becomes brilliant and attractive if performed by a thousand men simultaneously.

The Tenor-drum is similar to the side-drum, only larger, and has no snares. It serves for rolls in military bands instead of kettledrums.

The French Tambourin is similar to the last, but very narrow and long. It is used in Provence for dance-music. The performer holds it in the same hand as his flageolet (which has only three holes) and beats it with a stick held in the other hand. See also PIPE AND TABOR. Auber has used the tambourin in the overture to 'Le Philtre.'

The Bass-drum (Fr. *Grosse Caisse;* Ital. *Gran Cassa* or *Gran Tamburo*) has also two heads, and is played with one stick ending in a soft round knob. It used to be called the long-drum, and was formerly (in England at least) made long in proportion to its diameter. But now the diameter is increased and the length of the cylinder lessened. The heads are tightened by cords and braces like the side-drum first described, or by rods and screws, or on Cornelius Ward's principle as described for kettledrums. It is used in military bands and orchestras. There is another sort of bass-drum called a Gong-drum, from its form, which is similar to a gong or to a gigantic tambourine. It is very convenient in orchestras where space is scarce; but it is inferior to the ordinary bass-drum in quality of tone. These instruments do not require tuning, as their sound is sufficiently indefinite to suit any key or any chord. See TAM-TAM.

The bass-drummer is often required to play the cymbals in addition to his own instrument; the part for both is sometimes the same, and when this is the case the words *senza piatti* are used, and indicate that the bass-drum is played alone. V. DE P.

DRURY LANE THEATRE, opened in 1696 under the name of the Theatre Royal in Drury Lane; materially altered and enlarged in 1762 and 1763; pulled down in the summer of 1791; the new theatre opened (for plays) April 21, 1794; burned Feb. 24, 1809; rebuilt and opened Oct. 10,[1] 1812. Among the eminent composers who have been connected with this theatre must, in the first place, be mentioned Dr. Arne, who, from the year 1738, when he wrote the music to Milton's 'Comus,' until shortly before his death in 1778, produced a large number of operas and operettas. In 1806 one of Sir Henry Bishop's first works, a pantomime-ballet called 'Caractacus,' was brought out at Drury Lane. But Bishop, after the burning of the theatre in 1809, accepted an engagement at Covent Garden, where most of his operas and musical dramas were performed. Meanwhile foreign operas as arranged or disarranged for the English stage by Rophino Lacy, Tom Cooke, and others, were from time to time performed at Drury Lane; and in 1833, under the direction of Alfred Bunn, some English versions of Italian operas were produced with

[1] This opening, for which the address was written by Byron, gave occasion to the *Rejected Addresses* of James and Horace Smith.

the world-renowned prima donna Marietta Malibran, in the principal parts. Drury Lane was the last theatre at which she sang. [MALIBRAN.] A few years later Bunn made a praiseworthy but not permanently successful attempt to establish English opera at this theatre. During this period Balfe's 'Bohemian Girl,' 'Daughter of St. Mark,' 'Enchantress,' 'Bondman,' etc.; Wallace's 'Maritana' and 'Matilda of Hungary,' Benedict's 'Crusaders' and 'Brides of Venice,' were brought out at Drury Lane, for which theatre they had all been specially written. When Her Majesty's Theatre was burnt down (Dec. 6, 1867), Mr. Mapleson took Drury Lane for a series of summer seasons. In 1870 the performances took place under the management of Mr. George Wood (of the firm of Cramer, Wood, & Co.), who among other new works produced Wagner's 'Flying Dutchman'—the first of Wagner's operas performed in England. Until 1877 'Her Majesty's Opera,' as the establishment transferred from Her Majesty's Theatre was called, remained at Drury Lane. In 1877, however, Mr. Mapleson returned to the Haymarket; [and Drury Lane was not used for serious operas until the German season of 1882 under Richter, when 'Tristan und Isolde' and 'Die Meistersinger' were given for the first time in London. In the spring of 1883 Carl Rosa took Drury Lane and brought out Thomas's 'Esmeralda' and Mackenzie's 'Colomba.' Stanford's 'Canterbury Pilgrims' was given in 1884, and Thomas's 'Nadeshda' in 1885. The successful career of Sir Augustus Harris as an operatic manager began at Drury Lane, when in 1887 he introduced the brothers de Reszke and other notable singers to London audiences. After that single season he made Covent Garden the centre of his operations; but in 1892-93 Drury Lane was used for extra performances of German Opera. A regular German season was given at the same theatre in 1895, when the Ducal Company of Saxe-Coburg and Gotha gave a very interesting series of performances of comic operas of a more or less high class. Smetana's 'Verkaufte Braut' was the most important of the operas new to London. In the spring of 1896 a series of performances of stock operas in English was given at Drury Lane before the commencement of the regular season at Covent Garden. In 1904 the Moody-Manners Company gave a series of operas in English at Drury Lane.] H. S. E.

DRYSDALE, F. LEARMONT, born in Edinburgh in 1866, entered the Royal Academy of Music, and won the Lucas prize for composition in 1890. An orchestral ballad, 'The Spirit of the Glen' (1889), and an orchestral prelude, 'Thomas the Rhymer' (1890), were written during his student days. His overture 'Tam o' Shanter' obtained a prize offered by the Glasgow Society of Musicians, and was performed at the Crystal Palace, Oct. 24, 1891. On April 24, 1894, his overture 'Herondean' was produced by the Stock Exchange Orchestral Society; and a cantata, 'The Kelpie,' was given on Dec. 17 of the same year in Edinburgh. A musical play, 'The Plague,' was produced at the Lyceum Theatre, Edinburgh, in October 1896. An opera founded on Baring-Gould's 'Red Spider' has not yet been performed. (*Brit. Mus. Biog.*)

DUBOIS, FRANÇOIS CLÉMENT THÉODORE, born at Rosney (Marne), August 24, 1837, came to Paris at an early age, and entered upon a brilliant course of study at the Conservatoire, where he gained successively first prizes for harmony, fugue, and organ, and finally, in 1861, under Ambroise Thomas, the Prix de Rome. On his return from Italy in 1866 he devoted himself to teaching, and was appointed maître de chapelle of Ste. Clotilde, where, on Good Friday, 1867, he produced an important and carefully written work, 'Les Sept Paroles du Christ,' afterwards performed at the Concerts Populaires in 1870. It has since been given in other churches on Good Friday, and parts of it have been performed at the Concerts du Conservatoire. Being unable to force an entrance into the great musical theatres, he contented himself with producing, at the Athénée, a pleasing little work, 'La Guzla de l'Émir' (April 30, 1873). In 1878 he carried off, together with B. Godard, the prize at the Concours Musical instituted by the city of Paris, and his 'Paradis perdu' was performed, first at the public expense (Nov. 27, 1878), and again on the two following Sundays at the Concerts du Châtelet. His other dramatic works for the stage are 'Le Pain bis' (Opéra Comique, Feb. 26, 1879); 'La Farandole,' ballet (Opéra, Dec. 14, 1883); 'Aben-Hamet,' a grand opera (Théâtre Italien de la place du Châtelet, Dec. 16, 1884); [and 'Xavière,' dramatic idyl in three acts (Opéra Comique, Nov. 26, 1895)]. The above are his chief works, but Dubois is a fertile composer, and has produced many important compositions at various concerts, not to mention his numerous pieces for piano, his single songs, and his church and chamber music. We may refer to his 'Divertissement' and 'Pièces d'Orchestre' (Concert national, April 6 and Dec. 14, 1873), a 'Suite d'Orchestre' (do. Feb. 8, 1874), 'Scènes Symphoniques' (Concerts du Châtelet, Nov. 25, 1877), and his overture 'Fritiof' (do. Feb. 13, 1881). The last of these, a work full of life and accent, ranks, together with his two small operas, among his best compositions. [A symphonic poem, 'Notre Dame de la Mer' was produced in 1897, and Dubois also set to music a Latin ode on the baptism of Clovis, for tenor and baritone solo, choir and orchestra, performed at Rheims in 1899.] He possesses a full knowledge of all the resources of his art, but little originality or independence of style. For some time he was maître de chapelle at the Madeleine, and succeeded Saint-Saëns as organist

there in 1877. He succeeded Elwart as professor of Harmony at the Conservatoire in 1871, and in 1883 was decorated with the Legion of Honour. [In 1894 he was elected to the Académie in place of Gounod, and became the head of the Conservatoire in 1896.] A. J.

DUBOURG, GEORGE, a grandson of Matthew Dubourg, born 1799, died at Maidenhead, April 17, 1882, was author of a history of the violin and the most celebrated performers on it, which was originally published in 1836, and in 1878 reached a fifth edition. W. H. H.

DUBOURG, MATTHEW, an eminent English violinist, pupil of Geminiani, born in London, 1703. It is reported that he first appeared as a boy at one of the concerts of Britton, the small-coal man, when he performed a solo of Corelli with great success, standing on a high stool. In 1728 he was appointed to succeed Cousser as conductor of the Viceroy's band at Dublin, in which capacity he set many odes for the celebration of royal birthdays. During his residence there he led the band at the performances given by Handel during his visit to Ireland in 1742, and also had the distinction of assisting at the first performance of the 'Messiah.' Later he returned to London, and in 1752 succeeded Festing as master of the King's band [though still retaining the Dublin appointment. Geminiani was his guest in Dublin in 1761-62 and on many other occasions. Dubourg composed the Birthday Odes for Dublin Castle from 1728 to 1764; he finally left Ireland in 1765, and died in London, July 3, 1767.—W. H. G. F.] He was buried in Paddington Churchyard. Dubourg appears to have been a brilliant performer and fond of showing off his skill. Burney relates that on one occasion he introduced a cadenza of extraordinary length into the ritornello of an air. When at last he finished up, Handel, who was conducting, exclaimed, 'Welcome home, Mr. Dubourg.' P. D.

DUCIS, or HERTOGHS,[1] BENEDICTUS, a Flemish musician in the early part of the 16th century (according to Fétis he was born about 1480), organist of the Lady Chapel in the cathedral at Antwerp, and 'Prince de la Gilde' in the brotherhood of St. Luke in that city. He left Antwerp for England in 1515 (*Biogr. Belge*), but as his name does not appear in the lists of court musicians at that time, and no manuscript compositions of his have been found in this country, it appears that his residence here must have been very short, if not altogether mythical. His elegy on the death of Josquin (1531), and another on the death of Erasmus (1536) fix two more dates in his life. After that no more is known of him. Some German historians have claimed him as a countryman on the strength of the publication and dedication of a setting of the Odes of Horace (published at Ulm in 1539, and dedicated to the youths of that city), maintaining that this proves his residence in that city, but the dedication was more probably the work of the publisher than of the composer, [and the existence of the book is itself very doubtful. See the *Quellen-Lexikon.*] His connection with Antwerp, mentioned above, was discovered by M. Léon de Burbure, and certainly outweighs anything said in favour of his being a German; while the internal evidence of his compositions, which bear the decided Flemish character, and very closely approach the style of Josquin, sets the matter entirely at rest.

[1] Benedictus Ducis, who is often called by his first name alone, must not be confounded with Benedictus Appenzelders, a Swiss musician who lived in Belgium, but of later date and less genius.

We have the following compositions of his:—(1) A four-part 'monody' on the death of Josquin, in the seventh set of French chansons in five and six parts printed by Tylman Susato in 1545. A copy of the book is in the British Museum. The composition itself is printed in Burney's *History* (ii. 513), with critical remarks. [This with fourteen other compositions by Ducis is in a MS. at Cambrai, dated 1542. There are also songs by Ducis to the number of eighty in the old collections between 1532 and 1570.] (2) Another elegy in five parts, 'Plangite Pierides,' on the death of Erasmus, and an eight-part 'Agnus Dei,' both from the 'Selectissimæ nec non familiarissimæ cantiones ultra centum' (Augsburg, 1540). (3) Songs in the collection of German songs made by Förster and printed by Petreius (Nuremberg, 1539-1540). (4) A motet, 'Peccantem me quotidie,' from the 'Cantiones octo . . . vocum' printed by Uhlard (Augsburg, 1545). 'No wonder,' says Ambros, speaking of this motet, 'that historians have striven to prove such a composer their countryman.' (5) A motet, 'Dum fabricator mundi supplicium,' from Rhau's 'Selectæ Harmoniæ . . . de Passione Domini' (Wittenberg, 1538). (6) Two five-part motets, 'Benedic Domine,' and 'Corde et animo,' from Kriesstein's 'Cantiones sex et quinque vocum, etc.' (Augsburg, 1545.) J. R. S. B.

DUET (It. *Duetto*; Fr. *Duo*). A composition for two voices or instruments, either with or without accompaniments. Some writers use the form 'Duet' for vocal, and 'Duo' for instrumental compositions; this distinction, however, is by no means universally adopted. Strictly speaking, a duet differs from a two-part song in the fact that while in the latter the second voice is mostly a mere accompaniment to the first, in the duet both parts are of equal importance. In cases where it is accompanied, the accompaniment should always be subordinate to the principal parts. The most important form of the duet is the 'Chamber Duet' (*Duetto da Camera*), of which the old German and Italian masters have left many excellent examples (see especially Handel's 'Chamber Duets'). These duets were often in several movements, sometimes connected by recitatives, and almost

invariably in the polyphonic style. The dramatic duet, as we find it in the modern opera, is entirely unrestricted as to form, which depends upon the exigencies of the situation. Among the finest examples of operatic duets may be named those in the first act of 'Guillaume Tell,' in the fourth act of 'Les Huguenots,' and in the second act of 'Masaniello,' in the more modern school; while the duets in 'Fidelio' and in the operas of Mozart and Weber are models of the older classical forms of the movement. Many of the songs in Bach's cantatas, in which the voice and the obbligato instrument are equally prominent, are virtually duets, but the term is not applied to the combination of a voice and an instrument. In instrumental music the word Duet is applied to all works written for two instruments, such as Spohr's famous duets for two violins, or the innumerable sonatas for piano and violin, piano and violoncello, or other instruments, without further accompaniment. In some cases it also includes music for two instruments of the same kind accompanied on a keyboard instrument, such as Bach's sonata in C for two violins. E. P.

In pianoforte music the term is used in two ways: first, for music *à quatre mains* (*i.e.* for two performers on one piano); and, second, for duet for two pianos with one player at each.

1. À QUATRE MAINS (Fr.; Germ. *Zu vier Händen, Vierhändig;* Ital. *a quattro mani*). Music written for two performers upon one pianoforte, and usually so printed that the part for each player occupies the page which is directly opposite to him.

By far the greater proportion of music *à quatre mains* consists of arrangements of orchestral and vocal compositions and of quartets, etc. for stringed instruments; indeed, scarcely any composition of importance for any combination of instruments exists which has not been arranged and published in this form, which on account of its comparative facility of performance is calculated to reproduce the characteristic effects of such works more readily and faithfully than arrangements for pianoforte solo.

But besides this, the increase of power and variety obtainable by two performers instead of one offers a legitimate inducement to composers to write original music in this form, and the opportunity has been by no means neglected, although cultivated to a less extent than might have been expected.

The earliest printed works for the pianoforte *à quatre mains* of which we have any knowledge were published in Dessau about 1782, under the title 'Drey Sonaten fürs Clavier als Doppelstücke für zwey Personen mit vier Händen von C. H. Müller'; before this, however, E. W. Wolf, musical director at Weimar in 1761, had written one or more sonatas for two performers, which were published after his death. The short compass of the harpsichord keyboard, which rarely exceeded five octaves, was ill adapted to the association of two performers on the same instrument, and it is doubtless on this account that the earlier composers have left so little music of the kind. [Burney published four 'sonatas or duetts' in 1777.]

Haydn, Mozart, and Beethoven, appear to have had but little inclination for this description of composition. According to Fétis, Haydn wrote but one piece *à quatre mains*, a divertissement, which was never published, the two sonatas, opp. 81 and 86, published under his name being spurious. Of the nine pianoforte duets by Mozart the two finest, the Adagio and Allegro in F minor and the Fantasia in F minor, were originally written for a mechanical organ or musical clock in a Vienna exhibition, and were afterwards arranged for piano by an unknown hand. [A later arrangement, by Mr. Leonard Borwick, has often been played by him in public.] Beethoven left but one sonata, op. 6, three marches, op. 45, and two sets of variations, none of which are of any great importance.

But of all the great composers Schubert has made the fullest use of the original effects possible to music *à quatre mains*, some of his most genial and effective compositions being in this form, as for instance the 'Grand Duo,' op. 140, and the 'Divertissement à la Hongroise,' op. 54. In addition to these he wrote seventeen marches, ten polonaises, six sets of variations, three rondos, three overtures, two sonatas, one set of ländler, four fantasias, a fugue, and four separate pieces, all, almost without exception, masterpieces of their kind.

Among modern compositions *à quatre mains*, those of Schumann and Brahms are the most interesting, Mendelssohn having left but one original work of the kind, although he himself arranged some of his orchestral works and also the octet, op. 20, and the variations for pianoforte and violoncello, op. 83, in this form. Besides writing a number of small pieces for two performers, Schumann made a very novel and successful experiment in his 'Spanische Liebeslieder,' op. 138, which consist of ten pieces for four voices, being songs, duets, and a quartet, with pianoforte accompaniment *à quatre mains*, and the idea bore fruit in Brahms's 'Liebeslieder,' op. 52, and 'Neue Liebeslieder,' op. 65, for pianoforte *à quatre mains*, with accompaniment of four voices. [One of the most striking of his early works is a set of variations on a theme by Schumann in E flat (a theme which Schumann, in the mental darkness of his later days, imagined that Schubert had dictated to him), op. 23. The fine sonata of H. Goetz in G minor must not be forgotten. Grieg's music to *Peer Gynt* was first published as a pianoforte duet, and among more recent literature may be mentioned a beautiful four-hand suite by S. P. Waddington.]

Organ music *à quatre mains* is very rare, although the experiment has been made by

Samuel Wesley (three duets), Hesse, Höpner, and especially by Julius André, who wrote twenty-four pieces for two performers on the organ; but no increased effect appears to be obtainable from such an arrangement which can at all compensate for its practical inconvenience, and the same observation applies to compositions for the pianoforte *à six mains*, of which a few specimens exist, mostly by Czerny. F. T.

2. It is probably safe to assume that the first composition for two keyboard instruments with one performer at each is Giles Farnaby's little duet in the *Fitzwilliam Virginal Book*, vol. i. p. 202. The ninth of Couperin's Ordres begins with an 'Allemande à deux Clavecins,' and in both of these pieces the great advantage of the combination in close imitations is fully realised. J. S. Bach used harpsichords together, but generally in the concerto-form, with the accompaniment of other instruments; two fugues in the *Kunst der Fuge* constitute his only contribution to the literature of keyboard duets; for the beautiful sonata in F, published as bis in B.-G. xliii., was proved to be by Wilhelm Friedmann Bach. Mozart wrote a sonata in D, and a fugue in C minor for two pianofortes; and Clementi's two sonatas, both in B flat, are worth mentioning. Coming to modern times, Schumann's variations in B flat, op. 46, is perhaps the best known of all the compositions for this beautiful combination. It was originally written for two pianos, two violoncellos, and horn. Chopin's rondo in C must not be forgotten. No works have been more successfully devised for the two instruments than those of Brahms, of which the first is the two-piano arrangement of the quintet in F minor, op. 34, in which there are various alterations of detail from the original; the version of the variations on a theme of Haydn is not a mere arrangement of the orchestral work—a fact which was emphasised by the composer, who numbered the duet op. 56*b*. The arrangement of Joachim's overture, 'Henry IV.,' is another most interesting specimen of Brahms's work for two pianos; and the wonderfully successful transcriptions of his symphonies are not only eminently useful for purposes of study, but on their own account. Reinecke's various compositions and fantasias for two pianos are among his most successful works; and mention must be made of Parry's dignified 'Characteristisches Duo' in E minor, as well as of Christian Sinding's variations. The combination is particularly successful as representing works for piano and orchestra; all the best-known concertos are, as a rule, arranged for two pianos; and in the case of Chopin's the arrangement is at least as effective as the original. M.

DUETTINO (Ital. dimin.). A duet of short extent and concise form.

DUFAY, Guillermus (Guilielmus, Guglielmus, or Wilhelmus Dufay, Dufais, or Duffai).

Until within the last few years the personal identity of the great leader of the First Flemish School was surrounded by doubts, little less obscure than those which still perplex the biographer of Franco of Cologne. Baini's statement that Dufay sang in the Pontifical Choir from 1380 to 1432 has misled various later writers, some of whom were driven to the conclusion that there were two musicians of the same name.

[The biographical facts which seem to be now established are as follows: He was born probably in Hainault before 1400; was a chorister in the cathedral of Cambrai; wrote a song celebrating the marriage of Charles Malatesti and Vittoria di Lorenzo Colonna, which took place in 1416; was transferred to the Papal Choir in Rome in December 1428, remaining there (apparently with short intervals) until 1437; was appointed to a canonry at Cambrai in November 1436, and to one at Mons soon afterwards; held both appointments at the time of his death; probably lived in Savoy for some time before 1446, after which he was constantly at Cambrai, dying there Nov. 27, 1474. Stainer's *Dufay and his Contemporaries*, London, 1898.]

M. Houdoy's researches at Cambrai prove, beyond all doubt, that he took his degree of Magister in artibus, and Baccalareus in decretis, in Paris, at the Sorbonne, before 1442; and that he entered the service of Philippe le Bon, Duke of Burgundy, as music-tutor to his son Charles, Comte de Charolais.

In his will, which is still in existence at Cambrai, Dufay bequeaths to one of his friends six books which had been given to him by the Comte de Charolais; to another, a portrait of Louis XI., who, when Dauphin, spent some time at the Court of Burgundy; to a third, a portrait of René of Anjou, who was Philippe's prisoner for a long time; and to a certain Pierre de Wez thirty livres. He also desires that, when he has received the last sacraments, and is *in articulo mortis*, eight choristers of the Cathedral shall sing, very softly, by his bedside, the hymn 'Magno salutis gaudio'; after which, the altar-boys, with their master, and two choristers, shall sing his motet, 'Ave Regina coelorum.' This pious duty was, however, performed, not at his bedside, but in the chapel, after his death, *corpore praesente*.

The will is printed entire by Haberl, who also gives a woodcut of the tombstone in the chapel of St. Etienne, with the following epitaph,

> Hic inferius jacet venerabilis vir magr. guillermus dufay music. baccalareus in decretis olim hu' ecclesie chorialis deinde canonic' et sce. waldetrudis montem. qui obiit anno dni. millesimo quadrin . . . II° die XXVII^a mensis novembris,

and a representation in bold relief of the master, kneeling, with folded hands, in the dexter corner, in front of S. Waltrudis and her two daughters, the remainder of the stone being occupied with a representation of the resurrection

of our Lord, while the four corners are ornamented with a medallion, or rebus, in which the name, Dufay, is encircled by a Gothic 𝕮. The stone was in the collection formed by M. Victor de Lattre, of Cambrai, but was sold after his death in 1889.

The archives of the Cathedral of Cambrai contain a record of 60 scuta, given to Dufay as a 'gratification,' in 1451. And the text of a letter, written to Guil. Dufay by Antonio Squarcialupi, the Florentine organist, and dated 1 Maggio, 1467, is given by Otto Kade, in the *Monatshefte* for 1885, No. 2.

Guil. Dufay is mentioned in an obscure passage quoted from Adam de Fulda in Gerbert's *Scriptores*, as having made certain innovations which seem to have reference mainly to matters of musical notation. [See Stainer's *Dufay and his Contemporaries*, p. 6.] So highly was his learning esteemed by his contemporaries, that, when on a visit to Besançon, in 1458, he was asked to decide a controversy concerning the Mode of the Antiphon 'O quanta exultatio angelicis turmis,' his decision that it was not, as commonly supposed, in Mode IV., but in Mode II., and that the mistake had arisen through a clerical error in the transcription of the Final, was accepted by the assembled *savants* as an authoritative settlement of the question.

Besides the collection of Dufay's MS. compositions among the Archives of the Cappella Sistina, and the Vatican Library, Haberl has identified sixty-two in the Library of the Liceo filarmonico, at Bologna; twenty-five in the University of the same city; and more than thirty in other collections. [See the *Quellen-Lexikon* for list.] The 'Ave Regina coelorum' is given, by Haberl, in the original notation of the old part-books, and also in the form of a modernised score; together with a score of a 'Pange lingua, *a* 3'; and some important examples are given among the posthumous Noten-Beilagen at the end of Ambros's *Geschichte der Musik.* [The most valuable contributions to our knowledge of Dufay is the fine volume, *Dufay and his Contemporaries*, by the late Sir John Stainer (1898), containing a summary of the events of Dufay's life, and nineteen compositions from a MS. in the Bodleian Library. Houdoy's *Histoire Artistique de la Cathédrale de Cambrai* (Paris, 1880), Haberl's *Wilhelm du Fay* (*Bausteine für Musik-Geschichte*, 1885), should also be consulted. See also the *Rivista Musicale Italiana*, vol. i. p. 257 *et seq.*] W. S. R.

DUGAZON, MME. ROSALIE, daughter of an obscure actor named Lefèvre, born at Berlin, 1755, died in Paris, Sept. 22, 1821. She and her sister began their career as ballet-dancers at the Comédie Italienne, and Rosalie made her first appearance as a singer at the same theatre in 1774. She had an agreeable voice, much feeling and finesse, and played to perfection 'soubrettes,' 'paysannes,' and 'coquettes.' Her most remarkable creation was the part of Nina in Dalayrac's opera of that name. After an absence of three years during the Revolution, she reappeared in 1795, and played with unvarying success till 1806, when she retired. To this day the classes of parts in which she excelled are known as 'jeunes Dugazon' and 'mères Dugazon.'—Her son GUSTAVE (Paris, 1782-1826), a pianist and pupil of Berton's, obtained the second Prix de Rome at the Conservatoire in 1806. His operas and ballets, with the exception of 'Aline' (1823), did not succeed. G. C.

DUIFFOPRUGCAR. See TIEFFENBRÜCKER.

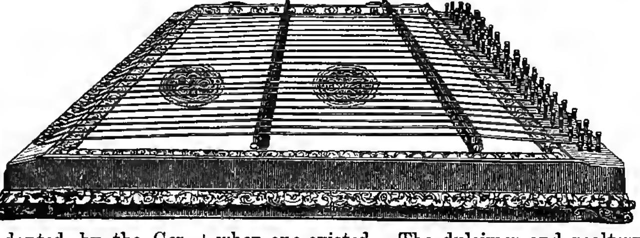
DUKAS, PAUL, French composer, born in Paris, Oct. 1, 1865, admitted a pupil of the Conservatoire in 1882. His two overtures, 'Lear,' and 'Goetz von Berlichingen,' were composed before he obtained the second Prix de Rome with a cantata entitled 'Velléda.' Another overture, 'Polyeucte' (1892), a symphony in three movements (1897), and a symphonic poem, 'L'Apprenti Sorcier' (1897, after Goethe's *Zauberlehrling*), are his principal works up to the present time, and he has also written a pianoforte sonata (1901), piano variations, etc. The 'Apprenti Sorcier' was given in various musical centres within a short time of its production, and was included in the programme of the London Musical Festival in May 1899. Dukas has also written a lyrical drama, 'L'Arbre de Science,' and a number of songs, choruses; etc., not yet published. He is one of the composers who are of most account in France at the present day, for his advanced and broad views of art go hand in hand with great technical ability; he is musical critic to the *Gazette des Beaux-Arts* and the *Revue hebdomadaire.* He has edited *Les Indes Galantes* for the great edition of Rameau's works. G. F.

DULCIANA. Virtually an open diapason organ stop of small scale and pleasing tone. In large organs this stop takes the position of second open on the choir organ, but in small instruments it forms the chief open metal 8 ft. flue tone for that manual, occupying a similar position in the choir organ to that of the open diapason in the great organ. It is a stop seldom omitted from any but the very smallest instruments; and is occasionally met with as a double dulciana of 16 ft. pitch upon the manual, or as a dulciana of 16 ft. pitch upon the pedal organ. Dr. E. J. Hopkins says:—'The dulciana stop was either invented or introduced into this country by Snetzler, who acquired great reputation from the entire success that attended his first public specimen, which forms a portion of the organ erected by him in the year 1754, in St. Margaret's Church, at Lynn, in Norfolk.' T. E.

DULCIMER (Fr. *Tympanon;* Ital. *Cembalo, Timpanon, Salterio tedesco;* Germ. *Hackbrett*).

The prototype of the pianoforte, as the psaltery was of the harpsichord. These instruments were so nearly alike that one description might serve for both, were it not for the different manner of playing them, the strings of the dulcimer being set in vibration by small hammers held in the hands, while in the psaltery the sounds were produced by plectra of ivory, metal, or quill, or even the fingers of the performer. It is also no less desirable to separate in description instruments so nearly resembling each other on account of their ultimate development into the harpsichord and pianoforte by the addition of keys. [See HARPSICHORD, and PIANOFORTE.]

Dr. Rimbault (*Pianoforte*, p. 23) derives dulcimer from 'dulce melos.' Perhaps the 'dulce,'—also used in the old English 'dulsate' and 'dulsacordis,' unknown instruments unless dulcimers—arose from the ability the player had to produce sweet sounds with the softer covered ends of the hammers, just as 'piano' in pianoforte suggests a similar attribute. The Italian 'Salterio tedesco' implies a German derivation for this hammer-psaltery. [See also CEMBALO.] The roughness of description used by mediæval Italians in naming one form of psaltery 'strumento di porco,' pig's head, was adopted by the Germans in their faithful translation 'Schweinskopf,' and in naming a dulcimer 'Hackbrett'—a butcher's board for chopping sausage-meat.



The dulcimer is a trapeze-shaped instrument of not more than three feet in greatest width, composed of a wooden framing enclosing a wrest-plank for the tuning-pins, round which the strings are wound at one end; a sound-board ornamented with two or more sound-holes and carrying two bridges between which are the lengths of wire intended to vibrate; and a hitch-pin block for the attachment of the other ends of the strings. Two, three, four, and sometimes five strings of fine brass or iron wire are grouped for each note. The dulcimer, laid upon a table or frame, is struck with hammers, the heads of which are clothed on either side with hard and soft leather to produce the forte and piano effects. The tone, harsh in the loud playing, is always confused, as there is no damping contrivance to stop the continuance of the sounds when not required. This effect is well imitated in various places in Schubert's 'Divertissement à la Hongroise.' The compass of two or three octaves, from *c* or *d* in the bass clef, has always been diatonic in England, but became chromatic in Germany before the end of the 18th century. English dulcimers have ten long notes of brass wire in unison strings, four or five in number, and ten shorter notes of the same. The first series, struck with hammers to the left of the right-hand bridge, is tuned

the F being natural. The second series, struck to the right of the left-hand bridge, is

the F being again natural. The remainder of the latter series, struck to the left of the left-hand bridge, gives

This tuning has prevailed in other countries, and is old. Chromatic tunings are modern and apparently arbitrary. As in most mediæval musical instruments ornamentation was freely used on the sound-board, and on the outer case when one existed. The dulcimer and psaltery appear to have come to us from the East, it may be through the Crusades, for the dulcimer has been known for ages in Persia and Arabia, and also in the Caucasus, under the name of 'santir.' Its European use is now limited to the semi-oriental gipsy bands in Hungary and Transylvania. The Magyar name is 'cimbalom.' Carl Engel (*Descriptive Catalogue*, 1874) points out the remarkable resemblance between an Italian dulcimer in South Kensington Museum of the 17th century and a modern Georgian santir; and refers to the use by the translators of the English Bible of the word 'dulcimer' as well as of the names of other instruments common in the Elizabethan epoch, to represent Hebrew musical instruments about which we have no sure knowledge. Pantaleon Hebenstreit of Eisleben, a distinguished violin player, became about 1697 a virtuoso upon the dulcimer, which he quadrupled in dimensions, and had constructed as a double hackbrett with two sound-boards, each with its scale of strings—on the one side overspun catgut, on the other, wire. There were 185 strings in all, costing 100 thalers a year to keep in order. With this powerful chromatic instrument, demanding herculean force to play, Hebenstreit travelled to Paris in 1705, where Louis XIV. baptized it with his name, PANTALEON. Kuhnau (in Mattheson's *Critica Musica*, Dec. 8, 1717) praises the instrument and its prerogative over

harpsichords and clavichords in the properties it possessed of piano and forte. It was this, according to Schröter's account, that led him to ponder over a keyed instrument to do the like, and to his notion of a pianoforte. [See CEMBALO, HARPSICHORD, PIANOFORTE, PSALTERY, SCHROETER.] A. J. H.

DULCKEN, MADAME LOUISE, a great pianoforte player, younger sister of Ferdinand David, born at Hamburg, March 20, 1811. She was the pupil of Willy Grund, and made her appearance in public at Hamburg as early as her tenth year. In 1823 she played at Berlin, and in 1825 with her brother at Leipzig, always with the greatest success. In 1828 she married, and left Germany for London, where she resided for the rest of her life. Her first public appearance here was at one of Ella's soirées in 1829. At the Philharmonic she played a concerto of Herz's on March 1, 1830, and thenceforward was one of the most prominent features in the music of London. She was an executive pianist of the first order, with remarkable brilliancy of finger. Her intelligence and general capability were very great. She spoke four languages, and was *au fait* in the literature of Germany, France, Italy, and England. In teaching she was extraordinarily successful, and for her time no teacher could boast so large a number of pupils, at the head of whom was Queen Victoria. In fact she overtaxed her strength, and died in London after a short and severe illness, April 12, 1850. G.

DULICHIUS, PHILIP (1562-1631), was born in Chemnitz in the latter part of 1562. From 1587 he was teacher of music in the Pädagogium at Stettin. He held the degree Ph.D. of Chemnitz. He died March 25, 1631, at Stettin, sixty-eight years old. His compositions seem to have been highly thought of by his contemporaries, although they are practically unknown at the present day. List of works :—

1. Cantiones quinque senis vocibus compositae . . . Philippo Dulichio Chemnicensi Hermunduro, illustris Pedagogii Stetinensis Musico. Stetini. Kelner. 1589. Obl. 4to. Six partbooks in British Museum.

2. Philomusicis omnibus et singulis dominis et amicis suis colendis, hasce quatuor octonarum vocum cantiones sacras consecrat. Stettini. Kellner. 1590. Obl. 4to. Eight partbooks in Rostock Universitätsbibl.

3. Harmoniae aliquot septenis vocibus compositae. (1) Laudate Dominum. (2) Venite ad me. (3) Delectare a Domino. (4) Erravi sicut ovis. (5) Quaerite primum. Authore P.D. Chem. illus. Pedag. Stet. Musico. Stettini. Andreae Kelneri. 1593. With :—

Quatuor Cantionum. P.D. Chem. Four motets for 8 voices. (1) Exaltabo te. (2) Exaltate justi. (3) Confitemini domino. (4) Deus misereatur. Eight partbooks, obl. 4to, in the Zwickau Bibl.

4. Sex cantiones sacrae quinis vocibus concinnatas et in lucem editae studio P.D. Chem. illus. Pedag. apud Stetinenses musici. Stetini. Kelner. 1593. Obl. 4to. Five partbooks in British Museum.

5. Fasciculus novus continens Dicta insigniora ex evangeliis, dierum cum festorum tum Dominicorum, intra Pentecostes et Adventus ferias contentorum desumta et quinarum vocum concentu XII Glareani modis indubitetis attemperato, exornata studio P.D. Chem. Herm. illus. Pedag. quod Stetini est, Musici. Stetini. In officina Kellneriana. 1598. Obl. 4to. Five partbooks in the Brieg Gymnasialbibl. Another edition was published in 1609: . . . ex evangeliis totius anni desumpta quinis vocibus concinenda. Authore P.D. Stetini. 4to.

6. Novum opus musicum duarum partium. Continens dicta . . . tum Dominicorum praecipuorum totius anni, desumta . . . accuratè exornata. In Communem Ecclesiae Dei usum compositum, atq. jam primum editum a P.D. Chem. Herm. illus. Pedag. quod Stetini Pomeraniae est, musico. Stetini. in officina Myliana. 1599. Obl. 4to. Five partbooks in the British Museum. This must have been a rival edition to that of 1598 (No. 5). Another edition was published in Leipzig. 1609. 4to.

7. Hymenaeus VII vocum in solemnia nuptiarum. . . Christophori Albini . . . compositus a P.D. illus. Pädag. Stet. Musico. Stetini. Typis Mylianis. Oct. 14, 1605. 4to. Text: Dilectus meus loquitur. Three partbooks in Breslau Univ. Bibl.

8. Hymenaeus VII vocum solemnibus nuptiarum . . . Guilhelmi Simonis . . . virginem Elisabetham . . . Friderici . . . filiam. Dicatus a P.D. illus. Pedag. Stet. Musico. Stetini. Nov. 18, 1605. Text: Ego flos campi & lilium. Six partbooks in one vol. 4to. in the Zwickau Bibl.

9. Prima pars Centuriae octonum et septenum vocum harmonias sacras laudibus sanctissime triados consecratas continentis accurata diligentia adornata . . . a P.D. Chem. illus. Pedag. Stet. musico. Stetini. Joh. Duberi. 1607. 4to.

10. The same: Seconda pars. Stetini. Myliandrinis. 1608.

11. The same: Tertia pars. Stetini. Myliandrinis. 1610.

12. The same: Quarta pars. Stetini. Kelneriania. 1612. A complete set in eight partbooks of the four volumes is in the Berlin Königl. Bibl. Other editions were published in Leipzig and Danzig in (?) 1608, 1610, 1619.

13. Dictum Psalmi: 30. Stettini. 1611. 4to. Eight partbooks in the Archiv der Marienkirche, Elbing.

14. Primus tomus Centuriae penarum vocum harmonias sacras laudibus sanctissime Triados consecratas continentis. Stettini. Georg. Gretzschii, 1630. 4to. Six partbooks in the Archiv der Marienkirche, Elbing.

Vollhardt (p. 18) mentions the following MS. motets as being in the Zwickau Library: 1. Deus parentum meorum (*a* 8). 2. Quam magnificata sunt (*a* 8). 3. Lobet den Herrn (*a* 8). 4. Siehe wie fein u. lieblich (*a* 8). 5. Deus in adjutorium meum (*a* 8). 6. Ehre sei Gott dem Vater (*a* 7). 7. Zion spricht: der Herr hat mich verlassen (*a* 8). There are two copies of 'Quaerite primum regnum,' *a* 7 voc. in the Breslau Stadtbibl. MS. 30 (Bohn). Dulichius's motet 'Exultate justi in Domino,' *a* 8 voc., was included in the Bodenschatz collection 'Florilegium selectis. cantionum,' Lipsiae, 1603; and again in the 1618 edition. C. S.

DULONG, FRANZ HENRI VON, born Feb. 26, 1861, at Hamm in Westphalia, son of a Government Commissioner of Railways, and great-nephew of Ludwig Dulong, the flautist. In early life he devoted himself to agriculture and the management of his considerable landed property in Germany, but later became a singer. He was taught singing by Robert Emmerich at Stuttgart, by Vannuccini at Florence, and by Blume in London. On Jan. 28, 1895, he made his début at the Popular Concerts, and gained great success for the quality of his beautiful tenor voice, and his exquisitely finished and completely artistic singing. He reappeared at these concerts in February and in the autumn, and on Nov. 7 sang 'Adelaide' at the London Symphony Concerts; he afterwards sang at other London concerts with unvarying success. He had the honour of singing before Queen Victoria at Windsor Castle, having enjoyed the similar honour before the late Empress Frederick and her son the present Emperor of Germany. He reappeared in London, Nov. 9, 1898, at the Curtius Club Concerts, Prince's Galleries, with his wife (see below), and sang in various concerts. They sang again on Jan. 10 and 12, 1903, at the Popular Concerts. His wife,

MAGDA VON DULONG, *née* Zahn, daughter of Dr. A. Zahn, a professor of theology, was born Feb. 29, 1872, at Halle. She was taught singing at Stuttgart by Hromada, and at Berlin by Frau Joachim and Mme. Etelka Gerster; and, under the pseudonym 'Lossen,' made her début in the city last named at a concert given by herself and the soprano Frl. Susanne Treipel.

On Nov. 9, 1898, she made her début in England at the above-mentioned Curtius Concert, and exhibited a well-trained mezzo-soprano voice in Vaccaj's 'Ah se tu dormi,' and other songs. Both these artists are highly considered in their native country. A. C.

DUMKA (pl. Dumky, 'lament'), a term introduced into the terminology of cosmopolitan music by Dvořák, in whose chamber music it is of frequent occurrence as the name of a movement of melancholy character in more or less slow tempo. His op. 90, a trio for piano and strings, is called 'Dumky,' and consists of a series of short movements linked together by a common bond of poignant expression. In a footnote the term is explained as a Little Russian word, occurring frequently in popular literature, and generally indicating a passionately emotional character. M.

DUN, Finlay, born in Aberdeen, Feb. 24, 1795, viola player, teacher of singing, musical editor and composer, in Edinburgh; studied abroad under Baillot, Crescentini, and others, and played first viola in the orchestra of the San Carlo theatre, Naples. He wrote, besides two symphonies (not published), solfeggi, and scale exercises for the voice (1829), edited, with Professor John Thomson, 'Paterson's Collection of Scottish Songs,' and took part also with G. F. Graham and others in writing the pianoforte accompaniments and symphonies for Wood's 'Songs of Scotland'; he was editor also of other Scotch and Gaelic collections. Dun was a master of several living and dead languages, and seems altogether to have been a very accomplished man. He died in Edinburgh, Nov. 28, 1853. W. He.

DUNCAN, William Edmonstoune, born at Sale, Cheshire, in 1866, became an associate of the Royal College of Organists at the age of sixteen, and obtained an open scholarship at the Royal College of Music on the foundation of that institution in 1883. There he studied under Parry and Stanford, and after leaving the college, studied with Macfarren for some little time. He spent ten years in London, acting as musical critic, etc., and has been for some time professor at the Oldham College of Music. The most remarkable of his early compositions was an overture performed at Hampstead in June 1888, op. 4. An ode for chorus and orchestra, 'Ye Mariners of England,' made a great success when given by the Glasgow Choral Union in 1890; a Mass in F minor was composed in 1892; and in the same year an opera 'Perseus,' was written. Swinburne's 'Ode to Music' was set in 1893; and Milton's sonnet 'To a Nightingale,' for soprano solo and orchestra, in 1895. In that year a trio in E minor was given at Oldham, and various other works show untiring ambition and much musical skill. (*Brit. Mus. Biog.*)

DUNI, Egidio Romoaldo, the founder of opéra-comique in France; born at Matera, Naples, Feb. 9, 1709; brought up from his tenth year under Durante at the Conservatorio dei Poveri di Gesù Cristo at Naples. His life was a varied one. At Rome he competed with Pergolesi, and his opera of 'Nerone' was successful, while Pergolesi's 'Olimpiade' was damned. This shows how early and how strong was Duni's gift of melody; for 'Olimpiade' is Pergolesi's *capo d'opera*. A political mission to Vienna gave him the chance of producing his music there. Returning to Naples he wrote 'Artaserse' for San Carlo, with great applause. He then visited Venice, Paris, and London. In London [where some arias were published in 1736,] his health failed, and he was driven to Holland to consult the great Boerhaave; [he entered the University of Leyden in 1738.] Boerhaave cured him, but in returning to Naples he was attacked by brigands, and the fright undid all that the physician had done, and made him a permanent invalid. In 1755 he was called to Parma, as music-master to the Duke's daughter. The court was French, and here at last Duni found his place in life. His first attempt was on Favart's 'Ninette à la Cour,' and it was thoroughly successful. France was evidently his field. To Paris in 1757 he went, and made his début in 'Le Peintre amoureux'; [he was appointed composer to the Infante Don Felipe, and in 1763 is styled 'Pensionnaire de feu S.A.R. Inf.'] He remained in Paris till his death, which took place June 11, 1775, after he had delighted the public with eighteen pieces, full of gaiety and tune. Those in fact are his characteristics. His orchestration is poor, he is often weak in dramatic expression, but he is always charming and always melodious. His pen was taken up by Monsigny, and the opéra-comique was established. [A list of twenty-two operas is given in the *Quellen-Lexikon*, which also mentions an oratorio 'Giuseppe riconosciuto,' and other sacred music.] G.

DUNKLEY, Ferdinand Luis, born in London, July 16, 1869. He was at first a pupil of G. A. Higgs, and subsequently, in 1885-86, studied at Trinity College, London, obtaining a scholarship at the Royal College of Music in 1886, and studying there under Parry and others. He became a Fellow of the Royal College of Organists in 1886. He held the post of organist successively at St. Jude's, E.C., 1885-87, and of St. Aubyn's, S.E., 1888-93; he was director of the music at the Battersea Grammar School in 1892 and 1893, and in the latter year was appointed Professor of Music at St. Agnes's School, Albany, U.S.A. He was organist of State Street Presbyterian Church at Albany in 1894-96, and was appointed in 1897 organist at Trinity Church in the same city. An orchestral suite gained the prize of fifty guineas offered by the directors of the Promenade Concerts, and was performed there in

1889. His setting of 'The Wreck of the Hesperus,' for solos, chorus, and orchestra, was performed at the Crystal Palace, April 7, 1894; and he has written numerous smaller works which have obtained celebrity. (*Brit. Mus. Biog.*; Baker's *Biog. Dict. of Musicians.*)

DUNSTABLE,[1] JOHN, musician, mathematician, and astrologer, has generally been said to be a native of Dunstable, in Bedfordshire. For this there is no authority, and the evidence of his bearing the same name as that of the town is of no weight so late as the 15th century. On March 16, 1449, the manor of Broadfield, Herts, was conveyed to a John Dunstable, Margaret his wife, and others (Chauncey, *Antiquities of Hertfordshire*, 1700, p. 72), and it is not impossible that this was the musician. The owner of Broadfield might well have been acquainted with the Abbot of St. Albans, in the same county, and that John Whethamstede (Abbot from 1420 to 1440 and again from 1451 to 1465) personally knew Dunstable the musician may be gathered from the epitaph printed below. Another John Dunstable, a goldsmith and citizen of London, mentioned in the Patent Rolls (1 Edw. IV. *Calendar*, p. 6) was living in 1461, and therefore cannot have been the musician. Of Dunstable's life absolutely nothing is known, but he has long enjoyed a shadowy celebrity as a musician, mainly owing to a passage in the Prohemium to the *Proportionale* of Johannes Tinctoris (1445-1511). The author, after mentioning how the institution of Royal choirs or chapels encouraged the study of music, proceeds; 'Quo fit ut hac tempestate, facultas nostrae musices tam mirabile susceperit incrementum quod ars nova esse videatur, cujus, ut ita dicam, novae artis fons et origo, apud Anglicos quorum caput Dunstaple exstitit, fuisse perhibetur, et huic contemporanei fuerunt in Gallia Dufay et Binchois quibus immediate successerunt moderni Okeghem, Busnois, Regis et Caron, omnium quos audiverim in compositione praestantissimi. Haec eis Anglici nunc (licet vulgariter jubilare, Gallici vero cantare dicuntur) veniunt conferendi. Illi etenim in dies novos cantus novissime inveniunt, ac isti (quod miserrimi signum est ingenii) una semper et eadem compositione utuntur.' (Coussemaker, *Scriptores*, vol. iv. p. 154.) Ambros (*Geschichte der Musik*, vol. ii. pp. 470-1) has shown conclusively how this passage has been gradually misconstrued by subsequent writers, beginning with Sebald Heyden in his *De Arte Canendi* (1540), until it was boldly affirmed that Dunstable was the inventor of Counterpoint! Ambros also traces a still more absurd mistake, by which Dunstable was changed into S. Dunstan; this was the invention of Franz Lustig, who was followed by Printz, Marpurg, and other writers. It might have been considered that the claim of any individual to be the 'inventor' of Counterpoint would need no refutation. Counterpoint, like most other branches of musical science, can have been the invention of no single man, but the gradual result of the experiments of many. Tinctoris himself does not claim for Dunstable the position which later writers wrongly gave him. It will be noticed that the 'fons et origo' of the art is said to have been in England, where Dunstable was the chief musician; and though Tinctoris is speaking merely from hearsay, yet there is nothing in his statement so incredible as some foreign writers seem to think. So long as the evidence of the Rota 'Sumer is y-cumen in' is unimpeached, it must be acknowledged that there was in England, in the early 13th century, a school of musicians which was in advance of anything possessed by the Netherlands at the same period. Fortunately the evidence for the date of the 'Rota' is so strong that it cannot be damaged by statements of historians who either ascribe it to the 15th century or ignore it altogether. An important light was thrown upon the relation of Dunstable to the Netherlandish musicians, Dufay and Binchois, by the discovery (*Monatshefte für Musikgeschichte*, 1884, p. 26) that Dufay died in 1474, and not, as had been hitherto supposed, some twenty years before Dunstable. Binchois did not die until 1460, so it is clear that, though the three musicians were for a time contemporaries, yet Tinctoris was right in classing the Englishman as the head of a school which actually preceded the Netherlanders and Burgundians.

Dunstable's fame was certainly great, though short-lived. He is mentioned as early as 1437, in *Le Champion des Dames* of Martin Le Franc, and in two other treatises of Tinctoris, the *De Arte Contrapuncti*, and the *Complexus Viginti Effectuum Nobilis Artis Musices*; in a MS. preserved in the Escorial (c. iii. 23), written at Seville in 1480 (J. F. Riaño, *Notes on Early Spanish Music*, p. 65), the *Dialogus in Arte Contrapuncti* of John Hothby (Coussemaker, *Scriptores*, iii. xxxi.), in the *Déploration de Guillaume Crétin sur le trépas de Jean Okeghem* (Thoinan's ed., Paris, 1864, p. 33), and by Franchinus Gaforius, who in Book ii. cap. 7 of his *Practica Musicae* (Milan, 1496) gives the tenor of a setting of 'Veni Sancte Spiritus' by the English composer.[2] Yet he was—in his own country at least—so soon forgotten, that his name does not occur in Bale's *Scriptores Britanniae* (1550), and Morley (*Introduction*, ed. 1597, p. 178) quotes a passage from his motet 'Nesciens virgo mater virum' (no longer in existence), in which he has divided the middle of the word 'Angelorum' by a pause two Long rests in length, as an example of 'one of the greatest absurdities which I have seene committed in the dittying of musick.' The passage is doubtless absurd to modern ideas: but Dunstable's fault was not considered such at the time he wrote. Similar passages occur as late as Josquin's days.

[1] The name is spelt by early authors Dunstaple.

[2] See also Book III. cap. 4 of the same work.

The main difficulty of determining what ground there was for Dunstable's fame lay in the fact that up to the end of the 19th century very little of his work had been discovered or made accessible. Gaforius evidently was acquainted with a treatise by him, and the same work is quoted by Ravenscroft, from a marginal note in whose *Briefe Discourse* (1614) we learn that Dunstable's treatise was on 'Mensurabilis Musica.' Until comparatively recent days it was thought that the fragments printed by Gaforius and Morley were all that remained of his works. But more than this has been preserved. A three-part song, 'O Rosa bella,' was discovered in a MS. at the Vatican by MM. Danjou and Morelot (*Revue de la Musique Religieuse* 1847, p. 244), and another copy was subsequently found in a MS. collection of motets, etc., at Dijon. This composition has been scored by M. Morelot, and printed in his monograph *De la Musique au XVe Siècle.* It may also be found in the appendix to the second volume of Ambros's *Geschichte der Musik.* Its effect in performance, considering the period when it was written, is really extraordinary, and quite equal to anything of Dufay's. Besides these compositions the British Museum possesses three specimens of Dunstable's work. The first is apparently an enigma which has not yet been deciphered. It occurs in a MS. collection of Treatises on Music (Add. MS. 10,336), transcribed by John Tuck at the beginning of the 16th century. Owing to its being written at the end of fol. 18, and signed 'Qd. Dunstable,' an idea has arisen that it forms part of the preceding treatise, which has therefore been sometimes alleged to be the lost treatise; but this is not the case, for the treatise, as Coussemaker has shown, is that which is nearly always ascribed to John de Muris, and Dunstable's enigma is evidently written in to fill up the page. In a similar and almost identical MS. at Lambeth, transcribed by William Chelle of Hereford, the treatise of de Muris and enigma of Dunstable occur in the same juxtaposition. The second composition of Dunstable's in the British Museum is to be found in a magnificent volume which formerly belonged to Henry VIII. (Add. MS. 31,922). It is a three-part composition of some length, without words: the tenor consists of a short phrase which is repeated in accordance with the Latin couplet written over the part. It has been scored by Mr. J. F. R. Stainer, and is printed in the *Sammelbände* of the *Int. Mus. Ges.* vol. ii. pp. 14, 15. The third composition is a Kyrie (Lansd. MS. 462, fol. 152), different from the one catalogued in the article just mentioned.

But by far the most valuable collections of Dunstable's works are to be found in six volumes of manuscript music discovered at Trent by Dr. Haberl, and now belonging to the Ministry for Religion and Education at Vienna; in a volume in the Estensian Library at Modena (Cod. vi. H. 15); and a MS. (Cod. 37) in the Liceo Musicale of Bologna. The Trent MSS. are now (1904) being edited and published by the Gesellschaft zur Herausgabe der Tonkunst in Oesterreich (see DENKMÄLER). Two volumes have already appeared, the first of which contains a thematic index of the whole collection, besides eleven compositions by or ascribed to Dunstable. The Modena MS. contains thirty-one motets by Dunstable; copies of these (made by the writer of this article in 1892), together with collations and copies from the Trent and Bologna MSS., are now in the British Museum (Add. MS. 36,490). The motets at Bologna were issued in facsimile in the volume of *Early English Harmony* by the Plain-song and Mediæval Music Society in 1897. In the MS. at Old Hall (Catholic College of St. Edmund's), near Ware, No. 63 is a four-part setting of 'Veni Sancte Spiritus,' by Dunstable (see *Sammelbände* of the *Int. Mus. Ges.* vol. ii. pp. 342, etc.). In addition to these may be mentioned a MS. collection of 15th-century Astronomical Treatises in the Bodleian at Oxford, which contains at p. 74, 'Longitudo et latitudo locorum praecipue in Anglia, secundum aliam antiquam scripturam de manu Dustapli.' At the bottom of the margin of the page the date occurs: 'Anno Gratiæ 1438 die mensis Aprilis.' A valuable contribution to our knowledge of Dunstable is the article *Dunstable and the various settings of O Rosa Bella* in the *Sammelbände* of the *Int. Mus. Ges.* vol. ii. p. 1. This article contains the most complete catalogue yet made (thematic) of the works of Dunstable now known to exist.[1]

As yet a very small proportion of these compositions has been deciphered and scored, and though it is hardly enough to enable us to judge how well founded Dunstable's reputation was, yet it is enough to show that for his time he was a man of remarkable power. Dunstable died on Dec. 24, 1453 (according to one version of the epitaph printed below), and was buried in St. Stephen's, Walbrook, where, according to Stow,[2] the following epitaph was inscribed on 'two faire plated stones in the Chancell, each by other.' It runs as follows:—

Clauditur hoc tumulo, qui cœlum pectore clausit
Dunstaple I. juris Astrorum conscius illo
Judice novit Hiramis abscondita pandere cœli.
Hic vir erat tua laus, tua lux, tibi musica princeps,
Quique tuas dulces par mundum sperserat onus,[3]
Anno Mil. Equater,[4] semel L. trias jungito Christi.
Pridie natale sidus[5] transmigrat ad astra,
Suscipiant proprium civem cœli sibi cives.[6]

[1] In the Introduction to *English Carols of the Fifteenth Century* (1891), the editor remarked on the similarity of certain turns of phrase in the carols to the known works of Dunstable. Mr. Henry Davey, in his *History of English Music* (1895), improves this into the statement that 'both words and music of the carols are probably by Dunstable or Power.' This in turn is copied by Dr. Eitner, who includes these thirteen carols among the list of Dunstable's works in the *Quellen-Lexikon.*

[2] Stow's *Survey*, 1618, p. 425.

[3] 'Sparserat artes' (Fuller).

[4] *i.e.* 'C quater.'

[5] *Qu.* 'natales idus.'

[6] The Incorporated Society of Musicians is about to re-erect the monument in St. Stephen's, Walbrook, and to restore the inscrip-

Another epitaph is preserved in Weever's *Funeral Monuments* (1631), where it is quoted from a MS. in the Cottonian Library, containing a number of poetical epitaphs written by John of Whethamstede, Abbot of St. Albans :—

Upon John Dunstable, an astrologian, a mathematician, a musitian, and what not.

Musicus hic Michalus alter, novus et Ptholomeus,
Junior ac Athlas supportans robore celos,
Pausat sub cinere ; melior vir de muliere
Nunquam natus erat ; vicii quia labe carebat,
Et virtutis opes possedit unicus omnes.
Cur exoptetur, sic optandoque precetur
Perpetuis annis celebretur fama Johannis
Dunstapil ; in pace requiescat et hic sine fine.

Appended is an example of Dunstable's work. W. B. S.

tion from the version given by Stow. The text is evidently corrupt, and the following is the text of the restored epitaph :—

Clauditur hoc tumulo qui cœlum pectore clausit
Dunstaple Joannes. Astrorum conscius ille
Indice novit Urania abscondita pandere cœli.
Hic vir erat tua laus, tua lux, tibi musica princeps,
Quique tuas dulces per mundum sparserat artes.
Anno Mil C. quater semel L. tria jungito Christi
Pridie natalem, sidus transmigrat ad astra.
Suscipiant proprium civem cœli sibi cives.

DUO. See Duet.

DUODRAMA. A kind of melodrama, of which Mozart speaks with enthusiasm and at some length in letters to his father from Mannheim and Kaisersheim in the end of 1778. The name would indicate a piece for two performers; and those which he heard—Benda's 'Medea' and 'Ariadne auf Naxos'—and that which he contemplated writing himself—'Semiramis'—appear to have been pieces in which spoken dialogue was accompanied by the orchestra, as in Mendelssohn's 'Midsummer Night's Dream' and other pieces, and those called 'Melodram.' 'Not a note is sung,' says he, 'only spoken; in fact it is a recitative with instruments, only the actor speaks instead of singing' (Letter 120). There is no trace of 'Semiramis' having been composed, but Mozart acted on the idea in 'Zaide' (1780), which contains two long monologues treated *en mélodrame*. G.

DUPARC, Elisabeth. See Francesina.

DUPARC, Henri, French composer, born in Paris in 1848, was educated at the Jesuit College of Vaugirard, and after passing his legal examinations, studied the piano and composition with César Franck (from 1872 to 1875). Possessed of a rare power of self-criticism, Duparc has destroyed many compositions of value; among those which remain a symphonic poem, 'Lénore,' performed at the Concert Populaire, Oct. 28, 1877, is the most important work. It was arranged for two pianos and for four hands on one piano by Saint-Saëns and Franck respectively. A few songs (three of which have orchestral accompaniment), include examples, such as 'Phydilé,' 'Invitation au voyage,' and 'Extase,' which are among the most perfect things of their kind produced by the modern French school. Duparc has been compelled by severe illness to give up all composition since 1889. G. F.

DUPONT, Auguste, born at Ensival near Liège, Feb. 9, 1827, was educated at the Liège Conservatoire, and after several years spent in successful travel as a pianist was appointed in 1850 a professor of the Brussels Conservatoire. His works for the pianoforte are numerous, and show a thorough knowledge of the instrument. They are cast in a popular mould, and may be said to belong to the class of drawing-room music, but they are free from all that is meretricious. A 'Concertstück' (op. 42) and a Concerto in F minor (op. 49) both with orchestral accompaniment, are his most ambitious works. Among his solo pieces the best are 'Roman en dix pages' (op. 48), a set of short pieces showing the influence of Schumann in their structure, and 'Contes du Foyer' (op. 12). A set of songs called 'Poème d'amour,' contains much that is pleasing and original. He died at Brussels, Dec. 17, 1890. His younger brother,

Joseph, born at Ensival, Jan. 3, 1838, educated at Liège and Brussels, attained great distinction as an operatic conductor. He held

posts of this kind successively at Warsaw (from 1867), Moscow (from 1871), and Brussels, where he was professor of harmony at the Conservatoire, and conductor at the Théâtre de la Monnaie, and at the Association des Artistes Musiciens from 1872. In the following year he succeeded Vieuxtemps as director of the Concerts Populaires. During the final seasons of Gye's management of Italian Opera, M. Dupont conducted many of the most important performances given at Covent Garden. He died at Brussels, Dec. 22, 1899. M.

DUPORT. Two eminent violoncellists, brothers.

1. JEAN PIERRE—'Duport l'aîné'—born at Paris, Nov. 27, 1741. Considered the best pupil of Berthaut. Soon achieved a great reputation in Paris, but after ten years of success started on a lengthened tour through England and Spain, and finally in 1773, on the invitation of Frederick the Great, settled at Berlin as first violoncello in the king's band, and after Frederick's death director of Court concerts. After the battle of Jena, his post was abolished, but he continued to live at Berlin till his death, Dec. 31, 1818. His publications are few and unimportant.

2. He was eclipsed by his brother, JEAN LOUIS, also born at Paris, Oct. 4, 1749. His fame, like his brother's, came early (he made his début at the Concert Spirituel in 1768), but it was the arrival of Viotti in Paris in 1782 that inspired him to imitate the breadth and brilliancy of style of that great violinist, and thus to become the extraordinary player he was. About this time he made the acquaintance of Crosdill, and at his invitation visited London for six months. On the breaking out of the Revolution he joined his brother in Berlin, and entered the king's band. At that time he had the reputation of being one of the first violoncello players of the day, and was much visited and sought after. He had not the force and execution of Romberg, but in tone and style was unrivalled. It was either with him or his brother—probably with him—that Beethoven played his two sonatas for piano and violoncello (op. 5) at the Prussian Court in 1796. Duport returned to Paris in 1806 ruined by the war. Though his playing was as fine as it had ever been, he had great difficulty in obtaining employment. He entered the service of the ex-King of Spain at Marseilles, but returned to Paris in 1812. At length fortune smiled on him, he was admitted into the private band of Marie Louise, then into that of the Emperor, and at length as professor into the Conservatoire, until its suppression in 1815. In the evening of his life he composed a great deal, but the work by which he will survive is his 'Essai sur le doigter du violoncelle et la conduite de l'archet, avec une suite d'exercices.' A sentence from this work exhibits the modesty of a great artist. 'Tout le monde connoît le coup d'archet martelé ou staccato; c'est une affaire de tacte et d'adresse. Il y a des personnes qui le saisissent tout de suite, d'autres ne parviennent jamais à le faire parfaitement. *Je suis du nombre*' (p. 171). [He is considered as the originator of the modern technique of his instrument, and particularly of the practice of placing the thumb upon the strings.] His violoncello became the property of Franchomme, who purchased it for the enormous sum of 25,000 francs (£1000). He died at Paris, Sept. 7, 1819. G.

DUPREZ, GILBERT, the thirteenth of the twenty-two children of a Paris perfumer, was born Dec. 6, 1806. [His first appearance was in 1820 as a boy treble in the incidental music to *Athalie*, composed by Fétis, and produced at the Comédie Française.] Having completed his studies under Choron at the Conservatoire, he made his début (Dec. 1825) as tenor at the Odéon, where Castil-Blaze was producing his translations of the favourite operas of Rossini and Weber. His success was not great, and when the theatre closed in 1828 he went to Italy. At first he attracted little attention; but having altered his style and adopted the 'voix sombrée' he became speedily popular, and by his creation of the part of Edgardo in 'Lucia di Lammermoor' (Naples, 1835) placed himself at the head of the French dramatic singers of his time. He was engaged for the Grand Opéra in Paris, and made his first appearance (April 17, 1837) in 'Guillaume Tell,' when his novel and striking reading of his part contributed greatly to the success of the revival. During the eight years he remained at this theatre he created the principal tenor parts in 'Guido et Ginevra,' 'Benvenuto Cellini,' 'Le Lac des fées,' 'Les Martyrs,' 'La Favorite,' 'La Reine de Chypre,' 'Charles VII.,' 'Dom Sébastien,' 'Otello,' 'Lucie,' and 'Jérusalem' (a translation of 'I Lombardi'), as well as playing the parts created by Nourrit in 'La Muette,' 'Robert,' 'La Juive,' 'Les Huguenots,' and 'Stradella.' His physical appearance was against him, and he had a propensity to over-gesticulation; but in spite of these defects he made his way as a tragedian, and was frantically applauded for his excellent declamation and the smoothness of his 'canto spianato.' His two most serious faults, the abuse of the notes 'sombrées,' so prematurely wearing to the voice, and a habit of dragging the time, which is as fatal to the interests of the composer as it is to all artistic interpretation, have materially affected French singing to the present day. Duprez was professor of singing at the Conservatoire from 1842 to 1850, and in 1853 founded an 'École spéciale de chant,' which still exists, and has turned out many dramatic singers. He composed an oratorio, 'The Last Judgment,' a Requiem, and other sacred works, romances, chamber music, two masses, and eight operas, of which the best are 'Joanita' (1848); 'La lettre au bon Dieu' (1851); and 'Jeanne d'Arc'

(1857) though none of the eight have any originality. He also published *L'Art du chant* (1845) and *La Mélodie* (1873), two Methods which deserve to be better known. [His *Souvenirs d'un Chanteur* (1888) and *Récréations de mon grand âge* are very interesting. He died at Passy, Sept. 23, 1896.] G. C.

DUPUIS, THOMAS SANDERS, Mus.Doc., was born in London of French parents, Nov. 5, 1733. He received his early musical education as a chorister of the Chapel Royal under Bernard Gates, and subsequently became a pupil of John Travers, then one of the organists of the Chapel Royal. [He was elected a member of the Royal Society of Musicians on Dec. 3, 1758. In 1773 or earlier he was organist of the Charlotte Street Chapel, near Buckingham Palace.] On the death of Dr. Boyce, in 1779, Dupuis was appointed his successor as organist of the Chapel Royal. On June 26, 1790, he accumulated the degrees of Bachelor and Doctor of Music at Oxford. [He died from an overdose of opium, at his house in King's Row, Park Lane, July 17, 1796. (West's *Cathedral Organists.*) He was buried on the 24th in the west cloister of Westminster Abbey. *Dict. of Nat. Biog.*] He published during his lifetime several sonatas and concertos for the pianoforte, some organ pieces, chants, anthems, and glees. In the year after his death a selection from his cathedral music was published under the editorship of John Spencer, one of his pupils, to which his portrait is prefixed. Dupuis was one of the best organists of his time. W. H. H.

DUR. German for 'major' in reference to keys; the equivalent of 'minor' is 'moll.' The use of the Latin term *durum* and *molle*, from which these are derived, is explained under ACCIDENTALS, p. 19.

DURAND, A., ET FILS, French music publishers, are the present representatives of the firm of Flaxland, founded in 1847, and continued from 1870 to 1891 as Durand et Schoenewerk. MM. A. Durand are the publishers of nearly all the works of Saint-Saëns, and of many of Lalo, Massenet, Widor, Fauré, Franck, Bizet, Castillon, and more recently of Vincent d'Indy, Chausson, Dukas, Debussy, Ropartz, etc. They have also published French editions of 'Lohengrin,' 'Tannhäuser,' and the 'Flying Dutchman' of Wagner; and have undertaken a complete critical edition of Rameau, under the direction of Saint-Saëns, provided with bibliographical information by M. Ch. Malherbe, the archiviste and librarian of the Opéra. L. Diémer's series of *Clavecinistes Français;* Th. de Lajarte's *Airs à Danser* (from French operas of the 17th and 18th centuries); an album of *Chansons populaires du Vivarais* noted by Vincent d'Indy; the well-known *Échos du temps passé* (ed. by Weckerlin); collections of airs of different countries; the valuable collection of motets, etc., published under the title *Échos du monde religieux*; have also been issued by this firm, as well as numerous methods, and treatises in every branch of musical knowledge. G. F.

DURAND, *alias* DURANOWSKY, AUGUSTE FRÉDÉRIC, violin player, born at Warsaw about 1770. After having received his first instruction on the violin from his father, a musician at the court of the king of Poland, he was sent in 1787 to Paris by a nobleman. Here he studied under Viotti, but appears not so much to have adopted the style of his master, as to have followed the bent of his own talent for the execution of technical *tours de force*. [In 1790 he was first violin at the Brussels opera.] In 1794 and 1795 he travelled in Germany and Italy, meeting everywhere with great success. Suddenly however, discarding the violin, he entered the French army, and became adjutant to one of the generals. Owing to some misconduct he was imprisoned at Milan, and had to quit the service. He then returned to the violin, and till 1814 led an unsettled life in Germany, continually changing his abode. He finally settled at Strasburg as leader of the band, and was living there in 1834. The date of his death is not known.

According to Fétis, Paganini confessed that his peculiar style and many of his most brilliant and popular effects were to a considerable degree derived from Durand, whom he had heard when young. There can be no doubt that Durand's technical skill was extraordinary and his treatment of the violin full of originality. The full development of his talent appears however to have been impeded by his irregular habits of life. It is amongst other things related that he often had no violin of his own, and would play in public on any instrument he could get hold of, however bad. His composition—concertos, airs variés, and a number of smaller pieces for the violin—show him to have been but an indifferent musician. P. D.

DURANTE, FRANCESCO, born March 15, 1684, at Frattamaggiore near Naples, was a pupil of the Conservatorio dei Poveri di Gesù Cristo under Gaetano Greco, and subsequently of the Conservatorio di San Onofrio under Alessandro Scarlatti. He is generally supposed to have gone to Rome, and studied there under Pitoni and Pasquini; but documentary evidence for this statement is not forthcoming, although the influence of Roman composers is to be traced in his fondness for sacred composition. He is said to have succeeded Scarlatti as head of the Conservatorio San Onofrio and to have exchanged this post for that of head of the Conservatorio di Santa Maria di Loreto, in 1742. All the authorities are in agreement as to his dates of birth and death, the latter taking place on August 13, 1755, at Naples. Considering the high esteem in which he was held by his contemporaries, and the fact that his pupils included many of the most distinguished of the Italian composers, such as Traetta, Vinci, Jommelli,

Piccinni, Sacchini, Pergolesi, and Paisiello, it seems strange that none of his music should have been printed in his lifetime, except six harpsichord sonatas. A copy is in the British Museum, and the sonatas are reprinted in Farrenc's *Trésor des Pianistes*, livr. 1. The Royal Library at Berlin, the Paris Conservatoire, the Liceo Musicale of Bologna, the Royal Library at Dresden, the British Museum, the Royal College of Music, the Real Collegio di Musica at Naples, and the Court Library at Vienna, are the richest in collections of Durante's MSS. The assumption that he held the post of maestro di musica at the court of Naples during the last ten years of his life, appears to rest on the title of a five-part offertorium, 'Protexisti me, Deus,' which in several copies is headed 'Concorso fatto per la real capella di Napoli, a 21 April 1745.' In the libraries already mentioned, and elsewhere, there are a great number of masses, motets, psalms, and other church compositions (for list see the *Quellen-Lexikon*); among modern publications of his works specimens are to be found in Commer's *Musica Sacra*, Rochlitz's *Sammlung*, Novello's *Fitzwilliam Music*, etc. The libretti of two oratorios, 'Abigaile' (1740) and 'S. Antonio di Padova' (1755), are in the Liceo Musicale of Bologna, but the music is not known to exist. Nor is the source of the song, 'Danza, fanciulla,' by which Durante's name is best known to modern musicians, given in any edition of it. He seems to have combined the severe style of the Roman school with the melodic instinct of the Neapolitans, and it is interesting to see in many of his works the first traces of a practice which in the hands of his successors became a mere mannerism; the practice, namely, of treating two soprano parts with interwoven figures and ornamentation above the groundwork of the other parts. (See the writer's *Age of Bach and Handel* (*Oxford History of Music*), pp. 61-64, etc.) In the *Voyages d'un Français en Italie* (by J. J. Le Français de Lalande, 1769) Durante is mentioned as 'plus savant qu'eux tous en harmonie,' referring of course only to the Neapolitan school of composers. M.

DURASTANTI, MARGHERITA, a prima donna at the King's Theatre in the Haymarket, during Handel's management. She was born about 1695, and, like Senesino, was engaged from the Dresden Theatre. She was a married woman when she came here, and the following quotation from the *Evening Post* of March 7, 1721, shows that she soon acquired favour at court:—'Last Thursday, his Majesty was pleased to stand godfather, and the Princess and Lady Bruce godmothers to a daughter of Mrs. Durastanti, chief singer in the Opera-house. The Marquis Visconti for the King, and the Lady Litchfield for the Princess.' This was so unusual a favour, that it seems likely that either she or her husband was of a noble family. She had already appeared in 1720 in company with Senesino. Her popularity continued: in 1721 she played the principal female parts in 'Muzio Scevola'; in 'Arsace'; and in 'Odio e l'amore,' probably a pasticcio. On Jan. 12, 1723, the 'Otho,' or 'Ottone,' of Handel was produced, and Durastanti played Gismonda, but a formidable rival had appeared in Cuzzoni, who sang the principal part of Theophane. Durastanti, however, continued to sing through this and the next season, in spite of Cuzzoni, and performed in 'Flavio,' 'Coriolano,' 'Erminia,' and 'Farnace.' In 1724 she played Sesto in 'Giulio Cesare,' and appeared also in 'Calfurnia' and 'Vespasiano.' She took her leave of the public at her farewell performance in 'Calfurnia,' in a song written by Pope for her—some say at the desire of her patron the Earl of Peterborough—which ended with this couplet,

> But let old charmers yield to new;
> Happy soil, adieu, adieu!

If she understood the meaning of the words, her modesty was astonishing, and sets a brilliant example to all singers. Durastanti returned to London in 1733, in company with Carestini, Scalzi, and the two sisters Negri, to help Handel to withstand the opposition of Cuzzoni and Farinelli at the other house. Against old Porpora, their composer in ordinary, Handel was strong enough to put on a bold front; not so his singers against the company commanded by Porpora. On Jan. 26, 1734, Handel produced his 'Ariadne,' on March 11 'Parnasso in Festa,' and subsequently a revival of 'Ottone'; in all which Durastanti took her part. She never appeared again in England, nor is she mentioned as having appeared subsequently on any other stage. She seems to have been an estimable and faithful artist, and her popularity in London only yielded, as it might well do, to the exceptional powers of Cuzzoni. J. M.

DURCHCOMPONIRT (Germ., 'through-composed'); a term used of songs with different music for each stanza, and so distinguished from those which repeat the same music for all the verses, in what is called 'strophic' form.

DURCHFÜHRUNG — leading through, or taking through. *Durchführungsatz* is the German term for that portion of the first movement of a sonata or symphony—or other movement in similar form—which occurs between the double-bar and the reprise of the first subject; and in which the materials of the previous portion—with or without episodes, or other fresh matter—are led through such changes and varieties of treatment and contrivance as the genius and knowledge of the composer may dictate. In England this portion used to be called the 'free fantasia'—surely an unfortunate name, as 'fantasia' suggests rather an entire movement than a part of one. The more appropriate term 'working-out' is now more generally used. The word Durchführung is also used of the 'exposition' of a fugue. [FORM.]

D'URFEY, THOMAS, the grandson of a French Huguenot, who fled from Rochelle before the siege in 1628 and settled at Exeter, was born [in 1653, his mother being of the family of the Marmions of Huntingdonshire] in Exeter. He was educated for the law, but abandoned that profession for poetry and the drama. Between 1676 [when his 'Siege of Memphis' was given at the King's Theatre] and his death, he produced upwards of thirty plays, which were at first very popular, but were in the course of a few years afterwards banished from the stage on account of their licentiousness and indecency. The songs in a few of them still survive, being preserved through having had the good fortune to be allied to the music of Henry Purcell. These are in *A Fool's Preferment,* 1688 ; *Bussy d'Amboise,* 1691 ; *The Richmond Heiress,* 1693 ; and the three parts of *Don Quixote,* 1694-95. His comic opera, 'Wonders in the Sun,' 1706, was set by Giovanni Baptista Draghi. Much of his fame was owing to his songs and to the lively manner in which he himself sang them, which procured him the favour of Charles II., William III., and Queen Anne. In this he resembled Tom Moore, and like him he was particularly apt at adapting his verses to existing music. He published, between 1683 and 1685, three collections of songs written by himself, and set to music by the best composers of the period. [His connection with the early edition of the celebrated collection of songs called 'Wit and Mirth ; or, Pills to purge Melancholy,' is uncertain. Editions of this range from 1682 to 1720 ; that with the airs first appeared in two vols. in 1698-99, and the number of volumes increases with almost every edition. The dates of these later ones are 1707-1712, 1714, and 1719, when it had reached five volumes 12mo. In 1720 a sixth was added. These six volumes were recently reprinted. In the musical part he appears to have had the assistance of John Lenton. The collection is disfigured with the grossest obscenity, but it is valuable for its important bearing on vocal music of the period, and for the many early airs that it contains]. D'Urfey wrote several of the birthday and New Year's odes which were set to music by Purcell and Blow, and supplied the former with the words for his fine ode known as 'The Yorkshire Feast Song.' In the latter part of his life he was reduced to great distress, from which he was relieved by the profits of a performance of his own comedy 'The Fond Husband ; or, The Plotting Sisters,' which the managers of the theatre generously gave for his benefit on June 15, 1713. D'Urfey died Feb. 26, 1723, and was buried at St. James's, Piccadilly, where, against the outer south wall of the tower of the church, may be seen a tablet with the simple inscription, 'Tom D'Urfey, Dyed Febry ye 26, 1723.' W. H. H. ; additions by F. K.

DUSCHEK (DUSSEK), FRANZ, valued pianoforte teacher, performer, and composer, born Dec. 8, 1736, at Chotieboř in Bohemia. Count von Spork had him educated in the Jesuits' seminary at Königgratz, but after a fall which crippled him for life he gave up other studies and devoted himself to music. His patron sent him first to Prague and then to Vienna, where, under Wagenseil's instruction, he became an excellent pianist. On his return to Prague, he soon had numerous pupils, and exercised a powerful influence on the taste of his time. He died at Prague, Feb. 12, 1799. Reichardt, in his *Briefe* (i. 116), speaks of him as one of the best pianists of that time (1773), 'who, besides his excellent reading of Bach, possesses a peculiarly pleasing and brilliant style of his own.' Among his best pupils may be numbered L. Kozeluch, Maschek, Wittassek, von Nostiz, and his own wife Josepha. He was also esteemed as a composer of symphonies, quartets, trios, pianoforte concertos, sonatas, Lieder, etc., of which only a small part were published. In his compositions is reflected the gentleness of character which made him universally beloved. He was a kind-hearted man, and all artists, whether his own countrymen or foreigners, were sure of a kind reception at his house. His friendship with Mozart is well known, and it was in his villa and garden near Prague that the great composer put the finishing touches to the score of 'Don Giovanni.' In this very villa Bertramka, at Koschirz near Prague, the present proprietor erected a bust of Mozart, which was solemnly unveiled on June 3, 1876. For further particulars of both husband and wife see Jahn's *Mozart ; Jahrbuch der Tonkunst von Wien und Prag,* 1796 ; Cramer's *Magazin für Musik ;* and Mozart's *Letters,* edited by Nohl.

His wife JOSEPHA, a celebrated singer, whose maiden name was HAMBACHER, was born at Prague, 1756, and died there at an advanced age. Her husband taught her music, and she became a good pianist and composer, but above all a fine singer. Her voice was full and round, and according to Reichardt she sang with great expression, especially in recitative. She executed the most difficult bravura passages with ease, had a good *portamento,* and united grace and expression with force and fire. Mozart's father, however, was of a different opinion, as appears from a letter to his daughter (April 1786), whilst Schiller and Körner have recorded their unfavourable impression of her—the latter specially denying that she had expression (Schiller, *Briefwechsel mit Körner,* i. pp. 280, 294). Mozart, from his first acquaintance with her in Salzburg in 1777, looked upon her as a true and sympathising friend, and wrote for her (Nov. 3, 1787) at Prague the concert-aria 'Bella mia fiamma' (Köchel, No. 528). She sang at Vienna, Berlin, Weimar, Leipzig, and Dresden, where the Elector had her portrait painted life-size (1787). On her first visit with her husband to Vienna (March and April, 1786),

they gave no public performance, but were often invited to the houses of the aristocracy, especially to Prince Paar's, where Josepha sang with great success. They witnessed the downfall of the intrigues against the first representation of Mozart's 'Figaro' in Vienna, and it was their partisanship and enthusiastic admiration of the work which prepared the way for its brilliant reception in Prague on Oct. 14, and that of 'Don Giovanni' on Oct. 29, 1787. Beethoven was at Prague early in 1796, and wrote his 'Ah perfido!' there; and as it was first sung by Madame Duschek on Nov. 21 of that year, we may infer that he composed it for her. On her second visit to Vienna, Madame Duschek gave a concert at the Jahn'sche Saal (March 29, 1798), at which she herself sang an aria by Danzi and a rondo by Mozart, accompanied by Mozart's questionable friend Stadler, with corno di bassetto obbligato. Schuppanzigh played a violin concerto, and Beethoven a pianoforte sonata with accompaniment. Fétis's statement that she came to London in 1800 and died there, arises from a confusion with the wife of Dussek the pianist. C. F. P.

DUSSEK, Johann Ludwig, or Ladislaw, one of the most renowned pianists and composers for the pianoforte of the latter part of the 18th and beginning of the 19th centuries, was born at Czaslau in Bohemia, Feb. 9, 1761. His father, Johann Joseph Dussek (born about 1739), a musician of considerable repute in his day, was organist and leading professor in that town, where he married the daughter of Judge Johann Stebcta, by whom he had three children, the eldest being Johann Ludwig. Although the brother, Franz Benedikt (born 1766) and the sister, Veronika Rosalia, were more or less distinguished, the subject of this brief memoir is the only one of the three whose memory and works have come down to us. According to Dlabacz, there were various modes of spelling our composer's patronymic. It will be enough, however, to cite three, Dussik, Duschek, Dussek, the last of which has long been recognised, and is unlikely henceforth to be disturbed in its prerogative, notwithstanding that the father of our English Dussek signed 'Johann Joseph Dussik.' When the son established himself in London, he altered the penultimate letter from *i* to *e*, and pronounced his name 'Duschek,' for which we have the authority of Pio Cianchettini, whose father married Veronika Rosalia, already mentioned.

Johann Ludwig Dussek began to study the pianoforte in his fifth year, and the organ in his ninth, and in the capacity of organist soon gave valuable assistance to his father. From Czaslau he went to Iglau, where he was engaged as treble singer in the Minorite church, pursuing his musical studies with Father Ladislaw Spinar, and familiarising himself with the 'humanities' at the College of Jesuits, subsequently for two years continuing the same course of instruction at Kuttenberg, where he was appointed organist of the Jesuit church. Thence he removed to Prague, where, if we may credit the naturally partial testimony of his father, he went through a course of 'philosophy,' and took the degree of 'Master.' Here Dussek cherished an earnest desire to join the Cistercian friars; but, happily, his youth was an obstacle to his admission as member of that respectable fraternity. In his straits he met with a patron—Count Männer, an artillery officer in the Austrian service, who took him to Mechlin (Malines), where he remained for some time as organist at the church of St. Rombaut, and teacher of the pianoforte. Tired of Mechlin, he left for Berg-op-Zoom, again accepting the post of organist at one of the principal churches. Such a dreary spot, however, was not likely to suit one of Dussek's temperament, and he went to Amsterdam about 1782, where he may be said to have laid the foundation of his brilliant reputation as pianist and composer. It is worth remark that Dussek's last engagement as church organist was at Berg-op-Zoom; and at the same time—which more than one German critic (Professor Marx among others) has observed—that this early acquaintance with the organ had much to do with the peculiar style of not a few of the slow movements to be met with in his finest sonatas—among which may especially be cited the *adagio* of the 'Invocation' (op. 77), his last great composition for the pianoforte. Dussek's brilliant success at Amsterdam soon obtained for him an invitation to the Hague, where he passed nearly a twelvemonth, giving lessons on the pianoforte to the children of the Stadtholder. Here he also devoted much time to composition, producing three concertos, and twelve sonatas for pianoforte, with accompaniments of stringed instruments, about which Cramer's *Magazin der Musik* (Hamburg) speaks in very favourable terms. From the Hague, Dussek, now twenty-two years of age, unmindful of the praise that had been awarded to his early compositions, proceeded to Hamburg, obtaining further instruction from Emanuel Bach, second son of the immortal John Sebastian. The advice and encouragement of this eminent master would seem to have exercised a salutary influence on our young musician. A year later, nevertheless, we find him at Berlin, astonishing the *dilettanti* of the Prussian capital with his pianoforte-playing, and also with his performances on the instrument called the 'Harmonica,' the qualities of which, in agreement with one Hessel, the *soi-disant* inventor, he travelled through various parts of Germany to exhibit, exciting the admiration of Gerber (at Hesse-Cassel, 1785) both for the instrument and the performer. From Berlin it was the intention of Dussek to go to St. Petersburg; but here there is no credible account of his doings, except that he is believed to have accepted an advantageous offer

from a certain Polish prince, Radziwill, at whose estate in Lithuania he remained more than a year, unheard of. We next meet with him at Paris (towards the end of 1786) enchanting Marie Antoinette with his playing; her seductive offers, however, could not dissuade Dussek from carrying out a long-considered project of visiting his brother, Franz Benedikt, in Italy. At Milan he earned new laurels as a performer, both on the pianoforte and harmonica; but the volatile Italians showed a preference for the inferior instrument, which was by no means flattering to the gifted Bohemian. Returning to Paris in 1788, the threatening circumstances of the time caused him to quit the French capital after two years. His next residence was London, where he made his first appearance at a concert of Salomon's, March 2, 1790, and where he remained for a longer period (nearly twelve years) than in any other city he had temporarily chosen as a residence. In London his genius was rapidly appreciated; he became a fashionable teacher, the centre of a circle of eminent musicians, and looked up to by them all. One of the greatest compliments ever paid to Dussek, who could boast of so many, was contained in a letter addressed from London to the elder Dussek (Dussik) at Czaslau, by the celebrated Joseph Haydn, then composing his imperishable symphonies for Salomon.

MOST WORTHY FRIEND—I thank you from my heart that, in your last letter to your dear son, you have also remembered me. I therefore double my compliments in return, and consider myself fortunate in being able to assure you, that you have one of the most upright, moral, and, in music, most eminent of men, for a son. I love him just as you do, for he fully deserves it. Give him, then, daily, a father's blessing, and thus will he be ever fortunate, which I heartily wish him to be, for his remarkable talents. I am, with all respect, your most sincere friend, JOSEPH HAYDN.

London, *Feb.* 26, 1792.

This from a man like Haydn meant something out of the common way. In 1792 Dussek married the daughter of Domenico Corri. 'This lady,' says Gerber, 'was principal singer at the London professional concerts, he [Dussek] being concerto player to the same, and playing in a style of incredible perfection.' [See DUSSEK, SOPHIA.] The marriage brought about a joint speculation between Dussek and Corri, and the establishment of a music shop, which, in consequence of Dussek's habitual negligence and utter unacquaintance with business habits, ended in failure, the upshot being that, in 1800, in order to elude his uncompromising creditors, he was obliged to leave the country surreptitiously, and once more seek shelter in his favourite Hamburg. [See CORRI & Co.] The story of the Northern Princess who, at this juncture, became enamoured of our pianist, carrying him off to a retreat near the Denmark frontier, where they lived together in seclusion for nearly two years, may be discarded as a myth. At all events we find in a correspondence to the *Leipziger Musik-Zeitung*, accounts of various concerts given by Dussek at Hamburg, in 1800 and 1801, with references to Steibelt, Himmel, Woelfl, and our own great singer, John Braham, who, with Madame Storace, sang at Ottensen, on the Elbe, in a concert at which Giarnowichi was violinist, and Dussek pianist. In 1802, after appearing at the Concert Hall in Prague, where he played his concerto in G minor, Dussek, accompanied by his sister, Madame Cianchettini, paid a visit at Czaslau to his father, whom he had not seen for more than a quarter of a century, and, after passing some months at home resumed his professional wanderings, until in 1803, at Magdeburg, he became acquainted with Prince Louis Ferdinand of Prussia, with whom he lived for three years on terms of affectionate intimacy, to whom he gave advice both in pianoforte playing and composition, and whose premature death, on the field of Saalfeld, was the origin of the 'Élégie Harmonique' (op. 61), not only one of the finest works of Dussek, but one of the most pathetic and beautiful in the repertory of the piano. This was another turning-point in the somewhat tortuous life of our composer, and, for better or for worse, materially influenced his character. Much that is interesting with regard to the intercourse between Dussek and the Prince may be read in the *Leipziger Musik-Zeitung* (1807); in Ludwig Rellstab's *Reminiscences of Berlin Music* in the *Berlin Musik-Zeitung* (1850); and, most characteristic of all, in Spohr's *Selbst-Biographie*.

Rellstab, in his *Reminiscences*, gives an interesting account of the pianoforte 'virtuosi' who flourished at that period in Berlin, according the highest place among them to Himmel, Prince Louis Ferdinand, and Dussek, placing Dussek, however, in the first rank:—

The favourite player at Berlin, and decidedly first in purity, elegance, and delicacy of style, was Himmel, a man formed by nature to be the central point in musical *salons* . . . ; but far greater, and emphatically so, was Dussek, both as 'virtuoso' and composer . . . . . whose eminent technical resources afforded a much wider basis for varied development, and who, having accomplished a vast deal more for the elevation of the pianoforte than most of his contemporaries, occupied a position in the musical art of Berlin, which is vividly felt even now [1850], and obtained a corresponding European fame, justly claims a place in the history of the most universal of instruments, to which Himmel, despite his exceptional ability and well-earned local eminence, had no legitimate pretensions.

A lively picture of how the three boon companions clubbed together follows the above:—

Louis Ferdinand played a great deal with Dussek several compositions for two pianofortes, and others for four hands on one pianoforte, deriving their origin from the relations between the distinguished 'virtuoso' and his gifted patron. Himmel was often their companion, and he and Dussek were the Prince's favourite associates at the wine cup. What influence Dussek may have exerted upon the character of the Prince at these convivialities it is hard to say; but Himmel possessed that lively, joyous, good-natured, amiable view of life which as a rule is most welcome when intellectual brothers in art make the full glasses ring. Thus the Prince, Himmel, and Dussek, formed a musical triad, each exciting, enlivening, and fortifying the others, Dussek, in his artistic capacity, taking the foremost place.

Spohr (*Selbstbiog*. i. 85), describing a *soirée*

at the Prince's, in the course of a visit to Berlin early in 1805, remarks :—

Here I also met an old Hamburg acquaintance, the celebrated pianoforte virtuoso and composer Dussek, now the Prince's teacher and residing with him. The music began with a pianoforte[1] quartet, which was played by Dussek in real artistic perfection.

In the autumn of the same year, when Prince Louis Ferdinand was at Magdeburg, superintending the military manœuvres, Spohr received, through Dussek, an invitation to be a guest and take part in the projected musical entertainments. His description of the early morning rehearsals is highly diverting—the end being raciest of all (*Selbstb.* i. 94). When the Prince was about to leave, Spohr was dismissed with hearty thanks, Dussek informing the young violinist that 'Son Altesse Royale' had intended to make him a present, but his finances were at so low an ebb that he was compelled to defer it to some future occasion. 'Such occasion, however,' observes Spohr, 'never arrived, the Prince next year meeting his fate at the battle of Saalfeld.' [See Louis Ferdinand, Prince.]

The death of Prince Louis Ferdinand threw Dussek once more upon his own unaided resources. It says no little for him that before thinking about future prospects he should have devoted time to composing the 'Harmonic Elegy' already mentioned, a fitting tribute to the memory of that royal friend whose close relations with him fully justified his giving expression to sentiments of deepest regret through the medium of the art they both so dearly loved. Nor could anything be more touching and appropriate than the few words which Dussek inscribed on the title-page of his sonata, 'L'auteur, qui a eu le bonheur de jouir du commerce très intime de S.A.R., ne l'a quitté qu'au moment où il a versé son precieux sang pour sa patrie.'

About the Prince von Ysenburg (or Isenburg), into whose service, after the death of his illustrious patron, Dussek entered, as court and chamber musician, little is on record. A paragraph in the *Leipzig Musik-Zeitung*, however (Sept. 2, 1807), states that 'Herr Dussek having resigned his situation with the Prince von Isenburg, has entered the service of the Prince of Benevento (Talleyrand), and will remain henceforth in Paris.' More than two years later (Jan. 3, 1810) the same periodical publishes a letter from Paris in which we read: 'Herr Dussek is in the service of M. Talleyrand, Prince of Benevento. He appears to be treated in a very distinguished manner, and enjoys a respectable salary.' With this renowned diplomatist and highly accomplished gentleman Dussek resided till the last. His leisure was entirely at his own disposal. He would vouchsafe occasional instructions to favoured amateurs, such as Mlle. Charlotte (Talleyrand's adopted daughter), the Duchesse de Courland, Mlle. Betsy Ouvrard (to whom the grand sonata called 'L'Invocation' is dedicated), etc. ; also now and then give a concert, at which he produced his latest works, the rest of his time being exclusively devoted to composition. Fétis, who remembered well Dussek's performances at the Odéon (1808), writes :—

The extraordinary sensation he produced is not forgotten. Until then the pianoforte had only been heard to disadvantage as a concert-instrument,[2] but under the hands of Dussek it eclipsed all that surrounded it. The broad and noble style of this artist, his method of *singing* on an instrument which possessed no sustained sounds, the neatness, delicacy, and brilliancy of his playing, in short, procured him a triumph of which there had been no previous example.

With the Prince of Benevento, his latest patron, Dussek continued to reside until his last illness compelled him to seek another retreat, at St.-Germain-en-Laye, where he died on March 20, 1812. A letter from Paris, dated March 21, 1812, and printed in the *Leipzig Musik-Zeitung* (xiv. 258), thus refers to the event :—

I have just heard news which must grieve every friend of music . . . . Your worthy and celebrated countryman, J. L. Dussek, is no more! Yesterday morning, at six o'clock, in the full vigour of manhood [in his fifty-second year], he closed a career which, despite the ever-increasing culture, development, and strength of his great talents, and his astonishing industry, had not yet reached its culminating point. He had been unwell for some months, but was confined to bed only two days. His disease was gout, which suddenly attacked his brain, and in an hour or two carried him off . . . . It was a blessing to his energetic spirit, his warmly sensitive and affectionate nature, that he could breathe his last in the arms of a faithful friend and countryman like your noble Neukomm.

In a very interesting series of papers about the Dusseks generally, which Alexander W. Thayer, to whom the lovers of Beethoven are so deeply indebted for his indefatigable researches into the actual life of that great composer, published simultaneously (1861) in Dwight's *Journal of Music* (Boston, U.S.) and the *Musical World* (London, Oct. 5, 1861, p. 629 *et seq.*), we find quoted a general estimate, of which a mere condensed abstract may suffice to convey some notion of what Dussek's contemporaries thought of him :—

Dussek, the man of genius, the richly endowed and solidly trained artist, was known, honoured, and loved by the entire musical world . . . . He has done nearly as much as Haydn, and probably not less than Mozart, to make German music known and respected in other[3] lands. His earlier residence in London, and his later in Paris, have in this respect exercised great influence. As a 'virtuoso' he is unanimously placed in the very foremost rank. In rapidity and sureness of execution, in a mastery of the greatest difficulties, it would be hard to find a pianist who surpassed him; in neatness and precision possibly *one* (John Cramer of London); in soul, expression, and delicacy, certainly *none*. As a man he was good and noble, just, impartial, and kindly, a real friend, sympathising with all that was true and beautiful in those he knew . . . . His failings, inseparable from an imagination so powerful and a sensitiveness so extreme, may readily be forgiven . . . . Moreover, through native strength of mind and frequent intimate relations with the most distinguished persons, he had gained a vast amount of general information, thoroughly polished manners, and such tact, combined with knowledge of the world, as fitted him for the highest circles of society; while his joyous disposition, liberal sentiments, and freedom from prejudice of any kind, endeared him especially to musicians.

[1] Spohr, in his usually unsatisfying manner, does not say which quartet, or by whom composed. Probably Dussek's own—in E flat.

[2] Fétis must surely mean *in Paris!*

[3] This, it must be borne in mind, was written in 1812.

This also came from Paris, and was printed in the same Leipzig periodical.

With regard to Dussek's style of playing, about which we of course can only gather a notion from the works he has left, many contemporaneous opinions could be cited, but perhaps not one more suggestive than that which J. W. Tomaschek, himself a pianist and composer of eminence, gives in his *Autobiography and Reminiscences*—

> In the year 1804, my countryman, Dussek, came to Prague, and I very soon became acquainted with him. He gave a concert to a very large audience, at which he introduced his own Military Concerto. After the few opening bars of his first solo, the public uttered one general Ah! There was, in fact, something magical about the way in which Dussek with all his charming grace of manner, through his wonderful touch, extorted from the instrument delicious and at the same time emphatic tones. His fingers were like a company of ten singers, endowed with equal executive powers, and able to produce with the utmost perfection whatever their director could require. I never saw the Prague public so enchanted as they were on this occasion by Dussek's splendid playing. His fine declamatory style, especially in *cantabile* phrases, stands as the ideal for every artistic performance—something which no other pianist since has reached . . . Dussek was the first who placed his instrument sideways upon the platform, in which our pianoforte heroes now all follow him, though they may have no very interesting profile to exhibit.

In a conversation with the writer of this article, Mendelssohn once said, 'Dussek was a prodigal.' The meaning of this epigrammatic criticism is not far to seek. Dussek, who failed for want of striving to make the most of the endowments of nature, might have become a musician of the highest acquirements had the case been otherwise. He squandered melody as a spendthrift would squander money, not pausing for an instant to consider its value if put out to interest. It is sad to reflect upon the number of genuine melodies that, coming so readily from his pen, were left, as Sancho Panza would say, 'bare as they were born,' though almost every one of them might have been developed into something beautiful and lasting. When, however, he applied himself to his task with earnest devotion, as happened not unfrequently from the earliest to the latest period of his career, Dussek was welcomed like the Prodigal Son. A legitimate child of Art, his mission was that of a true disciple—for which capacity he was eminently fitted, as the many compositions he has left suffice to prove.

Dussek came into the world five years later than Mozart, and nine years earlier than Beethoven, quitting it while the greatest of poet-musicians was at the zenith of his glory, just at the time when the fifth and last pianoforte concerto, the incomparable 'E flat' (written a year previously), was first introduced to the public. Between 1761 and 1812, the interval which spanned the existence of Dussek, a galaxy of famous pianists shone with varied lustre. To take them in chronological order, there were Clementi, Mozart, Himmel, Steibelt, Woelfl, Beethoven, Cramer, Tomaschek, Hummel, Weber, J. Field ('Russian Field,' as he was called), and last, not least, Moscheles, who, though scarcely twenty years of age when Dussek died, had already made for himself a name. To these might be added Meyerbeer, who, as a youth, before he devoted himself exclusively to the composition of operas, was a rival even to Hummel in his prime.[1] Among these it is no small thing to say that Dussek shone conspicuous. He never enjoyed the opportunity of encountering Mozart, as Clementi did, nor the equally important one of measuring his powers with those of Beethoven, as fell to Steibelt and Woelfl—to the absolute satisfaction of neither; but before the rest he was, as Schumann says of Schubert, 'a man'—who had cause to fear no rival.

There is much confusion in the opus-numbers of Dussek's works, owing to the different systems adopted by French, English, and German publishers. The following is an imperfect attempt at a complete list:—

Op. 1. 3 Concertos for PF. and Orchestra.
2. 3 Trios, PF. and Strings. C, B♭, E min.
3. Concerto, No. 1, PF. and Orch. E♭.
4. 3 Sonatas, PF. and Violin. F, E♭, F min.
4. 3 Do. PF. and Violin or Flute. G, D, C.
6. 3 Do. PF. and Violin. G, B♭, A♭ (1 PF. solo).
6. 6 Airs Variés, PF. E, F, A, D min., G min., G min.
7. 3 Sonatas, PF. and Flute. C, G, E♭.
8. 3 Do. PF. and Violin. C, F, A (la Chasse).
9. 3 Do. PF. B♭, C, D.
10. 3 Do. PF. A, C min., E.
11.
12. 3 Sonatas, PF. and Violin. F, B♭, C.
13. 3 Do. PF. and Violin. B♭, D, G min.
13. Rondo militaire, PF.
14. 3 Sonatas, PF. and Violin. C, G, F.
14. Concerto No. 2, PF. and Orch. F.
16. Do. No. 3, E♭.
16. 12 Leçons progressives, PF. 2 Bks.
16. 3 Sonatas, PF. and Violin. C, F, G.
17. 3 Do. do. C, F, G.
17. Concerto No. 4, PF. and Orchestra. F.
18. 3 Sonatas, PF. and Violin. B♭, A min. (solo), E♭.
19. 6 Do. PF. and Flute. D, C, F, A, C, E♭.
20. 6 Sonatinas, PF. and Flute or Violin. G, C, F (solo), A, E, E♭ (solo).
20. Concerto in MS. in the Brussels Conservatoire
21. Trio, PF., Flute and Vcello. C.
21. 3 Trios, PF. and Strings. C, A, F.
22. Concerto, No. 5, PF. and Orch. B♭.
23. The sufferings of the Queen of France, PF. C.
23. Sonata, PF. B♭ (ded. to Mrs. Chinnery); and 3 airs variés, G, A, A.
24. Same Sonata in the English ed.
24. 3 Trios, PF. and Strings. F, B♭, D.
25. 3 Sonatas, PF. and Violin or Flute. F, D (PF. solo), G.
26. Concerto, No. 6, PF. and Orch. E♭.
27. Concerto No. 2, PF. and Orch. F. (See op. 14.)

Op. 28. 6 Easy Sonatas, PF. and Violin. C, F, B♭, D, G min., E♭.
29 or 30. Concerto, No. 7, PF. (or Harp) and Orch. C.
29. 3 Sonatas, Flute or V. and Vcello. F, B♭, D.
30. 4 Sonatas, PF. and V. ad lib. C, F, B♭, G.
31. 3 Trios, PF. and Strings. B♭, D, C; and 3 Preludes, PF.
32. Grand Sonata, PF., 4 hands. C.
33. 'Il rivocato.'
34. 2 Trios, PF. and Strings. E♭, B♭.
34. 2 Sonatas for Harp, V., and Vcello.
34. Serenade, Orch. in 9 pts. E♭.
35. 3 Sonatas, PF. B♭, G, C min.
36. Grand Sonata, PF. and Violin. C.
37. Trio (Son. favorite), PF. and Strings. E♭.
38. Sonatas, 2 Pianos. E♭.
39. 3 Sonatas, PF. G, C, B♭.
40. Concerto, No. 8 (militaire), PF. and Orch. B♭.
41. Quintet, PF. and Strings. F min.
42.
43. Sonata, PF. A.
44. Do. E♭ (The Farewell, dedicated to Clementi).
45. 3 Do. B♭, G, D.
46. 6 easy Do., PF. and Violin. C, F, B♭, C, D, G.
47. 2 Do. PF. D, G.
48. Grand Sonata, PF., 4 hands. C.
49 or 50. Concerto, No. 9, PF. and Orch. G min.
51. 3 Sonatas, PF. and Violin or Flute. G, D, E (? C).
52. 6 Canzones to Italian and English words.
53. Grand Quartet, PF. and Strings. E♭.
54.
55 or 60. Fantasia and Fugue, PF. F min. (dedicated to J. B. Cramer).
56. Quartet, PF. and Strings. E♭.
57.
58.
59.
60. 3 String Quartets. G, B♭, E♭.
61. Élégie harmonique sur la mort du P. L. F. de Prusse. F♯ min.
62. La Consolation, PF. B♭.
63. Concerto, No. 10, 2 PF.'s and Orch. B♭.

[1] But none of whose compositions for the pianoforte have, unfortunately, been published, though many exist in MS.

Op. 64. Fugues à la Camera, PF., 4 hands. D, G min., F.
65. Trio, PF., Flute, and Vcello. F.
66. Concerto, No. 11, PF. and Orch. F.
67. 3 Sonates progressives, PF., 4 hands. C, F, B♭.
68. Notturno, PF., Violin, and Horn. E♭.
69. 3 Sonatas, PF. and Violin. B♭, G, D (solo).
70. Concerto, No. 12, PF. and Orch. E♭.
70. Sonata, PF. A♭. (Le Retour à Paris.)
71. Plus Ultra, Sonata, PF. A♭ (dedicated to Non plus ultra).
71. Airs connus Variés, PF. B♭, F, C, G, C, B♭. 2 Bks.
72. Grand Sonata, PF., 4 hands. E♭.
73. Sonata, PF., 4 hands. F.
74. Do., do., do. B♭.
75. Do., do. E♭.
76. Fantaisie, PF. F.
77. Sonata, PF. (No, 31). F min. (L'invocation.)

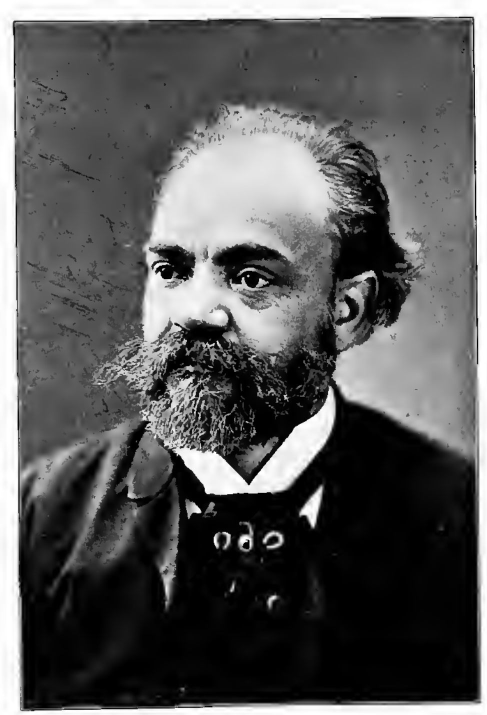
Works without Opus-number. [Various Concertos (one at least for two Pianos) are in MS.]
Feudal times, favourite Overture.
Overture to 'Pizarro.'
Grand Overture, PF., 4 hands.
Instructions on the Art of playing the PF.
2 Trios, PF. and Strings. E♭, B♭.
'Le combat naval.' Sonata for PF., V., and Vcello, with Gr. Tambour ad lib. D.
2 Duos faciles, 2 Pianos. C, F.
Sonata facile, PF., 4 hands. C.
3 Grand Sonatas, PF., 4 hands.
3 Fugues and Sonata, PF., 4 hands.
6 Rondos.
Sonata, PF. F. (La Chasse.)
6 Sonatines for Harp.
Rondo on 'L'adieu,' PF. B♭.
Do., Air Russe. C.
Do., A la Tedesca. B♭.
Do., L'Amusoire. F.
Rondo on Countess of Sutherland's Reel. F.
Do., Militaire. B♭.
Do., Mignon. C.
Do. on the favourite Hornpipe.
Do. on Lord Howe's Hornpipe.
Do. on 'My lodging is on.'
Do. on 'The Ploughboy.'
Do. on the Royal Quickstep.
Do. on 'To to Carabo.'
Do. on Viotti's Polacca.
Do., L'Elégante.
Do., La Matinée.
Variations on 'Anna,' do. C.
Do. on 'Il Pastore Alpigiano,' do. C.
Do. on 'Partant pour la Syrie,' do. E♭.
Do. on 3 Scotch airs.
Do. on 'Hope told a flattering tale.'
Do. on a favourite German air.
Do. on Blaise et Babet.
Do. on Fa lal la.
Do. on God save the King.
Do. Petits airs connus 'Œuvre VI.'
Do. Three Parisian airs.
6 New Waltzes, for PF. and Violin or Flute.
2 English airs and 2 Waltzes.
3 Preludes, Bk. 1, PF.
6 Canons, for 3 and 4 voices.
Song on 3 notes (B♭, C, D) for Voice and PF.
6 Songs for Voice and PF.
'The Captive of Spilburg,' a musical drama, written in collaboration with Michael Kelly, produced at Drury Lane, Nov. 1798.
The naval battle and total defeat of the Dutch Fleet by Admiral Duncan, Oct. 11, 1797. PF. solo.
A complete . . . delineation of the ceremony from St. James's to St. Paul's . . . Dec. 19, 1797. PF. D.
The Paris correspondent of the *A.M.Z.* (1811, Nov. 6) mentions a Grand Mass sent to Prince Esterhazy.

J. W. D.

DUSSEK, Sophia, daughter of Domenico Corri, born in Edinburgh in 1775. Instructed by her father, she at a very early age performed in public on the pianoforte. In 1788 the family removed to London, when Miss Corri appeared with great success as a singer. In 1792 she married J. L. Dussek, under whose instruction she became as able a pianist and harpist as she was a singer. She continued to sing in public, at her husband's concerts and elsewhere. After his death, in 1812, she contracted a second marriage with John Alvis Moralt. She composed and published many pieces for the pianoforte and harp. Her daughter, Olivia, was born in London in 1797, and under the instruction of her mother became an excellent performer on the pianoforte and harp. She composed some songs and several pieces for both instruments. She married a man named Buckley, was organist of Kensington Parish Church from 1840, and died in 1847. W. H. H.

DUVERNAY, Yolande Marie Louise, known as Pauline Duvernay, was born, 1813, probably in Paris. According to M. Pougin,[1] she was taught dancing by Coulon, and was engaged at the Opéra for about ten years between 1830 and 1840. Charles de Boigne, in his *Petits Mémoires de l'Opéra*, states that Mlle. Duvernay received instruction in dancing at the training-school of the Opéra from Barrez, Vestris, and Taglioni's father, but attracted no attention until Dr. Louis Véron became manager. On June 20, 1832, she played the part of Miranda in a new five-act ballet-opera, music by Halévy and Casimir Gide, 'La Tentation,' founded on a ballet of King René of Anjou, 'L'Armetto' ('Little Soul'), performed (according to Jules Janin—*Débats*, June 23, 1832) in 1462 in the streets of Aix (Provence). In this work her success was immediate both on account of her beauty and her skill as a dancer and pantomimist. She was none the less popular in society for being possessed of not a little wit and humour. During her career at the Opéra she danced, July 22, 1833, in Cherubini's 'Ali Baba'; Dec. 4, 1833, in a new ballet, 'La Révolte au Serail,' music by Labarre; Feb. 23, 1835, in 'La Juive'; Sept. 21, 1836, in 'La Fille du Danube,' music by Adolphe Adam, etc. She left the Opéra in this year, according to De Boigne. On leave of absence, she made her début in England, Feb. 13, 1833, at Drury Lane Theatre, as the Princess Iseult, in Hérold's ballet, 'The Sleeping Beauty,' adapted from Perrault's fairy tale, and on March 16 as Zelica in 'The Maid of Cashmere,' on the production in English of Auber's 'Dieu et la Bayadère,' wherein she made a great success. Thackeray recalled her triumph therein in the *Roundabout Papers*, No. 8, 'De Juventute': 'When I think of Duvernay prancing in as the Bayadère, I say it was a vision of loveliness such as mortals can't see now. How well I remember the tune to which she used to appear. Kaled used to say . . . "My lord, a troop of those dancing and sing-ging gurls called Bayadères approaches," and to the clash of cymbals and the thumping of my heart in she used to dance. There has never been anything like it—never.' In 1834 she danced at the King's Theatre in 'La Sylphide,' March 20, in a new ballet, 'Le Sire Huon' (Huon of Bordeaux), music by Costa, wherein she danced with Taglioni a graceful and effective shawl dance, probably the same dance as in Auber's opera, the music of which used to be played at the Crystal Palace Concerts. She also danced with Taglioni the Menuet de la Cour and 'Gavotte de Vestris.' On Nov. 3, 1836, she reappeared at Drury Lane in an act of 'La Bayadère,' and on Nov. 8 she took the part of Zodaliska in the production of an English version of Rossini's 'Maometto Secondo' ('Siege of Corinth'); on Dec. 1, 1836, she danced at Drury Lane as Florinda in the first performance of the ballet, 'The Devil on Two Sticks,' music by Gide, adapted from 'Le Diable Boiteux' of Le Sage, with the celebrated male dancers and pantomimists Mazilieros as Cleophas (his original part) and Wieland as Asmodeus. This ballet was a great success, and Mlle. Duvernay increased her fame by her dancing of the Cachucha (*q.v.*), 'one of the

[1] *La Grande Encyclopédie.*



ANTONIN DVOŘÁK

most graceful exhibitions of which the art is capable' (*Athenæum*, Dec. 3). Several editions of this dance were published, one of them in 1840 with a lithographic portrait of the artist, then called Pauline Duvernay. In 1837 she danced the whole season at the Opera House—Feb. 15, as Zerlina in 'Le Brigand de Terracine,' plot and music adapted from 'Fra Diavolo'; March 16, in a Russian ballet, 'Beniowsky,' with the popular 'Cachucha'; April 22, as the Sylphide; June 29, as Gulnare, in a new ballet, 'Le Corsaire,' music composed or adapted by Bochsa, etc. On Oct. 14, 1845, she married Mr. Stephens Lyne Stephens of Roehampton Grove and Lynford Hall, Norfolk, sometime M.P. for Barnstaple, and High Sheriff for the County of Norfolk. He died in 1860, leaving her the mistress of an enormous fortune, which for many years 'she devoted . . . to works of practical philanthropy.' (*Annual Register.*) She died Sept. 2, 1894, at Lynford Hall, leaving over £647,000 personalty and £57,000 realty. The Roman Catholic church at Cambridge was built and endowed with money given by her for the purpose. A. C.

DUVERNOY, VICTOR ALPHONSE, eminent French pianist and composer, born in Paris, August 31, 1842, a pupil of the Conservatoire under Marmontel, Bazin, and lastly, Barbereau, at first intended to adopt the career of a virtuoso, but afterwards devoted himself to composition, and became master of a pianoforte class at the Conservatoire. Among his works may be mentioned, 'La Tempête,' for soli, chorus, and orchestra, which obtained the prize of the City of Paris in 1880; two operas 'Sardanapale' (given at the Lamoureux Concerts in 1882, and in 1892, at the Théâtre Royal of Liège; and 'Hellé,' given at the Paris Opéra in 1896; a lyric scene, 'Cléopâtre,' a two-act ballet, 'Bacchus,' Paris Opéra, Nov. 26, 1902); symphonic pieces, an overture, 'Hernani,' some chamber music, which gained the Prix Chartier, and many works for piano, alone or with orchestra. G. F.

DUX (leader), an early term for the first subject in a fugue—that which leads; the answer being the *comes* or companion. The dux is in German called *Führer*.

DVOŘÁK, ANTONÍN, born Sept. 8, 1841, at Mühlhausen (Nelahozeves) near Kralup in Bohemia. His father, Franz Dvořák, the butcher and innkeeper of the place, destined him for the first of these trades. The bands of itinerant musicians who used to come round on great occasions and play in the inn, roused his musical ambition, and he got the village schoolmaster to teach him to sing and play the violin. His progress was so remarkable that before long he was promoted to singing occasional solos in church, and to playing the violin on holidays. During one such performance, in Passion tide, he broke down from nervousness. In 1853 his father sent him to a better school at Zlonitz, putting him under the care of an uncle. Here his musical studies were superintended by the organist, A. Liehmann, who taught him the organ and pianoforte, as well as a certain amount of theory, such as would enable him to play from a figured bass, modulate, or extemporise with moderate success. Two years afterwards he was sent to learn German, and so to finish his education, at Kamnitz, where the organist Hancke taught him for a year, after which he returned to Zlonitz, his father having in the meanwhile removed there. He prepared a surprise for his relations in the shape of an original composition, a polka, which he arranged to have performed on some festive occasion. The musicians started, but a series of the most frightful discords arose, and the poor composer realised too late the fact that he had written the parts for the trumpets in F as they were to sound, instead of writing them as they were to be played! By this time his intense desire to devote himself to music rather than to the modest career marked out for him by his father, could no longer be disguised, but it was not until many months had been spent in discussions, in which the cause of art was materially helped by the organist, who foresaw a brilliant future for his pupil, that the father's objections were overcome, and permission given for Anton to go to Prague and study music, in the hope of getting an organist's appointment. On Oct. 1857 he went to the capital and entered the organ school supported by the 'Gesellschaft der Kirchenmusik in Böhmen,' as a pupil of an organist named Pitzsch. At the beginning of the three years' course he received a modest allowance from his father, but even this ceased after a short time, and the boy—for he was little more—was thrown on his own resources. His violin-playing came in most usefully at this time, and indeed without it it is difficult to see how he could have kept himself alive. He joined one of the town bands as viola player, and for some three years lived upon the meagre earnings obtained in cafés and other places of the same kind. When a Bohemian theatre was opened in Prague in 1862, the band to which he belonged was employed to provide the occasional music, and when that institution was established on a firm basis, as the National Theatre, Dvořák, with some others of his companions, was chosen a member of the orchestra. While here he benefited by his intercourse with Smetana, who held the post of conductor from 1866 to 1874. A kind friend was found in Karel Bendl, a native of Prague, who after holding important musical posts at Brussels and Amsterdam, had returned in 1865 to Prague as conductor of a choral society, and who gave Dvořák every opportunity in his power of becoming acquainted with the masterpieces of art. His own resources were of course not sufficient to allow him to buy scores, and the possession of a piano of his own was not

to be thought of. In spite of these drawbacks, he worked on steadily at composition, experimenting in almost every form of music. As early as 1862 he had written a string quintet; by 1865 two symphonies were completed; about this time a grand opera on the subject of Alfred was composed to a German libretto, and many songs were written. The most ambitious of these efforts were afterwards committed to the flames by their author. In 1873 he was appointed organist of St. Adalbert's Church in Prague, a stroke of good fortune which allowed him not only to give up his orchestral engagement, but to take to himself a wife. He increased his scanty salary by teaching private pupils, but as yet his circumstances were exceedingly humble.

It was in this, his thirty-second year, that he first came before the public as a composer, with the patriotic cantata or hymn, written to words by Hálek, 'Die Erben des weissen Berges' ('The Heirs of the White Mountain'). The subject was happily chosen, and the spontaneous and thoroughly national character of the music ensured its success. In the same year one of two Notturnos for orchestra was performed, and in 1874 an entire symphony in E♭, and a scherzo from a symphony in D minor were given. Neither of these symphonies appear in his list of works; they were not the same as the two earlier compositions, which were in B♭ and E minor respectively. By this time the composer had begun to make a name for himself, and the authorities of the National Theatre resolved to produce an opera by him. When 'Der König und der Köhler' ('The King and the Collier') was put into rehearsal, however, it turned out to be quite impracticable, owing to the wildly unconventional style of the music, and the composer actually had the courage to rewrite it altogether, preserving scarcely a note of the original score. In this form it was successfully produced, and, the rumour of his powers and of the scantiness of his resources reaching Vienna, he received in the following year a pension of about £50 per annum from the Cultusministerium. This stipend, increased in the following year, was the indirect means of procuring him the friendship and encouragement of Johannes Brahms, who, on Herbeck's death in 1877, was appointed to succeed him on a commission formed for examining the compositions of the recipients of this grant. In this way the delightful collection of duets, called 'Klänge aus Mähren,' came before the Viennese composer, and it is not to be wondered at that he discerned in them all the possibilities that lay before their author. A wonderfully happy use of national characteristics is the most attractive feature of these duets, and a good opportunity for again displaying his knowledge of these peculiarities was soon given him; he received a commission from Simrock the publisher to write a series of 'Slavische Tänze' for pianoforte duet. The work, completed in 1878, had almost as great a success as the Hungarian dances of Brahms, published several years before. The wide popularity which the dances rapidly attained in all parts of Germany led, as was only natural, to the publication of compositions of every form, which the composer had almost despaired of ever seeing in print. It was now evident to all musicians that a new and fully developed composer had arisen, not a mere student whose progress from lighter to more elaborate forms could be watched and discussed, but a master whose style was completely formed, and whose individuality had, in its development, escaped all the trammels of convention. His long experience of orchestras had served him well, and had given him a feeling for instrumental colouring such as has been acquired by very few even of those composers whose education has been most complete. But though musical culture and the constant intercourse with artists and critics undoubtedly tend to crush distinctive originality, they have their advantages too, and a composer who wishes to employ the classical forms with ease and certainty will hardly be able to dispense with these necessary evils. In judging of Dvořák's works, it must always be remembered that a large amount of his chamber music was written without any immediate prospect of a public performance, and without receiving any alterations such as judicious criticism might have suggested.

After the publication of the 'Slavische Tänze,' the composer was in the happy position of the country which has no history, or rather his history is to be read in his works, not in any biography. For some years England played an important part in his career. Since the dances above referred to were arranged for orchestra, and played at the Crystal Palace (on Feb. 15, 1879), his name has become gradually more and more prominent, and it cannot be said that the English musical world has been remiss in regard to this composer, whatever may be our shortcomings in some other respects. An especial meed of praise is due to an amateur association, the London Musical Society, which on March 10, 1883, introduced to the metropolis his setting of the 'Stabat Mater,' composed as early as 1876, though not published till 1881. Public attention was at once aroused by the extraordinary beauty and individuality of the music, and the composer was invited to conduct a performance of the work at the Albert Hall, which took place on March 13, 1884, when the composer made his first appearance in England. In the autumn of 1884 he was again asked to conduct it at the Worcester Festival, and at the same time received a commission from the authorities to write a short cantata for the next year's Birmingham Festival. This resulted in the composition of 'The Spectre's Bride,' to a

Bohemian version by K. J. Erben of the familiar 'Lenore' legend, which, although it was presented in a very inadequate translation of a German version, obtained a success as remarkable as it was well deserved, carrying off the chief honours of the festival. This, as well as an oratorio on the subject of St. Ludmila, written for the Leeds Festival of 1886, was conducted by the composer himself.

In 1891 he paid another visit to England, receiving the honorary degree of Mus.D. at Cambridge: in 1892 he went to New York and was director of the so-called National Conservatory until 1895. In the latter year he returned to Prague, where in 1901 he was appointed head of the Conservatorium. He died suddenly, May 1, 1904.

He came to London in 1896, conducted the Philharmonic concert of March 19, the programme of which contained (for the first time in England) his violoncello concerto, op. 104, and the 'Biblische Lieder,' op. 99.

This is not the place for a detailed criticism of Dvořák's works, nor can we attempt to foretell what position his name will ultimately hold; we may, however, draw attention to the more striking characteristics of his music. An inexhaustible wealth of melodic invention and a rich variety of colouring are the qualities which most attract us, together with a certain unexpectedness, from which none of his works are wholly free. The imaginative faculty is very strongly developed, so that he is at his best when treating subjects in which the romantic element is prominent. It must be admitted that his works in the regular classical forms are the least favourable specimens of his powers. When we consider the bent of his nature and the circumstances of his early life, this is not to be wondered at; the only wonder is that his concerted compositions should be as numerous and as successful as they are. As a rule, the interest of those movements in which an adherence to strict form is necessary, is kept up, not so much by ingenious developments and new presentments of the themes, as by the copious employment of new episodes, the relationship of which to the principal subjects of the movement is of the slightest. But in spite of these technical departures from time-honoured custom, the most stern purist cannot refuse to yield to the influence of the fresh charm with which the composer invests his ideas, and in most of his slow movements and scherzos there is no room for cavil. These two important sections of the sonata or symphony form have been materially enriched by Dvořák in the introduction and employment of two Bohemian musical forms, that of the 'Dumka' or elegy, and the 'Furiant,' a kind of wild scherzo. Both these forms, altogether new to classical music, have been used by him in chamber music and symphonies, and also separately, as in opp. 12, 35, 42, and 90.

To his orchestral works the slight censure passed upon his chamber compositions does not apply. In his symphonies and other works in this class, the continual variety and ingenuity of his instrumentation more than make up for any such deficiencies as we have referred to in the treatment of the themes themselves, while his mastery of effect compels our admiration at every turn. Besides the five symphonies, opp. 24,[1] 60, 70, 88, and 95, and the overtures which belong to his operas, we may mention a set of 'Symphonic Variations' (op. 40), a 'Scherzo capriccioso' (op. 66), and the overtures 'Mein Heim' (op. 62) and 'Husitska' (op. 67), both written on themes from Bohemian volkslieder. His most recent orchestral works, opp. 107-111, have been exclusively of a pictorial or narrative kind, sometimes raising a smile by their naïve realism. Three other orchestral works are stated to have been left in MS. at his death.

Although in such works as the concerto op. 33, the pianoforte quartet in D, op. 23, and the three trios, opp. 21, 26, and 65, Dvořák has given evidence of a thorough knowledge of pianoforte effect, his works for that instrument alone form the smallest and least important class of his compositions.

His songs belong for the most part to the earlier period of their career, but considering the extraordinary success attained by the 'Zigeunerlieder' on their publication, it is surprising that the other songs are not more frequently heard. These 'gipsy songs' show the composer at his best, uniting as they do great effectiveness with tender and irresistible pathos. His use of gipsy rhythms and intervals is also most happy.

In his operas, if we may judge from those of which the vocal scores are published, his lighter mood is most prominent. 'Der Bauer ein Schelm' ('The Peasant a Rogue') is full of vivacity and charm, and contains many excellent ensembles. Both in this and in 'Die Dickschädel' ('The Obstinate Daughter,' literally 'The Thickhead') his love for piquant rhythm is constantly perceptible, and both bear a strong affinity in style to the 'Klänge aus Mähren' duets.

None of his earlier works for chorus gave promise of what was to come in the 'Stabat Mater.' The 'Heirs of the White Mountain' is melodious, and contains passages of great vigour, and the 'local colour,' though by no means prominent, is skilfully used; but even those musicians who knew his previous compositions can scarcely have expected his setting of the Latin hymn to be full of the highest qualities which can be brought into requisition. Perhaps the most striking feature of his work is the perfect sympathy of his character with the spirit of the words. The Bohemian composer not only threw off all trace of his own nationality, but adopted a style which makes it difficult

[1] The Symphony in F, written in 1875, to which the above number should have been affixed, was published as op. 76. The first performance in England took place at the Crystal Palace, April 7, 1888.

to believe him not to have studied the best Italian models for a lifetime before setting pen to paper. We do not mean for a moment to hint at any want of originality, for here, as elsewhere, the composer is indebted to no one for any part of his ideas. But in such numbers as the 'Inflammatus' and others the Italian influence is quite unmistakable. It has been well remarked that he treats the hymn from the point of view of 'absolute music'; that is to say, that he dwells, not so much upon the meaning or dramatic force of each verse or idea, as upon the general emotion of the whole. It is this, no doubt, which leads him into an apparent disregard of the order and connection of the words of the hymn, though a more commonplace reason, must, we fear, be assigned for the not infrequent false quantities in the setting of the Latin verse. These errors in detail serve to remind us of the deficiencies in Dvořák's early training, and to increase our admiration for the genius of a composer, who, in spite of so many drawbacks, has succeeded, more perfectly than any other modern writer, in reflecting the spirit of the ancient hymn.

In 'The Spectre's Bride' the composer has reached an even higher point, and given the world a masterpiece which is not unworthy to stand beside such weird musical creations as the 'Erlkönig' and the 'Fliegende Holländer.' The sustained interest of the narrator's part, more especially after the climax of the story has been reached, the ingenuity with which the difficulty of the thrice-recurring dialogue between the lovers has been overcome, the moderation in the use of those national characteristics which we have mentioned above, so that their full beauty and force are brought into the most striking prominence; these are some of the features which make it one of the most remarkable compositions of our time, to say nothing of the beauty and power of the music itself, or of the richness of the orchestral colouring. It must be felt that the man who could create such a work as this had everything within his grasp, and yet it is not too much to say that none of his many subsequent compositions could really be considered as the equal of 'The Spectre's Bride' in beauty or originality.

In the oratorio of 'St. Ludmila,' it is evident that the tastes and prejudices of the English public were kept too constantly in mind by the composer. A large proportion of the numbers produce the effect of having been written immediately after a diligent study of the oratorios of Handel and Mendelssohn. We do not mean to accuse Dvořák of conscious or direct plagiarism, but it cannot be denied that the freedom and originality which give so great a charm to his other works are here, if not wholly absent, at least not nearly as conspicuous as they are elsewhere. In the heathen choruses of the first part the individuality of the composer is felt, and at intervals in the later divisions of the work his hand can be traced, but on the whole, it must be confessed that 'St. Ludmila,' even as it was presented at Leeds, by executants all of whom were absolutely perfect in their various offices, and under the composer's own direction, proved extremely monotonous.

Another instance of a curious tendency to adopt a style not natural to him, was in the works suggested by his sojourn in America, opp. 95-97, in which the characteristics, real or imaginary, of negro music were introduced into works of serious purpose.

Of his eight operas, only 'Der Bauer ein Schelm' has as yet been heard elsewhere than in Prague, having been given at Dresden and Hamburg.

The following is as complete a list of Dvořák's works as can be made at the present time; the *lacunæ* in the series of opus-numbers will possibly be filled up in the future by some of the earlier compositions which have not yet been published:—

1.
2. Four Songs.
3. Four Songs.
4. Die Erben des weissen Berges.[1] Patriotic Hymn for mixed chorus, to words by Hàlek.
5. Das Waisenkind. Ballad for Voice and PF.
6. Four Serbian Songs.
7. Four Bohemian Songs.
8. Silhouetten for PF.
9. Four Songs.
10.
11. Romance for Violin and Orchestra.
12. Furiant and Dumka for PF.
13.
14.
15. Ballade for Violin and PF.
16. String Quartet in A minor.
17. Six Songs.
18. String Quintet in G.
19. Three Latin Hymns for Voice and Organ.
20. Four vocal Duets.
21. Trio in B♭ for PF. and Strings.
22. Serenade in E for Stringed Orchestra.
23. Quartet in D for PF. and Strings.
24. Symphony in F (also called op. 76).
25. Overture to 'Wanda.'
26. Trio in G minor for PF. and Strings.
27. Part Song for Chorus.
28. Hymne der Böhmische Landleute, for mixed Chorus with 4-hand accompaniment.
29. Six Choruses for mixed Voices.
30. Die Erben des weissen Berges.[1]
31. Five Songs.
32. 'Klänge aus Mähren.' Vocal Duets. Sop. and Alt.
33. PF. Concerto.
34. String Quartet in D minor.
35. Dumka for PF.
36. Variations in A♭ for PF.
37. Overture to 'Der Bauer ein Schelm.'
38. Four vocal Duets.
39. Polka, Minuet, and Romance for PF. Solo.
40. Notturno for Stringed Orchestra.
41. Scotch Dances for PF. Duet.
42. Two Furiants for PF.
43. Three Choruses with 4-hand accompaniment.
44. Serenade for Wind, Violoncello, and Double Bass.
45. Three Slavische Rhapsodien for Orchestra.
46. Slavische Tänze for PF. Duet.
47. Four Bagatellen for Harmonium (or PF.), two Violins, and Violoncello.
48. String Sextet in A.
49. Mazurek for Violin and Orchestra.
50. Three Neugriechische Gedichte.
51. String Quartet in E♭.
52. Impromptu, Intermezzo, Gigue and Scherzo for PF.
53. Violin Concerto.
54. Walser for PF.
55. Zigeunerlieder for Tenor Voice.
56. Mazurkas for PF.
57. Sonata in F for Violin and PF.
58. Stabat Mater for Soloe, Chorus and Orchestra.
59. Legenden, for PF. Duet, arranged for Orchestra.
60. Symphony in D.
61. String Quartet in C.
62. Overture, 'Mein Heim.'
63. 'In der Natur.' Five Choruses.
64. Opera, 'Dimitrije' (see below).
65. Trio in F minor for PF. and Strings.
66. Scherzo capriccioso for Orchestra.
67. Overture, 'Husitzka.'
68. 'Aus der Böhmer Walde.' PF. Duets.
69. 'The Spectre's Bride.' Cantata for Soli, Chorus, and Orchestra.
70. Symphony in D minor.
71. Oratorio, 'St. Ludmila.'
72. New Slavische Tänze for Orchestra (books 3 and 4).
73. 'Im Volkston.' Four Songs.
74. Terzetto for two Violins and Viola.
75. Romantische Stücke. Violin and PF.
76. See op. 24.
77. String Quintet in G.
78. Symphonic Variations for Orchestra.
79. Ps. 149 for Chorus and Orchestra.
80. String Quartet in E.
81. Quintet for PF. and Strings.
82. Four Songs.
83. Eight Love-Songs.
84.

[1] By the composer's desire, 'Die Erben des weissen Berges' ('The Heirs of the White Mountain'), originally published as op. 4, has been reissued as op. 30 by Messrs. Novello & Co., with a dedication 'to the English people.'

85. Poetische Stimmungsbilder for Piano (13 pieces).
86. Mass in D.
87. Quartet, PF. and Strings. E♭.
88. Symphony in G.
89. Requiem, Birmingham Festival, 1891.
90. Dumky, Trio, PF. and Strings.
91. Overture, 'In der Natur.'
92. Overture, 'Carneval.'
93. Overture, 'Othello.'
94. Rondo for Violoncello and Orchestra.
95. Symphony 'From the New World,' in E minor.
96. String Quartet in F.
97. String Quintet. E♭.
98. Pianoforte Suite.
98. Five Biblical Songs.
100. Sonatina, Violin and PF., in A.
101. Humoresken for Piano.
102. Cantata, 'America's Flag,' performed New York, 1895.
103. Te Deum.
104. Violoncello Concerto.
105. String Quartet in A♭.
106. String Quartet in G.
107. Orchestral Ballade, 'Der Wassermann.'
108. Orchestral Ballade, 'Die Mittagshexe.'
109. Orchestral Ballade, 'Das goldene Spinnrad.'
110. Symphonic Poem, 'Die Waldtaube.'
111. Symphonic Poem, 'Heldenlied.'

OPERAS.

'Der König und der Köhler,' comic opera; produced at Prague, 1874.
'Die Dickschädel,' comic opera in one act; words by Dr. Josef Stolba; produced at Prague 1882 (written in 1874).
'Wanda,' grand tragic opera in five acts; words by Sumawsky, from the Polish of Sagynsky; produced at Prague, 1876.
'Der Bauer ein Schelm,' comic opera in two acts; words by J. O. Vessely; produced at Prague, 1877.
'Dimitrije,' tragic opera; produced at Prague, 1882.
'Jacobin' (1889).
'Der Teufel und die wilde Käthe' (1899).
'Rusalka' (Prague, March 31, 1901).
'Armida' (Prague, March 25, 1904). M.

DWIGHT, JOHN SULLIVAN, born at Boston, U.S.A., graduated at Harvard in 1832, and was one of the founders of the Harvard Musical Association. He entered the ministry of the Unitarian Church, and held a pastorate at Northampton, Mass. He gave up the ministry after a few years, and devoted himself to the Brook Farm (socialistic) community, where he taught music and the classics. In 1848 he returned to Boston and became a musical critic, founding *Dwight's Journal of Music*, which lasted from 1852 to 1881. He edited and translated various poems from the German, and died at Boston, Sept. 5, 1893. A memoir of him was published by G. W. Cooke (1899) who had also edited his correspondence with G. W. Curtis in 1898. (Baker's *Biog. Dict. of Musicians.*) (See MUSICAL PERIODICALS.)

DYGON, JOHN, the composer of the three-part motet 'Ad lapidis positionem,' printed in Hawkins's *History*, is described there as Prior of St. Austin's (*i.e.* St. Augustine's Abbey), Canterbury. The identity of the name with that of an abbot of this monastery (1497-1509) has led to several ingenious conjectures. The only other authenticated circumstance in the composer's life, which has been hitherto published, is that he took the degree of Bachelor of Music at Oxford in April 1512, being the only Mus.B. of his year. The abbot John Dygon was succeeded in 1509 by John Hampton, and no doubt died in that year; a second John Dygon was Master of the Chantry of Milton in Kent, in which post he is said to have died in 1524. An examination of the deed of surrender of St. Augustine's Abbey, dated July 30, 30 Henry VIII. (1538), shows that at that time John Essex was abbot and John Dygon principal of the four priors, being, as appears from his position in the list, only inferior in rank to the abbot. Unfortunately, in the list of pensions granted to the officers of this monastery on Sept. 2 following the dissolution, almost all the monks had, apparently by way of precaution, assumed new surnames, or rather, more probably, resumed their original names, so that it is impossible to state with certainty which of the nine Johns was the composer. There are, however, strong grounds for believing that he is to be identified with John Wyldebere; and for this reason, that the pension of £13 : 6 : 8 (20 marks) granted to the latter was very much larger than any of the other pensions, except the abbot's. The same difficulty meets us in tracing the history of John Wyldebere as we found in the case of John Dygon, namely the existence of two or more persons of the same name. A John Wyldebore was Master of the Hospital of St. Mary's at Strood, in Kent, up to the time of its surrender in 1531, and could not well be the late prior of St. Augustine's; there is, however, good reason for believing that he was the John Wylbore who was appointed prebendary of Rochester Cathedral in 1541, and who died there in 1553; and apart from this the claims of the head of a monastic establishment like St. Mary's Hospital would naturally be considered before those of one in a comparatively subordinate position, such as our prior's. John Dygon may perhaps be recognised in the John Wyldebore who was vicar of Willesborough in 1542. In 1556, when Cardinal Pole was appointed by Philip and Mary head of the commission to inquire into the state of the pensions due to the monks of the dissolved monasteries, we find John Wilborne, into which form the name has been corrupted, still in receipt of his full pension; if the terms of the original grant had been strictly adhered to, this circumstance would preclude the possibility of his identity with the John Wilbore, who was vicar of Minster in Thanet from 1550 till his resignation in 1557. After this time we lose all trace of the real or supposed John Dygon. The composition by which his name has been handed down to posterity is the work of a very skilful musician, and though there may be some resemblance in style to the music of Okeghem, as was very natural, considering how nearly contemporary the two composers were, we can hardly coincide with Ambros's opinion that it was 'altfränkisch,' at least when we compare it with other writings of a similar nature and about the same period; indeed some passages bear a comparatively modern stamp, and one can detect a foreshadowing of Giovanni Croce, and even of a still later style in several places. A. H. H.

DYKES, REV. JOHN BACCHUS, Mus.Doc., was born in Hull, where his grandfather was incumbent of St. John's Church, March 10, 1823. He received his first musical tuition from Skelton, organist of St. John's. In October 1843 he went to St. Catherine Hall, Cambridge, where he very soon obtained a scholarship. He graduated as B.A. in 1847, and in the same year, having taken Holy Orders, obtained the curacy of Malton, Yorkshire. During his stay in Cambridge he pursued his musical studies under Professor

Walmisley, and became conductor of the University Musical Society. In July 1849 he was appointed Minor Canon and Precentor of Durham Cathedral. In the next year he proceeded M.A. In 1861 the University of Durham conferred on him the degree of Doctor of Music, and in 1862 he was presented by the Dean and Chapter to the vicarage of St. Oswald, Durham, on which he resigned the precentorship. He died at St. Leonards, Jan. 22, 1876, and was buried in the churchyard of St. Oswald's, Jan. 28. Dr. Dykes composed many services and anthems, and a large number of hymn tunes, many of which have met with very general acceptance owing to their tunefulness, and to the composer's fondness for a rather sentimental style of harmonisation. Among these may be noted 'Nearer, my God, to Thee,' 'The day is past and over,' and 'Jesu, lover of my soul.' He took an active part in the compilation of 'Hymns, Ancient and Modern.' Beyond his musical repute he was much esteemed as a theologian. [A memoir of Dykes, by J. T. Fowler, was published by Murray in 1897. His son, JOHN ST. OSWALD DYKES (born Oct. 27, 1863), is a successful composer and pianist, a pupil of Mme. Schumann, and a professor of the pianoforte in the Royal College of Music since 1887. A trio by him was played at the Popular Concert of Jan. 16, 1888.] W. H. H.

DYNE, JOHN, a distinguished alto singer and glee composer. One of his glees, 'Fill the bowl,' obtained a prize from the Catch Club in 1768. In 1772 he was appointed a Gentleman of the Chapel Royal, and in 1779 a lay vicar of Westminster Abbey. He was one of the principal singers at the commemoration of Handel in 1784. A pistol-shot, by his own hand, terminated his existence Oct. 30, 1788. W. H. H.

E

E. The third note of the scale of C. In French and in solfaing, *Mi*. The first string, or *chanterelle*, of the violin, and the fourth of the double bass, are tuned to E in their respective octaves. E is the final of the Phrygian and Hypophrygian modes.

E is not a frequent key in orchestral compositions. At any rate neither Haydn, Mozart, Beethoven, Mendelssohn, Spohr, Schubert, or Schumann, have written a symphony in E major. The overtures to 'Fidelio' and 'Midsummer Night's Dream,' 'Deux Journées' and 'Tannhäuser,' are exceptions among overtures. In chamber music it is more often employed. Mozart has a fine pianoforte trio in it; Beethoven uses it in two pianoforte sonatas (op. 14, No. 1; 109). Bach's fugue in E (Bk. 2) is perhaps the most widely known of all the immortal forty-eight. Beethoven's pianoforte sonata, op. 90, and Brahms's fourth symphony, are two famous examples of the key of E minor.

E flat (Fr. *mi bémol;* Germ. *Es*) on the other hand has a splendid progeny, of which we need only mention the Eroica Symphony, the Septet, the fifth Pianoforte Concerto, two solo sonatas, op. 31, No. 3, and 'Les Adieux,' two string quartets, a pianoforte trio, and the 'Liederkreis,' among Beethoven's works alone; the St. Anne's fugue by Bach, with the noble Prelude which may or may not belong to it; Mozart's well-known Symphony; two of Haydn's 'Salomon Set,' etc. etc. G.

EAGER, JOHN, born August 15, 1782, at Norwich, where his father was a musical instrument-maker and organ-builder. Having learned from his father the rudiments of music, he was at twelve years old taken under the care of the Duke of Dorset, an amateur violinist, who carried him to his seat at Knowle, where free access to the library enabled him to repair the defects of his early education. His patron becoming insane he established himself at Yarmouth as a violinist and teacher of music. On the appearance of Logier's system of instruction Eager became one of its warmest advocates. In 1803 he was appointed organist to the corporation of Yarmouth. He passed the remainder of his life in teaching. [He settled in Edinburgh in 1833, and died there, June 1, 1853.] He is said to have possessed a knowledge of, and to have taught, nearly every instrument then in use. His compositions consist of a pianoforte sonata and a collection of songs. W. H. H.

EAGLES. See ECCLES.

EAMES, EMMA, was born of American parents at Shanghai, August 13, 1867, and was taken to Bath, Maine, U.S.A., at the age of five years by her mother; after studying singing at Boston, she went to Paris, where she was under Mme. Marchesi in 1886-88. In the latter year she was to have appeared at the Opéra Comique, but her actual début was delayed until 1889, when she appeared at the Grand Opéra as Juliette on March 13. She remained in the Opéra for two seasons, and created the parts of Colombe in Saint-Saëns's 'Ascanio,' and the title-part in De la Nux's 'Zaire.' On April 7, 1891, she made her first appearance at Covent Garden as Marguérite, and at once established herself as a favourite with the more musical part of the public, who appreciated the refinement of her style and the beauty and accuracy of her phrasing. In the same season she sang Elsa, Juliette, Mireille, and Desdemona (in Verdi's 'Otello'), and in all these the beautiful quality of the voice was admired. The middle notes have a timbre that is generally associated with mezzo-sopranos, and the higher notes are produced with such ease and flexibility as to make her execution of florid passages always delightful to listen to. In the following year, she created the principal part in De Lara's 'Luce dell' Asia,' and charmed all hearers by the perfection of her impersonation of the Countess in 'Figaro.' In the previous year she had married the painter Julian Story, and had sung in New York in the winter, as she continued to do for some years, alternately with the London season. In June 1894 she sang (for the first time in England) the part of Charlotte in Massenet's 'Werther,' created the chief part in L. E. Bach's 'Lady of Longford,' and added Eva and Elizabeth to her Wagnerian parts. The part of Eva suits her to perfection, as does that of Sieglinde in 'Die Walküre,' in which she was first heard in 1898. In that season she created the part of Hero in Mancinelli's 'Ero e Leandro.' In January 1900, in New York, and at Covent Garden, 1901, she appeared with great success as Aïda. In March 1900, in New York, as Pamina, and in December 1902 as La Tosca, the last two being parts in which she has not yet been heard in London. Up to the present time she has made her best successes in parts that do not require very much acting; at the same time, she is so much in earnest in what she does, that a genuine histrionic success may one day be hers; and in the present day dramatic power is a more common gift than such musicianship as is revealed in Mme. Eames's every phrase. It is among her lesser merits that in the matter of costume she shows an artistic taste and a faithfulness to the period represented that are too rare among *prime donne*. M.

EASTCOTT, REV. RICHARD, born in Exeter, 1740, was author of *Sketches of the Origin, Progress, and Effects of Music, with an Account of the Ancient Bards and Minstrels*, a well-

executed compilation published at Bath in 1793, which was so favourably received as to call forth a second edition in the same year. He also published six pianoforte sonatas and some songs. He died towards the end of 1828, being then chaplain of Livery Dale, Devonshire. He was the early patron of John Davy. W. H. H.

EASTE. See ESTE.

EBDON, THOMAS, born at Durham in 1738. It is presumed from the circumstance of the name and date 'T. Ebdon, 1755,' still remaining, carved on the oak screen which divides the choir of Durham Cathedral from one of the aisles, that he received his early musical education in that church as a chorister, and probably, after the breaking of his voice, as an articled pupil of the organist. In 1763 he was appointed organist of Durham Cathedral, which office he held until his death, forty-eight years afterwards, in Durham, on Sept. 23, 1811. [In 1783 he was associated with M. Hawdon, as conductor of the Newcastle Subscription Concerts; in 1786 he was associated with Meredith, and in 1790 with Charles Avison, junior, and Hawdon.] Ebdon's published compositions comprise two harpsichord sonatas (about 1780), six glees; a march for the installation of a grand provincial master of Freemasons; and two volumes of cathedral music, the first of which appeared in 1790, and the second in 1810. Besides these he left many anthems, etc., in MS., the last of them bearing date June 1811. W. H. H.

EBELING, JOHANN GEORG, born at Lüneburg in July 1637 (Riemann), was in 1662 director of the music at the Nikolaikirche of Berlin, and in 1668 professor of music at the Caroline Gymnasium at Stettin, where he died in 1676. He composed church music, and some chorales of his are favourites; *e.g.* 'Warum sollt ich mich denn grämen.' He published *Archaeologiae Orphicae sive antiquitates musicae*, Stettin, 1675; *Pauli Gerhardi Geistliche Andachten, bestehend in* 120 *Liedern mit* 4 *Singstimmen,* 2 *Violinen und General-bass*, Berlin, 1666-67; a reduction of the latter into two parts, 1669.

EBERL, ANTON, distinguished pianist and composer, born June 13, 1766, at Vienna. He was intended by his father, a well-to-do Government employé, for the law, but his love for music broke through all obstacles, and started him as a pianist. His theoretical studies were slight, but his first opera, 'La Marchande de Modes' (Leopoldstadt, 1787), is said to have pleased Gluck so much, that he advised the young composer to devote himself seriously to music. His friendship with Mozart was also of great service to him. His melodrama 'Pyramus and Thisbe' was produced at the court theatre in 1794, on his return from his first professional tour; but he soon undertook another in Germany, in company with Mozart's widow and Lange the singer. In 1796 he was appointed capellmeister at St. Petersburg, where he remained for five years greatly esteemed. On his return to Vienna he produced at the court theatre (May 1801) a romantic opera 'Die Königin der schwarzen Inseln,' which was however only a partial success. In 1803 he went again to Russia, and in 1806 travelled to all the principal towns of Germany, where the brilliancy and fire of his playing were universally acknowledged. He returned to Vienna and died suddenly March 11 (15, according to Becker), 1807. His compositions were long favourites. The following are among the most remarkable:—[Five symphonies dated 1783, 1784, and 1785, in MS. in the library of the Gesellschaft der Musikfreunde at Vienna]; 'Grand Sonata,' op. 27, dedicated to Cherubini; 'Gr. Sonate caractéristique' in F minor, op. 12, dedicated to Haydn (Peters); 'Variations sur un thème Russe,' for Violoncello obbl., op. 17; three Pianoforte Trios, op. 8, dedicated to Grand-Duke Pawlowitsch; Trio for Pianoforte, Clarinet, and Violoncello, op. 36 (Kühnel); Pianoforte Quartet in C major, op. 18, dedicated to Maria Theresa; ditto in G minor, op. 25 (Vienna); Clavier Quintet, op. 78 (Vienna); [Sestet for Piano, Strings, Clarinet, and Horn, in E flat, op. 47]; Pianoforte Concertos in C major, op. 32, and E♭ major, op. 40 (Kühnel); and three String Quartets, op. 13, dedicated to Emperor Alexander I. (Vienna, Mollo). He also published many smaller pianoforte pieces for two and four hands, and six Lieder, op. 4 (Hamburg); a wedding cantata with orchestral accompaniment, 'La gloria d' Imeneo,' op. 11, also arranged for pianoforte; and a Symphony in D minor (Breitkopf & Härtel). He left in MS. symphonies, serenades, concertos for one and two pianofortes, several pieces of chamber-music, and unpublished operas, besides the three already mentioned. [See the list of works still extant in the *Quellen-Lexikon.*] Though he has now entirely vanished from the concert-room, Eberl must in his day have been a very considerable person. It is well known that several of his pianoforte works were long published, and popular, as Mozart's,—viz. the fine Sonata in C minor (finally published with his own name as op. 1 by Artaria); Variations on the theme 'Zu Steffen sprach'; Variations on 'Freundin sanfter Herzenstriebe'; and on 'Andantino von Dittersdorf' (see Köchel's *Mozart*, anh. 287, 8). His symphony in E♭ would actually appear to have been played in the same programme with Beethoven's 'Eroica' (*A. M. Zeitung*, vii. 321); and the two are contrasted by the reviewer to the distinct disadvantage of the latter! C. F. P.

EBERLIN, JOHANN ERNST, court-organist and 'Truchsess' (or carver) [from 1754] to the Prince-Archbishop of Salzburg, and an eminent German composer of sacred music. His name, place and date of birth and death are here for the first time correctly given from official records. His original name was Eberle, which was turned,

according to a custom then common with women, into Eberlin, and as such he retained it. He was the son of the land-steward to Baron von Stain, and was born March 27, 1702 (not 1716) at Jettingen (not Jettenbach), a market-village near Günzburg, in the Upper-Danube district of Bavaria. He died at Salzburg, June 21, 1762 (not 1776). [From the *Monatshefte f. M.* 5, 41, we learn that he was fourth organist at the Cathedral of Salzburg in 1725-29, and chief organist in the latter year.] He was court-organist to Archbishop Franz Anton, Graf von Harrach, as early as the time of his marriage, which took place in 1727 at Seekirchen on the Wallersee, near Salzburg. Of his early life or musical education nothing is known, and the number even of his many valuable contrapuntal works can only be imperfectly ascertained. Among the best known are 'IX Toccate e fughe per l'organo' (Lotter, Augsburg, 1747), dedicated to Archbishop Jacob Ernst. They passed through many editions, and are also printed in Commer's *Musica Sacra*, vol. i. Nägeli's edition contains only the nine fugues. The last fugue, in E minor, was published (in E♭ minor) as Bach's in Griepenkerl's edition of Bach's works (Book ix. No. 13), an error which has since been corrected. Six preludes and fugues are in part 12 of the *Trésor des Pianistes*. Haffner published sonatas in G and A, and Schott two motets, 'Qui confidunt' and 'Sicut mater consolatur,' for three voices, with clavier accompaniment. To Leopold Mozart's collection for the Hornwerk at Hohen-Salzburg, 'Der Morgen und der Abend' (Lotter, 1759), Eberlin also contributed five pieces. [Eitner in the *Quellen-Lexikon* gives a list of his church compositions in MS. in the libraries of Berlin, Vienna, Salzburg, Munich, Ratisbon, and] Fétis cites the Latin dramas he composed for the pupils of the Benedictine monastery at Salzburg (1745-60), of which, however, the words only are extant. Proske's library contains the autographs of thirteen oratorios, including the 'Componimento sacro,' performed with great success at Salzburg in 1747. The Gesellschaft der Musikfreunde at Vienna possesses a copy of a mass and a fugue for two choirs with double orchestra. Eberlin's strict writing was so much prized by Mozart, that about 1777 he copied thirteen of his pieces (mostly church music in four parts), together with some by M. Haydn, into a MS. book which he kept for his own instruction, and which still exists. He afterwards (1782) however wrote to his sister that Eberlin's fugues could not be ranked with those of Bach and Handel—'All honour to his four-part pieces; but his clavier fugues are merely extended Versetti.' Marpurg was the first to proclaim his merit (*Kritische Beiträge*, Berlin, 1757, vol. iii. Stück 3, p. 183), and says that he wrote as much and as rapidly as Scarlatti and Telemann. C. F. P.

EBERS, Carl Friedrich, son of a teacher of English at Cassel, born March 25, 1770, a man evidently of great ability, but as evidently of little morale, taking any post that offered, and keeping none; doing any work that turned up to keep body and soul together, and at length dying in great poverty at Berlin, Sept. 9, 1836. [He was in Schwerin in 1793, and at Strelitz in 1797.] Some of his arrangements have survived, but his compositions—four operas, cantatas, symphonies, overtures, dance music, wind-instrument ditto, and, in short, pieces of every size and form—have all disappeared from the musical repertory with the exception of a little drinking-song, 'Wir sind die Könige der Welt,' which has hit the true popular vein.

One occurrence, in which he succeeded in annoying a better man than himself, is worth perpetuating as a specimen of the man. In the number of the *Allg. Mus. Zeit.* for Dec. 11, 1816, appears a notice from C. M. von Weber to the following effect:—'Herr Hofmeister of Leipzig has published a quintet of mine (op. 34) for clarinet and strings, arranged as a solo sonata for piano, with the following misleading title, "Sonata for the PF., arranged by C. F. Ebers from a Quintuor for Clarinet by C. M. de Weber, op. 34." I requested Herr Hofmeister to withdraw the publication on the ground that it was inaccurate and unfair, and most damaging to the original work; but he has vouchsafed me only a curt statement that if the arranger is to blame I may criticise him as severely as I like, but that to him as publisher it is a matter of no moment. I have therefore no other course than to protest with all my might against the arrangement, abstaining from all comment, except to mention that without counting engravers' blunders, my melodies have been unnecessarily altered forty-one times, that in three places one bar has been omitted, in another place four bars, in another eight, and in another eleven.—C. M. von Weber, Berlin, Nov. 22, 1816.' This drew forth a reply from Ebers addressed to 'the lovers of music,' and appearing in the next No. of the *Zeitung*:—'Herr Schlesinger of Berlin has published as op. 34 of C. M. von Weber a Quintet for Clarinet and Strings—where five people play together I believe it is called a quintet—which is so absolutely incorrectly engraved that no clarinet player not previously acquainted with the work can possibly detect and avoid the mistakes in certain places—such as bar 60 of the second part of the first allegro. I took the trouble to put the thing into score, and found the melodies pretty and not bad for the piano; and, as every man is free to arrange as he likes, I turned it into a solo sonata, which I can conscientiously recommend to the lovers of music without any further remarks. As clarinet passages, however, are not always suitable for the piano, I have taken the liberty to alter and omit where I found mere

repetitions without effect. This has been done with intelligence, and it is absurd to talk of disfigurement. Mozart and Haydn were great men, who sought their effects by other means than noise and display, oddity or absurdity; they gladly welcomed arrangements of their works, as Beethoven himself does every day. But should it still annoy Herr Weber to see his child in a new dress, and should he therefore withdraw his paternity from it, I shall then have to ask the public to acknowledge me as its foster father. But the public has a right to insist that Herr Schlesinger shall free his publications from mistakes, for as long as one work remains uncorrected he is open to the remark of *ne sutor ultra crepidam*.—Leipzig, 6 Dec. 1816.' G.

EBERS, JOHN, born in London of German parents about 1785, originally a bookseller and ticket-agent; undertook the management of the opera at the King's Theatre in 1821, with Ayrton as musical director. He engaged Garcia, Galli, Mme. Camporese, Pasta, and other celebrated singers, besides Rossini (1824), but the expenses were so enormous, that in seven years he was completely ruined. [See the *Quarterly Mus. Mag.* iii. 379, vi. 516-526, vii. 188-191. He resumed his business as a bookseller after his failure. See *Dict. of Nat. Biog.*] He published *Seven Years at the King's Theatre* (London, H. Ainsworth, 1828), an interesting record of Italian opera at that time in London. [The date of his death is unknown, but his business was carried on with the style 'John Ebers & Co.' until 1836, when it was called 'S. Ebers & Co.' This may imply that he lived until about 1835, but it seems more likely that he died about 1830.] M. C. C.

EBERWEIN, TRAUGOTT MAXIMILIAN, violinist and composer, of great note in his day, though now quite forgotten, born at Weimar, Oct. 27, 1775. At seven he played in the court band of Weimar, where his father was engaged. In 1797 he entered the service of the Prince of Schwarzburg-Rudolstadt, but it was not till 1817 that he became his capellmeister. In the interval he travelled much, making the acquaintance of Adam Hiller and Zelter at Berlin, and of Beethoven and Salieri at Vienna. He was a man of some influence and position, and one of the original founders of the musical festivals in Germany. He died at Rudolstadt, Dec. 2, 1831. His works, more numerous than original, include eleven operas [of which 'Claudine von Villa Bella' (1815), and 'Der Jahrmarkt von Plundersweile' (1818), enjoyed some celebrity: three others are mentioned in the *Quellen-Lexikon*]; three cantatas; a mass in A♭, his best work; a symphonie-concertante for oboe, horn, and bassoon; concertos, quartets, etc. M. C. C.

ECCARD, JOHANN (1553-1611), was born at Mühlhausen, Thuringia, in 1553. An engraved portrait of him, dated 1634, is inscribed 'natus anno 1553, obiit 1611.' Eccard was a pupil of David Köller in the Kapellschule at Weimar from 1567 till 1571, when he was paid three Gulden 'zu endlicher Abfertigung' (E. Pasqué's MS. 1892, published in *Monatshefte*, 1897). He probably went that year to Munich to study under Orlando di Lasso; Stobæus (*Preuss. Festlieder*) refers to him as a pupil of the 'world-famed' Orlando. Eccard had returned to Mülhausen in 1574. In 1578 he was musician in the household of Jacob Fugger of Augsburg; for in dedicating his 'Newe deutsche Lieder,' 1578, to the three brothers Fugger, he says:—'Also hab' ich verschiener Zeit, in des . . . Herrn Jacob Fuggers, meines gnedigen Herrn, E. G. gebrüder dienst etliche deutsche Lieder,' etc., dated from Augustae Vindelicorum 1578. Similarly a MS. Mass in the Munich Hofbibliothek is dated 'de Jacobi Fuggeri Musico, 1578.' By 1581 Eccard was settled in Königsberg; in that year he published there his five-part music to some wedding hymns, in conjunction with the capellmeister, Theo. Riccio, and in the following year the five-part music to Psalm cxxxiv. (Jos. Müller, *Mus. Schätze*, 1870). Eccard was appointed vice-capellmeister and musicus by the Markgraf Georg Friedrich of Brandenburg-Ansbach, and later, in 1604, he succeeded Riccio as capellmeister. On July 4, 1608, Eccard was summoned to Berlin to be capellmeister to the Kurfürst Joachim Friedrich of Brandenburg; the latter died on July 18, and was succeeded by Johann Sigismond, who in a letter on the following Sept. 11, confirmed the appointment on the grounds that Eccard was greatly famed and his equal not easily to be found, that he was an old, peaceful and quiet man, and that the salary, considering his attainments, was not too high! 'Er von menniglich gerühmet wird, dass Wir so leicht seines gleichen nicht haben können, und ein alter friedsamer stiller Mann sei,—die Bestallung auch, seinen Qualitäten nach nicht so gar hoch—also haben Wir ihm zusagen lassen' (L. Schneider, *Gesch. der Oper*. 1852. Anhang. pp. 23, 25). Eccard died shortly afterwards in 1611.

Eccard's reputation as a composer is inseparably connected with Church-song. His treatment of well-known chorales in his great work *Geistliche Lieder*, 1597, as well as of the fine chorales of his own composition, causes him to stand out prominently among his contemporaries. This work, consisting of motets for five voices, was undertaken at the request of the Markgraf Georg Friedrich; Eccard himself thought it the first real attempt to produce a cantional, written not only with religious but with musical and artistic aims: 'Darin nach musikalischer Art, was anmüthiger und der Kunst gemässer enthalten wärs.' Among his chorales which became a permanent part of Church-song were the three, first published in 1574 (IIII Odae); the four which appeared in *Dreissig geistliche Lieder* 1594; 'Es rühmt die heilige Schrift,' composed

for a wedding-hymn in 1591; and 'Nachdem die Sonn, beschlossen,' from the 'Gebetlein' 1600. Zahn (*Die Melodien der deutschen evangelischen Kirchenlieder*, 1889-93) gives twenty melodies with their sources and the various publications in which they subsequently appeared. There have been many reprints of Eccard's sacred songs; Herr v. Winterfeld, who considered that the characteristic strength and feeling in these compositions fully equalled anything produced by his Italian contemporaries, printed altogether forty-six of them (*Der Evangelische Kirchengesang*, vols. i. and ii. 1843). Ten of Eccard's compositions, including 'O Freude über Freude' for double choir, are in *Musica Sacra*, vols. v. and vi., edited by A. Neithardt for the use of the Berlin Domchor; eleven are in Fr. Wüllner's *Chorübungen der Münchener Musikschule*, 1893-1895; in Commer's *Geistliche und weltliche Lieder*, 1870, Nos. 5 and 6; in Reissmann's *Allgemeine Geschichte der Musik*, 1863, Nos. 10 and 11; in Sir H. Bishop's '12 Coräle,' 1844, No. 11; one set to the English words 'When Mary to the Temple went,' edited by Otto Goldschmidt in the *Bach Choir Magazine*, has a quaint simplicity which is very pleasing. G. W. Teschner (1860-90) reprinted both the *Geistliche Lieder*, two vols., and the *Preussische Festlieder*, two vols.

On the other hand, Eccard's secular works, comparatively limited in number, have been carefully edited by Robt. Eitner, in the *Publ. älterer prakt. u. theoret. Musikwerke*, vol. xxi. 1897. He notes approvingly that Eccard differs from his contemporaries inasmuch as he always marks the necessary sharpening or flattening of notes.

List of compositions:—

1. IIII Odae Lud. Helmboldi, Latinae et Germanicse . . . in 4 Stimmen componiret, durch J. à Burck, & Johannem Eccardum, Mulbusinum. Mülhausen. Georgium Hantzsch. 1574. Obl. 4to. Discantus and Bassus in Brieg Gymnasialbibl. Three of the Odes were set to music by Eccard;—(1) Age nunc, parve puer. (3) Das noch viel Menschen. (4) Ihr Alten pflegt zu sagen. They were included in Helmbold's Crepundia sacra, 1578; later editions in 1589, 1596, 1608, and 1626. A. Prüfer reprinted it in 'Untersuchungen über den ausserkirchlichen Kunstgesang.' Leipzig, 1890.

2. Neuwe teutsche Lieder, mit vieren und fünff Stimmen, gantz lieblich zu singen, und auff allerley Musikalischen Instrumenten zu gebrauchen, mit besonderm fleiss und Observation componieret durch Johannem Eccardum Mulh. Des wohlgebornen Herrn Jacobi Fuggers Musicum. Mülhausen. G. Hantzsch. 1578. Obl. 4to. Twenty-four compositions, two only being to sacred words. Five partbooks in Upsala Library.

3. Newe Lieder mit 5 und 4 Stimmen, gantz lieblich zu singen, und auff allerley Instrumenten zu gebrauchen: Durch Joh. Ecc. Mulh. F.D. (Fürstlicher Durchlaucht) in Preussen Musicum und Vice Capellenmeister componirt, corrigirt und in Druck verfertiget. Königsperg in Preussen. Georg Osterberger. 1589. Obl. 4to. Dedicated to the Burggrafen, Bürgermeister, etc., of Danzig. Twenty-five compositions, fifteen secular, ten sacred. Five partbooks in Berlin Königl. Bibl., etc. Reprinted in score by Eitner, 1897 (see above).

4. Epigrammata in honorem nuptiarum . . . per Th. Riccium. 6 vocibus. 1586. Obl. 4to. Includes 'Virgo boni patris' by Eccard.

5. XX Odae sacrae: Lud. Helmboldi . . . Harmonicis numeris, pro scansione versuum ornatae & compositae 4 vocibus a Joh. Ecc. Mulh. illus. Principis ac Domini, D. Georg. Frid. Marchionis Brandenburgensis, etc. Chori musici Vicemagistro. Impensis Hyeron. Reinhardi Mulhusini. 1596. Sm. 8vo. One volume, in Zwickau Ratsschulbibl. Another edition in 1626, possibly an earlier one in 1574.

6. Dreyssig geistliche Leider . . . mit 4 Stimmen auff besondere darzu von L. Helmboldo verordnete Textus . . . und ausgegangen von J. à Burck. Mülhausen. Andream Hantzsch. 1594. 12mo. Nos. 11. Zu dieser österlichen Zeit; 13. Gen Himmel fehrt; 15. Der heilig Geist; 20. Uebers Gebirg Maria; were by Eccard. An earlier edition probably published in 1585, later editions in 1609 (Erfurt) and 1626.

7. Der erste Theil Geistlicher Lieder auff den Choral oder die gemeine Kirchen-Melodey durchaus gerichtet, und mit fünf Stimmen componiret durch Joh. Ecc. Mulh. F. D. zu Preussen, etc. Musicum und Vice Capellmeistern. Königsberg in Pr. G. Osterberger. 1597. Obl. 4to.

Der Ander Theil Geistlicher Lieder, etc. 1597. Obl. 4to. Vol. i. contains twenty-three and vol. ii. twenty-nine compositions; the melodies are in the Discant. The five partbooks of each vol. in Frankfurt Gymnasialbibl., etc.

8. Echo nuptialis magnifico . . . Andreae Fabricio, etc. A Johanne Eccardo Mulh., etc. Ex officina G. Osterbergeri. 1597. Obl. 4to. Echo a 8 voci. The eight voice parts in British Museum.

9. Viertzig deutsche Christliche Liedlein L. Helmboldi . . . in 4 Stimmen abgesetzet, die ersten 22 durch J. à Burck, die letzten 18 durch Joh. Ecc. Mulh. Auffs neu zusamen gedruckt zu Mülhausen. A. Hantzsch. 1599. 8vo. Four partbooks in Hamburg Stadtbibl., etc.

10. Gebetlein umb ein gnediges glückseliges Newes Jahr zu Ehren unser gnedigsten Herrschaft der Hertzoge in Preussen, etc. Mit 5 Stimmen componirt durch Joh. Eccard. Königsberg in Pr. G. Osterberger. 1600. 4to. Text: 'Nachdem die Sonn' beschlossen.' Five partbooks in Königsberg Univ.-Bibl.

11. Geistliche Lieder auff gewöhnliche Preussische Kirchen-Melodeyen durchaus gerichtet, und mit 5 Stimmen componiret. Durch Joh. Ecc. Mulh. Thuringum, und J. Stobaeum, etc. Dantzigk. Georg Rheten, 1634. Obl. 4to. 102 compositions, fifty-seven by Eccard, which include his fifty-two geistliche Lieder, publ. 1597. Five partbooks in Königsberg Univ.-Bibl., etc.

12. Erster Theil der Preussischen Festlieder, von Advent an bis Ostern mit 5, 6, 8 Stimmen. Joh. Ecc. Mulh. Thur. und J. Stobaeus etc. Elbing. Wendel Bodenhausen. 1642. Obl. 4to.

Ander Theil . . . von Ostern an bis Advent mit 5, 6, 7, 8 Stimmen, etc. Königsberg. J. Reusner. 1644. Obl. 4to. Sixty-one compositions; thirteen in vol. i. and fourteen in vol. ii. are by Eccard, they include in vol. i. No. 25) No. 7 of the Newe Lieder, 1589; and 'Der heilig Geist,' 'Zu dieser österlichen Zeit' from Dreyssig geistliche Lieder, 1594. Six partbooks of each vol. are in Elbing Marienkirche Bibl., etc. The first edition is said to have been published at Königsberg, 1598.

There are forty-seven small works of Eccard in the Königsberg Univ.-Bibl. with four exceptions, all wedding hymns (some of them composed 'nach Villanellen art'), for 4, 5, 6, or 8 voices, published at Königsberg between 1585 and 1609. (Jos. Müller, Kat.) There are two in the Breslau Stadtbibl.; 'Tria me exhilarant' for 6 voices, 1585 (one partbook missing) and 'Honorabile est inter omnes' for 5 voices 1610 (Bohn Kat.). Some of these were later fitted with sacred words and included in the Preussische Festlieder, 1642-44.

Odarum sacrarum. Six vols. Mülhausen. 1626. A collected edition of Helmbold's works included:—vol. iv. Odae sacrae (1596); vol. v. Dreyssig geistliche Lieder (1594); vol. vi. Crepundia sacra (1677).

Geistliche Lieder. Matthaeum Pfeilschmidt. 1608. Some five part Choräle.

Geistliche u. Tröstliche Lieder. Michaelum Weyda. 1643. Several melodies.

Cantionale sacrum. Gotha. 1646-48; later ed. 1651-57. One composition.

Preussische Kirch- und Fest-Lieder. J. Reinhard. 1653. Forty-three melodies with figured bass, which included seventeen of those published in 1634.

Christlich . . . Gesangbuch. Erffurth, 1663. Three melodies, Passionale Melicum. Martino Jano. Görlitz. 1663. One melody.

Joh. Crüger's Praxis pietatis. Peter Sohren. Frankfurt, 1668.

Four melodies with figured bass. Another edition, 1693, has one.

Preussisches Kirchen- Schul- u. Haus-Gesangbuch. 1675, and again in 1690 has five melodies. Another edition, 1702, has eight.

Musikalischer Vorschmack. Peter Sohren. 1683. Four melodies with bass.

Neue Christliche Lieder. H. G. Demme. Gotha, 1799. Nos. 33 to 44, melodies by Eccard, Burck, etc.

Dr. Martin Luther's deutsche geistliche Lieder. C. v. Winterfeld. Leipzig, 1840. Nos. 6, 9, 13 from Geistliche Lieder 1597, vol. ii.

MSS.

In the Augsburg Stadtbibliothek: MS. 26 (1578); two motets *a* 5 voci, 'Vultum tuum diprecabuntur' and 'Terribilis est locus iste.' A Kyrie *a* 4 voci. MS. 28 (1579) Missa *a* 5 voci, 'Mon cœur se recommande à vous.' This Mass is also in the Munich Hofbibl. (Mus. MS. 57) dated: 'Auctore Joanne Eccardo, Mulhusino, de Jacobi Fuggeri Musico. 1578,' which is altered in another handwriting to 1598. From this MS. the Kyrie, Sanctus, and Agnus Dei were scored and published by Fr. Wüllner, *Chorübungen der Münchener Musikschule*, 1895.

In the Breslau Stadtbibl. MSS. 12, 17, 18, 20, 32, and 137 contain many of the Geistliche Lieder, publ. 1597. In the Königsberg Universitätsbibl.-Motets: *a* 5 voci, 'Divitias quaerant alii' (with Basso continuo) and 'Kein edler Ding' (Discantus missing); *a* 6 voci, 'Gott ist mein Heil' (two copies) and 'Nuper saevus amor' (Discantus missing). Masses: *a* 5 voci, 'Domine ad adjuvandum' and 'Veni sancte spiritus;' *a* 6 voci, 'Domine quid multiplicati.' Also compositions in MSS. 66, 67, 69, 75 to 78, and 394.

In the Liegnitz Königl. Ritter-Akademie Bibl., in MSS. 15, 18, 19, 20, and 23, are fifteen different Geistliche Lieder for 4 and 5 voices.

Eitner (*Quellen-Lexikon*) also gives a large number of MSS. in the Berlin Königl. Bibl.; a five-part motet (Codex 96) in the Nuremberg Lorenzkirche Bibl.; and 'O Freude über Freude,' for double choir (MS. 278, No. 10, in Score) in Dresden Hofbibliothek.

C. S.

ECCLES, or EAGLES, SOLOMON, born in 1618; his ancestors for three generations had been musicians, and he was from about 1647 a teacher of the virginals and viols, a pursuit from which he for some years derived £200 a year (see his *Musick-Lector*) but embracing the tenets of Quakerism about 1660, he abandoned

his profession, broke all his instruments, and burned them, together with his music books (the value of the whole being more than £24), on Tower Hill, and adopted the trade of a shoemaker. [His vagarics during the early part of Charles II.'s reign, and particularly during the great plague of 1666, when he ran naked through the town with a brazier of burning brimstone on his head, point to a deranged intellect.] In 1667 he published a curious tract entitled *A Musick-Lector, or, The Art of Musick . . . discoursed of, by way of dialogue between three men of several judgments; the one a Musician . . . zealous for the Church of England, who calls Musick the gift of God: the other a Baptist who did affirm it to be a decent and harmless practice: the other a Quaker (so called) being formerly of that art doth give his judgment and sentence against it, but yet approves of the Musick that pleaseth God*—from which the foregoing particulars are gathered. [He accompanied George Fox to the West Indies in 1671, and organised Quakerism there. He was in New England in 1672, was prosecuted in 1680 at Barbadoes for seditious words.] He is supposed to have resumed his profession and contributed several ground basses with divisions thereon to 'The Division Violin.' [He died Feb. 11, 1683, and was buried at Spitalfields.]

His eldest son, JOHN, was born in London about the middle of the 17th century.[1] He learned music from his father, and about 1681 became engaged as a composer for the theatre, in which occupation he continued for upwards of a quarter of a century. Among the earlier plays to which he wrote music, are 'The Spanish Friar,' 1681; 'The Lancashire Witches,' and 'The Chances,' 1682; 'The Richmond Heiress,' 1693; and 'Love for Love,' 1695. Of the pieces to which he contributed, the most important (musically considered) were 'Don Quixote' (with Purcell), 1694; 'The Loves of Mars and Venus,' (with Finger) 1696, and a revival of 'Macbeth' in 1696; 'Europe's Revels for the Peace,' 1697; 'The Sham Doctor,' 1697; 'Rinaldo and Armida,' 1699; and 'Semele,' 1707. A longer list of the plays will be found in the *Dict. of Nat. Biog.* In 1704, after the death of Dr. Nicholas Staggins, Eccles was appointed master of the King's Band of Music, in fulfilment of the duties of which office he composed numerous birthday and New Year's odes. He had been a member of the band since 1700, when he gained the second of the four prizes given for the best compositions of Congreve's masque, 'The Judgment of Paris'; the first being awarded to John Weldon, and the third and fourth to Daniel Purcell and Godfrey Finger. The score of Eccles's music for this piece was printed. [In the same year he wrote music to Congreve's 'Way of the World.'] In 1701 he set the ode written by Congreve for the celebration of St. Cecilia's Day in that year; [and in 1702 wrote music for the coronation of Queen Anne]. About 1710 he published a collection of nearly one hundred of his songs, comprising many of those which he had written for no fewer than forty-six dramatic pieces. The freshness and flow of Eccles's melodies rendered his songs universal favourites. In the latter part of his life he gave up all professional pursuits, except the annual production of the birthday and New Year's odes, and retired to Kingston-upon-Thames for the diversion of angling, to which he was much attached. He died at Kingston, Jan. 12, 1735.

[1] [Eitner and Riemann give 1668 as the date of birth, apparently taking the statement from *Brit. Mus. Biog.* This would make him only thirteen years old when he began to write music for the theatre, and no evidence for the date is forthcoming.]

HENRY, second son of Solomon, was a violinist of considerable ability, and a member of the King's Band from 1694 to 1710; conceiving himself neglected in England, he betook himself to Paris, where he was admitted a member of the French King's Band. In 1720 he published at Paris, in two books, Twelve Solos for the Violin written in the style of Corelli. [He was living in Paris in 1735, and Mendel's *Lexikon* gives 1742 as the date of his death, but without giving any authority.]

THOMAS, youngest of the three sons of Solomon, studied the violin under his brother Henry, and became an excellent performer. Being idle and dissipated, he gained a scanty and precarious subsistence by wandering from tavern to tavern in the city and playing to such of the company as desired to hear him. W. H. H.

ECCLESIASTICON. A collection of classical church music in score, published by Diabelli & Co. (now Schreiber) of Vienna. Its contents are as follows:—

No.		No.	
1-20.	Michael Haydn, Graduales.	63.	Czerny, six Graduales.
21.	Horzalka, Missa Solennis. op. 27.	64.	Reissiger, Grand Mass in E♭.
22.	Stadler, Salvum fac.	65.	Mozart, Tremendum.
23.	Do. Magna et mirabilia.	66.	Sechter, Salve Regina and Ave Maria.
24.	Mozart, Regina cœli.	67.	Worzischek, Offertorium.
25-34.	Cherubini, Offertorium and Graduales.	68.	Geiger, Mass.
35.	Stadler, Delectare.	69-71.	Assmayr, Offertoriums.
36.	Do. Si Deus.	72.	Mozart, Offertorium in F.
37.	J. S. Bach, Chorus, Da pacem.	73.	Seegner, Mass in F.
38.	Winter, Dominus Israel.	74.	Sechter, Missa Solennis in C.
39.	Sechter, Mass, Graduale, etc.	75.	Mozart, Sancti et Justi.
40.	Albrechtsberger, Offertorium.	76.	Seegner, Grand Mass in E♭.
41-62.	Michael Haydn, Graduales.	77.	Do. Mass in D.
		78.	Beraneck, Offertorium

ECHO. The organs built immediately after the Restoration generally contained what was then a novelty in England, called the Echo. This consisted of a repetition of the treble portion of a few of the leading stops of the organ, voiced softly, shut up in a wooden box, placed in some remote part of the organ case—usually behind the desk-board—and played upon by a separate half row of keys. The 'echo effect' enjoyed great popularity for many years, and exercised an influence on much of the contemporary music both for voices and instruments. Purcell in some of his anthems exhibited a predilection for the loud and soft contrast; while most of the pieces written for keyed instruments abounded with recognitions of it up to the time of Handel, whose

Concertos, Suites, etc., gave fresh impetus to the popular taste. [CORNET.] [Modern echo organs are often placed at a distance from the main body of the instrument, with which they are connected by electricity; they generally possess a manual of their own, sometimes (as at Norwich and Westminster), styled a 'Celestial Organ.' At St. Paul's, when it is played from the Solo manual, and used to accompany the voice of the priest at the altar, it is called the 'Altar Organ.' T. E.] E. J. H.

ECHOS DU TEMPS PASSÉ. One of those popular collections of which the French have so many. It embraces Airs, Brunettes, Chansons à boire, Chansons à danser, Noëls, Rondeaux, Gavottes, Musettes, Minuets, from the 12th to the 18th centuries, by Adam de la Hale, Lasso, Marot, Arcadelt, Ronsard, Charles IX., Louis XIII., Lulli, Rameau, Couperin, Rebel, etc., edited with accompaniments by J. B. Weckerlin, in 3 vols. 8vo (Durand, Paris).

ECK, JOHANN FRIEDRICH, an eminent violin player, born 1766 at Mannheim, where his father was a horn player in the band. He was a pupil of Danner, and soon rose to be one of the best violin players in Germany. Reichardt of Berlin speaks of him as having all the qualities of a really great player—large tone, perfect intonation, taste and feeling, and adds that, with the single exception of Salomon, he never heard a better violinist. From 1778 to 1788 Eck was a member of the band at Munich, and afterwards conducted the opera of that town. In 1801 however, having married a lady of rank and wealth, he quitted Germany and spent the rest of his life in Paris, and in the neighbourhood of Nancy. [Riemann gives the date of his death as 1809 or 1810 and the place as Bamberg.] Eck published four Concertos for the violin, and a Concertante for two Violins.

His most distinguished pupil was his brother FRANZ, also an eminent violin player, born at Mannheim, 1774. He entered the band at Munich while very young; but, driven from that city by a love-affair, he travelled in 1802 through Germany, and gained a great reputation as violinist. The Duke of Brunswick was at that time looking out for a master on the violin for Spohr, then eighteen, in whose rising talent he took a lively interest. He invited Eck to Brunswick and confided to him the technical education of the future great musician. They at once set out on a tour to Russia, Spohr getting instruction at the places where the journey was broken, but otherwise profiting chiefly by hearing his master. In his autobiography he speaks very highly of Eck as a violin player. He describes his style as powerful without harshness, exhibiting a great variety of subtle and tasteful *nuances*, irreproachable in his execution of difficult passages, and altogether possessing a great and peculiar charm in performance. On the other hand, Eck was evidently an indifferent musician, unable to enter into the compositions of the great masters, and showing great incapacity in his own attempts at composition. That he was not ashamed to pass off unpublished compositions of his brother and other composers under his own name confirms the low estimate of his general character to be gathered from Spohr's narrative. On arriving at St. Petersburg in 1803 he met with great success, and was appointed solo-violinist to the Court, but becoming involved in a scandalous affair, he fell into disgrace and was transported by the police over the Russian frontier. His health broke down and he became insane. After living in the care of his brother at Nancy he appears to have died in a lunatic asylum at Strasburg in 1804. Eck's importance in musical history rests mainly on the fact of his having been the master of Spohr, and thus having handed over to that great artist the traditions and principles of the celebrated Mannheim school of violin-playing. P. D.

ECKERT, CARL ANTON FLORIAN, violinist, pianist, composer, and conductor, born at Potsdam, Dec. 7, 1820. Left an orphan at an early age he was brought up in barracks by his father's comrades, but owed his education to the poet F. Förster of Berlin, who had him taught by Greulich, H. Ries, and Rungenhagen. His early ability was remarkable, not only as a player, but as a composer. By the age of ten he had completed an opera, 'Das Fischermädchen,' by thirteen an oratorio, 'Ruth,' and by twenty another, and both these were performed, and are warmly praised in the *A.M.Z.* of the time. He studied under various musicians, and in 1839 had the good fortune to become a pupil of Mendelssohn's at Leipzig. With characteristic sympathy for talent Mendelssohn gave him great encouragement, attached himself warmly to him, spoke of him as 'a sound, practical musician,' and corresponded with him. His oratorio 'Judith' was performed by the 'Sing-Akademie' in Berlin in 1841, and in the following year the King of Prussia sent him to Italy for two years. On his return he composed an opera, 'Wilhelm von Oranien,' which was successfully performed in Berlin (1846) and at the Hague (1848). In 1851 he became accompanist to the Italian theatre in Paris, then accompanied Sontag on her tour in the United States, returning to Paris in 1852 as conductor of the Italian Opera. In 1853 he was called to Vienna to take the direction of the Court Opera, a post which he filled with great ability and distinction. But none of these things could satisfy him, and in 1860 he went to Stuttgart as capellmeister in Kücken's place. This, too, he threw up in 1867; but in 1869 he was suddenly appointed to the head directorship at Berlin in place of Dorn, who was pensioned to make way for him. [He died in Berlin, Oct. 14,[1] 1879.] Eckert was one of the

[1] The fact that an obituary notice appeared in *The Times* of Oct. 16, is sufficient refutation of Riemann's statement that he died on Oct. 17.

first conductors of his day, but as a composer he is hardly destined to live. He composed three operas, much church music, a symphony, a trio, and many pieces of smaller dimensions; but none has made anything that can be called an impression, unless it be a few songs (his so-called 'Echo Song' is still a favourite with high sopranos) and a fine violoncello concerto. M. C. C.

ÉCOSSAISE. A dance, as its name implies, of Scotch origin. It was at first accompanied by the bagpipes, and in its original form was in 3–2 or 2–4 time. The modern Écossaise, however, is a species of contredanse in quick 2–4 time, consisting of two four-bar or eight-bar sections, with repeats. Franz Schubert wrote a number of Écossaises for the piano, which will be found in his opp. 18, 33, 49, and 67. The following example of the first part of an Écossaise dates from the commencement of the 18th century.

E. P.

EDDY, Clarence, an excellent and well-known American organist, teacher, and composer, was born at Greenfield, Massachusetts, June 23, 1851. His musical leanings were manifested during his childhood, when he showed also a notable skill in improvisation. Such instruction as was procurable in his native town was given to him until he had reached the age of sixteen, when he was sent to Hartford, Connecticut, and placed under the care of Mr. Dudley Buck. Within a year he was appointed organist of the Bethany Congregationalist Church, Montpelier, Vermont. In 1871 Eddy went to Berlin, where for two years and a half he studied under August Haupt and A. Loeschhorn. His progress was rapid and thorough, and he afterwards undertook a successful concert tour through Germany, Austria, Switzerland, and Holland. On his return to the United States in 1874 he was appointed organist of the First Congregational Church, Chicago. He soon took a prominent position in the musical life of the young city, and has ever since held it. While organist at the church last named he gave his first series of organ concerts, twenty-five in number, the programmes of which included examples of organ music in all reputable schools. In 1876 he became general director of the Hershey School of Musical Art, and soon after married its founder, Mrs. Sara B. Hershey. The institution has been peculiarly successful in the training of organists and singers. A series of one hundred weekly concerts was given by Eddy on the organ belonging to the school. In all, some 500 works were played. No composition was repeated, and no important composer or style was omitted from representation. Several famous composers wrote pieces for the 100th concert, June 23, 1879. Eddy has since given organ concerts in many other cities of the Union, and toured in Europe in 1897-98, etc. He translated and published, in 1876, Haupt's *Theory of Counterpoint and Fugue*. He has also published two collections, 'The Church and Concert Organist' (1882 and 1885). Eddy's compositions for the organ are in the classic forms, embracing preludes, canons, and fugues. From 1879 he was organist of the First Presbyterian Church, Chicago, where he conducted the Philharmonic Vocal Society for some years. F. H. J.

EDWARDS, Henry John, born at Barnstaple, Devon, Feb. 24, 1854. Was at first a pupil of his father, John Edwards (1808-94), a distinguished Devonshire organist, and afterwards studied in London, with Sterndale Bennett, Macfarren, H. C. Banister, and G. Cooper. He took the degree of Mus.B. at Oxford in 1876, and proceeded to that of Mus.D. in 1885. In 1886 he succeeded his father as organist of Barnstaple Parish Church and conductor of the Easter Musical Festival Society. In 1896 he became conductor of the Exeter Oratorio Society. He has done fine work as a teacher and promoter of musical culture in the west of England, and among his compositions are many works of earnest aim and originality of idea, although they have little in common with the ultra-modern style of music. A setting of Psalm cxlv. was given at Barnstaple; an oratorio, 'The Ascension,' at Exeter, 1888; a motet, 'Praise to the Holiest,' at the Hereford Festival, 1891; a cantata, 'The Epiphany,' at Barnstaple, 1891. Two more oratorios, much church music, songs, part-songs, etc., and a triumphal march played at the Promenade Concerts at Covent Garden in 1883, may also be mentioned. (*Brit. Mus. Biog.*) M.

EDWARDS, H. Sutherland, historian and litterateur; born at Hendon, Middlesex, Sept. 5, 1829. His musical works comprise *History of the Opera . . . from Monteverde to Verdi* . . . 2 vols. (1862); *Life of Rossini* (1869); *The Lyric Drama* . . . 2 vols. (1881); *Rossini*, a smaller work, for *Great Musicians* series (1881); *Famous First Representations* (1887); *The Prima Donna*, 2 vols. (1888). Mr. Edwards has passed much time abroad as special correspondent, and his book *The Russians at Home* (1861) contains many notes on Russian music. For many years he acted as critic to the *St. James's Gazette*. G.

EDWARDS, Richard, a native of Somersetshire, born about 1523. He was educated under George Etheridge, 'one of the most excellent vocal and instrumental musicians in England'—of whom, however, nothing more is known. On May 11, 1540, he was admitted a scholar of Corpus Christi College, Oxford. In 1547, on the foundation of Christ Church College, he

became a student there, and in the same year graduated as M.A. In 1561 he was appointed Master of the Children of the Chapel Royal in succession to Richard Bower. He was admitted a member of Lincoln's Inn on Nov. 25, 1564, and at Candlemas following (Feb. 2, 1565) produced a play there, acted by his own choir boys, the 'Children of the Quene's Chappell,' for which be received 53s. 4d. Edwards was the compiler of and chief contributor to the collection of poems called 'The Paradise of Dainty Devices,' which was not, however, published until 1576, ten years after his death. He was the author of a play called 'Palamon and Arcite' acted before Queen Elizabeth in the Hall of Christ Church, Oxford, Sept. 3, 1566. This performance so pleased Elizabeth that she sent for the author and 'gave him promise of reward.' Unless however this promise was very promptly fulfilled it must have been profitless to Edwards, as he died on Oct. 31 following. His only extant play is 'Damon and Pithias' published 1571. But few examples of his skill in composition remain. The beautiful part-song, 'In going to my naked bed,' has been conjecturally assigned to him by Sir John Hawkins, and, as it is certain that he wrote the verses, it is highly probable that he also composed the music, but there is no proof of it. His charming little poem 'The Soul's Knell,' said to have been written on his death-bed, is still admired. See also *Dict. of Nat. Biog.* W. H. H.

EEDEN, JEAN BAPTISTE VAN DEN, was born at Ghent, Dec. 26, 1842. He was a pupil at the Conservatoriums of Ghent and Brussels, and at the latter place, in 1869, won the first prize for composition with a cantata called 'Fausts laatste nacht.' Nine years later he succeeded Huberti as Director of the Mons Conservatoire. He has written an opera 'Numance' (produced at Antwerp in 1897), several oratorios, viz. 'Brutus,' 'Jacqueline de Bavière,' 'Jacob van Artevelde,' 'Le Jugement dernier'; the cantatas 'Het Woud' and 'De Wind'; a symphonic poem called 'La lutte au XVIme siècle'; a scherzo, some suites, a 'Marche des esclaves,' etc., for orchestra, and many songs and part-songs. H. B.

EGMONT. Beethoven's music to Goethe's tragedy of 'Egmont'—an Overture, two Soprano songs, four Entr'actes, Clara's death, a melodram, and a Finale, ten numbers in all—is op. 84, and was written in 1809 and 1810, the overture apparently last of all. The conclusion of the overture is identical with the finale to the whole. It was first performed on May 24, 1810, probably in private. To enable the music to be performed independently of the play, verses have been written with the view of connecting the movements, in Germany by Mosengeil and Bernays, and in England by William Bartholomew. G.

EHLERT, LUDWIG, born at Königsberg, Jan. 13, 1825, pianist and composer, but chiefly known as a cultivated critic and litterateur. [He studied under Mendelssohn at the Leipzig Conservatorium in 1845, and after further studies in Vienna, settled in Berlin in 1850. For some years he stayed in Italy, directing the Società Cherubini in Florence, up to 1869, where he taught for two years at Tausig's school in Berlin, subsequently going to Meiningen as teacher to the Ducal court, and finally to Wiesbaden, where he died from an apoplectic seizure, Jan. 4, 1884.] His *Briefe über Musik* (Berlin, 1859) contain notices of Beethoven, Mendelssohn, Schumann, Wagner, Weber, Schubert, Chopin, Berlioz, and Meyerbeer, which, without being technical, are often happily characteristic. These have been translated into English by F. R. Ritter (Boston, U.S., 1870). Still more valuable are his *Römische Tage*, 1867, and *Aus den Tonwelt* (1877), containing his latest contributions to the *Deutsche Rundschau*, etc. His compositions are ambitious, and embrace overtures to 'Hafiz' and 'The Winter's Tale,' a 'Spring Symphony'—performed with success at Berlin and Leipzig; a 'Requiem für ein Kind,' repeatedly performed with success; a Sonate romantique, Lieder, etc. M. C. C.

EHRLICH, ALFRED HEINRICH, an eminent pianist, critic and author, was born at Vienna on Oct. 5, 1822. He came of an Hungarian stock and early showed great musical talent. He studied the pianoforte under Henselt, Bocklet and Thalberg, and Sechter was his master in composition. After a longish stay in Bucharest, where he devoted himself to music, he was called to Hanover as Court-pianist to King George V. Here he lived several years and enjoyed a position of great respect, both for his musical gifts and for his high character. He took a keen interest in current events, and acted as political correspondent to the *Allgemeine Zeitung*. He spent the years 1855-57 at Wiesbaden, London and Frankfort-on-Maine, and finally settled in Berlin in 1862. He taught the piano at the Stern Conservatorium from 1864 to 1872, and again from 1886 to 1898, and also had many private pupils, of whom Felix Dreyschock is perhaps the best known. He received the title of Professor in 1875. He has written several works for the piano, *e.g.* 'Concertstück in Ungarischer Weise,' 'Lebensbilder,' Variations on an original Theme, etc.; but he is more widely known as a first-rate critic and writer about music. He has contributed largely to the *Berliner Tageblatt*, *Die Gegenwart*, and *Die neue Berliner Musikzeitung* as musical critic; he has written novels, in which music plays an important part, and many monographs on musical and æsthetic questions, amongst which *Lebenskunst und Kunstleben*, *Kunst und Handwerk*, and *Die Musik-Aesthetik in ihrer Entwickelung von Kant bis auf die Gegenwart* are perhaps the chief. He writes with considerable humour, and

has a remarkable insight into the principles underlying beauty of sound and form. H. B[Y].

EIBENSCHÜTZ, ILONA, eminent pianist, born at Budapest, May 8, 1873, made her first appearance as a child of six at Vienna, and travelled in Russia, Germany, Denmark, Sweden, Norway, etc. until she was ten years old, studying during part of that time, and until 1885, at the Vienna Conservatorium with Professor Hans Schmitt. She studied at Frankfort with Madame Schumann for four years, and after playing to Rubinstein, Liszt, and many other musical notabilities, her career as a mature artist began in 1890, when she played at one of the Gürzenich Concerts at Cologne; the Leipzig Gewandhaus and the Richter Concerts in Vienna followed next, and on Jan. 12, 1891, she made her first appearance in England at a Monday Popular Concert, playing Schumann's 'Études Symphoniques,' and in Beethoven's sonata in A for piano and violoncello with Piatti. Her success was emphatic, and until her marriage with Mr. Carl Derenburg in 1902, she was one of the most highly esteemed of all the pianists that came regularly before the London public. Her charming individuality of style, in which an ardent, impulsive nature was united with the highest artistic ideals, and a true reverence for all that is great in music, makes her a most interesting interpreter of music of all schools; and the fact of her long friendship with Brahms, whose unbroken intimacy she enjoyed from 1891 till his death, gives to her performances of his later works an authority to which very few players can lay claim. M.

EICHBERG, JULIUS, born at Düsseldorf, June 13, 1824, came of a musical family, and received his first instruction from his father. When but seven years old he played the violin acceptably. Regular teachers were employed for him after he had reached his eighth year, among them Julius Rietz, from whom he received lessons in harmony. In 1843 Eichberg entered the Conservatoire at Brussels, then under the direction of Fétis, and graduated in 1845 with first prizes for violin-playing and composition. He was then appointed a professor in the Conservatoire at Geneva, where he remained eleven years. In 1857 he went to New York, and two years later to Boston, where he died Jan. 18, 1893. He was director of the orchestra at the Boston Museum for seven years, beginning in 1859, and in 1867 established the Boston Conservatory of Music, which enjoyed in the United States a high reputation, especially for the excellence of its violin school. Eichberg's compositions are many and in various forms, for solo voices, chorus, violin, string quartet, pianoforte, etc. He prepared several text-books and collections of studies for the violin, and collections of vocal exercises and studies for the use of youths in the higher classes of the public schools. Eichberg's operettas were very successful. He produced four—'The Doctor of Alcantara,' 'The Rose of Tyrol,' 'The Two Cadis,' and 'A Night in Rome.' F. H. J.

EIGHT-FOOT pitch (or *tone*) is a term employed to denote that the pitch of the stop is the same as that of the open diapason and kindred open stops of ground tone upon the manuals, the lowest (CC) pipes of which approach eight feet in length. When the pipes of a stop are of only half the true open tone length, and stopped at the top to produce the octave below, the distinguishing term *tone* is used—*e.g.* stopped diapason, 8 ft. *tone*. T. E.

EILEEN AROON, or ROBIN ADAIR. All Irish authorities are agreed that the words of the Irish song of 'Eibhlin a ruin' were written by Carrol O'Daly about the year 1385 or 1386. His death is chronicled by all the native annalists as having occurred in the winter of 1404-5. His name, Carrol, has incorrectly been translated Charles and Gerald, but he was certainly a singer of repute, as the annalists style him '*chief composer of Ireland, and musical doctor of the county of Corcomroe*' (Co. Clare).

There is no doubt that the words were written before the year 1400. Shakespeare alludes to it—quoting the famous thrice-repeated 'Ducdame,' which occurs in the song—and in 'Coriolanus' he quotes 'a hundred thousand welcomes' —the original phrase first occurring in the last verse of 'Eibhlin a ruin'—now a common Irish salutation: 'Cead mile failte.'

As now known, the tune was taken down by Cornelius Lyons, harper to the Earl of Antrim in 1702-3, and Denis Hampson introduced it into Scotland in 1714-15. It was first printed in 1721, and again by Neale, of Dublin, in 1727. Its popularity in England dates from 1729, when it was sung in Charles Coffey's 'Beggar's Wedding' (first performed in Dublin in 1728), a ballad opera played in London during that year at Drury Lane and the Haymarket, and in two rival booths at Bartholomew Fair (Morley's *History of Bartholomew Fair*).

A parody on the original song was written in 1734, commemorating the visit of Robin Adair, an Irish M.P., to Puckstown, near Artane, Co. Dublin. It commences:—

> You're welcome to Puckstown,
> Robin Adair.

The date of this parody can easily be proved, as Robin himself died in 1737. It became very popular and soon wandered to Scotland—set to the tune as adopted by Moore—but in the Scotch printed versions in *The Lark* (1765) the Irish place-name 'Puckstown' appears as 'Paxton.'

Meantime, the original Irish song, in a phonetic version, was sung in the Dublin theatres from 1731 to 1741, and it was in this form it was heard by Handel during his Irish visit. In 1743, at the benefit of Thomas Lowe the great English tenor in Dublin, Mrs. Storer sang it phonetically, and the same version was subse-

quently sung by Tenducci and Leoni. The original Irish 'Tioch faidh (me) no'n bhfanfaidh tu,' given as 'Ducca tu no'n vonatu,' was the source of Shakespeare's 'Ducdame.'

The Scotch version of 'Robin Adair' was written by Lady Caroline Keppel in 1753 or 1754, and was sung by Tenducci (after the Irish version) at Ranelagh in 1762. Lady Caroline was married to Robert Adair in Feb. 1758, and the Irish hero of the Scotch version died in 1790. The Irish version held its own ground, and was set by Haydn for Thomson in 1803, being used by Moore, four years later, for 'Erin, the tear and the smile,' in the first volume of the 'Irish Melodies.'

It only remains to add that the generally received version of the Scotch 'Robin Adair' was popularised by Braham in the years 1811-13, the music being arranged by Wm. Reeve; the singer was probably responsible for the 'Scotch Snap' in each line of the refrain, a device which, uncharacteristic though it be, was adopted by Boieldieu in 'La Dame Blanche.' W. H. G. F.

EIN' FESTE BURG. Luther's version of Psalm xlvi. The hymn was probably written at Coburg, 1530; the tune seems to have appeared first in 'Psalmen und geistliche Lieder,' Strasburg, Wolfgang Köphl, probably 1538. The form of the tune now in use is that given by Sebastian Bach in various cantatas, especially in that called by the name of the hymn, 'In Festo Reformationis' (Bach-Gesellschaft, xviii. No. 80), and differs somewhat from Luther's original. The words have also been modernised. We give both words and melody in their first shape from von Winterfeld's *Luther's deutsche geistliche Lieder.*

The tune has been used as the foundation of various pieces of music, such as Bach's cantata just referred to; the Finale of Mendelssohn's 'Reformation Symphony'; a Fest-ouvertüre by O. Nicolai; an overture by Raff; and Wagner's 'Kaisermarsch.' It is also largely employed by Meyerbeer in 'Les Huguenots.' G.

EISTEDDFOD (Welsh, 'a sitting of learned men'). These musical and literary festivals and competitions originated in the triennial assembly of the Welsh bards usually held at Aberffraw, the royal seat of the Princes of North Wales and Anglesey, at Dynevor in South Wales, and at Mathravael, Merionethshire, for the regulation of poetry and music, for the conferring of degrees, and electing to the chair of the Eisteddfod. The antiquity of this ceremony is very high, mention being made of an Eisteddfod in the 7th century at which King Cadwaladr presided. Those bards only who acquired the degree of 'Pencerdd' (chief minstrel) were authorised to teach, and the presiding bard was called Bardd Cadeiriawg—the bard of the chair—because after election he was installed in a magnificent chair, and was decorated with a silver or gold chain, which he wore on his breast as a badge of office. His emoluments from fees were considerable. Persons desiring to take degrees in music were presented to the Eisteddfod by a Pencerdd, who vouched for their fitness, the candidates being required to pass through a noviciate of three years, and to study for further several periods of three years before advancement to each of the three higher degrees. It is now difficult to define the status of the titles conferred, but they cannot be considered more than historical names or complimentary distinctions, often bestowed by the Eisteddfodau upon persons who had but little knowledge of music. After being discontinued for some time the Eisteddfodau appear to have been revived in the reigns of Edward IV., Henry VII., Henry VIII., and Elizabeth. In 1450 what has been called 'The great Eisteddfod of Carmarthen,' was held in that town, with the king's sanction; and another meeting was held in South Wales in Henry VII.'s reign, of which no records are preserved. In 1523, at Caerwys, Flintshire, an Eisteddfod was held, at which many eminent men were present; and on May 26, 1567, there was another at the same place, under a commission granted by Queen Elizabeth. Still more memorable was the congress at Bewpyr Castle in 1681, under the auspices of Sir Richard Bassett. In 1771 the Gwyneddigion, a society established in London for the cultivation of the Welsh language, promoted several of these meetings in North Wales; and in 1819 the Cambrian Society held a great Eisteddfod at Carmarthen, at which the Bishop of St. David's presided. Mr. John Parry, who was a chief promoter of this society, and its registrar, edited the Welsh melodies for it, and in recognition of his efforts a concert was given to him at Freemasons' Hall on May 24, 1826, at which Miss Stephens, Braham, Mori, Lindley, and others assisted, followed by a dinner, at which Lord Clive presided. In later years the revival of these meetings was promoted by Sir Benjamin Hall (afterwards Lord Llanover); and at one of them, held in 1828 at Denbigh, the Duke of Sussex was present, and Sir Edward

Mostyn president. The Eisteddfodau are now annually held at several places in or out of the Principality, the leading Welsh musicians taking part in the concerts, which usually follow the competitions for the prizes. There is no special day for holding the Eisteddfod, but according to an ancient regulation the meeting is not considered 'legal' unless it be proclaimed at a 'Gorsedd' a twelvemonth and a day beforehand. Strictly speaking, the Eisteddfodau are no longer 'national,' except that they have retained or revived some of the quaint formalities which marked the ancient meetings. C. M.

EITNER, ROBERT, born at Breslau, Oct. 22, 1832, now living in Berlin; founder in 1868 of the Gesellschaft für Musikforschung, editor of and contributor to the valuable historical periodical *Monatshefte für Musikgeschichte*. He edited a *Verzeichniss neuer Ausgaben alter Musikwerke . . . bis zum Jahre 1800* (Berlin, 1871), which, though singularly defective as regards the English[1] School, is a useful catalogue. More recently he edited, in conjunction with Haberl, Langerberg, and C. F. Pohl, a valuable *Bibliographie der Musik-Sammelwerke des 16. und 17. Jahrhunderts* (Berlin, 1877). [The most important of his publications is the *Quellen-Lexikon* (begun 1900, still in progress), a work which, though not absolutely faultless, marks a great advance, in trustworthiness of information, over anything else of the kind. Eitner has edited Sweelinck's organ works, and other things for the Maatschappij tot bevordering der Toonkunst (see VEREENIGING).] His papers on Peter Sweelinck (Berlin, 1870) and Arnold Schlick are of importance. F. G.

ELECTRIC, and ELECTRO-PNEUMATIC, ACTION. See ORGAN.

ELEGY (ἔλεγος). In its original sense a poem always of a sad and touching character, and generally commemorative of some lamented decease (*e.g.* Gray's 'Elegy'); subsequently such a poem with music; and still more recently a piece of music inspired by the same feeling and suggested by a like occasion, but without poem, or any words whatever. The elegy has taken many musical forms; that of the vocal solo, duet, trio, quartet, etc., with or without accompaniment; of the instrumental solo for the violin, pianoforte, or other instrument, and of the concerted piece for stringed or other instruments. One of the most beautiful specimens of the first class extant is Beethoven's quartet in memory of the deceased wife of his friend Baron Pasqualati ('Elegischer Gesang,' op. 118). In the score of Handel's 'Saul' the lament of the Israelites over the king and Jonathan is entitled 'Elegy.' Of the second we have Dussek's 'Élégie harmonique' on the death of Prince Louis Ferdinand of Prussia, for piano solo. Better known than either of these to the modern concert-goer is Ernst's 'Élégie' for violin solo with piano accompaniment. Of the third class a better instance can hardly be cited than Sullivan's overture 'In Memoriam,' which is in truth an elegy on the composer's father. [Stanford's setting of Walt Whitman's 'Elegiac Ode,' op. 21, and his 'Elegiac Symphony' in D minor, may also be referred to as especially appropriate examples of the musical expression suggested by the word.] J. H.

ELEVENTH, CHORD OF THE. The name given to a chord built up from the dominant root, by a series of super-imposed thirds. [See DAY.] A common form of it occurs in the second inversion with the ninth minor, and with the root and third omitted.

ELFORD, RICHARD, was educated as a chorister in Lincoln Cathedral. His voice changing to a fine counter-tenor he became a member of the choir of Durham Cathedral. About the commencement of the 18th century he came to London, and was engaged as a singer at the theatre. On August 2, 1702, he was sworn-in as a gentleman of the Chapel Royal, a place being created expressly for him. He also obtained the appointments of vicar-choral of St. Paul's Cathedral and lay vicar of Westminster Abbey. After a few years he withdrew from the stage, on which he had never been successful, owing to his ungainly figure and awkward action. Weldon, in the preface to the first book of his 'Divine Harmony' (six solo anthems composed expressly for Elford), and Dr. Croft, in the preface to his *Musica Sacra*, speak in high terms of Elford's voice and singing. He died Oct. 29, 1714. W. H. H.

ELGAR, SIR EDWARD, born at Broadheath, near Worcester, June 2, 1857, is the eldest surviving son of W. H. Elgar of Worcester, who held the post of organist of St. George's Roman Catholic Church in that city for thirty-seven years, was also a good violinist, and started a successful music-selling business. Both father and son at different times played in the orchestra of the Three Choir Festivals. Until he was fifteen years of age, Edward Elgar was at school at Littleton House, near Worcester, and often acted as assistant to his father at the organ. It was intended to send him to Leipzig for musical study, but the plan proved to be impossible, happily for the young composer's career. Scarcely ever can there have been a less strictly ordered musical education than his, or one that gave so many opportunities of becoming acquainted with various sorts of music. From boyhood he had attended the meetings of the Worcester Glee Club, and as the society's plans included occasional instrumental meetings, whereat Elgar was accustomed to lead the orchestra, he acquired a knowledge of the music of Corelli and Haydn, as well as of the masterpieces among English glees. In 1877 he visited London and took a

[1] He omits all mention of the collections of Barnard (1641), Boyce (1778), and Arnold (1790), as well as Morley's 'Triumph of Oriana' (1601).

SIR EDWARD ELGAR

short course of violin lessons from Mr. Pollitzer, these being the last actual lessons he ever had. No doubt his receptive nature profited by every means open to it; we hear of his playing the bassoon in a wind-instrument quintet, and writing much music for the combination. For five years from 1879 he held the post of bandmaster at the County Lunatic Asylum, the members of the band being the attendants of the institution. Accident provided him with a strange assortment of instruments, in writing and arranging for which he came to know the capabilities of each in a peculiarly intimate way. There can be no question that his sense of orchestral colouring was developed by such experiences as have been mentioned. Besides practising his art in and near Worcester, Elgar was a member of Stockley's orchestra at Birmingham, where, on Dec. 13, 1883, an Intermezzo by the young composer was played with much success. In the previous year he had visited Leipzig, staying for three weeks; it was also in 1882 that he was appointed conductor of the Worcester Amateur Instrumental Society, and wrote analyses for its programmes. In 1885 he became organist of St. George's Church, in succession to his father, and composed much music for the service of the Roman Church. Upon his marriage in 1889, he took up his residence in London, but, being unable to obtain a hearing, or any kind of encouragement from publishers or concert-managers, he withdrew in 1891 to Malvern, where, for some years more, he lived the humdrum life of a local professional musician, teaching and conducting as opportunity arose. In 1904 he removed to Hereford. His 'Froissart' overture was given at the Worcester Festival of 1890, but under conditions not the most favourable, since the Shire Hall was too small for the heavy orchestration of the work. It was not until the North Staffordshire Festival of 1896 that his name was realised as one of those claiming a place among the great composers. His 'Scenes from the Saga of King Olaf,' set to Longfellow's words, with additions by H. A. Acworth, C.I.E., was produced at Hanley and made a remarkable success. By this time, among his more important works, 'The Black Knight' (1893) and 'Scenes from the Bavarian Highlands' (1896) had been given by the Worcester Festival Choral Society, and a short oratorio, 'The Light of Life' (Lux Christi) was performed at the Worcester Festival of 1896. In the next four years, while repetitions were occasionally given of the works already mentioned, several new works won the general appreciation of musicians, and placed Elgar's name high among national composers. Queen Victoria's Diamond Jubilee (1897) suggested an 'Imperial March' and a cantata, 'The Banner of St. George'; and the year 1899 saw the production of two compositions which stand in the highest rank: the orchestral variations on an original theme were produced at a Richter Concert, June 19, 1899, and at the Norwich Festival of the same year the cycle of 'Sea Pictures' was sung by Miss Clara Butt. In both works it was abundantly evident that Elgar had reached a very high point, having acquired easy mastery over every imaginable orchestral device, and attained to so marked an individuality of expression that henceforth musicians would be able to recognise certain qualities as his own. The variations have a very original design, in that they constitute an enigma, a certain theme (not yet revealed), being capable of association with the actual theme of the variations. More than this, each variation is intended to stand for the musical portrait of one of the composer's friends, and extremely beautiful and characteristic many of them are, whether or not they resemble the persons portrayed. In the songs, a fine taste for poetry is displayed, and the skill with which the natural accent of the words is reflected in the music is very remarkable. The invention of the themes is strikingly fresh, and their treatment almost always felicitous. One thing which the composer has made his own, is the substitution of a minor tonic harmony at the end of a cadence where everything seems to point to a major close; it has by no means come to be a mannerism with him, but its use at the end of each verse of 'Where Corals Lie' (No. 4 of the set of songs already mentioned), and at the end of the chorus, 'Daughter of Ancient Kings,' in the Coronation Ode, gives to both passages an especial charm.

The mark made by the songs and the variations was so emphatic that the decision of the Birmingham Festival Committee for 1900 to ask Elgar for a longer work, to occupy a whole morning, was amply justified. Newman's great poem, 'The Dream of Gerontius,' naturally appealed to him strongly as a Catholic; and nowhere could a more sympathetic atmosphere have been imagined for its first performance than Birmingham, where such a work would have the support of the Oratorians, as well as the inestimable advantage of being conducted by Richter. No one who studies the score could for a moment imagine that the scheme was adopted in the manner usual with a 'commissioned' work; the poem had been for years in Elgar's mind, and no doubt many of the musical ideas had taken shape long before he was asked to write. Perhaps the great expectations of all the musical world were a bar to the complete success of the work; but, judged, as it seemed, exclusively on its merits, it did not at first appear to be an advance on what the composer had previously done. The poignant expression of the dying utterances of Gerontius, the solemnity of the death-scene and the commendatory words of the priest; the ethereal atmosphere of the opening of the second part, the treatment of the voice of the disembodied spirit, and above all, the exquisitely tender strains sung by the angel,—all these were fully

realised; but, inasmuch as the hymn 'Praise to the Holiest' is the real climax of the poem, it seemed to many hearers that there was in its treatment a want of the cumulative power which some other masters have attained, and which would have brought into the whole work a unity and a sublimity which it was not felt to possess. Its reception by the public and press was scarcely enthusiastic, although quite favourable. The composer received the degree of Mus.D. at Cambridge on Nov. 22 of the same year.

A new period of Elgar's life began with the performance of 'Gerontius' at the Niederrheinische Fest in May 1902, of course in a German translation; at the close of the festival, Herr Richard Strauss made a speech in which he complimented the composer so highly that even the English musical public was moved by such an unheard-of tribute from abroad; and at the subsequent performances of the oratorio at the Sheffield and Worcester Festivals of the same year, the attendance on both occasions was so large that the timidity of the commonplace concert-givers of the metropolis was overcome, and several performances of the work have already taken place in London. The first was at the Westminster (Roman Catholic) Cathedral on June 6, 1903; and an experiment of unusual interest was tried in March 1904, when Covent Garden Theatre was given over for three days to an 'Elgar Festival,' at which were brought forward the most important of his miscellaneous works, and a new overture, 'In the South,' op. 50, a work of very remarkable beauty, besides 'Gerontius' and 'The Apostles.'

The Coronation of King Edward VII. gave Elgar new opportunities. A couple of military marches, called 'Pomp and Circumstance,' were played for the first time at the Promenade Concert of Oct. 22, 1901. The trio of the second of the pair was built on a tune of such breadth and generally attractive quality that its swing was irresistible; in spite of the objections of some musicians to it on the score of its immediate appeal to hearers of every class, its success was phenomenal, and in setting A. C. Benson's 'Coronation Ode' for a performance at Covent Garden Theatre (put off by reason of the King's illness), this tune became the climax of the composition.

'The Apostles,' produced at the Birmingham Festival of 1903, is ostensibly but a portion (parts I. and II.) of a sort of trilogy which is to culminate in a third section, dealing with the establishment of the Christian Church. It would therefore be unfair to blame it for any want of climax or even for any eccentricity of design, since all may be made logical when the third part completes the whole. It is perhaps not to be wondered at that, after the compliments paid the composer by the most advanced of modern German composers, and the adverse opinion passed by some superior persons upon the 'Pomp and Circumstance' tune, the composer should have adopted an ultra-modern style in this oratorio, and that it should be found so strange by some hearers as to call for censure.

The composer received the honour of knighthood in 1904.

The list of Elgar's works is not easy to arrange in order, as the system of opus-numbers has not been carefully followed, some of the numbers having been only filled up provisionally:—

1. Romance, vln. and orch.
2. Motets, one published ('Ave Verum').
3. Allegretto, vln. and pf. (?).
4. Three Pieces, vln. and pf. (?).
5. Two Songs.
6. Wind Quintet (MS.).
7. Sevillana, orch.
8. String Quartet (MS.).
9. Sonata, vln. and pf. (MS.).
10. Three Pieces, for orch. (Mazurka, Sérénade Mauresque, and Contrasts,—the Gavotte, 1700 & 1900).
11. Sursum Corda, for strings, brass, and organ.
12. Salut d'amour, vln. and pf.
13. Two Pieces, vln. and pf.
14. Organ Voluntaries (easy).
15. Two Pieces (Chanson de Nuit and Chanson de Matin), for vln. and pf., subsequently scored for small orch.
16. Three Songs.
17. La Capricieuse, morceau de genre for vln.
18. O Happy Eyes, part-song.
19. Froissart, concert-overture.
20. Serenade for stringed orch.
21. Minuet for pf.
22.
23. Spanish Serenade, chorus and orch.
24.
25. The Black Knight, cantata.
26. Two three-part songs, female choir, with vln. obbligato. Orchestrated in 1904.
27. Scenes from the Bavarian Highlands, for choir and orch.
28. Organ Sonata in G.
29. The Light of Life (Lux Christi), oratorio.
30. Scenes from the Saga of King Olaf. Soli, choir, and orch.
31.
32. Imperial March (Diamond Jubilee, 1897).
33. The Banner of St. George, cantata.
34. Te Deum and Benedictus, in F.
35. Caractacus, cantata.
36. Variations for orch.
37. Sea Pictures, contralto solo and orch.
38. The Dream of Gerontius, oratorio.
39. Two Military Marches, 'Pomp and Circumstance.'
40. Cockaigne (In London Town), concert-overture.
41.
42. Incidental Music and Funeral March for 'Grania and Diarmid' (by George Moore and W. B. Yeats).
43. Dream Children, two pieces for small orch.
44. Coronation Ode, 1902.
45. Five part-songs for male voices, from the Greek Anthology.
46.
47.
48.
49. The Apostles, parts I. & II.
50. Overture, 'In the South,' for orch.

A good many shorter compositions have been published without opus-numbers from time to time; among these are two part-songs, 'Weary Wind of the West,' and 'My Love dwelt in a Northern Land'; Gavotte, and 'Sérénade Lyrique,' for vln. and pf.; an arrangement of the national anthem, and many songs, among them 'Queen Mary's Song,' 'Like to a Damask Rose,' 'A Song of Flight,' 'The Pipes of Pan,' and 'In the Dawn.' In 1899 a symphony on the subject of General Gordon was projected, but it has not yet seen the light. M.

ELI. Oratorio by Sir Michael Costa, written to words by Bartholomew, in two parts: it was produced at the Birmingham Festival, on August 29, 1855. G.

ELIJAH (*Elias* in German)—'an oratorio on words from the Old Testament' (op. 70)—was Mendelssohn's second oratorio. The idea appears to have occurred to him as early as 1836, and to have been expressed in a letter to Klingemann in

that year. The score has no dates, but the music does not seem to have been begun till 1845. On August 5, 1846, the orchestral parts were rehearsed by Mendelssohn at Leipzig; August 19 he had a vocal rehearsal at Moscheles's house, London; then two band rehearsals at Hanover Square; August 24 a full rehearsal at Birmingham; and on Wednesday the 26th it was first performed. Various alterations and additions were made afterwards (see MENDELSSOHN), including the trio 'Lift thine eyes' and the last chorus. He was helped by Julius Schubring in the selection of the words. The English words by Mr. Bartholomew were sent to him as he worked, and were the subject of a long correspondence. The first performance of the revised version of the work was given by the Sacred Harmony Society in Exeter Hall, April 16, 1847, and the first performance in Germany was at Hamburg, Oct. 7, 1847, conducted by Krebs. A very interesting *History of Mendelssohn's 'Elijah,'* by Mr. F. G. Edwards, appeared in 1896.

ÉLISA, OU LE VOYAGE AU MONT BERNARD. Opera in two acts; words by Saint-Cyr, music by Cherubini; produced at the Théâtre Feydeau, Dec. 13, 1794.

ELISIR D'AMORE, L'. Opera buffa in two acts; libretto by Romani, music by Donizetti. Produced at Milan in 1832; at Lyceum, London, Dec. 10, 1836. Also, as 'The Love Spell,' at Drury Lane, June 24, 1839.

ELLA, JOHN, violinist, son of Richard Ella of Thirsk, was born there, Dec. 19, 1802. At the age of nineteen he quitted the profession of the law for music. In 1822 he became a member of the orchestra of the King's Theatre, and subsequently of the orchestras of the Concerts of Antient Music, Philharmonic, etc., retiring finally in 1848. In 1819 he received lessons in violin-playing from M. Fémy, in 1826 he was a pupil of Attwood in harmony, and finally completed his education in counterpoint, instrumentation, and composition, under Fétis at Paris, in 1827. In 1845 he established, under the name of 'The Musical Union,' a series of morning concerts of instrumental chamber music at which the best classical works were given by the best artists native and foreign. He directed the Musical Union uninterruptedly for thirty-five years; the concerts came to an end in 1880. In 1850 he established a similar series of concerts under the name of 'Musical Winter Evenings,' which were given annually under his direction, until 1859, after which they were discontinued. At both these concerts he introduced the 'analytical programmes' (wholly written by himself), which have since been frequently adopted elsewhere. He contributed many notices of music and musicians to the *Morning Post, Musical World,* and *Athenæum.* In 1855 he was appointed lecturer on music at the London Institution, where he delivered several lectures, some of which have been published. He also published a *Personal Memoir of Meyerbeer,* with an analysis of 'Les Huguenots,' and under the title of *Musical Sketches Abroad and at Home,* a volume of interesting musical chit-chat, 1869, mostly reprinted from his Musical Union programmes. He died in London, Oct. 2, 1888. [MUSICAL UNION.] W. H. H.

ELLERTON, JOHN LODGE, an amateur composer, born in Cheshire, Jan. 11, 1801, was a descendant from an ancient Irish family, and the son of Adam Lodge of Liverpool. [He assumed the name of Ellerton about 1845.] In his childhood he showed a remarkable fondness for music, and notwithstanding his father's strong discouragement, soon attained by his own efforts to as much knowledge as enabled him to play the piano. Being sent to Brasenose College, Oxford (where he graduated as M.A. in 1828), he lost no opportunity of pursuing music; devoting his attention chiefly to composition. While at Oxford he composed an English operetta and an Italian opera. On quitting the university he went to Rome, studied counterpoint for two years under a chapelmaster named Terriani, and composed seven operas. Ellerton essayed nearly every species of composition. His English opera 'Domenica' was produced at Drury Lane in 1838. His works comprise six anthems; six masses; seventeen motets; 'Paradise Lost,' oratorio, published 1857; 'Issipile,' 'Berenice in Armenia,' 'Annibale in Capua,' 'Il Sacrifizio di Epito,' 'Andromacca,' 'Il Carnovale di Venezia,' and 'Il Marito a Vista,' Italian operas; 'Salvator Rosa,' 'Lucinda,' German operas; 'The Bridal of Triermain,' another English opera; sixty-one glees; sixty-five songs; nineteen vocal duets; six symphonies; four concert overtures; three quintets, fifty-four quartets and three trios for stringed instruments; and eight trios and thirteen sonatas for various combinations of instruments. In 1836 and 1838 the Catch Club awarded him prizes for glees. Ellerton spent much of his time abroad, and when Wagner came over in 1855, he found a warm friend in Ellerton. He died in London, Jan. 3, 1873. W. H. H.

ELLICOTT, ROSALIND FRANCES, the daughter of the Right Rev. C. J. Ellicott, Bishop of Gloucester and Bristol, was born at Cambridge, Nov. 14, 1857; she early showed musical gifts, which were inherited from her mother, a clever amateur singer. At the age of seventeen she entered the Royal Academy of Music, and studied for seven years under Thomas Wingham. Her numerous compositions show not only ambition, but an amount of technical knowledge and skill which is rare among female composers. Her song, 'To the Immortals,' was sung at the Gloucester Festival of 1883, her 'Dramatic Overture' at the same festival, 1886, and a concert-overture at St. James's Hall in the same year. A cantata, 'Elysium,' was brought out

at the Gloucester Festival of 1889; 'The Birth of Song' in 1892, and a fantasia for piano and orchestra in 1895. Another vocal work, 'Radiant Sister of the Dawn,' was produced at the Cheltenham Festival in 1887, and a male-voice cantata, 'Henry of Navarre,' at Oxford, 1894. A Festival overture was played at the Cheltenham Festival in 1893, and Miss Ellicott's chamber compositions have been repeatedly performed in and out of London. A quartet for piano and strings was played for the first time in London in May 1900. (*Brit. Mus. Biog.* etc.)

ELLIS (formerly SHARPE), ALEXANDER JOHN, born at Hoxton, June 14, 1814, educated at Shrewsbury, Eton, and Cambridge; Scholar of Trinity College, Cambridge, 1835; B.A. and 6th Wrangler 1837; F.R.S. 1864; F.S.A. 1870; President of the Philological Society 1873-74, and again 1880-81. He turned his attention to Phonetics from 1843; his chief work on *Early English Pronunciation*, begun in 1865, was published in five parts, 1869-89. He studied music under Professor Donaldson of Edinburgh. After vainly endeavouring to get a satisfactory account of the musical scale and nature of chords from Chladni, Gottfried Weber, and other writers, Ellis, following a suggestion of Professor Max Müller, began in 1863 to study Helmholtz's *Tonempfindungen*, with special bearing on the physiology of vowels. In that work he found the explanation of his musical difficulties, and became ultimately the English translator of the third German ed. 1870, under the title of *On the Sensations of Tone, as a Physiological Basis for the Theory of Music* (London, 1875). To Helmholtz's work, with the author's consent, Ellis added many explanatory notes and a new appendix, in which were rearranged four papers published in the *Proceedings of the Royal Society.—On the Conditions, Extent and Realisation of a Perfect Musical Scale on Instruments with Fixed Tones* (read Jan. 21, 1864); *On the Physical Constitution and Relations of Musical Chords* and *On the Temperament of Instruments with Fixed Tones* (June 16, 1864); and *On Musical Duodenes, or the Theory of Constructing Instruments with Fixed Tones in Just or Practically Just Intonation* (Nov. 19, 1874); also several new theories, tables, etc. The *Proceedings of the Musical Association*, 1876-77, pp. 1-32, contain a paper by him *On the Sensitiveness of the Ear to Pitch and Change of Pitch in Music*, being an exposition and rearrangement of the interesting experiments of Professor Preyer of Jena; and some original works, *The Basis of Music*, 1877; *Pronunciation for Singers* (a primer), 1877; and *Speech in Song*, 1878. Ellis's devotion to the scientific aspect of music led him into searching inquiries concerning the history of Musical Pitch, the varieties and uncertainty of which are so productive in the present day of disturbance of the musical ear and vexation to musical instrument-makers. The results of those inquiries were read before the Society of Arts, May 23, 1877, and March 3, 1880, and printed in their *Journals*, May 25, 1877, March 5, 1880, with subsequent appendix and corrections (*ibid.* April 2, 1880; Jan. 7, 1881) also reprinted by the author for private issue. Silver medals were awarded by the Society of Arts for each paper: the second essay may be appropriately described as exhaustive. Ellis subsequently turned his attention to the determination of extra-European musical scales. His method was by means of a series of tuning-forks of accurately determined pitches, and with the assistance of the present writer, to determine the pitch of the actual notes produced on native instruments, and then to calculate the intervals between those notes in terms of hundredths of an equal semitone. The results are given in his paper on *Tonometrical Observations on some existing non-harmonic scales* (*Proceedings of Royal Society* for Nov. 20, 1884), and, more at length, in his paper *On the Musical Scales of Various Nations*, read before the Society of Arts, March 25, 1885, and printed with an Appendix in their *Journals* for March 27 and Oct. 30, 1885. For this paper a silver medal was awarded. A full abstract of his *History of Musical Pitch* and *Musical Scales* is given in his Appendix to the second enlarged and corrected edition of his Translation of Helmholtz (1885), which also contains his latest views upon most of the subjects which form the scientific basis of Music. He became a fellow of the Royal Society in 1864, of the London Mathematical Society in 1865, and of the Society of Antiquaries in 1870. He was twice president of the Philological Society, in 1872-74 and 1880-1882. He received the degree of D.Sc. from the University of Cambridge in June 1890, and on Oct. 28, of the same year, he died at Kensington. He was buried at Kensal Green Cemetery. [PITCH; SCHEIBLER.] A. J. H.

ELSNER, JOSEPH XAVER, composer, born June 29, 1769, at Grottkau, in Silesia, son of a carpenter who made harpsichords, harps, and other musical instruments. Being intended for the profession of medicine, he had no regular instruction in music beyond a few lessons in harmony from Förster, director of the theatre at Breslau, but early began to compose. A visit to Vienna enabled him greatly to improve himself by studying classical scores, and by intercourse with the best musicians of his time. In 1791 he was appointed first violin in the theatre at Brünn, and in the following year capellmeister at Lemberg, where he wrote five operas, four symphonies, quartets, sonatas, etc. In 1799 he was appointed conductor of the theatre at Warsaw, and here he established himself for life, composing twenty-two operas in the Polish language within the space of twenty years. During a visit to Paris some of his compositions were performed at the Tuileries. With the assistance of Countess Zamoïska he started in

1815 a society at Warsaw for the encouragement of music, which resulted in the Conservatoire founded in 1821, of which he became the first director and professor of composition. This institution did good service before it was closed by the political troubles of 1830. In 1834 it was revived, with Soliva as director. Elsner continued to compose, chiefly sacred music, till 1844, when he wrote his 'Stabat Mater,' his right hand being paralysed. He died at Warsaw, April 18, 1854. He is an interesting example of a successful composer who learnt composition by composing. His works are legion—operas, ballets, melodramas, cantatas, church music, symphonies, and instrumental pieces of all sizes and kinds. His operas, immensely popular in Poland, are light, and in the now old-fashioned style of Paër and Mayer. He wrote two treatises on the fitness of the Polish language for music; but his surest claim to remembrance is the fact that he was the master of Chopin. M. C. C.

ELSSLER, FRANZISKA, known as Fanny, born June 23, 1810, at Gumpendorf near Vienna (*Neue Berliner Musikzeitung*) or at Vienna (Pougin), was the youngest child of Johann Elssler, Haydn's copyist and devoted servant (see HAYDN). She was taught dancing by Herschett (Regli) or Kerschett (Larousse), and made her début at six or seven years of age in the children's ballet at the Theatre 'an der Wien.' In 1825 she appeared at the Kärnthnerthor Theatre, having received further instruction from Aumer, the ballet master. In 1827 she and her elder sister Therese (*v. infra*) were engaged at Naples, later Milan, etc. 'Fanny really laid the foundation of her fame in 1832 at Berlin as Zoloé in Auber's "La Bayadère." In the same year the Viennese admired her Fenella in "La Muette de Portici"'—(*Musical World*, from the *Neue Freie Presse*). On March 9, 1833, the sisters made their débuts at the King's Theatre, Haymarket, in the ballet of 'Faust' (by Adolphe Adam), and later danced in the ballets 'Inez de Castro' and 'La Fée et le Chevalier.' On June 13, Fanny danced with Taglioni in the 'Sylphide,' and on the 28th at Drury Lane Theatre, appeared again with Taglioni in a minuet in Act II. of the 'School for Scandal,' at Mrs. Glover's benefit. In 1834 the sisters Elssler were re-engaged and danced in a new ballet 'Armide,' designed by Therese, who played Rinaldo to her sister's Armida. In spite of their ability and skill, their success was by no means commensurate with their deserts. Dr. Louis Véron saw them here, being especially struck with the younger sister, and engaged them for three years at the Paris opera, at an annual salary of 20,000 francs each. On Sept. 15, 1834, Fanny made her début in Paris in a ballet 'La Tempête,' and later on Oct. 1, on her sister's début, danced in a 'pas de deux' in 'Gustave III.' Their engagement in Paris was prolonged until 1839.

For the seasons of 1838, 1839, and 1840 the sisters returned to the Haymarket, and Fanny became a very great favourite, notable performances being her dancing of the Cachucha in 'Le Diable Boiteux,' August 9, 1838, already popularised in England by Duvernay; and that of the Krakoviak or Cracovienne in 'The Gipsy,' July 25, 1839. On March 9, 1840, the sisters made their last appearance together in England and went to America, where they remained over two years. On March 11, 1843, Fanny reappeared alone at Her Majesty's in the 'Tarantula'; on the 13th as the Bayadère, for the first time in England, at Drury Lane, for Bunn's benefit; on May 12, for the first time as Giselle in the beautiful ballet of that name (T. Gautier and St. Georges, music by Adam); Blanche d'Oviedo in 'Le Délire d'un Peintre,' and in a minuet with Adèle Dumilatre, in 'Un Bal sous Louis XIV.' In 1844 she danced the minuet, this time with Cerito, in 'La Paysanne Grande Dame,' and appeared with very great success as Esmeralda, etc. She reappeared in England, May 1, 1847, at Covent Garden in 'La Bouquetière de Venise'; May 18, 'La Salamandrine'; and finally, June 12, as the heroine in a new ballet, 'Manon Lescaut'; and on June 26 made her final appearance in England in that part. 'She was the most intellectual dancer I have ever seen. Inferior to Taglioni in lightness, grace, and sentiment; to Carlotta Grisi in the two latter qualities; and with less mere vigour than Cerito. She excelled them all in dramatic expression, and . . . exhibited tragic powers of a very high order, while the strongly dramatic element was the cause of her preciseness in all national and characteristic dances. . . . This predominance of the intellectual element in her dancing may have been the result of original organisation or . . . owing to the mental training received from Frederic von Genz, the . . . diplomatist who educated her. . . . Mrs. Grote always maintained that her genius lay full as much in her head as her heels. I am not sure that the finest performance . . . was not a minuet in which she danced the man's part . . . with most admirable grace, and nobility of demeanour' (Kemble, *Recollections of a Later Life*). 'Mrs. Grote laboured hard to procure her acceptance in society; her personal kindness to her was of the most generous description' (*Ibid.*).

After dancing a few more years on the continent, she retired in 1851. Her later years were passed at Vienna. At the age of seventy 'with her slim, aristocratic figure she was accepted as a living and breathing instance of imperishable youth and grace. At Court she continually received tokens of consideration.' . . . (*N. F. P. Musical World.*) A great theatre-goer, 'she was requested by Charlotte Wolter, the celebrated actress, to show her a few poses for Wildbrandt's 'Messalina,' and it was with

pleasure she saw that Mme. Wolter followed the instructions received' (*Ibid.*). She died Nov. 27, 1884, in the Seiler Strasse, Vienna. Her sister Therese, who was born in 1808, was known as 'La Maestosa' on account of her tall stature, and was content to take the secondary place and to support her sister after the manner of the male dancers of the period. She married (morganatically) Prince Adalbert of Prussia in 1848, was created Countess von Barnim by the king, and died Nov. 19, 1878, at Meran. A. C.

ELVEY, SIR GEORGE JOB, Mus.D., was born at Canterbury, March 27, 1816. He commenced his musical education as a chorister of Canterbury Cathedral under Highmore Skeats, the organist. After quitting the choir he pursued his studies under his elder brother, Stephen, and was afterwards at the Royal Academy of Music under Cipriani Potter and Dr. Crotch. In 1834 he gained the Gresham prize medal for his anthem, 'Bow down Thine ear.' In 1835 he was appointed to succeed H. Skeats, junior, as organist of St. George's Chapel, Windsor, a post which he held until his retirement in 1882. In 1838 he graduated as Bachelor of Music at Oxford, his exercise being a short oratorio, 'The Resurrection and Ascension,' which was afterwards produced in London by the Sacred Harmonic Society on Dec. 2, 1840, and has also been given at Boston, U.S.A., and at Glasgow. [Another oratorio, 'Mount Carmel,' is among his works, and several odes, among them one for the opening of the Royal Holloway College, June 30, 1886.] In 1840 he proceeded Doctor of Music, his exercise being an anthem, 'The ways of Zion do mourn.' [He conducted the Windsor and Eton Choral Society, and the Glee and Madrigal Society.] He composed an anthem for voices and orchestra 'The Lord is King' for the Gloucester Musical Festival of 1853, and a similar one, 'Sing, O heavens,' for the Worcester Festival of 1857. Elvey's compositions are chiefly for the church; many of his anthems are published. He composed a Festival March for the wedding of the Princess Louise in 1871, which was afterwards performed in public. In the same year he received the honour of knighthood. [He died at Windlesham, Surrey, Dec. 9, 1893, and was buried near the west front of St. George's Chapel, Windsor. A memoir was published in 1894 by his widow.] W. H. H.

ELVEY, STEPHEN, Mus.D., the elder brother of the preceding, was born in Canterbury, June 27, 1805. He was entered as a chorister of the cathedral under Skeats, senior, whose pupil he continued after the breaking of his voice. On the death of Alfred Bennett in 1830, Elvey was appointed his successor as organist of New College, Oxford. In the following year he took the degree of Bachelor of Music at Oxford, his exercise being the hymn from Thomson's *Seasons*, 'These as they change.' In 1838 he proceeded Doctor of Music, his exercise being an anthem, 'Great is the Lord!' He was Choragus of the University from 1840 till his death, at Oxford, Oct. 6, 1860. Stephen Elvey's compositions are not numerous; they consist chiefly of chants and services. His Evening Service, composed in continuation of Dr. Croft's Morning Service in A, and his 'Psalter and Canticles pointed' (Oxford, Parker), in collaboration with Ouseley, are well known. Some years before his death he had to submit to the amputation of a leg, through a gun accident; he was, however, able to pedal well with a wooden appendage. W. H. H.

ELWART, ANTOINE AIMABLE ELIE, learned musician, composer, and author, of Polish origin, born in Paris, Nov. 18, 1808. He was originally a chorister in the church of St. Eustache, but at thirteen his father apprenticed him to a packing-case maker, from whom he ran away and supported himself by playing in the orchestra of a small theatre on the Boulevards. He became a pupil of the Conservatoire, learning composition under Fétis. In 1828, when in Lesueur's class, he founded 'concerts d'émulation' among the pupils, which continued for six years, and proved most useful to the students in composition as well as to the soloists. In 1831 he obtained the second prize for composition, and in 1834 the 'Grand Prix de Rome.' While at Rome he composed, amongst other things, an 'Omaggio alla memoria di Bellini,' performed at the Teatro Valle in 1835. In 1836 he resumed his post of assistant professor to Reicha at the Conservatoire. He conducted the concerts in the Rue Vivienne, and those of the Société de Ste. Cécile. Elwart was for long professor of harmony at the Conservatoire; in 1871 he retired into private life, and died in Paris, Oct. 14, 1877. Among his compositions may be specified—the oratorios 'Noé' (Paris, 1845) and 'La Naissance d'Ève' (1846); an opera 'Les Catalans' (Rouen); and choruses and instrumental music for the *Alcestis* of Euripides, performed at the Odéon; besides other operas not produced, symphonies, overtures, string quintets, quartets, and trios, masses, and other church music. He wrote *Duprez, sa vie artistique*, etc. (Paris, 1838); a *Petit Manuel d'harmonie* (Paris, 1839), translated into Spanish, and in use at the Madrid Conservatoire; *Théorie Musicale* (1840); *Le Chanteur accompagnateur* (Paris, 1844); *Traité du contrepoint et de la fugue* (Paris), and other theoretical works. He completed the *Études élémentaires de musique* of Burnett and Damour (Paris, 1845), and contributed articles on musical subjects to the *Encyclopédie du dix-neuvième siècle* and to the *Revue et Gazette musicale de Paris*. His *Histoire de la Société des Concerts* (1860) and *Histoire des Concerts populaires* (1864) are two compendiums of useful and interesting matter. Though independent and eccentric, Elwart was both esteemed and liked. M. C. C.

ELY CATHEDRAL. The music library of this church contains a very valuable and interesting collection of MSS., principally of English church music, due chiefly to the pious care and industry of James Hawkins, its organist for forty-seven years from 1682. It consists of thirty-six volumes—twenty-one of anthems, services, and chants, in score, eleven of voice parts, and four of organ parts. The number of compositions is over 580, and includes some of large dimensions, as Handel's Utrecht Te Deum and Jubilate for voices and orchestra, Croft's ditto, ditto. A catalogue of these works was prepared by Canon W. E. Dickson, formerly Precentor of the cathedral, and published for the Dean and Chapter by Deighton, Bell, & Co., 1861.

EMBOUCHURE. The part of a musical instrument applied to the mouth ; and hence used to denote the disposition of the lips, tongue, and other organs necessary for producing a musical tone.

To the embouchure are due, not only the correct quality of the sound produced, but also certain slight variations in pitch, which enable the player to preserve accurate intonation. In many instruments, such especially as the French horn and the Bassoon, almost everything depends upon the embouchure. W. H. S.

EMERALD ISLE, THE. Comic opera in two acts, libretto by Captain Basil Hood, music partly written by Sir Arthur Sullivan, completed after his death by Mr. Edward German. Produced at the Savoy Theatre, April 27, 1901.

EMPEROR CONCERTO, THE, a title, like 'Jupiter Symphony' and 'Moonlight Sonata,' gratuitously bestowed on Beethoven's PF. Concerto in E♭ (op. 7). Such titles are unnecessary, and the only excuse for them is that they enable non-professional persons to refer to musical works without using musical nomenclature.

EMPEROR'S HYMN, THE. A hymn written in 1796 by Lorenz Leopold Hauschka during the patriotic excitement caused by the movements of the French revolutionary army, set to music for four voices by Haydn, and first sung on Feb. 12, 1797, at the Emperor's birthday. The process by which the melody was adopted and developed from a Croatian national song is set forth in detail in W. H. Hadow's *A Croatian Composer*, 1897. Haydn afterwards employed it as the theme for four variations in his well-known quartet (op. 76, No. 3). (See A. Schmid, *J. Haydn und N. Zingarelli*, Vienna, 1847.)

ENCORE—the French for 'again'—the cry in English theatres and concert-rooms when the audience desires to have a piece repeated. It has taken the place of the 'altra volta' of the 18th century, and was certainly in use as early as 1711, when Addison referred to it in the *Spectator*. A song, 'The Bath Teazers,' published in 1717, gives 'ancore' as a common form of the word, thus showing it to have been in general use at that date. The French and Germans use the Latin term 'Bis,' and the French have even a verb, 'bisser.' 'Le public anglais est grand redemandeur, et exprime son vœu par un mot français, comme nous par un mot latin' (A. Adam, *Souvenirs*, xxvii.).

ENFANT PRODIGUE, L'. (i.) Opera in five acts ; words by Scribe, music by Auber ; produced at the Académie, Dec. 6, 1850 ; in Italian, as 'Il Prodigo,' at Her Majesty's, June 12, 1851 ; in English as 'Azael the Prodigal' at Drury Lane, on Feb. 19, 1851. [See PRODIGAL SON.]

(ii.) A pantomime or wordless play in three acts, written by M. Carré, fils, composed by André Wormser. Produced at the Cercle Funambulesque, Paris, June 14, 1890, and at the Bouffés Parisiens, June 21 of the same year. In London at the Prince of Wales's Theatre, March 31, 1891.

ENGEDI. See MOUNT OF OLIVES.

ENGEL, CARL, an eminent writer on musical instruments, was born at Thiedenweise, near Hanover, July 6, 1818. His attainments as a musician, his clear insight into books in many languages, his indefatigable perseverance in research, and the exercise of a rare power of judicious discrimination, made him one of the first authorities on his subject in Europe. When a student he studied first with Enckhausen, an organist in Hanover, and afterwards received piano lessons from Hummel ; after adopting music as a profession, he for some time remained in the family of Herr von Schlaberndorf, a nobleman in Pomerania. About 1844-45 Engel came to England and resided at first at Manchester, where he gave lessons on the piano. He removed soon after to London, and settled in Kensington. He began by reading in the British Museum to prepare himself for those studies in musical history on which his reputation is founded, and became a collector when opportunities were more frequent than they are now for acquiring rare instruments and books. He thus formed a private museum and library that could hardly be rivalled except by a few public institutions. The change in the direction of his musical activity did not however divert him from pianoforte-playing ; he became as familiar with the works of Schumann, Brahms, and other modern composers, as he was with those of the older masters. He wrote and published a Pianoforte Sonata (Wessel, 1852), the *Pianist's Handbook* (Hope, 1853), and a *Pianoforte School for Young Beginners* (Augener, 1855). He also wrote *Reflections on Church Music* (Scheuermann, 1856). The first-fruits of his archæological studies were shown in the publication of *The Music of the Most Ancient Nations, particularly of the Assyrians, Egyptians, and Hebrews* (Murray, 1864), which was followed by *An Introduction to the Study of National Music* (Longmans, 1866). About this time began his connection with the South Kensington Museum,

to which he gave valuable advice respecting the formation of the rich collection of rare musical instruments which is an important branch of that institution. His first public essay in connection with it was the compilation in 1869 of a folio volume entitled *Musical Instruments of all Countries*, illustrated by twenty photographs; a work now rarely to be met with. He compiled the catalogue of the Loan Collection of ancient musical instruments shown there in 1872; and followed it by a *Descriptive Catalogue of the Musical Instruments in the South Kensington Museum*, published in 1874, a masterpiece of erudition and arrangement, and the model for the subsequently written catalogues of the Paris and Brussels Conservatoires, and of the Kraus Collection at Florence. He resolved to complete this important work by an account of the musical instruments of the whole world, and wrote a book which, in manuscript, fills four thick quarto volumes, and is illustrated by upwards of 800 drawings. It remains in the hands of his executors. While however this, his *magnum opus*, was in progress, he wrote a contribution to *Notes and Queries* on Anthropology, pp. 110-114 (Stanford, 1874), *Musical Myths and Facts* (Novello, 1876), and articles in the *Musical Times*, from which *The Literature of National Music* (Novello, 1879) is a reprint. Among these articles the descriptions of his four Clavichords possess an unusually lasting interest and value. They were published in July–Sept. 1879, and were followed by *Music of the Gipsies*, May–August 1880, and *Æolian Music*, August and Sept. 1882. A posthumous publication of considerable importance is *Researches into the Early History of the Violin Family* (Novello, 1883). There remain in manuscript, besides the great work already mentioned, *The Musical Opinions of Confucius* and *Vox Populi* (a collection of national airs). After the death of his wife in 1881, he thought of living again in Germany, and sold his library by public auction, while the more valuable part of the musical instruments (excepting his favourite harpsichords, clavichord, and lute, now in the possession of Mr. Herbert Bowman and the present writer[1]) was acquired by South Kensington Museum. But, after a short visit to Hanover he returned to England, and died at his house in Addison Road, Kensington, November 17, 1882. A. J. H.

ENGFÜHRUNG. German for STRETTO. See FUGUE, STRETTO.

ENGLAND, GEORGE, and GEORGE PIKE ENGLAND (his son), organ-builders. The former flourished between 1740 and 1788, and married the daughter of Richard Bridge; the latter between 1788 and 1814. The elder England built many noble organs. Of Bridge little is known; he is believed to have been trained by Harris the younger, and to have lived in Hand Court, Holborn, in 1748. His best organ was at Christ Church, Spitalfields, 1730. V. DE P.

ENGLISH HORN. See COR ANGLAIS.

ENGLISH OPERA. An English opera may be defined as a regular drama, the most important parts of which are set to music and sung, the dialogue being spoken, as in German and French operas other than 'grand operas.' It differs from a musical play in the fact that in most cases the musical pieces may be omitted from the play without interrupting the progress of the action, whilst in an opera they form integral and essential portions of it. The exceptions from this rule will be noticed presently.

The earliest instances of the alliance of music with the English drama are probably to be found in the mysteries, or miracle-plays, anciently performed at Coventry, Chester, and other places. As the drama became developed, the association of music with it became closer and more frequent. In several of Shakespeare's comedies the songs, etc., are absolutely essential to the piece, and cannot be omitted. Witness particularly 'The Tempest,' 'As You Like It,' 'Twelfth Night,' and 'A Midsummer Night's Dream.' In the masques performed at court, *temp.* James I. and Charles I., a nearer approach was made to the opera—poetry, music, scenery, machinery, and characteristic dresses and decorations being combined in them. Alfonso Ferrabosco junior, Laniere, Coperario, Robert Johnson, Campion, Simon Ives, and William and Henry Lawes, were the principal composers employed. The first approaches towards the revival of dramatic entertainments, which had been suspended by the closing of the theatres during the Civil War, were made during the interregnum through the medium of musical pieces. On March 26, 1653, Shirley's masque, 'Cupid and Death,' with music by Matthew Lock and Christopher Gibbons, was performed before the Portuguese ambassador. Three years later Sir William Davenant gave, in a semi-public manner, 'The First Day's Entertainment at Rutland House by Declamations and Musick,' with music by Colman, Cook, H. Lawes, and Hudson. In the prologue it is designated an opera, though it is not one in any respect. In the following year Davenant produced 'The Siege of Rhodes,' the dialogue of which was given in recitative, which Davenant describes as 'unpractised here, though of great reputation amongst other nations.' This piece, to which a second part was subsequently added, maintained its position for some years, but the music has not, so far as is known, been preserved. 'The Siege of Rhodes' was followed by the production by Davenant in 1658 of 'The Cruelty of the Spaniards in Peru, expressed by instrumental and vocal music, and the art of perspective in scenes,' a performance said to have been not only connived at, but secretly encouraged by Cromwell, who was then supposed to be meditating some designs against

[1] [Those which were in the possession of Mr. Hipkins were given, after his death, to the Royal College of Music.]

the Spaniards. During the four or five years which followed the reopening of the public theatres in 1660, little, beyond occasional repetitions of 'The Siege of Rhodes,' appears to have been done to forward operatic performances on the English stage. The Plague in 1665 and the Great Fire of London in 1666 caused a temporary suspension of all theatrical performances, but a step onwards was made in 1667 by the production of an adaptation by Davenant and Dryden of Shakespeare's 'Tempest' with large additions to the lyric portions. The vocal music of this version was supplied by Pelham Humfrey and John Banister, and the instrumental by Matthew Lock. Soon after the opening of the theatre in Dorset Gardens (1671), the proprietors resorted to opera as the principal attraction. In 1673 they brought out Shadwell's 'Psyche,' of which the author said 'the great desire was to entertain the town with variety of musick, curious dancing, splendid scenes and machines.' Matthew Lock composed the vocal, and Giovanni Baptista Draghi the instrumental music for 'Psyche,' the dances being arranged by St. André, and the scenery painted by Stephenson In 1676 Charles Davenant's 'Circe' was produced, with the music of John Banister. The Frenchman Grabut's setting of Dryden's 'Albion and Albanius' appeared in 1685 and failed. About 1688 was 'performed at Mr. Josias Priest's Boarding School at Chelsey by young Gentlewomen' Henry Purcell's first opera 'Dido and Æneas,' the dialogue in recitative.

About 1690 Purcell reset 'The Tempest,' revised for that purpose by Dryden, and composed the music for 'Dioclesian'—an adaptation by Betterton of Beaumont and Fletcher's 'Prophetess,' 'with alterations and additions after the manner of an opera,' and in 1691 for Dryden's 'King Arthur.' Two years later he set Dryden's alteration of Sir R. Howard's 'Indian Queen,' and 'The Fairy Queen,' an adaptation of Shakespeare's 'Midsummer Night's Dream.'[1] Purcell's contemporaries and immediate successors adhered to the form adopted by him, from which no deviation took place (with the exception of Clayton's setting of Addison's 'Rosamond' in 1707, Boyce's 'Chaplet,' 1749, and 'Shepherd's Lottery,' 1751, and Arne's 'Thomas and Sally,' 1760, in all which, and possibly in a few minor pieces, the dialogue was set as recitative) until 1762, when Arne produced his 'Artaxerxes,' set after the Italian manner, with the dialogue wholly in recitative. This departure from the established form produced, however, no immediate imitators, and Arne's contemporaries and successors, Dibdin, Arnold, Jackson, Linley, Hook, Shield, Storace, Attwood, Braham, Bishop, Barnett, Rooke, etc., adhered for nearly a century to the established model, which, as already remarked, was also that of German opera and of French Opéra-Comique.

Efforts have been made at different times and with very chequered results to establish theatres especially devoted to the production of English opera. In 1809 Samuel James Arnold, son of Dr. Arnold, obtained a licence for opening the Lyceum Theatre (which he named the English Opera House) for their performance, and for several years afterwards produced, besides the standard operas, new works by Braham, Horn, M. P. King, Davy, and other native composers. The great success of Weber's 'Der Freischütz,' produced in English in 1824, induced Arnold to change his plan, and for some years afterwards he brought forward principally English versions of German operas, until the success in 1834 of Barnett's 'Mountain Sylph' led him to revert to his original design, and to produce works by Loder, Thomson, and Macfarren. From about 1835 to 1850 successive managers of Drury Lane Theatre devoted much attention to the production of English opera, and many new works by Barnett, Balfe, Wallace, Macfarren, Benedict, and others were brought out there. In 1856 Miss Louisa Pyne and Mr. W. Harrison embarked in an undertaking for the performance of English operas; and under their management, which lasted about seven years, several new operas by Balfe, Benedict, Wallace, and others, were produced. An 'English Opera Company, Limited,' was formed in 1865, and gave performances at Covent Garden Theatre, but proved unsuccessful. Macfarren's 'Helvellyn' was its sole English production. It should be noted that in this and some other of the later English operas the dialogue is set as recitative, and the general form of the works is that of the modern grand opera.

[For a good many years, the energies of Carl Rosa and the company called after his name, were turned to the task of obtaining public recognition for the highest class of English operas, and he brought out a fair number of works of merit. Cowen's 'Pauline' was given in 1876; Mackenzie's 'Colomba' and Goring Thomas's 'Esmeralda' in 1883; Stanford's 'Canterbury Pilgrims' in 1884; Thomas's 'Nadeshda' in 1885; Mackenzie's 'Troubadour' in 1886; Corder's 'Nordisa' in 1887; Cowen's 'Thorgrim' in 1890; Hamish MacCunn's 'Jeanie Deans' in 1894; and 'Diarmid' in 1897.

During and since the period of Sir Augustus Harris's management of Covent Garden, a few English operas were given in English, such as Cowen's 'Harold' in 1895, and Stanford's 'Much ado about Nothing' in 1901. Other works by English composers have been given at Covent Garden and elsewhere, but for the most part in the fashionable operatic language of the moment, such as Balfe's 'Talismano' in 1874, Cowen's 'Signa' in 1894, in Italian; Stanford's 'Savonarola' (1884), and Miss Ethel Smyth's 'Der Wald' (1902) in German, and

[1] [The dates of these productions of Purcell are as yet ascertained with only approximate accuracy. For the latest results, the reader is referred to the article PURCELL.]

Herbert Bunning's 'Princesse Osra' (1902) in French.

The German Reed Entertainment, which lasted from 1856 to 1895, had, indirectly, a great result in the development of a distinctively English form of light opera, for it was the type of piece given by them that ultimately started the 'Savoy' form of comic opera, in which Gilbert and Sullivan won not only the esteem of literary and musical people, but the patronage of the public at large, for a long series of years, in fact, down to the death of Sullivan, and for a short time afterwards, during the run of German's 'Merrie England' (1902) and 'A Princess of Kensington' (1903). The famous attempt made to start a permanent institution for national opera, at the Royal English Opera House, was foredoomed to failure, because no repertory was planned beforehand, reliance being placed in the attracting power of Sullivan's 'Ivanhoe' (1891), shortly after the end of the run of which the theatre was turned into a music-hall.]

There remains to be noticed a class of English operas, the songs of which are not set to music composed expressly for them, but are written to existing tunes, principally those of old ballads and popular songs, whence the works derived the name of Ballad Operas. The famous 'Beggar's Opera' was the first of these, and to its wonderful popularity its successors owed their existence. [BEGGAR'S OPERA.] The dialogue of these pieces is wholly spoken. The following is believed to be a complete list of them:—1728: 'The Quaker's Opera'; 'The Devil to Pay'; 'Penelope'; 'Love in a Riddle.'—1729: 'The Village Opera'; 'Momus turn'd Fabulist'; 'Flora, or, Hob in the Well'; 'Damon and Phillida' (an alteration of 'Love in a Riddle'); 'The Beggar's Wedding'; 'The Wedding'; 'Polly.'—1730: 'The Fashionable Lady, or, Harlequin's Opera'; 'The Chamber-maid'; 'The Lover's Opera'; 'The Female Parson'; 'Robin Hood.'—1731: 'Silvia, or, the Country Burial'; 'The 'Jovial Crew'; 'Orestes'; 'The Generous Freemason'; 'The Highland Fair' (Scotch Tunes); 'The Lottery'; 'Patie and Peggy'; 'The Amours of Billingsgate'; 'The Grub Street Opera'; 'The Welsh Opera.'—1732: 'The Devil of a Duke'; 'The Humours of the Court'; 'The Mock Doctor'; 'Sequel to Flora.'—1733: 'Achilles'; 'The Boarding School'; 'The Cobler's Opera'; 'The Lively Rake and Country Lass.'—1734: 'The Whim.'—1735: 'The Plot'; 'Trick for Trick'; 'The Merry Cobler.'—1736: 'The Lover his own Rival.'—1737: 'The Coffee House.'—1738: 'The Disappointed Gallant, or, Buckram in Armour.'—1739: 'The Tanner of York'; 'The Hospital for Fools'; 'Britons, Strike Home.'—1740: 'The Preceptor, or, The Loves of Abelard and Heloise.'—1750: 'The Intriguing Chambermaid.'—1758: 'Galligantus.'

W. H. H.

ENGRAVING, MUSIC. The modern process by which is produced the greatest bulk of the music issued to-day is this:—

The stave lines are first cut on a pewter plate, then a series of small steel punches are used for striking the notes and lettering, the graver being employed in other parts, and for the title-page. Proofs are pulled by an ordinary copper-plate press, and corrections can be easily made on the plates. For the final printing a copy in transfer ink is placed on a lithographic stone, from which the entire edition is worked, leaving the plates for future use, and with the exception of the lithographic part, this process has remained exactly the same for a couple of centuries.

While the arts of engraving and etching for pictorial purposes had attained a high degree of perfection during the 17th century, it is singular that so obvious a method and so superior a one to that where the clumsy music typography of the day was employed, should have been so seldom used. The first music (of which we have record) printed in England from plates is either 'Parthenia,' 1611, or Gibbons's 'Fantazies of three parts' for Viols. The date of this latter work has been fixed at 1609, and again at 1610, but these years are quite uncertain. Both 'Parthenia' and the 'Fantazies' were reprinted several times from the same plates.

It has been recently stated that the first English printed plate music occurs in the work, *The Noble Arte of Venerie or Hunting* [George Turberville] imprinted by Henry Bynnemann for Christopher Barker, 1575, 4to (second edition, 1611). The music is a short passage—notes for the hunting horn—but the present writer contends that in both editions it has been printed from a raised surface, probably a wood-cut, for the work is freely adorned with these. The appended list of English printed music from engraved plates before 1700 will probably be found to be fairly comprehensive, but so many of the works named are now only represented by a single copy that it is possible the titles of many others are now lost.

In 1683 Thomas Cross (*q.v.*) began to engrave, and he soon made a revolution in English music publishing. After 1700 it was the rule rather than the exception to issue music from plates. About this time the Dutch appear to have found out a method of softening copper, so that the notes could be readily stamped on the plate. Pewter soon took the place of the more expensive metal, and engraving was superseded by stamping.

John Walsh and John Hare are stated to have introduced the process into England about 1710, but probably the date may be a few years earlier.

There are indications that Cross (except in his very early work) did much of his engraving on either zinc or pewter, and probably used in some cases the etching-needle and acid. It must be noticed that before Cross engraved,

nearly all engraved music was instrumental and that the quavers and semiquavers were joined in groups as in the manuscript of the day, while in music typography of the same period before the introduction of the 'tied note' the quavers were separate. The three principal London music engravers of the 18th century were Wm. Smith (working from about 1730 to 1762), and John Phillips and his wife Sarah (1750-1763). In Scotland (Edinburgh) Richard Cooper (*q.v.*) worked from about 1725 to 1764. T. Phinn and James Read were a little later, while James Johnson from 1772 to 1811 monopolised the whole of the Scottish trade. Manwaring and the Neal family worked in Dublin about the middle of the 18th century.

English Engraved Music Books before 1700.

1611. 'Parthenia or the Maydenhead of the first music that ever was printed for the Virginalls.' Folio. (Reprinted 1813, 1655, 1659, with a 'Second Part' issued in 1689.)

c. 1614. 'Parthenia Inviolata,' obl. 4to. (The only known copy is in an American collection.)

[No date.] Gibbons, Orlando. Fantazies of three parts [for Viols] cut in copper, the like not heretofore extant. London at the Bell in St. Paul's Churchyard. 4to. (Reprinted from the original plates, no doubt several times: advertised by Playford in 1653, etc.)

1639. Child, Wm. 'Choise musick to the Psalmes of Dauid for three voices,' 12mo. Four parts. (Reprinted by Playford: advertised in 1653; one of his editions dated 1656.)

1659. Simpson, Christopher. 'Division Violist.' Folio. (Letterpress and title printed; music from engraved plates. Later editions 1667 and 1712.)

1661. Greeting, Thomas. 'The Pleasant Companion or new Lessons for the Flagelet,' obl. 12°. (J. Playford: other editions said to be dated 1666, 1672, 1675, 1680, 1682, 1683, and 1688.)

1663. 'Musick's Handmaid, New Lessons and Instructions for the Virginals or Harpsychord,' obl. 4to.
(J. Playford: many later editions).

1678. Bowman, Henry. 'Songs for one, two, and three voices.' Oxford. Folio. (A later edition 1679.)

1679. A Vade Mecum for the lovers of Musick, shewing the Excellency of the Rechorder. MDCLXXIX. London. N. Thompson for John Hudgebutt. Obl. 8vo. (Bodleian Library.)

1683. 'The Genteel Companion being exact directions for the Recorder.' Humphrey Saulter. Obl. 4to.

1683. 'The Delightful Companion, a new Book of Lessons for the Recorder.' Folio. J. Playford.

1683. Purcell, H. 'Sonnatas of III. parts for two violins and a basse.' Folio.

1684. 'Division Violin.' H. Playford. Obl. 4to. (Other editions 1685-1695, 1700-1701.)

1685. Matteis, N. 'Ayres for the Violin.' 4 vols. obl. 8vo. (Engraved by T. Greenhill: the date is concealed in the ornamentation of a crown on one of the title-pages.)

1686. Thornton, Robert, a Dublin bookseller and engraver, advertises in this year, that 'The choicest New Songs with musical Notes . . . fairly engraven on Copper will be constantly printed and sold at Twopence a song by the said Robert Thornton.'

1696. Purcell, H. 'Lessons for the Harpsichord.' Obl. 4to.

1697. 'Youth's Delight on the Flagelet.' Sold by J. Clarke. Seventh edition. Obl. 8vo. Date cut off. *Circa* 1680. The eleventh edition published by J. Hare is dated 1697 in part from same plates.

c. 1698. A collection of songs by R. Leveridge, engraved by T. Cross, in possession of writer, title absent.

1700. Dr. Blow's 'Lessons for the Harpsichord.'

In addition several sheet songs published by Henry Playford and by T. Cross might be mentioned. F. K.

ENHARMONIC. (i.) One of the genera of GREEK MUSIC, which see. (ii.) The word is usually applied to such changes or modulations as are only possible upon instruments tuned in equal temperament, in which the same notes serve for C sharp and D flat, for F sharp and G flat, for G sharp and A flat, etc. Every note on the modern keyboard may be called by three different names at least; thus the note C is called B sharp and D double flat, and harmonic progressions that imply the assumption that these notes are identical are called enharmonic. See CHANGE 3, p. 497, DIESIS, MODULATION, TEMPERAMENT.

ENNA, AUGUST, was born at Nakskov, in Denmark, on May 13, 1860, of poor and humble parents, his father being a small shoemaker. His grandfather was an Italian soldier in Napoleon's army, who married a German woman and settled in Denmark. In 1870 the Ennas moved from Nakskov to Copenhagen, where August attended the free-schools. He showed musical capacity early in his life, but did not receive any teaching worthy of the name. In early years he taught himself the pianoforte, and at seventeen had a few lessons of little value on the violin and in theory. With this exception he was entirely self-taught, but he did his best to counteract this disadvantage by earnest and diligent study of harmony and orchestration. When he was about twenty he wished to join the Copenhagen orchestra, but he was not a sufficiently good violinist, so he attached himself to a small travelling orchestra on a tour to Finland. After a fairly successful tour of six months he returned to Copenhagen, and composed an operetta called 'A Village Tale,' which was produced, towards the end of 1880, in several provincial theatres. He still, however, was extremely poor, and was obliged to play at dancing lessons (where his dance-music was often improvised), and to teach the piano at the rate of about sixpence an hour. In 1883 he obtained the post of conductor to a provincial company, for which he wrote the incidental music and several overtures. He was now comparatively well-to-do, and was enabled to publish some music, viz. songs, an orchestral suite, piano pieces, and a symphony, which happened to attract Gade's attention. By Gade's help Enna gained the Ancker scholarship, which enabled him to go to Germany for a year (1888-89), where he studied with enthusiasm, and gradually matured his great natural gifts. The immediate result of this period was a three-act opera called 'Heksen'—'The Witch,'—which was produced at the Royal Opera-house in Copenhagen on Jan. 24, 1892, and was a brilliant success. Two years later he produced another opera, 'Cleopatra,' at Copenhagen, but for some reason this failed to catch the public taste, until the following year, when, with a new caste, it became extremely popular. He met with a further success with his 'Aucassin et Nicolette,' produced at Copenhagen in 1896, and at Hamburg in the following year. He has also published a violin concerto in D major, which promises to be a welcome addition to the limited repertory of the virtuoso. His music is notable for its unconventional freshness, its beauty of sound, and its clever and original orchestration. H. B.

ENOCH & SONS. A London firm of music-publishers. The business was established by Emile S. Enoch in 1869 at No. 18 Berners Street, and in 1874 was removed to 19 Holles Street. In 1886 the firm took over their present premises at 14 Great Marlborough Street. The

publications of Messrs. Enoch & Sons cover a great number of noteworthy and valuable works. They include several operas by Lecocq, songs and pianoforte pieces by Chaminade, Cowen, German, Moszkowski, Landon Ronald, and Sullivan. They are also the English agents for the well-known Litolff cheap editions of classical music. F. K.

ENSEMBLE (Fr. 'together') is a term used in a special way which is often misunderstood. Its use as a substantive may come from the French phrase, 'musique d'ensemble,' for what we call concerted music, whether in regard to the concerted pieces in an opera, where the principal characters take part together, or in chamber music, written for a small number of instruments in combination. It is in regard to this latter sense that the special use of the word is most common. A party of players, brought up in different schools, each pre-eminent in his own line, if required to join their forces in a string quartet for example, would find a special difficulty in so modifying their own individuality as to present a perfectly harmonious interpretation of the work; their 'ensemble' would probably be pronounced unsatisfactory, and players of far inferior attainment, who happened to have enjoyed frequent opportunities of playing together, and learning each other's manner of phrasing, would probably give a far better idea of the work as a whole, and their 'ensemble' would be rightly said to be good. As the perfect instances of ensemble-playing in organisations regularly formed for the purpose, may be mentioned the Joachim Quartet, the Bohemian Quartet, the Kneisel Quartet, and the Moscow Trio. The term is more rarely used of orchestral performances, but in one famous instance, that of the Ducal Orchestra of Saxe-Meiningen, no other word is properly applicable; every detail of phrasing is brought out with such complete sympathy between the players, yet with such wonderful spontaneity of effect, that the players are said to play with 'perfect ensemble.' The same kind of perfection in vocal ensemble is far less easy to attain, and on this account, performances of Schumann's 'Spanisches Liederspiel' and the two sets of 'Liebeslieder' of Brahms seldom reach ideal perfection. The realisation of fine ensemble, whether vocal or instrumental, seems to involve complete unselfishness on the part of all the performers. M.

ENTFÜHRUNG AUS DEM SERAIL, DIE. A comic operetta (*Singspiel*) in three acts, by Mozart; words altered by Stephanie from Bretzner's 'Belmont und Constanze.' Begun July 30, 1781; produced July 16, 1782, at Vienna. Its French and Italian titles are, 'L'Enlèvement au Sérail' and 'Il Seraglio.' [ANDRÉ, p. 85*a*.] It was produced in English 'with additional airs by Mr. Kramer' as 'The Seraglio,' at Covent Garden, Nov. 24, 1827. Much of Mozart's music was cut out, and popular English melodies and airs from other operas inserted instead (Moscheles, *Life*, i. 193). The perpetrators of this outrage—at that time a common proceeding—were Mr. Dimond, who translated the book, and Kramer, the director of the King's Band at Brighton. The scenery was painted by David Roberts, and the effects were 'rich and amazingly beautiful' (Moscheles).—As 'Il Seraglio' and 'Der Serail' the opera was announced and played by the German Company at Drury Lane, June 14, 1854; and as 'Il Seraglio' it was performed at Her Majesty's Theatre, June 30, 1866, and at Covent Garden, June 9, 1881. G.

ENTR'ACTE. See ACT-TUNE, and INCIDENTAL MUSIC.

ENTRÉE. (i.) A name formerly given to a small piece of music in slow 4–4 time, with the rhythm of a march, and usually containing two parts, each repeated. It received its name from the fact of its being largely used in theatrical and ballet music to accompany the entry of processions, etc. An example of this kind of Entrée may be found in J. S. Bach's Suite in A for piano and violin. (B.-G. ix. p. 51.) (ii.) The word Entrée (or its Italian equivalent *Intrada*) is also used as synonymous with 'introduction,' and is applied to the opening piece (after the overture) of an opera or ballet. E. P.

ÉPINE, FRANCESCA MARGHERITA DE L', in spite of her French-sounding surname, appears to have been an Italian singer, although she frequently signed herself 'Françoise Marguérite.' From Italy she came to England with a German musician named Greber, and was often, therefore, called 'Greber's Peg' by the wits of the day. An advertisement in the *London Gazette* (No. 2834), 1692, announces that the '*Italian lady* (that is lately come over that is so famous for her singing) though it has been reported that she will sing no more in the consort at York-buildings; yet this is to give notice, that next Tuesday Jan. 10th, she will sing there, and so continue during the season.' A fortnight later, this 'lady' is more familiarly called the 'Italian woman' in the notice given in the *Gazette*, that she would not only sing at York-buildings every Tuesday, but on Thursday in Freeman's Yard, Cornhill. She was the first Italian who sang in England. In May 1703 she received '20 ggs for one day's singing in ye play call'd the Fickle Shepherdess' (MS. in the writer's collection). In the theatrical advertisement for Lincoln's Inn Fields, June 1, 1703, it is said that 'Signora Francesca Margarita de l'Épine will sing, being positively the last time of her singing on the stage during her stay in England.' She continued, notwithstanding this, to sing during the whole of that month; nor did she ever quit England, but remained here till the time of her death, August 9, or 10, 1746. It appears from a MS. diary (in the writer's possession) kept by B. Cooke (*i.e.* Dr. Cooke), a pupil of Dr. Pepusch,

that Mme. Pepusch began to be ill on July 19, 1746, and that, on August 10, following, in the afternoon he (B. Cooke) went to Vaux-Hall with the Doctor, *Mrs. Pepusch* being dead. She was 'extremely sick' the day before.

On Jan. 29, 1704, Margherita sang, for the first time, at Drury Lane. On her second appearance there was a disturbance in the theatre, while she was singing, the instigation of which was attributed to her rival, Mrs. Tofts, whose servant was, indeed, one of the principal agents in it. Mrs. Tofts, however, indignantly denied this in a letter to Rich, printed in the *Daily Courant*, Feb. 8, 1704. In 1705 'Arsinoe' was produced, as announced in the *Daily Courant*, 'a new opera, after the Italian manner, all sung, being set by Master Clayton, with dances and singing before and after the opera, by Signora F. Margarita del' Épine.' This singing was probably in Italian. She sang in Greber's 'Temple of Love,' the year after; and in 1707 in 'Thomyris,' the music taken from Scarlatti and Buononcini, the recitatives and accompaniments being added by Mr. (afterwards Dr.) Pepusch. She sang also in 'Camilla,' performing her part in Italian, while the English singers sang their own language. These rôles she repeated in 1708, and in 1709 added that of Marius in Scarlatti's 'Pyrrhus and Demetrius,' arranged for the English stage by Swiny and Haym. In 1710 she sang in 'Almahide,' that opera, the first ever performed wholly in Italian on our stage, the names of neither poet nor composer of which are known; and again in 'Hydaspes.' In addition to these, she took part in 'Antiochus' and 'Ambleto,' and in Handel's 'Pastor Fido' and 'Rinaldo' in 1712; and in the pasticcio 'Ernelinda' and Handel's 'Teseo' in 1713. She continued to sing until 1718, when she married Dr. Pepusch, and retired from the stage. She is said to have brought him a fortune of £10,000. 'Her execution was of a very different order' from that of the English singers of that time, 'and involved real difficulties. Indeed, her musical merit must have been very considerable to have kept her so long in favour on the English stage, where, till employed at the opera, she sang either in musical entertainments, or between the acts, almost every night. Besides being *out-landish,* she was so swarthy and ill-favoured, that her husband used to call her *Hecate,* a name to which she answered with as much good humour as if he had called her Helen' (Burney). It was, perhaps, owing to this ugliness that no portrait of her was ever made. She was a woman of perfectly good character; but Dean Swift, who was no respecter of persons, particularly musical, in his *Journal to Stella,* August 6, 1711, being at Windsor, says, 'We have a music-meeting in our town to-night. I went to the rehearsal of it, and there was Margarita, and her sister [G. Maria Gallia], and another drab, and a parcel of fiddlers; I was weary and would not go to the meeting, which I am sorry for, because I heard it was a great assembly.' She is said to have been an excellent musician, not only as a singer, but also as an extraordinary performer on the harpsichord, and marks an era in the history of music in England. J. M.

EPISODES are secondary portions of musical works, which stand in contrast to the more conspicuous and definite portions in which the principal subjects appear in their complete form, through the appearance in them of subordinate subjects, or short fragments only of the principal subjects.

Their function as an element of form is most easily distinguishable in the fugal type of movement. In the development of that form of art composers soon found that constant reiteration of the principal subject had a tendency to become wearisome, however ingenious the treatment might be; and consequently they often interspersed exposition and counter-exposition with independent passages, in which sometimes new ideas, and more often portions of a counter-subject, or of the principal subject, were used in a free and fanciful way. By this means they obtained change of character, and relief from the stricter aspect of those portions in which the complete subject and answer followed one another, in conformity with certain definite principles. In connection with fugue, therefore, episode may be defined as any portion in which the principal subject does not appear in a complete form.

There are a certain number of fugues in which there are scarcely any traces of episode, but in the most musical and maturest kind episodes are an important feature. It is most common to find one beginning as soon as the last part which has to enter has concluded the principal subject, and therewith the exposition. Occasionally a codetta in the course of the exposition is developed to such dimensions as to have all the appearance of an episode, but the more familiar place for the first one is at the end of the exposition. As an example of the manner in which it is contrived and introduced the Fugue in F minor, No. 12 of the first book of J. S. Bach's *Wohltemperirtes Clavier*, may be taken. Here the subject is clearly distinguishable at all times from the rest of the musical material by its slow and steadily moving crotchets. The counter-subject which at once follows the first statement of the subject, as an accompaniment to the first answer, introduces two new rhythmic figures, which afford a marked contrast to the principal subject—

and out of these the various episodes of the

movement are contrived. The manner in which it is done may be seen in the beginning of the first episode, which begins at bar 16, and into which the former of the two figures is closely woven.

The adoption of this little figure is especially happy, as the mind is led on from the successive expositions to the episodes by the same process as in the first statement of subject and counter-subject, and thereby the continuity becomes so much the closer.

As further examples in which the episodes are noticeable and distinct enough to be studied with ease, may be quoted the second, third, fifth, tenth, and twenty-fourth of the first book of the *Wohltemperirtes Clavier*, and the first, third, twelfth, and twentieth of the second book. They are generally most noticeable and important in instrumental fugues, which have a definite and characteristic or rhythmically marked subject.

It follows from the laws by which expositions are regulated, that episodes should be frequently used for modulation. While the exposition is going on, modulation is restricted; but directly it is over, the mind inclines to look for a change from the regular alternation of prescribed centres. Moreover, it is often desirable to introduce the principal subject in a new key, and the episode is happily situated and contrived for the process of getting there; in the same way that after transitions to foreign keys another episode is serviceable to get home again. In this light, moreover, episodes are very frequently characterised by sequences, which serve as a means of systematising the steps of the progressions. Bach occasionally makes a very happy use of them, by repeating near the end a characteristic episode which made its appearance near the beginning, thereby adding a very effective element of form to the movement.

In a looser sense the term Episode may be applied to portions of fugues which stand out noticeably from the rest of the movement by reason of any striking peculiarity; as for instance the instrumental portion near the beginning of the Amen Chorus in the 'Messiah,' or the central portions of certain very extensive fugues of J. S. Bach, in which totally new subjects are developed and worked, to be afterwards interwoven with the principal subjects.

In the purely harmonic forms of art the word is more loosely used than in the fugal order. It is sometimes used of portions of a binary movement in which subordinate or accessory subjects appear, and sometimes of the subordinate portions between one principal subject and another, in which modulation frequently takes place. It serves more usefully in relation to a movement in Aria or Rondo form: as the central portion in the former, and the alternative subjects or passages between each entry of the subject in the latter cannot conveniently be called 'second subjects.' In the old form of Rondo, such as Couperin's, the intermediate divisions were so very definite and so clearly marked off from the principal subject that they were conveniently described as Couplets. But in the mature form of Rondo to be met with in modern Sonatas and Symphonies the continuity is so much closer that it is more convenient to define the form as a regular alternation of principal subject with episodes. It sometimes happens in the most highly artistic Rondos that the first episode presents a regular second subject in a new key; that the second episode (following the first return of the principal subject) is a regular development or 'working out' portion, and the third episode is a recapitulation of the first transposed to the principal key. By this means a closer approximation to binary form is arrived at. In operas and oratorios, and kindred forms of vocal art, the word is used in the same sense as it would be used in connection with literature.

C. H. H. P.

EQUAL TEMPERAMENT, the equal division of the octave into twelve semitones at such distances apart as are equal in ratio to one another. For the true proportions of the scale see JUST INTONATION, SCALE, and TEMPERAMENT. The discrepancy that exists, and must always exist, between the note arrived at by tuning up four perfect fifths from a fixed note, and two octaves and a major third from the same note, is an interval in the proportion of 80 : 81, and the Pythagorean comma, or 'comma maxima,' the difference resulting from the tuning up of twelve perfect fifths and the corresponding number of octaves, is 80 : 81·0915, as explained under COMMA. Equal or even temperament is the system by which this slight error in the scale is practically removed by being spread equally over all the semitones, instead of, as was formerly the practice, being confined to the keys most rarely employed. This equalisation of the error made all keys equally available for use on keyed instruments, though at a very distinct sacrifice of harmonic beauty; without it modulation was narrowly restricted, and as one of the arguments on the side of its general adoption was the immortal series of forty-eight preludes and fugues by Bach, called *Das Wohl-*

temperirtes Clavier, even the most fastidious musicians have little to complain of. M.

EQUAL VOICES, a term of rather ambiguous use, strictly denoting voices of equal compass. Sometimes works for female voices alone, or for male voices alone, are spoken of as 'works for equal voices'; but this is incorrect, and the term should be kept for those of equal compass, such as compositions for two or more soprani or for several contralti, as the case may be. The majority of Handel's chamber duets, 'The Lord is a Man of war,' and Mozart's 'Sull' aria,' may be cited as typical examples of duets for equal voices. In cases where one of two soprano parts is taken by a tenor, or one of two contralto parts by a bass, the composition does not cease to be 'for equal voices,' and the term is more correctly used of this combination than of that for soprano and contralto, or for tenor and bass. M.

ERARD. The name borne by this firm of harp and pianoforte-makers has been known almost as long in England as in France, its workshops having been established in London near the close of the 18th century, not long after those in Paris. The reputation of Erard's house is as much due to successful improvements in the harp as in the pianoforte, those of the harp being of similar importance to the perfecting of the violin accomplished by the famous Cremona makers.

SÉBASTIEN ERARD was born at Strasburg April 5, 1752, and was early put to his father's handicraft of cabinetmaker. His father dying when he was sixteen, he went to Paris and placed himself with a harpsichord-maker. He had soon the opportunity to display his practical ingenuity by the construction of a mechanical harpsichord, which was described by the Abbé Roussier in 1776. The Duchess of Villeroi took notice of him, and allotted to him a workshop in her own château, where, in 1777, he made the first pianoforte constructed in France. According to Fétis this was a square with two unison stops and a compass of five octaves, similar to the English and German instruments that had been imported. He now established himself, with his brother Jean Baptiste, in the Rue de Bourbon. Their success exciting the jealousy of the Parisian musical instrument-makers known as Luthiers, and belonging to the Fan-makers' Guild, they used the power they possessed to seize Erard's workshops; Louis XVI., however, came to the aid of the brothers, and conferred upon Sébastien (in 1785) a *brevet* permitting him to make 'forte-pianos' independent of the guild, but obliging him to employ workmen who had satisfied its regulations. (Rimbault, *The Pianoforte*, 1860, p. 124.)

Sébastien Erard was in London in 1786, and in 1792 took out a patent for improvements in harps and pianofortes. He returned to Paris, after the Terror, in 1796, in which year he made his first grand piano, using the English action, which, Fétis informs us, he continued with until 1808. In 1809 he patented a repetition grand piano action (the first) and improvements in the construction of the harp, nearly completing that ingenious double action which was begun about 1786 and was perfected in 1810. A feature in the 1809 patent was the inverted bridge or upward bearing at the wrestplank bridge of the piano, since universally adopted. Advanced age made Sébastien leave to his nephew Pierre Erard the introduction of his perfected repetition action, the patent for which was taken out in London in 1821. Sébastien died August 5, 1831. Among his other inventions may be mentioned a 'Piano organisé,' or combination of piano and organ, a 'harpe à fourchette,' and the 'orgue expressif.' In 1835 the patent was extended to Pierre Erard for seven years on the plea of its great value and of the losses sustained in working it. The invention in 1838 of the Harmonic Bar is claimed for him (Dr. Oscar Paul, *Geschichte des Claviers*, Leipzig, 1868). [See PIANOFORTE.]

PIERRE ERARD (born 1796) died at the Château de la Muette, Passy, near Paris, August 18, 1855. His widow, Mme. Erard, succeeded him in the business. From her it descended to the Count de Franqueville who had married her niece and is now the chief proprietor of the Paris house, his partner M. Blondel being in direction of affairs. Mr. Daniel Mayer is now the sole proprietor and director of the London house. The London manufactory was discontinued in 1890. A. J. H.

ERBA, DON DIONIGI, a much-esteemed composer of Milan at the end of the 17th century. Like Marcello and Astorga he was of noble birth, and Cardinal Benedetto Erba seems to have been his younger brother. [In 1692 he was maestro di cappella of the church of S. Francesco in Milan. See F. Vigoni's *Sacre Armonie* 1692, which contains music by him.] The title of Don given him by Quadrio, and that of 'R^{d}' mentioned below, show that he was in holy orders. In 1694 he took part with Valtellina in the composition of the opera of 'Arion,' and in 1695 with Besozzi and Battestini in that of 'Antemio.' But Erba's interest to us lies in the fact that he is not improbably the composer of a Magnificat for two choirs, from which Handel borrowed more or less closely for several pieces in the second part of 'Israel in Egypt.' A complete copy of this work, entitled 'Magnificat. Del R^{d} Sgr. Erba,' is in the library of the Royal College of Music, and a partial one (ending in the middle of a sheet), in Handel's writing, without title or date, in Buckingham Palace. Opinions are divided as to whether it is an original composition of Handel's Italian time (1707-10), or of Erba. In favour of the former were Victor Schoelcher and G. A. Macfarren (Preface to 'Israel in Egypt' for the Sacred

Harmonic Society). It is obvious that but for the existence of the MS. by Handel the question would never have been raised. The whole evidence was examined at great length and pains by Dr. Chrysander (*Händel*, i. 168-178), whose conclusion is strongly in favour of its being Erba's. He shows that the date of Handel's MS. is probably 1735-40 ('Israel' was 1738); that it has marks of being a copy and not an original composition; that the paper is not Italian, but the same as that used for his English works; and that the style of the music differs materially from Handel's style whether early or late. In addition it might be urged that it is extremely improbable that in a copy of a work of Handel's his powerful name would be displaced on the title in favour of the insignificant one of Erba. Chrysander published the 'Magnificat' as the first of the 'Supplemente' to his edition of Handel. For list of the numbers borrowed in 'Israel,' see ISRAEL IN EGYPT. G.

ERBACH, CHRISTIAN, born in 1573 at Algesheim in the Palatinate. About 1600 he became organist to the Fuggers at Augsburg, succeeded Hassler as town organist of Augsburg in 1602, and in 1628 (according to Gerber) was appointed 'Rathsherr' of the same city. The first book of his 'Modi sacri seu cantus musici vocibus 4, 5, 6, 7, 8 et pluribus, ad omne genus instrumenti musici accomodatis' was published in 1600 at Augsburg, the second in 1604, and the third in 1606. Bodenschatz's 'Florilegium Portense' and Schad's 'Promptuarium musices' (Strasburg) contain motets of his in 4, 6, and 8 parts. MS. compositions of his are in the cathedral library at Augsburg and in the Royal Library at Berlin. [See the *Quellen-Lexikon*, from which several additions in the above have been taken.] F. G.

ERK, LUDWIG CHRISTIAN, born Jan. 6, 1807, at Wetzlar, where his father (Adam Wilhelm Erk, 1779-1820) was cathedral organist; rendered very important services to German popular music. He studied music under his father and André of Offenbach, receiving his general education from Spiess, a well-known teacher at Frankfort. Here he remained for some years enjoying the society of the best Darmstadt musicians. In 1826 he was appointed professor at the teachers' seminary at Moers on the Lower Rhine, and it was here that his connection with popular music began. He started musical festivals at Remscheidt, Ruhrort, Duisburg, and other small towns, which largely contributed to the taste for sacred and secular part-music. In 1836 he was appointed musical professor of the royal seminary at Berlin, and in the following year conductor of the newly-formed cathedral choir, which post, for want of proper support, he relinquished in 1838. In 1843 he founded a Männergesangverein, which still exists in Berlin, for the express purpose of singing Volkslieder, and in 1852 started the 'Erksche Gesangverein' for mixed choir. Among the most important of the many collections of German lieder which he has edited is his 'Deutscher Liederhort,' of which vol. i. contains modern 'Volkslieder,' and vol. ii. those of the 13th-18th centuries. Jacob Grimm says of vol. i., 'Of all collections of our German Volkslieder this is the fullest and most trustworthy.' In 1857 Erk was appointed director of music. In the beginning of 1877 he resigned his post in the seminary at Berlin, and was succeeded by Dienel. He died in Berlin, Nov. 25, 1883. F. G.

ERKEL, FRANZ, born Nov. 7, 1810, at Békés (Gyula), displayed an aptitude for music at an early age, and was encouraged in his studies by his father and his uncle, both of whom were enthusiastic amateur musicians. He was not at first intended for the musical profession, but, having succeeded, by the indefatigable energy with which he trained himself as a pianist, in attracting the attention of Count Koloman Czáky, he was sent by the latter to Kolozsvar with a letter of introduction which enabled him in due course to become the centre of the musical life of the town, where his pianoforte recitals aroused considerable interest. In the early thirties he was appointed deputy conductor at the German Theatre in Buda-Pest, and in 1838 he became conductor of the National Theatre. From this point his career was attended with unbroken success, which was due at least as much to his opportune introduction of the Hungarian national element into opera, as to his musicianship. The forties found the political conditions of Hungary such, that any artistic embodiment of patriotic ideals was almost bound to ride on the wave of popular feeling; thus it is that the operas of Erkel which, whilst containing much excellent music, were not intrinsically superior to many which have since been forgotten, attracted an amount of attention that would perhaps strike the modern critic as disproportionate. His first opera 'Bathori Maria' was produced August 8, 1840, with instantaneous success. Its popularity was eclipsed by that of the opera 'Hunyady László,' which remains to this day the most frequently performed work of the national repertory. Its jubilee in 1894 was made the occasion of brilliant musical festivities. The year after its production there was a competition for a hymn to become the National Anthem of the Hungarians, in which Erkel obtained the prize. Then followed a period during which the musical life of Hungary was crippled by political disturbances which lasted several years, but in the early sixties we find Erkel at the zenith of his activity. In 1861 he produced an opera, 'Bank-Ban,' which, although surpassed in power and earnestness by some of its successors, is generally held to represent melodically the ideal of Hungarian music. These later operas, such as 'Dozsa György' (1866), 'Brankovics' (1874), 'Istvan Kiraly' (King Stephen), although sufficiently

successful to be retained in the repertoire, did not arouse such unbounded enthusiasm as the earlier works. Possibly their greater maturity was an element detrimental to popular success. 'Brankovics' is remarkable for the introduction of Servian and Turkish melodies happily blended with the Hungarian. From 1868 to his death, which took place June 15, 1893, at Buda-Pest, Erkel occupied the position of head of all the choral societies of his native country and was held in the highest respect. He retired from active work in 1889 and was only seen afterwards at one or two festivals organised in his honour. Besides his operas he left a large number of songs, the majority of which are too intensely national to be of interest to musicians of other countries. E. E.

ERLANGER, CAMILLE, French composer, born in Paris, May 25, 1863; entered the Conservatoire at the age of seventeen, studying piano and composition under G. Mathias, E. Durand, Taudou, Bazille, and L. Delibes; won the Grand Prix de Rome in 1888 with the cantata 'Velléda.' His first great success was with a dramatic legend in three parts, 'Saint-Julien l'Hospitalier,' a powerful work after Flaubert's story, performed at the Conservatoire in 1894, and at the Concerts de l'Opéra in 1895; an Idyl in three episodes, 'Kermaria,' was produced at the Opéra Comique, Feb. 8, 1897, and his most important work hitherto, 'Le Juif Polonais,' on the popular Alsatian story, in three acts, at the Opéra Comique, April 11, 1900. A 'Sérénade carnavalesque' for orchestra, six 'Poèmes russes' besides other songs and some piano pieces, may also be mentioned; another opera, 'Le Fils de l'Étoile,' was produced at the Grand Opéra, April 20, 1904; and others intended to succeed it are named respectively, 'Barkokéba,' 'Aphrodité,' and 'La Glu.' G. F.

ERLANGER, FRÉDÉRIC D', composer, born in Paris, May 29, 1868, of a German father and an American mother; he began his musical studies in Paris under Anselm Ehmant, his only teacher. His first work, a book of songs, was published by Hamelle during the composer's twentieth year, and shortly afterwards he took up his abode in London, becoming a naturalised Englishman. His compositions include works of all kinds, notably three operas, 'Jehan de Saintré' (Aix-les-Bains, and Hamburg, 1894), 'Inez Mendo' (produced, under the pseudonym of Ferd. Regnal, at Covent Garden, July 10, 1897, and subsequently in Germany), and 'Tess of the d'Urbervilles' (after Thomas Hardy), not yet represented. Among his other works are a string quartet, a sonata for violin and piano, an 'Andante symphonique' for violoncello and orchestra, a quintet for piano and strings (Popular Concerts, 1902), a 'Suite symphonique' for orchestra (Promenade Concerts, Sept. 1895), and a violin concerto, op. 17, played by Herr Kreisler at the Philharmonic Concert of March 12, 1903. Clearness of form and genuine elegance of idea and expression, are the distinguishing marks of d'Erlanger's music, whether in his operatic work, in his chamber and orchestral music, or in his songs, of which many are very popular, especially in England. G. F.

ERNANI. Italian opera in four acts, by Verdi, founded on the Hernani of Victor Hugo; produced at Venice in March 1844. On its production at the Théâtre-Italien, Paris—Jan. 6, 1846—the libretto was altered in obedience to the wish of Victor Hugo. The personages were changed from Spaniards to Italians, and the name of the piece was altered to 'Il Proscritto.' In England 'Ernani' was first played at Her Majesty's Theatre, March 8, 1845.

ERNST, ALFRED, French writer on music, born at Périgueux, April 9, 1860, died in Paris, May 15, 1898, was one of the foremost champions of Wagner in French literature. The following are his most important works:—*L'Œuvre dramatique d'Hector Berlioz* (1884); *Richard Wagner et le drame contemporain* (1887); *L'Art de Wagner*, part i. *L'Œuvre poétique* (1893), part ii. *L'Œuvre musicale* (unfinished); *Étude sur Tannhäuser de Wagner* (1895, in collaboration with E. Poirée); and lastly, the translations into rhythmic French prose of the words of 'Die Meistersinger' and 'Der Ring des Nibelungen.' Ernst wrote also many articles in various reviews, and undertook the musical reporting in the *Revue Encyclopédique*, etc. G. F.

ERNST, HEINRICH WILHELM, celebrated violin player, was born at Brünn in Moravia, May 6, 1814. As a pupil of the Vienna Conservatorium he had Böhm for his master on the violin, and studied counterpoint and composition under Seyfried. He afterwards received instruction from Mayseder, and soon achieved great proficiency on his instrument. When sixteen he made his first tour and played with much success at Munich, Stuttgart, and Frankfort. At that time Paganini was travelling in Germany, and Ernst, greatly fascinated by this extraordinary artist, followed him from town to town in order to become familiar with the peculiarities of his style and *technique*. Towards the end of 1832 he went to Paris, and lived there for six years, studying and repeatedly playing in public. Between 1838 and 1844 he travelled over a great part of Europe, meeting everywhere with enormous success. On his appearing in Leipzig Schumann greeted him with one of those genial criticisms which are so characteristic of him (*Gesammelte Schriften*, Jan. 14, 1840). [He first appeared in London, on July 18, 1843, in the Hanover Square Rooms;] on April 15, 1844, he played for the first time at the Philharmonic, after which he regularly came to London for the season and soon settled there entirely. After some years, however, his health began to fail, and he had to give up playing in public. He died at Nice, Oct. 8, 1865, after a painful and

protracted illness. Ernst's playing was distinguished by great boldness in the execution of technical difficulties of the most hazardous character. At the same time his cantabile was full of deep feeling, and his tone had a peculiar charm. The warm impulsive nature of the man was reflected in his fiery passionate style. But it must not be supposed that he was a mere virtuoso. Ernst was a thorough musician, and although critics have found fault with his reading of classical music, on the other hand very competent judges have pronounced him an excellent quartet player.

As a composer he started with salon-pieces and brilliant fantasias, which have not much intrinsic merit, but are extremely effective and well written for the instrument, and mostly very difficult. The 'Élégie,' which had a long run of popularity, is perhaps the best specimen of the first, the fantasias on airs from Rossini's 'Otello,' and on Hungarian airs, of the second kind. The Concerto in F sharp minor (op. 23) deserves special notice. It is a composition of no mean order, equally distinguished by the nobility of its ideas and its skilful treatment of the orchestra. That it is seldom heard is due to its enormous technical difficulties, which even Ernst himself did not always succeed in mastering. This work may well justify the assumption that Ernst, had he lived, might have made some valuable additions to the literature of the violin. The best-known among his compositions for the violin are: Deux nocturnes, op. 1; Élégie, op. 10; Fantasia on airs from Rossini's 'Otello,' op. 11; Concertino in D, op. 12; Polonaise de Concert, op. 17; Variations on Dutch airs, op. 18; Introduction, caprice, and finale, on airs from 'Il Pirata,' op. 19; Rondo Papageno, op. 30; Fantasia on 'Le Prophète,' op. 24; Hungarian airs, op. 22; Concerto pathétique in F♯ minor, op. 23. In conjunction with S. Heller he wrote a number of very pretty duets for piano and violin, which were published under the title of 'Pensées fugitives.' He also published an imitation of Paganini's once famous 'Carnaval de Venise.' He wrote two string quartets, in B♭ and A. The latter of these was his last work, and was played under Joachim's lead at the Monday Popular Concerts, June 6, 1864. P. D.

EROICA. The SINFONIA EROICA is the third of Beethoven's Symphonies. The title is his own—'Sinfonia eroica composta per festeggiare il sovvenire di un grand' uomo dedicata a Sua Altezza Serenissima il Principe di Lobkowitz da Luigi van Beethoven. Op. 55. No. III. Partizione. Bonna e Colonia presso N. Simrock.' (Note the Italian: the titles of Symphonies 1 and 2 are in French.) But its original title was simply 'Bonaparte. Louis van Beethoven.' The subject was suggested to him—perhaps as early as 1798, two years before the known completion of the first Symphony—by Bernadotte, the French ambassador at Vienna; but there is no trace of his having set seriously to work at it till the summer of 1803. On his return to town in the autumn of that year he played the Finale to Mähler and Breuning (Thayer, ii. 236). For the story of the intended dedication to Napoleon see *ante*, p. 240*a*.

The work was finished in 1804, and is in four movements:—(1) Allegro con brio, E♭. (2) Marcia funebre. Adagio assai, C minor. (3) Scherzo and Trio. Allegro vivace, E♭. (4) Finale. Allegro molto; interrupted by a Poco Andante, and ending in a Presto, E♭.

Under BASTIEN the curious coincidence between the subject of the first movement and that of an early overture of Mozart's has been pointed out.

The subject of the Scherzo is said by Marx (*L. v. B. Leben u. Schaffen*, i. 273) to be a Volkslied, beginning as follows:—

But this requires confirmation. There is reason to believe that Beethoven used the Austrian Volkslieder as themes oftener than is ordinarily suspected; but this one at least has not yet been identified with certainty.

The Finale is a set of variations, the theme of which, whether a Volkslied or not, was a singular favourite with Beethoven. He has used it four times, in the following order:—(1) in the finale of 'Prometheus' (1800); (2) in a Contretanz (1802); (3) as theme of a set of variations and a fugue, for Piano solo (op. 35, 1802); and (4) in the Symphony. The intention of this Finale has been often challenged, and will probably never be definitely ascertained; but the Poco andante, which interrupts the Allegro molto, and to which all the latter might well be a mere introduction, is at once solemn enough and celestial enough to stand for the apotheosis of a hero even as great as the one portrayed in the first movement.

The Symphony was purchased by Prince Lobkowitz. There is an interesting story of its having been played three times in one evening by the Prince's band, to satisfy the enthusiasm of Prince Louis Ferdinand of Prussia, passing through Vienna in strict incognito; but the first known performance (semi-private) was in Dec. 1804, when it was preceded by the previous two symphonies and the Pianoforte Concerto in C minor. The first public performance was at the Theatre 'an der Wien' on Sunday evening, April 7, 1805, at a concert of Clement's, where it was announced as in D♯, and was conducted by Beethoven. Czerny remembered that at this performance some one in the gallery called out 'I'd give a kreutzer if it were over.' [The first performance in England was (probably) at one of the Vocal Concerts, at Hanover Square Rooms, on Feb. 14, 1806.] It was played by the Phil-

harmonic Society at the second concert of the second year—Feb. 28, 1814—and was announced as 'containing the Funeral March.' In France it was the opening work of the first concert of the Société des Concerts (Conservatoire), March 9, 1828. It was published by Simrock of Bonn, the publisher of the first four symphonies, Oct. 29, 1806.

The unusual length of the Eroica is admitted by Beethoven himself in a memorandum prefixed to the original edition, in which he requests that it may be placed nearer the beginning than the end of the Programme—say after an Overture, an Air, and a Concerto—so that it may produce its proper and intended effect on the audience before they become wearied. He has also given a notice as to the third horn part, a very unusual condescension on his part. G.

ESCUDIER, Marie, born June 29, 1819, died April 17, 1880, and Léon, born Sept. 17, 1821, died June 22, 1881, both born at Castelnaudary (Aude), two brothers famous as *littérateurs* on music. They were the founders of *La France musicale* (1838), a weekly musical periodical, and joint authors of *Études biographiques sur les chanteurs contemporains* (Paris, Tessier, 1840); *Rossini, sa vie et ses œuvres* (Paris, 1854); and *Vie . . . . des cantatrices célèbres*, etc. (Paris, 1856), which contains a life of Paganini. They set up a music-publishing business, and brought out many of Verdi's works. Their *Dictionnaire de musique* (two vols. 1844, 5th ed. 1872) is a compact but very unequal work, many articles in which are admirable, while others can be of no interest to any one. [In 1862 the brothers dissolved partnership, Léon continuing in the business and starting a new paper, *L'Art musical*, while Marie directed *La France musicale* until 1870. In 1876 Léon was for a short time director of the Théâtre Italien.] M. C. C.

ESLAVA, Miguel Hilarion, distinguished Spanish musician, born Oct. 21, 1807, at Burlada in Navarre. In 1824 he was appointed violinist in the cathedral at Pampeluna, and in 1828 maestro de capilla of that at Ossuña. Here he was ordained deacon, and took priest's orders when chapel-master at the metropolitan church of Seville (1832). In 1841 he produced at Cadiz his first opera, 'Il Solitario,' speedily followed by 'La Tregua di Ptolemaide' and 'Pedro el Cruél,' which were successfully performed in several Spanish towns. In 1844 he was appointed maestro de capilla to Queen Isabella. He composed over 140 pieces of church music, including masses, motets, psalms, etc. The work by which he will live is his 'Lira sacro-hispaña' (Madrid, Salazar, 1869, ten vols.), a collection of Spanish church music of the 16th-19th centuries, with biographical sketches of the composers. Some of his organ music appears in another collection, his 'Museo organico español' (Madrid). His 'Metodo de Solfeo' (1846) has been adopted throughout Spain. His 'Escuela de armonia y composicion,' in three parts, harmony, composition, and melody, the fruits of many years' labour, appeared at Madrid in 1861 (2nd ed.). In 1855-56 he edited the *Gaceta musical de Madrid*, a periodical of considerable interest. Eslava died in Madrid, July 23, 1878.

The following are the contents of the 'Lira sacro-hispaña' [1] :—

16*th Century*, i. 1.

Ramos. Ave Regina. a 4 voces.
Anon. Magnificat. 4.
Do. Domine Jesu. 4.
Fevin, A. Sanctus. 4.
Do. Benedictus. 3
Do. Agnus. 4.
Do. Do. 5.
Do. Ascendens Christus. 8.
Peñalosa, F. Sancta Mater. 4.
Do. Tribularer si nescirem. 4.
Do. In passione positus. 4.
Do. Memorare, piissima. 4.
Do. Versa est in luctum. 4.
Do. Precor te, Domine. 4.
Ribera, B. Magnificat. 4.
Do. Virgo prudentissima. 5.
Do. Rex autem David. 5.
Torrentes, A. de. Magnificat. 4.
Ceballos, F. Hortus conclusus. 4.
Do. Inter vestibulum. 4.
Do. Exaudiat Dominus. 4.
Morales, Cr. Emendemus. 5.
Do. O vos omnes. 4.
Do. Verbum iniquum. 5
Do. O crux ave. 5.
Do. Lamentabatur Jacob. 5.
Do. Kyrie; Christe; Gloria. 4.
Escobedo, B. Immutemur. 4.
Do. Exurge. 4.
Do. Erravi sicut ovis. 5.
Fernandez, P. Dispersit, dedit. 4.
Do. Heu mihi Domine. 4.
Bernal, A. Ave sanctissimum. 4.
Robledo, M. Domine Jesu. 4.
Do. Regem cui omnia. 4.
Do. Magna opera. 4 & 5.
Do. Sumens illud ave. 4.

18*th Century*, i. 2.

Victoria, J. L. de. Mass, 'Ave maris stella.' 4, solo.
Do. Vere languores.
Do. O Domine.
Do. Jesu dulcis memoria.
Do. O quam gloriosum.
Do. Laudate.
Do. Requiem mass, 'el canto llano.'
Guerrero, F. Passio sec. Matthæum. 2, 4, 5, 6.
Do. Do. sec. Joannem. 4 & 5.
Do. Ave Virgo. 5.
Do. Trahe me post. 6.
Do. Mass, 'Simile est regnum.' 4.
Navarro, J. M. Lauda Jerusalem. 4.
Do. In exitu Israel. 4.
Do. Magnificat 1mi toni. 4.
Do. Do. 2di toni. 4.
Do. Do. 8vi toni. 4.
Castillo, D. del. Quis enim cognovit. 5.
Do. O altitudo. 5.
Las Infantas, F. de. Victimæ Paschali. 6.
Camargo, M. G. Defensor almæ Hispanæ. 4.
Ortiz, D. Pereat dies. 5.
Periañez, P. Maria virgo. 5.

17*th Century*, i. 1.

Comes, J. B. Hodie nobis. 12.
Lobo, A. Versa est. 6.
Do. Credo quod Redemptor. 4.
Do. Vivo ego. 4.
Do. Ave Maria. 8.
Heredia, A. de. Magnificat (super tonos). 4.
Tafalla, P. Qui Lazarum. 5 & 8.
Romero, M. Libera me. 8.
Veana, M. Villancico Asturiano. 8.
Vivanco, S. O Domine. 5.
Vargas, U. de. Magnificat. 8
Baban, G. Voce mea. 8.
Juarez, A. Vulnerasti cor meum. 8.
Do. Dum sacrum pignus. 9.
Caseda, D. Mass. 8.

17*th Century*, ii. 1.

Pontac, D. Mass, 'In exitu Israel.' 4.
Patino, C. Mass, 'In devotione.' 8.
Salazar, G. Hei mihi. 4 (soli).
Do. O Rex gloriæ. 8, col organo.
Do. Quæ est ista. 8 Do.
Do. Vidi speciosam. 6 Do.
Do. Sancta Maria. 5 Do.
Do. Nativitas tua. 6 Do.
Do. Mater Dei. 5 Do.
Ortells. Lamentatio. 12.
Montemayor, F. de. Requiem mass. 8.
Duron, S. O vos omnes. 4.

18*th Century*, i. 1.

Bravo, J. de T. M. Portions of a Misa de defuntos. 8.
Do. J. de T. M. Parce mihi. 8.
Do. Taedet animam meam. 8.
Dudoso. Don, don, don, don. 5.
Rabassa, P. Audite, universi. 12.
Valls, F. Tota pulchra. 4.
Cabrera, F. V. Kyrie and Gloria. 8.
Roldan, J. P. Sepulto Domine. 4.
Sanjuan, N. Spiritus meus. 8.
Paez, J. Jesu Redemptor. 4.
Muelas, D. O vos omnes. 8.
Do. Ductus est Jesus. 4
Do. Dicebat Jesus. 4.
Do. Erunt signa. 4.
Do. Cum audisset Joannes. 4
Do. Vox clamantis. 3.
Caseda, J. de. Kyrie and Gloria. 4.
Literes, A. Vos sæculorum judices. 4.
Do. Hi sunt quos fatue. 4.
Juliá, B. Dilexi quoniam. 4.
Fuentes, P. Beatus vir. 10.
Soler, F. A. Introito and offertoria de defuntos. 8.
Anon. Ecce sacerdos. 6.

18*th Century*, ii. 1.

Nebra, J. de. Requiem mass. 8 (strings and flutes).
Ripa, A. Mass. 8. (strings, trumpets, and organ).
Do. Stabat Mater (6 verses). 8 (organ).
Lidon, J. Ave maris stella. 4 and 8.

19*th Century*, i. 1.

Garcia, F. J. Lamentation. 8 (orch.).
Do. Do. 7 (orch.).
Aranaz, P. Ad te levavi. 4 (solos).
Do. Laudate. 6 (viol. and trumpets).
Doyagüe, M. Miserere. 4 (wind).
Secanilla, F. Defensor almæ Hispanæ. 5 (strings, trumpets, and organ).
Do. Pange lingua. 7.
Prieto, J. Salve regina. 4 (strings, trumpets, and organ).
Cuellar, R. Lauda Sion. 5 (strings, oboes, and trumpets).
Montesinos, A. Sancta et immaculata Virginitas. 8.
Pons, J. Letrida, 'O Madre.' 8.
Cabo, F. J. Memento Domine. 7

19*th Century*, i. 2.

Ledesma, N. Stabat mater (12 verses) accd. by string quartet. 3.
Andrevi, Fr. Nunc dimittis. 4 (orch.).

[1] The numbering of the volumes is very puzzling; but the plan seems to be that each century is represented by two 'serias,' and each 'seria' is divided into two volumes or 'tomos.' The number of the 'seria' is indicated above in Roman figures, that of the 'tomo' in Arabic numerals.

Andrevi. Salve Regina. 8 (orch.)
Ledesma, M. R. Principes persecuti. 4 (orch.).
Bros, J. Benedictus. 4 (orch.).

19*th Century*, ii. 1.

Eslava, H. Te Deum. 4.
Do. O sacrum convivium. 4.
Do. Bone Pastor. 4.
Do. O salutaris hostia. 8.
Do. Requiem mass. 8 (orch.).
Do. Parce mihi. 8.
Do. Taedet animam. 6.
Do. Libera me. 8.

19*th Century*, ii. 2.

Perez y Alvarez, J. Salve Regina. 8.
Do. O Salutaris. 4 (bar. solo and orch.).
Hugalde, C. J. Bone pastor. Bass solo and organ.
Hugalde. O salutaris. 3 (organ).
Meton, V. O quoniam suavis. 5.
Do. Ecce panis. 5.
Do. O salutaris. 5 (all with orch.).
Olleta, D. Salve Regina. 5 (organ and basses).
Garcia, M. Ave maris stella. 4 (strings, trumpets, and organ).
Prádanos, H. O quam suavis. 4 (strings).
Caballero, M. F. Ave maris stella. 4 (orch.).
Calahorra, R. O. Lauda Sion. 1.
Do. Vere languores. 4 (orch.).

APPENDIX.

Secanilla, F. Hymn, Scripta sunt. 8, 3, 8, 4, 8 (orch.).
Doyagüe, M. Magnificat. 8 (str., oboes, trump., and organ).
Duron, S. Fragmenta.

M. C. C.

ESMERALDA. Opera in four acts; words by Theo Marzials and Alberto Randegger, arranged from Victor Hugo's libretto 'La Esmeralda'; music by A. Goring Thomas. Produced by the Carl Rosa Company, Drury Lane, March 26, 1883, given in Berlin in September 1891; and revived at Covent Garden (in French), July 12, 1890. For an earlier setting of Victor Hugo's libretto, see BERTIN, LOUISE ANGÉLIQUE. M.

ESPOSITO, MICHELE, born at Castellammare, near Naples, Sept. 29, 1855. At the age of ten he entered the Conservatorio at Naples, where he remained for eight years, studying (as class-mate with G. Martucci) pianoforte playing under Cesi, and composition under Serrao. In 1878 he came to Paris, where he remained until 1882, when he was appointed professor of pianoforte playing at the Royal Irish Academy of Music, Dublin, which post he still holds. For several years he was principally occupied with teaching and concert playing, giving pianoforte recitals under the auspices of the Royal Dublin Society, and also organising and playing for many years in the chamber music recitals given by that Society. In 1899, aided by some friends, he succeeded in establishing in Dublin a resident orchestra (the Dublin Orchestral Society), the concerts of which he has, down to the present, conducted with much success.

His published works include 'Deirdre,' cantata for soli, chorus, and orchestra (Feis Ceoil prize), produced at Dublin, 1897, and subsequently given by Mr. Henry Wood at a Queen's Hall Concert; an operetta, 'The Postbag' (libretto by A. P. Graves), produced at St. George's Hall, London, Jan. 27, 1902, by the Irish Literary Society; a string quartet; a sonata for violoncello and piano (Incorporated Society of Musicians prize 1898); a sonata for Violin and Piano; and many songs and pianoforte pieces. He has also written an 'Irish' symphony (Feis Ceoil prize 1902), an 'Otello' overture, and other orchestral works which have not as yet been published. L. M'C. L. D.

ESSER, HEINRICH, born at Mannheim, July 15, 1818, appointed concert-meister 1838, and then musical director in the court theatre at Mannheim; was for some years conductor of the 'Liedertafel' at Mayence, and in 1847 succeeded O. Nicolai as capellmeister of the Imperial Opera, Vienna, where he was honoured as an artist and beloved as a man. In Nov. 1869, shortly after becoming art-member of the board of direction of the Opera, he was compelled by ill-health to resign, and retired on a considerable pension to Salzburg, where he died June 3, 1872. The Emperor honoured his memory by granting an annuity to his widow and two young children. Esser's character was elevated, refined, and singularly free from pretension, and his compositions bear the same stamp, especially his melodious and thoughtful four-part songs for men's voices. As a conductor he was admirable—conscientious, indefatigable, and in thorough sympathy with his orchestra, by whom he was adored. Wagner showed his appreciation by entrusting him with the arrangement of his 'Meistersinger' for the piano. Esser was the first to discern the merit of Hans Richter, whom, while a member of his band, he recommended to Wagner as a copyist and arranger, and who ultimately justified the choice by succeeding Esser at the Opera in May 1875 (the former sub-conductor, Dessoff, having filled the chief post between Esser's death and Richter's appointment).

As a composer Esser was industrious and successful. His works contain scarcely a commonplace thought, and much earnest feeling, well and naturally expressed. The stage was not his forte, and though three of his operas were produced—'Silas' (Mannheim, 1840), 'Riquiqui' (Aix-la-Chapelle, 1843), and 'Die beiden Prinzen' (Munich, 1845)—they have not kept the boards. His compositions for the voice are numerous and beautiful—some forty books of Lieder, two of duets, four of choruses for men's voices, and two for mixed ditto, etc.—and these are still great favourites. His symphonies (opp. 44, 79) and Suites (opp. 70, 75), and orchestral arrangements of Bach's organ works (Passacaglia, Toccata in F), performed by the Philharmonic Society in Vienna, are published by Schott, and a string-quartet (op. 5) by Simrock. C. F. P.

ESSIPOFF, ANNETTE, Russian pianist, born at St. Petersburg, Feb. 1, 1850, and educated at the Conservatorium of St. Petersburg, principally under the care of Theodor Leschetitzky. After attaining considerable reputation in her own country she undertook a concert tour in 1874, appearing in London at the New Philharmonic concert of May 16, in Chopin's E minor concerto, at recitals of her own, and elsewhere. She made her début in Paris in the same concerto in 1875 at one of the Concerts Populaires, and afterwards at a chamber concert given by Wieniawski and Davidov. In 1876 she went to America, where her success was very marked. From 1880 to 1892 she was the wife of Leschetitzky, and since 1888 has been seldom heard in England. Her playing combines

extraordinary skill and technical facility with poetic feeling, though the artistic ardour of her temperament leads her at times to interpretations that are liable to be called exaggerated. M.

ESTE, EAST, or EASTE (as he variously spelled his name), MICHAEL, Mus.B., is conjectured to have been a son of Thomas ESTE, the noted music printer. He first appeared in print as a composer, in 'The Triumphes of Oriana,' 1601, to which he contributed the madrigal, 'Hence, stars, too dim of light,' which was sent in too late, and therefore placed at the beginning of the book. In 1604 he published a set of Madrigals, which was followed in 1606 by a second set, the preface to which is dated 'From Ely House in Holborne,' whence it may be inferred that he was then a retainer of Lady Hatton, the widow of Sir Christopher Hatton. [In 1606 he took the degree of Mus.B. at Cambridge.] In 1610 he published a third set of Madrigals. Between that date and 1618, when he published a (fourth) set of Madrigals, Anthems, etc., and a set of three-part Songs, he had become Master of the Choristers of Lichfield Cathedral. In 1618 appeared his fifth publication, a set of three-part Songs; and in 1624 he published a set of Anthems, from the dedication of which to 'John Williams, Bishop of Lincoln and Keeper of the Great Seal,' we learn that that prelate some time before, on hearing one of Este's motets, had voluntarily settled an annuity on its composer, personally a stranger to him. Este's 'Seventh Set of Bookes,' and his last publication, was a set of Duos and Fancies for Viols, together with 'Ayerie Fancies of four parts, that may be sung as well as plaid,' which appeared in 1638, and was re-issued about 1653 by John Playford with a new undated title-page. One of the three-part madrigals in Este's second set, 'How merrily we live,' retained its popularity down to modern days. W. H. H.

ESTE, EST, or EAST (as the name was variously spelled), THOMAS, was (having regard to the number of works printed by him) one of the most important of our early music typographers and publishers. [Arber's *Stationers' Registers* show that he was made a freeman of the Company, Dec. 6, 1565, and that he issued a book of *Christmas Recreacons* in 1576.] He was probably born about the middle of the 16th century. The first music printed by him was Byrd's 'Psalmes, Sonets and Songs of sadnes and pietie,' which was entered at Stationers' Hall, Nov. 6, 1587, and issued without date, being brought out in a dated edition in 1588, he then 'dwelling by Paules Wharf,' and describing himself as 'the Assigne of W. Byrd'; *i.e.* assignee of the patent granted to the latter for the sole printing of music and ruled music paper. In the following year Este removed to Aldersgate Street, where he published at the sign of the Black Horse. In 1592 he edited 'The Whole Booke of Psalmes, with their wonted tunes, in four parts.' The composers employed by him to harmonise the tunes were ten of the most eminent men of the day, viz.: Richard Allison, E. Blancks, Michael Cavendish, William Cobbold, John Douland, John Farmer, Giles Farnaby, Edmund Hooper, Edward Johnson and George Kirbye. Two other editions of the work appeared in 1594 and 1604. This collection was the first in which some of the tunes were called by distinctive names—'Glassenburie,' 'Kentish,' and 'Cheshire,' and was also one of the first to appear in what is now called 'score,' instead of in separate part-books. In 1600 he described himself as 'The Assigne of Thomas Morley,' and in 1609 as 'The Assigne of William Barley,' having acquired the interest in the patent granted to Morley in 1598 and by him assigned, or perhaps only licensed, to Barley. Este died before Jan. 17, 1609, when his successor, Thomas Snodham, obtained what would be now called his 'copyrights.' His widow, Lucretia Este, died in 1631, having bequeathed £20, to purchase a piece of plate to be presented to the Stationers' Company. The most important works printed and published by Este were—

1588, Byrd's Psalmes, Sonets, and Songs; Yonge's *Musica Transalpina*; 1589, Byrd's Songs of Sundrie Natures, and Cantiones Sacræ, bk. i.; 1590, Watson's Madrigals; 1591, Daman's Psalter (2nd ed.) and Byrd's Cantiones Sacræ, bk. ii.; 1592, *The Whole Booke of Psalmes*; 1593, Morley's Canzonets; 1594, Morley's Madrigals, and Mundy's Songes and Psalmes; 1595, Morley's Ballets and two-part Canzonets; 1596, Kirbye's Madrigals; 1597, N. Patrick's Songs of Sundry Natures, and *Musica Transalpina*, 2nd ed.; 1598, Wilbye's 1st set of Madrigals, Weelke's 1st set, Morley's Madrigals, and Canzonets from Italian authors; also a selection from O. di Lasso; 1600, Dowland's 2nd book of Ayres; 1601, Jones's 1st book of Ayres, and the Triumphs of Oriana (printed, but not published till 1603); 1603, Bateson's 1st book of Madrigals; Weelkes's 2nd book, Byrd and Ferrabosco's *Medulla Musicke*; and Robinson's *Schoole of Musicke*; 1604, Michael Este's 1st set of Madrigals, Francis Pilkington's 1st book of Songs or Ayres; 1605, Byrd's *Gradualia*; 1606, Danyel's Songs; 1607, Youll's Canzonets, and Croce's *Musica Sacra*.

The Whole Book of Psalms was published in score by the Musical Antiquarian Society in 1844, edited, with a Preface, by Dr. Rimbault. [Additions from *Dict. of Nat. Biog.*] W. H. H.

ESTE, in N.-E. Italy, between Padua and Rovigo. Two musical academies—'Degli Eccitati' and 'Degli Atestini'—were established in Este in 1575. The family of the Este, always liberal patrons of the fine arts, encouraged especially the revival of music. Francesco Patrizzi, a professor in the latter of these two academies (born 1530—died 1590), in dedicating one of his works to Lucrezia d'Este, daughter of Ercole II., the reigning Duke, ascribes the revival of music in Italy to the House of Este, because Guido d'Arezzo was a native of Pomposa in their dominions, and because such famous musicians as Fogliano, Giusquino (Josquin), Adriano, and Cipriano, first found favour and support from the Dukes of Este. C. M. P.

ESTHER. Handel's first English oratorio; words by S. Humphreys, founded on Racine's 'Esther.' Written for the Duke of Chandos, who paid Handel £1000 for it, and first performed at Cannons, August 29, 1720. Performed again, in action, under Bernard Gates—in private Feb. 23, 1732, and in public at the King's Theatre,

Haymarket, May 2, 1832, with 'additions' not specified. It was occasionally performed up to 1757 (when 'My heart is inditing' and 'Zadok the Priest' were interpolated into the performance), and then lay on the shelf till Nov. 6, 1875, when it was revived at the Alexandra Palace. The overture was for long played annually at the 'Festival of the Sons of the Clergy' at St. Paul's.

ESTWICK, Rev. Sampson, B.D., born 1657, was one of the children of the Chapel Royal under Captain Henry Cooke. Upon quitting the chapel on the breaking of his voice he went to Oxford, took holy orders and became one of the chaplains of Christ Church. [He took the degree of B.A. in 1677, M.A. in 1680, and B.D. in 1692.] In 1692 he was appointed sixth minor prebend of St. Paul's. On Nov. 27, 1696, he preached at Christ Church, Oxford, 'upon occasion of the Anniversary Meeting of the Lovers of Musick on St. Cæcilia's day,' a sermon upon 'The Usefulness of Church Musick,' which was printed in the following year. In 1701 he was appointed vicar of St. Helen's, Bishopsgate, which he resigned in 1712 for the rectory of St. Michael, Queenhithe. Estwick composed several odes for performance at the Acts at Oxford, and other pieces still in MS. He died Feb. 16, 1738-39. W. H. H.

ÉTOILE DU NORD, L'. Opera in three acts, principal characters Peter the Great and Catherine; words by Scribe, music by Meyerbeer, comprising many numbers from his 'Feldlager in Schlesien.' Produced at the Opéra Comique, Feb. 16, 1854; and in England, as 'La Stella del Nord,' at Covent Garden, July 19, 1855. For other operas on the story of Peter the Great, see Czaar und Zimmermann.

ÉTUDES, studies, exercises, caprices, lessons. The large number of works extant under these heads for pianoforte, violin, violoncello, and in sundry instances for other orchestral instruments, are in a large measure mere supplements to the respective instruction-books. They may be divided into two kinds—pieces contrived with a view to aid the student in mastering special mechanical difficulties pertaining to the technical treatment of his instrument, like the excellent pianoforte Études of Clementi and Cramer; and pieces wherein, over and above such an executive purpose, which is never lost sight of, some characteristic musical sentiment, poetical scene, or dramatic situation susceptible of musical interpretation or comment is depicted, as in certain of Moscheles's 'Characteristische Studien,' or the Études of Chopin, Liszt, or Alkan.

The distinction between these two classes of études closely resembles the difference recognised by painters between a tentative sketch for a figure, a group, or a landscape, which aims at rendering some poetical idea whilst attending particularly to the mechanical difficulties accruing from the task in hand, and a mere drawing after casts or from life with a view to practice and the attainment of manipulative facility.

An *étude* proper, be it only a mechanical exercise or a characteristic piece, is distinguished from all other musical forms by the fact that it is invariably evolved from a single phrase or *motif*, be it of a harmonic or melodious character, upon which the changes are rung. Thus many of Bach's Preludes in the *Wohltemperirtes Clavier*, and the like, could be called études without a misnomer.

The most valuable études for the pianoforte are the following:—

I. Classical School.

BACH.
Inventions—in two and three parts.

CLEMENTI.
Gradus ad Parnassum. Préludes et exercices dans tous les tons. Toccata in B♭.

CRAMER.
100 Études.

MOSCHELES.
24 Studien, op. 70. Characteristische Studien, op. 95.

II. Modern School.

CHOPIN.
12 grandes Études. Op. 10.
12 Études. Op. 25.
Trois Études.
24 Preludes.
Prelude in C♯ minor.

SCHUMANN.
Études symphoniques, or Études en forme de variations. Op. 13.

HENSELT.
12 Études de concert. Op. 2.
12 Études de salon. Op. 5.

THALBERG.
12 Études.

LISZT.
Grandes Études de Paganini, transcrites, etc.
Études d'éxecution transcendante.
Ab-Irato, Étude de perfectionnement.
Trois grandes Études de concert.
Zwei Études—Waldesrauschen; Gnomentanz.

C. V. ALKAN.
12 Études.
12 Grandes Études.
Étude pour la main gauche.
" " " " droite.
" " les deux mains.

RUBINSTEIN.
6 Etudes
Zwei Etuden.

SGAMBATI.
Two Études de Concert. Op. 10.

BRAHMS.
51 Uebungen

Besides these there exists an enormous number of études with comparatively little educational and less artistic value, which are for the most part written to the order of publishers, from whose shops they find their way to the schoolrooms and salons of amateurs; such are those by Czerny, Steibelt, Hummel, Kessler, Bertini, Mayer, Döhler, Schulhof, Ravina, etc. E. D.

Of Études for the Violin, the following four works are considered as indispensable for the formation of a good technique and correct style, by the masters of all schools of violin-playing:—

R. Kreutzer, 40 Études or Caprices;

Fiorillo, Étude de Violon, formant 36 caprices;

P. Rode, Vingt-quatre Caprices;

N. Paganini, 24 Caprices, op. 1;

to which may be added Gaviniés' 'Vingt-quatre matinées.'

Of more modern études, those of Dont, Ferd. David, Alard, and Wieniawsky, are amongst the most valuable. The violin-schools of Spohr, Ries, and others, also contain a great many useful études. Some movements from Bach's Solo Sonatas, such as the well-known Prelude in E major, fall under the same category. P. D.

EUGEN ONIEGIN. Opera in three acts, libretto adapted from Poushkin, music by Tchaikovsky. Composed during 1877 and 1878,

and performed by students of the Moscow Conservatorium, March 1879. Produced (in English) at the Olympic Theatre, Oct. 17, 1892.

EULENSTEIN, CHARLES, was born in 1802 at Heilbronn, in Würtemberg. His father was a respectable tradesman; but nothing could deter the son from following his strong predilection for music. After enduring all sorts of privations and ill-success, he appeared in London in 1827, and produced extremely beautiful effects by performing on sixteen Jew's-harps, having for many years cultivated this instrument in an extraordinary manner. [JEW'S HARP.] The patronage of the Duke of Gordon induced him to return in 1828; but he soon found that the iron Jew's-harp had so injured his teeth that he could not play without pain, and he therefore applied himself more and more to the guitar. At length a dentist contrived a glutinous covering for the teeth, which enabled him to play his Jew's-harp again. He was very successful in Scotland, and thence went to Bath, to establish himself as teacher of the guitar, concertina, and the German language. After remaining there a considerable time he returned to Germany, and lived at Günzburg, near Ulm. He died in Styria in 1890. V. DE P.

EUNUCH FLUTE (*Flûte-eunuque*). An instrument described and figured by Mersenne (*Harmonie Universelle*, Liv. v. Prop. iv.). It consisted of a tube (A C) open at one end where it terminated in a bell mouth (C), but closed at the other (A) by a piece of membrane stretched like the head of a drum, and covered for protection with a movable cap (A B) pierced with holes. In the side of the tube not far from the membrane, which was to be as thin as the skin of an onion, was a hole (B) into which the player emitted his voice. The membrane, thrown into vibration by the sound of the voice, gave out notes of its own, the same in pitch as those of the voice, but louder, and different in *timbre*, they being of an ægophonous or bleating character. Mersenne states that music in four or five parts was performed on such instruments, the eunuch-flute having 'this advantage over all other flutes that it imitates better the concert of voices, for it lacks only the pronunciation to which a near approach is made in these flutes.' He adds that 'the little drum imparts a new charm to the voice by its tiny vibrations which reflect it,' and expresses the opinion that a concert of eunuch-flutes is better than one of voices 'which lack the softness of the harmony and the charm of the pieces of membrane.' The idea on which the eunuch-flute is based seems to have struck Lord Bacon, for he wrote (*Sylva Sylvarum*, Cent. III. 233), 'if you sing into the hole of a drum, it maketh the singing more sweet. And so I conceive it would, if it were a song in parts sung into several drums; and for handsomeness and strangeness sake, it would not be amiss to have a curtain between the place where the drums are and the hearers.'

One of these instruments is preserved in the Museum of the Conservatoire of Paris. It is 88 centimetres in length, and is believed to date from the time of Henry III. of France. Eunuch flutes are still manufactured, but only as toys. They are made in different sizes and sold as soprano, tenor, bass, and contrabass.

Though unlikely it is not impossible that there is an allusion to the instrument in *Coriolanus* (III. 2, 112):

> *Cor.* My throat of war be turn'd,
> Which quired with my drum, into a pipe
> Small as an eunuch.

Sir Thomas Hanmer and Mr. Dyce have substituted 'eunuch's' for 'eunuch' in the belief that the letter 's' had been left out, the Folio of 1623, in which *Coriolanus* first appeared, being carelessly printed. But if Shakespeare wrote 'eunuch,' the passage could be explained by supposing that Coriolanus wished his voice to be turned from the voice of the trumpet, an instrument which quires, or is played in concert, with the drum, into the tremulous and emasculated voice of the eunuch-flute. C. W.

EUPHONIUM. [The small bass instrument of the Saxhorn family, usually pitched in C or B♭. It is sometimes called the Tuba, but must not be confounded with the Tuba or Bombardon in F or E♭, a fifth below. Its fundamental pitch is the same as that of the Baritone Saxhorn, but as its calibre is larger, the tone is fuller, broader, and more powerful.] It is usually furnished with four valves, sometimes even with five, the first three worked by the fingers of the right hand, and severally depressing the pitch by a semitone, a tone, and a minor third; the fourth by the left hand applied to a different part of the instrument, and lowering the pitch by two tones and a semitone. (See VALVE.)

Since the gradual disuse of the Serpent and Ophicleide, the Euphonium has become the chief representative of the eight-foot octave among brass instruments. In quality it does not blend so well with the strings as the Horns and Trom-

bones, and is held, by some, to be less sympathetic than its forerunners. Its use in the orchestra is therefore somewhat limited, but by its bold vocal tone and great compass it is well suited for its place as an important solo instrument in military and brass bands.

The fundamental note is obviously C or B♭ according to the pitch of the instrument, but a player with a good lip can take several válve notes below this.

The upper limit may be generally described as three octaves above the fundamental before named, although accomplished players obtain sounds very much more acute. It is usually written for in the bass clef, and in orchestral usage the real notes are given. If the instrument be in C, as it generally is in the orchestra, no change is necessary; but a player on the B♭ or military instrument, in effect, systematically raises the whole scale through the interval of a tone. [See TRANSPOSING INSTRUMENTS.] Some French writers, however, transpose the part exactly as is done for the clarinets and cornet, [and the same thing is done in this country when this part is written in the treble clef]. The Euphonium, though not written for by the older composers, is freely employed in more recent instrumentation. W. H. S.; additions by D. J. B.

EURYANTHE. The sixth of Weber's seven operas. Text by Helmine von Chezy. Overture completed Oct. 19, 1823; produced Oct. 25, 1823, at the Kärnthnerthor Theatre, Vienna; in London, at Covent Garden, June 29, 1833; at Paris, Grand Opéra, April 6, 1831, with interpolations from 'Oberon'; at Théâtre Lyrique, with new libretto, Sept. 1, 1857. The opera is damaged by its libretto, and, except its fine overture, is too little known. [Many points of close resemblance between its plot and that of 'Lohengrin' have often been noticed; even if the one suggested the other, the transformation of the puppets of 'Euryanthe' into the living persons of 'Lohengrin' is the work of genius. On Jan. 19, 1904, it was once more revived at the Vienna Hofoper, with many alterations or omissions, both in words and music. The alterations were made by Gustav Mahler, the conductor.] G.

EVACUATIO (Ital. *Evacuazione*; Germ. *Ausleerung*; Eng. *Evacuation*). A term used in the 15th and 16th centuries, to denote the substitution of a 'void' or open-headed note for a 'full,' or closed one; *e.g.* of a minim for a crotchet. The process was employed, both with black and red notes, and continued for some time after the invention of printing; but, its effect upon the duration of the notes concerned differed considerably at different epochs. Morley,[1] writing in 1597, says 'If a white note, wh they called blacke voyd, happened amongst blacke full, it was diminished of halfe the value, so that a minime was but a crotchet, and a semibriefe a minime,' etc. But, in many cases, the diminution was one-third, marking the difference between 'perfection' and 'imperfection'; or one-fourth, superseding the action of the 'point of augmentation.' For the explanation of some of these cases, see NOTATION. W. S. R.

[1] *A Plaine and Easie Introduction.* Annotation at the end of the volume, referring to p. 9.

EVANS, CHARLES SMART, born 1778, was a chorister of the Chapel Royal under Dr. Ayrton. On arriving at manhood he became the possessor of an unusually fine alto voice. On June 14, 1808, he was admitted a gentleman of the Chapel Royal. He was the composer of some anthems (two of them printed), and of many excellent glees and other pieces of vocal harmony, most of which have been published. In 1811 the Glee Club awarded him a prize for his Cheerful Glee, 'Beauties have you seen a toy,' and in the following year a second for his 'Fill all the glasses.' In 1817 he carried off the prize offered by the Catch Club for the best setting of William Linley's 'Ode to the Memory of Samuel Webbe,' the eminent glee composer. In 1821 he obtained another prize for his glee, 'Great Bacchus.' He also produced several motets for the use of the choir of the Portuguese Ambassador's chapel in South Street, Grosvenor Square (of which he was a member), some of which are printed in Vincent Novello's Collection of Motets. He was for some years organist of St. Paul's, Covent Garden. Evans died in London, Jan. 4, 1849. W. H. H.

EVEN TEMPERAMENT. See EQUAL TEMPERAMENT.

EVERS, CARL, pianist and composer, born at Hamburg, April 8, 1819, made his first appearance when twelve, and shortly after went on long professional tours. Returning to Hamburg in 1837 he studied composition under Carl Krebs. On a visit to Leipzig in 1838 he made the acquaintance of Mendelssohn, whose influence affected him greatly, and started him in instrumental compositions on an extended scale. In the following year he went to Paris, and was kindly received by Chopin and Auber, where he remained for some time working hard. In 1841 he was appointed chapel-master at Grätz, where he started a music business in 1858, taught, and otherwise exercised his profession. From 1872 until his death, Dec. 31, 1875, he resided in Vienna. His compositions comprise four pianoforte sonatas, of which those in B minor, B♭, and D minor were much esteemed; twelve 'Chansons d'amour' for piano; fugues; fantasias; solo and part-songs, etc. Haslinger of Vienna and Schott of Mayence were his publishers. His sister KATINKA, born 1822, was favourably known as an opera-singer in Germany and Italy. M. C. C.

EVOVAE (*or* EUOUAE). A technical word,

formed from the vowels of the last clause of the 'Gloria Patri'—*seculorum. Amen*; and used, in mediæval Office-Books, as an abbreviation, when, at the close of an Antiphon, it is necessary to indicate the Ending of the Tone adapted to the following Psalm, or Canticle.

The following example, indicating the Second Ending of the First Tone, is taken from an Office-Book printed at Magdeburg in 1613. A

modern German critic, F. M. Böhme, mistakes the vowels E.V.O.V.A.E—for a familiar Greek word, and is greatly exercised at the admission of a 'Bacchanalian shout' into the Office-Books of the Church! 'Statt *Amen* der bacchische Freudenruf, *evovae!*' (Böhme, *Das Oratorium*, Leipzig, 1861.) W. S. R.

EWER & Co. John Ewer & Co. were in trade as 'importers of foreign music' at 1 Bow Church Yard, Cheapside, in or before the year 1824. The firm afterwards became Ewer & Johanning at the same place, with another address at Tichbourne Street, Piccadilly. In 1848 they were at 72 Newgate Street, in 1853 their address was 390 Oxford Street, and in 1865, 87 Regent Street, where William Witt is advertised as 'sole proprietor.' They held copyright of some of Mendelssohn's work, and did an important business.

In 1867 they became incorporated into the house of Novello, Ewer & Co., and removed to 1 Berners Street, the present address of the firm. F. K.

EXIMENEO, ANTONIO, Spanish Jesuit, born about 1732 at Balbastro in Aragon. Having studied mathematics and music at Salamanca he became professor of both sciences at Segovia. On the expulsion of the Jesuits from Spain he settled in Rome, and died there in 1798. His work *Dell' origine della musica, colla storia del suo progresso, decadenza, e rinnovazione* (1774), contains the germ of the theories afterwards elaborated by Wagner, and at the time raised a host of polemical writings, to which even Padre Martini contributed his share. He proposed to abolish the strict laws of counterpoint and harmony, and apply the rules of prosody to musical composition. He was the first scientific exponent of the doctrine that the aim of music is to express emotion, and thus exercised considerable influence on musical æsthetics. His contemporaries stigmatised his book as an 'extraordinary romance, in which he seeks to destroy music without being able to reconstruct it'—a verdict which curiously anticipates that often passed upon Wagner in later days. F. G.

EXPERT, HENRY, French writer on music, born at Bordeaux, May 12, 1863, came to Paris in 1881 and entered the 'École de Musique classique' founded by Niedermeyer; he subsequently completed his musical studies under César Franck and Eugène Gigout. Irresistibly attracted by the music of the French Renaissance, Expert has devoted himself heart and soul to the study of the music of this period, and to the publications of its achievements. Under the general title of *Les Maîtres Musiciens de la Renaissance française* (Leduc, Paris), he has published, since 1894, a great quantity of examples of Franco-Flemish art of the 15th and 16th centuries, in a manner which is a model of scrupulous erudition and keen critical insight. The work appears in parts, and is divided into six sections, as follows:—I. (title as above): seventeen books, containing works of Lasso, Goudimel, Costeley, Claudin de Sermisy, Consilium, Courtoys, Deslonges, Dulot, Gascongne, Hesdin, Jacotin, Janequin, Lombart, Sohier, Vermont, Brumel, P. de la Rue, Mouton, Fevin, Mauduit, le Jeune, Regnard, and E. du Caurroy. II. *Bibliographie thématique* (Catalogue of French and Flemish works of the 15th and 16th centuries). III. *Les Théoriciens de la Musique au temps de la Renaissance.* IV. *Sources du Corpus* (Authorities). V. *Commentaires* (in preparation). VI. *Extraits des Maîtres Musiciens de la Renaissance française* (separate examples of sacred and secular music). Besides this monumental work, M. Expert has written a remarkable book on the Huguenot Psalter of the 16th century (Fischbacher, Paris). At present he is professor at the École nationale de musique classique (École Niedermeyer) and he has lately founded, in connection with M. Ed. Maury, a 'Société d'études musicales et de concerts historiques,' the inaugural *Conférence* of which took place in June 1903, at the 'Faculté de théologie protestante de Paris.' G. F.

EXPOSITION is the putting out or statement of the musical subjects upon which any movement is founded, and is regulated by various rules in different forms of the art. In fugue the process of introducing the several parts or voices is the exposition, and it ends and passes into episode or counter-exposition when the last part that enters has concluded with the last note of the subject. The rules for fugal exposition are given in the article FUGUE. Counter-exposition is the reappearance of the principal subject or subjects, after complete exposition, or such digressions as episodes. In forms of the harmonic order the term Exposition is commonly used of the first half of a movement in Binary form, because that part contains the statement of the two principal subjects. This use of the word is evidently derived from the incomplete and superficial view which was the legacy of theorists of some generations back, that a Binary movement was based on two tunes which for the sake of variety are put into two different keys. Hence it is not so apt in this sense as it is in connection with fugue. But it may be defended as less open to objection when it is used as the

obverse to Recapitulation, so as to divide Binary movements into three main portions, the Exposition, Development, and Recapitulation ; and though it leaves out of count the vital importance of the contrast and balance of key, it is likely to be commonly accepted in default of a better. See also FORM. C. H. H. P.

EXPRESSION. That part of music which may be called the 'soul' of the performance. It is hard to define exactly wherein it lies, but it is easy to recognise its presence or absence. The means of attaining it are by slight variations of force or quality of tone, and by certain departures from absolutely strict tempo. It is only too easy to exaggerate expression by making these alterations too marked. Expression is an important factor in style, though the two are not synonymous. The familiar directions, like 'piano,' 'forte,' 'rallentando,' 'crescendo,' etc., are usually called marks of expression.

EXPRESSION STOP. See HARMONIUM.

EXTEMPORE PLAYING. The art of playing without[1] premeditation, the conception of the music and its rendering being simultaneous. The power of playing extempore evinces a very high degree of musical cultivation, as well as the possession of great natural gifts. Not only must the faculty of musical invention be present, but there must also be a perfect mastery over all mechanical difficulties, that the fingers may be able to render instantaneously what the mind conceives, as well as a thorough knowledge of the rules of harmony, counterpoint, and musical form, that the result may be symmetrical and complete.

This being the case it is not surprising that the greatest extempore players have usually been at the same time the greatest composers, and we find in fact that all the great masters, including Bach, Mozart, and Beethoven, have shown much fondness for this form of art, and have even exercised it in public. Mozart improvised in public at the age of fourteen, as is shown by the programme of a concert given as an exhibition of his powers by the Philharmonic Society of Mantua on Jan. 16, 1770, which included an extempore sonata and fugue for the harpsichord, and a song with harpsichord accompaniment, to be sung to words given by the audience.

These extemporaneous performances were sometimes entirely original, but more frequently consisted of the development (often in the form of a fugue) of a theme given by the listeners, and they not unfrequently took the form of a competition between two players, each giving the other subjects on which to extemporise. Of this kind of contest, whether avowed or not, there are many examples in musical history, one of the most celebrated being that between Bach and Marchand (which, however, never actually came off); another was between Handel and Domenico Scarlatti.

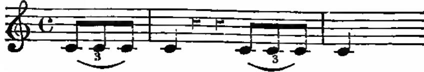
Sometimes two players would extemporise together, either on one or two pianofortes. This appears to have been done by Mozart and Clementi at Vienna in 1781, and also by Beethoven and Woelfl, who used to meet in 1798 at the house of Freiherr von Wetzlar, and, seated at two pianofortes, give each other themes upon which to extemporise, and, according to Seyfried (Thayer, ii. 27), 'created many a capriccio for four hands, which, if it could have been written down at the moment of its birth, would doubtless have obtained a long existence.'

It is probable that in most of these competitions the competitors were but ill-matched, at least when one of them happened to be a Bach or Beethoven ; and the wonder is that men were found willing to measure their strength against such giants. Occasionally their presumption was rebuked, as when Himmel extemporised before Beethoven in 1796, and Beethoven having listened for a considerable time, turned to Himmel and asked 'Will it be long before you begin?' Beethoven himself excelled all others in extempore playing, and according to the accounts of his contemporaries his playing was far finer when improvising than when playing a regular composition, even if written by himself. Czerny has left a most interesting account of Beethoven's extempore playing, which is quoted by Thayer (ii. 347), and is worth reproducing here, since it helps us to realise to some extent the effect of his improvising. Czerny says—'Beethoven's improvisation, which created the greatest sensation during the first few years after his arrival at Vienna, was of various kinds, whether he extemporised upon an original or a given theme. 1. In the form of the first movement or the final rondo of a sonata, the first part being regularly formed and including a second subject in a related key, etc., while the second part gave freer scope to the inspiration of the moment, though with every possible application and employment of the principal themes. In allegro movements the whole would be enlivened by *bravura* passages, for the most part more difficult than any in his published works. 2. In the form of variations, somewhat as in his Choral Fantasia, op. 80, or the last movement of the 9th Symphony, both of which are accurate images of this kind of improvisation. 3. In mixed form, after the fashion of a *potpourri*, one melody following another, as in the Fantasia op. 77. Sometimes two or three insignificant notes would serve as the material from which to improvise a complete composition, just as the Finale of the Sonata in D, op. 10, No. 3, is formed from its three opening notes.'[2] Such a theme, on which he had 'göttlich phantasirt' at Count Browne's

[1] The German term is curious—*aus dem Stegreife*—'from the stirrup.'

[2] A less definite, but still highly interesting, account of his improvisations is given by Starke in Nohl's *Beethoven nach den Schilderungen seiner Zeitgenossen*, 1877.

house, has been preserved (Nohl's *Beethoven's Leben*, iii. 644):—



Another given him by Vogler was the scale of C major three bars, *alla breve* (Thayer, ii. 236).

Since Beethoven many great musicians have extemporised in public—Mendelssohn, Hummel, Moscheles, and, on the organ, our own Wesley, have all been celebrated for their improvisations; but the practice of publicly extemporising, if not extinct, is now very rare. [On Feb. 21, 1895, Miss Marie Wurm gave a pianoforte recital entirely consisting of music improvised at the moment; and Mr. Frank Merrick has won favourable opinions on many occasions by his skill in extempore playing.] Mendelssohn himself, notwithstanding his uniform success, disliked doing it, and in a letter to his father, written in Oct. 1831 (*Reisebriefe*, p. 283) even declares his determination never to extemporise in public again; while Hummel on the other hand says (*Art of Playing the Pianoforte*) that he 'always felt less embarrassment in extemporising before an audience of 2000 or 3000 persons than in executing any written composition to which he was slavishly tied down.' Even the CADENZA of a concerto, which was once the legitimate opportunity for the player to exhibit his powers of improvisation, is now usually prepared beforehand. Dr. F. J. Sawyer has written a primer of Extemporisation (Novello & Co.), but it may be doubted if the art of improvisation could ever be satisfactorily taught. F. T.

EXTRAVAGANZA. Any work of art in which accepted forms are caricatured, and recognised laws violated, with a purpose. A musical extravaganza must be the work of a musician familiar with the forms he caricatures and generally amenable to the laws he violates. Mozart's 'Musikalischer Spass' (Köchel, No. 522) is an instance on a small scale. The pantomime overture would seem to be the most legitimate field for the exercise or gratification of musical extravagance, [and the skill with which themes well known to the musical part of the audience were introduced into pantomime music at the Crystal Palace and elsewhere, in the days of Mr. Oscar Barrett, seems now to have entirely disappeared, for mere quotations from familiar scores, such as are in vogue in the present day, have nothing to do with extravaganza]. Ludicrous effects might be produced by assigning passages to instruments inapt though not altogether incompetent to their execution; by treating fragments of familiar tunes contrapuntally, and the like. Perhaps no field for musical invention has been less worked than that of extravaganza. Of no class of music does there exist so little as of that which is ludicrous in itself, and not dependent for its power of exciting risibility on the words connected with it, or the circumstances under which it is heard. Haydn's Toy Symphonies are in a certain sense extravaganzas. His 'Farewell Symphony,' though open to a ludicrous interpretation, is, as Mendelssohn truly said of it, a 'melancholy little piece.' Indeed, as orchestras now are, it cannot be performed as intended. Mendelssohn's own 'Funeral March' for Pyramus is an exquisite piece of humour. J. H.

EYBLER, JOSEPH EDLER VON, capellmeister to the Emperor of Austria, born at Schwechat, near Vienna, Feb. 8, 1765. His father, a schoolteacher and choir-master, taught him singing and the principal instruments, and a place was procured for him in the boys' seminary at Vienna. While there he took lessons (1777-79) from Albrechtsberger. [In 1793 the master gave the pupil a testimonial in which he places Eybler as second only to Mozart. *Quellen-Lexikon.*] On the dissolution of the seminary in 1782, Eybler turned his attention to the law, but was driven by the sudden impoverishment of his parents to earn his bread by music. Haydn now proved a true friend, not only encouraging him in his studies but recommending him to Artaria the publisher. In the meantime some of his symphonies were performed, and both Haydn (1787) and Mozart (1790) testified to his ability as a composer and his fitness for the post of capellmeister. Eybler nursed Mozart during his last illness, and after his death it was to him that the widow at once committed the task of completing the 'Requiem.' He accepted the charge in a letter dated Dec. 21, 1791, and began the work, but soon gave it up. He was appointed choir-master to a church in the suburbs in 1792, and in 1794 to the 'Schotten' monastery in Vienna itself. About this time his first work, three String Quartets, dedicated in Italian to Haydn, was published by Traeg. In 1804 he was appointed vice-capellmeister, in 1810 music-master to the imperial children, and, on Salieri's retirement in 1824, chief capellmeister. In 1834 he was ennobled by the Emperor, whose meetings for quartet practice he had regularly attended. A year before he had been obliged to give up the exercise of his profession owing to a paralytic stroke while conducting Mozart's 'Requiem.' He died at Schönbrunn, July 24, 1846.

As a composer, Eybler restricted himself almost entirely to sacred music, Mozart having confirmed his own conviction that his disposition was too simple and quiet for the intrigues and conflicts of the stage. [His opera, 'L'Épée enchantée' was performed at the Leopoldstadt Theatre in Vienna in 1790, and some other operas are in the possession of the Gesellsch. der Musikfreunde.] For the 'Tonkünstler-Societät,' of which he was many years president, he wrote the cantata 'Die Hirten bei der Krippe' (1794); and for the Emperor 'Die vier letzten Dinge,' an oratorio

first performed at court (1810) and afterwards by the Tonkünstler-Societät. His printed works —chamber-music, pieces for pianoforte and other instruments, vocal music, and several symphonies—were favourites in their day, but his church-music is of greater value. Here, the devotional spirit with which the whole is penetrated, the flow of the voice-parts, and the appropriate if at times too powerful instrumentation—all remind us of Michael Haydn at his best. His best work, the 'Requiem in C minor,' which is fine as a whole and even sublime in parts, has been brought into notice by Rochlitz (*Allg. mus. Zeitung*, 1826, No. 19). Haslinger published the Requiem, seven Masses, two Te Deums, thirteen Offertoriums, Graduales, and Vespers, the greater part of which are still in use. Eybler's quiet life, undisturbed by jealousy or envy, made him respected by high and low. For many years he held an honourable post, and saw the great heroes of his art, Gluck, Mozart, Haydn, Beethoven, and Schubert, carried to the grave.—In England Eybler is hardly even a name; and beyond a single movement, edited by Sir John Stainer, it is probable that the various English collections of church music contain no composition of his.

END OF VOL. I

BEETHOVEN AND HIS FORERUNNERS

By DANIEL GREGORY MASON

Author of "From Grieg to Brahms," etc.

Cloth 12mo

This book tells, in untechnical fashion, the story of the development of instrumental music up to its first great culmination in the work of Beethoven. Beginning with a concise summary of the chief periods that can be discriminated in the history of music, it proceeds to examine in more detail the great choral epoch of Palestrina, describing the mystical spirit of which his music was perhaps the profoundest and most adequate artistic expression; then it studies the influence of the modern spirit of idealism on the contents and methods of musical art, and discusses in language intelligible to the layman the principles of design on which pure music (as distinguished from dramatic and programme music) is based; and finally sets forth the contributions made to this art by Haydn, Mozart, and Beethoven. The latter part of the book is frankly personal in treatment; that is, it introduces the reader to the characteristic traits of these three great masters' art through an acquaintance with their characteristics as men. In method "Beethoven and his Forerunners" is thus, like Mr. Mason's earlier book, "From Grieg to Brahms," part historical and psychological, and in part biographical. The chapters are: The Periods of Musical History; Palestrina and the Music of Mysticism; The Modern Spirit; The Principles of Pure Music; Haydn; Mozart; Beethoven; Conclusion.

FROM GRIEG TO BRAHMS

STUDIES OF SOME MODERN COMPOSERS AND THEIR ART

By DANIEL GREGORY MASON

Cloth 12mo $1.50 net

"Mr. Mason's felicity in characterizing the important things as regards composers and compositions seems to me remarkable; he so often expresses what one has felt, but never quite formulated." — ARTHUR FOOTE.

"A valuable addition to our musical literature." — WALTER DAMROSCH.

THE HISTORY OF AMERICAN ART

EDITED BY JOHN C. VAN DYKE

THE HISTORY OF AMERICAN MUSIC

By LOUIS C. ELSON

Musical Editor of the Boston Advertiser

FULLY ILLUSTRATED WITH TWELVE PHOTOGRAVURE PLATES AND OVER ONE HUNDRED ILLUSTRATIONS IN THE TEXT

Cloth Imperial 8vo $5.00 net

In this "History of American Music," the second of the series, the author has told of the beginnings, the foreign influences, the changes, the methods, the personal endeavors, that have gone to the making of our present music. Many of the events here narrated occurred but yesterday or are happening to-day, and hence have little perspective for the historian. It has not always been possible to say a final word, even if that were desirable. In its stead the widely scattered facts have been brought together and arranged sequentially that they might tell their own story and point their own conclusion.

CONTENTS

I. The Religious Beginnings of American Music.
II. Early Musical Organizations.
III. Instrumental Music and American Orchestras.
IV. Musical Societies and Institutions.
V. Opera in America.
VI. The Folk-Music of America.
VII. National and Patriotic Music.
VIII. American Tone-Masters.
IX. The Orchestral Composers of America.
X. Other Orchestral Composers of America.
XI. Operatic, Cantata, and Vocal Composers.
XII. American Song-Composers.
XIII. Organists, Choir, and Chorus Leaders.
XIV. The American Composers for Pianoforte.
XV. American Women in Music.
XVI. Musical Criticism and Authorship.
XVII. The Musical Education of the Present.
XVIII. Qualities and Defects of American Music.
General Bibliography. Index.
